Dear Shareholder

Though we ve seen spates of volatility over the past year, riskier asset classes generally outperformed lower-risk investments. Financial markets rallied last fall after the European Central Bank and the US Federal Reserve announced aggressive monetary stimulus programs, substantially increasing global liquidity. But markets weakened later in the year amid slowing global trade as many European countries fell into recession and growth continued to decelerate in China. In the United States, investors became increasingly concerned about the fiscal cliff of tax increases and spending cuts that had been scheduled to take effect at the beginning of 2013. High levels of global market volatility persisted through year-end due to fears that bipartisan gridlock would preclude a timely resolution, putting the US economy at risk for recession.

The worst of the fiscal cliff was averted with a last-minute tax deal, allowing markets to get off to a good start in 2013. Money that had been pulled to the sidelines amid year-end tax-rate uncertainty poured back into the markets in January. Key indicators signaling modest but broad-based improvements in the world s major economies coupled with the absence of negative headlines from Europe created an aura of comfort for investors. Global equities surged, while rising US Treasury yields pressured high quality fixed income assets. (Bond prices move in the opposite direction of yields.)

February brought a slowdown in global economic momentum and the pace of the rally moderated. In the months that followed, US equities outperformed international markets, as the US economic recovery showed greater stability compared to most other regions. Slow, but positive, growth in the United States was sufficient to support corporate earnings, while uncomfortably high unemployment reinforced investors expectations that the US Federal Reserve would keep interest rates low. International markets experienced higher levels of volatility given a resurgence of political instability in Italy and a severe banking crisis in Cyprus, while a poor outlook for European economies also dampened sentiment for overseas investment. Emerging markets significantly lagged the rest of the world as growth in these economies (particularly China and Brazil) fell short of expectations.

After peaking in late May, equity markets broadly sold off due to concerns about the US Federal Reserve reducing monetary stimulus. Volatility picked up considerably as investors abruptly retreated from risk assets and a sharp and dramatic rise in US Treasury yields resulted in tumbling prices for higher-quality fixed income investments. The downswing bottomed out in late June as a more dovish tone from the US central bank served to quell the extreme level of volatility in interest rates. Improving economic data and a positive outlook for corporate earnings helped financial markets regain strength in July, with major US equity indices hitting new record highs. However, markets slumped again in August as investors became more wary amid a number of unknowns. Mixed economic data spurred heightened uncertainty about the future of global growth and investors grew anxious about the timing and extent to which the US Federal Reserve would scale back on its asset-purchase program. Meanwhile, escalating political turmoil in Egypt and Syria renewed concerns about the impact of the broader issue of growing unrest in many countries across the Middle East-North Africa region.

On the whole, developed market equities generated strong returns for the 6- and 12-month periods ended August 31, 2013. Emerging markets, in contrast, suffered the impact of slowing growth and concerns about a shrinking global money supply. Extraordinary levels of interest rate volatility in the latter part of the period resulted in poor performance for most fixed income assets, especially US Treasury bonds and other higher quality sectors such as tax-exempt municipals and investment grade corporate bonds. Conversely, high yield bonds posted gains as the sector continued to benefit from investors ongoing search for income in the low-rate environment. Short-term interest rates remained near zero, keeping yields on money market securities near historical lows.

Markets remain volatile, and investors continue to face a number of uncertainties in the current environment. At BlackRock, we believe investors need to think globally and extend their scope across a broader array of asset classes and be prepared to move freely as market conditions change over time. We encourage you to talk with your financial advisor and visit **www.blackrock.com** for further insight about investing in today s world.

Sincerely,

Rob Kapito

Fund Summary as of August 31, 2013 **Fund Overview**

BlackRock Defined Opportunity Credit Trust

BlackRock Defined Opportunity Credit Trust s (BHL) (the Fund) primary investment objective is to provide high current income, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve its investment objectives by investing substantially all of its assets in loan and debt instruments and loan-related and debt-related instruments (collectively credit securities). The Fund invests, under normal market conditions, at least 80% of its assets in any combination of the following credit securities: (i) senior secured floating rate and fixed rate loans; (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans; (ii) negative that are rated below investment grade quality; and (iv) investment grade corporate bonds. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objectives will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the 12-month period ended August 31, 2013, the Fund returned 4.82% based on market price and 8.52% based on net asset value (NAV). For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 6.05% based on market price and 9.92% based on NAV. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The Fund benefited from a tactical allocation to equities, which rallied during the period. In fixed income, security selection in the healthcare, technology and gaming industries boosted results. The Fund s tactical allocation to high yield bonds generated additional gains as the asset class outperformed floating rate loan interests (bank loans) during the period.

Conversely, the Fund s exposure to names in the media non cable industry detracted from performance. From a quality perspective, the Fund s exposure to higher rated loan instruments hindered overall results as this segment of the market underperformed lower quality loans.

Describe recent portfolio activity.

During the period, the Fund maintained its focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. The Fund continued to seek issuers with attractive risk-reward characteristics and superior fundamentals while remaining cautious of lower-rated segments of the market. The bank loan market was strong in 2012 and continued to rally in 2013, attributable largely to robust demand from investors seeking protection from interest rate risk in their fixed income portfolios. Despite the positive market environment, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macro risks. As the average loan has been trading at or just above par, leaving little or no potential for capital appreciation, the Fund s principal emphasis is on investing in strong companies with the ability to pay their debts despite a slow growth environment. Over the 12-month period, the Fund added to positions in the technology and gaming industries.

Describe portfolio positioning at period end.

At period end, the Fund held 94% of its total portfolio in floating rate loan interests, with the remainder in corporate bonds, asset-backed securities and common stocks. The Fund s highest-conviction holdings included Caesars Entertainment Corp. (gaming), Federal-Mogul Corp. (automotive) and Level 3 Financing, Inc. (wirelines).

Fund Summary as of August 31, 2013 **Fund Overview** **BlackRock Floating Rate Income Strategies Fund, Inc.**

BlackRock Floating Rate Income Strategies Fund, Inc. s (FRA) (the Fund) investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. The Fund may invest directly in such securities or synthetically through the use of derivatives.

On October 8, 2012, the Fund acquired substantially all of the assets and assumed substantially all of the liabilities of BlackRock Diversified Income Strategies Fund, Inc. and BlackRock Floating Rate Income Strategies Fund II, Inc. in exchange for newly issued shares of the Fund.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the 12-month period ended August 31, 2013, the Fund returned 5.28% based on market price and 9.68% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 6.05% based on market price and 9.92% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

The Fund benefited from a tactical allocation to equities, which rallied during the period. In fixed income, security selection in the chemicals, paper and gaming industries boosted results. The Fund s tactical allocation to high yield bonds generated additional gains as the asset class outperformed floating rate loan interests (bank loans) during the period.

Conversely, the Fund s exposure to names in the media non cable and independent energy industries detracted from performance. From a quality perspective, the Fund s exposure to higher rated loan instruments hindered overall results as this segment of the market underperformed lower quality loans. **Describe recent portfolio activity.**

During the period, the Fund maintained its focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. The Fund continued to seek issuers with attractive risk-reward characteristics and superior fundamentals while remaining cautious of lower-rated segments of the market. The bank loan market was strong in 2012 and continued to rally in 2013, attributable largely to robust demand from investors seeking protection from interest rate risk in their fixed income portfolios. Despite the positive market environment, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macro risks. As the average loan has been trading at or just above par, leaving little or no potential for capital appreciation, the Fund s principal emphasis is on investing in strong companies with the ability to pay their debts despite a slow growth environment. Over the 12-month period, the Fund added to positions in the technology and healthcare industries.

Describe portfolio positioning at period end.

At period end, the Fund held 92% of its total portfolio in floating rate loan interests, with the remainder in corporate bonds, asset-backed securities and common stocks. The Fund s highest-conviction holdings included Caesars

Entertainment Corp. (gaming), Federal-Mogul Corp. (automotive) and Ally Financial, Inc. (banking).

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSR ANNUAL REPORT AUGUST 31, 2013 7

Fund Summary as of August 31, 2013 **Fund Overview**

BlackRock Limited Duration Income Trust

BlackRock Limited Duration Income Trust s (BLW) (the Fund) investment objective is to provide current income and capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in three distinct asset classes:

intermediate duration, investment grade corporate bonds, mortgage-related securities, asset-backed securities and US Government and agency securities;

senior, secured floating rate loans made to corporate and other business entities; and

US dollar-denominated securities of US and non-US issuers rated below investment grade and, to a limited extent, non-US dollar denominated securities of non-US issuers rated below investment grade.

The Fund s portfolio normally has an average portfolio duration of less than five years (including the effect of anticipated leverage), although it may be longer from time to time depending on market conditions. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the 12-month period ended August 31, 2013, the Fund returned 1.47% based on market price and 9.13% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of (2.68)% based on market price and 10.20% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Fixed income markets experienced two trends over the 12-month period. In the first half of the period, riskier assets rallied as investors sought higher-yielding investments amid historically low yields. Prices moved higher and spreads tightened across most fixed income sectors. However, a new trend took hold in May when US Federal Reserve Chairman Bernanke alluded to a potential tapering of the central bank s bond-buying stimulus program toward the end of 2013, triggering a sharp decline in fixed income markets. Spreads widened rapidly across fixed income sectors as yields rose and volatility increased.

The main contributors to the Fund s performance were its holdings of corporate bonds, commercial mortgage-backed securities (CMBS) and non-US dollar positions, particularly in the British pound sterling and the euro. The Fund benefited from anchored short-term rates (while longer-term rates increased) given strong demand for short-term paper from investors seeking to reduce duration (sensitivity to interest rate movements) in their portfolios. The increase in interest rates in the latter part of the period had a negative impact on the Fund s return. (Bond prices fall as rates rise.) Although, it is important to note that the Fund s overall low duration profile served to limit downside risk in the challenging market environment. Also hindering results was the Fund s exposure to 15-year agency pass-through mortgage-backed securities (MBS).

Describe recent portfolio activity.

During the 12-month period, the Fund only made slight changes to its overall asset allocation. The Fund slightly decreased exposure to high yield credit and 15-year agency pass-through MBS, and increased its allocation to asset-backed securities (ABS), particularly within collateralized loan obligations. **Describe portfolio positioning at period end**.

At period end, the Fund maintained diversified exposure to non-government sectors including investment grade credit, high yield credit, floating rate loan interests (bank loans), CMBS, ABS and non-agency residential MBS. The Fund also held exposure to government-related sectors including US Treasury securities and agency MBS.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results. 8ANNUAL REPORT AUGUST 31, 2013

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage through a credit facility or by entering into reverse repurchase agreements. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund s capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Fund s long-term investments, and therefore the Fund s shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Fund pays higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Funds portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Funds borrowings does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds NAVs positively or negatively in addition to the impact on Fund performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Fund to incur losses. The use of leverage may limit each Fund s ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Funds are permitted to issue senior securities representing indebtedness up to 33¹/₃% of their total managed assets (each Fund s net assets plus the proceeds of any outstanding borrowings). If the Funds segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Fund voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of August 31, 2013, the Funds had aggregate economic leverage from reverse repurchase agreements and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

Percent of Economic Leverage 27%

FRA BLW

27% 30%

Derivative Financial Instruments

The Funds may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 4 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate and/or foreign currency exchange rate risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Funds ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders or may cause a Fund to hold an investment that it might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.

¹ Using S&P s rating of the issuer.

² The maximum potential amount the Fund may pay should a negative credit event take place as defined under the terms of agreement.

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and derivative financial instruments, please refer to Note 2 of the Notes to Financial Statements.

See Notes to Financial Statements.

BlackRock Defined Opportunity Credit Trust (BHL)

Schedule of Investments (concluded)

Cash

The following tables summarize the Fund s investments and derivative financial instruments categorized in the disclosure hierarchy as of August 31, 2013:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments				
Asset-Backed Securities			\$ 4,422,403	\$ 4,422,403
Common Stocks		\$ 906,055		906,055
Corporate Bonds		6,180,544		6,180,544
Floating Rate Loan				
Interests		148,899,653	21,940,408	170,840,061
Short-Term Securities	\$ 1,298,26	9		1,298,269

Certain of the Fund s assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of August 31, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows: Level 2 Level 3 Level 1 Total Assets:

\$

973,373

60,000

973,373

\$

Cash pledged for centrally cleared			
swaps			
Foreign currency at value	32,152		32,152
Liabilities:			
Loan payable		\$ (49,000,000)	(49,000,000)
Total	\$ 1,065,525	\$ (49,000,000)	\$ (47,934,475)

There were no transfers between Level 1 and Level 2 during the year ended August 31, 2013. A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

		Asset-Backed Securities	Floating Rate .oan Interests	Total
Assets:				
Opening Balance, as of August 31, 2012	\$	3,427,772	\$ 10,204,028	\$ 13,631,800
Transfers into Level 3 ²			2,501,855	2,501,855
Transfers out of Level 33			(2,409,657)	(2,409,657)
Accrued discounts/premiums		21,481	36,632	58,113
Net realized gain (loss)		175,097	136,297	311,394
Net change in unrealized				
appreciation/depreciation ⁴		205,027	(53,243)	151,784
Purchases		2,828,104	18,959,881	21,787,985
Sales		(2,235,078)	(7,435,385)	(9,670,463)
Closing Balance, as of August 31, 2013	\$	4,422,403	\$ 21,940,408	\$ 26,362,811

As of August 31, 2012, the Fund used observable inputs in determining the value of certain investments. As of ²August 31, 2013, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$2,501,855 transferred from Level 2 to Level 3 in the disclosure hierarchy.

As of August 31, 2012, the Fund used significant unobservable inputs in determining the value of certain ³investments. As of August 31, 2013, the Fund used observable inputs in determining the value of the same ³investments. As a result, investments with a beginning of period value of \$2,409,657 transferred from Level 3 to Level 2 in the disclosure hierarchy.

⁴Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of August 31, 2013 was \$220,533.

Certain of the Fund s investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such

valuations are based on unobservable inputs. A significant change in third party information inputs could result in a significantly lower or higher value of such Level 3 investments. See Notes to Financial Statements.
