PACIFIC FINANCIAL CORPORATION

Notes to Condensed Consolidated Financial Statements Nine months ended September 30, 2005 and 2004

(unaudited)

NOTE 1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared by Pacific Financial Corporation (Pacific or the Company) in accordance with accounting principles generally accepted in the United States of America for interim financial information and with instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for management, adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the nine months ended September 30, 2005, are not necessarily indicative of the results anticipated for the year ending December 31, 2005. Certain information and footnote disclosures included in the Company s consolidated financial statements for the year ended December 31, 2004, have been condensed or omitted from this report. Accordingly, these statements should be read with the financial statements and notes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2004.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

All dollar amounts in tables, except per share information, are stated in thousands.

NOTE 2. Investment Securities

Investment securities consist principally of short and intermediate term debt instruments issued by the U.S. Treasury, other U.S. government agencies, state and local government units, and other corporations.

SECURITIES HELD TO MATURITY		AMORTIZE COST	D	UNREALIZED GAINS) U	NREALIZED LOSSES		FAIR VALUE
September 30, 2005								
U.S. Government Securities	\$	1,300	\$	7	\$		\$	1,307
State and Municipal Securities		5,368		65		22		5,411
	-		_				_	
TOTAL	\$	6,668	\$	72	\$	22	\$	6,718
SECURITIES AVAILABLE FOR SALE	AMORTIZED COST		UNREALIZED GAINS		UNREALIZED LOSSES		FAIR VALUE	
September 30, 2005								
U.S. Government Securities	\$	12,650	\$	42	\$	174	\$	12,518
State and Municipal Securities		12,937		167		40		13,064
Corporate Securities		2,577		14		31		2,560
Mutual Funds		3,039				108		2,931
TOTAL	\$	31,203	\$	223	\$	353	\$	31,073

For all the above investment securities, the unrealized losses are generally due to changes in interest rates and, as such, are considered to be temporary by management. The Company has evaluated the securities shown above and anticipates full recovery of amortized cost with respect to these securities at maturity or sooner in the event of a more favorable market interest rate environment. Additionally, the contractual cash flow of mortgage backed securities are guaranteed by an agency of the United States Government.

NOTE 6. Equity Compensation Plans

At September 30, 2005, the Company has a stock-based employee compensation plan. The Company accounts for the plan under recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. No stock-based employee compensation cost is reflected in net income, as all options granted under this plan had an exercise price equal to the market value of the underlying common stock on the date of grant.

During the quarter ended September 30, 2005 the Company announced that its Board of Directors had accelerated the vesting of out of the money options previously awarded under the Pacific Financial Corporation 2000 Stock Option Plan in light of the new accounting regulations (SFAS No. 123 Revised) that will take effect in the Company s next fiscal year. The Board of Directors took this action with the belief that it is the best interests of its shareholders as it will reduce the Company s reported compensation expense in future periods. As a result of the vesting acceleration, options to purchase approximately 257,600 shares of Pacific Financial Corporation common stock became exercisable immediately. All of these stock options were considered out of the money since the option s exercise price was greater than the current market value. As a result of the vesting acceleration, the Company s footnote stock based expense under SFAS No. 123, Accounting for Stock Based Compensation increased by approximately \$365,000 during the quarter ended September 30, 2005.

The following table illustrates the effect on net income and earnings per share had the Company applied the fair value recognition provisions of FASB Statement No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation.

		THREE M ENDED S				ONTHS SEPT. 30,

NOTE 7. Acquisition

On February 27, 2004, the Company completed the acquisition of BNW Bancorp, Inc. (BNW Bancorp). Each share of BNW Bancorp was exchanged for 0.85 shares of the Company s common stock resulting in the issuance of 1,271,904 new shares. The acquisition was accounted for using the purchase method of accounting and, accordingly, the assets and liabilities of BNW Bancorp were recorded at their respective fair value. Goodwill, the excess of the purchase price over the net fair value of the assets and liabilities acquired, was recorded at \$11,283,000. As part of the acquisition, the Company recorded a core deposit identifiable intangible asset of \$993,000.

NOTE 8. Subsequent event

In October 2005, the Company purchased land in the Barkley district of Bellingham, Washington for \$689,000 to relocate the existing Barkley branch from its leased space. The lease expires in 2006.

ITEM 2 MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

A Warning About Forward-Looking Information

This document contains forward-looking statements that are subject to risks and uncertainties. These statements are based on the beliefs and assumptions of our management, and on information currently available to them. Forward-looking statements include the information concerning our possible future results of operations set forth under Management s Discussion and Analysis of Financial Condition and Results of Operations and statements preceded by, followed by or that include the words believes, expects, anticipates, intends, plans, estimates or expressions.

Any forward-looking statements in this document are subject to risks relating to, among other things, the following:

1. competitive pressures among depository and other financial institutions may impede our ability to attract and retain borrowers, depositors and other customers, retain key employees, and maintain our interest margins and fee income;

2. changes in the interest rate environment may reduce margins or decrease the value of our securities;

3. our growth strategy, particularly if accomplished through acquisitions, may not be successful if we fail to accurately assess market opportunities, asset quality, anticipated cost savings, and transaction costs, or experience significant difficulty integrating acquired businesses or assets;

4. general economic or business conditions, either nationally or in the regions in which we do business, may be less favorable than expected, resulting in, among other things, a deterioration in credit quality or a reduced demand for credit; and

5. a lack of liquidity in the market for our common stock may make it difficult or impossible for you to liquidate your investment in our stock or lead to distortions in the market price of our stock.

Our management believes the forward-looking statements in this report are reasonable; however, you should not place undue reliance on them. Forward-looking statements are not guarantees of performance. They involve risks, uncertainties and assumptions. Many of the factors that will determine our future results and share value are beyond our ability to control or predict. We undertake no obligation to update forward-looking statements.

Results of Operations

Net income. For the three months ended September 30, 2005, Pacific s net income was \$1,661,000 compared to \$1,435,000 for the same period in 2004. For the nine months ended September 30, 2005, net income was \$4,447,000 compared to \$4,236,000 for the same period in 2004. Increases in net income for the three and nine month periods resulted from increases in net interest income for the 2005 periods, as described below, as well as increases in non-interest income arising from greater service charge revenues and gain on sales of loans, as compared to the same periods in 2004. These increases were partially offset by increased non-interest expense for the periods arising out of greater staffing, director and data processing expenses, and increased professional fees.

-10-

Net interest income. Net interest income for the three and nine months ended September 30, 2005 increased \$770,000, or 15.1%, and \$2,349,000, or 16.6%, respectively, compared to the same periods in 2004. The net interest margin (net interest income divided by average earning assets) decreased to 5.33% for September 30, 2005 from 5.34% for the same period last year. The slight decline in net interest margin is due primarily to an increase in cost of funds from 1.18% to 1.68% for the nine months ended September 30, 2005, respectively. We have, however, been able to maintain our net interest margin over 5.0% in part due to our continued focus on variable rate loans and fixed rate loan terms of not longer than three years.

Interest and dividend income for the three and nine months ended September 30, 2005, increased \$1,814,000, or 29.0%, and \$4,840,000 or 28.0%, respectively, compared to the same period in 2004. Loans averaged \$358.5 million with an average yield of 7.46% for the nine months ended September 30, 2005 compared to average loans of \$299.7 million with an average yield of 6.93% for the same period in 2004. While a portion of the increase in average loans is due to the BNW acquisition that closed February 27, 2004, the Company also experienced significant loan growth in its historical operations in the quarter ended September 30, 2005.

Interest expense for the three and nine months ended September 30, 2005 increased \$1,044,000, or 90.8%, and \$2,491,000, or 80.2%, respectively, compared to the same periods in 2004. The increase is primarily attributable to increased deposit balances and increased expense of secured borrowings, as well as higher interest rates. Average interest-bearing deposit balances for the nine months ended September 30, 2005 and September 30, 2004 were \$379,770,000 and \$325,772,000, respectively, with an average cost of 1.58% and 1.08%, respectively.

Average secured borrowings for the nine months ended September 30, 2005 and September 30, 2004 were \$4,483,000 and none, respectively. The secured borrowings represent borrowings collateralized by participation interests in loans originated by the Company. These borrowings are repaid as payments are made on the underlying loans, bearing interest rates ranging from 5.5% to 8.5%. Average long term borrowings for the nine months ended September 30, 2005 were \$22,512,000 with an average cost of 3.27% compared to \$25,496,000 with an average cost of 2.48% for the same period in 2004.

Provision and allowance for credit losses. The allowance for credit losses reflects management s current estimate of the amount required to absorb losses on existing loans and commitments to extend credit. Loans deemed uncollectible are charged against and reduce the allowance. Periodically, a provision for credit losses is charged to current expense. This provision acts to replenish the allowance for credit losses and to maintain the allowance at a level that management deems adequate.

There is no precise method of predicting specific credit losses or amounts that ultimately may be charged off on segments of the loan portfolio. The determination that a loan may become uncollectible, in whole or in part, is a matter of judgment. Similarly, the adequacy of the allowance for credit losses can be determined only on a judgmental basis, after full review, including (a) consideration of economic conditions and the effect on particular industries and specific borrowers; (b) a review of borrowers financial data, together with industry data, the competitive situation, the borrowers management capabilities and other factors; (c) a continuing evaluation of the loan portfolio, including monitoring by lending officers and staff credit personnel of all loans which are identified as being of less than acceptable quality; (d) an in-depth appraisal, on a monthly basis, of all loans judged to present a possibility of loss (if, as a result of such monthly appraisals, the loan is judged to be not fully collectible, the carrying value of the loan is reduced to that portion considered collectible); and (e) an evaluation of the adequacy of the adequacy of the allowance is conducted quarterly and is reviewed by the Board of Directors. Based on this analysis, management considers the allowance for credit losses to be adequate at September 30, 2005.

-11-

Periodic provisions for credit losses are made to maintain the allowance for credit losses at an appropriate level. The provisions are based on an analysis of various factors including historical loss experience based on volumes and types of loans, volumes and trends in delinquencies and non-accrual loans, trends in portfolio volume, results of internal and independent external credit reviews, and anticipated economic conditions. For additional information, please see the discussion under the heading Critical Accounting Policy in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2004.

During the three and nine months ended September 30, 2005, a provision of \$300,000 and \$900,000, respectively, was provided for possible credit losses, compared to \$300,000 and \$670,000 for the same period in 2004. For the three months ended September 30, 2005, net charge-offs were zero compared to \$1,000 for the same period in 2004. For the nine months ended September 30, 2005, net recoveries were \$6,000 compared to net charge-offs of \$20,000, for the same period in 2004, and compared to \$144,000 in net charge-offs during the twelve months ended December 31, 2004.

At September 30, 2005, the allowance for credit losses stood at \$5,142,000 compared to \$4,236,000 at December 31, 2004, and \$4,060,000 at September 30, 2004. This increase was attributable to the additions in loan loss provision that was allocated to the allowance for credit losses as a result of continued growth in the loan portfolio. The ratio of the allowance to total loans outstanding including loans held for sale was 1.30%, 1.23% and 1.21%, respectively, at September 30, 2005, December 31, 2004, and September 30, 2004.

Non-performing assets and foreclosed real estate owned. Non-performing assets totaled \$8,131,000 at September 30, 2005. This represents 2.06% of total loans including loans held for sale, compared to \$510,000 or .15% at December 31, 2004, and \$1,052,000 or .31% at September 30, 2004. Non-accrual loans at September 30, 2005 totaled \$8,094,000. This relates primarily to one borrower involved in the forest products industry. Although the borrower is continuing operations, the deteriorating financial condition of the borrower creates the potential the Company may not be able to collect all principal and interest according to the terms of the loan. Of the non-accrual loans outstanding, \$3,505,000 are guaranteed by the United States Department of Agriculture representing 43.30% of non-accrual loans outstanding. Based on current analysis, management has made provisions in the loan loss reserves for potential losses associated with non-accrual loans. Foreclosed real estate consists of two properties secured by real estate with no individual material balances.

ANALYSIS OF NON-PERFORMING ASSETS

(in thousands)		SEP	TEMBER 30, 2005	DEC	EMBER 31, 2004	SEI	PTEMBER 30, 2004
Accruing loans past due 90 days or more		\$		\$		\$	512
Non-accrual loans			8,094		470		456
Foreclosed real estate			37		40		84
TOTAL	-12-	\$	8,131	\$	510	\$	1,052

Non-interest income and expense. Non-interest income for the three and nine months ended September 30, 2005 increased \$310,000 and \$756,000, respectively, compared to the same period in 2004. The primary reason for the increases was gain on sale of loans. Gain on sale of loans totaled \$625,000 and \$330,000, respectively, for the three months ended September 30, 2005 and 2004 and totaled \$1,359,000 and \$719,000, respectively for the nine months ended September 30, 2005 and 2004. This increase is attributable to a greater volume of loans sold in the secondary market over the prior year. Origination of loans held for sale were \$89,326,000 for the nine months ended September 30, 2005, compared \$52,572,000 for the same period in 2004. Commitment to sell and sale price is established at the time of origination of loans to limit any potential price risk. Management expects modest levels of growth in mortgage banking activity to continue for the remainder of the year.

Non-interest expense for the three and nine months ended September 30, 2005 increased \$718,000 and \$2,492,000, respectively, compared to the same periods in 2004. The BNW acquisition was the major contributing factor to increased non-interest expense due to the increase of full time equivalent employees, the addition of five branches, and other operating expenses including expenses incurred in the opening of the Ferndale, Washington branch in May 2005. Full time equivalent employees at September 30, 2005 were 177 compared to 156 at September 30, 2004.

Income taxes. The federal income tax provision for the three and nine months ended September 30, 2005 was \$752,000 and \$1,947,000, respectively, an increase of \$136,000 for the three month period, and an increase of \$172,000 for the nine month period compared to the same periods in 2004. The effective tax rate for the three and nine months ended September 30, 2005 was 31.2% and 30.5%.

Financial Condition

Assets. Total assets were \$490,810,000 at September 30, 2005, an increase of \$49,019,000, or 11.2%, over year-end 2004. Loans, including loans held for sale, were \$395,271,000 at September 30, 2005, an increase of \$47,512,000, or 13.7%, over year-end 2004. The increase in the portfolio was primarily a result of a \$17,853,000 million increase in commercial and industrial loans and a \$25,518,000 million increase in real estate construction loans due to the vibrant market in Whatcom County. Total deposits were \$409,101,000 at September 30, 2005, an increase of \$45,600,000, or 12.5%, compared to December 31, 2004. The \$45,600,000 million increase is comprised of a \$15,524,000 million increase in non-interest bearing accounts, \$5,104,000 million increase in NOW accounts, \$16,943,000 million increase in money market accounts, \$3,769,000 increase in savings accounts and a \$4,261,000 million increase in certificates of deposits.

Loans. Loan detail by category, including loans held for sale, as of September 30, 2005 and December 31, 2004 follows:

		September 30, 2005	December 31, 2004
Commercial and industrial	S	\$ 105,835	\$ 87,985
Agricultural Real estate mertange		22,225 180,488	23,065 175,730
Real estate mortgage Real estate construction		74,865	49,347
Installment		9,821	9,934
Credit cards and other		2,037	1,698
Total Loans	-	395,271	 347,759
Allowance for credit losses		(5,142)	(4,236)
Net Loans	5	\$ 390,129	\$ 343,523
	-13-		

Liquidity. Adequate liquidity is available to accommodate fluctuations in deposit levels, fund operations, and provide for customer credit needs and meet obligations and commitments on a timely basis. The Company has generally been a net seller of federal funds. When necessary, liquidity can be increased by taking advances available from the Federal Home Loan Bank of Seattle.

<u>Shareholders</u> equity. Total shareholders equity was \$49,578,000 at September 30, 2005, an increase of \$4,275,000, or 9.4%, compared to December 31, 2004. Tangible book value per share was \$5.84 at September 30, 2005 compared to \$5.16 at December 31, 2004. Tangible book value is calculated by dividing total equity capital minus goodwill, by total shares outstanding.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate, credit, and operations risks are the most significant market risks which affect the Company s performance. The Company relies on loan review, prudent loan underwriting standards and an adequate allowance for possible credit losses to mitigate credit risk.

An asset/liability management simulation model is used to measure interest rate risk. The model produces regulatory oriented measurements of interest rate risk exposure. The model quantifies interest rate risk by simulating forecasted net interest income over a 12-month time period under various interest rate scenarios, as well as monitoring the change in the present value of equity under the same rate scenarios. The present value of equity is defined as the difference between the market value of assets less current liabilities. By measuring the change in the present value of equity under various rate scenarios, management is able to identify interest rate risk that may not be evident from changes in forecasted net interest income.

The Company is currently asset sensitive, meaning that interest earning assets mature or re-price more quickly than interest-bearing liabilities in a given period. Therefore, a significant increase in market rates of interest could improve net interest income. Conversely, a decreasing rate environment may adversely affect net interest income.

It should be noted that the simulation model does not take into account future management actions that could be undertaken should actual market rates change during the year. Also, the model simulation results are not exact measures of the Company s actual interest rate risk. They are rather only indicators of rate risk exposure, based on assumptions produced in a simplified modeling environment designed to heighten sensitivity to changes in interest rates. The rate risk exposure results of the simulation model typically are greater than the Company s actual rate risk. That is due to the conservative modeling environment, which generally depicts a worst-case situation. Management has assessed the results of the simulation reports as of September 30, 2005, and believes that there has been no material change since December 31, 2004.

ITEM 4. CONTROLS AND PROCEDURES

The Company s disclosure controls and procedures are designed to ensure that information the Company must disclose in its reports filed or submitted under the Securities Exchange Act of 1934 (Exchange Act) is recorded, processed, summarized, and reported on a timely basis. Our management has evaluated, with the participation and under the supervision of our chief executive officer (CEO) and chief financial officer (CFO), the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of the end of the period covered by this report. Based on this evaluation, our CEO and CFO have concluded that, as of such date, the Company s disclosure controls and procedures are effective in ensuring that information relating to the Company, including its consolidated subsidiaries, required to be disclosed in reports that it files under the Exchange Act is (1) recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms, and (2) accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosures.

No change in the Company s internal control over financial reporting occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.
