FORM 10-Q

✓ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the Quarterly Period Ended June 30, 2015

OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

Commission file number 001-35416

U.S. Silica Holdings, Inc.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
Incorporation or Organization)
8490 Progress Drive, Suite 300
Frederick, Maryland 21701
(Address of Principal Executive Offices) (Zip Code)
(301) 682-0600
(Registrant's telephone number, including area code)

26-3718801
(I.R.S. Employer
Identification No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of July 27, 2015, 53,388,125 shares of common stock, par value \$0.01 per share, of the registrant were outstanding.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited; dollars in thousands, except per share amounts)

NOTE A—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Consolidation

The accompanying Condensed Consolidated Financial Statements (the “Financial Statements”) of U.S. Silica Holdings, Inc. (“Holdings,” and together with its subsidiaries “we,” “us” or the “Company”) included in this Quarterly Report on Form 10-Q, have been prepared in accordance with generally accepted accounting principles in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X issued by the U.S. Securities and Exchange Commission (“SEC”). They do not contain certain information included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014; therefore, the interim Condensed Consolidated Financial Statements should be read in conjunction with that Annual Report on Form 10-K. In the opinion of management, all adjustments necessary for a fair presentation of the Financial Statements have been included. Such adjustments are of a normal, recurring nature. We have reclassified certain immaterial amounts in the prior years’ assets section of the consolidated balance sheets and operating activities section of the consolidated statement of cash flows to conform to the current year presentation. These reclassifications had no effect on previously reported total assets and net cash flows from operations.

In order to make this report easier to read, we refer throughout to (i) our Condensed Consolidated Balance Sheets as our “Balance Sheets,” (ii) our Condensed Consolidated Statements of Operations as our “Income Statements,” and (iii) our Condensed Consolidated Statements of Cash Flows as our “Cash Flows.”

Unaudited Interim Financial Statements

The accompanying Balance Sheet as of June 30, 2015; the Income Statements for the three and six months ended June 30, 2015 and 2014; the Condensed Consolidated Statements of Comprehensive Income for the three and six months ended June 30, 2015 and 2014; the Condensed Consolidated Statements of Stockholders' Equity for the six months ended June 30, 2015; the Cash Flows for the six months ended June 30, 2015 and 2014; and other information disclosed in the related notes are unaudited. The Balance Sheet as of December 31, 2014 was derived from our audited consolidated financial statements as included in our 2014 Annual Report.

Use of Estimates and Assumptions

The preparation of the Financial Statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the related disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. The more significant areas requiring the use of management estimates and assumptions relate to mineral reserves that are the basis for future cash flow estimates utilized in impairment calculations and units-of-production amortization calculations; environmental, reclamation and closure obligations; estimates of recoverable minerals; estimates of allowance for doubtful accounts; estimates of fair value for certain reporting units and asset impairments (including impairments of goodwill and other long-lived assets); write-downs of inventory to net realizable value; equity-based compensation expense; post-employment, post-retirement and other employee benefit liabilities; valuation allowances for deferred tax assets; reserves for contingencies and litigation; and the fair value and accounting treatment of financial instruments including derivative instruments. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Accordingly, actual results may differ significantly from these estimates under different assumptions or conditions.

Recently Issued Accounting Pronouncements

In April 2015, the Financial Accounting Standards Board (“FASB”) issued an Accounting Standards Update, Interest-Imputation of Interest, which simplifies presentation of debt issuance costs. The new standard requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of debt liability, consistent with debt discounts or premiums. The new standard will be effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within fiscal years beginning after December 15, 2016. Early adoption of the amendments in this Update is permitted for financial statements that have not been previously issued. We have elected to adopt the standard early and have presented debt issuance costs as a direct

deduction from the carrying amount of debt on our Balance Sheets as of June 30, 2015 and December 31, 2014.

7

NOTE B—CAPITAL STRUCTURE AND ACCUMULATED COMPREHENSIVE INCOME

Common Stock

Our Amended and Restated Certificate of Incorporation, authorizes up to 500,000,000 shares of common stock, par value of \$0.01. Subject to the rights of holders of any series of preferred stock, all of the voting power of the stockholders of Holdings shall be vested in the holders of the common stock. There were 53,383,613 shares of common stock issued and outstanding at June 30, 2015. As of June 30, 2014, there were 53,733,092 shares issued and outstanding.

In 2015, our Board of Directors declared quarterly cash dividends as follows:

Dividends per Common Share	Declaration Date	Record Date	Payable Date
\$0.125	February 12, 2015	March 16, 2015	April 3, 2015
\$0.125	May 8, 2015	June 15, 2015	July 6, 2015

All dividends were paid as scheduled.

Any determination to pay dividends and other distributions in cash, stock, or property by Holdings in the future will be at the discretion of our Board of Directors and will be dependent on then-existing conditions, including our business conditions, our financial condition, results of operations, liquidity, capital requirements, contractual restrictions including restrictive covenants contained in our debt agreements, and other factors. Additionally, because we are a holding company, our ability to pay dividends on our common stock may be limited by restrictions on the ability of our subsidiaries to pay dividends or make distributions to us, including restrictions under the terms of the agreements governing our indebtedness.

Preferred Stock

Our Amended and Restated Certificate of Incorporation authorizes our Board of Directors to issue up to 10,000,000 shares, in the aggregate, of preferred stock, par value of \$0.01 in one or more series, to fix the powers, preferences and other rights of such series, and any qualifications, limitations or restrictions thereof, including the dividend rate, conversion rights, voting rights, redemption rights and liquidation preference, and to fix the number of shares to be included in any such series, without any further vote or action by our stockholders.

There are no shares of preferred stock issued or outstanding at June 30, 2015. At present, we have no plans to issue any preferred stock.

Employee Stock Awards

We grant stock options, restricted stock, restricted stock units and performance share units to our employees and directors under the Amended and Restated U.S. Silica Holdings, Inc. 2011 Incentive Compensation Plan. The weighted-average stock options that are antidilutive and are therefore excluded from the calculation of our diluted earnings per common share are:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Weighted-average outstanding stock options excluded	450	—	371	—

Share Repurchase Program

We are authorized by our Board of Directors to repurchase shares of our outstanding common stock from time to time on the open market or in privately negotiated transactions. As of June 30, 2015, we are authorized to repurchase up to \$50 million of our common stock through December 11, 2015. Stock repurchases, if any, will be funded using our available liquidity. The timing and amount of stock repurchases will depend on a variety of factors, including the market conditions as well as corporate and regulatory considerations. Under our share repurchase program, as of June 30, 2015, we have repurchased 706,093 shares of our common stock at an average price of \$23.83 and are authorized to repurchase up to an additional \$33.2 million of our common stock.

Accumulated Other Comprehensive Income

Accumulated other comprehensive income (loss) consists of fair value adjustments associated with cash flow hedges and accumulated adjustments for net experience losses and prior service cost related to employee benefit plans. The following table presents the changes in accumulated other comprehensive income by component during the six months ended June 30, 2015:

	For the Six Months Ended June 30, 2015			Total
	Unrealized gain/(loss) on cash flow hedges	Unrealized gain/(loss) on short-term investments	Pension and other post-retirement benefits liability	
Beginning Balance	\$(134)	\$(41)	\$(19,643)	\$(19,818)
Other comprehensive income (loss) before reclassifications	(3)	49	3,225	3,271
Amounts reclassified from accumulated other comprehensive income	15	—	953	968
Ending Balance	\$(122)	\$8	\$(15,465)	\$(15,579)

Amounts reclassified from accumulated other comprehensive income (loss) related to cash flow hedges category are included in interest expense in our Income Statements and amounts reclassified related to pension and other post-retirement benefits liability category are included in the computation of net periodic pension costs, respectively, at before tax amounts.

NOTE C—BUSINESS COMBINATIONS

On July 31, 2014, we completed our acquisition of Cadre Services, Inc. ("Cadre"), a regional sand mining company based in Voca, Texas, for approximately \$98.3 million in cash.

The acquisition of Cadre resulted in goodwill of approximately \$0.2 million, none of which is deductible for tax purposes. This amount represents the residual amount of the total purchase price after allocation to the assets acquired and liabilities assumed.

The table below represents the tangible and identifiable intangible assets and liabilities based on management's assessment of the acquisition date fair value of the assets acquired and liabilities assumed:

Accounts receivable	\$6,898
Inventory	2,534
Other current assets	174
Fixed assets	73,138
Deferred tax assets (net)	13,966
Accounts payable, accrued expenses and other liabilities	(4,389)
Net tangible assets acquired	92,321
Customer relationships	1,274
Trade Name	4,478
Goodwill	244
Purchase price, net of cash acquired	\$98,317

The value of acquired intangible assets and the related estimated useful lives consist of the following:

	Estimated Useful Lives	Value
Customer relationships	15 years	\$1,274
Trade name	Indefinite	4,478
Total intangible assets		\$5,752

Pro Forma Adjusted Summary

The results of Cadre's operations have been included in the consolidated financial statements subsequent to the acquisition date.

The following unaudited pro forma consolidated financial information reflects the results of operations as if the Cadre acquisition had occurred on January 1, 2014, after giving effect to certain purchase accounting adjustments. This information does not purport to be indicative of the actual results that would have occurred if the acquisition had actually been completed on the date indicated, nor is it necessarily indicative of the future operating results or the financial position of the combined company:

	Three Months Ended June 30, 2014	Six Months Ended June 30, 2014
Sales	\$218,154	\$406,663
Net income	31,818	49,949
Basic earnings per share	0.59	0.93
Diluted earnings per share	\$0.59	\$0.92

NOTE D—ACCOUNTS RECEIVABLE

At June 30, 2015 and December 31, 2014, accounts receivable consisted of the following:

	June 30, 2015	December 31, 2014
Trade receivables	\$86,817	\$128,498
Less: Allowance for doubtful accounts	(10,082) (10,429
Net trade receivables	76,735	118,069
Other receivables	1,042	2,812
Total accounts receivable	\$77,777	\$120,881

Changes in our allowance for doubtful accounts during the six months ended June 30, 2015 are as follows:

	June 30, 2015
Beginning balance	\$10,429
Bad debt provision	(255
Write-offs	(92
Ending balance	\$10,082

NOTE E—INVENTORIES

At June 30, 2015 and December 31, 2014, inventories consisted of the following:

	June 30, 2015	December 31, 2014
Supplies	\$18,964	\$17,528
Raw materials and work in process	15,829	12,562
Finished goods	29,390	36,622
Total inventories	\$64,183	\$66,712

NOTE F—PROPERTY, PLANT AND MINE DEVELOPMENT

At June 30, 2015 and December 31, 2014, property, plant and mine development consisted of the following:

	June 30, 2015	December 31, 2014
Mining property and mine development	\$223,086	\$197,824
Asset retirement cost	10,971	9,559
Land	29,846	28,443
Land improvements	36,874	35,322
Buildings	49,791	47,149
Machinery and equipment	350,479	323,618
Furniture and fixtures	1,647	1,599
Construction-in-progress	47,376	78,997
	750,070	722,511
Accumulated depletion, depreciation and amortization	(182,873) (156,756
Total property, plant and mine development, net	\$567,197	\$565,755

The amount of interest costs capitalized in property, plant and mine development was \$281 and \$474 for the six months ended June 30, 2015 and 2014, respectively.

NOTE G—DEBT

At June 30, 2015 and December 31, 2014, debt consisted of the following:

	June 30, 2015	December 31, 2014
Senior secured credit facility:		
Revolver expiring July 23, 2018 (4.75% at June 30, 2015 and December 31, 2014)	\$—	\$—
Term loan facility—final maturity July 23, 2020 (4% - 4.5% at June 30, 2015 and 4% - 5.25% at December 31, 2014)	501,825	504,375
Less: Unamortized original issue discount	(1,887) (2,078
Less: Unamortized debt issuance cost	(6,573) (7,211
Total debt	493,365	495,086
Less: current portion	(3,324) (3,329
Total long-term portion of debt	\$490,041	\$491,757

Revolving Line-of-Credit

We have a \$50 million revolving line-of-credit (the “Revolver”), with zero drawn and \$3.1 million allocated for letters of credit as of June 30, 2015, leaving \$46.9 million available under the Revolver.

Debt Maturities

At June 30, 2015, contractual maturities of long-term debt are as follows:

2015	\$2,550
2016	5,100
2017	5,100
2018	5,100
2019	5,100
Thereafter	478,875
	\$501,825

Our senior secured credit facility is secured by substantially all of our assets and a pledge of the equity interests in certain of our subsidiaries. The facility contains covenants that, among other things, govern our ability to create, incur or assume indebtedness and liens, to make acquisitions or investments, to pay dividends and to sell assets. The facility also

requires us to maintain a consolidated total net leverage ratio of no more than 3.75:1.00 as of the last day of any fiscal quarter whenever usage of the Revolver (other than certain undrawn letters of credit) exceeds 25% of the Revolver commitment. As of June 30, 2015, we are in compliance with all covenants in accordance with our senior secured credit facility.

NOTE H—ASSET RETIREMENT OBLIGATIONS

Mine reclamation costs, or future remediation costs for inactive mines, are accrued based on management's best estimate at the end of each period of the costs expected to be incurred at a site. Such cost estimates include, where applicable, ongoing care, maintenance and monitoring costs. Changes in estimates at inactive mines are reflected in earnings in the period an estimate is revised.

As of June 30, 2015, we had recorded a liability of \$13.1 million in other long-term obligations related to our asset retirement obligation. Changes in the asset retirement obligation during the six months ended June 30, 2015, are as follows:

	June 30, 2015
Beginning balance	\$11,283
Payments	—
Accretion	390
Additions and revisions of prior estimates	1,412
Ending balance	\$13,085

NOTE I—FAIR VALUE ACCOUNTING

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Fair value is estimated by applying the following hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

Level 1—Quoted prices in active markets for identical assets or liabilities.

Level 2—Observable inputs other than quoted prices in active markets for identical assets and liabilities, quote prices for identical or similar assets or liabilities in inactive markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3—Inputs that are generally unobservable and typically reflect management's estimate of assumptions that market participants would use in pricing the asset or liability.

Cash Equivalents

Due to the short-term maturity, we believe our cash equivalent instruments at June 30, 2015 and December 31, 2014 approximate their reported carrying values.

Short-Term Investments

In general, the fair value of our short-term investments is based on quoted prices for similar assets in active markets, or for identical assets or similar assets in markets in which there were fewer transactions (Level 2). Money market mutual funds are based on calculated net asset value and are reported in Level 1. Variable rate demand obligations underwritten and remarketed by a financial institution are priced at par value.

Long-Term Debt, including current maturities

We believe that the fair values of our long-term debt, including current maturities, approximate their carrying values based on their effective interest rates compared to current market rates.

Derivative Instruments

The estimated fair value of our derivative assets (interest rate caps) are recorded at each reporting period and are based upon widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each derivative contract. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. We also incorporate credit valuation

adjustments to appropriately reflect both our nonperformance risk as well as that of the respective counterparty in the fair value measurements.

Although we have determined that the majority of the inputs used to value our derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with our derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default of ourselves and our counterparties. However, as of June 30, 2015, we have assessed that the impact of the credit valuation adjustments on the overall valuation of our derivative positions is not significant. As a result, we have determined that our derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

In accordance with the fair value hierarchy, the following table presents the fair value as of June 30, 2015 of those assets that we measure at fair value on a recurring basis:

	Level 1	Level 2	Total
Short-term investments	\$980	\$69,760	\$70,740
Interest rate derivatives	—	—	—
Net asset	\$980	\$69,760	\$70,740

NOTE J—SHORT-TERM INVESTMENTS

We have segregated funds into designated accounts with investment brokers who manage our short-term investment portfolio. Those funds are held on an available-for-sale basis and are therefore reported at fair value on the balance sheet. The following table summarizes our available-for-sale short-term investments as of June 30, 2015:

	Aggregate Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Money market mutual funds	\$980	\$—	\$—	\$980
Fixed income securities:				
Certificates of deposit	24,650	7	—	24,657
Commercial paper	10,175	10	—	10,185
Corporate notes and bonds	12,498	—	(5) 12,493
Government agencies	16,662	13	(9) 16,666
U.S. Treasuries	2,148	—	—	2,148
Variable Rate Demand Obligations	3,611	—	—	3,611
Total available-for-sale investments	\$70,724	\$30	\$(14) \$70,740

As of June 30, 2015, we considered any declines in market value of our short-term investment portfolio to be temporary in nature and did not consider any of our investments other-than-temporarily impaired. We typically invest in highly-rated securities, and our investment policy generally limits the amount of credit exposure to any one issuer. The policy requires investments generally to be investment grade, with the primary objective of minimizing the potential risk of principal loss. Fair values were determined for each individual security in the investment portfolio. When evaluating an investment for other-than-temporary impairment, we review factors such as the length of time and extent to which fair value has been below its cost basis, the financial condition of the issuer and any changes thereto, changes in market interest rates, and our intent to sell, or whether it is more likely than not it will be required to sell, the investment before recovery of the investment's cost basis. As of June 30, 2015, we did not recognize any impairment charges.

NOTE K—COMMITMENTS AND CONTINGENCIES

Future Minimum Annual Commitments at June 30, 2015:

	Operating Leases	Minimum Purchase Commitments
2015	\$22,481	\$19,384
2016	45,034	31,661
2017	42,671	21,529
2018	40,961	17,442
2019	34,415	11,147
Thereafter	104,921	16,778
Total future lease and purchase commitments	\$290,483	\$117,941

Operating Leases

We are obligated under certain operating leases for railroad cars, office space, mining property, mining/processing equipment and transportation and other equipment. Certain operating lease agreements include options to purchase the equipment for fair market value at the end of the original lease term. In general, the above leases include renewal options and provide that we pay for all utilities, insurance, taxes and maintenance. Expense related to operating leases and rental agreements totaled approximately \$11.7 million and \$8.2 million for the three months ended June 30, 2015 and 2014, respectively, and \$21.7 million and \$15.3 million for the six months ended June 30, 2015 and 2014, respectively. As of June 30, 2015, we have no obligations under a capital lease.

Minimum Purchase Commitments

We enter into service agreements with our transload service providers and transportation service providers. Some of these agreements require us to purchase a minimum amount of services over a specific period of time. Any inability to meet these minimum contract requirements requires us to pay a shortfall fee, which is based on the difference between the minimum amount contracted for and the actual amount purchased.

Other Commitments and Contingencies

Our operating subsidiary, U.S. Silica Company (“U.S. Silica”), has been named as a defendant in various product liability claims alleging silica exposure causing silicosis. During the three months ended June 30, 2015, no new claims were brought against U.S. Silica. As of June 30, 2015, there were 77 active silica-related products liability claims pending in which U.S. Silica is a defendant. Although the outcomes of these claims cannot be predicted with certainty, in the opinion of management, it is not reasonably possible that the ultimate resolution of these matters will have a material adverse effect on our financial position or results of operations that exceeds the accrual amounts.

For periods prior to 1986, U.S. Silica had numerous insurance policies and an indemnity from a former owner that covered silicosis claims. In the fourth quarter of 2012, U.S. Silica settled all rights under the indemnity and its underlying insurance. The settlement was received during the first quarter of 2013. As a result of the settlement, the indemnity and related policies are no longer available to U.S. Silica and U.S. Silica will not seek reimbursement for any defense costs or claim payments. Other insurance policies, however, continue to remain available to U.S. Silica. We have recorded estimated liabilities for these claims in other long-term obligations as well as estimated recoveries under the indemnity agreement and an estimate of future recoveries under insurance in other assets on our consolidated balance sheets. As of both June 30, 2015, and December 31, 2014 other non-current assets included \$0.3 million for insurance for third-party products liability claims and other long-term obligations included \$1.4 million in third-party products claims liability.

Additionally, during the three months ended March 31, 2015, we received an unfavorable ruling in an arbitration proceeding as a result of exiting a toll manufacturing contract. The amount of the ruling was approximately \$7.6 million. The matter was settled and the settlement amount of \$6.5 million was paid on June 9, 2015, which was included in selling, general and administrative expense in our Income Statement for the six months ended June 30, 2015.

NOTE L—INCOME TAXES

For interim period reporting, we record income taxes using an estimated annual effective tax rate based upon projected annual income, forecasted permanent tax differences, discrete items and statutory rates in states in which we operate.

At the end

14

of each interim period, we update the estimated annual effective tax rate, and if the estimated tax rate changes based on new information, we make a cumulative adjustment in the period. We record the tax effect of an unusual or infrequently occurring item in the interim period in which it occurs as a discrete item of tax.

In the six months ended June 30, 2015, we recorded a discrete tax benefit of \$2.9 million, which relates to the arbitration ruling described in Note K - Commitments and Contingencies.

The effective tax rate was (13)% and 27% for six months ended June 30, 2015 and 2014, respectively. The tax rate for the six months ending June 30, 2015 would have been 0% without the discrete tax benefit.

Historically, our actual effective tax rates have been lower than the statutory effective rate primarily due to the benefit received from statutory percentage depletion allowances. The deduction for statutory percentage depletion does not necessarily change proportionately to changes in income before income taxes.

NOTE M—PENSION AND POST-RETIREMENT BENEFITS

We maintain a single-employer noncontributory defined benefit pension plan covering certain employees. Net pension benefit cost recognized for the three and six months ended June 30, 2015 and 2014 are as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
Service cost	\$324	\$270	\$647	\$539
Interest cost	1,203	1,142	2,406	2,285
Expected return on plan assets	(1,375)	(1,255)	(2,749)	(2,510)
Net amortization and deferral	666	238	1,333	476
Net pension benefit costs	\$818	\$395	\$1,637	\$790

In addition, we provide defined benefit post-retirement health care and life insurance benefits to some employees. Net periodic post-retirement benefit cost recognized for the three and six months ended June 30, 2015 and 2014 are as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
Service cost	\$44	\$45	\$88	\$90
Interest cost	277	257	554	514
Expected return on plan assets	(1)	(1)	(2)	(2)
Net amortization and deferral	96	—	192	—
Net post-retirement costs	\$416	\$301	\$832	\$602

The weighted average discount rate used to determine the projected pension and post-retirement obligations was updated during the three months ended June 30, 2015, and was increased from 4.1% at December 31, 2014 to 4.5% at June 30, 2015. We contributed \$1.0 million and \$1.9 million to the qualified pension plan during the three months ended June 30, 2015 and 2014, respectively, and \$2.6 million during the six months ended June 30, 2014. We made no contributions to the plan during the preceding three month period ending March 31, 2015. Total expected employer funding contributions during the fiscal year ending December 31, 2015 are \$2.0 million for the pension plan and \$1.4 million for the post-retirement medical and life plan.

NOTE N—OBLIGATIONS UNDER GUARANTEES

We have indemnified Travelers Casualty and Surety Company of America (“Travelers”) against any loss Travelers may incur in the event that holders of surety bonds, issued on behalf of us by Travelers, execute the bonds. As of June 30, 2015, Travelers had \$9.9 million in bonds outstanding for us. The majority of these bonds, \$9.5 million, relate to reclamation requirements issued by various governmental authorities. Reclamation bonds remain outstanding until the mining area is reclaimed and the authority issues a formal release. The remaining bonds relate to such indefinite purposes as licenses, permits, and tax collection.

NOTE O—SEGMENT REPORTING

Our business is organized into two reportable segments, Oil & Gas Proppants and Industrial & Specialty Products, based on end markets. The reportable segments are consistent with how management views the markets that we serve and the financial information reviewed by the chief operating decision maker. We manage our Oil & Gas Proppants and Industrial & Specialty Products businesses as components of an enterprise for which separate information is available and is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and assess performance.

An operating segment's performance is primarily evaluated based on segment contribution margin, which excludes certain corporate costs not associated with the operations of the segment. These corporate costs are separately stated below and include costs that are related to functional areas such as operations management, corporate purchasing, accounting, treasury, information technology, legal and human resources. We believe that segment contribution margin, as defined above, is an appropriate measure for evaluating the operating performance of our segments. However, this measure should be considered in addition to, not a substitute for, or superior to, income from operations or other measures of financial performance prepared in accordance with generally accepted accounting principles. The other accounting policies of each of the two reporting segments are the same as those in Note A - Summary of Significant Accounting Policies of our Financial Statements.

In the Oil & Gas Proppants segment, we serve the oil and gas recovery market by providing fracturing sand, or "frac sand," which is pumped down oil and natural gas wells to prop open rock fissures and increase the flow rate of oil and natural gas from the wells.

The Industrial & Specialty Products segment consists of over 260 products and materials used in a variety of industries including, container glass, fiberglass, specialty glass, flat glass, building products, fillers and extenders, foundry products, chemicals, recreation products and filtration products.

The following table presents sales and segment contribution margin for the reporting segments and other operating results not allocated to the reported segments for the three and six months ended June 30, 2015 and 2014:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Sales:				
Oil & Gas Proppants	\$90,855	\$149,331	\$239,607	\$279,915
Industrial & Specialty Products	56,656	56,470	111,862	105,981
Total Sales	147,511	205,801	351,469	385,896
Segment contribution margin:				
Oil & Gas Proppants	13,257	57,060	65,451	98,688
Industrial & Specialty Products	19,531	17,615	34,987	30,802
Total segment contribution margin	32,788	74,675	100,438	129,490
Operating activities excluded from segment cost of goods sold	(2,477) (1,291) (4,822) (2,781
Selling, general and administrative	(6,575) (19,267) (33,536) (34,712
Depreciation, depletion and amortization	(13,695) (10,341) (26,938) (19,930
Interest expense	(6,249) (4,013) (13,085) (7,821
Other (expense)/income, net, including interest income	(181) 221	(170) 259
Income before income taxes	\$3,611	\$39,984	\$21,887	\$64,505

Asset information, including capital expenditures and depreciation, depletion, and amortization, by segment is not included in reports used by management in its monitoring of performance and, therefore, is not reported by segment. Goodwill of \$68.6 million has been allocated to these segments with \$47.9 million assigned to Oil & Gas Proppants and \$20.7 million to Industrial & Specialty Products.

NOTE P—SUBSEQUENT EVENTS

On July 6, 2015, we paid a cash dividend of \$0.125 per share to common stockholders of record on June 15, 2015, which had been declared by our Board of Directors on May 8, 2015.

On July 24, 2015, our Board of Directors declared a quarterly cash dividend of \$0.125 per share to common stockholders of record at the close of business on September 15, 2015, payable on October 2, 2015.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read together with the Condensed Consolidated Financial Statements and the accompanying notes included in Part I, Item 1 of this Quarterly Report on Form 10-Q as well as the Consolidated Financial Statements, the accompanying notes and the related Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014 (the "2014 Annual Report").

Overview

We are one of the largest domestic producers of commercial silica, a specialized mineral that is a critical input into a variety of attractive end markets. During our 115 year history, we have developed core competencies in mining, processing, logistics and materials science that enable us to produce and cost-effectively deliver over 260 products to customers across these markets. As of June 30, 2015, we operate 17 production facilities across the United States and control 369 million tons of reserves of commercial silica. We own one of the largest frac sand processing plants in the United States and control approximately 184 million tons of reserves that can be processed to meet American Petroleum Institute (API) frac sand size specifications. Our operations are organized into two segments based on end markets served: (1) Oil & Gas Proppants and (2) Industrial & Specialty Products. Our segments are complementary because our ability to sell to a wide range of customers across end markets allows us to maximize recovery rates in our mining operations, optimize our asset utilization and reduce the cyclicity of our earnings.

Recent Trends and Outlook

Oil and gas proppants end market trends

Increased demand for frac sand over the last several years was driven by the growth in the use of hydraulic fracturing as a means to extract hydrocarbons from shale formations. According to the 2014 Proppant Market Report, PropTester Inc., published February 2015, global frac sand consumption grew at a 51.2% compound annual growth rate from 2009 to 2014. This included 53.7% growth in frac sand demand from 2013 to 2014. We significantly expanded our sales efforts to the frac sand market in 2008 and experienced rapid growth in our sales associated with our oil and gas activities from 2008 until 2014.

Recent declines in oil prices have reduced oil and gas drilling and completion activity in North America. According to internal U.S. Silica management estimates, we expect to see continued decline in 2015 proppant demand compared to 2014 due to decreased rig count, partially offset by higher proppant per well. During the six months ended June 30, 2015, we have experienced the impacts of declined demand from our customers. The table below summarizes some revenue metrics of our Oil & Gas Proppants segment for the three months ended June 30, 2015, March 31, 2015 and December 31, 2014:

All numbers in thousands except per ton data	Three Months Ended			Percentage Change for Three Months Ended	
	June 30, 2015	March 31, 2015	December 31, 2014	June 30, 2015 vs. March 31, 2015	March 31, 2015 vs. December 31, 2014
Oil & Gas Proppants Sales	\$90,855	\$148,753	\$196,043	(39)%	(24)%
Oil & Gas Proppants Tons Sold	1,224	1,688	1,997	(27)%	(15)%
Oil & Gas Proppants Average Selling Price per Ton	\$74.23	\$88.12	\$98.17	(16)%	(10)%

A continued reduction in oil and gas drilling and completion activity may reduce frac sand demand further, which could result in us selling fewer tons, selling tons at lower prices, or both. If we sell less frac sand, or sell frac sand at lower prices, our revenue, net income, cash generated from operating activities, and liquidity would be adversely affected. We could evaluate actions to reduce cost and improve liquidity. For instance, we may further reduce our capital spending for 2015 and beyond and may delay or cancel capital projects.

We believe these fluctuations in demand and price may be temporary as the market adjusts to changing supply and demand due to energy pricing fluctuations. However, we continue to expect long-term growth in oil and gas drilling in

North American shale basins.

Oil and natural gas exploration and production companies' and oilfield service providers' preferences and expectations have been evolving in recent years. A proppant vendor's logistics capabilities have become an important differentiating factor when competing for business on both a spot and contract basis. Many of our customers

17

increasingly seek convenient in-basin proppant delivery capability from their proppant supplier. We believe that, over time, proppant customers will prefer to consolidate their purchases across a smaller group of suppliers with robust logistics capabilities and a broad offering of high performance proppants.

Industrial and specialty products end market trends

Demand in the Industrial & Specialty Products end markets is relatively stable and is primarily influenced by key macroeconomic drivers such as housing starts, light vehicle sales, repair and remodel activity and industrial production. The economic downturn beginning in 2008 decreased demand in the foundry, building products and glassmaking end markets; however, the recent economic recovery has significantly increased demand in these end markets. Moreover, the abundance of low-cost natural gas has provided a catalyst for certain U.S. industrial companies to bring production capacity back online, such as the foundry industry, boosting demand for our products. The primary end markets served by our production used in Industrial & Specialty Products are foundry, automotive, building products, sports and recreation, glassmaking and filtration.

Our Strategy

The key drivers of our growth strategy include:

- Expand our Oil & Gas Proppants production capacity and product portfolio. We continue to execute on several initiatives to increase our frac sand production capacity and augment our proppant product portfolio.

In 2014, we made an initial investment in a new Greenfield site near Fairchild, Wisconsin, which, depending on market conditions, could become operational as early as the latter half of 2016 and eventually add 3,000,000 tons of annual demonstrated frac sand capacity.

In 2014, we made an initial investment in an 800,000 ton-per-year expansion at our Pacific, Missouri facility. This project includes adding a dryer as well as a new transload facility to support the additional volume and depending on market conditions, could come online as early as the latter half of 2016.

On July 31, 2014, we completed our acquisition of Cadre, a leading regional sand mining company based in Voca, Texas. Cadre operates a single frac sand mine and plant, with an annual demonstrated capacity of about 800,000 tons of Premium Hickory® sand and has more than 65 years of high quality reserves. See accompanying Note C - Business Combinations of our Financial Statements for more information regarding this acquisition.

- Increase our presence and product offering in industrial and specialty products end markets. Our research and business development teams work in tandem with our customers to develop new products which we expect will either increase our presence and market share in certain industrial and specialty products end markets or allow us to enter new markets. We manage a robust pipeline of new products in various stages of development. Some of these products have already come to market, resulting in a positive impact on our financial results. We continue to work toward offering more value-driven industrial and specialty products that will enhance the profitability of the business.

- Optimize product mix and further develop value-added capabilities to maximize margins. We continue to actively manage our product mix at each of our plants to ensure we maximize our profit margins. This requires us to use our proprietary expertise in balancing key variables, such as mine geology, processing capacities, transportation availability, customer requirements and pricing. We expect to continue investing in ways to increase the value we provide to our customers by expanding our product offerings, adding our transportation assets, improving our supply chain management, upgrading our information technology, and creating a world class customer service model.

- Expand our supply chain network and leverage our logistics capabilities to meet our customers' needs in each strategic oil and gas basin. We continue to expand our transload network to ensure product is available to meet the in-basin needs of our customers. This approach allows us to provide strong customer service and puts us in a position to take advantage of opportunistic spot market sales. Our plant sites are strategically located to provide access to key Class I railroads, which enables us to cost effectively send product to each of the strategic basins in North America. We can ship product by truck, barge and rail with an ability to connect to short-line railroads as necessary to meet our customers' evolving in-basin product needs. We believe that our supply chain network and logistics capabilities are a competitive advantage that enables us to provide superior service for our customers. For example, in 2013, we opened our San Antonio, Texas unit-train receiving transload facility, which was built in partnership with BNSF Railway to support the Eagle Ford market. Additionally, in 2015, we opened our Odessa, Texas, two-unit-train storage capacity transload facility which was built in partnership with Union Pacific Railroad to support the Permian market. We

expect to continue to make strategic investments and develop partnerships with

18

transload operators and transportation providers that will enhance our portfolio of supply chain services that we can provide to customers. As of June 30, 2015, we have in-basin storage capacity at 42 transloads located near all of the major shale basins in the United States.

Evaluate both Greenfield and Brownfield expansion opportunities and other acquisitions. We expect to continue to leverage our reputation, processing capabilities and infrastructure to increase production, as well as explore other opportunities to expand our reserve base. We may accomplish this by developing Greenfield projects, where we can capitalize on our technical knowledge of geology, mining and processing and our strong reputation within local communities. For instance, we are evaluating the potential development of a Greenfield project in Wisconsin, which could add 3,000,000 tons of annual demonstrated frac sand capacity. Depending on market conditions, this facility could become operational in 2017. Additionally, we are continuing to actively pursue acquisitions to grow, by taking advantage of our asset footprint, our management's experience with high-growth businesses, and our strong customer relationships. Our primary objective is to acquire assets with differing levels of frac sand quality that are complementary to our Oil & Gas Proppants segment, with a focus on mining, processing and logistics to further enhance our market presence. We prioritize acquisitions that provide opportunities to realize synergies (and, in some cases, the acquisition may be accretive assuming synergies), including entering new geographic and frac sand product markets, acquiring attractive customer contracts and improving operations. For instance, we completed the Cadre acquisition on July 31, 2014, which generated synergies and positively impacted our results of operations. See accompanying Note C - Business Combinations of our Financial Statements for pro forma results of operations related to the Cadre acquisition. We are in active discussions to acquire assets fitting this strategy, which, if completed, would be "significant" under Regulation S-X and could require additional sources of financing. There can be no assurance that we will reach a definitive agreement and complete any of these potential transactions. See the risk factors disclosed in Item 1A of Part I of our 2014 Annual Report, including the risk factor entitled, "If we cannot successfully complete acquisitions or integrate acquired businesses, our growth may be limited and our financial condition may be adversely affected."

Maintain financial strength and flexibility. We intend to maintain financial strength and flexibility to enable us to pursue acquisitions and new growth opportunities as they arise. In July 2013, we refinanced our existing senior secured debt by replacing our revolving line-of-credit and amending our senior secured term loan facility (the "Term Loan"), increasing the Term Loan amount by approximately \$115.0 million. In December 2014, we upsized our Term Loan by an additional \$135.0 million to a total of approximately \$500.0 million. As of June 30, 2015, we had \$251.5 million of cash on hand, \$70.7 million in short-term investments and \$46.9 million of availability under our Revolver.

How We Generate Our Sales

We derive our sales by mining and processing minerals that our customers purchase for various uses. Our sales are primarily a function of the price per ton and the number of tons sold. The price invoiced reflects product, transportation and additional services as applicable, such as storage and transloading the product from railcars to trucks for delivery to the customer site. We invoice the majority of our customers on a per shipment basis, although for some larger customers, we consolidate invoices weekly or monthly. Our five largest customers accounted for approximately 43% of total sales during the six months ended June 30, 2015. Sales to our two largest customers, Schlumberger N.V. and Halliburton Company accounted for 15% and 13% of our total revenues, respectively, during the six months ended June 30, 2015. No other customer accounted for 10% or more of our total revenues.

We primarily sell our products under short-term price agreements or at prevailing market rates. For a number of customers, we sell under long-term, competitively-bid contracts. As of July 29, 2015, we have 7 take-or-pay supply agreements in the Oil & Gas Proppants segment with initial terms expiring between 2015 and 2019. These agreements define, among other commitments, the volume of product that our customers must purchase, the volume of product that we must provide and the price that we will charge and that our customers will pay for each product. Prices under these agreements are generally fixed and subject to upward adjustment in response to certain cost increases.

Additionally, at the time the take-or-pay supply agreements were signed, some customers provided advance payments for future shipments. A percentage of these advance payments was recognized as revenue with each ton of applicable product shipped to the customer. Collectively, sales to customers with take-or-pay supply agreements accounted for 32% and 38% of our total company revenue during the six months ended June 30, 2015 and 2014, respectively.

Although sales under take-or-pay supply agreements, as opposed to short-term price agreements or at prevailing spot market rates, result in us realizing lower margins than we otherwise might during periods of high market prices, we believe such lower margins are offset by the benefits derived from the product mix and sales volume stability afforded by such supply agreements, which helps us lower market risk arising from adverse changes in spot prices and market conditions. Additionally, selling more tons under supply contracts also enables us to be more efficient from a production, supply chain and logistics standpoint. As discussed in Part I, Item 1A., "Risk Factors", of our 2014 Annual Report

—"A large portion of our sales is generated by our top customers, and the loss of, or significant reduction in, purchases by our largest customers could adversely affect our operations," these customers may not continue to purchase the same levels of product in the future due to a variety of reasons, contract requirements notwithstanding.

The Costs of Conducting Our Business

The principal expenses involved in conducting our business are labor costs, electricity and drying fuel costs, maintenance and repair costs for our mining and processing equipment and facilities and transportation costs.

Transportation and related costs include freight charges, fuel surcharges, transloading fees, switching fees, railcar lease costs, demurrage costs and storage fees. We believe the majority of our operating costs are relatively stable in price, but can vary significantly based on the volume of product produced. We benefit from owning the majority of the mineral deposits that we mine and having long-term mineral rights leases or supply agreements for our other primary sources of raw material, which limit royalty payments.

Additionally, we incur expenses related to our corporate operations, including costs for sales and marketing; research and development; and finance, legal, environmental, health and safety functions of our organization. These costs are principally driven by personnel expenses.

How We Evaluate Our Business

Our management team evaluates our business using a variety of financial and operational metrics. Our business is organized into two segments, Oil & Gas Proppants and Industrial & Specialty Products. We evaluate the performance of these segments based on their tons sold, average selling price and contribution margin earned. Additionally, we consider a number of factors in evaluating the performance of the business as a whole, including total tons sold, average selling price, segment contribution margin, and Adjusted EBITDA. We view these metrics as important factors in evaluating our profitability and review these measurements frequently to analyze trends and make decisions.

Segment Contribution Margin

Segment contribution margin, a non-GAAP measure, is a key metric that management uses to evaluate our operating performance and to determine resource allocation between segments. Segment contribution margin excludes certain corporate costs not associated with the operations of the segment. These unallocated costs include costs that are related to corporate functional areas such as operations management, corporate purchasing, accounting, treasury, information technology, legal and human resources.

Segment contribution margin is not a measure of our financial performance under GAAP and should not be considered an alternative to measures derived in accordance with GAAP. For more details on the reconciliation of segment contribution margin to its most directly comparable GAAP financial measure, income (loss) before income taxes, see Note O - Segment Reporting to our Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Adjusted EBITDA

Adjusted EBITDA, a non-GAAP measure, is included in this report because it is a key metric used by management to assess our operating performance and by our lenders to evaluate our covenant compliance. Our target performance goals under our incentive compensation plan are tied, in part, to our Adjusted EBITDA. In addition, our Revolver contains a consolidated total net leverage ratio that we must meet as of the last day of any fiscal quarter whenever usage of the Revolver (other than certain undrawn letters of credit) exceeds 25% of the Revolver commitment, which is calculated based on our Adjusted EBITDA. Noncompliance with the financial ratio covenant contained in the Revolver could result in the acceleration of our obligations to repay all amounts outstanding under the Revolver and the Term Loan. Moreover, the Revolver and the Term Loan contain covenants that restrict, subject to certain exceptions, our ability to make permitted acquisitions, incur additional indebtedness, make restricted payments (including dividends) and retain excess cash flow based, in some cases, on our ability to meet leverage ratios calculated based on our Adjusted EBITDA.

Adjusted EBITDA is not a measure of our financial performance or liquidity under GAAP and should not be considered as an alternative to net income as a measure of operating performance, cash flows from operating activities as a measure of liquidity or any other performance measure derived in accordance with GAAP. Additionally, Adjusted EBITDA is not intended to be a measure of free cash flow for management's discretionary use, as it does not consider certain cash requirements such as interest payments, tax payments and debt service requirements. Adjusted EBITDA

contains certain other limitations, including the failure to reflect our cash expenditures, cash requirements for working capital needs and cash costs to replace assets being depreciated and amortized, and excludes certain non-recurring charges. Management compensates for these limitations by relying primarily on our GAAP results and by using Adjusted EBITDA only supplementally. Our measure

20

of Adjusted EBITDA is not necessarily comparable to other similarly titled captions of other companies due to potential inconsistencies in the methods of calculation.

The following table sets forth a reconciliation of net income, the most directly comparable GAAP financial measure, to Adjusted EBITDA.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Net income	\$9,953	\$28,654	\$24,776	\$47,025
Total interest expense, net of interest income	6,537	3,811	13,477	7,684
Provision for taxes	(6,342)) 11,330	(2,889)) 17,480
Total depreciation, depletion and amortization expenses	13,695	10,341	26,938	19,930
EBITDA	23,843	54,136	62,302	92,119
Non-cash incentive compensation ⁽¹⁾	(2,179)) 2,053	(89)) 3,383
Post-employment expenses (excluding service costs) ⁽²⁾	868	381	1,735	763
Business development related expenses ⁽³⁾	(375)) 1,713	7,953	3,628

Adjusted EBITDA	\$23,443	\$59,785	\$74,727	\$101,713

- (1) Reflects stock based compensation including adjustments for the revaluation of performance share units. Includes net pension cost and net post-retirement cost relating to pension and other post-retirement benefit obligations during the applicable period, but in each case excluding the service cost relating to benefits earned during such period. See Note M - Pension and Post-retirement Benefits to our Financial Statements in Part 1, Item 1 of this Quarterly Report on Form 10-Q.
- (2) Reflects expenses related to business development activities in connection with our growth and expansion initiatives.
- (3) Reflects miscellaneous adjustments permitted under our existing credit agreement, including such items as restructuring costs and employment agency fees.
- (4)

Results of Operations for the Three Months Ended June 30, 2015 and 2014

Sales

All numbers in thousands except per ton data	Three Months Ended		Amount Change '15 vs. '14	Percent Change '15 vs. '14
	June 30, 2015	2014		
Sales:				
Oil & Gas Proppants	\$90,855	\$149,331	\$(58,476)	(39)%
Industrial & Specialty Products	56,656	56,470	186	—%
Total Sales	\$147,511	\$205,801	\$(58,290)	(28)%
Tons:				
Oil & Gas Proppants	1,224	1,508	(284)	(19)%
Industrial & Specialty Products	1,034	1,095	(61)	(6)%
Total Tons	2,258	2,603	(345)	(13)%
Average Selling Price per Ton:				
Oil & Gas Proppants	\$74.23	\$99.03	\$(24.80)	(25)%
Industrial & Specialty Products	54.79	51.57	3.22	6%
Overall Average Selling Price per Ton:	\$65.33	\$79.06	\$(13.73)	(17)%

Total sales decreased 28% for the three months ended June 30, 2015 compared to the three months ended June 30, 2014, driven by a 13% decrease in total tons sold and a 17% decrease in overall average selling price. Tons sold in-basin represented 33% of total company tons sold for both the three months ended June 30, 2015 and 2014.

The decrease in total sales was driven by Oil & Gas Proppants sales, which decreased 39%. Oil & Gas Proppants tons sold for the three months ended June 30, 2015 decreased 19% and average selling price decreased by 25%. These decreases were driven by the year over year decrease in the demand for our frac sand from customers due to reduced drilling and completion activities.

Industrial & Specialty Products sales remained flat for the three months ended June 30, 2015 compared to the three months ended June 30, 2014. Tons sold decreased 6%, which was offset by a 6% increase in average selling price. The increase in average selling price was primarily a result of new higher-margin product sales and price increases.

Cost of Goods Sold

Cost of goods sold decreased by \$15.2 million, or 11%, to \$117.2 million for the three months ended June 30, 2015 compared to \$132.4 million for the three months ended June 30, 2014. The decrease is mainly a result of fewer tons sold. As a percentage of sales, costs of goods sold increased to 79% for the three months ended June 30, 2015 compared to 64% for the same period in 2014. These changes result from the main components of cost of goods sold as discussed below.

We incurred \$58.1 million and \$76.7 million of transportation and related costs for the three months ended June 30, 2015 compared to the same period in 2014, respectively. This decrease was due to fewer tons sold through transloads caused by lower demand for our frac sand at our transload sites. As a percentage of sales, transportation and related costs increased to 39% for the three months ended June 30, 2015 compared to 37% for the same period in 2014 due to a lower average selling price.

We incurred \$20.1 million and \$16.5 million of operating labor costs for the three months ended June 30, 2015 and 2014, respectively. The increase in labor costs incurred was primarily due to the addition of our Voca, Texas and Utica, Illinois facilities. As a percentage of sales, operating labor costs represented 14% for the three months ended June 30, 2015 compared to 8% for the same period in 2014.

We incurred \$6.5 million and \$7.9 million of electricity and drying fuel (principally natural gas) costs for the three months ended June 30, 2015 and 2014, respectively. The decrease in electricity and drying fuel costs incurred was mainly driven by fewer tons sold and lower natural gas prices. As a percentage of sales, electricity and drying fuel costs remained flat at 4% for the three months ended June 30, 2015 and 2014.

We incurred \$9.1 million and \$7.4 million of maintenance and repair costs for the three months ended June 30, 2015 and 2014, respectively. The increase in maintenance and repair costs incurred was due to scheduled maintenance and the addition of our Voca, Texas and Utica, Illinois facilities. As a percentage of sales, maintenance and repair costs increased to 6% for the three months ended June 30, 2015 compared to 4% for the same period in 2014.

Segment Contribution Margin

Oil & Gas Proppants contribution margin decreased by \$43.8 million, or 77%, to \$13.3 million for the three months ended June 30, 2015 compared to \$57.1 million for the three months ended June 30, 2014, driven by a \$58.5 million decrease in segment revenue, partially offset by lower segment cost of goods sold due to fewer tons sold.

Industrial & Specialty Products contribution margin increased by \$1.9 million, or 11%, to \$19.5 million for the three months ended June 30, 2015 compared to \$17.6 million for the three months ended June 30, 2014, driven by increased higher-margin products sales as a percentage of total sales, partially offset by fewer tons sold.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased by \$12.7 million, or 66%, to \$6.6 million for the three months ended June 30, 2015 compared to \$19.3 million for the three months ended June 30, 2014. The decrease was due to the following factors:

Business development related expense decreased by \$2.1 million to \$(0.4) million for the three months ended June 30, 2015 compared to \$1.7 million for the three months ended June 30, 2014. This decrease was due to the settlement of an arbitration proceeding during the three months ended June 30, 2015, which caused a \$1.1 million credit to our expense (see Note K - Commitments and Contingencies of our Financial Statements for more information).

Compensation related expense decreased by \$8.0 million for the three months ended June 30, 2015 compared to 2014, primarily due to reduced 2015 incentive compensation and the valuation adjustment of our share based compensation expense.

Bad debt expense decreased by \$1.2 million for the three months ended June 30, 2015 compared to the three months ended June 30, 2014, due to a decrease in our sales during the three months ended June 30, 2015 compared to the three months ended June 30, 2014 and a recovery of a previously reserved receivable.

The above decreases were partially offset by a restructuring cost of \$0.8 million during the three months ended June 30, 2015 for actions that will provide future cost savings.

In total, our selling, general and administrative costs represented approximately 4% and 9% of our sales for the three months ended June 30, 2015 and 2014, respectively.

Depreciation, Depletion and Amortization

Depreciation, depletion and amortization expense increased by \$3.4 million, or 32%, to \$13.7 million for the three months ended June 30, 2015 compared to \$10.3 million for the three months ended June 30, 2014. The year over year increase was driven by the addition of our Voca, Texas plant, Utica, Illinois plant, Odessa, Texas transload facility and other continued capital spending associated with our growth and capacity expansion initiatives. We expect depreciation, depletion and amortization expense to continue to grow due to anticipated capital spending in 2015.

Depreciation, depletion and amortization costs represented approximately 9% and 5% of our sales for the three months ended June 30, 2015 and 2014, respectively.

Operating Income

Operating income decreased by \$33.7 million, or 77%, to \$10.0 million for the three months ended June 30, 2015 compared to \$43.8 million for the three months ended June 30, 2014. The decrease was due to a 28% decrease in sales, a 32% increase in depreciation, depletion and amortization expense, partially offset by an 11% decrease in cost of goods sold and a 66% decrease in selling, general and administrative expense.

Interest Expense

Interest expense increased by \$2.2 million, or 56%, to \$6.2 million for the three months ended June 30, 2015 compared to \$4.0 million for the three months ended June 30, 2014, mainly due to an increase in debt principal and additional interest expense related to the deferred revenue.

Provision for Income Taxes

During the three months ended June 30, 2015 we recognized an income tax benefit of \$6.3 million. Considering the current market conditions as discussed in the Recent Trends and Outlook section of the MD&A, we updated our annual effective tax rate to 0%, which was driven by our estimated annual income before income taxes fully offset by the statutory percentage depletion deduction. Our tax benefit in the period represented the cumulative adjustment to reflect the updated estimated annual effective tax rate of 0%, exclusive of the discrete tax benefit (see accompanying Note L - Income Taxes of our Financial Statements for more information about the discrete tax benefit).

The income tax expense was \$11.3 million for the three months ended June 30, 2014. The decrease of \$17.7 million in income tax expense was mainly driven by a decrease in the estimated annual effective tax rate. The effective tax rate was (176)% and 28% for the three months ended June 30, 2015 and 2014, respectively. Because of the updated tax rate and cumulative adjustment in the period, the (176)% tax rate is not representative of future tax rates.

Historically, our actual effective tax rates have been lower than the statutory effective rate primarily due to the benefit received from statutory percentage depletion allowances. The deduction for statutory percentage depletion does not necessarily change proportionately to changes in income before income taxes.

Net Income/Loss

Net income was \$10.0 million and \$28.7 million for the three months ended June 30, 2015 and 2014, respectively.

The year over year decrease was due to the factors noted above.

Results of Operations for the Six Months Ended June 30, 2015 and 2014

Sales

All numbers in thousands except per ton data	Six Months Ended		Amount Change '15 vs. '14	Percent Change	
	June 30, 2015	2014		'15 vs. '14	'15 vs. '14
Sales:					
Oil & Gas Proppants	\$239,607	\$279,915	\$(40,308)	(14))%
Industrial & Specialty Products	111,862	105,981	5,881	6)%
Total Sales	\$351,469	\$385,896	\$(34,427)	(9))%
Tons:					
Oil & Gas Proppants	2,912	2,843	69	2)%
Industrial & Specialty Products	2,017	2,070	(53)	(3))%
Total Tons	4,929	4,913	16	—)%
Average Selling Price per Ton:					
Oil & Gas Proppants	\$82.28	\$98.46	\$(16.18)	(16))%
Industrial & Specialty Products	55.46	51.20	4.26	8)%
Overall Average Selling Price per Ton:	\$71.31	\$78.55	\$(7.24)	(9))%

Total sales decreased 9% for the six months ended June 30, 2015 compared to the six months ended June 30, 2014, driven by a 9% decrease in overall average selling price. Tons sold in-basin represented 37% and 39% of total company tons sold for the six months ended June 30, 2015 and 2014, respectively.

The decrease in total sales was driven by Oil & Gas Proppants sales, which decreased 14%. Oil & Gas Proppants tons sold for the six months ended June 30, 2015 increased 2% mainly driven by the addition of Cadre sales and year over year growth in the demand for our frac sand during the three months ended March 31, 2015 compared to the three months ended March 31, 2014, partially offset by a decrease in frac sand demand during the three months ended June 30, 2015 compared to the three months ended June 30, 2014. Average selling price decreased 16% resulting from pricing pressure due to lower frac sand demand and fewer tons sold through transloads as a percentage of total tons sold.

Industrial & Specialty Products sales increased 6% for the six months ended June 30, 2015 compared to the six months ended June 30, 2014, primarily driven by an 8% increase in average selling price partially offset by a 3% decrease in tons sold. The increase in average selling price was primarily a result of new higher-margin product sales and price increases.

Cost of Goods Sold

Cost of goods sold decreased by \$3.3 million, or 1%, to \$255.9 million for the six months ended June 30, 2015 compared to \$259.2 million for the six months ended June 30, 2014. The decrease was mainly a result of fewer tons sold. As a percentage of sales, costs of goods sold increased to 73% for the six months ended June 30, 2015 compared to 67% for the same period in 2014. These changes result from the main components of cost of goods sold as discussed below.

We incurred \$131.1 million and \$150.7 million of transportation and related costs for the six months ended June 30, 2015 and 2014, respectively. This decrease was due to fewer tons sold through transloads caused by lower demand for our frac sand at our transload sites. As a percentage of sales, transportation and related costs decreased to 37% for the six months ended June 30, 2015 compared to 39% for the same period in 2014 due to decreased tons sold through transloads as a percentage of total tons sold.

We incurred \$41.4 million and \$32.6 million of operating labor costs for the six months ended June 30, 2015 and 2014, respectively. The increase in labor costs incurred was primarily due to the addition of our Voca, Texas and Utica, Illinois facilities. As a percentage of sales, operating labor costs represented 12% for the six months ended June 30, 2015 compared to 8% for the same period in 2014.

We incurred \$14.7 million and \$16.3 million of electricity and drying fuel (principally natural gas) costs for the six months ended June 30, 2015 and 2014, respectively. The decrease in electricity and drying fuel costs incurred was due to lower natural gas prices. As a percentage of sales, electricity and drying fuel costs slightly remained flat at 4% for the six months ended June 30, 2015 compared to the same period in 2014.

We incurred \$19.3 million and \$13.6 million of maintenance and repair costs for the six months ended June 30, 2015 and 2014, respectively. The increase in maintenance and repair costs incurred was due to scheduled maintenance and the addition of production facilities, including our Voca, Texas and Utica, Illinois facilities. As a percentage of sales, maintenance and repair costs increased to 5% for the six months ended June 30, 2015 compared to 4% for the same period in 2014.

Segment Contribution Margin

Oil & Gas Proppants contribution margin decreased by \$33.2 million, or 34%, to \$65.5 million for the six months ended June 30, 2015 compared to \$98.7 million for the six months ended June 30, 2014, mainly driven by the 14% decrease in revenue partially offset by a 4% decrease in segment cost of goods sold.

Industrial & Specialty Products contribution margin increased by \$4.2 million, or 14%, to \$35.0 million for the six months ended June 30, 2015 compared to \$30.8 million for the six months ended June 30, 2014, mainly driven the by the 6% increase in revenue, partially offset by a 2% increase in segment cost of goods sold.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased by \$1.2 million, or 3%, to \$33.5 million for the six months ended June 30, 2015 compared to \$34.7 million for the six months ended June 30, 2014. The decrease was primarily due to the following factors:

Business development-related expense increased by \$4.3 million to \$8.0 million for the six months ended June 30, 2015 compared to \$3.6 million for the six months ended June 30, 2014. This increase is mainly due to a \$6.5 million settlement of an unfavorable arbitration ruling (see Note K - Commitments and Contingencies of our Financial Statements for more information).

Compensation related expense decreased by \$4.2 million for the six months ended June 30, 2015 compared to 2014, primarily due to reduced 2015 incentive compensation and the valuation adjustment of our share based compensation expense.

Bad debt expense decreased by \$1.9 million for the six months ended June 30, 2015 compared to the six months ended June 30, 2014 due to a decrease in our sales during the six months ended June 30, 2015 compared to the six months ended June 30, 2014 and a recovery of a previously reserved receivable.

We also incurred restructuring cost of \$2.2 million during the six months ended June 30, 2015 for actions that will provide future cost savings.

In total, our selling, general and administrative costs represented approximately 10% and 9% of our sales for the six months ended June 30, 2015 and 2014, respectively.

Depreciation, Depletion and Amortization

Depreciation, depletion and amortization expense increased by \$7.0 million, or 35%, to \$26.9 million for the six months ended June 30, 2015 compared to \$19.9 million for the six months ended June 30, 2014. The year over year increase was driven by the addition of our Voca, Texas plant, Utica, Illinois plant, Odessa, Texas transload facility and other continued capital spending associated with our growth and capacity expansion initiatives. We expect depreciation, depletion and amortization expense to continue to grow due to anticipated capital spending in 2015.

Depreciation, depletion and amortization costs represented approximately 8% and 5% of our sales for the six months ended June 30, 2015 and 2014, respectively.

Operating Income

Operating income decreased by \$36.9 million, or 51%, to \$35.1 million for the six months ended June 30, 2015 compared to \$72.1 million for the six months ended June 30, 2014. The decrease was due to a 9% decrease in sales, a 35% increase in depreciation, depletion and amortization expense, partially offset by a 1% decrease in cost of goods sold and a 3% decrease in selling, general and administrative expense.

Interest Expense

Interest expense increased by \$5.3 million, or 67%, to \$13.1 million for the six months ended June 30, 2015 compared to \$7.8 million for the six months ended June 30, 2014, mainly due to an increase in debt principal and additional interest expense related to the deferred revenue.

Provision for Income Taxes

During the six months ended June 30, 2015 we recognized an income tax benefit of \$2.9 million. Considering the current market conditions as discussed in the Recent Trends and Outlook section of the MD&A, we updated our annual effective tax rate to 0%, which was driven by our estimated annual income before income taxes fully offset by the statutory percentage depletion deduction. Our tax benefit in the period represented the discrete tax benefit (see accompanying Note L - Income Taxes of our Financial Statements for more information about the discrete tax benefit).

The income tax expense was \$17.5 million for the six months ended June 30, 2014. The decrease of \$20.4 million in income tax expense was mainly driven by a decrease in effective tax rate. The effective tax rate was (13)% and 27% for the six months ended June 30, 2015 and 2014, respectively. Because of the updated tax rate and the discrete tax benefit in the period, the (13)% tax rate is not representative of future tax rates.

Net Income/Loss

Net income was \$24.8 million and \$47.0 million for the six months ended June 30, 2015 and 2014, respectively. The year over year decrease was due to the factors noted above.

Liquidity and Capital Resources

Overview

Our principal liquidity requirements have historically been to service our debt, to meet our working capital, capital expenditure and mine development expenditure needs, to return cash to our stockholders, and to finance acquisitions. We have historically met our liquidity and capital investment needs with funds generated through operations. We have historically funded our acquisitions through cash on hand or borrowings under our credit facilities and equity investments. Our working capital is the amount by which current assets exceed current liabilities and is a measure of our ability to pay our liabilities as they become due. As of June 30, 2015, our working capital was \$390.3 million and we had \$46.9 million of availability under the Revolver.

We believe that cash generated through operations and our financing arrangements will be sufficient to meet working capital requirements, anticipated capital expenditures, scheduled debt payments for at least the next 12 months and any dividends declared.

Management and our Board remain committed to evaluating additional ways of creating shareholder value. Any determination to pay dividends and other distributions in cash, stock, or property in the future will be at the discretion of our Board and will be dependent on then-existing conditions, including our business conditions, our financial condition, results of operations, liquidity, capital requirements, contractual restrictions including restrictive covenants contained in debt agreements, and other factors. Additionally, because we are a holding company, our ability to pay dividends on our common stock may be limited by restrictions on the ability of our subsidiaries to pay dividends or make distributions to us, including restrictions under the terms of the agreements governing our indebtedness.

Cash Flow Analysis

A summary of operating, investing and financing activities is shown in the following table:

	Six Months Ended		Percent	
	June 30,		Change	
	2015	2014	'15 vs. '14	
Net cash provided by (used in):				
Operating activities	\$38,457	\$55,222	(30)%
Investing activities	(22,458) (18,011) 25	%
Financing activities	(31,792) (9,493) 235	%

Net Cash Provided by Operating Activities

Operating activities consist primarily of net income adjusted for certain non-cash and working capital items. Adjustments to net income for non-cash items include depreciation, depletion and amortization, deferred revenue, deferred income taxes, equity-based compensation and allowance for doubtful accounts. In addition, operating cash flows include the effect of changes in operating assets and liabilities, principally accounts receivable, inventories, prepaid expenses and other current assets, income taxes payable and receivable, accounts payable and accrued expenses.

Net cash provided by operating activities was \$38.5 million for the six months ended June 30, 2015 compared to \$55.2 million for the six months ended June 30, 2014. This \$16.8 million decrease in cash provided by operations was mainly the result of a \$22.2 million decrease in net income.

Net Cash Used in Investing Activities

Investing activities consist primarily of capital expenditures for growth and maintenance.

Net cash used in investing activities was \$22.5 million and \$18.0 million for the six months ended June 30, 2015 and 2014, respectively. Capital expenditures for the six months ended June 30, 2015, which totaled \$27.1 million, were primarily for the engineering, procurement and construction of our Greenfield raw sand plant near Fairchild, Wisconsin, an expansion project at our Pacific, Missouri facility and other maintenance capital projects. Capital expenditures for the six months ended June 30, 2014, which totaled \$18.0 million, were primarily for the continuing engineering, procurement and construction of our Greenfield raw sand plant in Utica, Illinois, our new transload facility in Odessa, Texas, and other maintenance capital projects. Amounts spent on capital projects for the six months ended June 30, 2015 were partially offset by \$4.6 million in maturities of short-term investments that were not reinvested.

Subject to our continuing evaluation of market conditions, we anticipate that our capital expenditures in 2015 will be in a range of \$60 million to \$70 million, which is primarily associated with growth and maintenance capital, including the construction of the mine and processing facility in Fairchild, Wisconsin. We expect to fund our capital expenditures through cash on our balance sheet, cash generated from our operations and cash generated from financing activities.

Net Cash Used in Financing Activities

Financing activities consist primarily of equity issuances, capital contributions, dividend payments, borrowings and repayments related to the Revolver and Term Loan, as well as fees and expenses paid in connection with our credit facilities, advance payments from our customers, and outstanding checks to our vendors.

Net cash used in financing activities was \$31.8 million for the six months ended June 30, 2015, driven by \$15.3 million of common stock repurchases, \$13.4 million of dividends paid and \$2.6 million of long-term debt payments. Net cash used in financing activities was \$9.5 million in the six months ended June 30, 2014, driven by \$13.4 million in dividend payments and a \$1.2 million decrease in book overdraft, partially offset by \$4.7 million of proceeds from employee exercises of stock options.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are likely to have a current or future material effect on our financial condition, changes in financial condition, sales, expenses, results of operations, liquidity, capital expenditures or capital resources.

Contractual Obligations

There have been no significant changes outside the ordinary course of business to our “Contractual Obligations” table in Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” of our 2014 Annual Report, except that we entered into additional new leases for railroad cars. For more details on future minimum annual commitments under such operating leases, please see accompanying Note K - Commitments and Contingencies to our Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Environmental Matters

We are subject to various federal, state and local laws and regulations governing, among other things, hazardous materials, air and water emissions, environmental contamination and reclamation and the protection of the environment and natural resources. We have made, and expect to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures. As of June 30, 2015, we had \$13.1 million accrued for future reclamation costs, as compared to \$11.3 million as of December 31, 2014.

We discuss certain environmental matters relating to our various production and other facilities, certain regulatory requirements relating to human exposure to crystalline silica and our mining activity and how such matters may affect our business in the future under Item 1, “Business,” Item 1A, “Risk Factors” Item 3, “Legal Proceedings”, and Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Environmental Matters” in our 2014 Annual Report.

Critical Accounting Estimates

Our unaudited condensed consolidated financial statements have been prepared in conformity with GAAP, which requires management to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of our financial statements and the reported amounts of revenues and expenses during the reporting period. While we do not believe that the reported amounts would be materially different, application of these policies involves the exercise of judgment and the use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. We evaluate our estimates and judgments on an ongoing basis. We base our estimates on experience and on various other assumptions that are believed to be reasonable under the circumstances. All of our significant accounting policies, including certain critical accounting policies, are disclosed in our 2014 Annual Report.

Recent Accounting Pronouncements

New accounting guidance that we have recently adopted, as well as accounting guidance that has been recently issued but not yet adopted by us, are included in Note A - Summary of Significant Accounting Policies to our Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Availability of Reports; Website Access; Other Information

Our internet address is <http://www.ussilica.com>. Through “Investor Relations”—“SEC Filings” on our home page, we make available free of charge our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q, our proxy statements, our Current Reports on Form 8-K, SEC Forms 3, 4 and 5 and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Our reports filed with the SEC are also made available to read and copy at the SEC’s Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain information about the Public Reference Room by contacting the SEC at 1-800-SEC-0330. Reports filed with the SEC are also made available on its website at www.sec.gov.

Copies of our Corporate Governance Guidelines, our Audit Committee, Compensation Committee and Nominating and Governance Committee charters, the Code of Conduct for our Board of Directors and Code of Conduct and Ethics for U.S. Silica employees (including the chief executive officer, chief financial officer and corporate controller) can also be found on our website. Any amendments or waivers to the Code of Conduct and Ethics applicable to the chief executive officer, chief financial officer and corporate controller can also be found in the “Investor Relations” section of the U.S. Silica website. Stockholders may also request a free copy of these documents from: U.S. Silica Holdings, Inc., attn.: Investor Relations, 8490 Progress Drive, Suite 300, Frederick, Maryland 21701 or IR@ussilica.com.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

We are exposed to certain market risks, which exist as a part of our ongoing business operations. Such risks arise from adverse changes in market rates, prices and conditions. We address such market risks as discussed in "How We Generate Our Sales" in Item 2 of this Form 10-Q, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Interest Rate Risk

We are exposed to interest rate risk arising from adverse changes in interest rates. As of June 30, 2015, we have \$501.8 million of debt outstanding under our senior credit facility. Assuming no change in the amount outstanding, and LIBOR is greater than the 1.0% minimum base rate on the Term Loan, a hypothetical increase or decrease in interest rates by 1.0% would have changed our interest expense by \$1.4 million per year.

We use interest rate derivatives in the normal course of our business to manage both our interest cost and the risks associated with changing interest rates. We do not use derivatives for trading or speculative purposes. The following table summarizes the fair value of our derivative instruments at June 30, 2015 and December 31, 2014.

	Maturity Date	June 30, 2015			December 31, 2014		
		Contract/Notional Amount	Carrying Amount	Fair Value	Contract/Notional Amount	Carrying Amount	Fair Value
Interest rate cap agreement ⁽¹⁾	2016	\$252 million	\$—	\$—	\$188 million	\$5	\$5

⁽¹⁾ Agreements limit the LIBOR floating interest rate base to 4%.

Credit Risk

We are subject to risks of loss resulting from nonpayment or nonperformance by our customers. We examine the creditworthiness of third-party customers to whom we extend credit and manage our exposure to credit risk through credit analysis, credit approval, credit limits and monitoring procedures, and for certain transactions, we may request letters of credit, prepayments or guarantees, although collateral is generally not required. Despite enhancing our examination of our customers' credit worthiness, we may still experience delays or failures in customer payments.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2015. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Based on the evaluation of our disclosure controls and procedures as of June 30, 2015, our chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, and not absolute, assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in management’s evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the quarter ended June 30, 2015 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In addition to the matter described below, we are subject to various legal proceedings, claims, and governmental inspections, audits or investigations arising out of our business which cover matters such as general commercial, governmental regulations, antitrust and trade regulations, product liability, environmental, intellectual property, employment and other actions. Although the outcomes of these routine claims cannot be predicted with certainty, in the opinion of management, the ultimate resolution of these matters will not have a material adverse effect on our financial position or results of operations.

Prolonged inhalation of excessive levels of respirable crystalline silica dust can result in silicosis, a disease of the lungs. Breathing large amounts of respirable silica dust over time may injure a person's lungs by causing scar tissue to form. Crystalline silica in the form of quartz is a basic component of soil, sand, granite and most other types of rock. Cutting, breaking, crushing, drilling, grinding and abrasive blasting of or with crystalline silica containing materials can produce fine silica dust, the inhalation of which may cause silicosis, lung cancer and possibly other diseases including immune system disorders such as scleroderma. Sources of exposure to respirable crystalline silica dust include sandblasting, foundry manufacturing, crushing and drilling of rock, masonry and concrete work, mining and tunneling, and cement and asphalt pavement manufacturing.

Since at least 1975, we and/or our predecessors have been named as a defendant, usually among many defendants, in numerous lawsuits brought by or on behalf of current or former employees of our customers alleging damages caused by silica exposure. Prior to 2001, the number of silicosis lawsuits filed annually against the commercial silica industry remained relatively stable and was generally below 100, but between 2001 and 2004 the number of silicosis lawsuits filed against the commercial silica industry substantially increased. This increase led to greater scrutiny of the nature of the claims filed, and in June 2005 the U.S. District Court for the Southern District of Texas issued an opinion in the former federal silica multi-district litigation remanding almost all of the 10,000 cases then pending in the multi-district litigation back to the state courts from which they originated for further review and medical qualification, leading to a number of silicosis case dismissals across the United States. In conjunction with this and other favorable court rulings establishing "sophisticated user" and "no duty to warn" defenses for silica producers, several states, including Texas, Ohio and Florida, have passed medical criteria legislation that requires proof of actual impairment before a lawsuit can be filed.

As a result of the above developments, the filing rate of new claims against us over the past three years has decreased to below pre-2001 levels, and we were named as a defendant in two, three and one new silicosis cases filed in 2012, 2013 and 2014, respectively. During the six months ended June 30, 2015, no additional claims were brought against us. As of June 30, 2015, there are a total of approximately 77 active silica-related products liability claims pending in which we were a defendant and approximately 678 inactive claims. Almost all of the claims pending against us arise out of the alleged use of our silica products in foundries or as an abrasive blast media, and involve various other defendants. Prior to the fourth quarter of 2012, we had insurance policies for both our predecessors that covered certain claims for alleged silica exposure for periods prior to certain dates in 1985 and 1986 (with respect to certain insurance). As a result of a settlement with a former owner of ours and its insurers in the fourth quarter of 2012, some of these policies are no longer available to us, and we will not seek reimbursement for any defense costs or claim payments from these policies. Other insurance policies, however, continue to remain available to us and will continue to make such payments on our behalf.

The silica-related litigation brought against us to date has not resulted in material liability to us. However, we continue to have silica-related products liability claims filed against us, including claims that allege silica exposure for periods for which we do not have insurance coverage. Any such pending or future claims or inadequacies of our insurance coverage could have a material adverse effect on our business, reputation or results of operations. For more information regarding silica-related litigation, see Part I, Item 1A of our 2014 Annual Report "Risk Factors—Risks Related to Our Business—Silica-related health issues and litigation could have a material adverse effect on our business, reputation or results of operations."

ITEM 1A. RISK FACTORS

As of June 30, 2015, there have been no material changes to the risk factors disclosed in Item 1A of Part I in our 2014 Annual Report.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Share Repurchase Program

The following table presents the total number of shares of our common stock that we purchased during the second quarter of 2015, the average price paid per share, the number of shares that we purchased as part of our publicly announced repurchase program, and the approximate dollar value of shares that still could have been purchased at the end of the applicable fiscal period pursuant to our June 2012 share repurchase program:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program ⁽¹⁾	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Program ⁽¹⁾
April 2015	—	\$ —	—	
May 2015	7,777	⁽²⁾ \$ 35.79	—	
June 2015	—	\$ —	—	
Total	7,777	\$ 35.79	—	\$ 33,173,725

A program covering the repurchase of up to \$25.0 million of our common stock was initially announced in June 2012 and was increased to \$50.0 million in December 2014. This program expires on December 11, 2015.

⁽²⁾ Represents shares withheld by U.S. Silica to pay taxes due upon the vesting of employee restricted stock. Subsequent to June 30, 2015, we have not repurchased any shares of our common stock.

For more details on the stock repurchase program, see Note B - Capital Structure and Accumulated Comprehensive Income to our Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Safety is one of our core values, and we strive for excellence in the achievement of a workplace free of injuries and occupational illnesses. Our health and safety leadership team has developed comprehensive safety policies and standards, which include detailed standards and procedures for safe production, addressing topics such as employee training, risk management, workplace inspection, emergency response, accident investigation and program auditing. We place special emphasis on the importance of continuous improvement in occupational health, personal injury avoidance and prevention, emergency preparedness, and property damage elimination. In addition to strong leadership and involvement from all levels of the organization, these programs and procedures form the cornerstone of our safety initiatives, ensuring that employees are provided a safe and healthy environment and are intended as a means to reduce workplace accidents, incidents and losses, comply with all mining-related regulations and provide support for both regulators and the industry to improve mine safety. While we want to have productive operations in full regulatory compliance, we know it is equally essential that we motivate and train our people to think, practice and feel a personal responsibility for health and safety on and off the job.

All of our production facilities, with the exception of our resin-coated sand facility, are classified as mines and are subject to regulation by the Federal Mine Safety and Health Administration (“MSHA”) under the Federal Mine Safety and Health Act of 1977 (the “Mine Act”). MSHA inspects our mines on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act. Following passage of The Mine Improvement and New Emergency Response Act of 2006, MSHA significantly increased the numbers of citations and orders charged against mining operations. The dollar penalties assessed for citations issued has also increased in recent years. Information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K (17 CFR 229.104) is included in Exhibit 95.1 to this Quarterly Report filed on Form 10-Q.

ITEM 5. OTHER INFORMATION

Forward Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements that are subject to risks and uncertainties. All statements other than statements of historical fact included in this Quarterly Report on Form 10-Q are forward-looking statements. Forward-looking statements give our current expectations and projections relating to our financial condition, results of operations, plans, objectives, future performance and business. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as “anticipate,” “estimate,” “expect,” “project,” “plan,” “intend,” “believe,” “may,” “will,” “should,” “likely” and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events. For example, all statements we make relating to our estimated and projected costs, expenditures, cash flows, growth rates and financial results, our plans and objectives for future operations, growth or initiatives, strategies or the expected outcome or impact of pending or threatened litigation are forward-looking statements. All forward-looking statements are subject to risks and uncertainties that may cause actual results to differ materially from those that we expected, including:

- fluctuations in demand for commercial silica;
- the cyclical nature of our customers’ businesses;
- operating risks that are beyond our control, such as changes in the price and availability of transportation, natural gas or electricity; unusual or unexpected geological formations or pressures; cave-ins, pit wall failures or rock falls; or unanticipated ground, grade or water conditions;
- our dependence on three of our plants for a significant portion of our sales;
- the level of activity in the natural gas and oil industries;
- decreased demand for frac sand or the development of either effective alternative proppants or new processes to replace hydraulic fracturing;
- federal, state and local legislative and regulatory initiatives relating to hydraulic fracturing and the potential for related regulatory action or litigation affecting our customers’ operations;
- our rights and ability to mine our properties and our renewal or receipt of the required permits and approvals from governmental authorities and other third parties;
- our ability to implement our capacity expansion plans within our current timetable and budget and our ability to secure demand for our increased production capacity, and the actual operating costs once we have completed the capacity expansion;
- our ability to succeed in competitive markets;
- loss of, or reduction in, business from our largest customers;
- increasing costs or a lack of dependability or availability of transportation services and transload network access infrastructure;
- increases in the prices of, or interruptions in the supply of, natural gas and electricity, or any other energy sources;
- increases in the price of diesel fuel;
- diminished access to water;
- our ability to successfully complete acquisitions or integrate acquired businesses;
- our ability to make capital expenditures to maintain, develop and increase our asset base and our ability to obtain needed capital or financing on satisfactory terms;
- our substantial indebtedness and pension obligations;
- restrictions imposed by our indebtedness on our current and future operations;
- contractual obligations that require us to deliver minimum amounts of frac sand or purchase minimum amounts of services
 - the accuracy of our estimates of mineral reserves and resource deposits;
- a shortage of skilled labor and rising costs in the mining industry;

- our ability to attract and retain key personnel;
- our ability to maintain satisfactory labor relations;
- our reliance on trade secrets and contractual restrictions, rather than patents, to protect our proprietary rights;
- our significant unfunded pension obligations and post-retirement health care liabilities;
- our ability to maintain effective quality control systems at our mining, processing and production facilities;
- seasonal and severe weather conditions;
- fluctuations in our sales and results of operations due to seasonality and other factors;
- interruptions or failures in our information technology systems;
- the impact of a terrorist attack or armed conflict;
- extensive and evolving environmental, mining, health and safety, licensing, reclamation and other regulation (and changes in their enforcement or interpretation);
- silica-related health issues and corresponding litigation;
- our ability to acquire, maintain or renew financial assurances related to the reclamation and restoration of mining property; and
- other factors included and disclosed in Part I, Item 1A, “Risk Factors” of our 2014 Annual Report.

We derive many of our forward-looking statements from our operating budgets and forecasts, which are based on many detailed assumptions. While we believe that our assumptions are reasonable, we caution that it is very difficult to predict the impact of known factors, and it is impossible for us to anticipate all factors that could affect our actual results. Important factors that could cause actual results to differ materially from our expectations, or cautionary statements, are disclosed under Item 1A, “Risk Factors” and Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our 2014 Annual Report. All written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by these cautionary statements as well as other cautionary statements that are made from time to time in our other filings with the SEC, including this Quarterly Report on Form 10-Q, and public communications. You should evaluate all forward-looking statements made in this Quarterly Report on Form 10-Q in the context of these risks and uncertainties.

We caution you that the important factors referenced above may not contain all of the factors that are important to you. In addition, we cannot assure you that we will realize the results or developments we expect or anticipate or, even if substantially realized, that they will result in the consequences or affect us or our operations in the way we expect. The forward-looking statements included in this Quarterly Report on Form 10-Q are made only as of the date hereof. We undertake no obligation to update or revise any forward-looking statement as a result of new information, future events or otherwise, except as otherwise required by law.

ITEM 6. EXHIBITS

The information called for by this Item is incorporated herein by reference from the Exhibit Index included in this Quarterly Report on Form 10-Q.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this Report to be signed on its behalf by the undersigned, thereunto duly authorized, this 29th day of July, 2015.

U.S. Silica Holdings, Inc.

/s/ DONALD A. MERRIL

Name: Donald A. Merrill

Title: Chief Financial Officer
