- x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
for the quarterly period ended January 31, 2014.
OR
o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 for the transition period from _____ to _____.

Commission File Number 001-13543

MGC DIAGNOSTICS CORPORATION

(Exact name of registrant as specified in its charter)

Minnesota

(State or other jurisdiction of
incorporation or organization)

41-1579150

(IRS Employer
Identification No.)

350 Oak Grove Parkway, Saint Paul, Minnesota 55127-8599

(Address of principal executive offices)

Registrant's telephone number, including area code: **(651) 484-4874**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes x No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Edgar Filing: MGC DIAGNOSTICS Corp - Form 10-Q

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act:

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): Yes No

As of March 1, 2014, the Company had outstanding 4,208,588 shares of Common Stock, \$0.10 par value.

MGC DIAGNOSTICS CORPORATION AND SUBSIDIARY

Notes to Consolidated Financial Statements

(Unaudited)

(1) Basis of Presentation and Description of Business

MGC Diagnostics Corporation (the Company), through its Medical Graphics Corporation subsidiary, designs and markets non-invasive cardiorespiratory diagnostic systems that are sold under the MGC Diagnostics and MedGraphics brand and trade names. These cardiorespiratory diagnostic systems have a wide range of applications within cardiorespiratory healthcare.

The consolidated balance sheet as of January 31, 2014, the consolidated statements of income (loss) for the three months ended January 31, 2014 and 2013, the consolidated statements of cash flows for the three months ended January 31, 2014 and 2013 and the related information presented in these notes have been prepared by management in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X, without audit. Accordingly, they do not include all of the information and notes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of results have been included. The consolidated balance sheet at October 31, 2013 was derived from the audited consolidated financial statements as of that date. Operating results for the three months ended January 31, 2014 are not necessarily indicative of the results that may be expected for the year ending October 31, 2014. For further information, refer to the consolidated financial statements and notes thereto included in MGC Diagnostics Corporation's Annual Report on Form 10-K for the year ended October 31, 2013.

Preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities made in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. Estimates include accounts receivable, product warranty and inventory reserves, and depreciable lives of property, equipment and intangible assets (including internal software development costs).

The Company determined there were no events subsequent to January 31, 2014, that required recognition or disclosure in these consolidated financial statements.

(2) Summary of Significant Accounting Policies

Revenue Recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, transfer of title has occurred or services have been rendered, the selling price is fixed or determinable and collectability is reasonably assured. The Company's products are sold for cash or on unsecured credit terms requiring payment based on the shipment date. Credit terms can vary between customers due to many factors, but are generally, on average, 30 to 60 days. Revenue, net of discounts, is generally recognized upon shipment or delivery to customers in accordance with written sales terms. Standard sales terms do not include customer acceptance conditions, future credits, rebates, price protection or general rights of return. The terms of sales to both domestic customers and international distributors are identical, although adherence to these terms is more pervasive with domestic customers than with international distributors. In instances when a customer order specifies final acceptance of the system, revenue recognition is deferred until all customer acceptance criteria have been met. Estimated warranty obligations are recorded upon shipment. When appropriate, infrequent customer requested short-term bill-and-hold arrangements are accommodated and accounted for in accordance with authoritative literature. Sales and use taxes are reported on a net basis, excluding them from revenues and cost of revenues.

Table of Contents

Service contract revenue is based on a stated contractual rate and is deferred and recognized ratably over the service period, which is typically from one to five years. Deferred income associated with service contracts was \$5,155,000 and \$4,974,000 as of January 31, 2014 and October 31, 2013, respectively. Revenue from installation and training services provided to customers is deferred until the service has been performed or no further obligations to perform the service exist. The amount of deferred installation and training revenue was \$311,000 and \$411,000 as of January 31, 2014 and October 31, 2013, respectively.

When a sale involves multiple deliverables, such as equipment, installation services and training, the amount of the sale consideration is allocated to each respective element based on the relative selling price and revenue is recognized when revenue recognition criteria for each element are met. Deferred revenue from the allocation of discounts within multiple deliverable sale agreements was \$79,000 as of January 31, 2014 and October 31, 2013. Consideration allocated to delivered equipment is equal to the total arrangement consideration less the selling price of installation and training. The selling price of installation and training services is based on specific objective evidence, including third-party invoices.

No customer accounted for more than 10% of revenue in the three months ended January 31, 2014 and 2013.

Advance Payments from Customers

The Company typically does not receive advance payments from its customers in connection with the sale of its products. The Company occasionally enters into an arrangement under which a customer agrees to purchase a large quantity of product to be delivered over a period of time. Depending on the size of these arrangements, the Company may negotiate an advance payment from these customers. Advance payments from customers aggregated \$41,000 and \$37,000 as of January 31, 2014 and October 31, 2013, respectively. Revenue recognition for customer orders that include advance payments is consistent with the Company's revenue recognition policy described above.

Internal Software Development Costs

Internal software development costs consist primarily of internal salaries and consulting fees for developing software platforms for sale to or use by customers within equipment purchased from the Company. We capitalize costs related to the development of our software products, as all of these products will be used as an integral part of a product or process to be sold or leased. This software is primarily related to our Breeze Suite platform, including underlying support products. Capitalized software may also include other less significant projects supporting software for separate sale or for internal use.

We capitalize costs related to software developed for new products and significant enhancements of existing products once technological feasibility has been reached and all research and development for the components of the product have been completed. These costs are amortized on a straight-line basis over the estimated useful life of the related product, not to exceed seven years, commencing with the date the product becomes available for general release to our customers. Costs for internal use software are amortized over the expected use periods of the software (See Note 5). The achievement of technological feasibility and the estimate of a product's economic life require management's judgment. Any changes in key assumptions, market conditions or other circumstances could result in an impairment of the capitalized asset and a charge to our operating results.

Table of Contents**(3) Stock-Based Compensation and Stock Options**

The MGC Diagnostics Corporation 2007 Stock Incentive Plan (the 2007 Plan) and the MGC Diagnostics Corporation 2002 Stock Option Plan (the 2002 Plan) both provide that incentive stock options and nonqualified stock options to purchase shares of common stock may be granted at prices determined by the Compensation Committee, except that the purchase price of incentive stock options may not be less than the fair market value of the stock at date of grant. Under the 2007 Plan, options generally expire no later than seven years from the grant date while under the 2002 Plan all options expire no later than ten years from the grant date. Options under both plans are subject to various vesting schedules. In addition, the 2007 Plan allows the granting of restricted stock awards, stock appreciation rights and performance stock.

Total stock-based compensation expense included in the Company's statements of income (loss) for the three months ended January 31, 2014 and 2013 was \$127,000 and \$101,000, respectively.

Stock Options

A summary of the Company's stock activity for the three months ended January 31, 2014 and 2013 is presented in the following table:

	For the Three Months ended		For the Three Months ended	
	January 31, 2014		January 31, 2013	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding at beginning of period	110,370	\$ 6.83	286,072	\$ 6.57
Granted			5,900	6.76
Expired or cancelled	(500)	6.76	(13,502)	6.81
Outstanding at end of period	109,870	\$ 6.83	278,470	\$ 6.56

The following table summarizes information concerning stock options outstanding as of January 31, 2014:

Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life	Number Subject to Exercise
\$ 5.08	4,500	2.32	4,500
5.16	20,250	1.57	20,250
6.23	14,000	0.74	14,000
6.60	13,295	0.55	13,295
6.76	5,400	8.79	1,796
7.86	52,425	0.75	52,425
Total	109,870	1.33	106,266

The total intrinsic value of options outstanding and exercisable as of January 31, 2014 was \$471,000 and \$455,000, respectively, which was calculated using the closing stock price at the end of the first quarter less the option price of in-the-money options. The Company issues new shares when stock options are exercised. Unrecognized compensation expense related to outstanding stock options as of January 31, 2014 was \$17,000 and is expected to be recognized over a weighted average period of 1.78 years.

Valuation Assumptions

The Company uses the Black-Scholes option-pricing model (Black-Scholes model) to determine the fair value of stock options as of the grant date. The fair value of stock options under the Black-Scholes model requires management to make assumptions regarding projected employee stock option exercise behaviors, risk-free interest rates, volatility of the Company's stock price and expected dividends. The expense recognized for options granted under the 2002 Plan and 2007 Plan is equal to the fair value of stock options as of the grant date.

Table of Contents***Restricted Stock Awards***

Restricted stock awards are awards of common stock that are subject to restrictions on transfer and to a risk of forfeiture if the holder leaves the Company before the restrictions lapse. The holder of a restricted stock award is generally entitled at all times on and after the date of issuance of the restricted shares to exercise the rights of a shareholder of the Company, including the right to vote the shares. The value of stock awards that vest over time was established by the market price on the date of its grant. A summary of the Company's restricted stock activity for the three months ended January 31, 2014 and 2013 is presented in the following table:

	For the Three Months ended			
	January 31, 2014		January 31, 2013	
	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
Unvested at beginning of period	66,094	\$ 5.88	101,071	\$ 5.23
Granted			2,000	5.80
Vested	(667)	5.80	(4,000)	5.10
Unvested at end of period	65,427	\$ 5.88	99,071	\$ 5.24

Unrecognized compensation expense related to outstanding restricted stock awards to employees and directors as of January 31, 2014 was \$162,000 and is expected to be recognized over a weighted average period of 1.26 years.

Director Stock Awards in Lieu of Cash Retainer Fees

During the fiscal 2013 fourth quarter, the Company initiated a program that allows non-employee Board members to elect and receive shares from the 2007 Plan in lieu of some or all of their regular cash retainer fees. During the three months ended January 31, 2014, the Company issued 947 shares under this program. The expense was recognized at the time of share issuance and totaled \$11,000 in the period.

Performance Share Awards

Within his employment offer, the Company's Chief Executive Officer has the ability to earn share awards equal to one-third of his base compensation subject to achieving specific operating performance criteria. On December 18, 2013, the Company's chief executive officer was awarded 8,832 shares of Company common shares to be delivered if the Company achieves specific fiscal 2014 financial targets. The officer is not entitled to rights of ownership and shares are not regarded as outstanding until delivered. These shares are valued at \$117,000, with \$16,000 recognized as an expense in the three months ended January 31, 2014, leaving up to \$101,000 that may be expensed in the remaining quarters of fiscal 2014.

The Company has also issued performance share awards to non-employee consultants. These awards are an obligation within a consulting arrangement that does not grant any ownership rights until the shares are issued. The value of stock awards to non-employees remains variable until performance criteria have been achieved, when individual share groups to be granted vest, establishing the value of each group over the dates that its related performance criteria was completed. Under variable accounting, amounts are expensed in relation to the shares expected to be granted over the performance period, with value of those whose performance criteria has been met at the market value on the date earned and value of all others marked to market as of the reporting date. As of January 31, 2014, of the 10,000 shares available to be issued, 1,000 shares were estimated as earned with an aggregate market value fixed at \$10,000. Expense under this agreement for the three months ended January 31, 2014 and 2013 was \$21,000 and \$18,000, respectively. The remaining 9,000 shares available to be earned have \$107,000 in value as of January 31, 2014.

Table of Contents**Employee Stock Purchase Plan**

The MGC Diagnostics Corporation 2003 Employee Stock Purchase Plan, as amended July 1, 2012 to increase shares available for sale by 100,000 shares (Purchase Plan), allows participating employees to purchase up to 200,000 shares of the Company s common stock at a discount through payroll deductions. The Purchase Plan is available to all employees subject to certain eligibility requirements. Under the Purchase Plan, participating employees may purchase the Company s common stock on a voluntary after-tax basis at a price that is the lower of 85% of the fair market value of one share of common stock at the beginning or end of each stock purchase period or phase. The Stock Plan is carried out in six-month phases, with phases beginning on January 1 and July 1 of each calendar year. For the phase that ended on December 31, 2013, employees purchased 9,398 shares at a price of \$7.11 per share. As of January 31, 2014, the Company has withheld approximately \$13,000 from employees participating in the phase that began on January 1, 2014. As of January 31, 2014, 102,912 shares of common stock were available for future purchase under the Purchase Plan.

The following table presents the statements of income (loss) classification of pre-tax stock-based compensation expense recognized for the three months ended January 31, 2014 and 2013:

(In thousands)	Three Months ended January 31,	
	2014	2013
Cost of revenues	\$ 2	\$ 1
Selling and marketing	18	15
General and administrative	105	83
Research and development	2	2
Stock-based compensation expense	\$ 127	\$ 101
<i>Tax Impact of Stock-Based Compensation</i>		

The Company reports the benefit of tax deductions in excess of recognized stock-based compensation expense on the consolidated statement of cash flows as financing cash flows. For the three months ended January 31, 2014 and 2013, there were no excess tax benefits.

(4) Inventories

Inventories consisted of the following as of January 31, 2014 and October 31, 2013:

(In thousands)	2014	2013
Raw materials	\$ 1,900	\$ 1,752
Work-in-process	325	326
Finished goods	1,794	1,421
	\$ 4,019	\$ 3,499

Table of Contents**(5) Intangible Assets**

Intangible assets consisted of the following as of January 31, 2014 and October 31, 2013:

(In thousands)	2014	2013
Intangible assets:		
Developed technology	\$ 6,853	\$ 6,853
Trademarks	61	61
Software	560	560
Capitalized software in progress	1,686	1,514
	9,160	8,988
Less: accumulated amortization	(6,834)	(6,799)
	\$ 2,326	\$ 2,189

The intangible assets related to developed technology, patents and trademarks are being amortized using the straight-line method over the estimated useful lives of the assets, which range from five to ten years. During the quarter ended January 31, 2013, the Company introduced Breeze WebReview software and began amortizing the related capitalized software costs using a five-year life. Total amortization expense was \$35,000 and \$21,000 for the three months ended January 31, 2014 and 2013, respectively. Of the total, amortization expense related to software costs of \$30,000 and \$14,000 is included in cost of equipment, supplies and accessories revenues for the three months ended January 31, 2014 and 2013, respectively.

Estimated amortization expense for each of the succeeding fiscal years based on the intangible assets placed in service as of January 31, 2014 is as follows:

(In thousands)	Amortization
Nine months ending October 31, 2014	\$ 104
2015	139
2016	138
2017	117
2018	14
	\$ 512

The above table does not include estimated amortization expense for patents not yet placed into service totaling \$128,000, included in Developed technology, or for capitalized software costs of \$1,686,000 that are not yet placed into service. We capitalized software development costs of \$174,000 and \$300,000 during the three months ended January 31, 2014 and 2013, respectively. Upon completion of these development projects, we expect to amortize the capitalized software costs over a five year period.

Table of Contents**(6) Warranty Reserve**

Sales of the Company's equipment are subject to a warranty obligation. Equipment warranties typically extend for a period of twelve months from the date of installation. Standard warranty terms are included in customer contracts. Under the terms of these warranties, the Company is obligated to repair or replace any components or assemblies that it deems defective in workmanship or materials. The Company reserves the right to reject warranty claims where it determines that failure is due to normal wear, customer modifications, improper maintenance or misuse. The Company maintains a warranty reserve that reflects the estimated expenses that it will incur to honor the warranties on its products. The Company adjusts the warranty reserve based on the number and type of equipment subject to warranty and the remaining months of warranty coverage. The warranty reserve adjustment reflects the Company's historical warranty experience based on the type of equipment. Warranty provisions and claims for the three months ended January 31, 2014 and 2013 were as follows:

(In thousands)	2014		2013	
Balance, beginning of period	\$	147	\$	91
Warranty provision based on units sold		34		33
Periodic reserve adjustments		45		21
Warranty claims		(91)		(61)
Balance, end of period	\$	135	\$	84

(7) Net Income (Loss) per Share

Basic income (loss) per share is computed by dividing net income (loss) by the weighted average shares outstanding during the reporting period. Diluted income per share is computed similarly to basic income (loss) per share except that in computing diluted income per share the weighted average shares outstanding are increased to include additional shares issuable from the assumed exercise of stock options, if dilutive, as well as the dilutive effects of any unvested restricted share awards. Diluted loss per share does not include any of these dilutive effects in its calculation. The number of additional shares is calculated by assuming that outstanding stock options are exercised, outstanding restricted share grants vest and that the cash proceeds from the exercise together with the assumed employment value represented by the unamortized stock-based compensation were used to reacquire shares of common stock at the average market price during the reporting period.

The Company had unexpired options for the purchase of its common shares and unvested restricted and performance stock awards at January 31, 2014 and 2013 of 184,129 and 398,374 shares, respectively.

Shares used in the net income (loss) per share computations are as follows:

(In thousands)	Three Months ended January 31,	
	2014	2013
Weighted average common shares outstanding - basic	4,135	3,891
Dilutive effect of stock options and unvested restricted shares		
Weighted average common shares outstanding - diluted	4,135	3,891

As a result of the net loss in the three months ended January 31, 2014 and 2013, the outstanding stock options and unvested restricted stock shares were considered antidilutive and, therefore, were excluded from diluted loss per share for those periods. Antidilutive shares excluded from the calculation for the three months ended January 31, 2014 and 2013 calculation totaled 97,243 and 62,631, respectively.

(8) Income Taxes

The Company has recorded a provision for income tax expense of \$17,000 and \$7,000 for the three months ended January 31, 2014 and 2013, respectively. The increased provisions for the three months ended January 31, 2014 reflect estimates for federal alternative minimum taxes.

As of January 31, 2014 and October 31, 2013, the reserve for uncertain tax positions was \$54,000. The entire amount of the reserve is related to uncertainties regarding income tax nexus with various states in which the Company operates. Included in the reserve is \$21,000 of estimated interest and penalties. The total amount of the reserve has increased the Company's effective tax rate, and would therefore decrease the effective tax rate if removed.

Edgar Filing: MGC DIAGNOSTICS Corp - Form 10-Q

Estimated interest and penalties related to potential underpayment of income taxes are classified as a component of tax expense in the consolidated statements of income (loss). The Company does not expect the amount of reserves for uncertain tax positions to change significantly in the next twelve months. Similarly, the Company does not anticipate that the total reserve for uncertain tax positions will significantly change due to the settlement of audits and the expiration of statutes of limitations within the next twelve months.

Table of Contents

The Company files a consolidated federal income tax return in the United States Federal jurisdiction and files various combined and separate tax returns in several state and local jurisdictions. For United States federal tax, the Company is no longer subject to examinations by the authorities for fiscal years ending prior to November 1, 2009. The expiration dates of the statute of limitations related to the various state income tax returns that the Company files vary by state. There is no statute of limitations for assessments related to jurisdictions where the Company may have a nexus but has chosen not to file an income tax return.

The Company has federal net operating loss (NOL) and general business tax credit carry forwards; however, the utilization of these tax loss and tax credit carry forwards is limited under Internal Revenue Code (IRC) §382 and §383, respectively, as a result of an IRS-deemed change in ownership that occurred in the fourth quarter of fiscal 2006. The Company estimates that the amount of federal NOL carry forward from October 31, 2013 that is not limited is approximately \$12.8 million. These loss carry forwards will expire in years 2018 through 2032. Additionally, the Company has general business credit carry forwards of \$85,000 that will expire in 2033. The Company also has \$137,000 of alternative minimum tax credit carry forwards that do not have expiration dates. The alternative minimum tax credit carry forwards are limited by IRC §383, but their ultimate use is not affected since these do not expire.

The Company has recorded a full valuation allowance against its net deferred tax assets because it believed that it was more likely than not that the asset would not be realized in the future. The ultimate realization of deferred tax assets depends upon the generation of future taxable income during the periods in which those temporary differences become deductible. In assessing the need for a valuation allowance, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. In making this assessment, management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies. Given the volatility of historical results and the uncertainty of the further success of the present new strategies, the Company believes it has not yet achieved the more-likely-than-not threshold, and therefore the valuation allowance remains in place at January 31, 2014. The Company will continue to assess the potential realization of the deferred tax assets on a quarterly basis in fiscal 2014 to determine if sufficient evidence exists to remove all or a portion of this valuation allowance. If the Company determines that its recent profitability has stabilized and is more predictable, the Company could recognize all or a portion of the deferred tax assets in fiscal 2014 or later. Removal of the allowance and recognition of the deferred tax assets may have a substantial impact on the Company's profitability.

The Company's NOL carry forwards of \$12.8 million referenced above as of October 31, 2013 include \$2.7 million of income tax deductions in excess of previously recorded tax benefits. Although these additional tax deductions are reflected in NOL carry forwards referenced above, the related tax benefit of \$1.0 million will not be recognized until the deductions reduce taxes payable. Accordingly, since the tax benefit does not reduce the Company's current taxes payable in 2014, these tax benefits are not reflected in the Company's deferred tax assets presented above. The tax benefit of these excess deductions will be reflected as a credit to additional paid-in capital when and if recognized. Any reduction of the valuation allowance related to post-bankruptcy net operating losses and other deferred tax assets would (i) first affect earnings as a reduction in the provision for taxes and (ii) thereafter, the remaining \$1.0 million would increase additional paid-in capital as these deferred tax assets represent employee stock-based compensation tax deductions included in the Company's net operating losses.

Table of Contents**(9) Separation Accrual**

During the first quarter of fiscal 2013, the Company incurred a charge of \$29,000 included in general and administrative expenses, consisting of an accrual of separation payments for the former chief financial officer of \$56,000, reduced by the effect of forfeitures of previously expensed unvested restricted stock awards.

The following table reconciles activity for accrued separation expenses for the following periods.

(In thousands)	Three Months ended January 31,	
	2014	2013
Balance, beginning of period	\$ 97	\$ 343
Severance incurred during the period		56
Severance payments	(40)	(178)
Balance, end of period (included in employee compensation accrual)	\$ 57	\$ 221

(10) Segment Reporting

The Company operates in a single industry segment, the manufacture and sale of cardiorespiratory diagnostic products. The Company sells its products into many countries throughout the world. Net sales from continuing operations by geographic area are shown in the following table.

(In thousands)	Three Months ended January 31,	
	2014	2013
Revenues from unaffiliated customers:		
United States	\$ 5,059	\$ 5,263
Americas	351	714
Europe, Middle East, Africa	480	566
Asia Pacific	414	465
	\$ 6,304	\$ 7,008

(11) Litigation

The Company is also subject to certain claims and lawsuits that have been filed in the ordinary course of business. From time to time, the Company initiates lawsuits against others to enforce patents or to seek collection of debts in the ordinary course of business. There are no known current lawsuits or other litigation that involve the Company. It is management's opinion that the settlement of all litigation arising in the ordinary course of business would not have a material effect on the financial position, results of operations or liquidity of the Company.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation.****Overview**

The Company, through its Medical Graphics Corporation subsidiary, designs and markets non-invasive cardiorespiratory diagnostic systems that are sold under the MGC Diagnostics and MedGraphics brand and trade names. These cardiorespiratory diagnostic systems have a wide range of applications within cardiorespiratory healthcare. Revenues consist of equipment, supplies and accessories sales as well as service revenues. Equipment, supplies and accessories sales reflect sales of non-invasive cardiorespiratory diagnostic equipment and aftermarket sales of peripherals and supplies. Service revenues consist of revenues from extended service contracts and non-warranty service visits.

Total revenues for the fiscal 2014 first quarter were \$6.3 million, a decrease of 10% from \$7.0 million in 2013. Operating expenses for the fiscal 2014 first quarter were \$3.8 million, a decrease of 10% from the same period in 2013. Net loss for the three months ended January 31, 2014 was \$(243,000), or \$(0.06) per basic and diluted share, compared to a net loss of \$(383,000), or \$(0.10) per basic and diluted share, for the same period in 2013.

Results of Operations

The following table contains selected information from our historical consolidated statements of income (loss), expressed as a percentage of revenue:

	Three Months ended January 31,	
	2014	2013
Revenues	100.0%	100.0%
Cost of revenues	43.5	45.5
Gross margin	56.5	54.5
Operating Expenses		
Selling and marketing expenses	32.0	30.4
General and administrative expenses	18.1	20.2
Research and development expenses	9.9	9.2
Amortization of intangibles	0.1	0.1
Total operating expenses	60.1	59.9
Operating loss	(3.6)	(5.4)
Provision for taxes	(0.3)	(0.1)
Net loss	(3.9)%	(5.5)%

Seasonality

The Company experiences some seasonality in its revenues, with the first and fourth quarter of its fiscal year historically being its lowest and highest revenue quarters, respectively. The Company experiences additional variability in each quarter due to a number of factors, including customer budget cycles, product introductions, Company sales incentive programs, general economic conditions and the timing of customer orders.

Table of Contents

Quarterly Comparisons of Operations

The following paragraphs discuss the Company's performance for the fiscal three months ended January 31, 2014 and 2013.

Revenues

Total revenues for the three months ended January 31, 2014 decreased 10% compared to the same period in fiscal 2013. Domestic revenue for the three months ended January 31, 2014, decreased 4% compared to the prior year period which included our largest competitive conversion of fiscal 2013. International revenue decreased 29% from prior year period levels, primarily due to weaker sales in the Latin American and Canadian markets.

Gross Margin

Gross margin percentage for the three months ended January 31, 2014 was 56.5%, a 200 basis point increase from 54.5% in the same period in 2013. The increase is primarily due to improved pricing and product mix, and lower product costs. Gross margin for equipment, supplies and accessories was 53.6% for the quarter, compared to 51.2% in the prior year's quarter. Gross margin for services decreased to 67.3% for the quarter, compared to 70.8% for the prior year's quarter primarily due to higher expenses to provide service to customers having extended service agreements. We expect that combined gross margin levels will continue in the mid-50% range for the remaining quarters of fiscal 2014.

Selling and Marketing

Selling and marketing expenses decreased by 5% to \$2.0 million for the three months ended January 31, 2014 from \$2.1 million for the comparable fiscal 2013 period. Expenses as a percent of revenues increased to 32.0%, compared to 30.4% for the same period last year due to lower sales volume. Expenses decreased primarily due to net lower selling commissions and group purchasing organization fees of \$65,000, attributable to lower revenues, decreased trade shows and meetings expenses of \$32,000, and reduced other personnel cost and incentive accruals of \$30,000. These savings were offset in part by increased telemarketing costs of \$25,000.

General and Administrative

General and administrative expenses for the three months ended January 31, 2014 decreased by 19%, or \$275,000, to \$1.1 million compared to \$1.4 million in 2013. Expenses as a percent of revenues decreased to 18.1%, compared to 20.2% for the same period last year. The prior year period included \$234,000 related to an abandoned acquisition effort, intellectual property legal fees and net executive separation costs. The remaining decrease is due to reduced current year management incentive and other bonus accruals of \$71,000, partially offset by \$53,000 related to other corporate development efforts.

Research and Development

Research and development expenses for the three months ended January 31, 2014 decreased by 4%, or \$23,000, to \$0.6 million, compared to \$0.6 million for the same period in fiscal 2013. Expenses as a percent of revenues increased to 9.9%, compared to 9.2% for the same period last year. The decrease in expenses resulted primarily from \$49,000 of reduced personnel and incentive expenses. These savings were partially offset by a \$20,000 net increase in project-related costs from the Company's expansion of its investment in new product hardware and software development. Internal software development costs capitalized totaled \$174,000 and \$300,000 in the three months ended January 31, 2014 and 2013, respectively.

Amortization of Intangibles

Amortization of patents costs was \$7,000 and \$7,000 for the three months ended January 31, 2014 and 2013, respectively.

Table of Contents

The Company began amortizing capitalized software development costs when its Breeze WebReview software was released to the market in mid-December 2012. The amortization of software development assets is included in the cost of equipment revenues due to the direct relationship to equipment units sold. The Company expects the level of future amortization expense related to capitalized software development costs to increase as current capital projects in progress are released to the market.

Provision for Taxes

Under the application of fresh-start accounting, as amended by Accounting Standards Codification (ASC) 805 Business Combination effective September 15, 2009, when the valuation allowance relating to pre-emergence bankruptcy net operating loss and other deferred tax assets is reversed, tax benefits will be recorded as a reduction to income tax expense. For additional information, see Note 8 to the consolidated financial statements, Income Taxes.

The Company recorded \$17,000 and \$7,000 of income tax expense for the three months ended January 31, 2014 and 2013, respectively. The income tax expense includes state income tax expenses and minimum fees and increases in reserves for uncertain tax positions, as well as anticipated federal alternative minimum taxes in fiscal 2014.

Liquidity and Capital Resources

The Company has financed its liquidity needs over the last several years through revenue generated by the operations of its wholly-owned Medical Graphics Corporation subsidiary.

As of January 31, 2014, the Company had cash and cash equivalents of \$11.1 million and working capital of \$15.1 million. During the three months ended January 31, 2014, the Company generated \$880,000 in cash from operating activities, with \$3,000 used in operations before changes in working capital items. Accounts receivable decreased \$2,490,000, while days sales outstanding (DSO), which measures how quickly receivables are collected, stayed flat at 79 days from October 31, 2013 to January 31, 2014. Inventory increased by \$516,000, as days of inventory on hand increased to 132 days as of January 31, 2014, 18 days more than at January 31, 2013. The accounts payables balance decreased by \$206,000. Employee compensation accruals as of January 31, 2014 were \$756,000 lower than October 31, 2013 levels, reflecting the payments of accrued sales commissions, management incentive compensation and separation costs since year end.

During the three months ended January 31, 2014, the Company used \$369,000 in cash to purchase property, equipment and intangible assets. The Company has no material commitments for capital expenditures for the remainder of fiscal 2014. The Company's 2014 operating plans include costs of advancing the migration of the Company's software platform for its products to a next-generation software platform, including expensed development efforts and capitalized costs for the production software.

Cash was generated in the first quarters of fiscal 2014 and 2013 within financing activities, mostly related to share issuances under employee stock benefit programs (including share purchases within the employee stock purchase plan), offset by amounts paid for share withholding to support statutory minimum income tax withholding requirements on vesting restricted share arrangements.

In the fiscal 2013 second quarter, the Company declared and paid \$1,805,000 in a special one-time dividend. Approximately \$34,000 remains to be paid concurrent with the expected vesting of outstanding restricted share awards.

Table of Contents

The Company believes that it will meet its liquidity and capital resource needs over the next twelve months through its cash flows resulting from operations, as well as current cash and cash equivalents. In addition, the Company has implemented a market-focused strategic plan leveraging the strength of its MGC Diagnostics/MedGraphics brand and improving its worldwide selling and distribution capability. Pursuant to this plan, the Company has held discussions with various potential strategic product and technology partners and may use some of its cash and capital resources in the acquisition of new technologies or businesses.

The Company's Board of Directors will continue to review and assess the Company's capital position and working capital and capital resource needs. If the Board determines that the Company's capital exceeds the amount necessary to enable it to meet its working capital and liquidity needs, as well as to retain a reasonable cushion for contingencies and strategic opportunities, then Company will consider various options for increasing shareholder value, including, but not limited to, purchasing its own shares in the open market and in privately negotiated transactions and or paying cash dividends.

Forward Looking Statements.

The discussion above contains forward-looking statements about our future financial results and business prospects that by their nature involve substantial risks and uncertainties. You can identify these statements by the use of words such as anticipate, believe, estimate, expect, project, intend, plan, will, target, and other words and terms of similar meaning in connection with any discussion of future operating or financial performance or business plans or prospects.

Our actual results may differ materially depending on a variety of factors including:

- national and worldwide economic and capital market conditions;
- continuing cost-containment efforts in our hospital, clinic and office markets;
- our ability to remain as qualified providers for group purchasing organizations ensuring continued access to our markets;
- any changes in the patterns of medical reimbursement that may result from national healthcare reform;
- our ability to successfully operate our business, including successfully converting our increasing research and development expenditures into new and improved cardiorespiratory diagnostic products and services and selling these products and services into existing and new markets;
- our ability to complete our software development initiatives and migrate our software platform to next-generation technology;
- our ability to maintain our cost structure at a level that is appropriate to our near to mid-term revenue expectations that will enable us to increase revenues and profitability as opportunities develop;
- our ability to expand our international revenue through our distribution partners;
- our ability to defend ourselves from product liability claims related to our cardiorespiratory diagnostic products;
- our ability to defend our existing intellectual property and obtain protection for intellectual property we develop in the future;
- our ability to develop and maintain an effective system of internal controls and procedures and disclosure controls and procedures;
- the Company's ability to identify, acquire and integrate products or businesses that enable the Company to increase revenue and profitability; and
- our dependence on third-party vendors.

Additional information with respect to the risks and uncertainties faced by the Company may be found in, and the above discussion is qualified in its entirety by, the other risk factors that are described from time to time in the Company's Securities and Exchange Commission reports, including the Annual Report on Form 10-K for the year ended October 31, 2013.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

None.

Table of Contents

Item 4. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures

Management, with the participation of the Company's chief executive officer, Gregg O. Lehman, Ph.D., and chief financial officer, Wesley W. Winnekins, has evaluated the effectiveness of the design and operation of the disclosure controls and procedures, as defined in Rules 13a-15(e) under the Securities Exchange Act of 1934, as of the end of the period covered by this report. Management has concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that the disclosure controls are also effective to ensure that information required to be disclosed in the Company's Exchange Act reports is accumulated and communicated to management, including the chief executive officer and principal accounting officer, to allow timely decisions regarding required disclosure.

(b) Changes in Internal Controls

There have been no changes in internal control over financial reporting that occurred during the first quarter of fiscal 2014 that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

The Company is subject to claims and lawsuits that have been filed in the ordinary course of business. From time to time, the Company initiates lawsuits against others to enforce patents or to collect debts in the ordinary course of business. There are no known current lawsuits or other litigation that involve the Company. Therefore, management believes that the settlement of all litigation would not have a material effect on the results of operations or liquidity of the Company.

Item 1A. Risk Factors.

We described the most significant risk factors applicable to the Company in Part I, Item 1A Risk Factors of our Annual Report on Form 10-K for the year ended October 31, 2013. We believe there have been no material changes from the risk factors disclosed in that Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Default Upon Senior Securities.

None.

Item 4. Mine Safety Disclosure.

None.

Item 5. Other Information.

None.

Item 6. Exhibits.

31.1 Certifications of Chief Executive Officer pursuant to 13a-14 and 15d-14 of the Exchange Act.

31.2 Certifications of Chief Financial Officer pursuant to 13a-14 and 15d-14 of the Exchange Act.

32. Certifications pursuant to 18 U.S.C. §1350.

101* The following materials from our Quarterly Report on Form 10-Q for the quarter ended January 31, 2014 formatted in Extensible Business Reporting Language (XBRL): (i) Consolidated Balance Sheets, (ii) Consolidated Statements of Income (Loss), (iii) Consolidated Statements of Cash Flows, (iv) Notes to Consolidated Financial Statements and (vi) document and entity information.

* Pursuant to Rule 406T of Regulation S-T, the XBRL related information in Exhibit 101 to this Report on Form 10-Q shall not be deemed to be filed for purposes of Section 18 of the Exchange Act, or otherwise subject to the liability of that section, and shall not be deemed part of a registration statement, prospectus or other document filed under the Securities Act or the Exchange Act, except as shall be expressly set forth by specific reference in such filings.
