Notes to Consolidated Financial Statements

(Unaudited)

NOTE 1 – BASIS OF FINANCIAL STATEMENT PRESENTATION AND PRINCIPLES OF CONSOLIDATION

The accompanying unaudited interim consolidated financial statements of BancorpSouth, Inc. (the “Company”) have been prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”) and follow general practices within the industries in which the Company operates. For further information, refer to the audited consolidated financial statements and notes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015. In the opinion of management, all adjustments necessary for a fair presentation of the consolidated financial statements have been included and all such adjustments were of a normal, recurring nature. The results of operations for the three-month and nine-month periods ended September 30, 2016 are not necessarily indicative of the results to be expected for the full year. Certain 2015 amounts have been reclassified to conform with the 2016 presentation.

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries, BancorpSouth Bank (the “Bank”) and Gumtree Wholesale Insurance Brokers, Inc., and the Bank’s wholly-owned subsidiaries, BancorpSouth Insurance Services, Inc., BancorpSouth Municipal Development Corporation and BancorpSouth Bank Securities Corporation.

NOTE 2 – LOANS AND LEASES

The Company’s loan and lease portfolio is disaggregated into the following segments: commercial and industrial; real estate; credit card; and all other. The real estate segment is further disaggregated into the following classes: consumer mortgages; home equity; agricultural; commercial and industrial-owner occupied; construction, acquisition and development; and commercial real estate. A summary of gross loans and leases by segment and class as of the dates indicated follows:

(1) Gross loans and leases are net of deferred fees and costs of \$2.2 million, approximately (\$232,000) and (\$214,000) at September 30, 2016 and 2015 and December 31, 2015, respectively.

Edgar Filing: BANCORPSOUTH INC - Form 10-Q

The following table shows the Company's loans and leases, net of unearned income, as of September 30, 2016 by segment, class and geographical location:

There are no other loan and lease concentrations which exceed 10% of total loans and leases not already reflected in the preceding tables. A substantial portion of construction, acquisition and development loans are secured by real estate in markets in which the Company is located. The Company's loan policy generally prohibits the use of interest reserves. Certain of the construction, acquisition and development loans were structured with interest-only terms. A portion of the consumer mortgage and commercial real estate portfolios were originated through the permanent financing of construction, acquisition and development loans. Future economic distress could negatively impact borrowers' and guarantors' ability to repay their debt which would make more of the Company's loans collateral dependent.

The following tables provide details regarding the aging of the Company's loan and lease portfolio, net of unearned income, by segment and class at September 30, 2016 and December 31, 2015:

The Company utilizes an internal loan classification system to grade loans according to certain credit quality indicators. These credit quality indicators include, but are not limited to, recent credit performance, delinquency, liquidity, cash flows, debt coverage ratios, collateral type and loan-to-value ratio. The Company's internal loan classification system is compatible with classifications used by the Federal Deposit Insurance Corporation, as well as other regulatory agencies. Loans may be classified as follows:

Pass: Loans which are performing as agreed with few or no signs of weakness. These loans show sufficient cash flow, capital and collateral to repay the loan as agreed.

Special Mention: Loans where potential weaknesses have developed which could cause a more serious problem if not corrected.

Edgar Filing: BANCORPSOUTH INC - Form 10-Q

Substandard: Loans where well-defined weaknesses exist that require corrective action to prevent further deterioration. Loans are further characterized by the possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful: Loans having all the characteristics of Substandard and which have deteriorated to a point where collection and liquidation in full is highly questionable.

Loss: Loans that are considered uncollectible or with limited possible recovery.

Impaired: Loans for which it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement and for which a specific impairment reserve has been considered.

The following tables provide details of the Company's loan and lease portfolio, net of unearned income, by segment, class and internally assigned grade at September 30, 2016 and December 31, 2015:

Loans considered impaired under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 310, Receivables (“FASB ASC 310”), are loans greater than \$500,000 for which, based on current information and events, it is probable that the Company will be unable to collect all amounts due according

to the contractual terms of the loan agreement and all loans restructured in a TDR. The Company's recorded investment in loans considered impaired exclusive of accruing TDRs at September 30, 2016 and December 31, 2015 was \$39.1 million and \$51.4 million, respectively. At September 30, 2016 and December 31, 2015, \$13.2 million and \$15.0 million, respectively, of those impaired loans had a valuation allowance of \$3.7 million and \$2.4 million, respectively. The remaining balance of impaired loans of \$25.9 million and \$36.4 million at September 30, 2016 and December 31, 2015, respectively, have sufficient collateral supporting the collection of all outstanding principle or were charged down to fair value, less estimated selling costs. Therefore, such loans did not have an associated valuation allowance. Impaired loans that were characterized as non-accruing TDRs totaled \$11.4 million and \$15.1 million at September 30, 2016 and December 31, 2015, respectively.

Non-performing loans and leases ("NPLs") consist of non-accrual loans and leases, loans and leases 90 days or more past due and still accruing, and loans and leases that have been restructured (primarily in the form of reduced interest rates and modified payment terms) because of the borrower's weakened financial condition or bankruptcy proceedings. The following table presents information concerning NPLs as of the dates indicated:

	September 30,		December 31,
	2016	2015	2015
	(In thousands)		
Non-accrual loans and leases	\$ 70,725	\$ 70,237	\$ 83,028

Total non-performing loans and leases	\$ 90,916	\$ 90,251	\$ 94,917

The Bank's policy for all loan classifications provides that loans and leases are generally placed in non-accrual status if, in management's opinion, payment in full of principal or interest is not expected or payment of principal or interest is more than 90 days past due, unless such loan or lease is both well-secured and in the process of collection. At September 30, 2016, the Company's geographic NPL distribution was concentrated primarily in its Arkansas, Louisiana and Mississippi markets. The following table presents the Company's nonaccrual loans and leases by segment and class as of the dates indicated:

In the normal course of business, management will sometimes grant concessions, which would not otherwise be considered, to borrowers that are experiencing financial difficulty. Loans identified as meeting the criteria set out in FASB ASC 310 are identified as TDRs. The concessions granted most frequently for TDRs involve reductions or delays in required payments of principal and interest for a specified period, the rescheduling of payments in accordance with a bankruptcy plan. In most cases, the conditions of the credit also warrant nonaccrual status, even after the restructure occurs. Other conditions that warrant a loan being considered a TDR include reductions in interest rates to below market rates due to bankruptcy plans or by the bank in an attempt to assist the borrower in working through liquidity problems. As part of the credit approval process, the restructured loans are evaluated for adequate collateral

Edgar Filing: BANCORPSOUTH INC - Form 10-Q

protection in determining the appropriate accrual status at the time of restructure. TDRs recorded as nonaccrual loans may generally be returned to accrual status in years after the restructure if there has been at least a six-month period of sustained repayment performance by the borrower in accordance with the terms of the restructured loan. During the third quarter of 2016, the most common concessions that were granted involved rescheduling payments of principal and interest over a longer amortization period, granting a period of reduced principal payment or interest only payment for a limited time period, or the rescheduling of payments in accordance with a bankruptcy plan or a reduction in interest rates.

The following tables summarize the financial effect of TDRs recorded during the periods indicated:

Management evaluates impaired loans individually in determining the allowance for impaired loans. As a result of the Company individually evaluating loans of \$500,000 or greater for impairment, further review of remaining loans collectively, as well as the corresponding potential allowance, would be immaterial in the opinion of management.

Based upon a review of the credit quality of these securities, and considering that the issuers were in compliance with the terms of the securities, management has no intent to sell these securities until the full recovery of unrealized losses which may be until maturity, and it was more likely than not that the Company would not be required

to sell the securities prior to recovery of costs. Therefore, the impairments related to these securities were determined to be temporary. No other-than-temporary impairment was recorded during the first nine months of 2016 or 2015.

## NOTE 6 – PER SHARE DATA

Basic earnings per share (“EPS”) are calculated using the two-class method. The two-class method provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of basic EPS. Diluted EPS is computed using the weighted-average number of shares determined for the basic EPS computation plus the shares resulting from the assumed exercise of all outstanding share-based awards using the treasury stock method. Weighted-average antidilutive stock options to purchase approximately 32,400 and 45,000 shares of Company common stock with a weighted average exercise price of \$24.47 and \$24.71 per share for the three months and nine months ended September 30, 2016 were excluded from diluted shares. There were no antidilutive other equity awards for the three months and nine months ended September 30, 2016. Weighted-average antidilutive stock options to purchase approximately 32,400 of Company common stock with a weighted average exercise price of \$25.31 per share for both the three months and nine months ended September 30, 2015 were excluded from diluted shares. There were no antidilutive other equity awards for the three months and nine months ended September 30, 2015. The following table provides a reconciliation of the numerators and denominators of the basic and diluted earnings per share computations for the periods shown:

#### NOTE 8 – GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amounts of goodwill by operating segment for the nine months ended September 30, 2016 were as follows:

Community Banking	Insurance Agencies	Total
----------------------	-----------------------	-------

	(In thousands)		
Balance as of December 31, 2015	\$ 217,618	\$ 73,880	\$ 291,498
Goodwill recorded during the period	-	3,403	3,403
Balance as of September 30, 2016	\$ 217,618	\$ 77,283	\$ 294,901

The goodwill recorded in the Company's Insurance Agencies reporting segment during the first nine months of 2016 was related to an insurance agency acquired during the second quarter of 2016.

The Company's policy is to assess goodwill for impairment at the reporting segment level on an annual basis or sooner if an event occurs or circumstances change which indicate that the fair value of a reporting segment is below its carrying amount. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. Accounting standards require management to estimate the fair value of each reporting segment in assessing impairment at least annually. The Company's annual assessment date is during the Company's fourth quarter. No events occurred during the first nine months of 2016 that indicated the necessity of an earlier goodwill impairment assessment.

In the current economic environment, forecasting cash flows, credit losses and growth in addition to valuing the Company's assets with any degree of assurance is very difficult and subject to significant changes over very short periods of time. Management will continue to update its analysis as circumstances change. As market conditions continue to be volatile and unpredictable, impairment of goodwill related to the Company's reporting segments may be necessary in future periods.

The following tables present information regarding the components of the Company's identifiable intangible assets for the dates and periods indicated:

## NOTE 10 – RECENT PRONOUNCEMENTS

In September 2014, the FASB issued an ASU regarding accounting for revenue from contracts with customers. This ASU implements a common revenue standard that clarifies the principles for recognizing revenue. The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: (i) identify the contract(s) with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract and (v) recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 was originally going to be effective on January 1, 2017; however, the FASB issued ASU 2015-14, "Revenue from Contracts with Customers (Topic 606)–Deferral of the Effective Date" which deferred the effective date of ASU 2014-09 by one year to January 1, 2018. The Company is currently evaluating the potential impact of ASU 2014-09 on the financial statements.

In December 2014, the FASB issued an ASU regarding accounting for share-based payments. This ASU requires entities to apply existing guidance in Topic 718 to any performance target that affects vesting and that could be achieved after the requisite service period to be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. The amendments in this update are effective for interim and annual periods beginning after December 15, 2015. This ASU did not have a material impact on the financial position and results of operations of the Company.

In February 2016, the FASB issued an ASU regarding accounting for leases. ASU 2016-02 requires all leases, except short-term leases, to be recognized on the lessee's balance sheet at commencement date as a lease liability for the obligation of lease payments and a right-of-use asset for the right to use/control a specified asset for the lease term.

This ASU is effective for interim and annual periods beginning after December 15, 2018. This ASU is not expected to have a material impact on the financial position and results of operations of the Company.

In March 2016, the FASB issued an ASU regarding stock compensation and improvements to employee share-based payment accounting. This ASU changes five aspects of the accounting for share-based payment award transactions including 1) accounting for income taxes; 2) classification of excess tax benefits on the statement of cash flows; 3) forfeitures; 4) minimum statutory tax withholding requirements; 5) classification of employee taxes paid on the statement of cash flows when an employer withholds shares for tax-withholding purposes. This ASU is effective for interim and annual periods beginning after December 15, 2016. This ASU will not have a material impact on the financial position and results of operations of the Company.

In June 2016, the FASB issued an ASU regarding credit losses on financial instruments. This ASU will provide financial statement users with more information regarding the expected credit losses on financial instruments and other commitments to extend credit at each reporting date rather than the incurred loss impairment method. This ASU is effective for interim and annual periods after December 15, 2019. The Company is currently evaluating the potential impact of this ASU on the financial statements.

In August 2016, the FASB issued an ASU regarding how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The update addresses eight specific cash flow items whose objective is to reduce existing diversity in practice. This ASU is effective for interim and annual periods after

December 15, 2017. The adoption of this ASU is not expected to have a material impact on the financial position and results of operations of the Company.

## NOTE 11 - SEGMENT REPORTING

The Company is a financial holding company with subsidiaries engaged in the business of banking and activities closely related to banking. The Company determines reportable segments based upon the services offered, the significance of those services to the Company's financial condition and operating results and management's regular review of the operating results of those services. The Company's primary segment is Community Banking, which includes providing a full range of deposit products, commercial loans and consumer loans. The Company has also designated two additional reportable segments -- Insurance Agencies and General Corporate and Other. The Company's insurance agencies serve as agents in the sale of commercial lines of insurance and full lines of property and casualty, life, health and employee benefits products and services. The General Corporate and Other operating segment includes mortgage banking, trust services, credit card activities, investment services and other activities not allocated to the Community Banking or Insurance Agencies operating segments.

Results of operations and selected financial information by operating segment for the three-month and nine-month periods ended September 30, 2016 and 2015 were as follows:

The change in income for the General, Corporate and Other division for the three months and nine months ended September 30, 2016 compared to the same periods in 2015 is mainly due to a change in mortgage banking revenue.

#### NOTE 12 – MORTGAGE SERVICING RIGHTS

Mortgage servicing rights (“MSRs”), which are recognized as a separate asset on the date the corresponding mortgage loan is sold on a servicing retained basis, are recorded at fair value as determined at each accounting period end. An

Edgar Filing: BANCORPSOUTH INC - Form 10-Q

estimate of the fair value of the Company's MSR's is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Data and assumptions used in the fair value calculation related to MSR's as of the dates indicated were as follows:

	September 30, 2016	September 30, 2015	December 31, 2015
	(Dollars in thousands)		
Unpaid principal balance	\$6,285,027	\$5,942,736	\$6,011,236
Weighted-average prepayment speed (CPR)	12.7	11.1	10.3
Discount rate (annual percentage)	9.8	9.8	9.8
Weighted-average coupon interest rate (percentage)	4.0	4.1	4.0
Weighted-average remaining maturity (months)	322.0	317.0	319.0
Weighted-average servicing fee (basis points)	26.7	26.6	26.6

Because the valuation is determined by using discounted cash flow models, the primary risk inherent in valuing the MSR is the impact of fluctuating interest rates on the estimated life of the servicing revenue stream. The use of different estimates or assumptions could also produce different fair values. As of September 30, 2016, the Company had a hedge in place designed to cover approximately 3% of the MSR. The Company is susceptible to fluctuations in their value of its MSRs in changing interest rate environments.

The Company has only one class of mortgage servicing asset comprised of closed end loans for one-to-four family residences, secured by first liens. The following table presents the activity in this class for the periods indicated:

	2016	2015
	(In thousands)	
Fair value as of January 1	\$ 57,268	\$ 51,296
Additions:		
Origination of servicing assets	10,684	11,074
Changes in fair value:		
Due to payoffs/paydowns	(5,784)	(5,366)
Due to change in valuation inputs or assumptions used in the valuation model	(10,233)	(4,026)
Other changes in fair value	(5)	(5)
Fair value as of September 30	\$ 51,930	\$ 52,973

All of the changes to the fair value of the MSRs are recorded as part of mortgage banking noninterest revenue on the consolidated statements of income. As part of mortgage banking noninterest revenue, the Company recorded contractual servicing fees of \$4.3 million and \$4.0 million and late and other ancillary fees of approximately \$243,000 and \$320,000 for the three months ended September 30, 2016 and 2015, respectively. The Company recorded contractual servicing fees of \$12.6 million and \$11.9 million and late and other ancillary fees of \$1.5 million and approximately \$982,000 for the nine months ended September 30, 2016 and 2015, respectively.

#### NOTE 13 – DERIVATIVE INSTRUMENTS AND OFFSETTING ASSETS AND LIABILITIES

The derivatives held by the Company include commitments to fund fixed-rate mortgage loans to customers and forward commitments to sell individual fixed-rate mortgage loans. The Company's objective in obtaining the forward commitments is to mitigate the interest rate risk associated with the commitments to fund the fixed-rate mortgage loans. Both the commitments to fund fixed-rate mortgage loans and the forward commitments to sell individual fixed-rate mortgage loans are reported at fair value, with adjustments being recorded in current period earnings, and are not accounted for as hedges. At September 30, 2016, the notional amount of forward commitments to sell individual fixed-rate mortgage loans was \$264.3 million with a carrying value and fair value reflecting a loss of \$1.1 million. At September 30, 2015, the notional amount of forward commitments to sell individual fixed-rate mortgage loans was \$229.5 million with a carrying value and fair value reflecting a loss of \$2.1 million. At September 30, 2016, the notional amount of commitments to fund individual fixed-rate mortgage loans was \$223.0 million with a carrying value and fair value reflecting a gain of \$6.9 million. At September 30, 2015, the notional amount of

commitments to fund individual fixed-rate mortgage loans was \$158.1 million with a carrying value and fair value reflecting a gain of \$4.9 million.

The Company also enters into derivative financial instruments in the form of interest rate swaps to meet the financing, interest rate and equity risk management needs of its customers. Upon entering into these interest rate swaps to meet customer needs, the Company enters into offsetting positions to minimize interest rate and equity risk to the Company. These derivative financial instruments are reported at fair value with any resulting gain or loss recorded in current period earnings. These instruments and their offsetting positions are recorded in other assets and other liabilities on the consolidated balance sheets. As of September 30, 2016, the notional amount of customer related derivative financial instruments was \$231.3 million with an average maturity of 33 months, an average interest receive rate of 2.8% and an average interest pay rate of 5.6%. As of September 30, 2015, the notional amount of customer related derivative financial instruments was \$272.6 million with an average maturity of 43 months, an average interest receive rate of 2.5% and an average interest pay rate of 5.6%.

Additionally, the Bank utilizes securities sold under agreements to repurchase to facilitate the needs of our customers and to facilitate secured short-term funding needs. Securities sold under agreements to repurchase are stated

Edgar Filing: BANCORPSOUTH INC - Form 10-Q

at the amount of cash received in connection with the transaction. The Bank monitors collateral levels on a continuous basis and may be required to provide additional collateral based on the fair value of the underlying securities.

Certain financial instruments such as derivatives, may be eligible for offset in the consolidated balance sheet and/or subject to master netting arrangements or similar agreements. The Bank's derivative transactions with upstream financial institution counterparties are generally executed under International Swaps and Derivative Association master agreements which include "right of set-off" provisions. In such cases there is generally a legally enforceable right to offset recognized amounts and there may be an intention to settle such amounts on a net basis. Nonetheless, the Bank does not generally offset such financial instruments for financial reporting purposes.

The following tables present components of financial instruments eligible for offsetting for the periods indicated:
