21 October 2016

InterContinental Hotels Group PLC

Third Quarter Trading Update

Solid trading and strong signings performance

Highlights

Global Q3 comparable RevPAR1 up 1.3%, and up 1.8% Q3 YTD

Enhanced global scale: 7k rooms opened in Q3, increasing net system size 3.8% YoY to 754k rooms

Building future growth: 19k rooms signed; highest for Q3 since 2008, taking pipeline to 230k rooms

Richard
Solomons, Chief
Executive of
InterContinental
Hotels Group
PLC, said:

"We delivered a
solid
performance in
the third quarter,
leveraging our
global scale to
drive 3.8% net
system growth
and 1.3%
RevPAR
growth.

We remain
focused on
executing our

commercial strategy to drive competitive advantage. This includes broadening the footprint of our global portfolio of brands, across which we drove our highest signings for eight years, including our best ever third quarter performance for Greater China.

Enhancements to IHG Rewards Club, including the roll-out of our preferential member pricing initiative, 'Your Rate', continue to drive excellent results. This, together with our initiatives to utilise digital innovation to enhance all stages of the guest journey, means we will continue to generate more customised and informed interactions with our guests and deliver improved returns for owners.

Looking ahead, while industry RevPAR growth

has slowed, the fundamentals for the sector, and particularly for IHG, remain compelling.

This, combined with our winning strategy and the strength of our cash generative business model, will enable us to drive sustainable growth into the future. Despite the uncertain environment in some markets, we remain confident in the outlook for the remainder of the year."

Third Quarter
RevPAR
performance
Americas

RevPAR was up 1.9% in Q3, and 2.2% Q3 YTD.

In the US

RevPAR was up 1.4% in Q3, and 1.9% in the first 9 months, with occupancy levels of more than 75% driven by continued record levels of industry demand.

Performance continued to be impacted by our concentration in oil producing markets, where RevPAR was

down 7.3%,
compared to
2.5% growth in
the rest of the
estate.

Elsewhere in the
region, Mexico
delivered double
digit RevPAR
growth, we
drove a solid
performance in
Latin America
and the
Caribbean, and
Canada was up
6.7% due to
strong trading in
urban markets.

Europe
RevPAR was
flat in Q3, and
up 1.2% Q3
YTD. Germany
delivered
mid-single digit
RevPAR growth
in Q3, and
Russia/CIS
drove 20%
growth
benefiting from
increased
domestic travel.
2.5% RevPAR
growth in the
UK reflects solid
trading in the
provinces
partially offset
by flat
performance in
London, where
industry-wide
supply increases
continue to have
an impact.
Ongoing
challenging
trading

conditions in France, Turkey and Belgium resulted in significant RevPAR declines in those countries.

Asia, Middle East & Africa RevPAR was down 0.1% in Q3, and down 0.2% Q3 YTD. Performance in the region outside the Middle East was strong, with 3.9% RevPAR growth in Q3 overall. India delivered RevPAR growth of 21%, Japan was flat, and Australasia and Southeast Asia were up low to mid-single digits, the latter led by Vietnam and Thailand. In the Middle East, RevPAR was down 7.7% due to the ongoing impact of low oil prices.

Greater China RevPAR was up 0.9% in Q3, and 1.8% Q3 YTD. Q3 growth of 2.2% in mainland China continued to be led by tier one cities, where

RevPAR was up nearly 6%. A low single digit RevPAR decline in Hong Kong reflects some improvement in trading, but Macau continues to be affected by industry-wide challenging conditions with RevPAR down 14%.

1 RevPAR growth is at constant exchange rates (CER) unless otherwise stated.

Strategic progress

Strengthening our preferred brands
- In InterContinental Hotels & Resorts' 70th anniversary year, we are strengthening its position as the world's largest luxury hotel brand, signing 12 properties year to date. This is our best performance in eight years, and includes the signing of our first InterContinental hotel in the

Maldives in Q3.

- Our innovative new design solutions are driving momentum for the Holiday Inn brand family, with more than 13k room signings, our best Q3 performance since 2007.

- We are strengthening our position in the fast-growing boutique segment, by signing our most Hotel Indigo rooms since Q3 2007, including the first Hotel Indigo in Poland. We continue to expand our Kimpton portfolio with the Gray Hotel in Chicago, the fifth opening for the brand this year.

- The latest phase of our Crowne Plaza refresh is already driving success, with the brand voted best Upscale Hotel Brand in North America by Business Travel News, up from eighth position last year.

- We continue to grow our extended stay footprint, with over 7k rooms added to our pipeline so far this year, our best performance in eight years.

- Building on the appeal that the EVEN Hotels brand has in the US, where we now have five open and six pipeline hotels, we have signed a deal to develop a portfolio of EVEN hotels in Australia and New Zealand.

Building and leveraging scale

- Net system size up 3.8% year on year to 754k rooms (5,099 hotels).

- 7k rooms (51 hotels) opened in the quarter and 3k rooms (22 hotels) removed.

During Q4 2016, consistent with historic trends we expect an increase in room openings pace, although we expect room removals to be in line with the average of the previous 3 quarters.

- 19k rooms (128 hotels) were signed; our highest Q3 since 2008, including 6k rooms in Greater China, driving the region's best ever third quarter and year to date signings performance.

- IHG's pipeline increased to 230k rooms, with 90% in our ten priority markets and approximately 45% under construction.

- 4% share of industry room supply, 14% share of active industry room pipeline.

Driving revenue delivery through technology and loyalty

- 'Your Rate by IHG Rewards Club', our preferential member pricing initiative, is helping to drive record growth in enrolments¹, and a doubling in the growth rate of our direct channels², with no negative impact on ADR².

- In August we signed a global partnership with Alipay, China's leading 3rd party online payment solutions company. This will make IHG the first global hotel company to give Chinese guests the ability to pay via Alipay, available through all of our online and mobile channels, as well as across our full estate of hotels globally.

- Our innovative cloud-based Guest Reservation System remains on track for phased roll out starting in late 2017.

Financial position and capital allocation

The financial position of the group remains robust, with an on-going commitment to an efficient balance sheet and an investment grade credit rating.

In August the group issued a £350m, 10-year

bond at a 2.125% coupon rate, the lowest funding rate IHG has achieved in the Sterling bond market.

Foreign exchange

The US Dollar continued to strengthen through Q3 which reduced group RevPAR to flat (0.0%) in the quarter when reported at actual exchange rates. A breakdown of constant currency vs. actual currency RevPAR by region is set out in Appendix 2.

Currency markets continue to be volatile and we expect foreign exchange to have an impact on 2016 reported profit. If current spot exchange rates³ had existed throughout H2 2015, reported operating profit for that period would have been \$9m higher.

Note that whilst the UK

comprises around 5% of our group revenues, approximately 50% of our gross central overhead and 40% of Europe regional overhead are in sterling. At 30 June 2016 exchange rates, approximately 70% of our debt was denominated in sterling.

1 As at August 2016

2 Since Your Rate by IHG Rewards Club launch on May 3, 2016

3 As at 14 October 2016

Cautionary note regarding forward-looking statements:

This announcement contains certain forward-looking statements as defined under United States law (Section 21E of the Securities Exchange Act of 1934) and otherwise.

These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. Forward-looking statements often use words such as 'anticipate', 'target', 'expect', 'estimate', 'intend', 'plan', 'goal', 'believe' or other words of similar meaning. These statements are based on assumptions and assessments made by InterContinental Hotels Group PLC's management in light of their experience and their perception of historical trends, current conditions, expected future developments and other factors they believe to be appropriate. By their nature, forward-looking statements are inherently predictive, speculative and involve risk and uncertainty. There are a number of factors that could cause actual results and developments to differ materially from those expressed in or implied by, such forward-looking statements. The main factors that could affect the business and the financial results are described in the 'Risk Factors' section in the current InterContinental Hotels Group PLC's Annual report and Form 20-F filed with the United States Securities and Exchange Commission.
