Forward-Looking Statements

This document contains "forward-looking statements" - that is, statements related to future, not past, events. In this context, forward-looking statements often address our expected future business and financial performance, and often contain words such as "expect," "anticipate," "intend," "plan," "believe," "seek," or "will." Forward-looking statements by their nature address matters that are, to different degrees, uncertain. For us, particular uncertainties that could adversely or positively affect our future results include: the behavior of financial markets, including fluctuations in interest and exchange rates and commodity and equity prices; the commercial and consumer credit environment; the impact of regulation and regulatory, investigative and legal actions; strategic actions, including acquisitions and dispositions; future integration of acquired businesses; future financial performance of major industries which we serve, including, without limitation, the air and rail transportation, energy generation, media, real estate and healthcare industries; and numerous other matters of national, regional and global scale, including those of a political, economic, business and competitive nature. These uncertainties may cause our actual future results to be materially different than those expressed in our forward-looking statements. We do not undertake to update our forward-looking statements.

Notes to Condensed, Consolidated Financial Statements (Unaudited)

1. Our financial statements are prepared in conformity with the U.S. generally accepted accounting principles (GAAP). Preparing financial statements in conformity with GAAP requires us to make estimates and assumptions that affect reported amounts and related disclosures. Actual results could differ from those estimates. These statements include all adjustments (consisting of normal recurring accruals) that we considered necessary to present a fair statement of our results of operations, financial position and cash flows. The results reported in these condensed, consolidated financial statements should not be regarded as necessarily indicative of results that may be expected for the entire year. See note 1 to the consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2006. That note discusses consolidation and financial statement presentation. We have reclassified certain prior-period amounts to conform to the current period presentation.

All of our outstanding common stock is owned by General Electric Capital Services, Inc. (GE Capital Services or GECS), all of whose common stock is owned, directly or indirectly, by General Electric Company (GE Company or GE). Our financial statements consolidate all of our affiliates - companies that we control and in which we hold a majority voting interest. Details of total revenues and segment profit by operating segment can be found on page 13 of this report.

Unless otherwise indicated, information in these notes to condensed, consolidated financial statements relates to continuing operations.

We label our quarterly information using a calendar convention, that is, first quarter is labeled as ending on March 31, second quarter as ending on June 30, and third quarter as ending on September 30. It is our longstanding practice to establish interim quarterly closing dates using a fiscal calendar, which requires our businesses to close their books on either a Saturday or Sunday, depending on the business. The effects of this practice are modest and only exist within a reporting year. The fiscal closing calendar from 1993 through 2013 is available on our website, www.ge.com/secreports.

Accounting changes

On January 1, 2007, we adopted Financial Accounting Standards Board Interpretation 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), and FASB Staff Position (FSP) FAS 13-2, *Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction*. Among other things, FIN 48 requires application of a "more likely than not" threshold to the recognition and derecognition of tax positions. It further requires that a change in judgment related to prior years' tax positions be recognized in the quarter of such change. FSP FAS 13-2 requires recalculation of returns on leveraged leases when there is a change in the timing or projected timing of cash flows relating to income taxes associated with such leases. The January 1, 2007 transition reduced our retained earnings by \$77 million, all of which was associated with FSP FAS 13-2 and decreased financing receivables - net.

Annually, GE files over 6,500 income tax returns in over 250 global taxing jurisdictions, a substantial portion of which include our activities. We are under examination or engaged in tax litigation in many of these jurisdictions. The U.S. Internal Revenue Service is currently auditing the GE consolidated income tax returns, in which we join in filing, in two cycles: 2000-2002 and 2003-2005. In addition, certain other tax deficiency issues and refund claims for previous years remain unresolved. Our largest unresolved issues relate to deductions associated with certain leases. It is reasonably possible that one or both of these U.S. audit cycles will be completed during 2007. We believe that there is no other tax jurisdiction in which the outcome of unresolved issues or claims is

(6)

likely to be material to our financial position, cash flows or results of operations. We further believe that we have made adequate provision for all income tax uncertainties.

At January 1, 2007, our “unrecognized tax benefits” - that is, the aggregate tax effect of differences between tax return positions and the benefits recognized in our financial statements - amounted to \$2,835 million. If recognized, \$1,740 million of our unrecognized tax benefits would reduce our income tax expense and effective tax rate. Some portion of any such reduction might be reported as discontinued operations. During 2007, global audit resolutions could potentially reduce our unrecognized tax benefits, either because our tax positions are sustained on audit or because we agree to their disallowance, by as much as \$500 million, depending on the outcomes of ongoing examinations and litigation. Of this amount, \$300 million relates to positions that would not affect our total tax provision or effective tax rate.

We classify interest on tax deficiencies as interest expense; we classify income tax penalties as income tax expense. At January 1, 2007, before any tax benefits, our accrued interest on unrecognized tax benefits amounted to \$620 million and related accrued penalties amounted to \$96 million.

2. In 2006, we substantially completed our planned exit of the insurance businesses through the sale of GE Life, our U.K.-based life insurance operation, to Swiss Reinsurance Company (Swiss Re). Also during 2006, we completed the sale of our remaining 18% investment in Genworth Financial, Inc. (Genworth), our formerly wholly-owned subsidiary that conducted most of our consumer insurance business, including life and mortgage insurance operations, through a secondary public offering. Results of these businesses are reported as discontinued operations for all periods presented.

Revenues from discontinued operations for the first quarter of 2006 were \$803 million. Earnings from operations and disposal for the first quarter of 2006 were \$3 million (\$7 million pre tax) and \$125 million (\$306 million pre tax), respectively. Revenues and earnings from discontinued operations for the first quarter of 2007 were insignificant. Accrued liabilities, primarily tax related, amounted to \$196 million as of March 31, 2007, and will be settled beginning this year.

Goodwill balances increased \$1,380 million in 2007 as a result of new acquisitions. The largest goodwill balance increases arose from acquisitions of Trustreet Properties, Inc. (\$815 million at GE Commercial Finance), and Diskont und Kredit AG and Disko Leasing GmbH (DISKO) and ASL Auto Service-Leasing GmbH (ASL), the leasing businesses of KG Allgemeine Leasing GmbH & Co. (\$486 million at GE Commercial Finance). During 2007, we

decreased goodwill associated with previous acquisitions by \$101 million. The largest such adjustment was the decrease of \$54 million associated with the 2006 acquisition of Banque Artesia Nederland N.V. by GE Commercial Finance.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

A. Results of Operations

In the accompanying analysis of financial information, we sometimes use information derived from consolidated financial information but not presented in our financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP). Certain of these data are considered "non-GAAP financial measures" under the U.S. Securities and Exchange Commission (SEC) rules. For such measures, we have provided supplemental explanations and reconciliations in Exhibit 99 to this report on Form 10-Q.

Unless otherwise indicated, we refer to captions such as revenues and earnings from continuing operations simply as "revenues" and "earnings" throughout this Management's Discussion and Analysis. Similarly, discussion of other matters in our consolidated financial statements relates to continuing operations unless otherwise indicated.

Overview

Revenues for the first quarter of 2007 were \$15.6 billion, a \$1.6 billion (12%) increase over the first quarter of 2006. Revenues for the first quarter of 2007 included \$0.7 billion of revenue from acquisitions and were reduced by \$0.4 billion as a result of dispositions. Revenues also increased \$1.4 billion compared with the first quarter of 2006 as a result of organic revenue growth, the weakening U.S. dollar and the second quarter 2006 consolidation of GE SeaCo, an entity previously accounted for using the equity method. Organic revenue growth excludes the effects of acquisitions, business dispositions (other than dispositions of businesses acquired for investment) and currency exchange rates. Earnings were \$2.5 billion, up 6% from \$2.3 billion in the first quarter of 2006.

Overall, acquisitions contributed \$0.7 billion and \$0.4 billion to total revenues in the first quarters of 2007 and 2006, respectively. Acquired businesses had an insignificant effect on our total net earnings in the first quarter of 2007 compared with \$0.1 billion in the first quarter of 2006. We integrate acquisitions as quickly as possible. Only revenues and earnings from the date we complete the acquisition through the end of the fourth following quarter are attributed to such businesses. Dispositions also affected our operations through lower revenues of \$0.4 billion and \$0.3 billion in the first quarters of 2007 and 2006, respectively. The effect of dispositions on earnings was insignificant in each of the first quarters of 2007 and 2006.

The most significant acquisitions affecting first quarter 2007 results were the custom fleet business of National Australia Bank Ltd.; Diskont und Kredit AG and Disko Leasing GmbH (DISKO) and ASL Auto Service-Leasing GmbH (ASL), the leasing businesses of KG Allgemeine Leasing GmbH & Co.; and Banque Artesia Nederland N.V. at GE Commercial Finance.

The provision for income taxes was insignificant for the first quarter of 2007 (effective tax rate of 0.9%), compared with \$0.4 billion for the first quarter of 2006 (effective tax rate of 14.5%). The tax rate decreased primarily as a result of tax benefits related to the disposition of the SES Global investment at GE Commercial Finance and growth in lower-taxed earnings from global operations.

Segment Operations

Operating segments comprise our four businesses focused on the broad markets they serve: GE Commercial Finance, GE Money, GE Industrial and GE Infrastructure. For segment reporting purposes, certain financial services businesses are included in the industrial operating segments that actively manage such businesses and report their results for internal performance measurement purposes. These include Aviation Financial Services, Energy

(11)

Financial Services and Transportation Finance reported in the GE Infrastructure segment, and Equipment Services reported in the GE Industrial segment.

GECC corporate items and eliminations include the effects of eliminating transactions between operating segments; results of our insurance activities remaining in continuing operations; results of liquidating businesses such as consolidated, liquidating securitization entities; underabsorbed corporate overhead; certain non-allocated amounts determined by the Chief Executive Officer; and a variety of sundry items. GECC corporate items and eliminations is not an operating segment. Rather, it is added to operating segment totals to reconcile to consolidated totals on the financial statements.

The Chief Executive Officer allocates resources to, and assesses the performance of operations at the consolidated GE-level. GECC operations are a portion of those segments. We present below in their entirety the four GE segments that include financial services operations. We also provide a one-line reconciliation to GECC-only results, the most significant component of which is the elimination of GE businesses that are not financial services businesses. In addition to providing information on GE segments in their entirety, we have also provided supplemental information for certain businesses within the GE segments. Our Chief Executive Officer does not separately assess the performance of, or allocate resources among, these product lines.

Segment profit is determined based on internal performance measures used by the Chief Executive Officer to assess the performance of each business in a given period. In connection with that assessment, the Chief Executive Officer may exclude matters such as charges for restructuring; rationalization and other similar expenses; in-process research and development and certain other acquisition-related charges and balances; technology and product development costs; certain gains and losses from dispositions; and litigation settlements or other charges, responsibility for which preceded the current management team.

Segment profit always excludes the effects of principal pension plans, results reported as discontinued operations and accounting changes. Segment profit excludes or includes interest and other financial charges and income taxes according to how a particular segment's management is measured - excluded in determining segment profit, which we refer to as "operating profit," for GE Healthcare, GE NBC Universal and the industrial businesses of the GE Industrial and GE Infrastructure segments; included in determining segment profit, which we refer to as "net earnings," for GE Commercial Finance, GE Money, and the financial services businesses of the GE Industrial segment (Equipment Services) and the GE Infrastructure segment (Aviation Financial Services, Energy Financial Services and Transportation Finance).

We have reclassified certain prior-period amounts to conform to the current period presentation.

GE Commercial Finance revenues and net earnings increased 15% and 21%, respectively, compared with the first quarter of 2006. Revenues for the first quarter of 2007 included \$0.5 billion from acquisitions and were reduced by \$0.5 billion as a result of dispositions. Revenues for the quarter also increased \$0.8 billion compared with the first

quarter of 2006 as a result of organic revenue growth (\$0.6 billion) and the weakening U.S. dollar (\$0.2 billion). Net earnings increased by \$0.2 billion in the first quarter of 2007, with \$0.3 billion from core growth before losses and investment income, which included higher SES Global gains (\$0.1 billion). Core growth included \$0.1 billion representing one quarter of the total year's tax benefit on the disposition of SES Global. These items were partially offset by \$0.1 billion of higher losses, which were in part caused by lower recoveries.

GE Money revenues and net earnings increased 14% and 2%, respectively, in the first quarter of 2007. Revenues for the first quarter of 2007 included \$0.1 billion from acquisitions. Revenues for the quarter also increased \$0.6 billion compared with the first quarter of 2006 as a result of organic revenue growth (\$0.4 billion) and the weakening U.S. dollar (\$0.2 billion). The increase in net earnings resulted primarily from core growth (\$0.3 billion), including growth in lower-taxed earnings from global operations, and higher securitizations (\$0.2 billion). These increases were substantially offset by reduced earnings from our U.S. mortgage business, WMC, (\$0.4 billion) and our Japanese business (\$0.1 billion).

WMC's portfolio of U.S. wholesale mortgage loans, originated with the intent to sell, totaled \$5.0 billion at March 31, 2007. Recent pressures in the U.S. subprime mortgage industry have resulted in limited liquidity and a higher number of loans being put back to the originators. For GE Money this resulted in a \$0.3 billion after-tax charge that, along with the changes made to our underwriting guidelines, rightsizing the organization and lower production volume are intended to reduce our ongoing exposure.

In Japan, we continue to face pressures as a result of the December 2006 lending law, as well as customer claims for partial interest refunds. In response, we announced restructuring actions to allow us to operate more efficiently in the current environment, including consolidating our branch network. We continue to monitor the business closely and to assess further strategic actions.

GE Industrial revenues fell 9%, or \$0.7 billion, in the first quarter of 2007 as lower volume (\$0.9 billion) was partially offset by the weakening U.S. dollar (\$0.1 billion) at the industrial businesses in the segment. The decrease in volume reflects the sale of GE Supply in the third quarter of 2006 and Advanced Materials in the fourth quarter of 2006. Revenues increased \$0.1 billion at Equipment Services, primarily as a result of the second quarter 2006 consolidation of GE SeaCo, an entity previously accounted for using the equity method.

Segment profit decreased 20%, or \$0.1 billion, in the first quarter of 2007 as higher material and other costs (\$0.2 billion) and lower volume (\$0.1 billion) were partially offset by higher productivity (\$0.2 billion) at the industrial businesses in the segment. Higher material and other costs and improved productivity were primarily at Consumer & Industrial and Plastics.

GE Infrastructure revenues increased 18%, or \$1.8 billion, in the first quarter of 2007 on higher volume (\$1.2 billion), higher prices (\$0.2 billion) and the weakening U.S. dollar (\$0.1 billion) at the industrial businesses of the segment. The increase in volume reflects shipments of more large, heavy-duty gas turbines at Energy, increased sales of commercial services and engines at Aviation, the Vetco Gray acquisition and increased equipment and services sales at Oil & Gas, and increased locomotive sales at Transportation. Higher prices were primarily at Energy and Aviation while the effect of currency exchange rates was principally at Oil & Gas. Revenues also increased as a result of organic revenue growth at Aviation Financial Services (\$0.3 billion), primarily related to the sale of aircraft.

Segment profit rose 28%, or \$0.5 billion, as higher prices (\$0.2 billion), higher volume (\$0.2 billion) and productivity (\$0.1 billion) were partially offset by higher material and other costs (\$0.2 billion) at the industrial businesses of the segment. The effects of higher prices were primarily at Energy and Aviation. Volume increases were primarily at Aviation and Energy, while productivity improvements were primarily at Aviation. Segment profit from the financial services businesses increased as a result of core growth at Aviation Financial Services (\$0.2 billion).

B. Statement of Financial Position

Overview of Financial Position

Major changes in our financial position resulted from the following:

- During the first quarter of 2007, we completed the acquisitions of Trustreet Properties, Inc., DISKO and ASL, the leasing businesses of KG Allgemeine Leasing GmbH & Co. and Crow Holdings.
- The U.S. dollar was weaker at March 31, 2007, than at December 31, 2006, increasing the translated levels of our non-U.S. dollar assets and liabilities.

Investment securities comprise mainly investment-grade debt securities supporting obligations to annuitants and policyholders. We regularly review investment securities for impairment based on criteria that include the extent to which cost exceeds market value, the duration of that market decline, our intent and ability to hold to recovery and the financial health and specific prospects for the issuer. Of securities with unrealized losses at March 31, 2007, an insignificant amount was at risk of being charged to earnings in the next 12 months. Impairment losses were insignificant for each of the first quarters of 2007 and 2006.

Financing receivables is our largest category of assets and represents one of our primary sources of revenues. The portfolio of financing receivables, before allowance for losses, was \$334.3 billion at March 31, 2007, and \$334.2 billion at December 31, 2006. The related allowance for losses amounted to \$4.6 billion at March 31, 2007, and December 31, 2006, representing our best estimate of probable losses inherent in the portfolio. A discussion of the quality of certain elements of the financing receivables portfolio follows. For purposes of that discussion, “delinquent” receivables are those that are 30 days or more past due; and “nonearning” receivables are those that are 90 days or more past due (or for which collection has otherwise become doubtful).

Financing receivables, before allowance for losses, increased \$0.1 billion from December 31, 2006, primarily as a result of core growth (\$6.9 billion), acquisitions (\$4.2 billion) and the weakening U.S. dollar (\$0.5 billion), partially offset by securitization and sales (\$10.2 billion) and loans transferred to assets held for sale (\$0.5 billion). Related nonearning receivables were \$5.0 billion at March 31, 2007, compared with \$4.9 billion at year-end 2006, both representing 1.5% of outstanding receivables, respectively. Nonearning receivables excludes loans held for sale.

Delinquency rates on managed GE Commercial Finance equipment loans and leases and managed GE Money financing receivables follow.

	Delinquency rates at		
	3/31/07^(a)	12/31/06	3/31/06
GE Commercial Finance	1.26%	1.22%	1.31%
GE Money	5.48	5.05	5.14
GE Money excluding WMC	5.15	5.15	5.25

(a) Subject to update.

Stable delinquency rates at GE Commercial Finance over the periods reflected continued stable portfolio quality.

(18)

Delinquency rates at GE Money increased from December 31, 2006, and March 31, 2006, to March 31, 2007, as a result of higher delinquencies in WMC associated with increased early payment defaults. Delinquency rates excluding WMC decreased from March 31, 2006, to March 31, 2007, primarily resulting from improvements in our European secured financing business.

C. Debt Instruments

During the first quarter of 2007, GECC and GECC affiliates issued \$29 billion of senior, unsecured long-term debt. This debt was both fixed and floating rate and was issued to institutional and retail investors in the U.S. and 10 other global markets. Maturities for these issuances ranged from two to 40 years. We used the proceeds primarily for repayment of maturing long-term debt, but also to fund acquisitions and organic growth. We anticipate that we will issue approximately \$45 billion of additional long-term debt during the remainder of 2007, mostly to repay maturing long-term debt. The ultimate amount we issue will depend on our needs and on the markets.

Item 4. Controls and Procedures

Under the direction of our Chief Executive Officer and Chief Financial Officer, we evaluated our disclosure controls and procedures and internal control over financial reporting and concluded that (i) our disclosure controls and procedures were effective as of March 31, 2007, and (ii) no change in internal control over financial reporting occurred during the quarter ended March 31, 2007, that has materially affected, or is reasonably likely to materially affect, such internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

As previously reported, since January 2005, the U.S. Securities and Exchange Commission (SEC) staff has been conducting an investigation of the use of hedge accounting for derivatives by General Electric Company (GE) and General Electric Capital Corporation (GE Capital). In August 2005 the SEC staff advised us that the SEC had issued a formal order of investigation in the matter. The SEC has continued to subpoena documents, take testimony and request other information in this matter. In connection with this investigation, the SEC has asked for information about other GE accounting policies and practices, including items related to certain pre-2004 transactions in GE's Rail business. GE and GE Capital continue to cooperate fully with the investigation and to discuss matters with the SEC staff as they arise.

The Antitrust Division of the Department of Justice (DOJ) and the SEC are conducting an industry-wide investigation of marketing and sales of guaranteed investment contracts, and other financial instruments, to municipalities. In connection with this investigation, two subsidiaries of GE Capital have received subpoenas: GE Funding CMS (Trinity Funding Co.) received a subpoena requesting documents from DOJ and GE Funding Capital Market Services, Inc. received a subpoena from the SEC that requests similar information about Trinity Funding Company, LLC. The Company is cooperating fully with the SEC and DOJ in this matter.
