Securities Registered Pursuant to Section 12(g) of the Act:

(Title of class)
NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Aggregate market value of the outstanding common equity held by nonaffiliates of the registrant as of the last business day of the registrant's most recently completed second fiscal quarter: None.

At February 1, 2014, 1,000 shares of voting common stock, which constitute all of the outstanding common equity, with a par value of \$14 per share were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

The consolidated financial statements of General Electric Company, set forth in the Annual Report on Form 10-K of General Electric Company for the year ended December 31, 2013, are incorporated by reference into Part IV hereof.

REGISTRANT MEETS THE CONDITIONS SET FORTH IN GENERAL INSTRUCTION I(1)(a) AND (b) OF FORM 10-K AND IS THEREFORE FILING THIS FORM 10-K WITH THE REDUCED DISCLOSURE FORMAT.

PART I

Item 1. Business.

General Electric Capital Corporation

General Electric Capital Corporation (GE Capital or GECC) was incorporated in 1943 in the State of New York under the provisions of the New York Banking Law relating to investment companies, as successor to General Electric Contracts Corporation, which was formed in 1932. Until November 1987, our name was General Electric Credit Corporation. On July 2, 2001, we changed our state of incorporation to Delaware. As of December 31, 2013, all of our outstanding common stock was wholly-owned by General Electric Company (GE Company or GE). Financing and services offered by GE Capital are diversified, a significant change from the original business of GE Capital, which was, financing distribution and sale of consumer and other GE products.

We operate in five segments described in the Operating Segments Section beginning on page 4. These operations are subject to a variety of regulations in their respective jurisdictions. Our operations are located in North America, South America, Europe, Australia and Asia.

Our principal executive offices are located at 901 Main Avenue, Norwalk, CT 06851-1168. At December 31, 2013, GECC employed approximately 50,000 persons.

We are a regulated savings and loan holding company under U.S. law and became subject to Federal Reserve Board (FRB) supervision on July 21, 2011, the one-year anniversary of the Dodd-Frank Wall Street Reform and Consumer Protection Act (DFA). In addition, on July 8, 2013, the U.S. Financial Stability Oversight Council (FSOC) designated GECC as a nonbank systemically important financial institution (nonbank SIFI) under the DFA. Many of the rulemakings for supervision of nonbank SIFIs are not final and therefore the exact impact and implementation date remain uncertain. GECC continues to plan for the enhanced prudential standards that will apply to nonbank SIFIs. These DFA rulemakings will require, among other items, enhanced capital and liquidity levels, compliance with the comprehensive capital analysis and review regulations (CCAR), compliance with counterparty credit exposure limits, and the development of a resolution plan for submission to regulators.

Our financial information, including filings with the U.S. Securities and Exchange Commission (SEC), is available at www.ge.com/secreports. Copies are also available, without charge, from GE Corporate Investor Communications, 3135 Easton Turnpike, Fairfield, CT, 06828-0001. Reports filed with the SEC may be viewed at www.sec.gov or obtained at the SEC Public Reference Room in Washington, D.C. Information regarding the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. References to our website addressed in this report are provided as a convenience and do not constitute, and should not be viewed as, an incorporation by reference of the information contained on, or available through, the website. Therefore, such information should not be considered part of this report.

Forward-Looking Statements

This document contains “forward-looking statements” – that is, statements related to future, not past, events. In this context, forward-looking statements often address our expected future business and financial performance and financial condition, and often contain words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “see,” or “will.” Forward-looking statements by their nature address matters that are, to different degrees, uncertain. For us, particular uncertainties that could cause our actual results to be materially different than those expressed in our forward-looking statements include: current economic and financial conditions, including volatility in interest and exchange rates, equity prices and the value of financial assets; potential market disruptions or other impacts arising in the United

States or Europe from developments in sovereign debt situations; the impact of conditions in the financial and credit markets on the availability and cost of our funding and on our ability to reduce our asset levels as planned; the impact of conditions in the housing market and unemployment rates on the level of commercial and consumer credit defaults; pending and future mortgage securitization claims and litigation in connection with WMC, which may affect our estimates of liability, including possible loss estimates; our ability to maintain our current credit

(3)

rating and the impact on our funding costs and competitive position if we do not do so; our ability to pay dividends to GE at the planned level; the level of demand and financial performance of the major industries GE serves, including, without limitation, air transportation, energy generation, real estate and healthcare; the impact of regulation and regulatory, investigative and legal proceedings and legal compliance risks, including the impact of financial services regulation; our success in completing announced transactions and integrating acquired businesses; our ability to complete the staged exit from our North American Retail Finance business as planned; the impact of potential information technology or data security breaches; and numerous other matters of national, regional and global scale, including those of a political, economic, business and competitive nature. These uncertainties may cause our actual future results to be materially different than those expressed in our forward-looking statements. These uncertainties are described in more detail in Part I, Item 1A. "Risk Factors" of this Form 10-K Report. We do not undertake to update our forward-looking statements.

Operating Segments

Segment revenue and profit information and additional financial data and commentary on recent financial results for operating segments are provided in the Segment Operations section in Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" and in Note 19 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Operating businesses that are reported as segments include Commercial Lending and Leasing (CLL), Consumer, Real Estate, Energy Financial Services and GE Capital Aviation Services (GECAS). A summary description of each of our operating segments follows.

GE Capital businesses offer a broad range of financial services and products worldwide for businesses of all sizes. Services include commercial loans and leases, fleet management, financial programs, credit cards, personal loans and other financial services. GE Capital also develops strategic partnerships and joint ventures that utilize GE's industry-specific expertise in aviation, energy, infrastructure and healthcare to capitalize on market-specific opportunities.

During 2013, GE Capital provided approximately \$115 billion of new financings in the U.S. to various companies, infrastructure projects and municipalities. Additionally, we extended approximately \$105 billion of credit to approximately 61 million U.S. consumers. GE Capital provided credit to approximately 31,200 new commercial customers and 43,000 new small businesses in the U.S. during 2013 and ended the period with outstanding credit to more than 237,000 commercial customers and 212,000 small businesses through retail programs in the U.S.

We have communicated our goal of reducing our ending net investment (ENI), most recently targeting ENI of \$300 billion to \$350 billion. ENI is a metric used to measure the total capital invested in the financial services business. Our ENI (excluding cash and equivalents) was \$380 billion at December 31, 2013. To achieve this goal, we are more aggressively focusing our businesses on selective financial services products where we have deep domain experience, broad distribution, and the ability to earn a consistent return on capital, while managing our overall balance sheet size and risk. We have a strategy of exiting those businesses that are deemed to be non-strategic or that are underperforming. We have completed a number of dispositions in our businesses in the past and will continue to evaluate options going forward.

While we are exiting non-core businesses, we are investing in our core businesses in markets where we believe that GECC has deep domain experience and is competitively advantaged. Accordingly, in the short-term, as we reduce our ENI through exiting non-core businesses, the overall level of our future net earnings may be reduced. However, over the long-term, we believe that this strategy will improve our long-term performance through higher returns as we will have a larger concentration of assets in our core businesses, as opposed to the underperforming or non-strategic assets

we will be exiting; reduce liquidity risk as we pay down outstanding debt and diversify our sources of funding (with less reliance on the global commercial paper markets and an increase in alternative sources of funding such as deposits); and reduce capital requirements while strengthening capital ratios. Additional information about our liquidity and how we manage this risk can be found in the Financial Resources and Liquidity section in Part II, Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this Form 10-K Report.

(4)

We also continue our longstanding practice of providing supplemental information for certain businesses within the segments.

Commercial Lending and Leasing

CLL has particular mid-market expertise, and primarily offers secured commercial loans, equipment financing and other financial services to companies across a wide range of industries including construction, retail, manufacturing, transportation, media, communications, technology and healthcare. Equipment financing activities include industrial, medical, fleet vehicles, corporate aircraft, construction, office imaging, and many other equipment types.

In the first quarter of 2013, we announced the planned disposition of our CLL trailer services business in Europe (CLL Trailer Services) and classified the business as discontinued operations. We completed the sale in the fourth quarter of 2013.

In 2011, we completed the sale of our CLL marine container leasing business, which consists of our controlling interests in the GE SeaCo joint venture along with other owned marine container assets, and our CLL trailer fleet services business in Mexico.

We operate in a highly competitive environment. Our competitors include commercial banks, investment banks, leasing companies, financing companies associated with manufacturers, and independent finance companies. Competition related to our lending and leasing operations is based on price, that is, interest rates and fees, as well as deal structure and terms. In recent years, there has been a disruption in the capital markets and in access to and availability of capital as well as the exit of some competitors. Profitability is affected not only by broad economic conditions that affect customer credit quality and the availability and cost of capital funding, but also by successful management of credit risk, operating risk and market risks such as interest rate and currency exchange risks. Success requires high-quality risk management systems, customer and industry specific knowledge, diversification, service and distribution channels, strong collateral and asset management knowledge, strong transaction expertise and the ability to reduce costs through technology and productivity.

(5)

Consumer

Consumer, through consolidated entities and associated companies, is a leading provider of financial services to consumers and retailers around the world. We offer a full range of financial products to suit customers' needs. These products include, on a global basis, private-label credit cards; personal loans; bank cards; auto loans and leases; mortgages; debt consolidation; home equity loans; deposit and other savings products; and small and medium enterprise lending.

In the fourth quarter of 2013, we completed a sale of 68.5% of our Swiss consumer finance bank, Cembra Money Bank AG (Cembra), through an initial public offering (IPO); we committed to sell our Consumer banking business in Russia (Consumer Russia) and classified the business as discontinued operations; and we sold our remaining equity interest in the Bank of Ayudhya (Bay Bank).

In November 2013, we announced that we intend to pursue an IPO of our North American Retail Finance business (Retail Finance) as a first step in a staged exit from that business. We plan to file a registration statement with the SEC in the first quarter of 2014 and complete the IPO later in 2014.

We plan to issue up to 20% of the equity of Retail Finance in the IPO, in exchange for cash that will be used to increase the capital of the new company. We currently intend to complete our exit from Retail Finance in 2015 through a split-off transaction, by making a tax-free distribution of our remaining interest in Retail Finance to electing GE stockholders in exchange for shares of GE's common stock. We may also decide to exit by selling or otherwise distributing or disposing of all or a portion of our remaining interest in the Retail Finance shares.

In the first quarter of 2013, we acquired the deposit business of MetLife Bank, N.A., which is an online banking platform with approximately \$6.4 billion in U.S. retail deposits that will allow us to better serve our customers.

In 2011, we sold our Consumer Singapore business and our Consumer home lending operations in Australia and New Zealand (Australian Home Lending) and classified them as discontinued operations. Also in 2011, we sold a substantial portion of our Garanti Bank equity investment. During 2012, we sold our remaining equity interest in Garanti Bank, which was classified as an available-for-sale security.

Our operations are subject to a variety of bank and consumer protection regulations. Further, a number of countries have ceilings on rates chargeable to consumers in financial service transactions. We are subject to competition from various types of financial institutions including commercial banks, leasing companies, consumer loan companies, independent finance companies, finance companies associated with manufacturers, and insurance companies. Industry participants compete on the basis of price, servicing capability, promotional marketing, risk management, and cross selling. The markets in which we operate are also subject to the risks from fluctuations in retail sales, interest and currency exchange rates, and the consumer's capacity to repay debt.

(6)

Real Estate

Real Estate offers a range of capital and investment solutions, including equity capital for acquisition or development, as well as fixed and floating rate mortgages for new acquisitions or re-capitalizations of commercial real estate worldwide. Our business finances, with both equity and loan structures, the acquisition, refinancing and renovation of office buildings, apartment buildings, retail facilities, hotels, warehouses and industrial properties. Our typical real estate loans are intermediate term, senior, fixed or floating-rate, and are secured by existing income-producing commercial properties. We invest in, and provide restructuring financing for, portfolios of commercial mortgage loans, limited partnerships and tax-exempt bonds.

We own and operate a global portfolio of real estate with the objective of maximizing property cash flows and asset values. In the normal course of our business operations, we sell certain real estate equity investments when it is economically advantageous for us to do so. However, as real estate values are affected by certain forces beyond our control (e.g., market fundamentals and demographic conditions), it is difficult to predict with certainty the level of future sales, sales prices, impairments or write-offs.

During 2013, in conjunction with our initiative to increase our overall real estate lending portfolio and reduce our exposure to real estate equity investments, we acquired certain loan portfolios and sold real estate equity investments when economically advantageous for us to do, including the sale of real estate comprising certain floors located at 30 Rockefeller Center, New York.

In 2012, we completed the sale of a portion of our Business Properties portfolio (Business Property), including certain commercial loans, the origination and servicing platforms and the servicing rights on loans previously securitized by GECC. The portion that we retained comprises our owner-occupied/credit tenant portfolio.

Our competitors include banks, financial institutions, real estate companies, real estate investment funds and other financial companies. Competition in our equity investment business is primarily based on price, and competition in our lending business is primarily based on interest rates and fees, as well as deal structure and terms. As we compete globally, our success is sensitive to the economic and political environment of each country in which we do business.

Energy Financial Services

Energy Financial Services invests in long-lived, capital-intensive energy projects and companies by providing structured equity, debt, leasing, partnership financing, project finance and broad-based commercial finance.

We operate in a highly competitive environment. Our competitors include banks, financial institutions, energy companies, and other finance and leasing companies. Competition is primarily based on price, that is, interest rates and fees, as well as deal structure and terms. As we compete globally, our success is sensitive to the economic and political environment of each country in which we do business.

GE Capital Aviation Services

GECAS, our commercial aircraft financing and leasing business, offers a wide range of aircraft types and financing options, including operating leases and secured debt financing, and also provides productivity solutions including spare engine leasing, airport and airline consulting services, and spare parts financing and management.

We operate in a highly competitive environment. Our competitors include aircraft manufacturers, banks, financial institutions, equity investors, and other finance and leasing companies. Competition is based on lease rate financing terms, aircraft delivery dates, condition and availability, as well as available capital demand for financing.

(7)

GECC Corporate Items and Eliminations

GECC Corporate Items and Eliminations primarily include unallocated Treasury and Tax operations; Trinity, a group of run-off sponsored special purpose entities; the effects of eliminating transactions between GE Capital's five operating businesses; results of our run-off insurance operations remaining in continuing operations attributable to GECC; unallocated corporate costs; and certain non-allocated amounts determined by the Chairman.

Discontinued Operations

Discontinued operations primarily comprises GE Money Japan (our Japanese personal loan business, Lake, and our Japanese mortgage and card businesses, excluding our investment in GE Nissen Credit Co., Ltd.), our U.S. mortgage business (WMC), our U.S. recreational vehicle and marine equipment financing business (Consumer RV Marine), Consumer Mexico, Consumer Singapore, Australian Home Lending, our Consumer mortgage lending business in Ireland (Consumer Ireland), CLL Trailer Services and Consumer Russia.

For further information about discontinued operations, see Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 2 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Geographic Data

Geographic data is provided in the Geographic Operations section in Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 19 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Regulations and Competition

We are a regulated savings and loan holding company under U.S. law and became subject to Federal Reserve Board (FRB) supervision on July 21, 2011, the one-year anniversary of the Dodd-Frank Wall Street Reform and Consumer Protection Act (DFA). In addition, on July 8, 2013, the U.S. Financial Stability Oversight Council (FSOC) designated GECC as a nonbank systemically important financial institution (nonbank SIFI) under the DFA. Many of the rulemakings for supervision of nonbank SIFIs are not final and therefore the exact impact and implementation date remain uncertain. GECC continues to plan for the enhanced prudential standards that will apply to nonbank SIFIs. These DFA rulemakings will require, among other items, enhanced capital and liquidity levels, compliance with the comprehensive capital analysis and review regulations (CCAR), compliance with counterparty credit exposure limits, and the development of a resolution plan for submission to regulators.

We are also subject to the Volcker Rule, which U.S. regulators finalized on December 10, 2013. The rule prohibits companies that are affiliated with U.S. insured depository institutions from engaging in "proprietary trading" or acquiring or retaining any ownership interest in, or sponsoring or engaging in certain transactions with, a "hedge fund" or a "private equity fund." Proprietary trading and fund investing, as prohibited by the rule, are not core activities for us, but we are assessing the full impact of the rule, in anticipation of full conformance with the rule, as required by July 21, 2015.

The FRB recently finalized regulations to revise and replace its current rules on capital adequacy and to extend capital regulations to savings and loan holding companies like GECC. Under the final rules, GECC expects that the standardized approach for calculating capital will apply to GECC, in its capacity as a savings and loan holding company, on January 1, 2015. However, that timing could change once nonbank SIFI rules are finalized. GECC will ultimately also become subject to the Basel III advanced capital rules that will be applicable to institutions with \$250 billion or more in assets. Initial actions required for compliance with the advanced capital rules, including building out

the necessary systems and models, will begin once GECC is subject to regulatory capital rules. However, full implementation will take several years to complete.

(8)

The FRB has also indicated in a proposed rulemaking that they will require nonbank SIFIs to submit annual capital plans for review, including institutions' plans to make capital distributions, such as dividend payments. The applicability and timing of this proposed regulation to GECC is not yet determined. While we are not yet subject to this regulation, our capital allocation planning remains subject to FRB review as a savings and loan holding company.

We undertake an annual review of our capital adequacy prior to establishing a plan for dividends to our parent. This review is based on a forward-looking assessment of our material enterprise risks and involves the consideration of a number of factors. This analysis also includes an assessment of our capital and liquidity levels, as well as incorporating risk management and governance considerations. The most recent capital adequacy review was approved by the GECC board of directors and the GE Board of Directors Risk Committee in the first quarter of 2013. GECC is currently in the process of updating the 2013 capital adequacy review and it will be presented to the GECC board of directors and the GE Board of Directors Risk Committee in the first quarter of 2014. While a savings and loan holding company and nonbank SIFI like GECC is currently not required to obtain FRB approval to pay a dividend, it may not, under FRB regulations, conduct its operations in an unsafe or unsound manner. The FRB has articulated factors that it expects boards of directors of bank holding companies and savings and loan holding companies to consider in determining whether to pay a dividend.

Overall, GECC does not believe that designation as a nonbank SIFI will have a material impact on its business or operations.

In addition to the above, our activities are subject to a variety of U.S. federal and state regulations including, at the federal level, the Consumer Credit Protection Act, the Equal Credit Opportunity Act and certain regulations issued by the Federal Trade Commission. A majority of states have ceilings on rates chargeable to customers on retail loan transactions, installment loans and revolving credit financing. Our insurance activities are regulated by various state insurance commissions and non-U.S. regulatory authorities.

The businesses in which we engage are highly competitive. We are subject to competition from various types of financial institutions, including banks, thrifts, investment banks, broker-dealers, credit unions, leasing companies, consumer loan companies, independent finance companies, finance companies associated with manufacturers and insurance and reinsurance companies.

Business and Economic Conditions

Our businesses are generally affected by general business and economic conditions in countries in which we conduct business. When overall economic conditions deteriorate in those countries, there generally are adverse effects on our operations, although those effects are dynamic and complex. For example, a downturn in employment or economic growth in a particular national or regional economy will generally increase the pressure on customers, which generally will result in deterioration of repayment patterns and a reduction in the value of collateral. However, in such a downturn, demand for loans and other products and services we offer may actually increase. Interest rates, another macro-economic factor, are important to our businesses. In the lending and leasing businesses, higher real interest rates increase our cost to borrow funds, but can also provide higher levels of return on new investments. For our operations, such as the insurance activities, that are linked less directly to interest rates, rate changes generally affect returns on investment portfolios.

Item 1A. Risk Factors

The following discussion of risk factors contains “forward-looking statements,” as discussed in Item 1. “Business”. These risk factors may be important to understanding any statement in this Annual Report on Form 10-K or elsewhere. The following information should be read in conjunction with Part II, Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations” (MD&A), and the consolidated financial statements and related notes in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

Our businesses routinely encounter and address risks, some of which will cause our future results to be different – sometimes materially different – than we presently anticipate. Discussion about important operational risks that our businesses encounter can be found in the business descriptions in Item 1. “Business” and the MD&A section of this Form 10-K Report. Below, we describe certain important strategic, operational, financial, and legal and compliance risks. Our reactions to material future developments as well as our competitors’ reactions to those developments will affect our future results.

Our growth is subject to global economic and political risks.

We operate in virtually every part of the world and serve customers in more than 100 countries. In 2013, approximately 42% of our revenue was attributable to activities outside the United States. Our operations are subject to the effects of global competition and geopolitical risks. They are also affected by local economic environments, including inflation, recession, currency volatility and actual or anticipated default on sovereign debt. Political changes, some of which may be disruptive, can interfere with our supply chain, our customers and all of our activities in a particular location. While some of these global economic and political risks can be hedged using derivatives or other financial instruments and some are insurable, such attempts to mitigate these risks are costly and not always successful, and our ability to engage in such mitigation may decrease or become even more costly as a result of more volatile market conditions.

We are subject to a wide variety of laws, regulations and government policies that may change in significant ways.

Our businesses are subject to regulation under a wide variety of U.S. federal and state and non-U.S. laws, regulations and policies. There can be no assurance that laws, regulations and policies will not be changed in ways that will require us to modify our business models and objectives or affect our returns on investments by restricting existing activities and products, subjecting them to escalating costs or prohibiting them outright. In particular, U.S. and non-U.S. governments are undertaking a substantial revision of the regulation and supervision of bank and non-bank financial institutions, consumer lending, the over-the-counter derivatives market and tax laws and regulations, which changes may have an effect on GE’s and GE Capital’s structure, operations, liquidity, capital requirements, effective tax rate and performance. We are also subject to a number of trade control laws and regulations that may affect our ability to sell our products in global markets. In addition, we are subject to regulatory risks from laws that reduce the allowable lending rate or limit consumer borrowing, local capital requirements that may increase the risk of not being able to retrieve assets, and changes to tax law that may affect our return on investments. For example, GE’s effective tax rate is reduced because active business income earned and indefinitely reinvested outside the United States is taxed at less than the U.S. rate. A significant portion of this reduction depends upon a provision of U.S. tax law that defers the imposition of U.S. tax on certain active financial services income until that income is repatriated to the United States as a dividend. This provision is consistent with international tax norms and permits U.S. financial services companies to compete more effectively with non-U.S. financial institutions in global markets. This provision, which had expired at the end of 2011, was reinstated in January 2013 retroactively for two years through the end of 2013. This provision also had been scheduled to expire and had been extended by Congress on six previous occasions, but there can be no assurance that it will continue to be extended. In the event the provision is not extended after 2013, the current U.S. tax imposed on active financial services income earned outside the United States would increase,

making it more difficult for U.S. financial services companies to compete in global markets. If this provision is not extended, we expect our effective tax rate to increase significantly after 2014. In addition, efforts by public and private sectors to control the growth of healthcare costs may lead to lower reimbursements and increased utilization controls related to the use of GE's products by healthcare providers. Continued government scrutiny, including reviews of the U.S. Food and Drug Administration (U.S. FDA) medical device pre-market authorization and post-market surveillance processes, may impact the requirements for marketing

(10)

GE's products and slow its ability to introduce new products, resulting in an adverse impact on GE's business. Furthermore, we have been, and expect to continue, participating in U.S. and international governmental programs, which require us to comply with strict governmental regulations. Inability to comply with these regulations could adversely affect our status in these projects and adversely affect our results of operations, financial position and cash flows.

Under the Dodd-Frank Wall Street Reform and Consumer Protection Act, we are subject to prudential oversight by the Federal Reserve, including as a result of our designation as a nonbank systemically important financial institution, which subjects us to increased and evolving regulatory requirements.

We are a regulated savings and loan holding company and in 2011 became subject to Federal Reserve Board (FRB) supervision under the Dodd-Frank Wall Street Reform and Consumer Protection Act (DFA). In 2013, the U.S. Financial Stability Oversight Council (FSOC) designated us as a nonbank systemically important financial institution (nonbank SIFI) under the DFA. As a result of this change in supervision and designation, stricter prudential regulatory standards and supervision apply to us. Many of the rulemakings for supervision of nonbank SIFIs are not final and therefore the exact impact and implementation date remain uncertain. These DFA rulemakings will require, among other items, enhanced capital and liquidity levels, compliance with the comprehensive capital analysis and review regulations (CCAR), compliance with counterparty credit exposure limits, and the development of a resolution plan for submission to regulators. The FRB recently finalized regulations to revise and replace its current rules on capital adequacy and to extend capital regulations to savings and loan holding companies like us. We will ultimately also become subject to the Basel III advanced capital rules that will be applicable to institutions with \$250 billion or more in assets. The FRB has also indicated in a proposed rulemaking that it will require nonbank SIFIs to submit annual capital plans for review, including institutions' plans to make capital distributions, such as dividend payments. While we are not yet subject to this regulation, our capital allocation planning remains subject to FRB review as a savings and loan holding company. For additional information, see Liquidity and Borrowings in Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Form 10-K Report.

We are subject to legal proceedings and legal compliance risks.

We are subject to a variety of legal proceedings and legal compliance risks in virtually every part of the world. We, our representatives, and the industries in which we operate are subject to continuing scrutiny by regulators and other governmental authorities, which may, in certain circumstances, lead to enforcement actions, fines and penalties or the assertion of private litigation claims and damages. Additionally, GE and its subsidiaries are involved in a number of remediation actions to clean up hazardous wastes as required by federal and state laws. These include the dredging of polychlorinated biphenyls from a 40-mile stretch of the upper Hudson River in New York State. We are also subject to certain other legal proceedings described in Item 3. "Legal Proceedings" of this Form 10-K Report. While we believe that we have adopted appropriate risk management and compliance programs, the global and diverse nature of our operations means that legal and compliance risks will continue to exist and additional legal proceedings and other contingencies, the outcome of which cannot be predicted with certainty, will arise from time to time.

The success of our business depends on achieving our strategic objectives, including through acquisitions, joint ventures, dispositions and restructurings.

With respect to acquisitions, joint ventures and restructuring actions, we may not achieve expected returns and other benefits as a result of various factors, including integration and collaboration challenges, such as personnel and technology. In addition, we may not achieve anticipated cost savings from restructuring actions, which could result in lower margin rates. We also participate in a number of joint ventures with other companies or government enterprises in various markets around the world, including joint ventures where we may have a lesser degree of control over the business operations, which may expose us to additional operational, financial, legal or compliance risks. We also continue to evaluate the potential disposition of assets and businesses that may no longer help us meet our objectives. When we decide to sell assets or a business, we may encounter difficulty in finding buyers or executing alternative exit strategies on acceptable terms in a timely manner, which could delay the accomplishment of our strategic objectives. For example, delays in obtaining tax rulings and regulatory approvals or clearances, and disruptions or volatility in the capital markets may impact our ability to complete the staged exit from our North American Retail Finance business as planned. Alternatively, we may dispose of a business at a price or on terms that are less than we had anticipated. After reaching an agreement with a buyer or seller for the acquisition or disposition of a business, we are subject to satisfaction of pre-closing conditions as well as to necessary regulatory and governmental approvals on acceptable terms, which may prevent us from completing the transaction. Dispositions may also involve continued financial involvement in the divested business, such as through continuing equity ownership, guarantees, indemnities or other financial obligations. Under these arrangements, performance by the divested businesses or other conditions outside our control could affect our future financial results.

Conditions in the financial and credit markets may affect the availability and cost of funding.

As disclosed in more detail in the Liquidity and Borrowings section in Part II, Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this Form 10-K Report, a large portion of our borrowings is in the form of commercial paper and long-term debt. We continue to rely on the availability of the unsecured debt markets to access funding for term and commercial paper maturities for 2014 and beyond and to fund our operations without incurring additional U.S. tax. In addition, we rely on the availability of the commercial paper markets to refinance maturing commercial paper debt throughout the year. In order to further diversify our funding sources, GE Capital continues to expand its reliance on alternative sources of funding, including bank deposits, securitizations and other asset-based funding. There can be no assurance that we will succeed in increasing the diversification of our funding sources or that the short and long-term credit markets will be available or, if available, that the cost of funding will not substantially increase and affect our overall profitability. Factors that may affect the availability of funding or cause an increase in our funding costs include: a decreased reliance on short-term funding, such as commercial paper, in favor of longer-term funding arrangements; decreased capacity and increased competition among debt issuers; increased competition for deposits in our affiliate banks’ markets; and potential market disruptions or other impacts arising in the United States or Europe from developments in sovereign debt situations. If GE Capital’s cost of funding were to increase, it may adversely affect its competitive position and result in lower net interest margins, earnings and cash flows as well as lower returns on its shareowner’s equity and invested capital.

(12)

A deterioration of conditions in the global economy, the major industries we serve or the financial markets, or the soundness of financial institutions and governments we deal with may adversely affect our business and results of operations.

The business and operating results of GE's industrial businesses have been, and will continue to be, affected by worldwide economic conditions, including conditions in the air and rail transportation, energy generation, healthcare, home building and other major industries it serves. Existing or potential customers may delay or cancel plans to purchase our products and services, including large infrastructure projects, and may not be able to fulfill their obligations to us in a timely fashion as a result of business deterioration, cash flow shortages, and difficulty obtaining financing due to slower global economic growth and other challenges affecting the global economy. In particular, the airline industry is highly cyclical, and the level of demand for air travel is correlated to the strength of the U.S. and international economies. An extended period of slow growth in the U.S. or internationally that results in the loss of business and leisure traffic could have a material adverse effect on our airline customers and the viability of their business. Service contract cancellations or customer dynamics such as early aircraft retirements or reduced energy demand in GE's Power & Water business could affect our ability to fully recover our contract costs and estimated earnings. Further, our vendors may be experiencing similar conditions, which may impact their ability to fulfill their obligations to us. If slower growth in the global economy continues for a significant period or there is significant deterioration in the global economy, our results of operations, financial position and cash flows could be materially adversely affected.

If conditions in the financial markets deteriorate, there can be no assurance that we will be able to recover fully the value of certain assets, including real estate, goodwill, intangibles and tax assets. Deterioration in the economy and in default and recovery rates could require us to increase allowances for loan losses, impairments or write-offs, which, depending on the amount of the increase, could have a material adverse effect on our business, financial position and results of operations.

In addition, GE Capital has exposure to many different industries and counterparties, including sovereign governments, and routinely executes transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks and other institutional clients. Many of these transactions expose GE Capital to credit risk in the event of default of our counterparty or client. In addition, GE Capital's credit risk may be increased when the value of collateral held cannot be realized through sale or is liquidated at prices insufficient to recover the full amount of the loan or derivative exposure due to us. GE Capital also has exposure to these financial institutions in the form of cash on deposit and unsecured debt instruments held in its investment portfolios. GE Capital has policies relating to credit rating requirements and to exposure limits to counterparties (as described in Note 15 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report), which are designed to limit credit and liquidity risk. There can be no assurance, however, that any losses or impairments to the carrying value of financial assets would not materially and adversely affect GE Capital's business, financial position and results of operations.

Failure to maintain our credit ratings could adversely affect our cost of funds and related margins, liquidity, competitive position and access to capital markets.

The major debt rating agencies routinely evaluate our debt. This evaluation is based on a number of factors, which include financial strength as well as transparency with rating agencies and timeliness of financial reporting. As of December 31, 2013, GE and GECC's long-term unsecured debt credit rating from Standard and Poor's Ratings Service (S&P) was AA+ (the second highest of 22 rating categories) with a stable outlook. The long-term unsecured debt credit rating from Moody's Investors Service (Moody's) for GE was Aa3 (the fourth highest of 21 rating categories) and for GECC was A1 (the fifth highest of 21 credit ratings), both with stable outlooks. As of December 31, 2013, GE and GECC's short-term credit rating from S&P was A-1+ (the highest rating category of six categories) and from

Moody's was P-1 (the highest rating category of four categories). There can be no assurance that we will be able to maintain our credit ratings and failure to do so could adversely affect our cost of funds and related margins, liquidity, competitive position and access to capital markets. Various debt and derivative instruments, guarantees and covenants would require posting additional capital or collateral in the event of a ratings downgrade, which, depending on the extent of the downgrade, could have a material adverse effect on our liquidity and capital position.

(13)

Increased cybersecurity requirements, vulnerabilities, threats and more sophisticated and targeted computer crime could pose a risk to our systems, networks, products, solutions, services and data.

Increased global cybersecurity vulnerabilities, threats and more sophisticated and targeted cyber-related attacks pose a risk to the security of our and our customers', suppliers' and third-party service providers' products, systems and networks and the confidentiality, availability and integrity of our data. While we attempt to mitigate these risks by employing a number of measures, including employee training, monitoring and testing, and maintenance of protective systems and contingency plans, we remain potentially vulnerable to additional known or unknown threats. We also may have access to sensitive, confidential or personal data or information in certain of our businesses that is subject to privacy and security laws, regulations and customer-imposed controls. Despite our efforts to protect sensitive, confidential or personal data or information, we may be vulnerable to security breaches, theft, misplaced or lost data, programming errors, employee errors and/or malfeasance that could potentially lead to the compromising of sensitive, confidential or personal data or information, improper use of our systems, software solutions or networks, unauthorized access, use, disclosure, modification or destruction of information, defective products, production downtimes and operational disruptions. In addition, a cyber-related attack could result in other negative consequences, including damage to our reputation or competitiveness, remediation or increased protection costs, litigation or regulatory action.

GE may face operational challenges that could have a material adverse effect on our business, reputation, financial position and results of operations, and we are dependent on maintenance of existing product lines, market acceptance of new product and service introductions and product and service innovations for continued revenue and earnings growth.

GE produces highly sophisticated products and provides specialized services for both GE and third-party products that incorporate or use leading-edge technology, including both hardware and software. While GE has built extensive operational processes to ensure that the design, manufacture and servicing of such products meet the most rigorous quality standards, there can be no assurance that GE or its customers or other third-parties will not experience operational process failures or other problems, including through intentional acts, that could result in potential product, safety, regulatory or environmental risks. Despite the existence of crisis management or business continuity plans, operational failures or quality issues, including as a result of organizational changes, could have a material adverse effect on our business, reputation, financial position and results of operations. In addition, the markets in which we operate are subject to technological change and require skilled talent. Our long-term operating results depend substantially upon our ability to continually develop, introduce, and market new and innovative products and services, to modify existing products and services, to customize products and services, to respond to technological change and to execute our product and service development in line with GE's projected cost estimates.

Our intellectual property portfolio may not prevent competitors from independently developing products and services similar to or duplicative to GE's.

Our patents and other intellectual property may not prevent competitors from independently developing or selling products and services similar to or duplicative of GE's, and there can be no assurance that the resources invested by us to protect our intellectual property will be sufficient or that our intellectual property portfolio will adequately deter misappropriation or improper use of our technology. We could also face competition in some countries where we have not invested in an intellectual property portfolio. GE also faces attempts to gain unauthorized access to our IT systems or products for the purpose of improperly acquiring our trade secrets or confidential business information. The theft or unauthorized use or publication of GE's trade secrets and other confidential business information as a result of such an incident could adversely affect GE's competitive position and the value of its investment in research and development. We may be unable to secure or retain ownership or rights to use data in certain software analytics or services offerings. In addition, we may be the target of aggressive and opportunistic enforcement of patents by third parties,

including non-practicing entities. Regardless of the merit of such claims, responding to infringement claims can be expensive and time-consuming. If GE is found to infringe any third-party rights, GE could be required to pay substantial damages or GE could be enjoined from offering some of its products and services. Also, there can be no assurances that we will be able to obtain or renew from third parties the licenses we need in the future, and there is no assurance that such licenses can be obtained on reasonable terms.

(14)

Item 1B. Unresolved Staff Comments.

Not applicable.

Item 2. Properties.

We conduct our business from various facilities, most of which are leased. The locations of our primary facilities are described in Item 1. "Business" of this Form 10-K Report.

Item 3. Legal Proceedings.

There are 14 lawsuits relating to pending mortgage loan repurchase claims in which WMC, our U.S. mortgage business that we sold in 2007, is a party. The adverse parties in these cases are securitization trustees or parties claiming to act on their behalf. While the alleged claims for relief vary from case to case, the complaints and counterclaims in these actions generally assert claims for breach of contract, indemnification, and/or declaratory judgment, and seek specific performance (repurchase) and/or monetary damages. In the fourth quarter of 2013, WMC entered into settlements that reduce its exposure on claims asserted in certain securitizations. Pending claim and Litigation Claim amounts reported herein reflect the impact of these settlements.

Five WMC cases are pending in the United States District Court for the District of Connecticut. Four of these cases were initiated in 2012, and one was initiated in the third quarter of 2013. Deutsche Bank National Trust Company (Deutsche Bank) is the adverse party in four cases, and Law Debenture Trust Company of New York (Law Debenture) is the adverse party in one case. The Deutsche Bank complaints assert claims on approximately \$2,800 million of mortgage loans and seek to recover damages in excess of approximately \$1,800 million. The Law Debenture complaint asserts claims on approximately \$800 million of mortgage loans, and alleges losses on these loans in excess of approximately \$425 million. GECC was initially named a defendant in each of the Connecticut cases and has been dismissed from all of those cases without prejudice.

Four WMC cases are pending in the United States District Court for the District of Minnesota against US Bank National Association (US Bank), one of which was initiated by WMC seeking declaratory judgment. Three of these cases were filed in 2012, and one was filed in 2011. One additional case filed by WMC in the fourth quarter 2012 was dismissed without prejudice in July 2013, due to a proceeding involving the same securitization in New York State Supreme Court, as described below. WMC voluntarily dismissed without prejudice in January 2014 two other cases in the United States District Court for the District of Minnesota in which WMC had been seeking declaratory judgments. The Minnesota cases still pending involve claims on approximately \$800 million of mortgage loans and do not specify the amount of damages sought. In September 2013, the District Court granted in part and denied in part WMC's motions to dismiss or for summary judgment in these remaining cases, dismissing US Bank's claims for indemnification and for damages based on WMC's alleged refusal to repurchase but holding that WMC could be liable for money damages if US Bank can prove that WMC knew of a breach of representation or warranty in the mortgage loan pool of which the trustee had no knowledge and failed to notify the trustee. The court also held that US Bank may seek to recover money damages against WMC for losses incurred by the trustee arising from loans previously liquidated by the trustee if WMC was grossly negligent regarding notifying the trustee of the presence of defects in the loans.

Three cases are pending against WMC in New York State Supreme Court, all of which were initiated by securitization trustees or securities administrators. These cases involve, in the aggregate, claims involving approximately \$3,600 million of mortgage loans. One of these lawsuits was initiated by Deutsche Bank in the second quarter 2013 and names as defendants WMC and Barclays Bank PLC. It involves claims against WMC on approximately \$1,000 million of mortgage loans and does not specify the amount of damages sought. The second case, in which the plaintiff

is The Bank of New York Mellon (BNY), was initiated in the fourth quarter 2012 and names as defendants WMC, J.P. Morgan Mortgage Acquisition Corporation and JPMorgan Chase Bank, N.A. GECC, which was initially named, is no longer a defendant. This case arises from the same securitization as one of the cases initiated by WMC in Minnesota, noted above. BNY asserts claims on approximately \$1,300 million of mortgage loans, and seeks to recover damages in excess of \$650 million. The third case was initiated by BNY in November 2013 and names as defendants WMC, J.P. Morgan Mortgage Acquisition Corporation and JPMorgan Chase Bank, N.A. In this case, BNY asserts claims on

(15)

approximately \$1,300 million of mortgage loans, and seeks to recover damages in excess of \$600 million. An additional case, initiated in the second quarter 2013 by Seagull Point, LLC (Seagull Point), acting individually and purportedly on behalf of Morgan Stanley ABS Capital I Inc. Trust 2007-HE5, named as defendants WMC, Decision One Mortgage Company, LLC (Decision One), Morgan Stanley Mortgage Capital Inc., Morgan Stanley Mortgage Capital Holdings LLC, Morgan Stanley ABS Capital I Inc., and Morgan Stanley ABS Capital I Inc. Trust 2007-HE5 (as nominal defendant), and sought damages against WMC and Decision One in excess of \$475 million. Seagull Point dismissed the case in January 2014.

Two cases are pending against WMC in the United States District Court for the Southern District of New York. One case, in which the plaintiff is BNY, was filed in the third quarter 2012. In the second quarter 2013, BNY filed an amended complaint in which it asserts claims on approximately \$900 million of mortgage loans, and seeks to recover damages in excess of \$378 million. In September 2013, the District Court issued a ruling from the bench denying WMC's motion to dismiss the trustee's claim for damages and holding that the initial submission of claims on certain mortgage loans was sufficient to provide notice to WMC that the entire pool of loans supporting the securitization was potentially subject to claims for relief by the trustee. One case was initiated by the Federal Housing Finance Agency (FHFA) by filing a summons with notice in the fourth quarter 2012. In the second quarter 2013, Deutsche Bank, in its role as securitization trustee of the trust at issue in the case, intervened as a plaintiff and filed a complaint relating to approximately \$1,300 million of loans and alleging losses in excess of approximately \$100 million. In December 2013, the District Court issued an order denying WMC's motion to dismiss the lawsuit on statute of limitations and other grounds.

The amounts of the mortgage loans at issue in these cases (discussed above) reflect the purchase price or unpaid principal balances of the loans at the time of purchase and do not give effect to pay downs, accrued interest or fees, or potential recoveries based upon the underlying collateral. Of the mortgage loans involved in these lawsuits, approximately \$3,900 million were included in WMC's pending claims at December 31, 2013. The claims relating to other mortgage loans not included in WMC's pending claims consist of sampling-based claims in two cases on approximately \$600 million of mortgage loans and, in ten cases, claims for repurchase or damages based on the alleged failure to provide notice of defective loans, breach of a corporate representation and warranty, and/or non-specific claims for rescissionary damages on approximately \$6,200 million of mortgage loans, as of December 31, 2013. The dismissal of a lawsuit subsequent to December 31, 2013 decreased the pending claims amount by \$123 million and the Litigation Claims amount by \$318 million. See Note 2 to the consolidated financial statements in Part II, Item 8 "Financial Statements and Supplementary Data" of this Form 10-K Report for additional information.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

See Note 11 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report. Our common stock is owned entirely by General Electric Company and, therefore, there is no trading market in such stock.

(16)

Item 6. Selected Financial Data.

The following selected financial data should be read in conjunction with our financial statements and the related Notes to Consolidated Financial Statements.

(Dollars in millions)	2013	2012	2011	2010	2009
Revenues	\$44,067	\$45,364	\$48,324	\$49,163	\$51,065
Earnings from continuing operations attributable to GECC	8,258	7,345	6,480	3,083	1,364
Earnings (loss) from discontinued operations, net of taxes attributable to GECC	(2,054)	(1,130)	30	(928)	51
Net earnings attributable to GECC	6,204	6,215	6,510	2,155	1,415
Net earnings attributable to GECC common shareowner	5,906	6,092	6,510	2,155	1,415
Shareowners' equity	82,694	81,890	77,110	68,984	70,833
Short-term borrowings	77,298	95,940	136,333	118,797	130,754
Non-recourse borrowings of consolidated securitization entities	30,124	30,123	29,258	30,018	3,622
Bank deposits	53,361	46,200	42,848	37,141	33,418
Long-term borrowings	210,279	224,776	234,391	284,407	325,429
Return on average shareowners' equity(a)	9.90 %	9.06 %	9.57 %	5.72 %	2.66 %
Ratio of earnings to fixed charges	1.76	1.63	1.50	1.13	0.83
Ratio of debt to equity at GECC (b)	4.49:1	4.85:1	5.74:1	6.82:1	6.96:1
Financing receivables - net	253,029	268,161	288,106	310,941	315,784
Total assets	\$516,829	\$539,351	\$584,643	\$605,365	\$650,465

(a) Represents earnings from continuing operations before accounting changes divided by average total shareowners' equity, excluding effects of discontinued operations (on an annual basis, calculated using a five-point average). Average total shareowners' equity, excluding effects of discontinued operations, as of the end of each of the years in the five-year period ended December 31, 2013, is described in the Supplemental Information section in Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Form 10-K Report.

(b) Ratios of 3.19:1, 3.66:1, 4.23:1, 5.25:1 and 5.45:1 for 2013, 2012, 2011, 2010 and 2009, respectively, net of cash and equivalents and with classification of hybrid debt as equity. For purposes of these ratios, cash and debt balances have been adjusted to include amounts classified as assets and liabilities of businesses held for sale and discontinued operations.

(17)

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Operations

In the accompanying analysis of financial information, we sometimes use information derived from consolidated financial information but not presented in our financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP). Certain of these data are considered "non-GAAP financial measures" under the U.S. Securities and Exchange Commission (SEC) rules. For such measures, we have provided supplemental explanations and reconciliations in the Supplemental Information section.

We present Management's Discussion of Operations in four parts: Overview of Our Earnings from 2011 through 2013, Global Risk Management, Segment Operations and Geographic Operations. Unless otherwise indicated, we refer to captions such as revenues and earnings from continuing operations attributable to General Electric Capital Corporation (GE Capital or GECC) simply as "revenues" and "earnings" throughout this Management's Discussion and Analysis. Similarly, discussion of other matters in our consolidated financial statements relates to continuing operations unless otherwise indicated.

Overview of Our Earnings from 2011 through 2013

Our earnings increased to \$8.3 billion in 2013 and \$7.3 billion in 2012 as a result of dispositions and higher gains, partially offset by higher impairments and higher provisions for losses on financing receivables. GE Capital reduced its ending net investment (ENI), excluding cash and equivalents, to \$380 billion at December 31, 2013. As a result, we are a diversely funded and smaller, more focused finance company with strong positions in several commercial mid-market and consumer financing segments.

We have communicated our goal of reducing our ENI, most recently targeting ENI of \$300 billion to \$350 billion. ENI is a metric used to measure the total capital invested in the financial services business. To achieve this goal, we are more aggressively focusing our businesses on selective financial services, products where we have deep domain experience, broad distribution, and the ability to earn a consistent return on capital, while managing our overall balance sheet size and risk. We have a strategy of exiting those businesses that are deemed to be non-strategic or that are underperforming. We have completed a number of dispositions in our businesses in the past and will continue to evaluate options going forward.

While we are exiting non-core businesses, we are investing in our core businesses in markets where we believe that GECC has deep domain experience and is competitively advantaged. Accordingly, in the short-term, as we reduce our ENI through exiting non-core businesses, the overall level of our future net earnings may be reduced. However, over the long-term, we believe that this strategy will improve our long-term performance through higher returns as we will have a larger concentration of assets in our core businesses, as opposed to the underperforming or non-strategic assets we will be exiting; reduce liquidity risk as we pay down outstanding debt and diversify our sources of funding (with less reliance on the global commercial paper markets and an increase in alternative sources of funding such as deposits); and reduce capital requirements while strengthening capital ratios.

Commercial Lending and Leasing (CLL) (38% and 29% of total three-year revenues and segment profit, respectively) earnings decreased by \$0.4 billion in 2013, reflecting lower ENI and higher impairments, and decreased by \$0.3 billion in 2012, primarily due to lower ENI. CLL continues to apply its disciplined risk management practices while reducing costs through technology and productivity in order to grow in 2014 and beyond. During 2013, we completed the disposition of our CLL trailer services business in Europe (CLL Trailer Services). During 2011, we completed the

sale of our CLL marine container leasing business, which consists of our controlling interests in the GE SeaCo joint venture along with other owned marine container assets, and our CLL trailer fleet services business in Mexico.

(18)

Consumer (37% and 46% of total three-year revenues and total segment profit, respectively) earnings increased by \$1.1 billion in 2013, primarily due to dispositions primarily related to the sale of 68.5% of our Swiss consumer finance bank, Cembra Money Bank AG (Cembra), through an initial public offering (IPO), partially offset by higher provisions for losses on financing receivables, and decreased by \$0.4 billion in 2012, primarily due to the absence of the 2011 gain on the Garanti Bank transaction and higher provisions for losses on financing receivables. In response to the credit market decline that started in 2008, Consumer continued to reassess strategic alternatives and tighten underwriting, increased focus on collection effectiveness and adjusted reserve levels in response to when it is probable that losses have been incurred in the respective portfolios. Beginning in 2012 and through 2013, we used a more granular portfolio segmentation approach, by loss type, in determining the incurred loss period and projected net write-offs over the next twelve months in our installment and revolving credit portfolios. This resulted in a higher provision for losses on financing receivables, which is reflected in our 2013 and 2012 earnings performance. During 2013, we announced that we intend to pursue an IPO of our North American Retail Finance business (Retail Finance) as a first step in a staged exit from that business. Also, during 2013, we announced the planned sale of our Consumer banking business in Russia (Consumer Russia), we completed the sale of a portion of Cembra and we sold our remaining equity interest in the Bank of Ayudhya (Bay Bank). During 2012, we completed the sale of our Consumer mortgage lending business in Ireland (Consumer Ireland). During 2011, we completed the sale of our U.S. recreational vehicle and marine equipment financing business (Consumer RV Marine), Consumer Mexico, Consumer Singapore, our Consumer home lending operations in Australia and New Zealand (Australian Home Lending) and our Consumer business in Canada. Also, during 2011, we sold a substantial portion of our Garanti Bank equity investment and recorded a pre-tax gain of \$0.7 billion. During 2012, we sold our remaining equity interest in Garanti Bank, which was classified as an available-for-sale security.

Real Estate (9% and 7% of total three-year revenues and total segment profit, respectively) earnings increased by \$0.9 billion and \$1.7 billion in 2013 and 2012, respectively. In response to the real estate and credit market decline that began in 2008, Real Estate re-aligned its business strategy to a longer-term hold model utilizing its operating skills and global asset management resources to maximize existing portfolio value. During 2013, in conjunction with our initiative to increase our overall real estate lending portfolio and reduce our exposure to real estate equity investments, we acquired certain loan portfolios and sold real estate equity investments when economically advantageous for us to do, including the sale of real estate comprising certain floors located at 30 Rockefeller Center, New York. During 2013, commercial real estate markets continued to show signs of improved stability resulting in increased transaction volume; however, the pace of improvement varied significantly by asset class and market. Although there have been indications of some market improvement, there continues to be risk and uncertainty surrounding commercial real estate values in certain markets. Slow economic recovery could result in elevated delinquency levels, provisions for losses on financing receivables and real estate investment impairments. During 2012, we completed the sale of a portion of our Business Properties portfolio (Business Property), including certain commercial loans, the origination and servicing platforms and the servicing rights on loans previously securitized by GECC.

Energy Financial Services (3% and 5% of total three-year revenues and total segment profit, respectively) earnings decreased by an insignificant amount in both 2013 and 2012. Energy Financial Services has over \$16 billion in energy investments, often financed for 20 to 30 year terms, about 15% of its assets are held outside of the U.S.

GE Capital Aviation Services (GECAS) (13% of total three-year revenues and total segment profit, respectively) is a leader in commercial aircraft leasing and finance. In a competitive and challenging environment, this business' earnings decreased by \$0.3 billion in 2013 and increased by \$0.1 billion in 2012. At December 31, 2013, we owned 1,486 commercial aircraft, of which all were on lease, and we held \$30.2 billion (list price) of multiple-year orders for various Boeing, Airbus and other aircraft, including 75 aircraft (\$4.8 billion list price) scheduled for delivery in 2014, all under agreement to commence operations with commercial airline customers.

We integrate acquisitions as quickly as possible. Only revenues and earnings from the date we complete the acquisition through the end of the following fourth quarter are attributed to such businesses. Overall, the effects of acquisitions increased revenues by \$0.1 billion in 2013 and 2012 and \$0.3 billion in 2011. The effects of acquisitions on net earnings were an insignificant amount in 2013 and 2012 and an increase of \$0.1 billion in 2011. Dispositions also affected our ongoing results through lower revenues of an insignificant amount, \$0.6 billion and \$1.1 billion in 2013, 2012 and 2011, respectively. The effects of dispositions on net earnings were an increase of \$1.3 billion in 2013, a decrease of \$0.1 billion in 2012 and an insignificant amount in 2011.

Significant matters relating to our Statement of Earnings are explained below.

Discontinued Operations. In 2013, we sold CLL Trailer Services and announced the planned sale of Consumer Russia. These actions are consistent with our goal of reducing GECC ENI and focusing our businesses on selective financial services products where we have deep domain experience, broad distribution, and the ability to earn a consistent return on capital, while managing our overall balance sheet size and risk. Discontinued operations also includes GE Money Japan (our Japanese personal loan business, Lake, and our Japanese mortgage and card businesses, excluding our investment in GE Nissen Credit Co., Ltd.), our U.S. mortgage business (WMC), Consumer RV Marine, Consumer Mexico, Consumer Singapore, Australian Home Lending and Consumer Ireland.

We reported the operations described above as discontinued operations for all periods presented. For further information about discontinued operations, see the Segment Operations - Discontinued Operations section in this item and Note 2 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Interest on borrowings amounted to \$9.3 billion, \$11.6 billion and \$13.8 billion in 2013, 2012 and 2011, respectively. Average borrowings declined from 2012 to 2013 and from 2011 to 2012, in line with changes in average assets. Interest rates have decreased over the three-year period primarily attributable to declining global benchmark interest rates. Our average borrowings were \$379.5 billion, \$420.0 billion and \$450.5 billion in 2013, 2012 and 2011, respectively. Our average composite effective interest rate was 2.4% in 2013, 2.8% in 2012 and 3.1% in 2011. In 2013, our average assets of \$522.7 billion were 7% lower than in 2012, which in turn were 5% lower than in 2011. See the Liquidity and Borrowings section in this item for a discussion of liquidity, borrowings and interest rate risk management.

Income taxes have a significant effect on our net earnings. As a global commercial enterprise, our tax rates are affected by many factors, including our global mix of earnings, the extent to which those global earnings are indefinitely reinvested outside the United States, legislation, acquisitions, dispositions and tax characteristics of our income. Our tax rates are also affected by tax incentives introduced in the U.S. and other countries to encourage and support certain types of activity. Our tax returns are routinely audited and settlements of issues raised in these audits sometimes affect our tax provisions.

Our effective income tax rate is lower than the U.S. statutory rate primarily because of benefits from lower-taxed global operations, including the use of global funding structures. There is a tax benefit from global operations as non-U.S. income is subject to local country tax rates that are significantly below the 35% U.S. statutory rate. These non-U.S. earnings have been indefinitely reinvested outside the U.S. and are not subject to current U.S. income tax. The rate of tax on our indefinitely reinvested non-U.S. earnings is below the 35% U.S. statutory rate because we have significant business operations subject to tax in countries where the tax on that income is lower than the U.S. statutory rate and because GECC funds the majority of its non-U.S. operations through foreign companies that are subject to low foreign taxes.

We expect our ability to benefit from non-U.S. income taxed at less than the U.S. rate to continue subject to changes in U.S. or foreign law, including the expiration of the U.S. tax law provision deferring tax on active financial services income, as discussed in Note 10 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report. In addition, since this benefit depends on management’s intention to indefinitely reinvest amounts outside the U.S., our tax provision will increase to the extent we no longer indefinitely reinvest foreign earnings.

(20)

Our benefits from lower-taxed global operations were \$3.3 billion, \$1.5 billion and \$1.1 billion in 2013, 2012, and 2011, respectively. The benefit was higher in 2013 as compared to 2012 principally because of the realization of benefits related to the sale of a portion of Cembra, the realization of benefits for prior-year losses, and the resolution of the Internal Revenue Service (IRS) audit of the 2008-2009 for items related to global operations. The benefit was higher in 2012 as compared to 2011, principally because of the realization of benefits for prior-year losses and a decrease in current-year losses for which there was not a full tax benefit. To the extent global interest rates and operating income increase, we would expect tax benefits to increase, subject to management's intention to indefinitely reinvest those earnings.

Our benefit from lower-taxed global operations included the effect of the lower foreign tax rate on our indefinitely reinvested non-U.S. earnings which provided a tax benefit of \$2.1 billion, \$0.9 billion and \$1.3 billion in 2013, 2012 and 2011, respectively. Included in 2013 is the benefit from the indefinite reinvestment of the eligible earnings from the sale of a portion of Cembra. The tax benefit from non-U.S. income taxed at a local country rather than the U.S. statutory tax rate is reported in the effective tax rate reconciliation in the line "Tax on global activities including export" in Note 10 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

GE and GECC file a consolidated U.S. federal income tax return. This enables GE to use GECC tax deductions and credits to reduce the tax that otherwise would have been payable by GE. The GECC effective tax rate for each period reflects the benefit of these tax reductions in the consolidated return. GE makes cash payments to GECC for these tax reductions at the time GE's tax payments are due.

Our effective tax rate was (13.6)% in 2013, compared with 6.6% in 2012. Comparing pre-tax income to a tax benefit resulted in a negative tax rate for 2013. Our tax expense decreased by \$1.5 billion from an expense of \$0.5 billion in 2012 to a benefit of \$1.0 billion in 2013. The lower 2013 tax expense is attributable to increased benefits from low-taxed global operations (\$1.7 billion), including the significant tax benefit related to the sale of a portion of Cembra (\$1.0 billion), and the 2013 tax benefits related to the extension of the U.S. tax provision deferring tax on active financial services income (\$0.3 billion). Also lowering the expense is the benefit from the resolution of the Internal Revenue Service (IRS) audit of the 2008-2009 tax years and items for other years (\$0.1 billion), which is reported partially in the caption "Tax on global activities including exports" and partially in the caption "All other-net" in the effective tax rate reconciliation in Note 10 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report. The items lowering the expense are partially offset by the absence of the 2012 benefit attributable to the high tax basis in the entity sold in the Business Property disposition (\$0.3 billion).

On January 2, 2013, the American Taxpayer Relief Act of 2012 was enacted and the law extended several provisions, including a two-year extension of the U.S. tax provision deferring tax on active financial services income retroactive to January 1, 2012. Under accounting rules, a tax law change is taken into account in calculating the income tax provision in the period enacted. Because the extension was enacted into law 2013, tax expense for 2013 reflected retroactive extension of the previously expired provisions.

Our effective tax rate was 6.6% in 2012, compared with 12.1% in 2011. Our tax expense of \$0.5 billion in 2012 decreased by \$0.4 billion from \$0.9 billion in 2011. The lower 2012 tax expense resulted principally from the benefit attributable to the high-tax basis in the entity sold in the Business Property disposition (\$0.3 billion), increased benefits from low-taxed global operations (\$0.2 billion) and the absence of the 2011 high-taxed disposition of Garanti Bank (\$0.1 billion). Partially offsetting the decrease in tax expense was the absence in 2012 of the 2011 benefit from resolution of the 2006-2007 IRS audit (\$0.2 billion), which is reported in the caption "All other-net" in the effective tax rate reconciliation in Note 10 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report, and from higher pre-tax income of \$0.3 billion that increased the tax

expense (\$0.1 billion).

(21)

Global Risk Management

A disciplined approach to risk is important in a diversified organization like ours in order to ensure that we are executing according to our strategic objectives and that we only accept risk for which we are adequately compensated. We evaluate risk at the individual transaction level, and evaluate aggregated risk at the customer, industry, geographic and collateral-type levels, where appropriate.

Risk assessment and risk management are the responsibility of management and are carried out through risk managers who are operationally integrated into each of our businesses. These risk managers have acquired deep domain expertise through their long careers and proximity to the business' operations and core processes. Both risk managers and the business leadership teams have specific, risk-focused goals and objectives that are aligned with our overall risk framework.

The GE Board of Directors (Board) has oversight for risk management with a focus on the most significant risks facing the company, including strategic, operational, financial and legal and compliance risks. At the end of each year, management and the Board jointly develop a list of major risks that GE plans to prioritize in the next year. Throughout the year, the Board and the committees to which it has delegated responsibility dedicate a portion of their meetings to review and discuss specific risk topics in greater detail. Strategic, operational and reputational risks are presented and discussed in the context of the CEO's report on operations to the Board at regularly scheduled Board meetings and at presentations to the Board and its committees by the vice chairmen, GE and GECC Chief Risk Officers (CROs), general counsel and other employees. The Board has delegated responsibility for the oversight of specific risks to Board committees as follows:

- The GE Risk Committee oversees risks related to GE Capital and jointly meets throughout the year with the GECC Board of Directors (GECC Board), which is in addition to an annual joint meeting of the GE and GECC Boards. The GE Risk Committee also oversees the Company's four to five most critical enterprise risks and how management is mitigating these risks.
- The Audit Committee oversees GE's and GE Capital's policies and processes relating to the financial statements, the financial reporting process, compliance and auditing. The Audit Committee, in coordination with the GE Risk Committee, discusses with management the Company's risk assessment and risk management practices and, when reviewing and approving the annual audit plan for the internal audit functions, prioritizes audit focus areas based on their potential risk to the Company. The GE Audit Committee also monitors ongoing compliance issues and matters, and also semi-annually conducts an assessment of compliance issues and programs. The Audit Committee jointly meets with the GECC Board once a year, which is in addition to an annual joint meeting of the GE Risk Committee and Audit Committee.
- The Management Development and Compensation Committee oversees the risk management associated with management resources, structure, succession planning, management development and selection processes, and includes separate reviews of incentive compensation arrangements at GE and GE Capital to confirm that incentive pay does not encourage unnecessary and excessive risk taking and to review and discuss, at least annually, the relationship between risk management policies and practices, corporate strategy and senior executive compensation. The Management Development and Compensation Committee also incentivizes leaders to improve the Company's competitive position.
- The Governance and Public Affairs Committee oversees risk related to the Company's governance structure and processes and risks arising from related-person transactions, reviews and discusses with management risks related to GE's public policy initiatives and activities, and monitors the Company's environmental, health and safety compliance

and related risks.

(22)

The GE Board's risk oversight process builds upon management's risk assessment and mitigation processes, which include standardized reviews of long-term strategic and operational planning; executive development and evaluation; code of conduct compliance under GE's The Spirit & The Letter; regulatory compliance; health, safety and environmental compliance; financial reporting and controllership; and information technology and security. A vice chairman of GE and GE's CRO are responsible for overseeing and coordinating risk assessment and mitigation on an enterprise-wide basis. They lead the Corporate Risk Function and are responsible for the identification of key business risks, providing for appropriate management of these risks within GE Board guidelines, and enforcement through policies and procedures. In 2013, the Company combined its risk evaluation process with its quarterly operating reviews to simplify the Company's operating rhythm and added a vice chairman position with responsibility for both enterprise risk and operations. The Policy Compliance Review Board is a management-level committee that further assists in assessing and mitigating risk. The Policy Compliance Review Board, which conducted four compliance operating reviews and met seven times in 2013, is chaired by the company's general counsel and includes the Chief Financial Officer and other senior-level functional leaders. It has principal responsibility for monitoring compliance matters across the Company.

GE's Corporate Risk Function leverages the risk infrastructures in each of our businesses, which have adopted an approach that corresponds to the company's overall risk policies, guidelines and review mechanisms. Our risk infrastructure operates at the business and functional levels and is designed to identify, evaluate and mitigate risks within each of the following categories:

- **Strategic.** Strategic risk relates to the company's future business plans and strategies, including the risks associated with the markets and industries in which we operate, demand for our products and services, competitive threats, technology and product innovation, mergers and acquisitions and public policy.
- **Operational.** Operational risk relates to risks (systems, processes, people and external events) that affect the operation of our businesses. It includes product life cycle and execution; product safety and performance; information management and data protection and security, including cyber security; business disruption; human resources; and reputation.
- **Financial.** Financial risk relates to our ability to meet financial obligations and mitigate credit risk, liquidity risk and exposure to broad market risks, including volatility in foreign currency exchange rates and interest rates and commodity prices. Liquidity risk refers to the potential inability to meet contractual or contingent financial obligations (whether on- or off-balance sheet) as they arise, and could potentially impact an institution's financial condition or overall safety and soundness. Credit risk is the risk of financial loss arising from a customer or counterparty failure to meet its contractual obligations. We face credit risk in our industrial businesses, as well as in our GE Capital investing, lending and leasing activities and derivative financial instruments activities.
- **Legal and Compliance.** Legal and compliance risk relates to risks arising from the government and regulatory environment and action, compliance with integrity policies and procedures, including those relating to financial reporting, environmental health and safety, and intellectual property risks. Government and regulatory risk includes the risk that the government or regulatory actions will impose additional cost on us or cause us to have to change our business models or practices.

Risks identified through our risk management processes are prioritized and, depending on the probability and severity of the risk, escalated to the CRO. These risks are discussed and responsibility for them is assigned to the business or functional leader most suited to manage the risk in connection with the quarterly operating reviews. Assigned owners are required to continually monitor, evaluate and report on risks for which they bear responsibility. Enterprise risk leaders within each business and corporate function are responsible to present to the CRO risk assessments and key risks at least annually. We have general response strategies for managing risks, which categorize risks according to

whether the company will avoid, transfer, reduce or accept the risk. These response strategies are tailored to ensure that risks are within acceptable GE Board general guidelines.

(23)

Depending on the nature of the risk involved and the particular business or function affected, we use a wide variety of risk mitigation strategies, including delegation of authorities, standardized processes and strategic planning reviews, operating reviews, insurance, and hedging. As a matter of policy, we generally hedge the risk of fluctuations in foreign currency exchange rates, interest rates and commodity prices. GE's service businesses employ a comprehensive tollgate process leading up to and through the execution of a contractual service agreement to mitigate legal, financial and operational risks. Furthermore, we centrally manage some risks by purchasing insurance, the amount of which is determined by balancing the level of risk retained or assumed with the cost of transferring risk to others. We manage the risk of fluctuations in economic activity and customer demand by monitoring industry dynamics and responding accordingly, including by adjusting capacity, implementing cost reductions and engaging in mergers, acquisitions and dispositions.

GE Capital Risk Management and Oversight

GE Capital acknowledges risk-taking as a fundamental characteristic of providing financial services. It is inherent to its business and arises in lending, leasing and investment transactions undertaken by GE Capital. GE Capital operates within the parameters of its established risk appetite in pursuit of its strategic goals and objectives.

GE Capital continues to enhance its risk infrastructure and processes to manage risks related to its businesses, and the GE Corporate Risk Function relies upon them in fulfilling its mission.

The GE Risk Committee oversees GE Capital's risk appetite, risk assessment and management processes. The GE Risk Committee and the GECC Board oversee the GE Capital risk management framework, with the GECC Board approving all significant acquisitions and dispositions as well as significant borrowings and investments. The GE Risk Committee and the GECC Board exercise oversight of investment activities in the business units through delegations of authority. All participants in the GE Capital risk management process must comply with approval limits established by the GE Risk Committee and the GECC Board.

The Enterprise Risk Management Committee (ERMC), which comprises the most senior leaders in GE Capital as well as the GE CRO, oversees the implementation of GE Capital's risk appetite, and senior management's establishment of appropriate systems (including policies, procedures, and management committees) to ensure enterprise risks are effectively identified, measured, monitored and controlled. The ERMC has delegated management of specific risks to various sub-committees, including the Operational Risk Management Committee, Asset-Liability Committee, Capital Planning Committee and Asset Quality Committee. Day-to-day risk oversight for GE Capital is provided by an independent global risk management organization that includes the GE Capital corporate function in addition to independent risk officers embedded in the individual business units.

GE Capital's risk management approach rests upon three major tenets: a broad spread of risk based on managed exposure limits; senior secured commercial financings; and a hold-to-maturity model with transactions underwritten to "on-book" standards. Dedicated risk professionals across the businesses include underwriters, portfolio managers, collectors, environmental and engineering specialists, and specialized asset managers. The senior risk officers have, on average, over 30 years of experience.

GE Capital manages all risks relevant to its business environment, which, if materialized, could prevent GE Capital from achieving its risk objectives and/or result in losses. These risks are defined as GE Capital's Enterprise Risk Universe, which includes the following risks: strategic, liquidity, credit and investment, market and operational (including financial, compliance, information technology, human resources and legal). Reputational risk is considered and managed across each of the categories. GE Capital continues to make significant investments in resources to enhance its evolving risk management infrastructure.

(24)

GE Capital's Corporate Risk function, in consultation with the ERM, updates the Enterprise Risk Appetite Statement annually. This document articulates the enterprise risk objectives, its key universe of risks and the supporting limit structure. GE Capital's risk appetite is determined relative to its desired risk objectives, including, but not limited to, credit ratings, capital levels, liquidity management, regulatory assessments, earnings, dividends and compliance. GE Capital determines its risk appetite through consideration of portfolio analytics, including stress testing and economic capital measurement, experience and judgment of senior risk officers, current portfolio levels, strategic planning, and regulatory and rating agency expectations.

The Enterprise Risk Appetite Statement is presented to the GECC Board and the GE Risk Committee for review and approval at least annually. On a quarterly basis, the status of GE Capital's performance against these limits is reviewed by the GE Risk Committee.

GE Capital monitors its capital adequacy including through economic capital, regulatory capital and enterprise stress testing methodologies. GE Capital's economic capital methodology uses internal models to estimate potential unexpected losses across different portfolios with a confidence level equivalent to an AA agency rating. Although GE Capital is not currently subject to risk-based capital standards, GE Capital estimates capital adequacy based on the Basel 1 U.S. and Basel 3 International and U.S. frameworks. GE Capital uses stress testing for risk, liquidity and capital adequacy assessment and management purposes, and as an integral part of GE Capital's overall planning processes. Stress testing results inform key strategic portfolio decisions such as the amount of capital required to maintain minimum expected regulatory capital levels in severe but plausible stresses, capital allocation, assist in developing the risk appetite and limits, and help in assessing product specific risk to guide the development and modification of product structures. The GE Risk Committee and the GECC Board review stress test results and their expected impact on capital levels and metrics. The GE Risk Committee and the GECC Board are responsible for overseeing the overall capital adequacy process, as well as approving GE Capital's annual capital plan and capital actions.

Key risk management policies are approved by the GECC Board and the GE Risk Committee at least annually. GE Capital senior management, in coordination with the GE CRO, meets with the GE Risk Committee throughout the year. At these meetings, GE Capital senior management focuses on the risk issues, strategy and governance of the business.

Operational risks are inherent in GE Capital's business activities and are typical of any large enterprise. GE Capital's operational risk management program seeks to effectively manage operational risk to reduce the potential for significant unexpected losses, and to minimize the impact of losses experienced in the normal course of business. Additional information about our liquidity and how we manage this risk can be found in the Financial Resources and Liquidity section. Additional information about our credit risk and our portfolio can be found in the Financial Resources and Liquidity and Critical Accounting Estimates sections. Additional information about our market risk and how we manage this risk can be found in the Financial Resources and Liquidity section.

(25)

Segment Operations

Operating segments comprise our five segments focused on the broad markets they serve: CLL, Consumer, Real Estate, Energy Financial Services and GECAS. The Chairman allocates resources to, and assesses the performance of, these five businesses. In addition to providing information on segments in their entirety, we have also provided supplemental information for the geographic regions within the CLL segment.

Corporate items and eliminations include unallocated Treasury and Tax operations; Trinity, a group of sponsored special purpose entities; certain consolidated liquidating securitization entities; the effects of eliminating transactions between operating segments; results of our run-off insurance operations remaining in continuing operations attributable to GECC; unallocated corporate costs; certain non-allocated amounts determined by the Chairman; and a variety of sundry items. Corporate items and eliminations is not an operating segment. Rather, it is added to operating segment totals to reconcile to consolidated totals on the financial statements.

Segment profit is determined based on internal performance measures used by the Chairman to assess the performance of each business in a given period. In connection with that assessment, the Chairman may exclude matters such as charges for restructuring; rationalization and other similar expenses; acquisition costs and other related charges; technology and product development costs; certain gains and losses from acquisitions or dispositions; and litigation settlements or other charges, responsibility for which preceded the current management team.

Segment profit excludes results reported as discontinued operations, earnings attributable to noncontrolling interests of consolidated subsidiaries GECC preferred stock dividends declared and accounting changes. Segment profit, which we sometimes refer to as “net earnings”, includes interest and income taxes. GE allocates certain corporate costs to its segments based on an estimate of expected benefit to the respective segment relative to total GE. Factors considered in the determination of relative benefit include a segment’s direct costs and number of employees compared to the total direct costs and number of employees for all segments.

We have reclassified certain prior-period amounts to conform to the current-period presentation. For additional information about our segments, see Part I, Item 1. “Business” and Note 19 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

Summary of Operating Segments

(In millions)	2013	2012	2011
Revenues			
CLL	\$ 14,316	\$ 16,458	\$ 17,714
Consumer	15,741	15,303	16,487
Real Estate	3,915	3,654	3,712
Energy Financial Services	1,526	1,508	1,223
GECAS	5,346	5,294	5,262
Total segment revenues	40,844	42,217	44,398
GECC corporate items and eliminations	3,223	3,147	3,926
Total revenues	\$ 44,067	\$ 45,364	\$ 48,324
Segment profit (loss)			
CLL	\$ 1,965	\$ 2,401	\$ 2,703
Consumer	4,319	3,207	3,616
Real Estate	1,717	803	(928)
Energy Financial Services	410	432	440
GECAS	896	1,220	1,150
Total segment profit	9,307	8,063	6,981
GECC corporate items and eliminations(a)(b)	(1,049)	(718)	(501)
Earnings from continuing operations attributable to GECC	8,258	7,345	6,480
Earnings (loss) from discontinued operations, net of taxes, attributable to GECC	(2,054)	(1,130)	30
Net earnings attributable to GECC	\$ 6,204	\$ 6,215	\$ 6,510

(a) Included restructuring, rationalization and other charges for 2013, 2012 and 2011 of \$0.2 billion, \$0.1 billion and \$0.1 billion, respectively, primarily related to CLL business exits.

(b) Included \$0.1 billion of net losses for 2013, and \$0.2 billion of net losses for both 2012 and 2011, related to our treasury operations.

See accompanying notes to consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

(27)

CLL

(In millions)	2013	2012	2011
Revenues	\$ 14,316	\$ 16,458	\$ 17,714
Segment profit	\$ 1,965	\$ 2,401	\$ 2,703

December 31 (In millions)	2013	2012
Total assets	\$ 174,357	\$ 181,375

(In millions)	2013	2012	2011
Revenues			
Americas	\$ 9,340	\$ 10,666	\$ 10,621
Europe	3,127	3,301	3,856
Asia	1,799	2,095	2,281
Other	50	396	956

Segment profit (loss)			
Americas	\$ 1,577	\$ 2,069	\$ 2,118
Europe	327	223	393
Asia	217	170	234
Other	(156)	(61)	(42)

December 31 (In millions)	2013	2012
Total assets		
Americas	\$ 103,697	\$ 108,895
Europe	50,391	48,137
Asia	14,166	16,831
Other	6,103	7,512

CLL 2013 revenues decreased 13% and net earnings decreased 18% compared with 2012. Revenues for 2013 were reduced by \$0.1 billion as a result of dispositions. Revenues in 2013 also decreased as a result of organic revenue declines (\$1.2 billion), primarily due to lower ENI (\$0.8 billion), and higher impairments (\$0.7 billion). Net earnings decreased reflecting higher impairments (\$0.6 billion), partially offset by dispositions (\$0.1 billion).

CLL 2012 revenues decreased 7% and net earnings decreased 11% compared with 2011. Revenues for 2012 were reduced by \$0.4 billion as a result of dispositions. Revenues in 2012 also decreased as a result of organic revenue declines (\$0.6 billion), primarily due to lower ENI (\$0.5 billion), and the stronger U.S. dollar (\$0.2 billion). Net earnings decreased reflecting core decreases (\$0.2 billion) and dispositions (\$0.1 billion).

Consumer

(In millions)	2013	2012	2011
Revenues	\$ 15,741	\$ 15,303	\$ 16,487
Segment profit	\$ 4,319	\$ 3,207	\$ 3,616
December 31 (In millions)	2013	2012	
Total assets	\$ 132,236	\$ 138,002	

Consumer 2013 revenues increased 3% and net earnings increased 35% compared with 2012. Revenues for 2013 included \$0.1 billion from acquisitions and \$0.3 billion as a result of dispositions. Revenues in 2013 also increased as a result of higher gains (\$0.5 billion), partially offset by organic revenue declines (\$0.4 billion). The increase in net earnings resulted primarily from the sale of a portion of Cembra (\$1.2 billion), higher gains (\$0.3 billion) related to the sale of Bay Bank and core increases (\$0.1 billion). These increases were partially offset by higher provisions for losses on financing receivables (\$0.5 billion) reflecting the use of a more granular portfolio segmentation approach, by loss type, in determining the incurred loss period and projected net write-offs over the next 12 months in our installment and revolving credit portfolios.

Consumer 2012 revenues decreased 7% and net earnings decreased 11% compared with 2011. Revenues for 2012 included \$0.1 billion from acquisitions and were reduced by \$0.1 billion as a result of dispositions. Revenues in 2012 also decreased as a result of the absence of the 2011 gain on the Garanti Bank transaction (\$0.7 billion), the stronger U.S. dollar (\$0.4 billion) and organic revenue declines (\$0.2 billion). The decrease in net earnings resulted primarily from the absence of the 2011 gain on the Garanti Bank transaction and operations (\$0.4 billion), higher provisions for losses on financing receivables (\$0.1 billion) and dispositions (\$0.1 billion), partially offset by core increases (\$0.2 billion). The higher provisions for losses on financing receivables reflected the use of a more granular portfolio segmentation approach, by loss type, in determining the incurred loss period in our U.S. Installment and Revolving Credit portfolio.

Real Estate

(In millions)	2013	2012	2011
Revenues	\$ 3,915	\$ 3,654	\$ 3,712
Segment profit (loss)	\$ 1,717	\$ 803	\$ (928)
December 31 (In millions)	2013	2012	
Total assets	\$ 38,744	\$ 46,247	

Real Estate 2013 revenues increased 7% and net earnings were favorable compared with 2012. Revenues in 2013 increased primarily as a result of increases in net gains on property sales (\$1.1 billion) mainly due to the sale of real estate comprising certain floors located at 30 Rockefeller Center, New York, partially offset by organic revenue declines (\$0.7 billion), primarily due to lower ENI (\$0.6 billion). Real Estate net earnings increased as a result of core increases (\$0.9 billion) including increases in net gains on property sales (\$0.7 billion) and higher tax benefits (\$0.3 billion). Depreciation expense on real estate equity investments totaled \$0.6 billion and \$0.8 billion in 2013 and 2012, respectively.

Real Estate 2012 revenues decreased 2% and net earnings were favorable compared with 2011. Revenues in 2012 decreased as a result of organic revenue declines (\$0.2 billion), primarily due to lower ENI, and the stronger U.S. dollar (\$0.1 billion), partially offset by increases in net gains on property sales (\$0.2 billion). Real Estate net earnings increased as a result of lower impairments (\$0.7 billion), core increases (\$0.7 billion) including higher tax benefits of \$0.5 billion, lower provisions for losses on financing receivables (\$0.2 billion) and increases in net gains on property sales (\$0.1 billion). Depreciation expense on real estate equity investments totaled \$0.8 billion and \$0.9 billion in 2012 and 2011, respectively.

(29)

Energy Financial Services

(In millions)	2013	2012	2011
Revenues	\$ 1,526	\$ 1,508	\$ 1,223
Segment profit	\$ 410	\$ 432	\$ 440
December 31 (In millions)	2013	2012	
Total assets	\$ 16,203	\$ 19,185	

Energy Financial Services 2013 revenues increased 1% and net earnings decreased 5% compared with 2012. Revenues in 2013 increased as a result of dispositions (\$0.1 billion) and organic revenue growth (\$0.1 billion), partially offset by lower gains (\$0.1 billion) and higher impairments. The decrease in net earnings resulted primarily from lower gains (\$0.1 billion), partially offset by core increases and dispositions.

Energy Financial Services 2012 revenues increased 23% and net earnings decreased 2% compared with 2011. Revenues in 2012 increased primarily as a result of organic revenue growth (\$0.3 billion), including the consolidation of an entity involved in power generating activities and asset sales by investees, and higher gains.

GECAS

(In millions)	2013	2012	2011
Revenues	\$ 5,346	\$ 5,294	\$ 5,262
Segment profit	\$ 896	\$ 1,220	\$ 1,150
December 31 (In millions)	2013	2012	
Total assets	\$ 45,876	\$ 49,420	

GECAS 2013 revenues increased 1% and net earnings decreased 27% compared with 2012. Revenues in 2013 increased as a result of lower finance lease impairments and higher gains. The decrease in net earnings resulted primarily from higher equipment leased to others (ELTO) impairments (\$0.3 billion) related to our operating lease portfolio of commercial aircraft, and core decreases, partially offset by higher gains.

GECAS 2012 revenues increased 1% and net earnings increased 6% compared with 2011. Revenues in 2012 increased as a result of organic revenue growth (\$0.2 billion) and higher gains, partially offset by higher impairments (\$0.2 billion). The increase in net earnings resulted primarily from core increases (\$0.1 billion) and higher gains, partially offset by higher impairments (\$0.1 billion).

Corporate Items and Eliminations

Corporate items and eliminations included \$0.1 billion and \$0.2 billion of Treasury operation expenses for 2013 and 2012, respectively. These Treasury results were primarily related to derivative activities that reduce or eliminate interest rate, currency or market risk between financial assets and liabilities.

Corporate items and eliminations included \$0.1 billion of net unallocated tax expenses for 2013. Corporate items and eliminations included \$0.2 billion of net unallocated tax benefits for 2012, primarily attributable to the high tax basis in the entity being sold in the 2012 Business Property disposition.

Certain amounts included in corporate items and eliminations are not allocated to the five operating businesses because they are excluded from the measurement of their operating performance for internal purposes. Unallocated costs included \$0.2 billion and \$0.1 billion for 2013 and 2012, respectively, primarily related to restructuring, rationalization and other charges.

(30)

Discontinued Operations

(In millions)	2013	2012	2011
Earnings (loss) from discontinued operations, net of taxes	\$(2,054)	\$(1,130)	\$30

Discontinued operations primarily comprised GE Money Japan, WMC, Consumer RV Marine, Consumer Mexico, Consumer Singapore, Australian Home Lending, Consumer Ireland, CLL Trailer Services and Consumer Russia. Associated results of operations, financial position and cash flows are separately reported as discontinued operations for all periods presented.

In 2013, loss from discontinued operations, net of taxes, reflected a \$1.6 billion after-tax effect of incremental reserves, primarily related to an agreement to extinguish our loss-sharing arrangement for excess interest claims associated with the 2008 sale of GE Money Japan, a \$0.2 billion after-tax effect of incremental reserves related to retained representation and warranty obligations to repurchase previously sold loans on the 2007 sale of WMC and a \$0.2 billion after-tax loss on the planned disposal of Consumer Russia.

In 2012, loss from discontinued operations, net of taxes, primarily reflected a \$0.6 billion after-tax effect of incremental reserves for excess interest claims related to our loss-sharing arrangement on the 2008 sale of GE Money Japan, a \$0.3 billion after-tax effect of incremental reserves related to retained representation and warranty obligations to repurchase previously sold loans on the 2007 sale of WMC and a \$0.2 billion loss (including a \$0.1 billion loss on disposal) related to Consumer Ireland.

In 2011, earnings from discontinued operations, net of taxes, included a \$0.3 billion gain on disposal related to the sale of Consumer Singapore and \$0.1 billion earnings from operations at Consumer Russia, partially offset by a \$0.2 billion after-tax effect of incremental reserves for excess interest claims related to our loss-sharing arrangement on the 2008 sale of GE Money Japan and a \$0.2 billion loss from operations at Consumer Ireland.

For additional information related to discontinued operations, see Note 2 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Geographic Operations

Our global activities span all geographic regions and primarily encompass leasing of aircraft and provision of financial services within these regional economies. Thus, when countries or regions experience currency and/or economic stress, we often have increased exposure to certain risks, but also often have new opportunities that include, among other things, more opportunities for expansion of our activities through purchases of companies or assets at reduced prices and lower U.S. debt financing costs.

Revenues are classified according to the region to which products and services are sold. For purposes of this analysis, the U.S. is presented separately from the remainder of the Americas. We classify certain assets that cannot meaningfully be associated with specific geographic areas as "Other Global" for this purpose.

Geographic Revenues

(In billions)	2013	2012	2011
U.S.	\$25.7	\$26.4	\$26.0
Europe	8.8	9.1	10.7
Pacific Basin	6.1	6.3	6.5
Americas	2.7	2.8	3.6
Middle East and Africa	0.8	0.8	1.5
Total	\$44.1	\$45.4	\$48.3

Non U.S. revenues decreased 3% to \$18.4 billion in 2013, compared with \$19.0 billion and \$22.3 billion in 2012 and 2011, respectively, primarily as a result of decreases in Europe. Non-U.S. revenues as a percentage of total revenues were 42% in 2013 and 2012, compared with 46% in 2011. Non-U.S. revenues decreased by 15% in 2012 from \$22.3 billion in 2011, primarily as a result of decreases in Europe. The effects of currency fluctuations on reported results decreased revenues by \$0.2 billion in 2013, primarily driven by the Japanese yen (\$0.2 billion). The effects of currency fluctuations on reported results decreased revenues by \$0.7 billion in 2012, primarily driven by the euro (\$0.3 billion), Polish zloty (\$0.1 billion), Hungarian forint (\$0.1 billion) and Czech koruna (\$0.1 billion). The effects of currency fluctuations on reported results increased revenues by \$1.0 billion in 2011, primarily driven by the Australian dollar (\$0.3 billion), euro (\$0.2 billion), Japanese yen (\$0.1 billion), Canadian dollar (\$0.1 billion) and British pound (\$0.1 billion).

The effects of foreign currency fluctuations on earnings were minimal, with no single currency having a significant impact.

Total Assets (continuing operations)

December 31 (In billions)	2013	2012
U.S.	\$260.3	\$270.9
Europe	142.5	140.7
Pacific Basin	42.2	48.4
Americas	24.0	27.0
Other Global	45.5	49.0
Total	\$514.5	\$536.0

Total assets of non-U.S. operations on a continuing basis of \$254.2 billion in 2013 decreased \$10.9 billion from 2012. This decrease reflected declines in Pacific Basin, Americas and Other Global, primarily due to the strengthening of the U.S. dollar against the Japanese yen and dispositions at various businesses.

Financial results of our non-U.S. activities reported in U.S. dollars are affected by currency exchange. We use a number of techniques to manage the effects of currency exchange, including selective borrowings in local currencies and selective hedging of significant cross-currency transactions. Such principal currencies are the pound sterling, the euro, the Japanese yen, the Swiss franc and the Australian dollar.

Financial Resources and Liquidity

This discussion of financial resources and liquidity addresses the Statement of Financial Position; Liquidity and Borrowings; Debt and Derivative Instruments, Guarantees and Covenants; Statements of Changes in Shareowners' Equity and Comprehensive Income; Statement of Cash Flows – Overview from 2011 through 2013; Contractual Obligations; and Variable Interest Entities (VIEs).

Overview of Financial Position

Major changes to our shareowners' equity are discussed in the Shareowners' Equity and Comprehensive Income section. In addition, other significant changes to balances in our Statement of Financial Position follow.

(32)

Statement of Financial Position

Investment securities comprise mainly investment-grade debt securities supporting obligations to annuitants and policyholders in our run-off insurance operations and supporting obligations to holders of guaranteed investment contracts (GICs) in Trinity, and investments held in our CLL business collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries. The fair value of investment securities decreased to \$43.7 billion at December 31, 2013 from \$48.4 billion at December 31, 2012, primarily due to the sale of U.S. government and federal agency securities at our treasury operations and the impact of higher interest rates. At December 31, 2013, we held debt securities with an estimated fair value of \$43.3 billion, which included corporate debt securities, asset-backed securities (ABS), commercial mortgage-backed securities (CMBS) and residential mortgage-backed securities (RMBS) with estimated fair values of \$23.5 billion, \$7.4 billion, \$3.0 billion and \$1.9 billion, respectively. Net unrealized gains on debt securities were \$2.5 billion and \$4.8 billion at December 31, 2013 and 2012, respectively. This amount included unrealized losses on corporate debt securities, state and municipal securities and CMBS of \$0.3 billion, \$0.2 billion and \$0.1 billion, respectively, at December 31, 2013, as compared with \$0.4 billion, \$0.1 billion and \$0.1 billion, respectively, at December 31, 2012.

We regularly review investment securities for impairment using both qualitative and quantitative criteria. For debt securities, our qualitative review considers our intent to sell the security and the financial health of and specific prospects for the issuer, including whether the issuer is in compliance with the terms and covenants of the security. Our quantitative review considers whether there has been an adverse change in expected future cash flows. Unrealized losses are not indicative of the amount of credit loss that would be recognized. We presently do not intend to sell the vast majority of our debt securities that are in an unrealized loss position and believe that it is not more likely than not that we will be required to sell the vast majority of these securities before recovery of our amortized cost. For equity securities, we consider the length of time and magnitude of the amount that each security is in an unrealized loss position. We believe that the unrealized loss associated with our equity securities will be recovered within the foreseeable future. Uncertainty in the capital markets may cause increased levels of other-than-temporary impairments. For additional information relating to how credit losses are calculated, see Note 3 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Our RMBS portfolio is collateralized primarily by pools of individual, direct mortgage loans (a majority of which were originated in 2006 and 2005), not other structured products such as collateralized debt obligations. The vast majority of our RMBS are in a senior position in the capital structure of the deals and more than 70% are agency bonds or insured by Monoline insurers (Monolines) (on which we continue to place reliance). Of our total RMBS portfolio at December 31, 2013 and 2012, approximately \$0.4 billion and \$0.5 billion, respectively, relates to residential subprime credit, primarily supporting our guaranteed investment contracts. A majority of this exposure is related to investment securities backed by mortgage loans originated in 2006 and 2005. Substantially all of the subprime RMBS were investment grade at the time of purchase and approximately 70% have been subsequently downgraded to below investment grade.

Our CMBS portfolio is collateralized by both diversified pools of mortgages that were originated for securitization (conduit CMBS) and pools of large loans backed by high-quality properties (large loan CMBS), the majority of which were originated in 2007 and 2006. The vast majority of the securities in our CMBS portfolio have investment-grade credit ratings and the vast majority of the securities are in a senior position in the capital structure of the deals.

Our ABS portfolio is collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries, as well as a variety of diversified pools of assets such as student loans and credit cards. The vast majority of the securities in our ABS portfolio are in a senior position in the capital structure of the deals. In addition, substantially all of the securities that are below investment grade are in an unrealized gain position.

If there has been an adverse change in cash flows for RMBS, management considers credit enhancements such as Monoline insurance (which are features of a specific security). In evaluating the overall creditworthiness of the Monoline, we use an analysis that is similar to the approach we use for corporate bonds, including an evaluation of the sufficiency of the Monoline's cash reserves and capital, ratings activity, whether the Monoline is in default or default appears imminent, and the potential for intervention by an insurance or other regulator.

(33)

Monolines provide credit enhancement for certain of our investment securities, primarily RMBS and municipal securities. The credit enhancement is a feature of each specific security that guarantees the payment of all contractual cash flows, and is not purchased separately by GE. The Monoline industry continues to experience financial stress from increasing delinquencies and defaults on the individual loans underlying insured securities. We continue to rely on Monolines with adequate capital and claims paying resources. We have reduced our reliance on Monolines that do not have adequate capital or have experienced regulator intervention. At December 31, 2013, our investment securities insured by Monolines on which we continue to place reliance were \$1.0 billion, including \$0.3 billion of our \$0.4 billion investment in subprime RMBS. At December 31, 2013, the unrealized loss associated with securities subject to Monoline credit enhancement, for which there is an expected credit loss, was \$0.1 billion.

Total pre-tax, other-than-temporary impairment losses during 2013 were \$0.8 billion, of which \$0.7 billion was recognized in earnings and primarily relates to credit losses on corporate debt securities and other-than-temporary losses on equity securities and an insignificant amount primarily relates to non-credit-related losses on RMBS and is included within accumulated other comprehensive income (AOCI).

Total pre-tax, other-than-temporary impairment losses during 2012 were \$0.2 billion, of which \$0.1 billion was recognized in earnings and primarily relates to credit losses on non-U.S. corporate, U.S. corporate and RMBS securities and other-than-temporary losses on equity securities and \$0.1 billion primarily relates to non-credit-related losses on RMBS and is included within AOCI.

At December 31, 2013 and 2012, unrealized losses on investment securities totaled \$0.7 billion and \$0.8 billion, respectively, including \$0.4 billion and \$0.8 billion, respectively, aged 12 months or longer. Of the amount aged 12 months or longer at December 31, 2013, more than 70% are debt securities that were considered to be investment grade by the major rating agencies. In addition, of the amount aged 12 months or longer, \$0.1 billion and \$0.2 billion related to structured securities (mortgage-backed and asset-backed) and corporate debt securities, respectively. With respect to our investment securities that are in an unrealized loss position, aged 12 months or longer at December 31, 2013, the majority relate to debt securities held to support obligations to holders of GICs. We presently do not intend to sell the vast majority of our debt securities that are in an unrealized loss position and believe that it is not more likely than not that we will be required to sell these securities before recovery of our amortized cost. For additional information, see Note 3 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Fair value measurements. For financial assets and liabilities measured at fair value on a recurring basis, fair value is the price we would receive to sell an asset or pay to transfer a liability in an orderly transaction with a market participant at the measurement date. In the absence of active markets for the identical assets or liabilities, such measurements involve developing assumptions based on market observable data and, in the absence of such data, internal information that is consistent with what market participants would use in a hypothetical transaction that occurs at the measurement date. Additional information about our application of this guidance is provided in Notes 1 and 14 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report. At December 31, 2013, the aggregate amount of investments that are measured at fair value through earnings totaled \$3.0 billion and consisted primarily of various assets held for sale in the ordinary course of business, as well as equity investments.

Financing receivables is our largest category of assets and represents one of our primary sources of revenues. Our portfolio of financing receivables is diverse and not directly comparable to major U.S. banks. A discussion of the quality of certain elements of the financing receivables portfolio follows.

Our consumer portfolio is composed primarily of non-U.S. mortgage, sales finance, auto and personal loans in various European and Asian countries and U.S. consumer credit card and sales finance receivables. In 2007, we exited the U.S. mortgage business and we have no U.S. auto or student loans.

Our commercial portfolio primarily comprises senior secured positions with comparatively low loss history. The secured receivables in this portfolio are collateralized by a variety of asset classes, which for our CLL business primarily include: industrial-related facilities and equipment, vehicles, corporate aircraft, and equipment used in many industries, including the construction, manufacturing, transportation, media, communications, entertainment, and healthcare industries. The portfolios in our Real Estate, GECAS and Energy Financial Services businesses are collateralized by commercial real estate, commercial aircraft and operating assets in the global energy and water industries, respectively. We are in a secured position for substantially all of our commercial portfolio.

Losses on financing receivables are recognized when they are incurred, which requires us to make our best estimate of probable losses inherent in the portfolio. The method for calculating the best estimate of losses depends on the size, type and risk characteristics of the related financing receivable. Such an estimate requires consideration of historical loss experience, adjusted for current conditions, and judgments about the probable effects of relevant observable data, including present economic conditions such as delinquency rates, financial health of specific customers and market sectors, collateral values (including housing price indices as applicable), and the present and expected future levels of interest rates. The underlying assumptions, estimates and assessments we use to provide for losses are updated periodically to reflect our view of current conditions and are subject to the regulatory examinations process, which can result in changes to our assumptions. Changes in such estimates can significantly affect the allowance and provision for losses. It is possible to experience credit losses that are different from our current estimates.

Our risk management process includes standards and policies for reviewing major risk exposures and concentrations, and evaluates relevant data either for individual loans or financing leases, or on a portfolio basis, as appropriate.

Loans acquired in a business acquisition are recorded at fair value, which incorporates our estimate at the acquisition date of the credit losses over the remaining life of the portfolio. As a result, the allowance for losses is not carried over at acquisition. This may have the effect of causing lower reserve coverage ratios for those portfolios.

For purposes of the discussion that follows, “delinquent” receivables are those that are 30 days or more past due based on their contractual terms, and “nonearning” receivables are those that are 90 days or more past due (or for which collection is otherwise doubtful). Nonearning receivables exclude loans purchased at a discount (unless they have deteriorated post acquisition). These loans are initially recorded at fair value and accrete interest income over the estimated life of the loan based on reasonably estimable cash flows even if the underlying loans are contractually delinquent at acquisition. In addition, nonearning receivables exclude loans that are paying on a cash accounting basis but are classified as nonaccrual and impaired. “Nonaccrual” financing receivables include all nonearning receivables and are those on which we have stopped accruing interest. We stop accruing interest at the earlier of the time at which collection of an account becomes doubtful or the account becomes 90 days past due, with the exception of consumer credit card accounts, on which we accrue interest until the account becomes 180 days past due, as discussed below. Recently restructured financing receivables are not considered delinquent when payments are brought current according to the restructured terms, but may remain classified as nonaccrual until there has been a period of satisfactory payment performance by the borrower and future payments are reasonably assured of collection.

Beginning in the fourth quarter of 2013, we revised our methods for classifying financing receivables as nonaccrual and nonearning to more closely align with regulatory guidance. Under the revised methods, we continue to accrue interest on consumer credit cards until the accounts are written off in the period the account becomes 180 days past due. Previously, we stopped accruing interest on consumer credit cards when the account became 90 days past due. In addition, the revised methods limit the use of the cash basis of accounting for nonaccrual financing receivables.

As a result of these revisions, consumer credit card receivables of \$1.1 billion that were previously classified as both nonaccrual and nonearning were returned to accrual status in the fourth quarter of 2013. In addition, \$1.5 billion of Real Estate and CLL financing receivables previously classified as nonaccrual, paying in accordance with contractual terms and accounted for on the cash basis, were returned to accrual status, while \$2.2 billion of financing receivables previously classified as nonaccrual and accounted for on the cash basis (primarily in Real Estate and CLL) were placed into the nonearning category based on our assessment of the short-term outlook for resolution through payoff or refinance. These changes had an insignificant effect on earnings.

Given that the revised methods result in nonaccrual and nonearning amounts that are substantially the same, we plan to discontinue the reporting of nonearning financing receivables, one of our internal performance metrics, and report selected ratios related to nonaccrual financing receivables in the first quarter of 2014.

Further information on the determination of the allowance for losses on financing receivables and the credit quality and categorization of our financing receivables is provided in the Critical Accounting Estimates section in this Item and Notes 1 and 4 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

(a) During 2013, we transferred our European equipment services portfolio from CLL Other to CLL Europe. Prior-period amounts were reclassified to conform to the current period presentation.

(b) Included financing receivables of \$12,025 million and \$12,221 million, nonearning receivables of \$751 million and \$1,036 million and allowance for losses of \$139 million and \$142 million at December 31, 2013 and 2012,

respectively, primarily related to loans, net of credit insurance, whose terms permitted interest-only payments and high loan-to-value ratios at inception (greater than 90%). At origination, we underwrite loans with an adjustable rate to the reset value. Of these loans, about 85% are in our U.K. and France portfolios, which comprise mainly loans with interest-only payments, high loan-to-value ratios at inception and introductory below market rates, have a delinquency rate of 14%, have a loan-to-value ratio at origination of 82% and have re-indexed loan-to-value ratios of 84% and 64%, respectively. Re-indexed loan-to-value ratios may not reflect actual realizable values of future repossessions. At December 31, 2013, 11% (based on dollar values) of these loans in our U.K. and France portfolios have been restructured.

(37)

The portfolio of financing receivables, before allowance for losses, was \$258.2 billion at December 31, 2013, and \$273.1 billion at December 31, 2012. Financing receivables, before allowance for losses, decreased \$14.9 billion from December 31, 2012, primarily as a result of dispositions (\$6.5 billion), write-offs (\$5.9 billion), collections (which includes sales) exceeding originations (\$3.6 billion) and the stronger U.S. dollar (\$1.7 billion).

Related nonearning receivables totaled \$7.2 billion (2.8% of outstanding receivables) at December 31, 2013, compared with \$7.5 billion (2.8% of outstanding receivables) at December 31, 2012. Nonearning receivables decreased from December 31, 2012, primarily due to collections and write-offs at CLL and the placing of consumer credit card accounts on accrual status, partially offset by nonearning receivables previously classified as cash basis resulting from a revision to our nonaccrual and nonearning methods to more closely align with regulatory guidance in the fourth quarter of 2013.

The allowance for losses at December 31, 2013 totaled \$5.2 billion compared with \$4.9 billion at December 31, 2012, representing our best estimate of probable losses inherent in the portfolio. Allowance for losses increased \$0.2 billion from December 31, 2012, primarily because provisions were higher than write-offs, net of recoveries by \$0.4 billion, which is attributable to an increase in provision in our Consumer installment and revolving portfolios. The allowance for losses as a percent of total financing receivables increased from 1.8% at December 31, 2012 to 2.0% at December 31, 2013 primarily due to an increase in the allowance for losses and a decline in the overall financing receivables balance as discussed above. Further information surrounding the allowance for losses related to each of our portfolios is detailed below.

(38)

The following table provides information surrounding selected ratios related to nonearning financing receivables and the allowance for losses.

December 31	Nonearning financing receivables as a percent of financing receivables at		Allowance for losses as a percent of nonearning financing receivables at		Allowance for losses as a percent of total financing receivables at

(a)

Included nonearning financing receivables as a percent of financing receivables of 6.2% and 8.5%, allowance for losses as a percent of nonearning receivables of 18.5% and 13.7% and allowance for losses as a percent of total financing receivables of 1.2% and 1.2% at December 31, 2013 and December 31, 2012, respectively, primarily related to loans, net of credit insurance, whose terms permitted interest-only payments and high loan-to-value ratios at inception (greater than 90%). Compared to the overall Non-U.S. residential mortgage loan portfolio, the ratio of allowance for losses as a percent of nonearning financing receivables for these loans is lower, driven primarily by the higher mix of such products in the U.K. and France portfolios and as a result of the better performance and collateral realization experience in these markets.

(b) Not meaningful.

(39)

Included below is a discussion of financing receivables, allowance for losses, nonearning receivables and related metrics for each of our significant portfolios.

CLL – Americas. Nonearning receivables of \$1.2 billion represented 17.2% of total nonearning receivables at December 31, 2013. The ratio of allowance for losses as a percent of nonearning receivables increased from 36.8% at December 31, 2012, to 38.1% at December 31, 2013, reflecting a decrease in nonearning receivables. The ratio of nonearning receivables as a percent of financing receivables remained constant at 1.8% at December 31, 2013 primarily due to decreased nonearning exposures in our industrial and consumer-facing portfolios, partially offset by our materials, media and Latin America portfolios. Collateral supporting these nonearning financing receivables primarily includes assets in the restaurant and hospitality, trucking and industrial equipment industries and corporate aircraft, and for our leveraged finance business, equity of the underlying businesses.

CLL – Europe. Nonearning receivables of \$1.0 billion represented 14.5% of total nonearning receivables at December 31, 2013. The ratio of allowance for losses as a percent of nonearning receivables increased from 34.3% at December 31, 2012 to 39.7% at December 31, 2013, reflecting a decrease in nonearning receivables and allowance for losses in our Interbanca S.p.A. and asset-backed lending portfolios primarily as a result of write-offs. The majority of our CLL – Europe nonearning receivables are attributable to the Interbanca S.p.A. portfolio, which was acquired in 2009. The loans acquired with Interbanca S.p.A. were recorded at fair value, which incorporates an estimate at the acquisition date of credit losses over their remaining life. Accordingly, these loans generally have a lower ratio of allowance for losses as a percent of nonearning receivables compared to the remaining portfolio. Excluding the nonearning loans attributable to the 2009 acquisition of Interbanca S.p.A., the ratio of allowance for losses as a percent of nonearning receivables increased from 58.4% at December 31, 2012, to 70.8% at December 31, 2013, primarily due to a decrease in nonearning receivables as a result of write-offs and sales in our acquisition finance and asset-backed lending portfolios. The ratio of nonearning receivables as a percent of financing receivables decreased from 3.5% at December 31, 2012, to 2.8% at December 31, 2013, for the reasons described above. Collateral supporting these secured nonearning financing receivables are primarily equity of the underlying businesses for our Interbanca S.p.A. business and acquisition finance businesses, the purchased receivables for our asset-backed lending portfolio, and equipment for our equipment finance portfolio.

CLL – Asia. Nonearning receivables of \$0.4 billion represented 5.7% of total nonearning receivables at December 31, 2013. The ratio of allowance for losses as a percent of nonearning receivables decreased from 41.5% at December 31, 2012, to 21.8% at December 31, 2013, primarily due to an increase in nonearning receivables in Australia, South Korea and Thailand, partially offset by restructuring activities and write-offs resulting in a reduction of nonearning receivables in our asset-based financing businesses in Japan. The ratio of nonearning receivables as a percent of financing receivables increased from 1.7% at December 31, 2012, to 4.4% at December 31, 2013, primarily due to increased nonearning receivables mentioned above and a decline in financing receivables primarily in our asset-based financing businesses in Japan and Australia. Collateral supporting these nonearning financing receivables is primarily commercial real estate, manufacturing equipment and corporate aircraft.

Real Estate – Debt. Nonearning receivables of \$2.3 billion represented 31.8% of total nonearning receivables at December 31, 2013. The increase in nonearning receivables from December 31, 2012, was primarily due to \$2.1 billion of financing receivables previously classified as cash basis resulting from a revision to our nonaccrual and nonearning methods to more closely align with regulatory guidance in the fourth quarter of 2013, partially offset by the resolution of North American multi-family and hotel nonearning loans, as well as European retail and mixed-use loans through payoffs, foreclosures and write-offs. The ratio of allowance for losses as a percent of nonearning receivables decreased from 72.1% to 8.3% reflecting the increase in nonearning loans as mentioned above. The ratio of allowance for losses as a percent of total financing receivables decreased from 1.5% at December 31, 2012 to 1.0% at December 31, 2013, driven primarily by the reduction in overall reserves due to improving market conditions and new loan originations in 2013.

(40)

The Real Estate financing receivables portfolio is collateralized by income-producing or owner-occupied commercial properties across a variety of asset classes and markets. At December 31, 2013, total Real Estate financing receivables of \$19.9 billion were primarily collateralized by office buildings (\$5.9 billion), apartment buildings (\$3.2 billion), retail facilities (\$2.8 billion), warehouse properties (\$2.6 billion) and hotel properties (\$2.2 billion). In 2013, commercial real estate markets continue to show signs of improved stability and liquidity in certain markets; however, the pace of improvement varies significantly by asset class and market and the long-term outlook remains uncertain. We have and continue to maintain an intense focus on operations and risk management. Loan loss reserves related to our Real Estate–Debt financing receivables are particularly sensitive to declines in underlying property values. Estimating the impact of global property values on loss performance across our portfolio depends on a number of factors, including macroeconomic conditions, property level operating performance, local market dynamics and individual borrower behavior. As a result, any attempts to forecast potential losses carry a high degree of imprecision and are subject to change. At December 31, 2013, we had 116 foreclosed commercial real estate properties totaling \$1.0 billion.

Consumer – Non-U.S. residential mortgages. Nonearning receivables of \$1.8 billion represented 24.4% of total nonearning receivables at December 31, 2013. The ratio of allowance for losses as a percent of nonearning receivables increased from 18.7% at December 31, 2012, to 20.3% at December 31, 2013, as a result of lower nonearning receivables due to improved collections and higher property values primarily in our U.K. portfolio. Our non-U.S. mortgage portfolio has a loan-to-value ratio of approximately 75% at origination and the vast majority are first lien positions. Our U.K. and France portfolios, which comprise a majority of our total mortgage portfolio, have reindexed loan-to-value ratios of 77% and 56%, respectively, and about 9% of these loans are without mortgage insurance and have a reindexed loan-to-value ratio equal to or greater than 100%. Re-indexed loan-to-value ratios may not reflect actual realizable values of future repossessions. Loan-to-value information is updated on a quarterly basis for a majority of our loans and considers economic factors such as the housing price index. At December 31, 2013, we had in repossession stock 447 houses in the U.K., which had a value of approximately \$0.1 billion. The ratio of nonearning receivables as a percent of financing receivables decreased from 7.7% at December 31, 2012 to 5.8% at December 31, 2013 for the reasons described above.

Consumer – Non-U.S. installment and revolving credit. Nonearning receivables of \$0.1 billion represented 1.2% of total nonearning receivables at December 31, 2013. The ratio of allowance for losses as a percent of nonearning receivables increased from 273.2% at December 31, 2012 to 675.0% at December 31, 2013, reflecting an increase in the allowance for losses primarily due to the approach described below and a decrease in nonearning receivables reflect the placing of consumer credit card accounts on accrual status.

Consumer – U.S. installment and revolving credit. Nonearning receivables at December 31, 2013, reflect the placing of consumer credit card accounts on accrual status. The ratio of allowance for losses as a percent of financing receivables increased from 4.5% at December 31, 2012 to 5.1% at December 31, 2013, reflecting an increase in the allowance for losses primarily due to the approach described below.

In 2013, we completed our implementation of a more granular portfolio segmentation approach, by loss type, in determining the incurred loss period in our consumer revolving credit portfolios, which resulted in an increase to the incurred loss period and included a qualitative assessment of the adequacy of the consumer revolving credit portfolios' allowance for losses, which compares this allowance for losses to projected net write-offs over the next 12 months, in a manner consistent with regulatory guidance. This resulted in an increase of \$0.6 billion to the allowance for losses on financing receivables (\$0.3 billion, after tax), the vast majority of which was attributable to our U.S. consumer revolving credit portfolios.

Nonaccrual Financing Receivables

The following table provides details related to our nonaccrual and nonearning financing receivables. Nonaccrual financing receivables include all nonearning receivables and are those on which we have stopped accruing interest. We stop accruing interest at the earlier of the time at which collection becomes doubtful or the account becomes 90 days past due, with the exception of consumer credit card accounts, as discussed below.

(41)

Beginning in the fourth quarter of 2013, we revised our methods for classifying financing receivables as nonaccrual and nonearning to more closely align with regulatory guidance. Under the revised methods, we continue to accrue interest on consumer credit cards until the accounts are written off in the period the account becomes 180 days past due. Previously, we stopped accruing interest on consumer credit cards when the account became 90 days past due. In addition, the revised methods limit the use of the cash basis of accounting for nonaccrual financing receivables.

As a result of these revisions, consumer credit card receivables of \$1.1 billion that were previously classified as both nonaccrual and nonearning were returned to accrual status in the fourth quarter of 2013. In addition, \$1.5 billion of Real Estate and CLL financing receivables previously classified as nonaccrual, paying in accordance with contractual terms and accounted for on the cash basis, were returned to accrual status, while \$2.2 billion of financing receivables previously classified as nonaccrual and accounted for on the cash basis (primarily in Real Estate and CLL) were placed into the nonearning category based on our assessment of the short-term outlook for resolution through payoff or refinance. These changes had an insignificant effect on earnings.

Given that the revised methods result in nonaccrual and nonearning amounts that are substantially the same, we plan to discontinue the reporting of nonearning financing receivables, one of our internal performance metrics, and report selected ratios related to nonaccrual financing receivables in the first quarter of 2014.

Substantially all of the differences between nonearning and nonaccrual financing receivables relate to loans that are classified as nonaccrual financing receivables but are paying on a cash accounting basis, and therefore excluded from nonearning receivables. Of our \$7.9 billion nonaccrual loans at December 31, 2013, \$4.2 billion are currently paying in accordance with their contractual terms. Further information on our nonaccrual and nonearning financing receivables is provided in Notes 1 and 4 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

December 31 (In millions)	Nonaccrual financing receivables		Nonearning financing receivables	
	2013	2012	2013	2012
Commercial				
CLL	\$2,734	\$4,138	\$2,702	\$2,877
Energy Financial Services	4	-	4	-
GECAS	-	3	-	-
Other	6	25	6	13
Total Commercial	2,744	4,166	2,712	2,890
Real Estate(a)	2,551	4,885	2,301	444
Consumer(b)	2,620	4,288	2,219	4,181
Total	\$7,915	\$13,339	\$7,232	\$7,515

(a) During the fourth quarter of 2013, we reclassified financing receivables of \$1.0 billion from nonaccrual to accrual status and \$2.1 billion from nonaccrual to nonearning, as discussed above.

(b) During the fourth quarter of 2013, we reclassified consumer credit card receivables of \$1.1 billion from both nonaccrual and nonearning to accrual status, as discussed above.

Impaired Loans

“Impaired” loans in the table below are defined as larger-balance or restructured loans for which it is probable that the lender will be unable to collect all amounts due according to original contractual terms of the loan agreement. The vast majority of our Consumer and a portion of our CLL nonaccrual receivables are excluded from this definition, as they represent smaller-balance homogeneous loans that we evaluate collectively by portfolio for impairment.

Impaired loans include nonearning receivables on larger-balance or restructured loans, loans that are currently paying interest under the cash basis (but are excluded from the nonearning category), and loans paying currently that had been previously restructured.

(42)

Specific reserves are recorded for individually impaired loans to the extent we have determined that it is probable that we will be unable to collect all amounts due according to original contractual terms of the loan agreement. Certain loans classified as impaired may not require a reserve because we believe that we will ultimately collect the unpaid balance (through collection or collateral repossession).

Further information pertaining to loans classified as impaired and specific reserves is included in the table below.

December 31 (In millions)	2013	2012
Loans requiring allowance for losses		
Commercial(a)	\$ 1,116	\$ 1,372
Real Estate	1,245	2,202
Consumer	2,879	3,103
Total loans requiring allowance for losses	5,240	6,677
Loans expected to be fully recoverable		
Commercial(a)	2,776	3,697
Real Estate	2,615	3,491
Consumer	109	105
Total loans expected to be fully recoverable	5,500	7,293
Total impaired loans	\$ 10,740	\$ 13,970
Allowance for losses (specific reserves)		
Commercial(a)	\$ 328	\$ 487
Real Estate	74	188
Consumer	567	673
Total allowance for losses (specific reserves)	\$ 969	\$ 1,348
Average investment during the period	\$ 12,347	\$ 16,262
Interest income earned while impaired(b)	626	750

(a) Includes CLL, Energy Financial Services, GECAS and Other.

(b) Recognized principally on an accrual basis.

We regularly review our Real Estate loans for impairment using both quantitative and qualitative factors, such as debt service coverage and loan-to-value ratios. We evaluate a Real Estate loan for impairment when the most recent valuation reflects a projected loan-to-value ratio at maturity in excess of 100%, even if the loan is currently paying in accordance with its contractual terms.

Of our \$3.9 billion of impaired loans at Real Estate at December 31, 2013, \$3.6 billion are currently paying in accordance with the contractual terms of the loan and are typically loans where the borrower has adequate debt service coverage to meet contractual interest obligations. Impaired loans at CLL primarily represent senior secured lending positions.

Our impaired loan balance at December 31, 2013 and 2012, classified by the method used to measure impairment was as follows.

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-K

December 31 (In millions)	2013	2012
Discounted cash flow	\$5,558	\$ 6,693
Collateral value	5,182	7,277
Total	\$10,740	\$P13,970

See Note 1 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

(43)

Our loss mitigation strategy is intended to minimize economic loss and, at times, can result in rate reductions, principal forgiveness, extensions, forbearance or other actions, which may cause the related loan to be classified as a troubled debt restructuring (TDR), and also as impaired. Changes to Real Estate's loans primarily include maturity extensions, principal payment acceleration, changes to collateral terms and cash sweeps, which are in addition to, or sometimes in lieu of, fees and rate increases. The determination of whether these changes to the terms and conditions of our commercial loans meet the TDR criteria includes our consideration of all relevant facts and circumstances. At December 31, 2013, TDRs included in impaired loans were \$9.5 billion, primarily relating to Real Estate (\$3.6 billion), CLL (\$3.0 billion) and Consumer (\$2.9 billion).

Real Estate TDRs decreased from \$5.1 billion at December 31, 2012 to \$3.6 billion at December 31, 2013, primarily driven by resolution of TDRs through paydowns, partially offset by extensions of loans scheduled to mature during 2013, some of which were classified as TDRs upon modification. For borrowers with demonstrated operating capabilities, we work to restructure loans when the cash flow and projected value of the underlying collateral support repayment over the modified term. We deem loan modifications to be TDRs when we have granted a concession to a borrower experiencing financial difficulty and we do not receive adequate compensation in the form of an effective interest rate that is at current market rates of interest given the risk characteristics of the loan or other consideration that compensates us for the value of the concession. For the year ended December 31, 2013, we modified \$1.6 billion of loans classified as TDRs, substantially all in our Debt portfolio. Changes to these loans primarily included maturity extensions, principal payment acceleration, changes to collateral or covenant terms and cash sweeps that are in addition to, or sometimes in lieu of, fees and rate increases. The limited liquidity and higher return requirements in the real estate market for loans with higher loan-to-value (LTV) ratios have typically resulted in the conclusion that the modified terms are not at current market rates of interest, even if the modified loans are expected to be fully recoverable. We received the same or additional compensation in the form of rate increases and fees for the majority of these TDRs. Of our \$1.6 billion and \$4.4 billion of modifications classified as TDRs in the last 12 months ended December 31, 2013 and 2012, respectively, \$0.2 billion have subsequently experienced a payment default in both 2013 and 2012.

The substantial majority of the Real Estate TDRs have reserves determined based upon collateral value. Our specific reserves on Real Estate TDRs were \$0.1 billion at December 31, 2013 and \$0.2 billion at December 31, 2012, and were 1.9% and 3.1%, respectively, of Real Estate TDRs. In many situations these loans did not require a specific reserve as collateral value adequately covered our recorded investment in the loan. While these modified loans had adequate collateral coverage, we were still required to complete our TDR classification evaluation on each of the modifications without regard to collateral adequacy.

We utilize certain short-term (three months or less) loan modification programs for borrowers experiencing temporary financial difficulties in our Consumer loan portfolio. These loan modification programs are primarily concentrated in our non-U.S. residential mortgage and non-U.S. installment and revolving portfolios. We sold our U.S. residential mortgage business in 2007 and, as such, do not participate in the U.S. government-sponsored mortgage modification programs. For the year ended December 31, 2013, we provided short-term modifications of approximately \$0.1 billion of consumer loans for borrowers experiencing financial difficulties, substantially all in our non-U.S. residential mortgage, credit card and personal loan portfolios, which are not classified as TDRs. For these modified loans, we provided insignificant interest rate reductions and payment deferrals, which were not part of the terms of the original contract. We expect borrowers whose loans have been modified under these short-term programs to continue to be able to meet their contractual obligations upon the conclusion of the short-term modification. In addition, we have modified \$1.4 billion of Consumer loans for the year ended December 31, 2013, which are classified as TDRs. Further information on Consumer impaired loans is provided in Note 4 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Delinquencies

For additional information on delinquency rates at each of our major portfolios, see Note 4 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

(44)

GECC Selected European Exposures

At December 31, 2013, we had \$81.8 billion in financing receivables to consumer and commercial customers in Europe. The GECC financing receivables portfolio in Europe is well diversified across European geographies and customers. Approximately 88% of the portfolio is secured by collateral and represents approximately 500,000 commercial customers. Several European countries, including Spain, Portugal, Ireland, Italy, Greece and Hungary (focus countries), have been subject to credit deterioration due to weaknesses in their economic and fiscal situations. The carrying value of GECC funded exposures in these focus countries and in the rest of Europe comprised the following at December 31, 2013.

December 31, 2013 (In millions)	Spain	Portugal	Ireland	Italy	Greece	Hungary	Rest of Europe	Total Europe
Financing receivables, before allowance for losses on financing receivables	\$1,605	\$262	\$290	\$7,149	\$5	\$3,014	\$70,734	\$83,059
Allowance for losses on financing receivables	(106)	(18)	(4)	(254)	-	(68)	(787)	(1,237)
Financing receivables, net of allowance for losses on financing receivables(a)(b)	1,499	244	286	6,895	5	2,946	69,947	81,822
Investments(c)(d)	3	-	-	461	-	246	2,211	2,921
Cost and equity method investments(e)	307	-	383	61	35	-	1,940	2,726
Derivatives, net of collateral(c)(f)	2	-	-	63	-	-	102	167
ELTO(g)	401	108	419	754	242	328	9,286	11,538
Real estate held for investment(g)	793	-	-	422	-	-	4,455	5,670
Total funded exposures(h)	\$3,005	\$352	\$1,088	\$8,656	\$282	\$3,520	\$87,941	\$104,844

Unfunded commitments(i)	\$20	\$7	\$38	\$218	\$3	\$827	\$5,784	\$6,897
-------------------------	------	-----	------	-------	-----	-------	---------	---------

- (a) Financing receivable amounts are classified based on the location or nature of the related obligor.
- (b) Substantially all relates to non-sovereign obligors. Includes residential mortgage loans of approximately \$30.2 billion before consideration of purchased credit protection. We have third-party mortgage insurance for less than 10% of these residential mortgage loans, which were primarily originated in France and the U.K.
- (c) Investments and derivatives are classified based on the location of the parent of the obligor or issuer.
- (d) Includes \$0.8 billion related to financial institutions, \$0.2 billion related to non-financial institutions and \$1.9 billion related to sovereign issuers. Sovereign issuances totaled \$0.1 billion and \$0.2 billion related to Italy and Hungary, respectively. We held no investments issued by sovereign entities in the other focus countries.
- (e) Substantially all is non-sovereign.
- (f) Net of cash collateral; entire amount is non-sovereign.
- (g) These assets are held under long-term investment and operating strategies, and our ELTO strategies contemplate an ability to redeploy assets under lease should default by the lessee occur. The values of these assets could be subject to decline or impairment in the current environment.
- (h) Excludes \$34.4 billion of cash and equivalents, which is composed of \$19.6 billion of cash on short-term placement with highly rated global financial institutions based in Europe, sovereign central banks and agencies or supranational entities, of which \$1.7 billion is in focus countries, and \$14.8 billion of cash and equivalents placed with highly rated European financial institutions on a short-term basis, secured by U.S. Treasury securities (\$8.4 billion) and sovereign bonds of non-focus countries (\$6.4 billion), where the value of our collateral exceeds the amount of our cash exposure.
- (i) Includes ordinary course of business lending commitments, commercial and consumer unused revolving credit lines, inventory financing arrangements and investment commitments.

(45)

We manage counterparty exposure, including credit risk, on an individual counterparty basis. We place defined risk limits around each obligor and review our risk exposure on the basis of both the primary and parent obligor, as well as the issuer of securities held as collateral. These limits are adjusted on an ongoing basis based on our continuing assessment of the credit risk of the obligor or issuer. In setting our counterparty risk limits, we focus on high-quality credits and diversification through spread of risk in an effort to actively manage our overall exposure. We actively monitor each exposure against these limits and take appropriate action when we believe that risk limits have been exceeded or there are excess risk concentrations. Our collateral position and ability to work out problem accounts have historically mitigated our actual loss experience. Delinquency experience has been relatively stable in our European commercial and consumer platforms in the aggregate, and we actively monitor and take action to reduce exposures where appropriate. Uncertainties surrounding European markets could have an impact on the judgments and estimates used in determining the carrying value of these assets.

Other receivables totaled \$16.5 billion at December 31, 2013, an increase of \$2.6 billion from 2012, driven by higher amounts due from GE related to material procurement and factoring programs. At December 31, 2013, the balance was primarily composed of amounts due from GE (related to material procurement programs and factoring programs of \$6.7 billion), insurance receivables, accrued interest and investment income, nonfinancing customer receivables and amounts due under operating leases.

Property, plant and equipment totaled \$51.6 billion at December 31, 2013, a decrease of \$1.4 billion from 2012, primarily reflecting a decrease in equipment leased to others principally at our GECAS aircraft leasing business. This decrease included impairment losses on our operating lease portfolio of commercial aircraft of \$0.7 billion and \$0.2 billion in 2013 and 2012, respectively. Impairment losses in 2013 incorporated management's downward revisions to cash flow estimates based upon shorter useful lives and lower aircraft residual values from those indicated by our third-party appraisers, reflecting the introduction of newer technology, fleet retirements and high fuel prices and operating costs. These revised estimates primarily related to cargo aircraft (\$0.3 billion), older technology narrow-body aircraft (\$0.2 billion) and regional jets (\$0.1 billion). The average age of aircrafts we impaired in 2013 was 15 years compared with 7 years for our total fleet.

Property, plant and equipment consisted primarily of equipment provided to third parties on operating leases. Details by category of investment are presented in Note 5 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report. Additions to property, plant and equipment were \$10.0 billion and \$11.9 billion during 2013 and 2012, respectively, primarily reflecting additions of commercial aircraft at GECAS.

Goodwill and other intangible assets totaled \$26.2 billion and \$1.1 billion, respectively, at December 31, 2013. Goodwill decreased \$0.8 billion from 2012, primarily as a result of dispositions (\$0.7 billion) and the stronger U.S. dollar (\$0.3 billion). Other intangible assets decreased \$0.2 billion from 2012, primarily from amortization expense. See Note 6 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Other assets comprises mainly equity and cost method investments, real estate equity properties and investments, assets held for sale and derivative instruments, and totaled \$47.4 billion at December 31, 2013, a decrease of \$14.8 billion from 2012, primarily related to the sale of certain held-for-sale real estate and aircraft (\$7.9 billion), the sale of certain real estate investments (\$3.4 billion), a decrease in the fair value of derivative instruments (\$2.4 billion) and a decrease in our Penske Truck Leasing Co., L.P. (PTL) investment (\$1.2 billion). During 2013, we recognized \$0.4 billion of other-than-temporary impairments of cost and equity method investments, excluding those related to real estate.

Included in other assets are Real Estate equity investments of \$13.7 billion and \$20.7 billion at December 31, 2013 and 2012, respectively. Our portfolio is diversified, both geographically and by asset type. We review the estimated values of our commercial real estate investments annually, or more frequently as conditions warrant. Based on the most recent valuation estimates available, the carrying value of our Real Estate investments exceeded their estimated value by about \$2.1 billion. This amount is subject to variation and dependent on economic and market conditions, changes in cash flow estimates and composition of our portfolio, including sales. Commercial real estate valuations have shown signs of improved stability and liquidity in certain markets, primarily in the U.S.; however, the pace of improvement varies significantly by asset class and market. Accordingly, there continues to be risk and uncertainty surrounding commercial real estate values. Declines in estimated value of real estate below carrying amount result in impairment losses when the aggregate undiscounted cash flow estimates used in the estimated value measurement are below the carrying amount. As such, estimated losses in the portfolio will not necessarily result in recognized impairment losses. During 2013, Real Estate recognized pre-tax impairments of \$0.3 billion in its real estate held for investment, which were primarily driven by declining cash flow projections for properties in Japan and Europe, as well as strategic decisions to sell portfolios in the U.S., Asia and Europe. During 2012, Real Estate recognized pre-tax impairments of \$0.1 billion. Real Estate investments with undiscounted cash flows in excess of carrying value of 0% to 5% at December 31, 2013 had a carrying value of \$0.4 billion and an associated estimated unrealized loss of an insignificant amount. Deterioration in economic conditions or prolonged market illiquidity may result in further impairments being recognized. On March 19, 2013, in connection with GE's sale of its remaining 49% interest in NBCUniversal LLC to Comcast Corporation, we sold real estate comprising certain floors located at 30 Rockefeller Center, New York and the CNBC property located in Englewood Cliffs, New Jersey to affiliates of NBCUniversal for \$1.4 billion in cash.

Liquidity and Borrowings

We maintain a strong focus on liquidity. We manage our liquidity to help provide access to sufficient funding to meet our business needs and financial obligations throughout business cycles.

Our liquidity and borrowing plans are established within the context of our annual financial and strategic planning processes. Our liquidity and funding plans take into account the liquidity necessary to fund our operating commitments. We also take into account our capital allocation and growth objectives, including paying dividends. During 2013, we paid quarterly dividends of \$1.9 billion and special dividends of \$4.1 billion to GE.

Our liquidity position is targeted to meet our obligations under both normal and stressed conditions. We establish a funding plan annually that is based on the projected asset size and cash needs of the business, which, over the past few years, has included our strategy to reduce our ending net investment. We rely on a diversified source of funding, including the unsecured term debt markets, the global commercial paper markets, deposits, secured funding, retail funding products, bank borrowings and securitizations to fund our balance sheet, in addition to cash generated through collection of principal, interest and other payments on our existing portfolio of loans and leases to fund our operating and interest expense costs.

Our 2014 funding plan anticipates repayment of principal on outstanding short-term borrowings, including the current portion of long-term debt (\$39.2 billion at December 31, 2013), through issuance of long-term debt and reissuance of commercial paper, cash on hand, collections of financing receivables exceeding originations, dispositions, asset sales, and deposits and other alternative sources of funding. Long-term maturities and early redemptions were \$48.3 billion in 2013. Interest on borrowings is primarily repaid through interest earned on existing financing receivables. During 2013, we earned interest income on financing receivables of \$19.6 billion, which more than offset interest expense of \$9.3 billion.

We maintain a detailed liquidity policy that includes a requirement to maintain a contingency funding plan. The liquidity policy defines our liquidity risk tolerance under different stress scenarios based on our liquidity sources and also establishes procedures to escalate potential issues. We actively monitor our access to funding markets and our liquidity profile through tracking external indicators and testing various stress scenarios. The contingency funding plan provides a framework for handling market disruptions and establishes escalation procedures in the event that such events or circumstances arise.

(47)

We are a regulated savings and loan holding company under U.S. law and became subject to Federal Reserve Board (FRB) supervision on July 21, 2011, the one-year anniversary of the Dodd-Frank Wall Street Reform and Consumer Protection Act (DFA). In addition, on July 8, 2013, the U.S. Financial Stability Oversight Council (FSOC) designated GECC as a nonbank systemically important financial institution (nonbank SIFI) under the DFA. Many of the rulemakings for supervision of nonbank SIFIs are not final and therefore the exact impact and implementation date remain uncertain. GECC continues to plan for the enhanced prudential standards that will apply to nonbank SIFIs. These DFA rulemakings will require, among other items, enhanced capital and liquidity levels, compliance with the comprehensive capital analysis and review regulations (CCAR), compliance with counterparty credit exposure limits, and the development of a resolution plan for submission to regulators.

We are also subject to the Volcker Rule, which U.S. regulators finalized on December 10, 2013. The rule prohibits companies that are affiliated with U.S. insured depository institutions from engaging in “proprietary trading” or acquiring or retaining any ownership interest in, or sponsoring or engaging in certain transactions with, a “hedge fund” or a “private equity fund.” Proprietary trading and fund investing, as prohibited by the rule, are not core activities for us, but we are assessing the full impact of the rule, in anticipation of full conformance with the rule, as required by July 21, 2015.

The FRB recently finalized regulations to revise and replace its current rules on capital adequacy and to extend capital regulations to savings and loan holding companies like GECC. Under the final rules, GECC expects that the standardized approach for calculating capital will apply to GECC, in its capacity as a savings and loan holding company, on January 1, 2015. However, that timing could change once nonbank SIFI rules are finalized. GECC will ultimately also become subject to the Basel III advanced capital rules that will be applicable to institutions with \$250 billion or more in assets. Initial actions required for compliance with the advanced capital rules, including building out the necessary systems and models, will begin once GECC is subject to regulatory capital rules. However, full implementation will take several years to complete.

The FRB has also indicated in a proposed rulemaking that they will require nonbank SIFIs to submit annual capital plans for review, including institutions’ plans to make capital distributions, such as dividend payments. The applicability and timing of this proposed regulation to GECC is not yet determined. While we are not yet subject to this regulation, our capital allocation planning remains subject to FRB review as a savings and loan holding company.

We undertake an annual review of our capital adequacy prior to establishing a plan for dividends to our parent. This review is based on a forward-looking assessment of our material enterprise risks and involves the consideration of a number of factors. This analysis also includes an assessment of our capital and liquidity levels, as well as incorporating risk management and governance considerations. The most recent capital adequacy review was approved by the GECC board of directors and the GE Board of Directors Risk Committee in the first quarter of 2013. GECC is currently in the process of updating the 2013 capital adequacy review and it will be presented to the GECC board of directors and the GE Board of Directors Risk Committee in the first quarter of 2014. While a savings and loan holding company and nonbank SIFI like GECC is currently not required to obtain FRB approval to pay a dividend, it may not, under FRB regulations, conduct its operations in an unsafe or unsound manner. The FRB has articulated factors that it expects boards of directors of bank holding companies and savings and loan holding companies to consider in determining whether to pay a dividend.

Overall, GECC does not believe that designation as a nonbank SIFI will have a material impact on its business or operations.

Liquidity Sources

We maintain liquidity sources that consist of cash and equivalents, committed unused credit lines, and high-quality, liquid investments.

We had cash and equivalents of \$74.9 billion at December 31, 2013 that were available to meet our needs.

We had committed, unused credit lines totaling \$47.8 billion that were extended to us by 50 financial institutions at December 31, 2013. GECC can borrow up to \$47.8 billion under all of these credit lines. GE can borrow up to \$13.9 billion under certain of these credit lines. These lines include \$26.5 billion of revolving credit agreements under which we can borrow funds for periods exceeding one year. Additionally, \$21.3 billion are 364-day lines that contain a term-out feature that allows us to extend borrowings for two years from the date on which such borrowings would otherwise be due.

Cash and equivalents of \$43.4 billion at December 31, 2013 were held by non-U.S. subsidiaries. Of this amount at December 31, 2013, none was considered indefinitely reinvested. Indefinitely reinvested cash held outside of the U.S. is available to fund operations and other growth of non-U.S. subsidiaries; it is also available to fund our needs in the U.S. on a short-term basis through short-term loans, without being subject to U.S. tax. Under the Internal Revenue Code, these loans are permitted to be outstanding for 30 days or less and the total of all such loans is required to be outstanding for less than 60 days during the year.

At December 31, 2013, cash and equivalents of about \$12 billion were in regulated banks and insurance entities and were subject to regulatory restrictions.

If we were to repatriate indefinitely reinvested cash held outside the U.S., we would be subject to additional U.S. income taxes and foreign withholding taxes.

Funding Plan

GE reduced its GE Capital ending net investment, excluding cash and equivalents, to \$380 billion at December 31, 2013.

During 2013, we completed issuances of \$33.7 billion of senior unsecured debt (excluding securitizations described below) with maturities up to 40 years (and subsequent to December 31, 2013, an additional \$3.9 billion). Average commercial paper borrowings during the fourth quarter were \$31.6 billion and the maximum amount of commercial paper borrowings outstanding during the fourth quarter was \$33.1 billion. Our commercial paper maturities are funded principally through new commercial paper issuances.

We securitize financial assets as an alternative source of funding. During 2013, we completed \$8.9 billion of non-recourse issuances and had maturities of \$8.9 billion. At December 31, 2013, consolidated non-recourse borrowings were \$30.1 billion.

We have 10 deposit-taking banks outside of the U.S. and two deposit-taking banks in the U.S. – GE Capital Retail Bank, a Federal Savings Bank (FSB), and GE Capital Bank (formerly GE Capital Financial Inc.), an industrial bank (IB). The FSB and IB currently issue certificates of deposit (CDs) in maturity terms up to 10 years. On January 11, 2013, the FSB acquired the deposit business of MetLife Bank, N.A. This acquisition added approximately \$6.4 billion in deposits and an online banking platform.

Total alternative funding at December 31, 2013 was \$108 billion, composed mainly of \$53 billion of bank deposits, \$30 billion of non-recourse securitization borrowings, \$9 billion of funding secured by real estate, aircraft and other collateral and \$9 billion of GE Interest Plus notes. The comparable amount at December 31, 2012 was \$101 billion.

(49)

As a matter of general practice, we routinely evaluate the economic impact of calling debt instruments where we have the right to exercise a call. In determining whether to call debt, we consider the economic benefit to GECC of calling debt, the effect of calling debt on our liquidity profile and other factors. In 2013, we settled \$8.4 billion of callable debt, of which \$4.1 billion was called in 2012.

Exchange rate and interest rate risks are managed with a variety of techniques, including match funding and selective use of derivatives. We use derivatives to mitigate or eliminate certain financial and market risks because we conduct business in diverse markets around the world and local funding is not always efficient. In addition, we use derivatives to adjust the debt we are issuing to match the fixed or floating nature of the assets we are originating. We apply strict policies to manage each of these risks, including prohibitions on speculative activities. Following is an analysis of the potential effects of changes in interest rates and currency exchange rates using so-called “shock” tests that seek to model the effects of shifts in rates. Such tests are inherently limited based on the assumptions used (described further below) and should not be viewed as a forecast; actual effects would depend on many variables, including market factors and the composition of our assets and liabilities at that time.

- It is our policy to minimize exposure to interest rate changes. We fund our financial investments using debt or a combination of debt and hedging instruments so that the interest rates of our borrowings match the expected interest rate profile on our assets. To test the effectiveness of our fixed rate positions, we assumed that, on January 1, 2014, interest rates decreased by 100 basis points across the yield curve (a “parallel shift” in that curve) and further assumed that the decrease remained in place for 2014. We estimated, based on the year-end 2013 portfolio and holding all other assumptions constant, that our 2014 consolidated net earnings would decline by less than \$0.1 billion as a result of this parallel shift in the yield curve.
- It is our policy to minimize currency exposures and to conduct operations either within functional currencies or using the protection of hedge strategies. We analyzed year-end 2013 consolidated currency exposures, including derivatives designated and effective as hedges, to identify assets and liabilities denominated in other than their relevant functional currencies. For such assets and liabilities, we then evaluated the effects of a 10% shift in exchange rates between those currencies and the U.S. dollar, holding all other assumptions constant. This analysis indicated that our 2014 consolidated net earnings would decline by less than \$0.1 billion as a result of such a shift in exchange rates.

Debt and Derivative Instruments, Guarantees and Covenants

Credit Ratings

On April 3, 2012, Moody’s Investors Service (Moody’s) announced that it had downgraded the senior unsecured debt rating of GE by one notch from Aa2 to Aa3 and the senior unsecured debt rating of GECC by two notches from Aa2 to A1. The ratings downgrade did not affect GE’s and GECC’s short-term funding ratings of P-1, which were affirmed by Moody’s. Moody’s ratings outlook for GE and GECC is stable. We did not experience any material operational, funding or liquidity impacts from this ratings downgrade. As of December 31, 2013, GE’s and GECC’s long-term unsecured debt ratings from Standard and Poor’s Ratings Service (S&P) were AA+ with a stable outlook and their short-term funding ratings from S&P were A-1+. We are disclosing these ratings to enhance understanding of our sources of liquidity and the effects of our ratings on our costs of funds. Although we currently do not expect a downgrade in the credit ratings, our ratings may be subject to a revision or withdrawal at any time by the assigning rating organization, and each rating should be evaluated independently of any other rating.

Substantially all GICs were affected by the downgrade and are more fully discussed in the Principal Debt and Derivative Conditions section in this item.

(50)

Principal Debt and Derivative Conditions

Certain of our derivative instruments can be terminated if specified credit ratings are not maintained and certain debt and derivatives agreements of other consolidated entities have provisions that are affected by these credit ratings.

Fair values of our derivatives can change significantly from period to period based on, among other factors, market movements and changes in our positions. We manage counterparty credit risk (the risk that counterparties will default and not make payments to us according to the terms of our standard master agreements) on an individual counterparty basis. Where we have agreed to netting of derivative exposures with a counterparty, we offset our exposures with that counterparty and apply the value of collateral posted to us to determine the net exposure. We actively monitor these net exposures against defined limits and take appropriate actions in response, including requiring additional collateral.

Swap, forward and option contracts are executed under standard master agreements that typically contain mutual downgrade provisions that provide the ability of the counterparty to require termination if the long-term credit ratings of the applicable GE entity were to fall below A-/A3. In certain of these master agreements, the counterparty also has the ability to require termination if the short-term ratings of the applicable GE entity were to fall below A-1/P-1. The net derivative liability after consideration of netting arrangements, outstanding interest payments and collateral posted by us under these master agreements was estimated to be \$1.0 billion at December 31, 2013. See Note 15 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Other debt and derivative agreements of consolidated entities include Trinity, which comprises two entities that hold investment securities, the majority of which are investment grade, and were funded by the issuance of GICs. These GICs included conditions under which certain holders could require immediate repayment of their investment should the long-term credit ratings of GECC fall below AA-/Aa3 or the short-term credit ratings fall below A-1+/P-1, and are reported in investment contracts, insurance liabilities and insurance annuity benefits. The Trinity assets and liabilities are disclosed in note (a) on our Statement of Financial Position in the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report. Another consolidated entity also had issued GICs where proceeds are loaned to GECC. These GICs included conditions under which certain holders could require immediate repayment of their investment should the long-term credit ratings of GECC fall below AA-/Aa3. These obligations are included in long-term borrowings on our Statement of Financial Position in the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report. These three consolidated entities ceased issuing GICs in 2010.

Following the April 3, 2012 Moody's downgrade of GECC's long-term credit rating to A1, substantially all of these GICs became redeemable by their holders. In 2012, holders of \$2.4 billion in principal amount of GICs redeemed their holdings and GECC made related cash payments. The remaining outstanding GICs will continue to be subject to their scheduled maturities and individual terms, which may include provisions permitting redemption upon a downgrade of one or more of GECC's ratings, among other things.

(51)

Ratio of Earnings to Fixed Charges, Income Maintenance Agreement and Subordinated Debentures

On March 28, 1991, GE entered into an agreement with GECC to make payments to GECC, constituting additions to pre-tax income under the agreement (which increases equity), to the extent necessary to cause the ratio of earnings to fixed charges of GECC and consolidated affiliates (determined on a consolidated basis) to be not less than 1.10:1 for the period, as a single aggregation, of each GECC fiscal year commencing with fiscal year 1991. GECC's ratio of earnings to fixed charges was 1.76:1 for 2013. No payment is required in 2013 pursuant to this agreement.

In addition, in connection with certain subordinated debentures of GECC that may be classified as equity (hybrid debt), during events of default or interest deferral periods under such subordinated debentures, GECC has agreed not to declare or pay any dividends or distributions or make certain other payments with respect to its capital stock, and GE has agreed to promptly return any payments made to GE in violation of this agreement. There were \$7.7 billion of such debentures outstanding at December 31, 2013. See Note 8 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Statements of Changes in Shareowners' Equity and Comprehensive Income

An analysis of changes in the elements of shareowners' equity, as presented in the Statements of Changes in Shareowners' Equity and Comprehensive Income, follows.

GECC Shareowners' equity increased \$0.8 billion in 2013, compared with an increase of \$4.8 billion and \$8.1 billion in 2012 and 2011, respectively.

Net earnings increased GECC shareowners' equity by \$6.2 billion in 2013 and 2012, and \$6.5 billion in 2011. In 2013 and 2012, we paid quarterly dividends of \$1.9 billion and special dividends of \$4.1 billion and \$4.5 billion, respectively, to GE. We also paid \$0.3 billion and \$0.1 billion to our preferred stock shareowners in 2013 and 2012, respectively. There were no dividends declared in 2011.

Elements of AOCI decreased shareowners' equity by \$0.1 billion in 2013, compared with an increase of \$1.2 billion in 2012 and \$1.6 billion in 2011. The components of these changes are as follows:

- Changes in AOCI related to currency translation adjustments decreased shareowners' equity by \$0.6 billion in 2013 and increased shareowners' equity by \$0.3 billion and \$1.0 billion in 2012 and 2011, respectively. Changes in currency translation adjustments reflect the effects of changes in currency exchange rates on our net investment in non-U.S. subsidiaries that have functional currencies other than the U.S. dollar. At year-end 2013, the U.S. dollar weakened against the euro and the pound sterling, and strengthened against the Japanese yen and the Australian dollar resulting in increases in currency translation adjustments that were more than offset by releases from AOCI related to dispositions. At year-end 2012, the U.S. dollar weakened against most major currencies, including the pound sterling and the euro, and strengthened against the Japanese yen resulting in increases in currency translation adjustments that were partially offset by releases from AOCI related to dispositions. At year-end 2011, the dollar strengthened against most major currencies, including the pound sterling and the euro, and weakened against the Australian dollar and the Japanese yen.
- Changes in AOCI related to investment securities decreased shareowners' equity by \$0.4 billion in 2013, reflecting the effects of higher interest rates, partially offset by adjustments to reflect the effect of lower unrealized gains on insurance-related assets and equity. Investment securities increased shareowners' equity by \$0.7 billion and \$0.6 billion in 2012 and 2011, respectively, reflecting the effects of lower interest rates and improved market conditions on U.S. corporate debt securities, partially offset by adjustments to reflect the effect of the unrealized gains on insurance-related assets and equity. Further information about investment securities is provided in Note 3 to the

consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

(52)

Changes in AOCI related to the fair value of derivatives designated as cash flow hedges increased shareowners' equity by \$0.5 billion in 2013, primarily reflecting higher fair values of cross currency hedges, partially offset by releases from AOCI contemporaneous with the earnings effects of the related hedged items. Cash flow hedges increased shareowners' equity by \$0.4 billion and \$0.2 billion in 2012 and 2011, respectively. Further information about the fair value of derivatives is provided in Note 15 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Changes in AOCI related to benefit plans increased shareowners' equity by \$0.4 billion in 2013, primarily reflecting higher discount rates used to measure postretirement benefit obligations, higher investment returns and amortization of actuarial losses out of AOCI. Benefit plans decreased shareowners' equity by \$0.2 billion in both 2012 and 2011. Further information about benefit plans is provided in Note 13 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

During the second quarter of 2013, we issued 10,000 shares of non-cumulative perpetual preferred stock with a \$0.01 par value for proceeds of \$990 million. The preferred shares bear an initial fixed interest rate of 5.25% through June 15, 2023, bear a floating rate equal to three-month LIBOR plus 2.967% thereafter and are callable on June 15, 2023. Dividends on the preferred stock are payable semi-annually, in June and December, with the first payment on this issuance made in December 2013.

During 2012, we issued 40,000 shares of non-cumulative perpetual preferred stock with a \$0.01 par value for proceeds of \$3,960 million. Of these shares, 22,500 bear an initial fixed interest rate of 7.125% through June 15, 2022, bear a floating rate equal to three-month LIBOR plus 5.296% thereafter and are callable on June 15, 2022, and 17,500 bear an initial fixed interest rate of 6.25% through December 15, 2022, bear a floating rate equal to three-month LIBOR plus 4.704% thereafter and are callable on December 15, 2022. Dividends on the preferred stock are payable semi-annually, in June and December, with the first payment on these issuances made in December 2012.

Statement of Cash Flows – Overview from 2011 through 2013

Cash and equivalents were \$74.9 billion at December 31, 2013, compared with \$61.9 billion at December 31, 2012.

Cash from operating activities totaled \$19.9 billion, \$21.7 billion and \$20.6 billion in 2013, 2012 and 2011, respectively. Cash from operating activities decreased \$1.9 billion during 2013 compared with 2012, primarily due to decreases in net cash collateral held from counterparties on derivative contracts of \$5.2 billion, partially offset by increases in other liabilities of \$1.8 billion and accounts payable of \$1.0 billion.

Cash from operating activities increased \$1.1 billion during 2012 compared with 2011, primarily due to increases in net cash collateral held from counterparties on derivative contracts of \$1.7 billion, partially offset by decreases in accounts payable of \$0.9 billion.

Consistent with our plan to reduce our asset levels, cash from investing activities was \$23.4 billion, \$14.7 billion and \$29.8 billion in 2013, 2012 and 2011, respectively. Cash from investing activities increased \$8.7 billion during 2013 compared with 2012, primarily due to higher proceeds from sales of real estate properties of \$7.3 billion; the acquisition of MetLife Bank, N.A. in 2013, resulting in net cash provided from the acquisition of \$6.4 billion; lower net purchases of ELTO of \$1.6 billion; partially offset by lower net loan repayments from our equity method investments of \$4.9 billion and lower collections (which includes sales) exceeding originations of financing receivables of \$1.9 billion.

Cash from investing activities decreased \$15.1 billion during 2012 compared with 2011, primarily due to lower collections (which includes sales) exceeding originations of financing receivables of \$9.0 billion, lower proceeds from sales of discontinued operations of \$8.7 billion and higher net purchases of ELTO of \$1.7 billion. These decreases were partially offset by higher net dispositions and maturities of investment securities of \$2.6 billion and a decrease in other assets-investments of \$1.7 billion driven by net activity of our equity method investments.

Cash used for financing activities was \$29.4 billion, \$52.5 billion and \$33.2 billion in 2013, 2012, and 2011, respectively. Cash used for financing activities decreased \$23.0 billion during 2013 compared with 2012, primarily due to lower net repayments of borrowings of \$24.0 billion, consisting primarily of net reductions in long-term borrowings and commercial paper, and lower redemptions of guaranteed investment contracts of \$2.3 billion, partially offset by lower proceeds from the issuance of preferred stock of \$3.0 billion.

Cash used for financing activities increased \$19.3 billion during 2012 compared with 2011, primarily due to a reduction in total borrowings of \$11.7 billion, consisting primarily of net reductions in long-term borrowings and commercial paper; \$6.5 billion of dividends paid to shareowners in 2012 (including \$0.1 billion paid to preferred shareowners); a reduction in bank deposits of \$4.2 billion and \$1.0 billion of redemptions of guaranteed investment contracts at Trinity, partially offset by \$4.0 billion of proceeds from the issuance of preferred stock.

We pay dividends to GE through a distribution of our retained earnings, including special dividends from proceeds of certain business sales. Beginning in the second quarter of 2012, we restarted our dividend to GE. During 2013 and 2012, we paid quarterly dividends of \$1.9 billion in both years and special dividends of \$4.1 billion and \$4.5 billion, respectively, to GE. No dividends were paid to GE in 2011.

Contractual Obligations

As defined by reporting regulations, our contractual obligations for future payments as of December 31, 2013, follow.

(In billions)	Total	Payments due by period			2019 and thereafter
		2014	2015-2016	2017-2018	
Borrowings and bank deposits (Note 8)	\$371.1	\$116.1	\$101.2	\$55.4	\$98.4
Interest on borrowings and bank deposits	87.2	9.2	13.1	10.1	54.8
Purchase obligations(a)(b)	39.8	14.0	6.6	7.3	11.9
Insurance liabilities (Note 9)(c)	13.5	1.8	2.1	1.7	7.9
Operating lease obligations (Note 13)	1.4	0.3	0.4	0.2	0.5
Other liabilities(d)	18.9	18.0	0.2	0.1	0.6
Contractual obligations of discontinued operations(e)	3.2	3.2	-	-	-

(a) Included all take-or-pay arrangements, capital expenditures, contractual commitments to purchase equipment that will be leased to others, contractual commitments related to factoring agreements, software acquisition/license commitments and any contractually required cash payments for acquisitions.

(b) Excluded funding commitments entered into in the ordinary course of business. Further information on these commitments and other guarantees is provided in Note 17 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

(c) Included contracts with reasonably determinable cash flows such as structured settlements, guaranteed investment contracts and certain property and casualty contracts, and excluded long-term care, variable annuity and other life insurance contracts.

(d) Included an estimate of future expected funding requirements related to our pension and postretirement benefit plans and included liabilities for unrecognized tax benefits. Because their future cash outflows are uncertain, the following non-current liabilities are excluded from the table above: deferred taxes, derivatives, deferred revenue and other sundry items. For further information on certain of these items, see Notes 10 and 15 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

(e) Included payments for other liabilities.

(54)

Variable Interest Entities

We securitize financial assets and arrange other forms of asset-backed financing in the ordinary course of business as an alternative source of funding. The securitization transactions we engage in are similar to those used by many financial institutions.

The assets we currently securitize include: receivables secured by equipment, credit card receivables, floorplan inventory receivables, GE trade receivables and other assets originated and underwritten by us in the ordinary course of business. The securitizations are funded with variable funding notes and term debt.

Substantially all of our securitization VIEs are consolidated because we are considered to be the primary beneficiary of the entity. Our interests in other VIEs for which we are not the primary beneficiary are accounted for as investment securities, financing receivables or equity method investments depending on the nature of our involvement.

At December 31, 2013, consolidated variable interest entity assets and liabilities were \$48.4 billion and \$32.4 billion, respectively, an increase of \$0.5 billion and a decrease of \$0.6 billion from 2012. Assets held by these entities are of equivalent credit quality to our other assets. We monitor the underlying credit quality in accordance with our role as servicer and apply rigorous controls to the execution of securitization transactions. With the exception of credit and liquidity support discussed below, investors in these entities have recourse only to the underlying assets.

At December 31, 2013, investments in unconsolidated VIEs, were \$12.4 billion, a decrease of \$0.6 billion from 2012, primarily related to a decrease of \$2.0 billion in PTL and a decrease of \$0.5 billion due to contractual maturities and disposals of investments, partially offset by an increase of \$1.9 billion in an investment in asset-backed securities issued by a senior secured loan fund. In the first quarter of 2013, PTL had repaid all outstanding debt owed and terminated its borrowing arrangement with GECC. During the second quarter of 2013, PTL ceased to be a VIE as a result of a principal in PTL retiring from the GE Board. Therefore, our investment in PTL (\$899 million at December 31, 2013) is not reported in the December 31, 2013 balance. In addition to our existing investments, we have contractual obligations to fund additional investments in the unconsolidated VIEs to fund new asset origination. At December 31, 2013, these contractual obligations were \$2.8 billion, an increase of \$0.1 billion from 2012.

We do not have implicit support arrangements with any VIE. We did not provide non-contractual support for previously transferred financing receivables to any VIE in either 2013 or 2012.

Critical Accounting Estimates

Accounting estimates and assumptions discussed in this section are those that we consider to be the most critical to an understanding of our financial statements because they involve significant judgments and uncertainties. Many of these estimates include determining fair value. All of these estimates reflect our best judgment about current, and for some estimates future, economic and market conditions and their effects based on information available as of the date of these financial statements. If these conditions change from those expected, it is reasonably possible that the judgments and estimates described below could change, which may result in future impairments of investment securities, goodwill, intangibles and long-lived assets, incremental losses on financing receivables, increases in reserves for contingencies, establishment of valuation allowances on deferred tax assets and increased tax liabilities, among other effects. Also see Note 1 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report, which discusses the significant accounting policies that we have selected from acceptable alternatives.

Losses on financing receivables are recognized when they are incurred, which requires us to make our best estimate of probable losses inherent in the portfolio. The method for calculating the best estimate of losses depends on the size,

type and risk characteristics of the related financing receivable. Such an estimate requires consideration of historical loss experience, adjusted for current conditions, and judgments about the probable effects of relevant observable data, including present economic conditions such as delinquency rates, financial health of specific customers and market sectors, collateral values (including housing price indices as applicable), and the present and expected future levels of interest rates. The underlying assumptions, estimates and assessments we use to provide

(55)

for losses are updated periodically to reflect our view of current conditions and are subject to the regulatory examination process, which can result in changes to our assumptions. Changes in such estimates can significantly affect the allowance and provision for losses. It is possible that we will experience credit losses that are different from our current estimates. Write-offs in both our consumer and commercial portfolios can also reflect both losses that are incurred subsequent to the beginning of a fiscal year and information becoming available during that fiscal year that may identify further deterioration on exposures existing prior to the beginning of that fiscal year, and for which reserves could not have been previously recognized. Our risk management process includes standards and policies for reviewing major risk exposures and concentrations, and evaluates relevant data either for individual loans or financing leases, or on a portfolio basis, as appropriate.

Further information is provided in the Global Risk Management section and Financial Resources and Liquidity – Financing Receivables section of this Item, the Asset impairment section that follows and in Notes 1 and 4 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

Asset impairment assessment involves various estimates and assumptions as follows:

Investments. We regularly review investment securities for impairment using both quantitative and qualitative criteria. For debt securities, if we do not intend to sell the security and it is not more likely than not that we will be required to sell the security before recovery of our amortized cost, we evaluate other qualitative criteria to determine whether a credit loss exists, such as the financial health of and specific prospects for the issuer, including whether the issuer is in compliance with the terms and covenants of the security. Quantitative criteria include determining whether there has been an adverse change in expected future cash flows. For equity securities, our criteria include the length of time and magnitude of the amount that each security is in an unrealized loss position. Our other-than-temporary impairment reviews involve our finance, risk and asset management functions as well as the portfolio management and research capabilities of our internal and third-party asset managers. See Note 1 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report, which discusses the determination of fair value of investment securities.

Further information about actual and potential impairment losses is provided in the Financial Resources and Liquidity – Investment Securities section of this Item and in Notes 1, 3 and 7 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

Long-Lived Assets. We review long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Determining whether an impairment has occurred typically requires various estimates and assumptions, including determining which undiscounted cash flows are directly related to the potentially impaired asset, the useful life over which cash flows will occur, their amount, and the asset’s residual value, if any. In turn, measurement of an impairment loss requires a determination of fair value, which is based on the best information available. We derive the required undiscounted cash flow estimates from our historical experience and our internal business plans. To determine fair value, we use quoted market prices when available, our internal cash flow estimates discounted at an appropriate interest rate and independent appraisals, as appropriate.

Our operating lease portfolio of commercial aircraft is a significant concentration of assets in GECAS, and is particularly subject to market fluctuations. Therefore, we test recoverability of each aircraft in our operating lease portfolio at least annually. Additionally, we perform quarterly evaluations in circumstances such as when aircraft are re-leased, current lease terms have changed or a specific lessee’s credit standing changes. We consider market conditions, such as global demand for commercial aircraft. Estimates of future rentals and residual values are based on historical experience and information received routinely from independent appraisers. Estimated cash flows from

future leases are reduced for expected downtime between leases and for estimated technical costs required to prepare aircraft to be redeployed. Fair value used to measure impairment is based on management's best estimate. In determining its best estimate, management evaluates average current market values (obtained from third parties) of similar type and age aircraft, which are adjusted for the attributes of the specific aircraft under lease.

(56)

We recognized impairment losses on our operating lease portfolio of commercial aircraft of \$0.7 billion and \$0.2 billion in 2013 and 2012, respectively. Impairment losses in 2013 incorporated management's downward revisions to cash flow estimates based upon shorter useful lives and lower aircraft residual values from those indicated by our third-party appraisers, reflecting the introduction of newer technology, fleet retirements and high fuel prices and operating costs. These revised estimates primarily related to cargo aircraft (\$0.3 billion), older technology narrow-body aircraft (\$0.2 billion) and regional jets (\$0.1 billion). The average age of aircrafts we impaired in 2013 was 15 years compared with 7 years for our total fleet. Provisions for losses on financing receivables related to commercial aircraft were an insignificant amount for both 2013 and 2012.

Further information on impairment losses and our exposure to the commercial aviation industry is provided in the Operations – Overview of Our Earnings from 2011 through 2013 and the Financial Resources and Liquidity – Property, plant and equipment sections of this Item and in Notes 5 and 17 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

Real Estate. We review the estimated value of our commercial real estate investments annually, or more frequently as conditions warrant. The cash flow estimates used for both estimating value and the recoverability analysis are inherently judgmental, and reflect current and projected lease profiles, available industry information about expected trends in rental, occupancy and capitalization rates and expected business plans, which include our estimated holding period for the asset. Our portfolio is diversified, both geographically and by asset type. However, the global real estate market is subject to periodic cycles that can cause significant fluctuations in market values. Based on the most recent valuation estimates available, the carrying value of our Real Estate investments exceeded their estimated value by about \$2.1 billion. This amount is subject to variation dependent on the assumptions described above, changes in economic and market conditions and composition of our portfolio, including sales. Commercial real estate valuations have shown signs of improved stability and liquidity in certain markets, primarily in the U.S.; however, the pace of improvement varies significantly by asset class and market. Accordingly, there continues to be risk and uncertainty surrounding commercial real estate values. Declines in the estimated value of real estate below carrying amount result in impairment losses when the aggregate undiscounted cash flow estimates used in the estimated value measurement are below the carrying amount. As such, estimated losses in the portfolio will not necessarily result in recognized impairment losses. When we recognize an impairment, the impairment is measured using the estimated fair value of the underlying asset, which is based upon cash flow estimates that reflect current and projected lease profiles and available industry information about capitalization rates and expected trends in rents and occupancy and is corroborated by external appraisals. During 2013, Real Estate recognized pre-tax impairments of \$0.3 billion in its real estate held for investment, as compared to \$0.1 billion in 2012. Deterioration in economic conditions or prolonged market illiquidity may result in further impairments being recognized. Furthermore, significant judgment and uncertainty related to forecasted valuation trends, especially in illiquid markets, result in inherent imprecision in real estate value estimates. Further information is provided in the Global Risk Management and the Other assets sections of this Item and in Note 7 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

Goodwill and Other Identified Intangible Assets. We test goodwill for impairment annually and more frequently if circumstances warrant. We determine fair values for each of the reporting units using an income approach. When available and appropriate, we use comparative market multiples to corroborate discounted cash flow results. For purposes of the income approach, fair value is determined based on the present value of estimated future cash flows, discounted at an appropriate risk-adjusted rate. We use our internal forecasts to estimate future cash flows and include an estimate of long-term future growth rates based on our most recent views of the long-term outlook for each business. Actual results may differ from those assumed in our forecasts. We derive our discount rates using a capital asset pricing model and analyzing published rates for industries relevant to our reporting units to estimate the cost of equity financing. We use discount rates that are commensurate with the risks and uncertainty inherent in the respective businesses and in our internally developed forecasts. Discount rates used in our reporting unit valuations ranged from

11.25% to 13.3%. Valuations using the market approach reflect prices and other relevant observable information generated by market transactions involving comparable businesses.

(57)

Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including actual operating results. It is reasonably possible that the judgments and estimates described above could change in future periods.

We review identified intangible assets with defined useful lives and subject to amortization for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Determining whether an impairment loss occurred requires comparing the carrying amount to the sum of undiscounted cash flows expected to be generated by the asset. For our insurance activities remaining in continuing operations, we periodically test for impairment our deferred acquisition costs and present value of future profits.

Further information is provided in the Financial Resources and Liquidity – Goodwill and Other Intangible Assets section of this Item and in Notes 1 and 6 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

Income Taxes. Our annual tax rate is based on our income, statutory tax rates and tax planning opportunities available to us in the various jurisdictions in which we operate. Tax laws are complex and subject to different interpretations by the taxpayer and respective governmental taxing authorities. Significant judgment is required in determining our tax expense and in evaluating our tax positions, including evaluating uncertainties. We review our tax positions quarterly and adjust the balances as new information becomes available. Our income tax rate is significantly affected by the tax rate on our global operations. In addition to local country tax laws and regulations, this rate depends on the extent earnings are indefinitely reinvested outside the United States. Indefinite reinvestment is determined by management’s judgment about and intentions concerning the future operations of the Company. At December 31, 2013 and 2012, approximately \$73 billion and \$72 billion of earnings, respectively, have been indefinitely reinvested outside the United States. Most of these earnings have been reinvested in active non-U.S. business operations, and we do not intend to repatriate these earnings to fund U.S. operations. Because of the availability of U.S. foreign tax credits, it is not practicable to determine the U.S. federal income tax liability that would be payable if such earnings were not reinvested indefinitely.

Deferred income tax assets represent amounts available to reduce income taxes payable on taxable income in future years. Such assets arise because of temporary differences between the financial reporting and tax bases of assets and liabilities, as well as from net operating loss and tax credit carryforwards. We evaluate the recoverability of these future tax deductions and credits by assessing the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. These sources of income rely heavily on estimates. We use our historical experience and our short- and long-range business forecasts to provide insight. Further, our global and diversified business portfolio gives us the opportunity to employ various prudent and feasible tax planning strategies to facilitate the recoverability of future deductions. Amounts recorded for deferred tax assets related to non-U.S. net operating losses, net of valuation allowances, were \$4.6 billion and \$3.9 billion at December 31, 2013 and 2012, respectively, including \$0.8 billion at both December 31, 2013 and 2012 of deferred tax assets, net of valuation allowances, associated with losses reported in discontinued operations, primarily related to our loss on the sale of GE Money Japan. Such year-end 2013 amounts are expected to be fully recoverable within the applicable statutory expiration periods. To the extent we do not consider it more likely than not that a deferred tax asset will be recovered, a valuation allowance is established.

Further information on income taxes is provided in the Operations – Overview section of this Item and in Note 10 to the consolidated financial statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Form 10-K Report.

Derivatives and Hedging. We use derivatives to manage a variety of risks, including risks related to interest rates, foreign exchange and commodity prices. Accounting for derivatives as hedges requires that, at inception and over the term of the arrangement, the hedged item and related derivative meet the requirements for hedge accounting. The rules and interpretations related to derivatives accounting are complex. Failure to apply this complex guidance correctly will result in all changes in the fair value of the derivative being reported in earnings, without regard to the offsetting changes in the fair value of the hedged item.

In evaluating whether a particular relationship qualifies for hedge accounting, we test effectiveness at inception and each reporting period thereafter by determining whether changes in the fair value of the derivative offset, within a specified range, changes in the fair value of the hedged item. If fair value changes fail this test, we discontinue applying hedge accounting to that relationship prospectively. Fair values of both the derivative instrument and the hedged item are calculated using internal valuation models incorporating market-based assumptions, subject to third-party confirmation, as applicable.

At December 31, 2013, derivative assets and liabilities were \$0.5 billion and \$1.0 billion, respectively. Further information about our use of derivatives is provided in Notes 1, 7, 14 and 15 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Fair Value Measurements. Assets and liabilities measured at fair value every reporting period include investments in debt and equity securities and derivatives. Assets that are not measured at fair value every reporting period but that are subject to fair value measurements in certain circumstances include loans and long-lived assets that have been reduced to fair value when they are held for sale, impaired loans that have been reduced based on the fair value of the underlying collateral, cost and equity method investments and long-lived assets that are written down to fair value when they are impaired and the remeasurement of retained investments in formerly consolidated subsidiaries upon a change in control that results in deconsolidation of a subsidiary, if we sell a controlling interest and retain a noncontrolling stake in the entity. Assets that are written down to fair value when impaired and retained investments are not subsequently adjusted to fair value unless further impairment occurs.

A fair value measurement is determined as the price we would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. In the absence of active markets for the identical assets or liabilities, such measurements involve developing assumptions based on market observable data and, in the absence of such data, internal information that is consistent with what market participants would use in a hypothetical transaction that occurs at the measurement date. The determination of fair value often involves significant judgments about assumptions such as determining an appropriate discount rate that factors in both risk and liquidity premiums, identifying the similarities and differences in market transactions, weighting those differences accordingly and then making the appropriate adjustments to those market transactions to reflect the risks specific to our asset being valued. Further information on fair value measurements is provided in Notes 1, 14 and 15 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Other loss contingencies are uncertain and unresolved matters that arise in the ordinary course of business and result from events or actions by others that have the potential to result in a future loss. Such contingencies include, but are not limited to environmental obligations, litigation, regulatory proceedings, product quality and losses resulting from other events and developments.

When a loss is considered probable and reasonably estimable, we record a liability in the amount of our best estimate for the ultimate loss. When there appears to be a range of possible costs with equal likelihood, liabilities are based on the low-end of such range. However, the likelihood of a loss with respect to a particular contingency is often difficult to predict and determining a meaningful estimate of the loss or a range of loss may not be practicable based on the information available and the potential effect of future events and decisions by third parties that will determine the ultimate resolution of the contingency. Moreover, it is not uncommon for such matters to be resolved over many years, during which time relevant developments and new information must be continuously evaluated to determine both the likelihood of potential loss and whether it is possible to reasonably estimate a range of possible loss. When a loss is probable but a reasonable estimate cannot be made, disclosure is provided.

Disclosure also is provided when it is reasonably possible that a loss will be incurred or when it is reasonably possible that the amount of a loss will exceed the recorded provision. We regularly review all contingencies to determine whether the likelihood of loss has changed and to assess whether a reasonable estimate of the loss or range of loss can be made. As discussed above, development of a meaningful estimate of loss or a range of potential loss is complex when the outcome is directly dependent on negotiations with or decisions by third parties, such as regulatory agencies, the court system and other interested parties. Such factors bear directly on whether it is possible to reasonably estimate a range of potential loss and boundaries of high and low estimates.

Further information is provided in Notes 2 and 17 to the consolidated financial statements in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Other Information

New Accounting Standards

In March 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-05, Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity. The ASU resolves conflicting guidance between Accounting Standards Codification (ASC) Subtopics 810-10, Consolidation, and 830-30, Foreign Currency Matters – Translation of Financial Statements, on whether accumulated currency translation adjustments should be released to earnings in certain circumstances. Under the revised guidance, the entire amount of the cumulative translation adjustment associated with the foreign entity will be released into earnings in the following circumstances: (a) the sale of a subsidiary or group of net assets within a foreign entity that represents a complete or substantially complete liquidation of that entity, (b) the loss of a controlling financial interest in an investment in a foreign entity, or (c) when the accounting for an investment in a foreign entity changes from the equity method to full consolidation. The ASU does not change the requirement to release a pro rata portion of the cumulative translation adjustment of the foreign entity into earnings for a partial sale of an equity method investment in a foreign entity. The revised guidance applies prospectively to transactions or events occurring in fiscal years beginning after December 31, 2013.

(60)

Supplemental Information

Financial Measures that Supplement Generally Accepted Accounting Principles

We sometimes use information derived from consolidated financial information but not presented in our financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP). Certain of these data are considered “non-GAAP financial measures” under U.S. Securities and Exchange Commission rules. Specifically, we have referred, in various sections of this Form 10-K Report, to:

- Average GECC shareowners’ equity, excluding effects of discontinued operations
- Ratio of adjusted debt to equity at GECC, net of adjusted cash and equivalents and with classification of hybrid debt as equity
- GE Capital ending net investment (ENI), excluding cash and equivalents

The reasons we use these non-GAAP financial measures and the reconciliations to their most directly comparable GAAP financial measures follow.

Average GECC Shareowners’ Equity, Excluding Effects of Discontinued Operations(a)

December 31 (In millions)	2013	2012	2011	2010	2009
Average GECC shareowners' equity(b)	\$83,358	\$79,956	\$73,852	\$68,490	\$64,689
Less the effects of the average net investment in discontinued operations	(92)	(373)	5,033	13,935	17,546
Average GECC shareowners' equity, excluding effects of discontinued operations(a)	\$83,450	\$80,329	\$68,819	\$54,555	\$47,143

(a) Used for computing return on average shareowners’ equity and return on average total capital invested (ROTC).

(b) On an annual basis, calculated using a five-point average.

Our ROTC calculation excludes earnings (losses) of discontinued operations from the numerator because U.S. GAAP requires us to display those earnings (losses) in the Statement of Earnings. Our calculation of average GECC shareowners’ equity may not be directly comparable to similarly titled measures reported by other companies. We believe that it is a clearer way to measure the ongoing trend in return on total capital for the continuing operations of our businesses given the extent that discontinued operations have affected our reported results. We believe that this results in a more relevant measure for management and investors to evaluate performance of our continuing operations, on a consistent basis, and to evaluate and compare the performance of our continuing operations with the ongoing operations of other businesses and companies.

Ratio of Adjusted Debt to Equity at GECC, Net of Adjusted Cash and Equivalents and with Classification of Hybrid Debt as Equity

December 31 (Dollars in millions)	2013	2012	2011	2010	2009
GECC debt	\$371,062	\$397,039	\$442,830	\$470,363	\$493,224
Add debt of businesses held for sale and discontinued operations	316	403	527	575	7,136
Adjusted GECC debt	371,378	397,442	443,357	470,938	500,360
Less cash and equivalents	74,873	61,853	76,641	60,231	62,565
Less cash of businesses held for sale and discontinued operations	236	265	332	222	1,975
Less hybrid debt	7,725	7,725	7,725	7,725	7,725
	\$288,544	\$327,599	\$358,659	\$402,760	\$428,095
GECC equity	\$82,694	\$81,890	\$77,110	\$68,984	\$70,833
Plus hybrid debt	7,725	7,725	7,725	7,725	7,725
	\$90,419	\$89,615	\$84,835	\$76,709	\$78,558
Ratio	3.19:1	3.66:1	4.23:1	5.25:1	5.45:1

We have provided the GECC ratio of debt to equity on a basis that reflects the use of cash and equivalents as a reduction of debt, and long-term debt due in 2066 and 2067 classified as equity. For purposes of this ratio, we have also adjusted cash and debt balances to include amounts classified as assets and liabilities of businesses held for sale and discontinued operations. We believe that this is a useful comparison to a GAAP-based ratio of debt to equity because cash balances may be used to reduce debt and because this long-term debt has equity-like characteristics. The usefulness of this supplemental measure may be limited, however, as the total amount of cash and equivalents at any point in time may be different than the amount that could practically be applied to reduce outstanding debt, and it may not be advantageous or practical to replace certain long-term debt with equity. Despite these potential limitations, we believe that this measure, considered along with the corresponding GAAP measure, provides investors with additional information that may be more comparable to other financial institutions and businesses.

GE Capital Ending Net Investment (ENI), Excluding Cash and Equivalents

(In billions)	December 31, 2013
GECC total assets	\$516.8
Less assets of discontinued operations	2.3
Less non-interest-bearing liabilities	59.3
GE Capital ENI	455.2
Less cash and equivalents	74.9
GE Capital ENI, excluding cash and equivalents	\$380.3

GE uses ENI to measure the size of its GE Capital segment. GE believes that this measure is a useful indicator of the capital (debt or equity) required to fund a business as it adjusts for non-interest-bearing current liabilities generated in the normal course of business that do not require a capital outlay. GE also believes that by excluding cash and equivalents, it provides a meaningful measure of assets requiring capital to fund its GE Capital segment, as a substantial amount of this cash and equivalents resulted from debt issuances to pre-fund future debt maturities and will not be used to fund additional assets. Providing this measure will help investors measure how we are performing against our previously communicated goal to reduce the size of our financial services segment.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Information about our global risk management can be found in the Operations – Global Risk Management, GE Capital Risk Management and Oversight and Financial Resources and Liquidity and Borrowings – Funding Plan – Exchange Rate and Interest Rate Risks sections in Part II, Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this Form 10-K Report.

Item 8. Financial Statements and Supplementary Data.

Management’s Annual Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. With our participation, an evaluation of the effectiveness of our internal control over financial reporting was conducted as of December 31, 2013, based on the framework and criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 1992.

Based on this evaluation, our management has concluded that our internal control over financial reporting was effective as of December 31, 2013.

Our independent registered public accounting firm has issued an audit report on our internal control over financial reporting. Their report follows.

February 27, 2014

Report of Independent Registered Public Accounting Firm

To the Board of Directors of
General Electric Capital Corporation:

We have audited the accompanying statement of financial position of General Electric Capital Corporation and consolidated affiliates (“GECC”) as of December 31, 2013 and 2012, and the related statements of earnings, comprehensive income, changes in shareowners’ equity and cash flows for each of the years in the three-year period ended December 31, 2013. In connection with our audits of the consolidated financial statements, we also have audited the financial statement schedule as listed in Item 15. We also have audited GECC’s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). GECC’s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company’s internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements and schedule referred to above present fairly, in all material respects, the financial position of GECC as of December 31, 2013 and 2012, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles. Also in our opinion, GECC maintained, in all material respects, effective internal

control over financial reporting as of December 31, 2013, based on criteria established in Internal Control – Integrated Framework (1992) issued by COSO.

Notes to Consolidated Financial Statements

NOTE 1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting Principles

Our financial statements are prepared in conformity with U.S. generally accepted accounting principles (GAAP).

Consolidation

At December 31, 2013, all of our outstanding common stock was owned by General Electric Company (GE Company or GE). Our financial statements consolidate all of our affiliates – entities in which we have a controlling financial interest, most often because we hold a majority voting interest. We also consolidate the economic interests we hold in certain businesses within companies in which we hold a voting equity interest and are majority owned by our ultimate parent, but which we have agreed to actively manage and control.

To determine if we hold a controlling financial interest in an entity, we first evaluate if we are required to apply the variable interest entity (VIE) model to the entity, otherwise the entity is evaluated under the voting interest model. Where we hold current or potential rights that give us the power to direct the activities of a VIE that most significantly impact the VIE's economic performance combined with a variable interest that gives us the right to receive potentially significant benefits or the obligation to absorb potentially significant losses, we have a controlling financial interest in that VIE. Rights held by others to remove the party with power over the VIE are not considered unless one party can exercise those rights unilaterally. When changes occur to the design of an entity we reconsider whether it is subject to the VIE model. We continuously evaluate whether we have a controlling financial interest in a VIE.

We hold a controlling financial interest in other entities where we currently hold, directly or indirectly, more than 50% of the voting rights or where we exercise control through substantive participating rights or as a general partner. Where we are a general partner, we consider substantive removal rights held by other partners in determining if we hold a controlling financial interest. We reevaluate whether we have a controlling financial interest in these entities when our voting or substantive participating rights change.

Associated companies are unconsolidated VIEs and other entities in which we do not have a controlling financial interest, but over which we have significant influence, most often because we hold a voting interest of 20% to 50%. Associated companies are accounted for as equity method investments. Results of associated companies are presented on a one-line basis. Investments in, and advances to, associated companies are presented on a one-line basis in the caption "Other assets" in our Statement of Financial Position, net of allowance for losses, that represents our best estimate of probable losses inherent in such assets.

(70)

Financial Statement Presentation

We have reclassified certain prior-year amounts to conform to the current-year's presentation.

Financial data and related measurements are presented in the following categories:

Consolidated - This represents the adding together of all affiliates, giving effect to the elimination of transactions between affiliates.

Operating Segments - These comprise our five businesses, focused on the broad markets they serve: Commercial Lending and Leasing (CLL), Consumer, Real Estate, Energy Financial Services and GE Capital Aviation Services (GECAS). Prior-period information has been reclassified to be consistent with how we managed our businesses in 2013.

Unless otherwise indicated, information in these notes to consolidated financial statements relates to continuing operations. Certain of our operations have been presented as discontinued. See Note 2.

The effects of translating to U.S. dollars the financial statements of non-U.S. affiliates whose functional currency is the local currency are included in shareowners' equity. Asset and liability accounts are translated at year-end exchange rates, while revenues and expenses are translated at average rates for the respective periods.

Preparing financial statements in conformity with U.S. GAAP requires us to make estimates based on assumptions about current, and for some estimates future, economic and market conditions (for example, unemployment, market liquidity, the real estate market, etc.), which affect reported amounts and related disclosures in our financial statements. Although our current estimates contemplate current conditions and how we expect them to change in the future, as appropriate, it is reasonably possible that in 2014 actual conditions could be worse than anticipated in those estimates, which could materially affect our results of operations and financial position. Among other effects, such changes could result in future impairments of investment securities, goodwill, intangibles and long-lived assets, incremental losses on financing receivables, establishment of valuation allowances on deferred tax assets and increased tax liabilities.

GECC Revenues from Services (Earned Income)

We use the interest method to recognize income on loans. Interest on loans includes origination, commitment and other non-refundable fees related to funding (recorded in earned income on the interest method). We stop accruing interest at the earlier of the time at which collection of an account becomes doubtful or the account becomes 90 days past due, with the exception of consumer credit card accounts. Beginning in the fourth quarter of 2013, we continue to accrue interest on consumer credit cards until the accounts are written off in the period the account becomes 180 days past due. Previously, we stopped accruing interest on consumer credit cards when the account became 90 days past due. Previously recognized interest income that was accrued but not collected from the borrower is reversed, unless the terms of the loan agreement permit capitalization of accrued interest to the principal balance. Although we stop accruing interest in advance of payments, we recognize interest income as cash is collected when appropriate, provided the amount does not exceed that which would have been earned at the historical effective interest rate; otherwise, payments received are applied to reduce the principal balance of the loan.

We resume accruing interest on nonaccrual, non-restructured commercial loans only when (a) payments are brought current according to the loan's original terms and (b) future payments are reasonably assured. When we agree to restructured terms with the borrower, we resume accruing interest only when it is reasonably assured that we will recover full contractual payments, and such loans pass underwriting reviews equivalent to those applied to new loans.

We resume accruing interest on nonaccrual consumer loans when the customer's account is less than 90 days past due and collection of such amounts is probable. Interest accruals on modified consumer loans that are not considered to be troubled debt restructurings (TDRs) may return to current status (re-aged) only after receipt of at least three consecutive minimum monthly payments or the equivalent cumulative amount, subject to a re-aging limitation of once a year, or twice in a five-year period.

(71)

We recognize financing lease income on the interest method to produce a level yield on funds not yet recovered. Estimated unguaranteed residual values are based upon management's best estimates of the value of the leased asset at the end of the lease term. We use various sources of data in determining this estimate, including information obtained from third parties, which is adjusted for the attributes of the specific asset under lease. Guarantees of residual values by unrelated third parties are considered part of minimum lease payments. Significant assumptions we use in estimating residual values include estimated net cash flows over the remaining lease term, anticipated results of future remarketing, and estimated future component part and scrap metal prices, discounted at an appropriate rate.

We recognize operating lease income on a straight-line basis over the terms of underlying leases.

Fees include commitment fees related to loans that we do not expect to fund and line-of-credit fees. We record these fees in earned income on a straight-line basis over the period to which they relate. We record syndication fees in earned income at the time related services are performed, unless significant contingencies exist.

Depreciation and Amortization

The cost of our equipment leased to others on operating leases is depreciated on a straight-line basis to estimated residual value over the lease term or over the estimated economic life of the equipment.

The cost of acquired real estate investments is depreciated on a straight-line basis to the estimated salvage value over the expected useful life or the estimated proceeds upon sale of the investment at the end of the expected holding period if that approach produces a higher measure of depreciation expense.

The cost of intangible assets is generally amortized on a straight-line basis over the asset's estimated economic life. We review long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. See Notes 5 and 6.

Losses on Financing Receivables

Losses on financing receivables are recognized when they are incurred, which requires us to make our best estimate of probable losses inherent in the portfolio. The method for calculating the best estimate of losses depends on the size, type and risk characteristics of the related financing receivable. Such an estimate requires consideration of historical loss experience, adjusted for current conditions, and judgments about the probable effects of relevant observable data, including present economic conditions such as delinquency rates, financial health of specific customers and market sectors, collateral values (including housing price indices as applicable), and the present and expected future levels of interest rates. The underlying assumptions, estimates and assessments we use to provide for losses are updated periodically to reflect our view of current conditions and are subject to the regulatory examination process, which can result in changes to our assumptions. Changes in such estimates can significantly affect the allowance and provision for losses. It is possible that we will experience credit losses that are different from our current estimates. Write-offs are deducted from the allowance for losses when we judge the principal to be uncollectible and subsequent recoveries are added to the allowance at the time cash is received on a written-off account.

"Impaired" loans are defined as larger-balance or restructured loans for which it is probable that the lender will be unable to collect all amounts due according to the original contractual terms of the loan agreement.

"Troubled debt restructurings" (TDRs) are those loans for which we have granted a concession to a borrower experiencing financial difficulties where we do not receive adequate compensation. Such loans are classified as impaired, and are individually reviewed for specific reserves.

(72)

“Nonaccrual financing receivables” are those on which we have stopped accruing interest. We stop accruing interest at the earlier of the time at which collection of an account becomes doubtful or the account becomes 90 days past due, with the exception of consumer credit card accounts, for which we continue to accrue interest until the accounts are written off in the period that the account becomes 180 days past due. Although we stop accruing interest in advance of payments, we recognize interest income as cash is collected when appropriate provided the amount does not exceed that which would have been earned at the historical effective interest rate. Recently restructured financing receivables are not considered delinquent when payments are brought current according to the restructured terms, but may remain classified as nonaccrual until there has been a period of satisfactory payment performance by the borrower and future payments are reasonably assured of collection.

“Nonearning financing receivables” are a subset of nonaccrual financing receivables for which cash payments are not being received or for which we are on the cost recovery method of accounting (i.e., any payments are accounted for as a reduction of principal). This category excludes loans purchased at a discount (unless they have deteriorated post acquisition). These loans are initially recorded at fair value and accrete interest income over the estimated life of the loan based on reasonably estimable cash flows even if the underlying loans are contractually delinquent at acquisition.

Beginning in the fourth quarter of 2013, we revised our methods for classifying financing receivables as nonaccrual and nonearning to more closely align with regulatory guidance. Under the revised methods, we continue to accrue interest on consumer credit cards until the accounts are written off in the period the account becomes 180 days past due. Previously, we stopped accruing interest on consumer credit cards when the account became 90 days past due. In addition, the revised methods limit the use of the cash basis of accounting for nonaccrual financing receivables.

As a result of these revisions, consumer credit card receivables of \$1,051 million that were previously classified as both nonaccrual and nonearning were returned to accrual status in the fourth quarter of 2013. In addition, \$1,524 million of Real Estate and CLL financing receivables previously classified as nonaccrual, paying in accordance with contractual terms and accounted for on the cash basis, were returned to accrual status, while \$2,174 million of financing receivables previously classified as nonaccrual and accounted for on the cash basis (primarily in Real Estate and CLL) were placed into the nonearning category based on our assessment of the short-term outlook for resolution through payoff or refinance.

Given that the revised methods result in nonaccrual and nonearning amounts that are substantially the same, we plan to discontinue the reporting of nonearning financing receivables, one of our internal performance metrics, and report selected ratios related to nonaccrual financing receivables, in the first quarter of 2014.

“Delinquent” receivables are those that are 30 days or more past due based on their contractual terms.

The same financing receivable may meet more than one of the definitions above. Accordingly, these categories are not mutually exclusive and it is possible for a particular loan to meet the definitions of a TDR, impaired loan, nonaccrual loan and nonearning loan and be included in each of these categories. The categorization of a particular loan also may not be indicative of the potential for loss.

Our consumer loan portfolio consists of smaller-balance, homogeneous loans, including credit card receivables, installment loans, auto loans and leases and residential mortgages. We collectively evaluate each portfolio for impairment quarterly. The allowance for losses on these receivables is established through a process that estimates the probable losses inherent in the portfolio based upon statistical analyses of portfolio data. These analyses include migration analysis, in which historical delinquency and credit loss experience is applied to the current aging of the portfolio, together with other analyses that reflect current trends and conditions. We also consider our historical loss experience to date based on actual defaulted loans and overall portfolio indicators including nonearning loans, trends in loan volume and lending terms, credit policies and other observable environmental factors such as unemployment

rates and home price indices.

(73)

Our commercial loan and lease portfolio consists of a variety of loans and leases, including both larger-balance, non-homogeneous loans and leases and smaller-balance homogeneous loans and leases. Losses on such loans and leases are recorded when probable and estimable. We routinely evaluate our entire portfolio for potential specific credit or collection issues that might indicate an impairment.

For larger-balance, non-homogeneous loans and leases, we consider the financial status, payment history, collateral value, industry conditions and guarantor support related to specific customers. Any delinquencies or bankruptcies are indications of potential impairment requiring further assessment of collectibility. We routinely receive financial as well as rating agency reports on our customers, and we elevate for further attention those customers whose operations we judge to be marginal or deteriorating. We also elevate customers for further attention when we observe a decline in collateral values for asset-based loans. While collateral values are not always available, when we observe such a decline, we evaluate relevant markets to assess recovery alternatives – for example, for real estate loans, relevant markets are local; for commercial aircraft loans, relevant markets are global.

Measurement of the loss on our impaired commercial loans is based on the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of collateral, net of expected selling costs, if the loan is determined to be collateral dependent. We determine whether a loan is collateral dependent if the repayment of the loan is expected to be provided solely by the underlying collateral. Our review process can often result in reserves being established in advance of a modification of terms or designation as a TDR. After providing for specific incurred losses, we then determine an allowance for losses that have been incurred in the balance of the portfolio but cannot yet be identified to a specific loan or lease. This estimate is based upon various statistical analyses considering historical and projected default rates and loss severity and aging, as well as our view on current market and economic conditions. It is prepared by each respective line of business. For Real Estate, this includes assessing the probability of default and the loss given default based on loss history of our portfolio for loans with similar loan metrics and attributes.

We consider multiple factors in evaluating the adequacy of our allowance for losses on Real Estate financing receivables, including loan-to-value ratios, collateral values at the individual loan level, debt service coverage ratios, delinquency status, and economic factors including interest rate and real estate market forecasts. In addition to these factors, we evaluate a Real Estate loan for impairment classification if its projected loan-to-value ratio at maturity is in excess of 100%, even if the loan is currently paying in accordance with its contractual terms. Substantially all of the loans in the Real Estate portfolio are considered collateral dependent and are measured for impairment based on the fair value of collateral. If foreclosure is deemed probable or if repayment is dependent solely on the sale of collateral, we also include estimated selling costs in our reserve. Collateral values for our Real Estate loans are determined based upon internal cash flow estimates discounted at an appropriate rate and corroborated by external appraisals, as appropriate. Collateral valuations are routinely monitored and updated annually, or more frequently for changes in collateral, market and economic conditions. Further discussion on determination of fair value is in the Fair Value Measurements section below.

Experience is not available for new products; therefore, while we are developing that experience, we set loss allowances based on our experience with the most closely analogous products in our portfolio.

Our loss mitigation strategy intends to minimize economic loss and, at times, can result in rate reductions, principal forgiveness, extensions, forbearance or other actions, which may cause the related loan to be classified as a TDR.

We utilize certain loan modification programs for borrowers experiencing temporary financial difficulties in our Consumer loan portfolio. These loan modification programs are primarily concentrated in our non-U.S. residential mortgage and non-U.S. installment and revolving portfolios and include short-term (three months or less) interest rate reductions and payment deferrals, which were not part of the terms of the original contract. We sold our U.S.

residential mortgage business in 2007 and, as such, do not participate in the U.S. government-sponsored mortgage modification programs.

(74)

Our allowance for losses on financing receivables on these modified consumer loans is determined based upon a formulaic approach that estimates the probable losses inherent in the portfolio based upon statistical analyses of the portfolio. Data related to redefault experience is also considered in our overall reserve adequacy review. Once the loan has been modified, it returns to current status (re-aged) only after receipt of at least three consecutive minimum monthly payments or the equivalent cumulative amount, subject to a re-aging limitation of once a year, or twice in a five-year period in accordance with the Federal Financial Institutions Examination Council guidelines on Uniform Retail Credit Classification and Account Management policy issued in June 2000. We believe that the allowance for losses would not be materially different had we not re-aged these accounts.

For commercial loans, we evaluate changes in terms and conditions to determine whether those changes meet the criteria for classification as a TDR on a loan-by-loan basis. In Commercial Lending and Leasing (CLL), these changes primarily include: changes to covenants, short-term payment deferrals and maturity extensions. For these changes, we receive economic consideration, including additional fees and/or increased interest rates, and evaluate them under our normal underwriting standards and criteria. Changes to Real Estate's loans primarily include maturity extensions, principal payment acceleration, changes to collateral terms, and cash sweeps, which are in addition to, or sometimes in lieu of, fees and rate increases. The determination of whether these changes to the terms and conditions of our commercial loans meet the TDR criteria includes our consideration of all of the relevant facts and circumstances. When the borrower is experiencing financial difficulty, we carefully evaluate these changes to determine whether they meet the form of a concession. In these circumstances, if the change is deemed to be a concession, we classify the loan as a TDR.

When we repossess collateral in satisfaction of a loan, we write down the receivable against the allowance for losses. Repossessed collateral is included in the caption "Other assets" in the Statement of Financial Position and carried at the lower of cost or estimated fair value less costs to sell.

For Consumer loans, we write off unsecured closed-end installment loans when they are 120 days contractually past due and unsecured open-ended revolving loans at 180 days contractually past due. We write down consumer loans secured by collateral other than residential real estate when such loans are 120 days past due. Consumer loans secured by residential real estate (both revolving and closed-end loans) are written down to the fair value of collateral, less costs to sell, no later than when they become 180 days past due. Unsecured consumer loans in bankruptcy are written off within 60 days of notification of filing by the bankruptcy court or within contractual write-off periods, whichever occurs earlier.

Write-offs on larger-balance impaired commercial loans are based on amounts deemed uncollectible and are reviewed quarterly. Write-offs are determined based on the consideration of many factors, such as expectations of the workout plan or restructuring of the loan, valuation of the collateral and the prioritization of our claim in bankruptcy. Write-offs are recognized against the allowance for losses at the earlier of transaction confirmation (for example, discounted pay-off, restructuring, foreclosure, etc.) or not later than 360 days after initial recognition of a specific reserve for a collateral dependent loan. If foreclosure is probable, the write-off is determined based on the fair value of the collateral less costs to sell. Smaller-balance, homogeneous commercial loans are written off at the earlier of when deemed uncollectible or at 180 days past due.

Partial Sales of Business Interests

Gains or losses on sales of affiliate shares where we retain a controlling financial interest are recorded in equity. Gains or losses on sales that result in our loss of a controlling financial interest are recorded in earnings along with remeasurement gains or losses on any investments in the entity that we retained.

Cash and Equivalents

Debt securities and money market instruments with original maturities of three months or less are included in cash equivalents unless designated as available-for-sale and classified as investment securities.

(75)

Investment Securities

We report investments in debt and marketable equity securities, and certain other equity securities, at fair value. See Note 14 for further information on fair value. Unrealized gains and losses on available-for-sale investment securities are included in shareowners' equity, net of applicable taxes and other adjustments. We regularly review investment securities for impairment using both quantitative and qualitative criteria.

For debt securities, if we do not intend to sell the security or it is not more likely than not that we will be required to sell the security before recovery of our amortized cost, we evaluate other qualitative criteria to determine whether we do not expect to recover the amortized cost basis of the security, such as the financial health of and specific prospects for the issuer, including whether the issuer is in compliance with the terms and covenants of the security. We also evaluate quantitative criteria including determining whether there has been an adverse change in expected future cash flows. If we do not expect to recover the entire amortized cost basis of the security, we consider the security to be other-than-temporarily impaired, and we record the difference between the security's amortized cost basis and its recoverable amount in earnings and the difference between the security's recoverable amount and fair value in other comprehensive income. If we intend to sell the security or it is more likely than not we will be required to sell the security before recovery of its amortized cost basis, the security is also considered other-than-temporarily impaired and we recognize the entire difference between the security's amortized cost basis and its fair value in earnings. For equity securities, we consider the length of time and magnitude of the amount that each security is in an unrealized loss position. If we do not expect to recover the entire amortized cost basis of the security, we consider the security to be other-than-temporarily impaired, and we record the difference between the security's amortized cost basis and its fair value in earnings.

Realized gains and losses are accounted for on the specific identification method. Unrealized gains and losses on investment securities classified as trading and certain retained interests are included in earnings.

Inventories

All inventories are stated at the lower of cost or realizable values. Our inventories consist of finished products held for sale; cost is determined on a first-in, first-out basis.

Goodwill and Other Intangible Assets

We do not amortize goodwill, but test it at least annually for impairment at the reporting unit level. A reporting unit is the operating segment, or one level below that operating segment (the component level) if discrete financial information is prepared and regularly reviewed by segment management. However, components are aggregated as a single reporting unit if they have similar economic characteristics. We recognize an impairment charge if the carrying amount of a reporting unit exceeds its fair value and the carrying amount of the reporting unit's goodwill exceeds the implied fair value of that goodwill. We use discounted cash flows to establish fair values. When available and as appropriate, we use comparative market multiples to corroborate discounted cash flow results. When a portion of a reporting unit is disposed, goodwill is allocated to the gain or loss on disposition based on the relative fair values of the business disposed and the portion of the reporting unit that will be retained.

We amortize the cost of other intangibles over their estimated useful lives. The cost of intangible assets is generally amortized on a straight-line basis over the asset's estimated economic life. Amortizable intangible assets are tested for impairment based on undiscounted cash flows and, if impaired, written down to fair value based on either discounted cash flows or appraised values.

Investment Contracts, Insurance Liabilities and Insurance Annuity Benefits

Certain entities that we consolidate provide guaranteed investment contracts, primarily to states, municipalities and municipal authorities.

(76)

Our insurance activities include providing insurance and reinsurance for life and health risks and providing certain annuity products. Two primary product groups are provided: traditional insurance contracts and investment contracts. Insurance contracts are contracts with significant mortality and/or morbidity risks, while investment contracts are contracts without such risks.

For short-duration insurance contracts, including accident and health insurance, we report premiums as earned income over the terms of the related agreements, generally on a pro-rata basis. For traditional long-duration insurance contracts including long-term care, term, whole life and annuities payable for the life of the annuitant, we report premiums as earned income when due.

Premiums received on investment contracts (including annuities without significant mortality risk) are not reported as revenues but rather as deposit liabilities. We recognize revenues for charges and assessments on these contracts, mostly for mortality, contract initiation, administration and surrender. Amounts credited to policyholder accounts are charged to expense.

Liabilities for traditional long-duration insurance contracts represent the present value of such benefits less the present value of future net premiums based on mortality, morbidity, interest and other assumptions at the time the policies were issued or acquired. Liabilities for investment contracts equal the account value, that is, the amount that accrues to the benefit of the contract or policyholder including credited interest and assessments through the financial statement date. For guaranteed investment contracts, the liability is also adjusted as a result of fair value hedging activity.

Liabilities for unpaid claims and estimated claim settlement expenses represent our best estimate of the ultimate obligations for reported and incurred-but-not-reported claims and the related estimated claim settlement expenses. Liabilities for unpaid claims and estimated claim settlement expenses are continually reviewed and adjusted through current operations.

Fair Value Measurements

For financial assets and liabilities measured at fair value on a recurring basis, fair value is the price we would receive to sell an asset or pay to transfer a liability in an orderly transaction with a market participant at the measurement date. In the absence of active markets for the identical assets or liabilities, such measurements involve developing assumptions based on market observable data and, in the absence of such data, internal information that is consistent with what market participants would use in a hypothetical transaction that occurs at the measurement date.

Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our market assumptions. Preference is given to observable inputs. These two types of inputs create the following fair value hierarchy:

Level 1 Quoted prices for identical instruments in active markets.

–

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

Level 3 Significant inputs to the valuation model are unobservable.

–

(77)

We maintain policies and procedures to value instruments using the best and most relevant data available. In addition, we have risk management teams that review valuation, including independent price validation for certain instruments. With regard to Level 3 valuations (including instruments valued by third parties), we perform a variety of procedures to assess the reasonableness of the valuations. Such reviews, which may be performed quarterly, monthly or weekly, include an evaluation of instruments whose fair value change exceeds predefined thresholds (and/or does not change) and consider the current interest rate, currency and credit environment, as well as other published data, such as rating agency market reports and current appraisals. These reviews are performed within each business by the asset and risk managers, pricing committees and valuation committees. A detailed review of methodologies and assumptions is performed by individuals independent of the business for individual measurements with a fair value exceeding predefined thresholds. This detailed review may include the use of a third-party valuation firm.

Recurring Fair Value Measurements

The following sections describe the valuation methodologies we use to measure different financial instruments at fair value on a recurring basis.

Investments in Debt and Equity Securities. When available, we use quoted market prices to determine the fair value of investment securities, and they are included in Level 1. Level 1 securities primarily include publicly traded equity securities.

For large numbers of investment securities for which market prices are observable for identical or similar investment securities but not readily accessible for each of those investments individually (that is, it is difficult to obtain pricing information for each individual investment security at the measurement date), we obtain pricing information from an independent pricing vendor. The pricing vendor uses various pricing models for each asset class that are consistent with what other market participants would use. The inputs and assumptions to the model of the pricing vendor are derived from market observable sources including: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and other market-related data. Since many fixed income securities do not trade on a daily basis, the methodology of the pricing vendor uses available information as applicable such as benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing. The pricing vendor considers available market observable inputs in determining the evaluation for a security. Thus, certain securities may not be priced using quoted prices, but rather determined from market observable information. These investments are included in Level 2 and primarily comprise our portfolio of corporate fixed income, and government, mortgage and asset-backed securities. In infrequent circumstances, our pricing vendors may provide us with valuations that are based on significant unobservable inputs, and in those circumstances we classify the investment securities in Level 3.

Annually, we conduct reviews of our primary pricing vendor to validate that the inputs used in that vendor's pricing process are deemed to be market observable as defined in the standard. While we are not provided access to proprietary models of the vendor, our reviews have included on-site walk-throughs of the pricing process, methodologies and control procedures for each asset class and level for which prices are provided. Our reviews also include an examination of the underlying inputs and assumptions for a sample of individual securities across asset classes, credit rating levels and various durations, a process we perform each reporting period. In addition, the pricing vendor has an established challenge process in place for all security valuations, which facilitates identification and resolution of potentially erroneous prices. We believe that the prices received from our pricing vendor are representative of prices that would be received to sell the assets at the measurement date (exit prices) and are classified appropriately in the hierarchy.

We use non-binding broker quotes and other third-party pricing services as our primary basis for valuation when there is limited, or no, relevant market activity for a specific instrument or for other instruments that share similar characteristics. We have not adjusted the prices we have obtained. Investment securities priced using non-binding broker quotes and other third-party pricing services are included in Level 3. As is the case with our primary pricing vendor, third-party brokers and other third-party pricing services do not provide access to their proprietary valuation models, inputs and assumptions. Accordingly, our risk management personnel conduct reviews of vendors, as applicable, similar to the reviews performed of our primary pricing vendor. In addition, we conduct internal reviews of pricing for all such investment securities quarterly to ensure reasonableness of valuations used in our financial statements. These reviews are designed to identify prices that appear stale, those that have changed significantly from prior valuations, and other anomalies that may indicate that a price may not be accurate. Based on the information available, we believe that the fair values provided by the brokers and other third-party pricing services are representative of prices that would be received to sell the assets at the measurement date (exit prices).

Derivatives. We use closing prices for derivatives included in Level 1, which are traded either on exchanges or liquid over-the-counter markets.

The majority of our derivatives are valued using internal models. The models maximize the use of market observable inputs including interest rate curves and both forward and spot prices for currencies and commodities. Derivative assets and liabilities included in Level 2 primarily represent interest rate swaps, cross-currency swaps and foreign currency and commodity forward and option contracts.

Derivative assets and liabilities included in Level 3 primarily represent interest rate products that contain embedded optionality or prepayment features.

Non-recurring Fair Value Measurements

Certain assets are measured at fair value on a non-recurring basis. These assets are not measured at fair value on an ongoing basis, but are subject to fair value adjustments only in certain circumstances. These assets can include loans and long-lived assets that have been reduced to fair value when they are held for sale, impaired loans that have been reduced based on the fair value of the underlying collateral, cost and equity method investments and long-lived assets that are written down to fair value when they are impaired and the remeasurement of retained investments in formerly consolidated subsidiaries upon a change in control that results in deconsolidation of a subsidiary, if we sell a controlling interest and retain a noncontrolling stake in the entity. Assets that are written down to fair value when impaired and retained investments are not subsequently adjusted to fair value unless further impairment occurs.

The following sections describe the valuation methodologies we use to measure financial and non-financial instruments accounted for at fair value on a non-recurring basis.

Financing Receivables and Loans Held for Sale. When available, we use observable market data, including pricing on recent closed market transactions, to value loans that are included in Level 2. When this data is unobservable, we use valuation methodologies using current market interest rate data adjusted for inherent credit risk, and such loans are included in Level 3. When appropriate, loans may be valued using collateral values (see Long-Lived Assets below).

Cost and Equity Method Investments. Cost and equity method investments are valued using market observable data such as quoted prices when available. When market observable data is unavailable, investments are valued using a discounted cash flow model, comparative market multiples or a combination of both approaches as appropriate and other third-party pricing sources. These investments are generally included in Level 3.

Investments in private equity, real estate and collective funds are valued using net asset values. The net asset values are determined based on the fair values of the underlying investments in the funds. Investments in private equity and real estate funds are generally included in Level 3 because they are not redeemable at the measurement date. Investments in collective funds are included in Level 2.

Long-lived Assets, including Real Estate. Fair values of long-lived assets, including aircraft and real estate, are primarily derived internally and are based on observed sales transactions for similar assets. In other instances, for example, collateral types for which we do not have comparable observed sales transaction data, collateral values are developed internally and corroborated by external appraisal information. Adjustments to third-party valuations may be performed in circumstances where market comparables are not specific to the attributes of the specific collateral or appraisal information may not be reflective of current market conditions due to the passage of time and the occurrence of market events since receipt of the information. For real estate, fair values are based on discounted cash flow estimates that reflect current and projected lease profiles and available industry information about capitalization rates and expected trends in rents and occupancy and are corroborated by external appraisals. These investments are generally included in Level 2 or Level 3.

Retained Investments in Formerly Consolidated Subsidiaries. Upon a change in control that results in deconsolidation of a subsidiary, the fair value measurement of our retained noncontrolling stake is valued using market observable data such as quoted prices when available, or if not available, an income approach, a market approach, or a combination of both approaches as appropriate. In applying these methodologies, we rely on a number of factors, including actual operating results, future business plans, economic projections, market observable pricing multiples of similar businesses and comparable transactions, and possible control premium. These investments are generally included in Level 1 or Level 3, as appropriate, determined at the time of the transaction.

Accounting Changes

On January 1, 2012, we adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2011-05, an amendment to Accounting Standards Codification (ASC) 220, Comprehensive Income. ASU 2011-05 introduced a new statement, the Consolidated Statement of Comprehensive Income. The amendments affect only the display of those components of equity categorized as other comprehensive income and do not change existing recognition and measurement requirements that determine net earnings.

On January 1, 2012, we adopted FASB ASU 2011-04, an amendment to ASC 820, Fair Value Measurements. ASU 2011-04 clarifies or changes the application of existing fair value measurements, including: that the highest and best use valuation premise in a fair value measurement is relevant only when measuring the fair value of nonfinancial assets; that a reporting entity should measure the fair value of its own equity instrument from the perspective of a market participant that holds that instrument as an asset; to permit an entity to measure the fair value of certain financial instruments on a net basis rather than based on its gross exposure when the reporting entity manages its financial instruments on the basis of such net exposure; that in the absence of a Level 1 input, a reporting entity should apply premiums and discounts when market participants would do so when pricing the asset or liability consistent with the unit of account; and that premiums and discounts related to size as a characteristic of the reporting entity's holding are not permitted in a fair value measurement. Adopting these amendments had no effect on the financial statements.

On July 1, 2011, we adopted FASB ASU 2011-02, an amendment to ASC 310, Receivables. This ASU provides guidance for determining whether the restructuring of a debt constitutes a TDR and requires that such actions be classified as a TDR when there is both a concession and the debtor is experiencing financial difficulties. The amendment also clarifies guidance on a creditor's evaluation of whether it has granted a concession. The amendment applies to restructurings that have occurred subsequent to January 1, 2011. As a result of adopting these amendments

on July 1, 2011, we have classified an additional \$271 million of financing receivables as TDRs and have recorded an increase of \$77 million to our allowance for losses on financing receivables. See Note 4.

(80)

NOTE 2. ASSETS AND LIABILITIES OF BUSINESSES HELD FOR SALE AND DISCONTINUED OPERATIONS

Assets and Liabilities of Businesses Held for Sale

In the first quarter of 2013, we committed to sell our Consumer auto and personal loan business in Portugal. We completed the sale on July 15, 2013 for proceeds of \$83 million.

In the third quarter of 2012, we completed the sale of our CLL business in South Korea for proceeds of \$168 million.

In the second quarter of 2012, we committed to sell a portion of our Business Properties portfolio (Business Property) in Real Estate, including certain commercial loans, the origination and servicing platforms and the servicing rights on loans previously securitized by GECC. We completed the sale of Business Property on October 1, 2012 for proceeds of \$2,406 million. We deconsolidated substantially all Real Estate securitization entities in the fourth quarter of 2012 as servicing rights related to these entities were transferred to the buyer at closing.

Discontinued Operations

Discontinued operations primarily comprised GE Money Japan (our Japanese personal loan business, Lake, and our Japanese mortgage and card businesses, excluding our investment in GE Nissen Credit Co., Ltd.), our U.S. mortgage business (WMC), our U.S. recreational vehicle and marine equipment financing business (Consumer RV Marine), Consumer Mexico, Consumer Singapore, our Consumer home lending operations in Australia and New Zealand (Australian Home Lending), our Consumer mortgage business in Ireland (Consumer Ireland), our CLL trailer services business in Europe (CLL Trailer Services) and our Consumer banking business in Russia (Consumer Russia). Associated results of operations, financial position and cash flows are separately reported as discontinued operations for all periods presented.

Summarized financial information for discontinued operations is shown below.

(In millions)	2013	2012	2011
Operations			
Total revenues (loss)	\$ 186	\$ 190	\$ 1,074
Earnings (loss) from discontinued operations before income taxes	\$ (484)	\$ (585)	\$ (91)
Benefit (provision) for income taxes	211	198	99
Earnings (loss) from discontinued operations, net of taxes	\$ (273)	\$ (387)	\$ 8
Disposal			
Gain (loss) on disposal before income taxes	\$ (2,027)	\$ (792)	\$ (329)
Benefit (provision) for income taxes	246	49	351
Gain (loss) on disposal, net of taxes	\$ (1,781)	\$ (743)	\$ 22
Earnings (loss) from discontinued operations, net of taxes	\$ (2,054)	\$ (1,130)	\$ 30

	December 31, 2013	December 31, 2012
Assets		
Cash and equivalents	\$ 232	\$ 191
Financing Receivables - net	711	793
Property, plant and equipment – net	6	706
Other	1,381	1,616
Assets of discontinued operations	\$ 2,330	\$ 3,306
Liabilities		
Deferred income taxes	\$ 250	\$ 374
Other	3,540	2,289
Liabilities of discontinued operations	\$ 3,790	\$ 2,663

Other assets at December 31, 2013 and 2012, primarily comprised a deferred tax asset for a loss carryforward, which expires principally in 2017 and in part in 2019, related to the sale of our GE Money Japan business.

(81)

GE Money Japan

During the third quarter of 2008, we completed the sale of GE Money Japan, which included our Japanese personal loan business. Under the terms of the sale, we reduced the proceeds from the sale for estimated refund claims in excess of the statutory interest rate. Proceeds from the sale were to be increased or decreased based on the actual claims experienced in accordance with loss-sharing terms specified in the sale agreement, with all claims in excess of 258 billion Japanese yen (approximately \$3,000 million) remaining our responsibility. The underlying portfolio to which this obligation relates is in runoff status and interest rates were capped for all designated accounts by mid-2009. In the third quarter of 2010, we were required to begin making reimbursements under this arrangement.

Overall, excess interest refund claims activity has been difficult to predict and subject to several adverse factors, including the challenging global economic conditions over the last few years, the financial status of other Japanese personal lenders (including the 2010 bankruptcy of a large independent personal loan company), substantial ongoing legal advertising and consumer behavior. Since our disposition of the business, incoming claims have continued to decline; however, the pace and pattern of this decline are highly variable, difficult to predict and can have a significant effect on our estimate of this refund claims obligation.

The terms of the sale agreement provided us with a buyout option to extinguish this obligation at March 31, 2014, and on a biennial basis thereafter if we elected not to exercise our option in 2014. On February 26, 2014, we reached an agreement with the buyer in which we will pay 175 billion Japanese yen (approximately \$1,700 million) to extinguish this obligation.

Our reserve for these refund claims increased from \$700 million at December 31, 2012 to \$1,836 million at December 31, 2013, as increases to the reserve of \$1,645 million during 2013, including \$1,440 million in the fourth quarter, primarily reflecting the February 26, 2014 agreement, were partially offset by refund claims payments of \$361 million and the effects of a strengthening U.S. dollar against the Japanese yen of \$148 million. Our reserve at December 31, 2013 represents the estimated required reimbursements for refund claims through March 31, 2014 in accordance with the 2008 sale agreement and the amount provided for under the 2014 agreement with the buyer.

GE Money Japan earnings (loss) from discontinued operations, net of taxes, were \$(1,636) million, \$(649) million and \$(238) million in 2013, 2012 and 2011, respectively.

WMC

During the fourth quarter of 2007, we completed the sale of WMC, our U.S. mortgage business. WMC substantially discontinued all new loan originations by the second quarter of 2007, and is not a loan servicer. In connection with the sale, WMC retained certain representation and warranty obligations related to loans sold to third parties prior to the disposal of the business and contractual obligations to repurchase previously sold loans as to which there was an early payment default. All claims received by WMC for early payment default have either been resolved or are no longer being pursued.

(82)

Pending repurchase claims based upon representations and warranties made in connection with loan sales were \$5,643 million at December 31, 2013, \$5,357 million at December 31, 2012 and \$705 million at December 31, 2011. Pending claims represent those active repurchase claims that identify the specific loans tendered for repurchase and, for each loan, the alleged breach of a representation or warranty. As such, they do not include unspecified repurchase claims, such as the Litigation Claims discussed below, or claims relating to breaches of representations that were made more than six years before WMC was notified of the claim. WMC believes that these repurchase claims do not meet the substantive and procedural requirements for tender under the governing agreements, would be disallowed in legal proceedings under applicable statutes of limitations or are otherwise invalid. The amounts reported in pending claims reflect the purchase price or unpaid principal balances of the loans at the time of purchase and do not give effect to pay downs, accrued interest or fees, or potential recoveries based upon the underlying collateral. In the fourth quarter of 2013, WMC entered into settlements that reduce its exposure on claims asserted in certain securitizations. Pending claim and Litigation Claim amounts reported herein reflect the impact of these settlements. Historically, a small percentage of the total loans WMC originated and sold have been treated as “validly tendered,” meaning the loan was subject to repurchase because there was a breach of a representation and warranty that materially and adversely affected the value of the loan, and the demanding party met all other procedural and substantive requirements for repurchase.

Reserves related to WMC pending and estimated future loan repurchase claims were \$800 million at December 31, 2013, reflecting a net increase to reserves in the year ended December 31, 2013 of \$167 million due to incremental claim activity and updates to WMC’s estimate of future losses. The amount of the reserve is based upon pending loan repurchase requests, WMC’s historical loss experience and evaluation of claim activity on loans tendered for repurchase.

The following table provides a roll forward of the reserve and pending repurchase claims.

(In millions)	Reserve		(In millions)	Pending claims	
	2013	2012		2013	2012
			Balance at January 1		
Balance at January 1	\$ 633	\$ 143	1	\$ 5,357	\$ 705
Provision	354	500	New claims	1,259	4,838
Claim resolutions/ rescissions	(187)	(10)	Claim resolutions/ rescissions	(973)	(186)
Balance at December 31	\$ 800	\$ 633	Balance at December 31	\$ 5,643	\$ 5,357

Given the significant recent activity in pending claims and related litigation filed in connection with such claims, it is difficult to assess whether future losses will be consistent with WMC’s past experience. Adverse changes to WMC’s assumptions supporting the reserve for pending and estimated future loan repurchase claims may result in an increase to these reserves. For example, a 100% increase in the estimated loss rate on loans tendered (and assuming settlements at current demands), would result in an increase to the reserves of approximately \$525 million.

As of December 31, 2013, there were 17 lawsuits involving claims made against WMC arising from alleged breaches of representations and warranties on mortgage loans included in 15 securitizations. Subsequent to December 31, 2013, three of these lawsuits were dismissed leaving 14 lawsuits remaining. WMC initiated one of the cases as the plaintiff; in the other cases WMC is a defendant. The adverse parties in these cases are securitization trustees or parties claiming to act on their behalf. In 12 of these lawsuits, the adverse parties seek compensatory or other relief for mortgage loans beyond those included in WMC's previously discussed pending claims at December 31, 2013 (Litigation Claims). These Litigation Claims consist of sampling-based claims in two cases on approximately \$600 million of mortgage loans and, in the other ten cases, claims for repurchase or damages based on the alleged failure to provide notice of defective loans, breach of a corporate representation and warranty, and/or non-specific claims for rescissionary damages on approximately \$6,200 million of mortgage loans at December 31, 2013. The dismissal of a lawsuit subsequent to December 31, 2013 decreased the pending claims amount by \$123 million and the Litigation Claims amount by \$318 million. These claims reflect the purchase price or unpaid principal balances of the loans at the time of purchase and do not give effect to pay downs, accrued interest or fees, or potential recoveries based upon the underlying collateral. As noted above, WMC believes that the Litigation Claims conflict with the governing agreements and applicable law. As a result, WMC has not included the Litigation Claims in its pending claims or in its estimates of future loan repurchase requests and holds no related reserve as of December 31, 2013.

At this point, WMC is unable to develop a meaningful estimate of reasonably possible loss in connection with the Litigation Claims described above due to a number of factors, including the extent to which courts will agree with the theories supporting the Litigation Claims. The case law on these issues is unsettled, and while several courts have supported some of the theories underlying WMC's legal defenses, other courts have rejected them. There are a number of pending cases, including WMC cases, which, in the coming months, could provide more certainty regarding the legal status of these claims. An adverse court decision on any of the theories supporting the Litigation Claims could increase WMC's exposure in some or all of the 14 lawsuits, result in a reclassification of some or all of the Litigation Claims to pending claims and provoke new claims and lawsuits on additional loans. However, WMC continues to believe that it has defenses to all the claims asserted in litigation, including, for example, causation and materiality requirements, limitations on remedies for breach of representations and warranties, and the applicable statutes of limitations. To the extent WMC is required to repurchase loans, WMC's loss also would be affected by several factors, including pay downs, accrued interest and fees, and the value of the underlying collateral. It is not possible to predict the outcome or impact of these defenses and other factors, any one of which could materially affect the amount of any loss ultimately incurred by WMC on these claims.

WMC has received claims on approximately \$2,200 million of mortgage loans after the expiration of the statute of limitations as of December 31, 2013, \$1,700 million of which are also included as Litigation Claims. WMC has also received unspecified indemnification demands from depositors/underwriters/sponsors of residential mortgage-backed securities (RMBS) in connection with lawsuits brought by RMBS investors concerning alleged misrepresentations in the securitization offering documents to which WMC is not a party. WMC believes that it has defenses to these demands.

The reserve estimates reflect judgment, based on currently available information, and a number of assumptions, including economic conditions, claim activity, pending and threatened litigation, indemnification demands, estimated repurchase rates, and other activity in the mortgage industry. Actual losses arising from claims against WMC could exceed the reserve amount and additional claims and lawsuits could result if actual claim rates, governmental actions, litigation and indemnification activity, adverse court decisions, settlement activity, actual repurchase rates or losses WMC incurs on repurchased loans differ from its assumptions. It is difficult to develop a meaningful estimate of aggregate possible claims exposure because of uncertainties surrounding economic conditions, the ability and propensity of mortgage loan holders to present and resolve valid claims, governmental actions, mortgage industry activity and litigation, court decisions affecting WMC's defenses, and pending and threatened litigation and indemnification demands against WMC.

WMC revenues and other income (loss) from discontinued operations were \$(346) million, \$(500) million and \$(42) million in 2013, 2012 and 2011, respectively. In total, WMC's earnings (loss) from discontinued operations, net of taxes, were \$(232) million, \$(337) million and \$(34) million in 2013, 2012 and 2011, respectively.

(84)

Other

In the fourth quarter of 2013, we announced the planned disposition of Consumer Russia and classified the business as discontinued operations. Consumer Russia revenues from discontinued operations were \$260 million, \$276 million and \$280 million in 2013, 2012 and 2011, respectively. Consumer Russia earnings (loss) from discontinued operations, net of taxes, were \$(193) million (including a \$170 million loss on the planned disposal), \$33 million and \$87 million in 2013, 2012 and 2011, respectively.

In the first quarter of 2013, we announced the planned disposition of CLL Trailer Services and classified the business as discontinued operations. We completed the sale in the fourth quarter of 2013 for proceeds of \$528 million. CLL Trailer Services revenues from discontinued operations were \$271 million, \$399 million and \$464 million in 2013, 2012 and 2011, respectively. CLL Trailer Services earnings (loss) from discontinued operations, net of taxes, were \$(2) million (including an \$18 million gain on disposal), \$22 million and \$17 million in 2013, 2012 and 2011, respectively.

In the first quarter of 2012, we announced the planned disposition of Consumer Ireland and classified the business as discontinued operations. We completed the sale in the third quarter of 2012 for proceeds of \$227 million. Consumer Ireland revenues from discontinued operations were an insignificant amount, \$7 million and \$13 million in 2013, 2012 and 2011, respectively. Consumer Ireland earnings (loss) from discontinued operations, net of taxes, were \$6 million, \$(195) million (including a \$121 million loss on disposal) and \$(153) million in 2013, 2012 and 2011, respectively.

In the second quarter of 2011, we entered into an agreement to sell our Australian Home Lending operations and classified it as discontinued operations. As a result, we recognized an after-tax loss of \$148 million in 2011. We completed the sale in the third quarter of 2011 for proceeds of approximately \$4,577 million. Australian Home Lending revenues from discontinued operations were an insignificant amount, \$4 million and \$250 million in 2013, 2012 and 2011, respectively. Australian Home Lending earnings (loss) from discontinued operations, net of taxes, were \$14 million, \$6 million and \$(65) million in 2013, 2012 and 2011, respectively.

In the first quarter of 2011, we entered into an agreement to sell our Consumer Singapore business for \$692 million. The sale was completed in the second quarter of 2011. Consumer Singapore revenues from discontinued operations were \$1 million, an insignificant amount and \$30 million in 2013, 2012 and 2011, respectively. Consumer Singapore earnings (loss) from discontinued operations, net of taxes, were \$1 million, \$2 million and \$333 million (including a \$319 million gain on disposal) in 2013, 2012 and 2011, respectively.

The Consumer RV Marine and Consumer Mexico dispositions were completed during the first quarter and the second quarter of 2011, respectively, for proceeds of \$2,365 million and \$1,943 million, respectively. Consumer RV Marine revenues from discontinued operations were an insignificant amount, \$1 million and \$11 million in 2013, 2012 and 2011, respectively. Consumer RV Marine earnings (loss) from discontinued operations, net of taxes, were \$(1) million, an insignificant amount and \$2 million in 2013, 2012 and 2011, respectively. Consumer Mexico revenues from discontinued operations were an insignificant amount, \$2 million and \$67 million in 2013, 2012 and 2011, respectively. Consumer Mexico earnings (loss) from discontinued operations, net of taxes, were \$(11) million, \$(12) million and \$30 million in 2013, 2012 and 2011, respectively.

NOTE 3. INVESTMENT SECURITIES

Substantially all of our investment securities are classified as available-for-sale. These comprise mainly investment-grade debt securities supporting obligations to annuitants and policyholders in our run-off insurance operations and supporting obligations to holders of guaranteed investment contracts (GICs) in Trinity and investments held in our CLL business collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries. We do not have any securities classified as held-to-maturity.

(a) Substantially collateralized by U.S. mortgages. Of our total RMBS portfolio at December 31, 2013, \$1,224 million relates to securities issued by government-sponsored entities and \$686 million relates to securities of private label issuers. Securities issued by private label issuers are collateralized primarily by pools of individual direct mortgage loans of financial institutions.

The fair value of investment securities decreased to \$43,662 million at December 31, 2013, from \$48,439 million at December 31, 2012, primarily due to the sale of U.S. government and federal agency securities at our treasury operations and the impact of higher interest rates.

(86)

The following tables present the estimated fair values and gross unrealized losses of our available-for-sale investment securities.

(a) Includes gross unrealized losses at December 31, 2013 of \$(99) million related to securities that had other-than-temporary impairments previously recognized.

We regularly review investment securities for impairment using both qualitative and quantitative criteria. We presently do not intend to sell the vast majority of our debt securities that are in an unrealized loss position and believe that it is not more likely than not that we will be required to sell these securities before recovery of our amortized cost. We believe that the unrealized loss associated with our equity securities will be recovered within the foreseeable future.

Substantially all of our U.S. corporate debt securities are rated investment grade by the major rating agencies. We evaluate U.S. corporate debt securities based on a variety of factors, such as the financial health of and specific prospects for the issuer, including whether the issuer is in compliance with the terms and covenants of the security. In the event a U.S. corporate debt security is deemed to be other-than-temporarily impaired, we isolate the credit portion of the impairment by comparing the present value of our expectation of cash flows to the amortized cost of the security. We discount the cash flows using the original effective interest rate of the security.

The vast majority of our RMBS have investment-grade credit ratings from the major rating agencies and are in a senior position in the capital structure of the deals. Of our total RMBS at December 31, 2013 and 2012, approximately \$378 million and \$471 million, respectively, relate to residential subprime credit, primarily supporting our guaranteed investment contracts. These are collateralized primarily by pools of individual, direct mortgage loans (a majority of which were originated in 2006 and 2005), not other structured products such as collateralized debt obligations. In addition, of the total residential subprime credit exposure at December 31, 2013 and 2012, approximately \$285 million and \$219 million, respectively, was insured by Monoline insurers (Monolines) on which we continue to place reliance.

(87)

Our commercial mortgage-backed securities (CMBS) portfolio is collateralized by both diversified pools of mortgages that were originated for securitization (conduit CMBS) and pools of large loans backed by high-quality properties (large-loan CMBS), a majority of which were originated in 2007 and 2006. The vast majority of the securities in our CMBS portfolio have investment-grade credit ratings and are in a senior position in the capital structure of the deals.

Our asset-backed securities (ABS) portfolio is collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries, as well as a variety of diversified pools of assets such as student loans and credit cards. The vast majority of our ABS are in a senior position in the capital structure of the deals. In addition, substantially all of the securities that are below investment grade are in an unrealized gain position.

For ABS and RMBS, we estimate the portion of loss attributable to credit using a discounted cash flow model that considers estimates of cash flows generated from the underlying collateral. Estimates of cash flows consider credit risk, interest rate and prepayment assumptions that incorporate management's best estimate of key assumptions of the underlying collateral, including default rates, loss severity and prepayment rates. For CMBS, we estimate the portion of loss attributable to credit by evaluating potential losses on each of the underlying loans in the security. Collateral cash flows are considered in the context of our position in the capital structure of the deals. Assumptions can vary widely depending upon the collateral type, geographic concentrations and vintage.

If there has been an adverse change in cash flows for RMBS, management considers credit enhancements such as monoline insurance (which are features of a specific security). In evaluating the overall credit worthiness of the Monoline, we use an analysis that is similar to the approach we use for corporate bonds, including an evaluation of the sufficiency of the Monoline's cash reserves and capital, ratings activity, whether the Monoline is in default or default appears imminent, and the potential for intervention by an insurance or other regulator.

During 2013, we recorded pre-tax, other-than-temporary impairments of \$778 million, of which \$747 million was recorded through earnings (\$15 million relates to equity securities), of which \$96 million related to the impairment of an investment in a Brazilian company that was fully offset by the benefit of a guarantee provided by GE, and \$31 million was recorded in accumulated other comprehensive income (AOCI). At January 1, 2013, cumulative impairments recognized in earnings associated with debt securities still held were \$420 million. During 2013, we recognized first-time impairments of \$389 million and incremental charges on previously impaired securities of \$336 million. Of these cumulative amounts recognized through December 31, 2013, \$120 million related to securities that were subsequently sold before the end of 2013.

During 2012, we recorded pre-tax, other-than-temporary impairments of \$192 million, of which \$140 million was recorded through earnings (\$38 million relates to equity securities) and \$52 million was recorded in AOCI. At January 1, 2012, cumulative impairments recognized in earnings associated with debt securities still held were \$558 million. During 2012, we recognized first-time impairments of \$27 million and incremental charges on previously impaired securities of \$40 million. Of these cumulative amounts recognized through December 31, 2012, \$219 million related to securities that were subsequently sold before the end of 2012.

During 2011, we recorded pre-tax, other-than-temporary impairments of \$467 million, of which \$387 million was recorded through earnings (\$81 million relates to equity securities) and \$80 million was recorded in AOCI. At January 1, 2011, cumulative impairments recognized in earnings associated with debt securities still held were \$332 million. During 2011, we recognized first-time impairments of \$58 million and incremental charges on previously impaired securities of \$230 million. Of these cumulative amounts recognized through December 31, 2011, \$62 million related to securities that were subsequently sold before the end of 2011.

Contractual Maturities of our Investment in Available-for-Sale Debt Securities (Excluding Mortgage-Backed and Asset-Backed Securities)

(In millions)	Amortized cost	Estimated fair value
Due		
Within one year	\$2,366	\$2,374
After one year through five years	3,300	3,502
After five years through ten years	4,984	5,156
After ten years	18,024	19,901

We expect actual maturities to differ from contractual maturities because borrowers have the right to call or prepay certain obligations.

Supplemental information about gross realized gains and losses on available-for-sale investment securities follows.

(In millions)	2013	2012	2011
Gains	\$239	\$177	\$205
Losses, including impairments	(762)	(211)	(402)
Net	\$(523)	\$(34)	\$(197)

Although we generally do not have the intent to sell any specific securities at the end of the period, in the ordinary course of managing our investment securities portfolio, we may sell securities prior to their maturities for a variety of reasons, including diversification, credit quality, yield and liquidity requirements and the funding of claims and obligations to policyholders. In some of our bank subsidiaries, we maintain a certain level of purchases and sales volume principally of non-U.S. government debt securities. In these situations, fair value approximates carrying value for these securities.

Proceeds from investment securities sales and early redemptions by issuers totaled \$15,262 million, \$12,792 million and \$15,606 million in 2013, 2012 and 2011, respectively, principally from the sale of short-term securities in our bank subsidiaries and treasury operations.

We recognized pre-tax gains on trading securities of \$39 million, \$20 million and \$22 million in 2013, 2012 and 2011, respectively.

NOTE 4. FINANCING RECEIVABLES, ALLOWANCE FOR LOSSES ON FINANCING RECEIVABLES AND SUPPLEMENTAL INFORMATION ON CREDIT QUALITY

December 31 (In millions)	2013	2012
Loans, net of deferred income(a)	\$231,268	\$240,634
Investment in financing leases, net of deferred income	26,939	32,471
	258,207	273,105
Less allowance for losses	(5,178)	(4,944)

Financing receivables – net(b)	\$253,029	\$268,161
--------------------------------	-----------	-----------

(a) Deferred income was \$2,013 million and \$2,184 million at December 31, 2013 and 2012, respectively.

(b) Financing receivables at December 31, 2013 and 2012 included \$544 million and \$750 million, respectively, relating to loans that had been acquired in a transfer but have been subject to credit deterioration since origination.

(89)

GECC financing receivables include both loans and financing leases. Loans represent transactions in a variety of forms, including revolving charge and credit, mortgages, installment loans, intermediate-term loans and revolving loans secured by business assets. The portfolio includes loans carried at the principal amount on which finance charges are billed periodically, and loans carried at gross book value, which includes finance charges.

Investment in financing leases consists of direct financing and leveraged leases of aircraft, railroad rolling stock, autos, other transportation equipment, data processing equipment, medical equipment, commercial real estate and other manufacturing, power generation, and commercial equipment and facilities.

For federal income tax purposes, the leveraged leases and the majority of the direct financing leases are leases in which GECC depreciates the leased assets and is taxed upon the accrual of rental income. Certain direct financing leases are loans for federal income tax purposes. For these transactions, GECC is taxed only on the portion of each payment that constitutes interest, unless the interest is tax-exempt (e.g., certain obligations of state governments).

Investment in direct financing and leveraged leases represents net unpaid rentals and estimated unguaranteed residual values of leased equipment, less related deferred income. GECC has no general obligation for principal and interest on notes and other instruments representing third-party participation related to leveraged leases; such notes and other instruments have not been included in liabilities but have been offset against the related rentals receivable. The GECC share of rentals receivable on leveraged leases is subordinate to the share of other participants who also have security interests in the leased equipment. For federal income tax purposes, GECC is entitled to deduct the interest expense accruing on non-recourse financing related to leveraged leases.

Net Investment in Financing Leases

December 31 (In millions)	Total financing leases		Direct financing leases(a)		Leveraged leases(b)	
	2013	2012	2013	2012	2013	2012
Total minimum lease payments receivable	\$29,970	\$36,451	\$24,571	\$29,416	\$5,399	\$7,035
Less principal and interest on third-party non-recourse debt	(3,480)	(4,662)	-	-	(3,480)	(4,662)
Net rentals receivables	26,490	31,789	24,571	29,416	1,919	2,373
Estimated unguaranteed residual value of leased assets	5,073	6,346	3,067	4,272	2,006	2,074
Less deferred income	(4,624)	(5,664)	(3,560)	(4,453)	(1,064)	(1,211)
Investment in financing leases, net of deferred income	26,939	32,471	24,078	29,235	2,861	3,236
Less amounts to arrive at net investment						
Allowance for losses	(202)	(198)	(192)	(193)	(10)	(5)
Deferred taxes	(4,075)	(4,506)	(1,783)	(2,245)	(2,292)	(2,261)
Net investment in financing leases	\$22,662	\$27,767	\$22,103	\$26,797	\$559	\$970

- (a) Included \$317 million and \$330 million of initial direct costs on direct financing leases at December 31, 2013 and 2012, respectively.
- (b) Included pre-tax income of \$31 million and \$81 million and income tax of \$11 million and \$32 million during 2013 and 2012, respectively. Net investment credits recognized on leveraged leases during 2013 and 2012 were insignificant.

(90)

Contractual Maturities

(In millions)	Total loans	Net rentals receivable
Due in		
2014	\$54,971	\$8,184

Credit Quality Indicators

We provide further detailed information about the credit quality of our Commercial, Real Estate and Consumer financing receivables portfolios. For each portfolio, we describe the characteristics of the financing receivables and

provide information about collateral, payment performance, credit quality indicators, and impairment. We manage these portfolios using delinquency and nonearning data as key performance indicators. The categories used within this section such as impaired loans, TDR and nonaccrual financing receivables are defined by the authoritative guidance and we base our categorization on the related scope and definitions contained in the related standards. The categories of nonearning and delinquent are defined by us and are used in our process for managing our financing receivables. Definitions of these categories are provided in Note 1.

(94)

Past Due Financing Receivables

(a) During the fourth quarter of 2013, we revised our methods for classifying financing receivables as nonaccrual and nonearning to more closely align with regulatory guidance. Given that the revised methods result in nonaccrual and nonearning amounts that are substantially the same we plan to discontinue the reporting of nonearning financing receivables in the first quarter of 2014. Further information on our nonaccrual and nonearning financing

receivables is provided in Note 1 to the consolidated financial statements.

- (b) Included \$1,397 million and \$2,647 million at December 31, 2013 and 2012, respectively, that are currently paying in accordance with their contractual terms.
- (c) Included \$2,308 million and \$4,461 million at December 31, 2013 and 2012, respectively, that are currently paying in accordance with their contractual terms.
- (d) Included \$527 million and \$734 million at December 31, 2013 and 2012, respectively, that are currently paying in accordance with their contractual terms.

(a) We recognized \$218 million and \$253 million of interest income, including \$60 million and \$92 million on a cash basis, for the years ended December 31, 2013 and 2012, respectively, principally in our CLL Americas business. The total average investment in impaired loans for the years ended December 31, 2013 and 2012 was \$4,445 million and \$5,688 million, respectively.

(b) We recognized \$187 million and \$329 million of interest income, including \$135 million and \$237 million on a cash basis, for the years ended December 31, 2013 and 2012, respectively. The total average investment in impaired loans for the years ended December 31, 2013 and 2012 was \$4,746 million and \$7,525 million, respectively.

(c) We recognized \$221 million and \$168 million of interest income, including \$3 million and \$4 million on a cash basis, for the years ended December 31, 2013 and 2012, respectively, principally in our Consumer U.S. installment and revolving credit portfolios. The total average investment in impaired loans for the years ended December 31, 2013 and 2012 was \$3,156 million and \$3,049 million, respectively.

Consumer		
Non-impaired financing receivables	\$106,051	\$111,141
General reserves	3,414	2,910
Impaired loans	2,988	3,208
Specific reserves	567	673
Total		
Non-impaired financing receivables	\$247,467	\$259,135
General reserves	4,209	3,596
Impaired loans	10,740	13,970
Specific reserves	969	1,348

Impaired loans classified as TDRs in our CLL business were \$2,961 million and \$3,872 million at December 31, 2013 and 2012, respectively, and were primarily attributable to CLL Americas (\$1,770 million and \$2,577 million, respectively). For the year ended December 31, 2013, we modified \$1,509 million of loans classified as TDRs, primarily in CLL Americas (\$737 million). Changes to these loans primarily included extensions, interest-only payment periods, debt to equity exchange and forbearance or other actions, which are in addition to, or sometimes in lieu of, fees and rate increases. Of our \$1,509 million and \$2,936 million of modifications classified as TDRs during 2013 and 2012, respectively, \$71 million and \$217 million have subsequently experienced a payment default in 2013 and 2012, respectively.

Real Estate TDRs decreased from \$5,146 million at December 31, 2012 to \$3,625 million at December 31, 2013, primarily driven by resolution of TDRs through paydowns, partially offset by extensions of loans scheduled to mature during 2013, some of which were classified as TDRs upon modification. We deem loan modifications to be TDRs when we have granted a concession to a borrower experiencing financial difficulty and we do not receive adequate compensation in the form of an effective interest rate that is at current market rates of interest given the risk characteristics of the loan or other consideration that compensates us for the value of the concession. The limited

liquidity and higher return requirements in the real estate market for loans with higher loan-to-value (LTV) ratios have typically resulted in the conclusion that the modified terms are not at current market rates of interest, even if the modified loans are expected to be fully recoverable. For the year ended December 31, 2013, we modified \$1,595 million of loans classified as TDRs. Changes to these loans primarily included maturity extensions, principal payment acceleration, changes to collateral or covenant terms and cash sweeps, which are in addition to, or sometimes in lieu of, fees and rate increases. Of our \$1,595 million and \$4,351 million of modifications classified as TDRs during 2013 and 2012, respectively, \$197 million and \$210 million have subsequently experienced a payment default in 2013 and 2012, respectively.

The vast majority of our Consumer nonaccrual financing receivables are smaller-balance homogeneous loans evaluated collectively, by portfolio, for impairment and therefore are outside the scope of the disclosure requirement for impaired loans. Accordingly, impaired loans in our Consumer business represent restructured smaller-balance homogeneous loans meeting the definition of a TDR, and are therefore subject to the disclosure requirement for impaired loans, and commercial loans in our Consumer–Other portfolio. The recorded investment of these impaired

(98)

loans totaled \$2,988 million (with an unpaid principal balance of \$3,101 million) and comprised \$109 million with no specific allowance, primarily all in our Consumer–Other portfolio, and \$2,879 million with a specific allowance of \$567 million at December 31, 2013. The impaired loans with a specific allowance included \$261 million with a specific allowance of \$35 million in our Consumer–Other portfolio and \$2,618 million with a specific allowance of \$532 million across the remaining Consumer business and had an unpaid principal balance and average investment of \$2,948 million and \$3,058 million, respectively, at December 31, 2013.

Impaired loans classified as TDRs in our Consumer business were \$2,874 million and \$3,041 million at December 31, 2013 and 2012, respectively. We utilize certain loan modification programs for borrowers experiencing financial difficulties in our Consumer loan portfolio. These loan modification programs primarily include interest rate reductions and payment deferrals in excess of three months, which were not part of the terms of the original contract, and are primarily concentrated in our non-U.S. residential mortgage and U.S. credit card portfolios. For the year ended December 31, 2013, we modified \$1,441 million of consumer loans for borrowers experiencing financial difficulties, which are classified as TDRs, and included \$879 million of non-U.S. consumer loans, primarily residential mortgages, credit cards and personal loans and \$562 million of U.S. consumer loans, primarily credit cards. We expect borrowers whose loans have been modified under these programs to continue to be able to meet their contractual obligations upon the conclusion of the modification. Of our \$1,441 million and \$1,751 million of modifications classified as TDRs during 2013 and 2012, respectively, \$266 million and \$334 million have subsequently experienced a payment default in 2013 and 2012, respectively.

SUPPLEMENTAL CREDIT QUALITY INFORMATION

Commercial

Substantially all of our Commercial financing receivables portfolio is secured lending and we assess the overall quality of the portfolio based on the potential risk of loss measure. The metric incorporates both the borrower's credit quality along with any related collateral protection.

Our internal risk ratings process is an important source of information in determining our allowance for losses and represents a comprehensive, statistically validated approach to evaluate risk in our financing receivables portfolios. In deriving our internal risk ratings, we stratify our Commercial portfolios into 21 categories of default risk and/or six categories of loss given default to group into three categories: A, B and C. Our process starts by developing an internal risk rating for our borrowers, which is based upon our proprietary models using data derived from borrower financial statements, agency ratings, payment history information, equity prices and other commercial borrower characteristics. We then evaluate the potential risk of loss for the specific lending transaction in the event of borrower default, which takes into account such factors as applicable collateral value, historical loss and recovery rates for similar transactions, and our collection capabilities. Our internal risk ratings process and the models we use are subject to regular monitoring and validation controls. The frequency of rating updates is set by our credit risk policy, which requires annual Risk Committee approval. The models are updated on a regular basis and statistically validated annually, or more frequently as circumstances warrant.

The table below summarizes our Commercial financing receivables by risk category. As described above, financing receivables are assigned one of 21 risk ratings based on our process and then these are grouped by similar characteristics into three categories in the table below. Category A is characterized by either high-credit-quality borrowers or transactions with significant collateral coverage that substantially reduces or eliminates the risk of loss in the event of borrower default. Category B is characterized by borrowers with weaker credit quality than those in Category A, or transactions with moderately strong collateral coverage that minimizes but may not fully mitigate the risk of loss in the event of default. Category C is characterized by borrowers with higher levels of default risk relative

to our overall portfolio or transactions where collateral coverage may not fully mitigate a loss in the event of default.

(a) During 2013, we transferred our European equipment services portfolio from CLL Other to CLL Europe. Prior-period amounts were reclassified to conform to the current period presentation.

For our secured financing receivables portfolio, our collateral position and ability to work out problem accounts mitigates our losses. Our asset managers have deep industry expertise that enables us to identify the optimum approach to default situations. We price risk premiums for weaker credits at origination, closely monitor changes in

creditworthiness through our risk ratings and watch list process, and are engaged early with deteriorating credits to minimize economic loss. Secured financing receivables within risk Category C are predominantly in our CLL businesses and are primarily composed of senior term lending facilities and factoring programs secured by various asset types including inventory, accounts receivable, cash, equipment and related business facilities as well as franchise finance activities secured by underlying equipment.

Loans within Category C are reviewed and monitored regularly, and classified as impaired when it is probable that they will not pay in accordance with contractual terms. Our internal risk rating process identifies credits warranting closer monitoring; and as such, these loans are not necessarily classified as nonearning or impaired.

Our unsecured Commercial financing receivables portfolio is primarily attributable to our Interbanca S.p.A. and GE Sanyo Credit acquisitions in Europe and Asia, respectively. At December 31, 2013 and 2012, these financing receivables included \$313 million and \$458 million rated A, \$580 million and \$583 million rated B, and \$231 million and \$452 million rated C, respectively.

(100)

Real Estate

Due to the primarily non-recourse nature of our Debt portfolio, loan-to-value ratios provide the best indicators of the credit quality of the portfolio.

December 31 (In millions)	Loan-to-value ratio					
	2013		2012			
	Less than 80%	80% to 95%	Greater than 95%	Less than 80%	80% to 95%	Greater than 95%
Debt	\$ 15,576	\$ 1,300	\$ 2,111	\$ 13,570	\$ 2,572	\$ 3,604

By contrast, the credit quality of the owner occupied/credit tenant portfolio is primarily influenced by the strength of the borrower's general credit quality, which is reflected in our internal risk rating process, consistent with the process we use for our Commercial portfolio. At December 31, 2013, the internal risk rating of A, B and C for our owner occupied/credit tenant portfolio approximated \$571 million, \$179 million and \$162 million, respectively, as compared to December 31, 2012, ratings of \$956 million, \$25 million and \$219 million, respectively.

Within Real Estate-Debt, these financing receivables are primarily concentrated in our North American and European Lending platforms and are secured by various property types. A substantial majority of the Real Estate-Debt financing receivables with loan-to-value ratios greater than 95% are paying in accordance with contractual terms. Substantially all of these loans and the majority of our owner occupied/credit tenant financing receivables included in Category C are impaired loans that are subject to the specific reserve evaluation process described in Note 1. The ultimate recoverability of impaired loans is driven by collection strategies that do not necessarily depend on the sale of the underlying collateral and include full or partial repayments through third-party refinancing and restructurings.

Consumer

At December 31, 2013, our U.S. consumer financing receivables included private-label credit card and sales financing for approximately 61 million customers across the U.S. with no metropolitan area accounting for more than 6% of the portfolio. Of the total U.S. consumer financing receivables, approximately 67% relate to credit card loans that are often subject to profit and loss-sharing arrangements with the retailer (which are recorded in revenues), and the remaining 33% are sales finance receivables that provide financing to customers in areas such as electronics, recreation, medical and home improvement.

Our Consumer financing receivables portfolio comprises both secured and unsecured lending. Secured financing receivables comprise residential loans and lending to small and medium-sized enterprises predominantly secured by auto and equipment, inventory finance and cash flow loans. Unsecured financing receivables include private-label credit card financing. A substantial majority of these cards are not for general use and are limited to the products and services sold by the retailer. The private-label portfolio is diverse with no metropolitan area accounting for more than 6% of the related portfolio.

Non-U.S. residential mortgages

For our secured non-U.S. residential mortgage book, we assess the overall credit quality of the portfolio through loan-to-value ratios (the ratio of the outstanding debt on a property to the value of that property at origination). In the event of default and repossession of the underlying collateral, we have the ability to remarket and sell the properties to eliminate or mitigate the potential risk of loss. The table below provides additional information about our non-U.S.

residential mortgages based on loan-to-value ratios.

December 31 (In millions)	Loan-to-value ratio					
	80% or less	2013 Greater than 80% to 90%	Greater than 90%	80% or less	2012 Greater than 80% to 90%	Greater than 90%
Non-U.S. residential mortgages	\$ 17,224	\$ 5,130	\$ 8,147	\$ 18,568	\$ 5,699	\$ 9,083

(101)

The majority of these financing receivables are in our U.K. and France portfolios and have re-indexed loan-to-value ratios of 77% and 56%, respectively. Re-indexed loan-to-value ratios may not reflect actual realizable values of future repossessions. We have third-party mortgage insurance for about 24% of the balance of Consumer non-U.S. residential mortgage loans with loan-to-value ratios greater than 90% at December 31, 2013. Such loans were primarily originated in France and the U.K.

Installment and Revolving Credit

For our unsecured lending products, including the non-U.S. and U.S. installment and revolving credit and non-U.S. auto portfolios, we assess overall credit quality using internal and external credit scores. Our internal credit scores imply a probability of default that we consistently translate into three approximate credit bureau equivalent credit score categories, including (a) 671 or higher, which are considered the strongest credits; (b) 626 to 670, which are considered moderate credit risk; and (c) 625 or less, which are considered weaker credits.

(In millions)	Internal ratings translated to approximate credit bureau equivalent score					
	2013			2012		
	671 or higher	626 to 670	625 or less	671 or higher	626 to 670	625 or less
Non-U.S. installment and revolving credit	\$ 8,310	\$ 2,855	\$ 2,512	\$ 10,228	\$ 4,267	\$ 3,321
U.S. installment and revolving credit	36,723	11,101	8,030	33,204	9,753	7,896
Non-U.S. auto	1,395	373	286	3,141	666	453

Of those financing receivable accounts with credit bureau equivalent scores of 625 or less at December 31, 2013, 97% relate to installment and revolving credit accounts. These smaller-balance accounts have an average outstanding balance less than one thousand U.S. dollars and are primarily concentrated in our retail card and sales finance receivables in the U.S. (which are often subject to profit and loss-sharing arrangements), and closed-end loans outside the U.S., which minimizes the potential for loss in the event of default. For lower credit scores, we adequately price for the incremental risk at origination and monitor credit migration through our risk ratings process. We continuously adjust our credit line underwriting management and collection strategies based on customer behavior and risk profile changes.

Consumer – Other

Secured lending in Consumer – Other comprises loans to small and medium-sized enterprises predominantly secured by auto and equipment, inventory finance and cash flow loans. We develop our internal risk ratings for this portfolio in a manner consistent with the process used to develop our Commercial credit quality indicators, described above. We use the borrower's credit quality and underlying collateral strength to determine the potential risk of loss from these activities.

At December 31, 2013, Consumer – Other financing receivables of \$6,137 million, \$315 million and \$501 million were rated A, B and C, respectively. At December 31, 2012, Consumer – Other financing receivables of \$6,873 million, \$451 million and \$746 million were rated A, B and C, respectively.

NOTE 5. PROPERTY, PLANT AND EQUIPMENT

December 31 (Dollars in millions)	Depreciable lives-new (in years)	2013	2012
Original cost(b)			
Land and improvements, buildings, structures and related equipment	1-35 (a) \$	2,504	\$ 2,485
Equipment leased to others			
Aircraft (c)	20	50,337	49,954
Vehicles	1-20	14,656	15,952
Railroad rolling stock	4-50	4,636	4,180
Construction and manufacturing	1-30	2,916	3,055
All other	7-27	3,518	3,427
Total		\$ 78,567	\$ 79,053
Net carrying value(b)			
Land and improvements, buildings, structures and related equipment		\$ 1,025	\$ 999
Equipment leased to others			
Aircraft(c)		34,938	36,231
Vehicles		8,312	8,634
Railroad rolling stock		3,129	2,744
Construction and manufacturing		1,955	2,069
All other		2,248	2,290
Total		\$ 51,607	\$ 52,967

(a) Depreciable lives exclude land.

(b) Included \$1,353 million and \$1,466 million of original cost of assets leased to GE with accumulated amortization of \$342 million and \$451 million at December 31, 2013 and 2012, respectively.

(c) GECAS recognized impairment losses of \$732 million and \$242 million in 2013 and 2012, respectively. These losses are recorded in the caption "Depreciation and amortization" in the Statement of Earnings to reflect adjustments to fair value based on an evaluation of average current market values (obtained from third parties) of similar type and age aircraft, which are adjusted for the attributes of the specific aircraft under lease.

Amortization of equipment leased to others was \$6,696 million, \$6,097 million and \$6,063 million in 2013, 2012 and 2011, respectively. Noncancellable future rentals due from customers for equipment on operating leases at December 31, 2013, are as follows:

(In millions)

Due in	
2014	\$7,149
2015	5,853

2016	4,716
2017	3,680
2018	2,911
2019 and later	7,726
Total	\$32,035

(103)

NOTE 6. GOODWILL AND OTHER INTANGIBLE ASSETS

December 31 (In millions)	2013	2012
Goodwill	\$26,195	\$26,971
Other intangible assets - net Intangible assets subject to amortization	\$1,136	\$1,287

Changes in goodwill balances follow.

(In millions)	2013			2012				
	Balance at January	Acquisitions	Dispositions, currency exchange and other	Balance at December 31	Balance at January	Acquisitions	Dispositions, currency exchange and other	Balance at December 31
CLL	\$ 13,454	\$ 3	\$ 65	\$ 13,522	\$ 13,475	\$ -	\$ (21)	\$ 13,454
Consumer	10,882	14	(619)	10,277	10,717	-	165	10,882

GECAS	147	-	-	147	147	-	-	147
Total	\$ 26,971	\$ 17	\$ (793)	\$ 26,195	\$ 26,902	\$ -	\$ 69	\$ 26,971

Upon closing an acquisition, we estimate the fair values of assets and liabilities acquired and consolidate the acquisition as quickly as possible. Given the time it takes to obtain pertinent information to finalize the acquired company's balance sheet, then to adjust the acquired company's accounting policies, procedures, and books and records to our standards, it is often several quarters before we are able to finalize those initial fair value estimates. Accordingly, it is not uncommon for our initial estimates to be subsequently revised.

Goodwill balances decreased \$(776) million in 2013, primarily as a result of dispositions (\$749 million). Our reporting units and related goodwill balances are CLL (\$13,522 million), Consumer (\$10,277 million), Real Estate (\$742 million), Energy Financial Services (\$1,507 million) and GECAS (\$147 million) at December 31, 2013.

Goodwill balances increased \$69 million in 2012, primarily as a result of the weaker U.S. dollar (\$180 million), partially offset by dispositions (\$107 million).

We test goodwill for impairment annually in the third quarter of each year using data as of July 1 of that year. The impairment test consists of two steps: in step one, the carrying value of the reporting unit is compared with its fair value; in step two, which is applied when the carrying value is more than its fair value, the amount of goodwill impairment, if any, is derived by deducting the fair value of the reporting unit's assets and liabilities from the fair value of its equity, and comparing that amount with the carrying amount of goodwill. We determined fair values for each of the reporting units using an income approach. When available and appropriate, we use comparative market multiples to corroborate discounted cash flow results. We assess the valuation methodology based upon the relevance and

availability of the data at the time we perform the valuation.

Under the income approach, fair value is determined based on the present value of estimated future cash flows, discounted at an appropriate risk-adjusted rate. We use our internal forecasts to estimate future cash flows and include an estimate of long-term future growth rates based on our most recent views of the long-term outlook for each business. Actual results may differ from those assumed in our forecasts. We derive our discount rates using a capital asset pricing model and analyzing published rates for industries relevant to our reporting units to estimate the cost of equity financing. We use discount rates that are commensurate with the risks and uncertainty inherent in the respective businesses and in our internally developed forecasts. Discount rates used in our reporting unit valuations ranged from 11.25% to 13.3%.

(104)

During the third quarter of 2013, we performed our annual impairment test of goodwill for all of our reporting units. Based on the results of our step one testing, the fair values of each of the reporting units exceeded their carrying values; therefore, the second step of the impairment test was not required to be performed and no goodwill impairment was recognized.

Our Real Estate reporting unit had a goodwill balance of \$742 million at December 31, 2013. While the Real Estate reporting unit's book value was within the range of its fair value, we further substantiated our Real Estate goodwill balance by performing the second step analysis in which the implied fair value of goodwill exceeded its carrying value by approximately \$3.7 billion. The estimated fair value of the Real Estate reporting unit is based on a number of assumptions about future business performance and investment, including loss estimates for the existing finance receivable and investment portfolio, new debt origination volume and margins, and the recent stabilization of the real estate market allowing for sales of real estate investments at normalized margins. Our assumed discount rate was 11.25% and was derived by applying a capital asset pricing model and corroborated using equity analyst research reports and implied cost of equity based on forecasted price to earnings per share multiples for similar companies. While we have seen stabilization in some markets, given the volatility and uncertainty in the current commercial real estate environment, there is uncertainty about a number of assumptions upon which the estimated fair value is based. Different loss estimates for the existing portfolio, changes in the new debt origination volume and margin assumptions, changes in the expected pace of the commercial real estate market recovery, or changes in the equity return expectation of market participants may result in changes in the estimated fair value of the Real Estate reporting unit.

Estimating the fair value of reporting units requires the use of estimates and significant judgments that are based on a number of factors including actual operating results. It is reasonably possible that the judgments and estimates described above could change in future periods.

Intangible Assets Subject to Amortization

December 31 (In millions)	2013			2012		
	Gross carrying amount	Accumulated amortization	Net	Gross carrying amount	Accumulated amortization	Net
Capitalized software	\$2,200	\$ (1,707)	\$493	\$2,103	\$ (1,663)	\$440
Customer-related	1,173	(802)	371	1,220	(802)	418
Lease valuations	703	(498)	205	1,163	(792)	371
Trademarks	49	(36)	13	51	(32)	19
Present value of future profits(a)	574	(574)	-	530	(530)	-
Patents and Technology	106	(102)	4	106	(99)	7
All other	326	(276)	50	316	(284)	32
Total	\$5,131	\$ (3,995)	\$1,136	\$5,489	\$ (4,202)	\$1,287

(a) Balances at December 31, 2013 and 2012 reflect adjustments of \$322 million and \$353 million, respectively, to the present value of future profits in our run-off insurance operations to reflect the effects that would have been recognized had the related unrealized investment securities holding gains and losses actually been realized.

During 2013, we recorded additions to intangible assets subject to amortization of \$270 million. The components of finite-lived intangible assets acquired during 2013 and their respective weighted-average amortizable period are: \$115 million – Customer-related (7.0 years); \$150 million – Capitalized software (4.0 years); \$3 million – Patents and Technology (5.0 years); and \$2 million – Lease valuations (5.0 years).

Amortization expense related to intangible assets subject to amortization was \$425 million, \$447 million and \$562 million for 2013, 2012 and 2011, respectively, and is recorded in operating and administrative expense on the financial statements. We estimate annual pre-tax amortization for intangible assets over the next five calendar years to be as follows: 2014 – \$339 million; 2015 – \$288 million; 2016 – \$218 million; 2017 – \$154 million; and 2018 – \$100 million.

(105)

NOTE 7. OTHER ASSETS

December 31 (In millions)	2013	2012
Investments		
Real estate(a)(b)	\$16,163	\$25,154
Associated companies	17,348	19,119
Assets held for sale(c)	2,571	4,194
Cost method(b)	1,462	1,665
Other	930	1,446
	38,474	51,578
Derivative instruments	1,117	3,557
Advances to suppliers	2,328	1,805
Deferred borrowing costs	867	940
Deferred acquisition costs(d)	29	46
Other	4,551	4,260
Total	\$47,366	\$62,186

(a) Our investment in real estate consisted principally of two categories: real estate held for investment and equity method investments. Both categories contained a wide range of properties including the following at December 31, 2013: office buildings (52%), apartment buildings (14%), retail facilities (9%), industrial properties (7%), franchise properties (3%) and other (15%). At December 31, 2013, investments were located in the Americas (41%), Europe (35%) and Asia (24%).

(b) The fair value of and unrealized loss on cost method investments in a continuous loss position for less than 12 months at December 31, 2013, were \$17 million and an insignificant amount, respectively. There were no cost method investments in a continuous loss position for 12 months or more at December 31, 2013. The fair value of and unrealized loss on cost method investments in a continuous loss position for less than 12 months at December 31, 2012, were \$142 million and \$37 million, respectively. The fair value of and unrealized loss on cost method investments in a continuous loss position for 12 months or more at December 31, 2012, were \$2 million and an insignificant amount, respectively.

(c) Assets were classified as held for sale on the date a decision was made to dispose of them through sale or other means. At December 31, 2013 and 2012, such assets consisted primarily of loans, aircraft, equipment and real estate properties, and were accounted for at the lower of carrying amount or estimated fair value less costs to sell. These amounts are net of valuation allowances of \$127 million and \$200 million at December 31, 2013 and 2012, respectively.

(d) Balances at December 31, 2013 and 2012 reflect adjustments of \$700 million and \$764 million, respectively, to deferred acquisition costs in our run-off insurance operations to reflect the effects that would have been recognized had the related unrealized investment securities holding gains and losses actually been realized.

NOTE 8. BORROWINGS AND BANK DEPOSITS

Short-term Borrowings		2013		2012	
December 31 (Dollars in millions)		Amount	Average rate(a)	Amount	Average rate(a)
Commercial paper					
U.S.		\$ 24,877	0.18 %	\$ 33,686	0.22 %
Non-U.S.		4,168	0.33	9,370	0.92
Current portion of long-term borrowings(b)(c)(d)		39,215	2.70	44,264	2.85
GE Interest Plus notes(e)		8,699	1.11	8,189	1.20
Other(c)		339		431	
Total short-term borrowings		\$ 77,298		\$ 95,940	
Long-term Borrowings		2013		2012	
December 31 (Dollars in millions)		Amount	Average rate(a)	Amount	Average rate(a)
Senior unsecured notes(b)	2015-2054	\$ 186,433	2.97 %	\$ 199,646	2.95 %
Subordinated notes(d)	2021-2037	4,821	3.93	4,965	2.92
Subordinated debentures(f)(g)	2066-2067	7,462	5.64	7,286	5.78
Other(c)		11,563		12,879	
Total long-term borrowings		\$ 210,279		\$ 224,776	
Non-recourse borrowings of securitization consolidated entities (h)	2014-2019	\$ 30,124	1.05	\$ 30,123	1.12
Bank deposits(i)		\$ 53,361		\$ 46,200	
Total borrowings and bank deposits		\$ 371,062		\$ 397,039	

(a) Based on year-end balances and year-end local currency effective interest rates, including the effects from hedging.

(b) Included in total long-term borrowings were \$481 million and \$604 million of obligations to holders of GICs at December 31, 2013 and 2012, respectively. These obligations included conditions under which certain GIC holders could require immediate repayment of their investment should the long-term credit ratings of GECC fall below AA-/Aa3. Following the April 3, 2012 Moody's downgrade of GECC's long-term credit rating to A1, substantially all of these GICs became redeemable by their holders. In 2012, holders of \$386 million in principal amount of GICs redeemed their holdings and GECC made related cash payments. The remaining outstanding GICs will continue to be subject to their scheduled maturities and individual terms, which may include provisions permitting redemption upon a downgrade of one or more of GECC's ratings, among other things.

- (c) Included \$9,468 million and \$9,757 million of funding secured by real estate, aircraft and other collateral at December 31, 2013 and 2012, respectively, of which \$2,868 million and \$3,294 million is non-recourse to GECC at December 31, 2013 and 2012, respectively.
- (d) Included \$300 million of subordinated notes guaranteed by GE at both December 31, 2013 and 2012.
- (e) Entirely variable denomination floating-rate demand notes.
- (f) Subordinated debentures receive rating agency equity credit and were hedged at issuance to the U.S. dollar equivalent of \$7,725 million.
- (g) Includes \$2,981 million of subordinated debentures, which constitute the sole assets of trusts who have issued trust preferred securities and where GECC owns 100% of the common securities of the trusts. Obligations associated with these trusts are fully and unconditionally guaranteed by GECC.
- (h) Included at December 31, 2013 and 2012 were \$9,047 million and \$7,707 million of current portion of long-term borrowings, respectively, and \$21,077 million and \$22,416 million of long-term borrowings, respectively. See Note 16.
- (i) Included \$13,614 million and \$15,896 million of deposits in non-U.S. banks at December 31, 2013 and 2012, respectively, and \$18,275 million and \$17,291 million of certificates of deposits with maturities greater than one year at December 31, 2013 and 2012, respectively.

Additional information about borrowings and associated swaps can be found in Note 15.

(107)

Liquidity is affected by debt maturities and our ability to repay or refinance such debt. Long-term debt maturities over the next five years follow.

(In millions)	2014	2015	2016	2017	2018
	\$ 39,215 (a)	\$ 39,672	\$ 31,987	\$ 25,866	\$ 18,183

(a) Fixed and floating rate notes of \$443 million contain put options with exercise dates in 2014, and which have final maturity beyond 2018.

Committed credit lines totaling \$47.8 billion had been extended to us by 50 banks at year-end 2013. GECC can borrow up to \$47.8 billion under all of these credit lines. GE can borrow up to \$13.9 billion under certain of these credit lines. Our lines include \$26.5 billion of revolving credit agreements under which we can borrow funds for periods exceeding one year. Additionally, \$21.3 billion are 364-day lines that contain a term-out feature that allows us to extend the borrowings for two years from the date on which such borrowings would otherwise be due.

NOTE 9. INVESTMENT CONTRACTS, INSURANCE LIABILITIES AND INSURANCE ANNUITY BENEFITS

Investment contracts, insurance liabilities and insurance annuity benefits comprise mainly obligations to annuitants and policyholders in our run-off insurance operations and holders of guaranteed investment contracts.

December 31 (In millions)	2013	2012
Investment contracts	\$3,144	\$3,321
Guaranteed investment contracts	1,471	1,644
Total investment contracts	4,615	4,965
Life insurance benefits(a)	18,959	20,427
Other(b)	3,405	3,304
Total	\$26,979	\$28,696

(a) Life insurance benefits are accounted for mainly by a net-level-premium method using estimated yields generally ranging from 3.0% to 8.5% in both 2013 and 2012.

(b) Substantially all unpaid claims and claims adjustment expenses and unearned premiums.

When insurance affiliates cede insurance risk to third parties, such as reinsurers, they are not relieved of their primary obligation to policyholders. When losses on ceded risks give rise to claims for recovery, we establish allowances for probable losses on such receivables from reinsurers as required. Reinsurance recoverables are included in the caption "Other receivables" on our Statement of Financial Position, and amounted to \$1,685 million and \$1,542 million at December 31, 2013 and 2012, respectively.

We recognize reinsurance recoveries as a reduction of the Statement of Earnings caption "Investment contracts, insurance losses and insurance annuity benefits." Reinsurance recoveries were \$250 million, \$234 million and \$224 million for the years ended December 31, 2013, 2012 and 2011, respectively.

(108)

NOTE 10. INCOME TAXES

Provision for Income Taxes

(In millions)	2013	2012	2011
Current tax expense (benefit)	\$(268)	\$1,379	\$783
Deferred tax expense (benefit) from temporary differences	(724)	(858)	123
Total	\$(992)	\$521	\$906

GE and GECC file a consolidated U.S. federal income tax return. This enables GE to use GECC tax deductions and credits to reduce the tax that otherwise would have been payable by GE. The GECC effective tax rate for each period reflects the benefit of these deductions on the consolidated return. GE makes cash payments to GECC for these reductions at the time GE's tax payments are due.

U.S. earnings from continuing operations before income taxes were \$2,845 million, \$4,496 million and \$3,202 million in 2013, 2012 and 2011, respectively. The corresponding amounts for non-U.S.-based operations were \$4,474 million, \$3,433 million and \$4,311 million in 2013, 2012 and 2011, respectively.

Current tax expense (benefit) includes amounts applicable to U.S. federal income taxes of \$(1,287) million, \$(6) million and \$(2,063) million in 2013, 2012 and 2011, respectively, related to the benefit from our deductions and credits applied against GE's current U.S. tax expense. Current tax expense amounts applicable to non-U.S. jurisdictions were \$1,020 million, \$1,436 million and \$2,999 million in 2013, 2012 and 2011, respectively. Deferred taxes related to U.S. federal income taxes were an expense (benefit) of \$(474) million, \$30 million and \$1,613 million in 2013, 2012 and 2011, respectively, and amounts applicable to non-U.S. jurisdictions of a benefit of \$(269) million, \$(815) million and \$(1,621) million in 2013, 2012 and 2011, respectively.

Deferred income tax balances reflect the effects of temporary differences between the carrying amounts of assets and liabilities and their tax bases, as well as from net operating loss and tax credit carryforwards, and are stated at enacted tax rates expected to be in effect when taxes are actually paid or recovered. Deferred income tax assets represent amounts available to reduce income taxes payable on taxable income in future years. We evaluate the recoverability of these future tax deductions and credits by assessing the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. To the extent we do not consider it more likely than not that a deferred tax asset will be recovered, a valuation allowance is established.

Our businesses are subject to regulation under a wide variety of U.S. federal, state and foreign tax laws, regulations and policies. Changes to these laws or regulations may affect our tax liability, return on investments and business operations. For example, GE's effective tax rate is reduced because active business income earned and indefinitely reinvested outside the United States is taxed at less than the U.S. rate. A significant portion of this reduction depends upon a provision of U.S. tax law that defers the imposition of U.S. tax on certain active financial services income until that income is repatriated to the United States as a dividend. This provision is consistent with international tax norms and permits U.S. financial services companies to compete more effectively with foreign banks and other foreign financial institutions in global markets. This provision, which had expired at the end of 2011, was reinstated in January 2013 retroactively for two years through the end of 2013. The provision had been scheduled to expire and had been extended by Congress on six previous occasions, but there can be no assurance that it will continue to be extended. In the event the provision is not extended after 2013, the current U.S. tax imposed on active financial

services income earned outside the United States would increase, making it more difficult for U.S. financial services companies to compete in global markets. If this provision is not extended, we expect our effective tax rate to increase significantly after 2014.

(109)

We have not provided U.S. deferred taxes on cumulative earnings of non-U.S. affiliates and associated companies that have been reinvested indefinitely. These earnings relate to ongoing operations and, at December 31, 2013 and December 31, 2012, were approximately \$73 billion and \$72 billion, respectively. Most of these earnings have been reinvested in active non-U.S. business operations and we do not intend to repatriate these earnings to fund U.S. operations. Because of the availability of U.S. foreign tax credits, it is not practicable to determine the U.S. federal income tax liability that would be payable if such earnings were not reinvested indefinitely. Deferred taxes are provided for earnings of non-U.S. affiliates and associated companies when we plan to remit those earnings.

Annually, GE files over 5,800 income tax returns in over 250 global taxing jurisdictions a substantial portion of which includes our activities. We are under examination or engaged in tax litigation in many of these jurisdictions. During 2013, the Internal Revenue Service (IRS) completed the audit of our consolidated U.S. income tax returns for 2008-2009, except for certain issues that remain under examination. During 2011, the IRS completed the audit of our consolidated U.S. income tax returns for 2006-2007, except for certain issues that remained under examination. At December 31, 2013, the IRS was auditing our consolidated U.S. income tax returns for 2010-2011. In addition, certain other U.S. tax deficiency issues and refund claims for previous years were unresolved. The IRS has disallowed the tax loss on our 2003 disposition of ERC Life Reinsurance Corporation. We have contested the disallowance of this loss. It is reasonably possible that the unresolved items could be resolved during the next 12 months, which could result in a decrease in our balance of "unrecognized tax benefits" – that is, the aggregate tax effect of differences between tax return positions and the benefits recognized in our financial statements. We believe that there are no other jurisdictions in which the outcome of unresolved issues or claims is likely to be material to our results of operations, financial position or cash flows. We further believe that we have made adequate provision for all income tax uncertainties. Resolution of audit matters, including the IRS audit of our consolidated U.S. income tax returns for 2008-2009, reduced our 2013 consolidated income tax rate by 1.3 percentage points. Resolution of audit matters, including the IRS audit of our consolidated U.S. income tax returns for 2006-2007, reduced our 2011 consolidated effective tax rate by 3.0 percentage points.

The balance of unrecognized tax benefits, the amount of related interest and penalties we have provided and what we believe to be the range of reasonably possible changes in the next 12 months were:

December 31 (In millions)	2013	2012
Unrecognized tax benefits	\$3,223	\$3,106
Portion that, if recognized, would reduce tax expense and effective tax rate(a)	2,346	2,253
Accrued interest on unrecognized tax benefits	570	559
Accrued penalties on unrecognized tax benefits	97	101
Reasonably possible reduction to the balance of unrecognized tax benefits in succeeding 12 months	0-800	0-400
Portion that, if recognized, would reduce tax expense and effective tax rate(a)	0-250	0-350

(a) Some portion of such reduction might be reported as discontinued operations.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits is as follows:

(In millions)	2013	2012
Balance at January 1	\$3,106	\$2,932
Additions for tax positions of the current year	79	181

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-K

Reductions for tax positions of the current year	(1)	(9)
Additions for tax positions of prior years	657		522	
Reductions for tax positions of prior years	(617)	(377)
Settlements with tax authorities	(1)	(141)
Expiration of the statute of limitations	–		(2)
Balance at December 31	\$3,223		\$3,106	

(110)

We classify interest on tax deficiencies as interest expense; we classify income tax penalties as provision for income taxes. For the years ended December 31, 2013, 2012 and 2011, \$11 million, \$(20) million and \$(254) million of interest expense (income), respectively, and \$6 million, \$22 million and \$(8) million of tax expense (income) related to penalties, respectively, were recognized in the Statement of Earnings.

Reconciliation of U.S. Federal Statutory Income Tax Rate to Actual Income Tax Rate

	2013	2012	2011
U.S. federal statutory income tax rate	35.0 %	35.0 %	35.0 %
Increase (reduction) in rate resulting from			
Tax on global activities including exports(a)	(45.0)	(18.4)	(14.7)
U.S. business credits(b)	(4.6)	(4.3)	(4.7)
Business Property disposition	-	(4.2)	-
All other - net	1.0	(1.5)	(3.5)
	(48.6)	(28.4)	(22.9)
Actual income tax rate	(13.6)%	6.6 %	12.1 %

(a) Included (13.3)% related to the sale of 68.5% of our Swiss consumer finance bank, Cembra Money Bank AG (Cembra), through an initial public offering in 2013.

(b) U.S. general business credits, primarily the credit for energy produced from renewable sources, the advanced energy project credit and the low-income housing credit.

Deferred Income Taxes

Principal components of our net liability (asset) representing deferred income tax balances are as follows:

December 31 (In millions)	2013	2012
Assets		
Non-U.S. loss carryforwards(a)	\$(3,791)	\$(3,049)
Allowance for losses	(2,640)	(1,975)
Investment in global subsidiaries	(1,883)	(1,689)
Other - net	(4,910)	(5,163)
Total deferred income tax assets	(13,224)	(11,876)
Liabilities		
Operating leases	6,284	6,141
Financing leases	4,075	4,506
Intangible assets	1,943	1,666
Net unrealized gains on securities	145	314
Cash flow hedges	163	115
Other - net	5,400	5,134
Total deferred income tax liabilities	18,010	17,876
Net deferred income tax liability	\$4,786	\$6,000

(a) Net of valuation allowances of \$862 million and \$628 million for 2013 and 2012, respectively. Of the net deferred tax asset as of December 31, 2013, of \$3,791 million, \$17 million relates to net operating loss carryforwards that expire in various years ending from December 31, 2014, through December 31, 2016; \$427 million relates to net operating losses that expire in various years ending from December 31, 2017 through December 31, 2028 and \$3,347 million relates to net operating loss carryforwards that may be carried forward indefinitely.

During the second quarter of 2013, we issued 10,000 shares of non-cumulative perpetual preferred stock with a \$0.01 par value for proceeds of \$990 million. The preferred shares bear an initial fixed interest rate of 5.25% through June 15, 2023, bear a floating rate equal to three-month LIBOR plus 2.967% thereafter and are callable on June 15, 2023. Dividends on the GECC preferred stock are payable semi-annually, in June and December, with the first payment on this issuance made in December 2013.

During 2012, we issued 40,000 shares of non-cumulative perpetual preferred stock with a \$0.01 par value for proceeds of \$3,960 million. Of these shares, 22,500 bear an initial fixed interest rate of 7.125% through June 15, 2022, bear a floating rate equal to three-month LIBOR plus 5.296% thereafter and are callable on June 15, 2022, and 17,500 shares bear an initial fixed interest rate of 6.25% through December 15, 2022, bear a floating rate equal to three-month LIBOR plus 4.704% thereafter and are callable on December 15, 2022. Dividends on the preferred stock are payable semi-annually, in June and December, with the first payment on these issuances made in December 2012.

During 2013 and 2012, we paid preferred stock dividends of \$298 million and \$123 million, respectively. During 2013 and 2012, we paid quarterly dividends of \$1,930 million and \$1,926 million, respectively, and special dividends of \$4,055 million and \$4,500 million, respectively, to GE. No dividends were paid during 2011.

At December 31, 2011, all of our outstanding common stock was owned by our former parent, GECS, however, upon the completion of the merger, (i) all outstanding shares of GECC common stock were cancelled, (ii) all outstanding shares of common stock of GECS and all outstanding shares of preferred stock of GECS held by GE were converted into an aggregate of 1,000 shares of common stock of GECC and (iii) all treasury shares of GECS and all outstanding shares of preferred stock of GECS held by GECC were cancelled. As a result, GECC, which previously has been an indirect wholly-owned subsidiary of GE, became a direct wholly-owned subsidiary of GE. Our financial statements consolidate all of our affiliates – entities in which we have a controlling financial interest, most often because we hold a majority voting interest.

(112)

Activities of our financial services consolidated affiliates include lending, leasing and other traditional financial services transactions and relate to approximately \$169.2 billion of our total assets. These consolidated affiliates may be subject to regulation by various national authorities including banking, financial services and insurance regulators, and are restricted from remitting certain funds to us in the form of dividends or loans. However, such funds are available for use by these affiliates, without restriction, to repay borrowings, to fund new loans, or for other normal business purposes. Our regulated bank subsidiaries are also subject to minimum regulatory capital requirements and we have also committed to maintain the total capital level for our run-off insurance operations at 300% of the regulatory minimum required level. At December 31, 2013, restricted net assets of our financial services consolidated affiliates were approximately \$23.1 billion.

The aggregate statutory capital and surplus of the insurance activities totaled \$2.4 billion and \$1.6 billion at December 31, 2013 and 2012, respectively. Accounting practices prescribed by statutory authorities are used in preparing statutory statements.

(a) Includes \$608 million, \$894 million and \$(310) million in revenues from services and \$(20) million, \$(70) million and \$(177) million in interest for the years ended December 31, 2013, 2012 and 2011, respectively.

(b) Amortization of actuarial gains and losses out of AOCI are included in the computation of net periodic pension costs.

Noncontrolling Interests

Noncontrolling interests in equity of consolidated affiliates includes common shares in consolidated affiliates and preferred stock issued by our affiliates. The balance is summarized as follows.

December 31 (In millions)	2013	2012
Noncontrolling interests in consolidated affiliates(a)	\$432	\$707

(a) Consisted of a number of individually insignificant noncontrolling interests in partnerships and consolidated affiliates.

Changes to noncontrolling interests are as follows.

(In millions)	2013	2012	2011
Beginning balance	\$707	\$690	\$1,164
Net earnings	53	63	127
Dispositions(a)	(174)	–	(586)
Dividends	(48)	(19)	(20)
Other (including AOCI)	(106)	(27)	5
Ending balance	\$432	\$707	\$690

(a) Includes noncontrolling interests related to the sale of GE SeaCo of \$311 million and the redemption of Heller Financial preferred stock of \$275 million in 2011.

NOTE 12. REVENUES FROM SERVICES

(In millions)	2013	2012	2011
Interest on loans	\$17,951	\$18,843	\$19,818
Equipment leased to others	9,804	10,456	10,879
Fees	4,720	4,709	4,669
Investment income(a)	1,809	2,630	2,500
Financing leases	1,667	1,888	2,378
Associated companies(b)	1,809	1,538	2,337
Premiums earned by insurance activities	1,573	1,715	1,905
Real estate investments(c)	2,528	1,709	1,625
Other items(d)	2,080	1,757	2,065
Total	\$43,941	\$45,245	\$48,176

(a) Included net other-than-temporary impairments on investment securities, of which \$96 million related to the impairment of an investment in a Brazilian company that was fully offset by the benefit of a guarantee provided by GE reflected as a component in other items for 2013.

(b) During 2013, we sold our remaining equity interest in the Bank of Ayudhya (Bay Bank) and recorded a pre-tax gain of \$641 million. During 2012, we sold our remaining equity interest in Garanti Bank, which was classified as an available-for-sale security. During 2011, we sold an 18.6% equity interest in Garanti Bank and recorded a pre-tax gain of \$690 million.

(c) During 2013, we sold real estate comprising certain floors located at 30 Rockefeller Center, New York for a pre-tax gain of \$902 million.

(d) During 2013, we sold a portion of Cembra through an initial public offering and recorded a pre-tax gain of \$351 million.

NOTE 13. OPERATING AND ADMINISTRATIVE EXPENSES

Our employees and retirees are covered under a number of pension, stock compensation, health and life insurance plans. The principal pension plans are the GE Pension Plan, a defined benefit plan for U.S. employees and the GE Supplementary Pension Plan, an unfunded plan providing supplementary benefits to higher-level, longer-service U.S. employees. Employees of certain affiliates are covered under separate pension plans, which are not significant individually or in the aggregate. We provide health and life insurance benefits to certain of our retired employees, principally through GE Company's benefit program. The annual cost to us of providing these benefits is not material.

Rental expense under operating leases is shown below.

(In millions)	2013	2012	2011
Equipment for sublease	\$64	\$149	\$158
Other rental expense	364	390	434

At December 31, 2013, minimum rental commitments under noncancellable operating leases aggregated \$1,427 million. Amounts payable over the next five years follow.

(In millions)

	2014		2015		2016		2017		2018
\$	253	\$	213	\$	185	\$	153	\$	113

NOTE 14. FAIR VALUE MEASUREMENTS

For a description of how we estimate fair value, see Note 1.

The following tables present our assets and liabilities measured at fair value on a recurring basis. Included in the tables are investment securities primarily supporting obligations to annuitants and policyholders in our run-off insurance operations and supporting obligations to holders of GICs in Trinity and investment securities held in our CLL business collateralized by senior secured loans of high-quality, middle-market companies in a variety of industries.

(a) Earnings effects are primarily included in the "Revenues from services" and "Interest" captions in the Statement of Earnings.

- (b) Transfers in and out of Level 3 are considered to occur at the beginning of the period. Transfers out of Level 3 were a result of increased use of quotes from independent pricing vendors based on recent trading activity.
- (c) Represented the amount of unrealized gains or losses for the period included in earnings.
- (d) Represented derivative assets net of derivative liabilities and included cash accruals of \$9 million not reflected in the fair value hierarchy table.
- (e) Gains (losses) included in net realized/unrealized gains (losses) included in earnings were offset by the earnings effects from the underlying items that were economically hedged. See Note 15.

(a) Earnings effects are primarily included in the “Revenues from services” and “Interest” captions in the Statement of Earnings.

(b) Transfers in and out of Level 3 are considered to occur at the beginning of the period. Transfers out of Level 3 were a result of increased use of quotes from independent pricing vendors based on recent trading activity.

(c) Represented the amount of unrealized gains or losses for the period included in earnings.

(d) Represented derivative assets net of derivative liabilities and included cash accruals of \$2 million not reflected in the fair value hierarchy table.

(e) Gains (losses) included in net realized/unrealized gains (losses) included in earnings were offset by the earnings effects from the underlying items that were economically hedged. See Note 15.

(118)

Non-Recurring Fair Value Measurements

The following table represents non-recurring fair value amounts (as measured at the time of the adjustment) for those assets remeasured to fair value on a non-recurring basis during the fiscal year and still held at December 31, 2013 and 2012. These assets can include loans and long-lived assets that have been reduced to fair value when they are held for sale, impaired loans that have been reduced based on the fair value of the underlying collateral, cost and equity method investments and long-lived assets that are written down to fair value when they are impaired and the remeasurement of retained investments in formerly consolidated subsidiaries upon a change in control that results in deconsolidation of a subsidiary, if we sell a controlling interest and retain a noncontrolling stake in the entity. Assets that are written down to fair value when impaired and retained investments are not subsequently adjusted to fair value unless further impairment occurs.

(In millions)	Remeasured during the year ended December 31,			
	2013		2012	
	Level 2	Level 3	Level 2	Level 3
Financing receivables and loans held for sale	\$210	\$2,986	\$366	\$4,094
Cost and equity method investments(a)	–	649	8	313
Long-lived assets, including real estate	2,050	1,085	702	2,182
Total	\$2,260	\$4,720	\$1,076	\$6,589

(a) Includes the fair value of private equity and real estate funds included in Level 3 of \$93 million and \$84 million at December 31, 2013 and 2012, respectively.

The following table represents the fair value adjustments to assets measured at fair value on a non-recurring basis and still held at December 31, 2013 and 2012.

(In millions)	Year ended December 31,	
	2013	2012
Financing receivables and loans held for sale	\$(361)	\$(595)
Cost and equity method investments(a)	(466)	(153)
Long-lived assets, including real estate(b)	(1,126)	(623)
Total	\$(1,953)	\$(1,371)

(a) Includes fair value adjustments associated with private equity and real estate funds of \$(10) million and \$(33) million during 2013 and 2012, respectively.

(b) Includes impairments related to real estate equity properties and investments recorded in operating and administrative expenses of \$108 million and \$218 million during 2013 and 2012, respectively.

Level 3 Measurements

The following table presents information relating to the significant unobservable inputs of our Level 3 recurring and non-recurring measurements.

December 31 (Dollars in millions)					Range (weighted average)
2013	Fair value	Valuation technique	Unobservable inputs		
Recurring fair value measurements					
Investment securities					
Debt					
U.S. corporate	\$ 898	Income approach	Discount rate(a)		1.5%-13.3% (6.5%)
Asset-backed	6,854	Income approach	Discount rate(a)		1.2%-10.5% (3.7%)
Corporate non-U.S.	819	Income approach	Discount rate(a)		1.4%-46.0% (15.1%)
Other financial assets					
	288	Income approach, Market comparables	Weighted average cost of capital		9.3%-9.3% (9.3%)
			Discount rate(a)		5.2%-5.3% (5.3%)
			EBITDA multiple		8.3X-12.5X (10.6X)
Non-recurring fair value measurements					
Financing receivables and loans held for sale	\$ 1,937	Income approach, Business enterprise value	Capitalization rate(b)		5.5%-16.7% (8.0%)
			EBITDA multiple		4.3X-5.5X (4.8X)
			Discount rate(a)		6.6%-6.6% (6.6%)
Cost and equity method investments					
	100	Income approach, Market comparables	Discount rate(a)		5.7%-5.9% (5.8%)
			Capitalization rate(b)		8.5%-10.6% (10.0%)

Edgar Filing: GENERAL ELECTRIC CAPITAL CORP - Form 10-K

			Weighted average cost of capital	9.3%-9.6% (9.4%)
			EBITDA multiple	7.1X-14.5X (11.3X)
			Revenue multiple	9.3X-12.6X (10.9X)
Long-lived assets, including real estate	691	Income approach	Capitalization rate(b)	5.4%-14.5% (7.8%)
			Discount rate(a)	4.0%-23.0% (8.8%)
2012				
Recurring fair value measurements				
Investment securities				
Debt				
U.S. corporate	\$ 1,652	Income approach	Discount rate(a)	1.3%-29.9% (11.1%)
Asset-backed	4,977	Income approach	Discount rate(a)	2.1%-13.1% (3.8%)
Corporate non-U.S.	865	Income approach	Discount rate(a)	1.5%-25.0% (13.2%)
Other financial assets	360	Income approach	Weighted average cost of capital	8.7%-10.2% (8.7%)
Non-recurring fair value measurements				
Financing receivables and loans held for sale	\$ 2,835	Income approach, Business enterprise value	Capitalization rate(b)	3.8%-14.0% (8.0%)
			EBITDA multiple	2.0X-6.0X (4.8X)
Cost and equity method investments	72	Income approach	Capitalization rate(b)	9.2%-12.8% (12.0%)
Long-lived assets, including real estate	985	Income approach	Capitalization rate(b)	4.8%-14.6% (7.3%)

(a) Discount rates are determined based on inputs that market participants would use when pricing investments, including credit and liquidity risk. An increase in the discount rate would result in a decrease in the fair value.

(b)

Represents the rate of return on net operating income that is considered acceptable for an investor and is used to determine a property's capitalized value. An increase in the capitalization rate would result in a decrease in the fair value.

(120)

At December 31, 2013 and December 31, 2012, other Level 3 recurring fair value measurements of \$2,813 million and \$2,990 million, respectively, and non-recurring measurements of \$1,426 million and \$2,412 million, respectively, are valued using non-binding broker quotes or other third-party sources. For a description of our process to evaluate third-party pricing servicers, see Note 1. At December 31, 2013 and December 31, 2012, other recurring fair value measurements of \$173 million and \$233 million, respectively, and non-recurring fair value measurements of \$566 million and \$285 million, respectively, were individually insignificant and utilize a number of different unobservable inputs not subject to meaningful aggregation.

NOTE 15. FINANCIAL INSTRUMENTS

The following table provides information about the assets and liabilities not carried at fair value in our Statement of Financial Position. The table excludes finance leases and non-financial assets and liabilities. Substantially all of the assets discussed below are considered to be Level 3. The vast majority of our liabilities' fair value can be determined based on significant observable inputs and thus considered Level 2. Few of the instruments are actively traded and their fair values must often be determined using financial models. Realization of the fair value of these instruments depends upon market forces beyond our control, including marketplace liquidity.

December 31 (In millions)	Notional amount	2013 Assets (liabilities)		Notional amount	2012 Assets (liabilities)		
		Carrying amount (net)	Estimated fair value		Carrying amount (net)	Estimated fair value	
Assets							
Loans	\$ (a)	\$ 226,293	\$ 230,792	\$ (a)	\$ 235,888	\$ 238,254	
Other commercial mortgages	(a)	2,270	2,281	(a)	2,222	2,249	
Loans held for sale	(a)	512	512	(a)	1,180	1,181	
Other financial instruments(b)	(a)	1,622	2,203	(a)	1,858	2,276	
Liabilities							
Borrowings and bank deposits(c)(d)	(a)	(371,062)	(386,823)	(a)	(397,039)	(414,264)	
Investment contract benefits	(a)	(3,144)	(3,644)	(a)	(3,321)	(4,150)	
Guaranteed investment contracts	(a)	(1,471)	(1,459)	(a)	(1,644)	(1,674)	
Insurance - credit life(e)	2,149	(108)	(94)	2,277	(120)	(104)	

(a) These financial instruments do not have notional amounts.

(b) Principally cost method investments.

(c) See Note 8.

(d)

Fair values exclude interest rate and currency derivatives designated as hedges of borrowings. Had they been included, the fair value of borrowings at December 31, 2013 and 2012 would have been reduced by \$2,284 million and \$7,937 million, respectively.

- (e) Net of reinsurance of \$1,250 million and \$2,000 million at December 31, 2013 and 2012, respectively.

A description of how we estimate fair values follows.

Loans

Based on a discounted future cash flows methodology, using current market interest rate data adjusted for inherent credit risk or quoted market prices and recent transactions, if available.

Borrowings and bank deposits

Based on valuation methodologies using current market interest rate data that are comparable to market quotes adjusted for our non-performance risk.

Investment contract benefits

Based on expected future cash flows, discounted at currently offered rates for immediate annuity contracts or the income approach for single premium deferred annuities.

(121)

Guaranteed investment contracts

Based on valuation methodologies using current market interest rate data, adjusted for our non-performance risk.

All other instruments

Based on observable market transactions and/or valuation methodologies using current market interest rate data adjusted for inherent credit risk.

Assets and liabilities that are reflected in the accompanying financial statements at fair value are not included in the above disclosures; such items include cash and equivalents, investment securities and derivative financial instruments.

Additional information about certain categories in the table above follows.

Insurance – credit life

Certain insurance affiliates, primarily in Consumer, issue credit life insurance designed to pay the balance due on a loan if the borrower dies before the loan is repaid. As part of our overall risk management process, we cede to third parties a portion of this associated risk, but are not relieved of our primary obligation to policyholders.

Loan Commitments

December 31 (In millions)	Notional amount	
	2013	2012
Ordinary course of business lending commitments(a)	\$4,756	\$3,708
Unused revolving credit lines(b)		
Commercial(c)	16,570	17,929
Consumer - principally credit cards	290,662	271,211

(a) Excluded investment commitments of \$1,395 million and \$1,276 million as of December 31, 2013 and 2012, respectively.

(b) Excluded inventory financing arrangements, which may be withdrawn at our option, of \$13,502 million and \$12,813 million as of December 31, 2013 and 2012, respectively.

(c) Included commitments of \$11,629 million and \$12,923 million as of December 31, 2013 and 2012, respectively, associated with secured financing arrangements that could have increased to a maximum of \$14,590 million and \$15,731 million at December 31, 2013 and 2012, respectively, based on asset volume under the arrangement.

Securities Repurchase and Reverse Repurchase Arrangements

Our issuances of securities repurchase agreements are insignificant and are limited to activities at certain of our foreign banks primarily for purposes of liquidity management. At December 31, 2013, we were party to repurchase agreements totaling \$126 million, which were reported in short-term borrowings on the financial statements. We have had no repurchase agreements that were accounted for as off-book financing and we do not engage in securities lending transactions.

We also enter into reverse securities repurchase agreements primarily for short-term investment with maturities of 90 days or less. At December 31, 2013, we were party to reverse repurchase agreements totaling \$20.8 billion, which were reported in cash and equivalents on the financial statements. Under these reverse securities repurchase agreements, we typically lend available cash at a specified rate of interest and hold U.S. or highly-rated European government securities as collateral during the term of the agreement. Collateral value is in excess of amounts loaned under the agreements.

(122)

Derivatives and hedging

As a matter of policy, we use derivatives for risk management purposes, and we do not use derivatives for speculative purposes. A key risk management objective for our financial services businesses is to mitigate interest rate and currency risk by seeking to ensure that the characteristics of the debt match the assets they are funding. If the form (fixed versus floating) and currency denomination of the debt we issue do not match the related assets, we typically execute derivatives to adjust the nature and tenor of funding to meet this objective within pre-defined limits. The determination of whether we enter into a derivative transaction or issue debt directly to achieve this objective depends on a number of factors, including market-related factors that affect the type of debt we can issue.

The notional amounts of derivative contracts represent the basis upon which interest and other payments are calculated and are reported gross, except for offsetting foreign currency forward contracts that are executed in order to manage our currency risk of net investment in foreign subsidiaries. Of the outstanding notional amount of \$286,000 million, approximately 97%, or \$277,000 million, is associated with reducing or eliminating the interest rate, currency or market risk between financial assets and liabilities in our financial services businesses. The instruments used in these activities are designated as hedges when practicable. When we are not able to apply hedge accounting, or when the derivative and the hedged item are both recorded in earnings concurrently, the derivatives are deemed economic hedges and hedge accounting is not applied. This most frequently occurs when we hedge a recognized foreign currency transaction (e.g., a receivable or payable) with a derivative. Since the effects of changes in exchange rates are reflected concurrently in earnings for both the derivative and the transaction, the economic hedge does not require hedge accounting.

The following table provides information about the fair value of our derivatives by contract type, separating those accounted for as hedges and those that are not.

(123)

December 31 (In millions)	2013		2012	
	Fair value		Fair value	
	Assets	Liabilities	Assets	Liabilities
Derivatives accounted for as hedges				
Interest rate contracts	\$3,837	\$1,989	\$8,443	\$719
Currency exchange contracts	1,746	958	827	1,762
Other contracts	-	-	-	-
	5,583	2,947	9,270	2,481
Derivatives not accounted for as hedges				
Interest rate contracts	270	175	452	195
Currency exchange contracts	1,753	1,765	1,457	358
Other contracts	57	22	35	26
	2,080	1,962	1,944	579
Gross derivatives recognized in statement of financial position				
Gross derivatives	7,663	4,909	11,214	3,060
Gross accrued interest	1,227	241	1,683	14
	8,890	5,150	12,897	3,074
Amounts offset in statement of financial position				
Netting adjustments(a)	(3,927)	(3,920)	(2,532)	(2,517)
Cash collateral(b)	(2,619)	(242)	(5,125)	(391)
	(6,546)	(4,162)	(7,657)	(2,908)
Net derivatives recognized in statement of financial position				
Net derivatives	2,344	988	5,240	166
Amounts not offset in statement of financial position				
Securities held as collateral(c)	(1,838)	-	(5,060)	-
Net amount	\$506	\$988	\$180	\$166

Derivatives are classified in the captions “Other assets” and “Other liabilities” and the related accrued interest is classified in “Other receivables” and “Other liabilities” in our financial statements.

(a) The netting of derivative receivables and payables is permitted when a legally enforceable master netting agreement exists. Amounts included fair value adjustments related to our own and counterparty non-performance risk. At December 31, 2013 and 2012, the cumulative adjustment for non-performance risk was a gain (loss) of \$(7) million and \$(15) million, respectively.

(b) Excludes excess cash collateral received and posted of \$160 million and \$37 million at December 31, 2013, respectively, and \$42 million and \$10 million at December 31, 2012, respectively.

(c) Excludes excess securities collateral received of \$286 million and \$359 million at December 31, 2013 and 2012, respectively.

(124)

Fair value hedges

We use interest rate and currency exchange derivatives to hedge the fair value effects of interest rate and currency exchange rate changes on local and non-functional currency denominated fixed-rate debt. For relationships designated as fair value hedges, changes in fair value of the derivatives are recorded in earnings within interest along with offsetting adjustments to the carrying amount of the hedged debt. The following table provides information about the earnings effects of our fair value hedging relationships for the years ended December 31, 2013 and 2012, respectively.

(In millions)	2013		2012	
	Gain (loss) on hedging derivatives	Gain (loss) on hedged items	Gain (loss) on hedging derivatives	Gain (loss) on hedged items
Interest rate contracts	\$(5,253)	\$5,180	\$708	\$(1,041)
Currency exchange contracts	(7)	6	(68)	98

Fair value hedges resulted in \$(74) million and \$(303) million of ineffectiveness in 2013 and 2012, respectively. In both 2013 and 2012, there were insignificant amounts excluded from the assessment of effectiveness.

Cash flow hedges

We use interest rate, currency exchange and commodity derivatives to reduce the variability of expected future cash flows associated with variable-rate borrowings and commercial purchase and sale transactions, including commodities. For derivatives that are designated in a cash flow hedging relationship, the effective portion of the change in fair value of the derivative is reported as a component of AOCI and reclassified into earnings contemporaneously and in the same caption with the earnings effects of the hedged transaction.

The following table provides information about the amounts recorded in AOCI, as well as the gain (loss) recorded in earnings, primarily in revenue from services and interest, when reclassified out of AOCI, for the years ended December 31, 2013 and 2012, respectively. See Note 11 for additional information about reclassifications out of AOCI.

(In millions)	Gain (loss) recognized in AOCI		Gain (loss) reclassified from AOCI into earnings	
	2013	2012	2013	2012
Interest rate contracts	\$(26)	\$(158)	\$(364)	\$(494)
Currency exchange contracts	704	1,046	588	824
Total	\$678	\$888	\$224	\$330

The total pre-tax amount in AOCI related to cash flow hedges of forecasted transactions was a \$291 million loss at December 31, 2013. We expect to transfer \$241 million to earnings as an expense in the next 12 months contemporaneously with the earnings effects of the related forecasted transactions. In 2013, we recognized

insignificant gains and losses related to hedged forecasted transactions and firm commitments that did not occur by the end of the originally specified period. At December 31, 2013 and 2012, the maximum term of derivative instruments that hedge forecasted transactions was 19 years and 20 years, respectively.

For cash flow hedges, the amount of ineffectiveness in the hedging relationship and amount of the changes in fair value of the derivatives that are not included in the measurement of ineffectiveness are both reflected in earnings each reporting period. These amounts are primarily reported in revenues from services and totaled \$1 million and \$4 million for the years ended December 31, 2013 and 2012, respectively.

(125)

Net investment hedges in foreign operations

We use currency exchange derivatives to protect our net investments in global operations conducted in non-U.S. dollar currencies. For derivatives that are designated as hedges of net investment in a foreign operation, we assess effectiveness based on changes in spot currency exchange rates. Changes in spot rates on the derivative are recorded as a component of AOCI until such time as the foreign entity is substantially liquidated or sold. The change in fair value of the forward points, which reflects the interest rate differential between the two countries on the derivative, is excluded from the effectiveness assessment.

The following table provides information about the amounts recorded in AOCI for the years ended December 31, 2013 and 2012, as well as the gain (loss) recorded in revenues from services when reclassified out of AOCI.

(In millions)	Gain (loss) recognized in CTA		Gain (loss) reclassified from CTA	
	2013	2012	2013	2012
Currency exchange contracts	\$2,322	\$(2,905)	\$(1,525)	\$27

The amounts related to the change in the fair value of the forward points that are excluded from the measure of effectiveness were \$(678) million and \$(874) million for the years ended December 31, 2013 and 2012, respectively, and are recorded in interest.

Free-standing derivatives

Changes in the fair value of derivatives that are not designated as hedges are recorded in earnings each period. As discussed above, these derivatives are typically entered into as economic hedges of changes in interest rates, currency exchange rates, commodity prices and other risks. Gains or losses related to the derivative are typically recorded in revenues from services, based on our accounting policy. In general, the earnings effects of the item that represent the economic risk exposure are recorded in the same caption as the derivative. Losses for the year ended December 31, 2013 on derivatives not designated as hedges were \$(802) million composed of amounts related to interest rate contracts of \$(103) million, currency exchange contracts of \$(733) million, and other derivatives of \$34 million. These losses were more than offset by the earnings effects from the underlying items that were economically hedged. Losses for the year ended December 31, 2012 on derivatives not designated as hedges were \$(185) million composed of amounts related to interest rate contracts of \$(291) million, currency exchange contracts of \$113 million, and other derivatives of \$(7) million. These losses were more than offset by the earnings effects from the underlying items that were economically hedged.

Counterparty credit risk

Fair values of our derivatives can change significantly from period to period based on, among other factors, market movements and changes in our positions. We manage counterparty credit risk (the risk that counterparties will default and not make payments to us according to the terms of our agreements) on an individual counterparty basis. Where we have agreed to netting of derivative exposures with a counterparty, we net our exposures with that counterparty and apply the value of collateral posted to us to determine the exposure. We actively monitor these net exposures against defined limits and take appropriate actions in response, including requiring additional collateral.

As discussed above, we have provisions in certain of our master agreements that require counterparties to post collateral (typically, cash or U.S. Treasury securities) when our receivable due from the counterparty, measured at current market value, exceeds a specified limit. The fair value of such collateral was \$4,457 million, of which \$2,619 million was cash and \$1,838 million was in the form of securities held by a custodian for our benefit. Under certain of these same agreements, we post collateral to our counterparties for our derivative obligations, the fair value of which was \$242 million at December 31, 2013. At December 31, 2013, our exposure to counterparties (including accrued interest), net of collateral we hold, was \$455 million. This excludes exposure related to embedded derivatives.

(126)

Additionally, our master agreements typically contain mutual downgrade provisions that provide the ability of each party to require termination if the long-term credit rating of the counterparty were to fall below A-/A3. In certain of these master agreements, each party also has the ability to require termination if the short-term rating of the counterparty were to fall below A-1/P-1. Our master agreements also typically contain provisions that provide termination rights upon the occurrence of certain other events, such as a bankruptcy or events of default by one of the parties. If an agreement was terminated under any of these circumstances, the termination amount payable would be determined on a net basis and could also take into account any collateral posted. The net amount of our derivative liability, after consideration of collateral posted by us and outstanding interest payments was \$963 million at December 31, 2013. This excludes embedded derivatives.

NOTE 16. VARIABLE INTEREST ENTITIES

We use variable interest entities primarily to securitize financial assets and arrange other forms of asset-backed financing in the ordinary course of business. Except as noted below, investors in these entities only have recourse to the assets owned by the entity and not to our general credit. We do not have implicit support arrangements with any VIE. We did not provide non-contractual support for previously transferred financing receivables to any VIE in 2013 or 2012.

In evaluating whether we have the power to direct the activities of a VIE that most significantly impact its economic performance, we consider the purpose for which the VIE was created, the importance of each of the activities in which it is engaged and our decision-making role, if any, in those activities that significantly determine the entity's economic performance as compared to other economic interest holders. This evaluation requires consideration of all facts and circumstances relevant to decision-making that affects the entity's future performance and the exercise of professional judgment in deciding which decision-making rights are most important.

In determining whether we have the right to receive benefits or the obligation to absorb losses that could potentially be significant to the VIE, we evaluate all of our economic interests in the entity, regardless of form (debt, equity, management and servicing fees, and other contractual arrangements). This evaluation considers all relevant factors of the entity's design, including: the entity's capital structure, contractual rights to earnings (losses), subordination of our interests relative to those of other investors, contingent payments, as well as other contractual arrangements that have the potential to be economically significant. The evaluation of each of these factors in reaching a conclusion about the potential significance of our economic interests is a matter that requires the exercise of professional judgment.

(127)

Consolidated Variable Interest Entities

We consolidate VIEs because we have the power to direct the activities that significantly affect the VIEs economic performance, typically because of our role as either servicer or manager for the VIE. Our consolidated VIEs fall into three main groups, which are further described below:

- Trinity comprises two consolidated entities that hold investment securities, the majority of which are investment grade, and were funded by the issuance of GICs. The GICs included conditions under which certain holders could require immediate repayment of their investment should the long-term credit ratings of GECC fall below AA-/Aa3 or the short-term credit ratings fall below A-1+/P-1. The outstanding GICs are subject to their scheduled maturities and individual terms, which may include provisions permitting redemption upon a downgrade of one or more of GECC's ratings, among other things, and are reported in investment contracts, insurance liabilities and insurance annuity benefits.
- Consolidated Securitization Entities (CSEs) were created to facilitate securitization of financial assets and other forms of asset-backed financing that serve as an alternative funding source by providing access to variable funding notes and term markets. The securitization transactions executed with these entities are similar to those used by many financial institutions and substantially all are non-recourse. We provide servicing for substantially all of the assets in these entities.

The financing receivables in these entities have similar risks and characteristics to our other financing receivables and were underwritten to the same standard. Accordingly, the performance of these assets has been similar to our other financing receivables; however, the blended performance of the pools of receivables in these entities reflects the eligibility criteria that we apply to determine which receivables are selected for transfer. Contractually the cash flows from these financing receivables must first be used to pay third-party debt holders as well as other expenses of the entity. Excess cash flows are available to GECC. The creditors of these entities have no claim on other assets of GECC.

- Other remaining assets and liabilities of consolidated VIEs relate primarily to three categories of entities: (1) joint ventures that lease equipment of \$1,539 million of assets and \$727 million of liabilities; (2) other entities that are involved in power generating and leasing activities of \$762 million of assets and no liabilities; and (3) insurance entities that, among other lines of business, provide property and casualty and workers' compensation coverage for GE of \$1,209 million of assets and \$566 million of liabilities.

(128)

The table below summarizes the assets and liabilities of consolidated VIEs described above.

December 31 (In millions)	Consolidated Securitization Entities						Total
	Trinity(a)	Credit cards(b)	Equipment(b)	Trade receivables	Other

Total	\$ 1,656	\$ 17,354	\$ 9,822	\$ 2,058	\$ 2,076	\$ –	\$ 32,966

(a) Excludes intercompany advances from GECC to Trinity, which are eliminated in consolidation of \$1,837 million and \$2,441 million at December 31, 2013 and 2012, respectively.

(b) We provide servicing to the CSEs and are contractually permitted to commingle cash collected from customers on financing receivables sold to CSE investors with our own cash prior to payment to a CSE, provided our short-term credit rating does not fall below A-1/P-1. These CSEs also owe us amounts for purchased financial assets and scheduled interest and principal payments. At December 31, 2013 and 2012, the amounts of commingled cash owed to the CSEs were \$6,314 million and \$6,225 million, respectively, and the amounts owed to us by CSEs were

\$5,540 million and \$6,143 million, respectively.

- (c) Asset amounts exclude intercompany receivables for cash collected on behalf of these entities by GE as servicer, which are eliminated in consolidation. Such receivables provide the cash to repay the entities' liabilities. If these intercompany receivables were included in the table above, assets would be higher. In addition, other assets, borrowings and other liabilities exclude intercompany balances that are eliminated in consolidation.

Revenues from services from our consolidated VIEs were \$6,776 million, \$6,638 million and \$6,162 million in 2013, 2012 and 2011, respectively. Related expenses consisted primarily of provisions for losses of \$1,247 million, \$1,171 million and \$1,146 million in 2013, 2012 and 2011, respectively, and interest of \$353 million, \$541 million and \$593 million in 2013, 2012 and 2011, respectively. These amounts do not include intercompany revenues and costs, principally fees and interest between GECC and the VIEs, which are eliminated in consolidation.

(129)

Investments in Unconsolidated Variable Interest Entities

Our involvement with unconsolidated VIEs consists of the following activities: assisting in the formation and financing of the entity, providing recourse and/or liquidity support, servicing the assets and receiving variable fees for services provided. We are not required to consolidate these entities because the nature of our involvement with the activities of the VIEs does not give us power over decisions that significantly affect their economic performance.

Our largest exposure to any single unconsolidated VIE at December 31, 2013 is an investment in asset-backed securities issued by the Senior Secured Loan Program (SSLP), a fund that invests in high-quality senior secured debt of various middle-market companies (\$6,996 million). Other significant unconsolidated VIEs include investments in real estate entities (\$2,369 million), which generally consist of passive limited partnership investments in tax-advantaged, multi-family real estate and investments in various European real estate entities; and exposures to joint ventures that purchase factored receivables (\$2,624 million).

The classification of our variable interests in these entities in our financial statements is based on the nature of the entity and the type of investment we hold. Variable interests in partnerships and corporate entities are classified as either equity method or cost method investments. In the ordinary course of business, we also make investments in entities in which we are not the primary beneficiary but may hold a variable interest such as limited partner interests or mezzanine debt investments. These investments are classified in two captions in our financial statements: "Other assets" for investments accounted for under the equity method, and "Financing receivables – net" for debt financing provided to these entities. Our investments in unconsolidated VIEs at December 31, 2013 and December 31, 2012 follow.

	2013	2012
December 31 (In millions)		
Other assets and investment securities	\$9,089	\$10,386
Financing receivables – net	3,344	2,654
Total investments	12,433	13,040
Contractual obligations to fund investments or guarantees	2,731	2,602
Revolving lines of credit	31	41
Total	\$15,195	\$15,683

As previously reported, during 2012, Penske Truck Leasing Co., L.P. (PTL) effected a recapitalization and subsequently acquired third-party financing in order to repay outstanding debt owed to GECC. In the first quarter of 2013, PTL had repaid all outstanding debt owed and terminated its borrowing arrangement with GECC. During the second quarter of 2013, PTL ceased to be a VIE as a result of a principal in PTL retiring from the GE Board. Therefore, our investment in PTL (\$899 million at December 31, 2013) is not reported in the December 31, 2013 balance in the table above. As co-issuer and co-guarantor of the \$700 million of debt raised by the funding entity related to PTL, GECC reports this amount, which is also our loss exposure and excluded from the table above, as debt of GECC in its financial statements. GECC has been indemnified by the other limited partners of PTL for their proportionate share of the debt obligation.

In addition to the entities included in the table above, we also hold passive investments in RMBS, CMBS and ABS issued by VIEs. Such investments were, by design, investment grade at issuance and held by a diverse group of

investors. Further information about such investments is provided in Note 3.

(130)

NOTE 17. COMMITMENTS AND GUARANTEES

Commitments

GECAS had placed multiple-year orders for various Boeing, Airbus and other aircraft with list prices approximating \$29,405 million and secondary orders with airlines for used aircraft of approximately \$816 million at December 31, 2013.

Guarantees

Our guarantees are provided in the ordinary course of business. We underwrite these guarantees considering economic, liquidity and credit risk of the counterparty. We believe that the likelihood is remote that any such arrangements could have a significant adverse effect on our financial position, results of operations or liquidity. We record liabilities for guarantees at estimated fair value, generally the amount of the premium received, or if we do not receive a premium, the amount based on appraisal, observed market values or discounted cash flows. Any associated expected recoveries from third parties are recorded as other receivables, not netted against the liabilities.

At December 31, 2013, we were committed under the following guarantee arrangements beyond those provided on behalf of VIEs. See Note 16.

- **Credit Support.** We have provided \$2,351 million of credit support on behalf of certain customers or associated companies, predominantly joint ventures and partnerships, using arrangements such as standby letters of credit and performance guarantees. These arrangements enable these customers and associated companies to execute transactions or obtain desired financing arrangements with third parties. Should the customer or associated company fail to perform under the terms of the transaction or financing arrangement, we would be required to perform on their behalf. Under most such arrangements, our guarantee is secured, usually by the asset being purchased or financed, or possibly by certain other assets of the customer or associated company. The length of these credit support arrangements parallels the length of the related financing arrangements or transactions. The liability for such credit support was \$23 million at December 31, 2013.
- **Indemnification Agreements.** At December 31, 2013, we had \$828 million of other indemnification commitments, substantially all of which relate to representations and warranties in sales of businesses or assets.
- **Contingent Consideration.** These are agreements to provide additional consideration to a buyer or seller in a business combination if contractually specified conditions related to the acquisition or disposition are achieved.

NOTE 18. SUPPLEMENTAL CASH FLOWS INFORMATION

Changes in operating assets and liabilities are net of acquisitions and dispositions of principal businesses.

Amounts reported in the “Proceeds from sales of discontinued operations” and “Proceeds from principal business dispositions” lines in the Statement of Cash Flows are net of cash disposed and included certain deal-related costs. Amounts reported in the “Net cash from (payments for) principal businesses purchased” line is net of cash acquired and included certain deal-related costs and debt assumed and immediately repaid in acquisitions.

Amounts reported in the “All other operating activities” line in the Statement of Cash Flows consist primarily of adjustments to current and noncurrent accruals, deferrals of costs and expenses and adjustments to assets. GECC had non-cash transactions related to foreclosed properties and repossessed assets totaling \$482 million, \$839 million and

\$859 million in 2013, 2012 and 2011, respectively.

(131)

Certain supplemental information related to our cash flows is shown below.

(132)

NOTE 19. OPERATING SEGMENTS

Basis for presentation

Our operating businesses are organized based on the nature of markets and customers. Segment accounting policies are the same as described in Note 1. Segment results include an allocation for a portion of corporate overhead costs, which include such items as employee compensation and benefits. Segment results reflect the discrete tax effect of transactions, but the intraperiod tax allocation is reflected outside of the segment unless otherwise noted in segment results.

Effects of transactions between related companies are made on an arms-length basis and are eliminated. As a wholly-owned subsidiary, GECC enters into various operating and financing arrangements with GE. These arrangements are made on an arms-length basis but are related party transactions and therefore require the following disclosures. At December 31, 2013 and 2012, financing receivables included \$8,582 million and \$7,131 million, respectively, of receivables from GE customers. At December 31, 2013 and 2012, other receivables included \$7,076 million and \$5,274 million, respectively, of receivables from GE. Property, plant and equipment included \$1,011 million and \$1,015 million, respectively, of property, plant and equipment leased to GE, net of accumulated depreciation. Borrowings included \$1,220 million and \$1,061 million, respectively, of amounts held by GE.

On February 22, 2012, our parent, General Electric Capital Services, Inc. (GE Capital Services or GECS) was merged with and into, GECC. GECC's continuing operations now include the run-off insurance operations previously held and managed in GECS, and which are reported in corporate items and eliminations. Unless otherwise indicated, references to GECC and the GE Capital segment in this Form 10-K Report relate to the entity or segment as they exist subsequent to the February 22, 2012 merger.

A description of our operating segments as of December 31, 2013, can be found below, and details of segment profit by operating segment can be found in the Summary of Operating Segments table in Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations."

CLL has particular mid-market expertise, and primarily offers secured commercial loans, equipment financing and other financial services to companies across a wide range of industries including construction, retail, manufacturing, transportation, media, communications, technology and healthcare. Equipment financing activities include industrial, medical, fleet vehicles, corporate aircraft, construction, office imaging and many other equipment types.

Consumer offers a full range of financial products including private-label credit cards; personal loans; bank cards; auto loans and leases; mortgages; debt consolidation; home equity loans; deposit and other savings products; and small and medium enterprise lending on a global basis.

Real Estate offers a comprehensive range of capital and investment solutions and finances, with both equity and loan structures, the acquisition, refinancing and renovation of office buildings, apartment buildings, retail facilities, hotels and industrial properties.

Energy Financial Services offers financial products to the global energy industry including structured equity, debt, leasing, partnership financing, product finance, and broad-based commercial finance.

GECAS, our commercial aircraft financing and leasing business, offers a wide range of aircraft types and financing options, including operating leases and secured debt financing, and also provides productivity solutions including spare engine leasing, airport and airline consulting services, and spare parts financing and management.

(a) Assets of discontinued operations are included in GECC corporate items and eliminations for all periods presented.

(b) Total assets of the CLL, Consumer, Energy Financial Services and GECAS operating segments at December 31, 2013, include investment in and advances to associated companies of \$4,549 million, \$5,152 million, \$7,233 million and \$414 million, respectively. Investments in and advances to associated companies contributed approximately \$324 million, \$1,009 million, \$339 million and \$137 million, respectively, to segment pre-tax income of the CLL, Consumer, Energy Financial Services and GECAS operating segments, respectively, for the year ended December 31, 2013.

(c) Aggregate summarized financial information for significant associated companies assuming a 100% ownership interest included total assets at December 31, 2013 and 2012 of \$84,305 million and \$110,695 million, respectively. Assets were primarily financing receivables of \$46,655 million and \$66,878 million at December 31, 2013 and 2012, respectively. Total liabilities at December 31, 2013 and 2012 were \$59,559 million and \$81,784 million, respectively, comprised primarily of bank deposits of \$5,876 million and \$26,386 million at December 31, 2013 and 2012, respectively, and debt of \$39,034 million and \$42,664 million at December 31, 2013 and 2012, respectively. Revenues for 2013, 2012 and 2011 totaled \$16,193 million, \$17,592 million and \$15,898 million, respectively, and net earnings for 2013, 2012 and 2011 totaled \$2,444 million, \$2,861 million and \$2,178 million, respectively.

Property, plant and equipment – net associated with operations based in the United States were \$11,655 million, \$11,207 million and \$11,292 million at year-end 2013, 2012 and 2011, respectively. Property, plant and equipment – net associated with operations based outside the United States were \$39,952 million, \$41,760 million and \$39,252 million at year-end 2013, 2012 and 2011, respectively.

Not applicable.

Item 9A. Controls and Procedures.

Under the direction of our Chief Executive Officer and Chief Financial Officer, we evaluated our disclosure controls and procedures and internal control over financial reporting and concluded that (i) our disclosure controls and procedures were effective as of December 31, 2013, and (ii) no change in internal control over financial reporting occurred during the quarter ended December 31, 2013, that has materially affected, or is reasonably likely to materially affect, such internal control over financial reporting.

Management's annual report on internal control over financial reporting and the report of our independent registered public accounting firm appears in Part II, Item 8. "Financial Statements and Supplementary Data" of this Form 10-K Report.

Item 9B. Other Information.

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Not required by this form.

Item 11. Executive Compensation.

Not required by this form.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Not required by this form.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Not required by this form.

Item 14. Principal Accounting Fees and Services.

The aggregate fees billed for professional services by KPMG LLP, in 2013 and 2012 were:

(In millions)	2013	2012
Type of fees		
Audit fees	\$30.1	\$31.2
Audit-related fees	5.7	4.3
Tax fees	1.3	4.6

Total	\$37.1	\$40.1
-------	--------	--------

(136)

In the above table, in accordance with the Securities and Exchange Commission's definitions and rules, "Audit fees" are fees we paid KPMG for professional services for the audit of our annual financial statements included in the Form 10-K and review of financial statements included in the Form 10-Qs; for the audit of our internal control over financial reporting with the objective of obtaining reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects; and for services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements. "Audit-related fees" are fees for assurance and related services that are reasonably related to the performance of the audit or the review of our financial statements and internal control over financial reporting, including services in connection with assisting the company in its compliance with its obligations under Section 404 of the Sarbanes-Oxley Act and related regulations. "Audit-related fees" also include merger and acquisition due diligence and audit services and employee benefit plan audits. "Tax fees" are fees for tax compliance, tax advice and tax planning.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

(a) 1. Financial Statements

Included in Part II of this report:

Report of Independent Registered Public Accounting Firm
Management's Annual Report on Internal Control over Financial Reporting

Notes to Condensed Financial Statements

Financial statements presentation

We have reclassified certain prior-year amounts to conform to the current year's presentation.

Borrowings

Borrowings at December 31, 2013 and 2012 included short-term borrowings of \$54,409 and \$73,812, respectively, and long-term borrowings of \$137,529 and \$145,157, respectively. Total long-term borrowings at December 31, 2013 and 2012, are shown below.

December 31 (Dollars in millions)	2013 Average rate(a)	Maturities	2013	2012
Senior unsecured notes	3.27	2015-2054	\$ 119,231	\$ 128,809
Subordinated notes(b)	3.67	2021-2037	4,804	4,947
Subordinated debentures(c)	5.64	2066-2067	7,462	7,286
Other			6,032	4,115
			\$ 137,529	\$ 145,157

(a) Based on year-end balances and year-end local currency interest rates, including the effects from hedging.

(b) Included \$300 million of subordinated notes guaranteed by GE at December 31, 2013 and 2012.

(c) Subordinated debentures receive rating agency equity credit and were hedged at issuance to U.S. dollar equivalent of \$7,725 million.

At December 31, 2013, maturities of long-term borrowings during the next five years, including the current portion of long-term debt, are \$20,800 million in 2014, \$24,926 million in 2015, \$19,698 million in 2016, \$15,709 million in 2017 and \$11,038 million in 2018.

Interest rate and currency risk is managed through the direct issuance of debt or use of derivatives. We mitigate interest rate and currency risk by seeking to ensure that the characteristics of the debt match the assets they are funding. We use a variety of instruments, including interest rate and currency swaps and currency forwards, to achieve our interest rate objectives.

Interest expense on the Condensed Statement of Current and Retained Earnings is presented net of interest income on loans and advances to majority owned affiliates of \$3,916 million, \$5,647 million and \$5,473 million and interest expense on loans and advances from majority owned affiliates of \$1,348 million, \$2,817 million and \$2,625 million for 2013, 2012 and 2011, respectively.

Income taxes

General Electric Company files a consolidated U.S. federal income tax return that includes General Electric Capital Corporation. Income tax benefit (expense) includes our effect on the consolidated return.

Shareowners' Equity

During 2013, we issued 10,000 shares of non-cumulative perpetual preferred stock with a \$0.01 par value for proceeds of \$990 million. The preferred shares bear an initial fixed interest rate of 5.25% through June 15, 2023, bear a floating rate equal to three-month LIBOR plus 2.967% thereafter and are callable on June 15, 2023. Dividends on the GECC preferred stock are payable semi-annually, in June and December, with the first payment on this issuance made in December 2013.

(143)

During 2012, we issued 40,000 shares of non-cumulative perpetual preferred stock with a \$0.01 par value for proceeds of \$3,960 million. Of these shares, 22,500 bear an initial fixed interest rate of 7.125% through June 15, 2022, bear a floating rate equal to three-month LIBOR plus 5.296% thereafter and are callable on June 15, 2022, and 17,500 shares bear an initial fixed interest rate of 6.25% through December 15, 2022, bear a floating rate equal to three-month LIBOR plus 4.704% thereafter and are callable on December 15, 2022. Dividends on the preferred stock are payable semi-annually, in June and December, with the first payment on these issuances made in December 2012.

During 2013 and 2012, we paid preferred stock dividends of \$298 million and \$123 million, respectively. During 2013 and 2012, we paid quarterly dividends of \$1,930 million and \$1,926 million, respectively, and special dividends of \$4,055 million and \$4,500 million, respectively, to GE. No dividends were paid during 2011.
