PART I

Item 1. Business

Overview

OM Group, Inc. (the “Company”, “we”, “our”, “us”) is a diversified industrial growth company serving attractive global markets, including automotive systems, electronic devices, aerospace, general industrial and renewable energy. We use innovative technologies to address customers' complex applications and demanding requirements. Our strategy is to grow organically through product innovation and new market and customer development; to grow strategically through synergistic acquisitions; and to maximize total stockholder return through a combination of business growth, financial discipline, optimal deployment of capital and continued operational excellence. Our objective is to deliver sustainable, profitable growth and create long-term stockholder value. The Company is a Delaware Corporation and was formed in 1991.

During 2012, we operated in four business platforms, each of which is a reported segment. Further discussion of and financial information for these segments, including external sales, operating profit and total assets, is contained in Note 17 to the accompanying consolidated financial statements of this Annual Report on Form 10-K.

On January 21, 2013, we announced that we signed definitive agreements to exit our Advanced Materials business. We will sell our downstream business, including our cobalt refinery assets in Kokkola, Finland, to a joint venture majority-owned by a subsidiary of Freeport-McMoRan Copper & Gold Inc., and the transfer of our equity interests in our Democratic Republic of Congo-based joint venture (known as GTL) to the other GTL joint venture partners. The transactions, which are expected to be completed by April 30, 2013, may yield total potential cash consideration of up to \$435 million, including \$325 million of initial proceeds at closing, plus the potential for up to an additional \$110 million based on the business achieving certain revenue targets over a period of three years.

The Company consists of the following segments:

Magnetic Technologies segment

The Magnetic Technologies segment develops, manufactures and distributes differentiated, high-performance, industrial-use magnetic materials and related products and systems with exceptional magnetic and/or physical properties. A large majority of our products are specially designed and manufactured for specific customers. We offer the complete range of magnetic technology products, from magnetically soft products to the most powerful permanent magnets in the world. Our products are sold into a wide array of end markets, including automotive systems, electrical installation technology, general industrial, retail and renewable energy. We sell the majority of our products directly to original equipment manufacturers who incorporate them into their sub-assemblies and final assemblies. At December 31, 2012 and 2011, backlog was \$101.3 million and \$132.1 million, respectively. The entire December 2012 backlog is expected to be converted into sales during the next twelve months.

We believe we are a market leader for many of our applications within our primary geographic markets; however, the competitive landscape remains fragmented with many competitors, and no single competitor has significant market share and geographic coverage.

Magnetic Technologies uses nickel, cobalt and rare earth materials, primarily dysprosium and neodymium, to produce its products. The supply of these rare earths is currently concentrated in China and was constrained in 2011, resulting in significant price increases during 2011. These prices declined significantly throughout 2012, and additional non-Chinese sources of supply are expected to develop in the coming years. Please see Risk Factors for important information regarding rare earth raw materials.

The segment is focused on developing and leveraging its substantial patent portfolio to enter new markets and increase market share.

Battery Technologies segment

The Battery Technologies segment provides advanced batteries, battery management systems, and energetic devices for defense, aerospace and medical markets. We sell these products directly to customers who incorporate them into sub-assemblies. The business is also focused on developing products, technologies and applications for emerging markets, including commercial aerospace, alternative energy storage and oil & gas.

Table of Contents

At December 31, 2012, backlog was \$128.0 million as compared with \$122.9 million at December 31, 2011. At December 31, 2012, \$14.6 million of the backlog is not expected to be converted into sales during the next twelve months.

We believe we are a market leader for defense and aerospace applications in the U.S due to our innovation, reliability and long-standing relationships with key customers. There are few competitors qualified to supply into our principal markets. The segment's top three customers account for over half of its sales. The segment is a prime contractor or subcontractor for numerous U.S. Government programs, including U.S. Government customers. Please see "Risk Factors" for important information regarding U.S. government contracts and programs.

The segment is focused on developing new battery chemistries, expanding the markets it serves and developing products and technologies for emerging applications.

Specialty Chemicals segment

The Specialty Chemicals segment develops, produces and supplies chemicals for electronic and industrial applications, and photomasks used by customers to produce semiconductors and related products. The majority of our sales are directly to customers. Orders are quickly filled, and backlog is not material in this segment.

We believe we are a market leader for our products in several of the markets we serve, including electronic devices, coatings and additives. Our customer base in this segment requires significant technical support and high-quality formulations and products that meet stringent requirements and quality specifications. New products and customers often require a long qualification process.

We are focused on providing innovative products that meet specific customer requirements and expanding our geographical reach.

Advanced Materials segment

As discussed above, in January 2013 the Company entered into agreements to exit this business. During 2012 and through the date of sale, this business manufactures inorganic products using unrefined cobalt and other metals, for the mobile energy storage, renewable energy, automotive systems, construction and mining, and industrial end markets. It also has a 55% interest in GTL.

To assist in the transition of the downstream business, the Company entered into two agreements with the buyer pursuant to which: (1) OMG will act as intermediary in a supply agreement between GTL and a joint venture majority-owned by a subsidiary of Freeport-McMoRan Copper & Gold Inc., in back-to-back arrangements for a period of at least two years subject to delivery of a minimum of 7000 MT of cobalt feed, this arrangement is extendable for up to an additional six months in order to deliver a minimum of 7000 MT of cobalt feed; and, (2) OMG will continue to serve as the U.S. distributor for refined cobalt products in primarily back-to-back arrangements for a period of one year after the closing. These agreements are expected to result in minimal profit or cash flow for OMG and will be reported in the Advanced Materials segment until the agreements expire.

Raw Materials

The Company uses a variety of raw materials purchased from a broad supplier base. The primary raw materials used by Magnetic Technologies were nickel, cobalt and certain rare earth materials, primarily dysprosium and neodymium. Unrefined cobalt is the principal raw material used by Advanced Materials. Multiple suppliers are generally available for each of these materials; however, some raw materials are sourced from a single supplier. Rare earth materials, principally neodymium and dysprosium, are critical to the production of certain Magnetic Technologies products and currently are available from a limited number of suppliers, primarily in China. Temporary shortages of raw materials may occasionally occur and cause short-term price increases. Historically, these shortages have not resulted in lack of availability of raw materials. The Company also uses certain raw materials that must be qualified prior to being used

in production. For these raw materials, changes in suppliers may result in disruption of production, forward purchasing of contract requirements or re-qualification expenses.

During periods of rapidly changing prices of key raw materials, there may be price lags that can positively or negatively impact the short-term profitability and cash flow from operations of the Company. Declines in the selling prices of the Company's finished goods, which can result from decreases in the market price of raw materials or other factors, can result in the Company's inventory carrying value being written down to a lower market value.

Table of Contents

Foreign Operations

The Company has operations in North America, Europe and Asia-Pacific, with the majority of its operations located outside of the United States. The Company markets its products worldwide and purchases important raw materials from suppliers located outside of the United States. Although a significant portion of the Company's raw material purchases and product sales are based on the U.S. dollar, sales at certain locations, prices of certain raw materials, certain non-U.S. operating expenses and income taxes are denominated in local currencies. Accordingly, fluctuations in currency prices affect the Company's operating results. The primary currencies for which the Company has foreign currency rate exposure are the European Union Euro, Taiwanese Dollar, Malaysian Ringgit, Singapore Dollar, British Pound Sterling, Congolese Franc, Chinese Renminbi and the Canadian Dollar. Please see "Risk Factors" for additional information regarding our foreign operations and Note 17 to the accompanying consolidated financial statements to this Annual Report on Form 10-K for financial information about geographic areas.

Research and Development

The Company's research and development programs are part of its strategy to grow the business through new products, applications and markets. Research and development expenses were approximately \$32.5 million in 2012, \$24.8 million in 2011 and \$11.8 million in 2010. The increases in 2012 and 2011 are primarily due to the acquisition of VAC in August 2011. These amounts do not include development and application engineering costs incurred in conjunction with fulfilling customer orders and executing customer projects.

Patents and Other Intellectual Property

The Company holds patents, registered primarily in Europe and the United States, relating to the formulation, content, manufacturing, processing and use of certain products, materials and chemistries. The Company also possesses other intellectual property, including trademarks, tradenames, know-how, developed technology and trade secrets. Although the Company believes these intellectual property rights are important in the operations of its specific businesses, it does not consider any single patent, trademark, tradename, know-how, developed technology or trade secret to be material to its business as a whole.

Environmental Matters

The Company is subject to a variety of environmental and pollution control laws and regulations in the jurisdictions in which it operates. As is the case with other companies in similar industries, the Company faces exposure from actual and potential claims and legal proceedings involving environmental matters. A number of factors affect the cost of environmental remediation, including the determination of the extent of contamination, the length of time the remediation may require, the complexity of environmental regulations and the continuing improvements in remediation techniques. Taking these factors into consideration, the Company estimates the undiscounted costs of remediation, which will be incurred over several years, and accrues an amount consistent with the estimates of these costs when it is probable that a liability has been incurred. The Company continually evaluates the adequacy of its reserves and adjusts the reserves when determined to be appropriate. Ongoing environmental compliance costs, which are expensed as incurred, were approximately \$15.3 million in 2012 and \$13.2 million in 2011. The Company anticipates that it will continue to incur compliance costs for the foreseeable future; however, the amount and timing of future environmental expenditures could vary significantly. The Company believes that its ultimate aggregate cost of environmental remediation as well as liability under environmental protection laws will not materially adversely affect its financial condition or results of operations.

Employees

At December 31, 2012, the Company had 6,800 full-time employees, including 380 at the Company's consolidated joint venture, with whom we believe we have good relations.

SEC Reports

The Company makes available, free of charge, through its website, (www.omgi.com) its reports on Forms 10-K, 10-Q and 8-K as soon as reasonably practicable after the reports are electronically filed with the Securities and Exchange Commission. A copy of any of these documents is available in print, free of charge, to any stockholder who requests a copy, by writing to OM Group, Inc., 127 Public Square, 1500 Key Tower, Cleveland, Ohio 44114-1221 USA, Attention: Investor Relations. The SEC maintains an internet website at <http://www.SEC.gov> that contains the

Edgar Filing: OM GROUP INC - Form 10-K

Company's report proxy statements and other information. You may read and copy any materials filed with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

Table of Contents

Item 1A. Risk Factors

The following discussion of “risk factors” identifies the most significant risks that our business faces. Our business, financial condition and results of operations could be materially adversely affected by any of these risks. There may be additional risks and uncertainties not presently known to us or that we currently deem to be immaterial. These risks should be read in conjunction with the other information in this Annual Report on Form 10-K.

We are subject to risks arising from uncertainty in worldwide economic conditions. Overall demand for our products and our profitability may be adversely affected by changes in global economic conditions, including inflationary or deflationary pressures; interest rates; access to and functioning of capital markets; consumer and business spending rates; and higher commodity, raw material and fuel costs. Current uncertainty regarding global economic conditions could lead to reduced demand for our products, reduced profitability, and increased payment delays or defaults. We are limited in our ability to reduce costs to offset the results of a prolonged or severe economic downturn in light of certain fixed costs associated with our operations.

Extended business interruption at our key facilities could have an adverse impact on operating results. Our results of operations are dependent in large part upon our ability to produce and deliver products promptly upon receipt of orders. Our facilities in Finland, Germany, the United States, Taiwan and the DRC are critical to our business, and any damage to or other conditions significantly interfering with the operation of our facilities, such as an interruption of our supply lines or work stoppages, could have a material adverse effect on our business, financial condition and results of operations.

We are at risk from fluctuations in the price and uncertainties in the supply of cobalt, rare earth materials and other raw materials. Unrefined cobalt is the principal raw material we use in manufacturing Advanced Materials products, and nickel, cobalt and certain rare earth materials, primarily dysprosium and neodymium, are the primary raw materials used by Magnetic Technologies. Fluctuations in the price of cobalt, rare earth materials and other raw materials have been significant in the past and we believe price fluctuations are likely to occur in the future. Our ability to pass increases in raw material costs through to our customers by increasing the selling prices of our products is an important factor in our business. We cannot guarantee that we will be able to maintain an appropriate differential between customer prices and our costs at all times, which could lead to reduced profitability. In addition, we may be required under U.S.GAAP accounting rules to write down the carrying value of our inventory when cobalt, rare earth and other raw material prices decrease.

There are a limited number of supply sources for unrefined cobalt, primarily the DRC, Finland and Russia. Rare earth materials are available from a limited number of suppliers, primarily in China. Political and civil instability and unexpected adverse changes in laws or regulatory requirements, including with respect to export duties, quotas or embargoes, may affect the market price and availability of raw materials, including cobalt and rare earth materials, particularly from the DRC and China, respectively. If a substantial interruption should occur in the supply of cobalt or rare earth materials, we may not be able to obtain other sources of supply in a timely fashion or at a reasonable price. A substantial increase in the price or an interruption in supply of cobalt or rare earth materials may cause our customers to look for substitute materials or processes which could lead to reduced demand for our products.

We intend to seek additional acquisitions, but we may not be able to identify attractive targets, complete transactions, or successfully integrate acquired companies, which could adversely affect our strategy. Our strategy anticipates growth partly through future acquisitions; however, our ability to identify and consummate any future acquisitions on terms that are favorable to us may be limited by the number of attractive acquisition targets, internal demands on our resources and our ability to obtain financing. Our success in integrating newly-acquired

businesses could be compromised if we fail to retain key personnel or fail to execute effective integration plans. Integration of acquired operations may take longer, or be more costly or disruptive to our business, than originally anticipated, and it is also possible that expected synergies from future acquisitions may not materialize. We also may incur costs and divert management attention for potential acquisitions that are never consummated. Acquisitions could result in the incurrence of additional debt, costs and contingent liabilities.

There may be liabilities of the acquired companies that we fail to properly determine during the due diligence investigation and for which we, as a successor owner, may be responsible. Indemnities and warranties obtained from the seller may not fully cover the liabilities due to limitations in scope, amount, duration, financial limitations of the indemnitor or warrantor or other reasons.

Table of Contents

On January 21, 2013 we announced the signing of definitive agreements to exit our Advanced Materials business, but the arrangements are subject to customary closing conditions, including regulatory approvals, which might prevent their successful completion. The divestiture of our Advanced Materials business, including the sale of our refinery assets in Kokkola, Finland to a joint venture majority-owned by a subsidiary of Freeport-McMoRan Copper & Gold, Inc., and the transfer of the Company's equity interest in its DRC-based joint venture (GTL) to our current partners in GTL, are the final steps in exiting our legacy commodity businesses. The closing of the sale of the Advanced Materials business is subject to regulatory approvals in 5 jurisdictions and other customary conditions. While we do not believe that there are any issues that would delay or impede regulatory approvals or completion of the other closing conditions, there can be no assurances that all closing conditions will be met and the divestiture completed.

A portion of the purchase price for the Advanced Materials business is contingent on the business achieving certain revenue targets over a period of three years, over which time we may receive all, a portion or none of the \$110 million.

In connection with the divestiture of our Advanced Materials business \$110 million of the purchase price is subject to the buyer, a joint venture majority-owned by a subsidiary of Freeport-McMoRan Copper & Gold, Inc., achieving certain revenue targets over a period of three years. The achievement of those targets is subject to a number of factors not within our control, including cobalt metal price, the supply of unrefined cobalt and sales volumes. Accordingly, over the three year period following the closing, we may receive all, a portion or none of the \$110 million contingent purchase price.

Our indebtedness may impair our ability to operate our business successfully.

The terms of our indebtedness could adversely affect our ability to finance future operations or capital needs and pursue available business opportunities. The terms of our Senior Secured Credit Facility contain various provisions that limit our ability to, among other things, incur additional indebtedness, make investments, sell assets and return capital to stockholders through dividends. These restrictions could place us at a competitive disadvantage against less levered competitors. In addition we are exposed to increases in interest rates since some of our borrowings have variable interest rate provisions.

In addition, our Senior Secured Credit Facility requires us to maintain specified financial ratios, satisfy certain financial condition tests, and repay our indebtedness when it becomes due. Events beyond our control, including changes in general economic and business conditions, may affect our ability to meet these requirements. We cannot assure that we will meet those requirements or that the lenders will waive any failure to meet those requirements. A breach of any of these covenants or any other restrictive covenants contained in our Senior Secured Credit Facility would result in an event of default. An event of default could result in the holders of the affected indebtedness declaring all amounts outstanding, together with accrued interest, to be immediately due and payable. If we were unable to pay such amounts or secure new financing, Senior Secured Credit Facility lenders could proceed against the collateral pledged to them, which is a substantial portion of our assets.

Changes in effective tax rates or adverse outcomes resulting from examination of our income tax returns could adversely affect us.

We are subject to income taxes in the United States and numerous jurisdictions outside of the United States. Significant judgment is required in evaluating our worldwide provision for income taxes. During the ordinary course of business, there are many transactions for which the ultimate tax determination is uncertain. For example, our effective tax rates could be adversely affected by the mix of earnings in various tax jurisdictions with different tax rates, changes in the valuation of our deferred tax assets and liabilities, the timing and amounts of funds repatriated to the U.S., and changes in tax laws, regulations and accounting principles and interpretations.

We are subject to tax audits in various jurisdictions, and such jurisdictions may assess additional income tax against us. The final determination of tax audits and any related litigation could be materially different from our historical

income tax provisions and accruals, resulting in a material reduction of net income.

The majority of our operations are outside the United States, which subjects us to risks that may adversely affect our operating results.

Conducting business outside the U.S subjects the Company to risks related to the differing legal and regulatory requirements and the social, political and economic conditions of many jurisdictions. These risks include currency rate fluctuations, political instability, civil unrest or labor difficulties; inconsistent support of legal rights; difficulty collecting receivables and longer customer payment cycles; unexpected additional taxes, tariffs, restrictions on capital flows,

Table of Contents

and restrictions on trade; and unexpected adverse changes in foreign laws or regulatory requirements. Furthermore, unexpected and dramatic devaluations of currencies in developing or emerging markets, could negatively affect the value of our earnings from, and of the assets located in, those markets.

We engage in business in certain countries where the risk of public sector corruption and bribery is high. We have implemented policies and procedures and conducted employee training to assure that our operations are in compliance with anti-corruption laws. If our compliance actions fail, a violation of anti-corruption laws could result in serious penalties, including criminal and civil sanctions.

The level of returns on pension plan assets and changes in the actuarial assumptions used could adversely affect us. Our operating results may be positively or negatively impacted by the amount of expense we record for our defined benefit pension plans. U.S. GAAP requires that we calculate pension expense using actuarial valuations, which are dependent upon our various assumptions including estimates of expected long-term rate of return on plan assets, discount rates for future payment obligations, and the expected rate of increase in future compensation levels. Our pension expense and funding requirements may also be affected by our actual return on plan assets, and by legislation and other government regulatory actions. Changes in assumptions, laws or regulations could lead to variability in operating results and could have a material adverse impact on liquidity.

Our financial condition could be negatively impacted if we fail to maintain sufficient cash in the United States. The majority of our cash and cash equivalents are held outside the United States. If a substantial amount of cash were required in the United States for debt repayment, capital expenditures or other initiatives including future acquisitions, we may be required to repatriate funds to the United States with potentially unfavorable tax consequences or otherwise finance the desired activity.

We are subject to stringent environmental regulation that could cause us to incur unanticipated costs or liabilities and could affect sales of our products.

We have expended, and may be required to expend in the future, substantial funds for compliance with laws and regulations relating to the storage, handling, disposal, emission and discharge of materials into the environment. In addition, we may from time to time be subjected to claims for personal injury, property damages or natural resource damages made by third parties or regulators. Given the many uncertainties involved in assessing liability for environmental claims or fully anticipating the scope of unknown contamination and remediation, our current reserves may prove to be insufficient.

In addition, new or revised governmental regulations relating to health, safety and the environment may affect demand for our products. For example, the European Union's REACH legislation, which has established a system to register and evaluate chemicals manufactured in, or imported to, the European Union and requires additional testing, documentation and risk assessments for the chemical industry, could affect our ability to sell certain products. Such new or revised regulations may result in heightened concerns about the chemicals involved and in additional requirements being placed on the production, handling, or labeling of these chemicals and may increase the cost of producing them, transporting them and/or limit the use of such chemicals or products containing such chemicals, which could lead to a decrease in demand. Similar legislation is being implemented in several other areas of the world. As a result of these regulations, customers may avoid purchasing some products in favor of perceived environmentally sensitive, less hazardous or less costly alternatives.

We may not be able to respond effectively to technological changes in our industry or in our customers' products. Our future business success will depend in part upon our ability to continue to enhance our technological capabilities, develop and market products and applications that meet changing customer needs and successfully anticipate or respond to technological changes on a cost-effective and timely basis. Moreover, technological and other changes in our customers' products or processes may render some of our products obsolete, which would reduce the demand for

those products. In addition, technical advances by competitors may lead to production of less expensive or more effective products could reduce future sales.

We may not be able to adequately protect or enforce our intellectual property rights.

We rely on patents and trade secrets to protect our intellectual property. We attempt to protect and restrict access to our trade secrets and proprietary information, but it may be possible for a third party to obtain our information and develop similar technologies. If a competitor infringes upon our patent or other intellectual property rights, enforcing those rights could be difficult, expensive and time-consuming, making the outcome uncertain. Even if we are successful,

7

Table of Contents

litigation to enforce our intellectual property rights or to defend our patents against challenge could be costly and could divert management's attention.

Because we depend on several large customers for a significant portion of our revenues, our operating results could be adversely affected by any disruption of our relationship with these customers or any material adverse change in their businesses.

We depend on several large customers for a significant portion of our business. For example, sales to the top three customers in the Battery Technologies segment represented over half of Battery Technologies' net sales in 2012. Any disruption in our relationships with our major customers, including any adverse modification of our agreements with them or their unwillingness or inability to perform their obligations under the agreements, could adversely affect us. In addition, any material adverse change in the financial condition of any of our major customers could have similar adverse effects.

We operate in very competitive industries.

We have many competitors. Some of our principal competitors have greater financial and other resources and greater brand recognition than we have. Accordingly, these competitors may be better able to withstand changes in conditions within the industries in which we operate and may have significantly greater operating and financial flexibility than we do. As a result of the competitive environment in the markets in which we operate, we currently face and will continue to face pressure on the sales prices of our products from competitors and large customers. With these pricing pressures, we may experience future reductions in the profit margins on our sales, or may be unable to pass on future raw material price or operating cost increases to our customers, or incur to a sudden loss of business.

We believe that industry consolidation among our peers could result in stronger competitors with greater financial and other resources that are better able to compete for customers.

The insurance that we maintain may not fully cover all potential exposures.

We maintain property, business interruption and casualty insurance but such insurance may not cover all risks associated with the hazards of our business and is subject to limitations, including deductibles and maximum liabilities covered. We are potentially at risk if one or more of our insurance carriers fail. Additionally, severe disruptions in the domestic and global financial markets could adversely impact the ratings and survival of some insurers. In the future, we may not be able to obtain coverage at current levels, and our premiums may increase significantly on coverage that we maintain.

Our Battery Technologies segment maintains contracts with the United States Government and is subject to government regulations and uncertain levels of funding or modification due to changes in customer priorities and potential termination.

U.S. Government contracts are subject to specific regulations including those related to employment practices, environmental protection, recordkeeping and accounting. These laws impact how we transact business with our governmental clients and, in some instances, impose significant costs on our business operations. If we fail to comply with any of these regulations, requirements or statutes, our existing government contracts could be terminated, and we could be temporarily suspended or even debarred from government contracting or subcontracting which would reduce our sales and profits. Non-compliance with government regulations could also result in financial penalties, disallowed payments to us, and criminal prosecution.

The funding of U.S. Government programs is subject to congressional budget authorization and appropriation processes. We cannot predict the extent to which funding will be provided as part of the budgets ultimately approved by Congress. In the event that appropriations for any of our or our customers' programs are impacted, our contract or subcontract under such program may be terminated or adjusted by the U.S. Government. We also cannot predict the impact of potential changes in priorities due to sequestration, military transformation and planning and/or the nature of

war-related activity on related programs.

We are at risk as a result of current circumstances and developments regarding the DRC.

A substantial amount of our supply of cobalt is sourced from the DRC, a nation that has historically experienced outbreaks of political instability, changes in national and local leadership, financial crises and basic infrastructure challenges. GTL has experienced an increase in claims by DRC national and local government agencies for additional taxes and customs duties and we cannot predict whether GTL will receive additional claims in the future.

Table of Contents

Failure to retain and recruit key personnel would harm our ability to meet key objectives.

Our key personnel are critical to the management and direction of our businesses. Our future success depends, in large part, on our ability to retain key personnel and other capable management personnel. It is particularly important that we retain our senior management group that is responsible for implementing our strategy. If we were not able to attract and retain talented personnel and replace key personnel should the need arise, we may not successfully execute our strategy.

Our stock price may continue to be volatile.

Historically, our common stock has experienced substantial price volatility. In addition, the stock market has experienced and continues to experience significant price and volume volatility that has often been unrelated to our operating performance. These broad market fluctuations may adversely affect the market price of our common stock.

Any impairment in the value of our intangible assets, including goodwill, would negatively affect our operating results and total capitalization.

Our total assets reflect substantial intangible assets, primarily goodwill. The goodwill results from our acquisitions and represents the excess of cost over the fair value of the identifiable net assets we acquired. We assess at least annually whether there has been any impairment in the value of our intangible assets. If future operating performance at one or more of our business units were to fall significantly below current levels, if competing or alternative technologies emerge, if market conditions for acquired businesses decline, if significant and prolonged negative industry or economic trends continue, if our stock price and market capitalization declines, or if future cash flow estimates decline, we could incur under current applicable accounting rules, a non-cash charge to operating earnings for goodwill impairment. Any determination requiring the write-off of a significant portion of unamortized intangible assets would negatively affect our results of operations and equity book value, the effect of which could be material.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company believes that its plants and facilities, which are of varying ages and of different construction types, have been satisfactorily maintained, are suitable for the Company's operations and generally provide sufficient capacity to meet the Company's production requirements.

The Company's Kokkola, Finland production facility is situated on property owned by Boliden Kokkola Oy. The Company and Boliden Kokkola Oy share certain physical facilities, services and utilities under agreements with varying expiration dates.

The number, type, location and size of the Company's properties as of December 31, 2012, by segment, are set forth below:

Segment	Number and Nature of Facilities				Square Footage (in thousands)	
	Manufacturing	Warehouse	Sales/Service	Owned	Leased	
Magnetic Technologies	6	6	15	1,464	359	
Advanced Materials	2	2	2	804	2	
Specialty Chemicals	16	16	15	606	486	
Battery Technologies	8	9	9	408	135	
	Locations				Leased Facilities Expiration Dates (years)	
Segment	North America	Europe	Asia	Other	Minimum	Maximum
Magnetic Technologies	1	4	10	—	1	10
Advanced Materials	—	1	2	1	1	2

Edgar Filing: OM GROUP INC - Form 10-K

Specialty Chemicals	12	9	7	—	1	29
Battery Technologies	5	—	—	—	3	9

Item 3. Legal Proceedings

The Company is a party to various legal and administrative proceedings incidental to its business. We believe that disposition of all suits and claims related to our ordinary course of business should not in the aggregate have a material adverse effect on the Company's financial position or results of operations.

Item 4. Mine Safety Disclosures

Not applicable.

Executive Officers of the Registrant

The information under this item is being furnished pursuant to Instruction 3 to Item 401(b) of Regulation S-K and General Instruction G of Form 10-K. Set forth below is the name, age, positions and offices held by each of the Company's executive officers, as well as their business experience during the past five years. Dates indicate when the individual was named to or held the indicated position.

Joseph Scaminace - 59

Chairman and Chief Executive Officer (August 2005)

Christopher M. Hix - 50

Vice President and Chief Financial Officer (January 2012)

Vice President and Chief Financial Officer, Robbins & Myers, Inc. (August 2006 - December 2011)

Valerie Gentile Sachs - 57

Vice President, General Counsel and Secretary (September 2005)

Stephen D. Dunmead - 49

Vice President and General Manager, Specialties (January 2006) - Mr. Dunmead announced his resignation effective February 28, 2013

Gregory J. Griffith - 57

Vice President, Strategic Planning and Development (May 2012)

Vice President, Strategic Planning, Development and Investor Relations (February 2007)

Michael V. Johnson - 61

Vice President, Human Resources (November 2010)

Senior Vice President, Human Resources, FXI Foamex Innovations (January 2008 - October 2010)

Human Resources Consultant (September 2006 - January 2008)

Table of Contents

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Company's common stock is traded on the New York Stock Exchange under the symbol "OMG". As of December 31, 2012, the number of record holders of the Company's common stock was 989.

The high and low market prices for the Company's common stock for each quarter during the past two years are presented in the table below:

	2012		Cash Dividend	2011		Cash Dividend
	Sales Price High	Low		Sales Price High	Low	
First quarter	\$31.26	\$22.76	\$—	\$39.85	\$33.43	\$—
Second quarter	\$28.09	\$16.72	\$—	\$40.67	\$31.72	\$—
Third quarter	\$21.86	\$15.12	\$—	\$41.88	\$25.50	\$—
Fourth quarter	\$22.30	\$17.40	\$—	\$30.39	\$20.13	\$—

We intend to continue to retain earnings for use in the operation and expansion of the business and therefore do not anticipate paying cash dividends in 2013.

Item 6. Selected Financial Data

	Year Ended December 31,				
	2012	2011	2010	2009	2008
(In millions, except per share data)					
Income Statement Data:					
Net sales	\$1,637.8	\$1,514.5	\$1,196.6	\$871.7	\$1,736.8
Amounts attributable to OM Group, Inc. common stockholders:					
Income (loss) from continuing operations before cumulative effect of change in accounting principle, net of tax	\$(38.6)	\$42.1	\$82.6	\$(19.4)	\$134.9
Income (loss) from discontinued operations, net of tax	(0.3)	(0.1)	0.7	1.5	0.1
Net income (loss)	\$(38.9)	\$42.0	\$83.3	\$(17.9)	\$135.0
Net income (loss) per common share attributable to OM Group, Inc. common stockholders — diluted:					
Continuing operations	\$(1.21)	\$1.35	\$2.70	\$(0.64)	\$4.45
Discontinued operations	(0.01)	—	0.03	0.05	—
Net income (loss)	\$(1.22)	\$1.35	\$2.73	\$(0.59)	\$4.45
Balance Sheet Data:					
Cash and cash equivalents	\$227.6	\$292.1	\$400.6	\$355.4	\$244.8
Total assets	\$2,499.4	\$2,873.8	\$1,772.7	\$1,441.1	\$1,434.4
Long-term debt, excluding current portion	\$454.1	\$663.2	\$90.0	\$—	\$26.1
Cash Flow Data:					
Net cash provided by operating activities	\$208.4	\$124.8	\$126.6	\$165.4	\$172.1
Results for 2012 include \$55.9 million of charges related to VAC inventory purchase accounting step-up, pension settlement expense of \$2.5 million pre-tax, \$2.9 million pre-tax gain recognized on the sale of property in China, \$6.5 million acceleration of deferred financing fees and an EPT escrow settlement of \$6.0 million pre-tax. See note 3 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion.					
Results for 2011 include pre-tax acquisition-related charges recorded in Magnetic Technologies of \$111.2 million, Corporate acquisition-related fees of \$15.4 million and a \$9.7 million pre-tax gain recognized on the sale of land.					
Results for 2010 include Battery Technology acquisition-related charges of \$3.2 million pre-tax and Corporate acquisition-related fees of \$2.2 million pre-tax.					
Results for 2009 include a \$37.5 million pre-tax goodwill impairment charge, a \$12.7 million pre-tax restructuring charge and a \$4.7 million pre-tax gain on termination of the retiree medical plan.					
Results for 2008 include an \$8.8 million pre-tax goodwill impairment charge and a \$46.6 million tax benefit related to an election to take foreign tax credits on prior year U.S. tax returns.					
In 2012 we changed from the cost method to the equity method of accounting for an investment in China. The Company recorded a retrospective adjustment to the investment balance, results of operations and retained earnings as if the equity method had been in effect during all previous periods since August 2011 in which the investment was acquired. The effect of the change to the Company's 2011 consolidated results of operations was to increase other income by \$4.1 million.					

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis of financial condition and results of operations should be read in conjunction with the consolidated financial statements and the notes thereto appearing elsewhere in this Annual Report.

General

OM Group, Inc. (the "Company", "we", "our", "us") is a diversified industrial growth company serving attractive global markets, including automotive systems, electronic devices, aerospace, general industrial and renewable energy. We

use innovative technologies to address customers' complex applications and demanding requirements. Our strategy is to grow organically through product innovation and new market and customer development, to grow strategically through synergistic acquisitions, and to maximize total stockholder return through a combination of business growth, financial discipline, optimal deployment of capital and continued operational excellence. Our objective is to deliver sustainable, profitable growth and create long-term stockholder value.

Table of Contents

On August 2, 2011, the Company completed the acquisition of the outstanding equity interests in VAC Holding GmbH ("VAC") for \$812.2 million of total consideration and formed the Magnetic Technologies segment for that business.

In the Fourth Quarter of 2012, the Company, as a result of enhancing its financial planning and analysis efforts, discovered that a portion of Magnetic Technologies' Cost of goods sold were misclassified in Selling, general and administrative expenses ("SG&A") since the acquisition when the business converted the basis of its financial reporting from International Financial Reporting Standards to US GAAP. The Company corrected the classification of these expenses by restating its Quarterly Reports on Form 10-Q filed during 2012. The reclassification has no impact on previously-reported net sales, operating profit, net income, or net income per share on the Company's Condensed Statements of Consolidated Operations, nor does it have any effect on the Company's previously-reported Condensed Consolidated Balance Sheets, Statements of Consolidated Comprehensive Income (Loss), Condensed Statements of Consolidated Cash Flows, Condensed Statements of Consolidated Total Equity or segment net sales and operating profit. The Company has evaluated the error for the period ending December 31, 2011 in accordance with Staff Accounting Bulletin (SAB) 99, SAB 108 and Accounting Standards Codification (ASC) 250 and determined that the impact of the misclassification in 2011 is not material. The Company made correction of the amounts related to this misstatement for 2011 in this Annual Report for 2012.

On January 21, 2013, the Company announced that it signed definitive agreements to exit its Advanced Materials business. These agreements include the sale of its downstream business, including its cobalt refinery assets in Kokkola, Finland, to a joint venture majority-owned by Freeport-McMoRan Copper & Gold Inc. and the transfer of its equity interests in its Democratic Republic of Congo (DRC)-based joint venture (known as GTL) to the other GTL joint venture partners. The transactions, which are expected to be completed by April 30, 2013, may yield total potential cash consideration of up to \$435 million, including \$325 million on initial proceeds at closing, plus the potential for up to an additional \$110 million based on the business achieving certain revenue targets over a period of three years.

The Company operates in four business platforms, each of which is a reported segment. Further discussion of and financial information for these segments, including external sales, operating profit and total assets, is contained in Note 17 to the accompanying consolidated financial statements of this Annual Report on Form 10-K.

Magnetic Technologies segment

The Magnetic Technologies segment develops, manufactures and distributes differentiated, high-performance industrial-use magnetic materials and related products and systems with exceptional magnetic and/or physical properties for a wide array of end markets, including automotive systems, electrical installation technology, general industrial, retail and renewable energy.

Battery Technologies segment

The Battery Technologies segment provides advanced batteries, battery management systems, battery-related research and energetic devices for the defense, aerospace and medical markets.

Specialty Chemicals segment

The Specialty Chemicals segment develops, produces and supplies chemicals for electronic and industrial applications, and photomasks used by customers to produce semiconductors and related products.

Advanced Materials segment

As discussed above, in January 2013 the Company entered into agreements to exit this business. During 2012 and through the date of sale, this business manufactures inorganic products using unrefined cobalt and other metals, for the mobile energy storage, renewable energy, automotive systems, construction and mining, and industrial end markets. It also has a 55% interest in GTL.

Related to our exit from this business and to assist in the transition of the downstream portion of the business to the new owner, we entered into two agreements pursuant to which: (1) We will act as intermediary in a supply agreement between GTL and the Kokkola refinery in back-to-back arrangements for a period of at least two years subject to delivery of a minimum of 7000 MT of cobalt feed. This arrangement is extendable for up to an additional six months in order to deliver a minimum of 7000 MT of cobalt feed; and, (2) We will continue to serve as the U.S. distributor for refined cobalt products in primarily back-to-back arrangements for a period of one year after the closing. These agreements are expected to result in minimal profit or net cash flow for us. The related activity will be reported in the Advanced Materials segment until the agreements expire. After the expiration of these agreements, the Advanced Materials segment is expected to be discontinued and no longer be reported.

Table of Contents

Executive Overview

As discussed above, we completed the acquisition of VAC during the third quarter of 2011. The increase in consolidated sales in 2012 compared to 2011 is due primarily to a full twelve months of sales of VAC in the current year. Sales and operating profits in Magnetic Technologies were bolstered in early 2012 by the positive effects of rare-earth pricing. However, as rare-earth pricing retreated throughout 2012, these pricing benefits trended downward and then were essentially absent by fourth quarter 2012, when the Company recorded a lower of cost or market charge to write-down the value of its inventory to market. In Battery Technologies, the increase in sales and operating profit in 2012 was due primarily to non-U.S. defense sales, as well as higher medical volumes. In Specialty Chemicals, sales and operating profit were down due primarily to lower volumes, which were negatively impacted by the Thailand flooding in the early part of the year, a weak electronics market and a weak European economy. In Advanced Materials, sales and operating profit were negatively impacted by the lower cobalt and copper price compared to prices in 2011, as well as lower volumes due to product demand weakness in Europe.

Table of Contents

The Company is providing adjusted operating profit (loss), adjusted EBITDA, and adjusted earnings per common share attributable to OM Group, Inc. common stockholders - assuming dilution, which are non-GAAP financial measures. The tables below present reconciliations of these amounts to the comparable U.S. GAAP amounts. The Company believes that the non-GAAP financial measures presented in the tables facilitate a comparative assessment of the Company's operating performance and enhance investors' understanding of the performance of the Company's operations. The non-GAAP financial information set forth in the tables below are not alternatives to reported results determined in accordance with U.S. GAAP.

Magnetic Technologies acquisition-related charges in 2012 totaled \$38.6 million (net of related tax benefit), representing the step-up value for inventory in purchase accounting that turned through cost of goods sold. Other items impacting operating profit included a land sale gain of \$2.9 million, net of tax in Specialty Chemicals, and expense of \$2.5 million, net of tax related to a settlement charge associated with lump-sum cash settlements to certain participants in one of our U.S. defined benefit pension plans. Below operating profit, the Company recorded \$6.0 million, net of tax of Other income for a fourth quarter 2012 receipt of cash from an escrow account related to the Battery Technologies acquisition, and recorded Interest expense of \$6.5 million, net of tax in the second half of 2012 related to accelerated amortization of deferred financing fees as a result of early repayments of debt.

Magnetic Technologies 2011 results include charges of \$75.0 million, net of tax of inventory purchase accounting step-up charges and lower of cost or market charges, \$18.2 million of acquisition related fees and \$2.2 million of severance charges. 2010 includes acquisition-related charges of \$4.9 million, net of tax.

Corporate acquisition-related charges relate to acquisition fees in each year.

2012 Compared with 2011

The following table identifies, by segment, the components of change in net sales and operating profit in 2012 compared with 2011:

(in thousands)	Net sales	Operating profit - as reported	Adjusted operating profit	
2011	\$1,514.5	\$36.5	\$153.4	
Increase in 2011 from:				
Magnetic Technologies	355.4	44.6	(10.7)
Battery Technologies	14.2	7.5	7.5	
Specialty Chemicals	(53.0) (24.3) (17.4)
Advanced Materials	(193.8) (74.8) (74.8)
Corporate	—	9.1	(3.9)
Intersegment items	0.5	0.1	0.1	
2012	\$1,637.8	\$(1.3) \$54.2	

Net sales increased \$123.3 million, or 8.1%, primarily due to the VAC acquisition in August 2011, for which 2012 includes a full twelve months of sales activity. Sales in Magnetic Technologies were bolstered in 2012 by the positive effects of rare-earth pricing, which drove results higher. As rare-earth pricing retreated throughout 2012, these pricing benefits trended downward and then were essentially absent by fourth quarter 2012. In Battery Technologies, the

Table of Contents

increase in sales in 2012 was due primarily to non-US defense sales, as well as higher volumes for medical applications. In Specialty Chemicals, sales were down primarily due to lower volumes, which were negatively impacted by the 2011 Thailand floods, a weak consumer electronics market and a weak European economy. In Advanced Materials, sales were negatively impacted by lower cobalt and copper prices compared to the prior year, as well as lower volumes due to weakness in Europe.

Gross profit increased slightly to \$256.4 million in 2012, compared with \$255.9 million in 2011. The largest factors affecting the \$0.5 million increase in gross profit were the full 12 months of VAC results and favorable mix and higher volumes in Battery Technologies, partially offset by unfavorable prices and decreased volume in Advanced Materials and decreased volume in Specialty Chemicals. Excluding VAC inventory purchase accounting step-up charges, gross profit as a percentage of net sales was 19.1% in 2012 compared with 23.9% in 2011.

Selling, general and administrative expenses (“SG&A”) increased to \$260.5 million in 2012 compared with \$229.1 million in 2011. The increase was primarily due to a full 12 months of VAC results, partially offset by fees associated with acquisitions in 2011 of \$17.8 million. 2012 results also include a \$2.5 million settlement charge associated with lump-sum cash settlements to certain participants in a defined benefit pension plans. As a percentage of sales, SG&A increased to 15.9% in 2012 from 15.1% in 2011, primarily due to lower sales from businesses owned for all of 2011. The following table summarizes the components of Other expense, net:

(in thousands)	Year Ended December 31,		
	2012	2011	Change
Interest expense	\$ (45,798)	\$ (23,268)	\$ (22,530)
Accelerated amortization of deferred financing fees	(6,524)	—	(6,524)
Interest income	774	1,440	(666)
Foreign exchange gain (loss)	(1,007)	10,564	(11,571)
Other expense, net	5,418	3,680	1,738
	\$ (47,137)	\$ (7,584)	\$ (39,553)

The increase in interest expense is due to a full twelve months of borrowings and interest expense related to the VAC acquisition in August 2011. During 2012, we made accelerated principal payments of \$197.0 million on our Euro Term B Facility using cash on hand, and as a result recorded accelerated amortization of deferred financing fees of \$6.5 million. The foreign exchange loss in 2012 is primarily related to the impact on our net Euro debt position from the weakening of the USD against the Euro in 2012; the opposite occurred in 2011. Other income (expense), net in 2012 includes the \$6.0 million escrow receipt related to the Battery Technologies acquisition as described above.

In 2012 we changed from the cost method to the equity method of accounting for an investment in China. The Company recorded a retrospective adjustment to the investment balance, results of operations and retained earnings as if the equity method had been in effect during all previous periods since August 2011 in which the investment was acquired. The effect of the change to the Company's 2011 consolidated results of operations was to increase other income by \$4.1 million.

The Company recorded an income tax benefit of \$2.8 million on pre-tax loss of \$48.4 million for 2012, resulting in an effective tax rate of 5.7%. The effective tax rate was impacted by VAC purchase accounting related inventory charges of \$55.9 million, a tax expense of \$10.4 million related to GTL which included a \$5.6 million increase in the valuation allowance for prepaid tax asset (see GTL Prepaid Tax discussion in Critical Accounting Policies) and \$6.6 million for other GTL permanent differences.

Excluding the impact of VAC purchase accounting related inventory charges and GTL discrete and permanent items, the effective tax rate for the year ended December 31, 2012 would have been 30%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., and a tax efficient financing structure, partially offset by losses and carry-forwards in certain jurisdictions (including the U.S. and Germany) with no corresponding tax benefit.

The Company recorded an income tax benefit of \$17.8 million on pre-tax income of \$28.9 million for 2011. The income tax benefit was due to the VAC acquisition and discrete items. The largest discrete item in 2011 was related to GTL prepaid tax allowance reversal of \$6.2 million (see GTL Prepaid Taxes discussion in Critical Accounting Policies). Excluding the impact of the VAC acquisition and discrete items, the effective income tax rate for the year ended

Table of Contents

December 31, 2011 would have been 12%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., a tax efficient financing structure and a tax holiday in Malaysia, partially offset by losses in certain jurisdictions (including the U.S.) with no corresponding tax benefit. The Malaysian tax holiday expired on December 31, 2011.

The loss attributable to the noncontrolling interest was driven by losses at GTL in 2012 resulting from the low cobalt price and electrical problems in the DRC that negatively impacted production.

2011 Compared with 2010

The following table identifies, by segment, the components of change in net sales in 2011 compared with 2010:

(in thousands)	Net sales	Operating profit (loss) - as reported	Adjusted operating profit
2010	\$1,196.6	\$122.6	\$128.0
Increase in 2011 from:			
Magnetic Technologies	276.2	(66.9)	44.3
Battery Technologies	14.9	7.1	3.9
Specialty Chemicals	7.3	2.7	(7.0)
Advanced Materials	20.2	(14.4)	(14.4)
Corporate	—	(14.5)	(1.3)
Intersegment items	(0.7)	—	(0.1)
2011	\$1,514.5	\$36.6	\$153.4

Net sales increased \$317.9 million, or 26.6%, primarily due to the VAC acquisition. A full year of sales for Battery Technologies in the 2011 period compared to eleven months of sales in the 2010 period contributed \$10.1 million to the increase in net sales.

Gross profit decreased to \$255.9 million in 2011, compared with \$284.7 million in 2010. The largest factors affecting the \$28.8 million decrease in gross profit were: lower cobalt price and higher process-based material costs, partially offset by higher volume in Advanced Materials; an unfavorable shift in mix of products sold in Specialty Chemicals; and the negative gross profit of VAC, including the acquisition-related inventory charges; all partially offset by higher volumes, price/mix and income from sales of recycled material in Battery Technologies.

Selling, general and administrative expenses (“SG&A”) increased to \$229.1 million in 2011 compared with \$162.0 million in 2010. The increase was primarily due to \$43.6 million of Magnetic Technologies SG&A expenses and \$15.4 million in fees associated with acquisitions recorded in Corporate. The following table summarizes the components of Other expense, net:

(in thousands)	Year Ended December 31,		Change
	2011	2010	
Interest expense	\$(23,268)	\$(5,255)	\$(18,013)
Interest income	1,440	908	532
Foreign exchange gain (loss)	10,564	(10,679)	21,243
Other expense, net	3,680	(305)	3,985
	\$(7,584)	\$(15,331)	\$7,747

The increase in interest expense is due to borrowings to finance the acquisition of VAC. The foreign exchange gain in 2011 is primarily related to movements in Euro/U.S. dollar exchange rates and the resulting impact on the revaluation of non-functional currency cash and debt balances. The foreign exchange loss in 2010 was primarily related to the revaluation of non-functional currency cash balances due to changes in exchange rates, primarily the Euro, the Malaysian Ringgit and the Taiwanese Dollar.

In 2012 we changed from the cost method to the equity method of accounting for an investment in China. The Company recorded a retrospective adjustment to the investment balance, results of operations and retained earnings as if the equity method had been in effect during all previous periods since August 2011 in which the investment was acquired.

Table of Contents

The effect of the change to the Company's 2011 consolidated results of operations was to increase other income by \$4.1 million.

The Company recorded an income tax benefit of \$17.8 million on pre-tax income of \$28.9 million for 2011. The income tax benefit was due to the VAC acquisition and discrete items. The largest discrete item in 2011 was related to GTL prepaid tax allowance reversal of \$6.2 million (see GTL Prepaid Taxes discussion in Critical Accounting Policies). Excluding the impact of the VAC acquisition and discrete items, the effective income tax rate for the year ended December 31, 2011 would have been 12%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., a tax efficient financing structure and a tax holiday in Malaysia, partially offset by losses in certain jurisdictions (including the U.S.) with no corresponding tax benefit. The Malaysian tax holiday expired on December 31, 2011.

During 2010, the Company recorded income tax expense of \$29.7 million on pre-tax income of \$107.3 million, resulting in an effective income tax rate of 27.6%. Without discrete items, the effective income tax rate for 2010 would have been 22.6%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., a tax holiday in Malaysia and a tax efficient financing structure, partially offset by losses in certain jurisdictions (including the U.S.) with no corresponding tax benefit. The Company recorded discrete tax items netting to expense of \$5.4 million, including \$10.1 million of discrete tax expense related to GTL. The GTL items are primarily comprised of an \$11.5 million charge to reserve a portion of GTL's prepaid income tax balance, and a benefit of \$2.6 million primarily related to a return to provision adjustment.

Segment Results and Corporate Expenses

Magnetic Technologies

On August 2, 2011, the Company completed the acquisition of VAC. As a result of the acquisition, the Company created a new segment named Magnetic Technologies, which consists of VAC. The financial position, results of operations and cash flows of VAC are included in the Consolidated Financial Statements from the date of acquisition.

The primary raw materials used by Magnetic Technologies are nickel, cobalt and certain rare earth materials, primarily dysprosium and neodymium. During 2011, rare earth prices spiked and subsequently declined throughout 2012. Rare earth materials are currently available from a limited number of suppliers, primarily in China. Supply of rare earth materials is expected to increase as additional sources outside of China become available.

The segment is focused on developing and leveraging its substantial patent portfolio to enter new markets and increase market share and on reducing its cost structure.

For the year ended December 31,

	2012	2011	2010
(in millions)			
Net sales	\$631.6	\$276.1	n/a
Operating loss	\$(22.3) \$(66.9) n/a
VAC inventory purchase accounting step-up and LCM charges	55.9	106.6	—
Acquisition-related charges	—	4.6	—
Adjusted operating profit	\$33.6	\$44.3	n/a

Acquisition-related charges in 2012 include \$55.9 million of charges as a result of purchase accounting related to acquired inventory. As of December 31, 2012, all of the inventory step-up related to the 2011 acquisition has been charged to cost of goods sold. Acquisition-related charges in 2011 included \$106.6 million of inventory purchase accounting step-up charges, \$2.4 million of transaction fees and \$2.2 million of severance charges.

Table of Contents

2012 Compared with 2011

The following table identifies the components of change in net sales and operating profit:

(in millions)	Sales	Operating profit	
2011	\$276.1	\$(66.9))
Increase (decrease) in 2012 from:			
Selling price/mix	(11.1)	(2.0))
Volume	(23.8)	(9.4))
Foreign currency	(17.0)	(1.6))
Rare earth pricing effects including LCM	—	(30.0))
PPA and other charges	—	102.7)
Jan-July 2012 activity	407.4	(8.9))
Operating expenses	—	(6.3))
Other	—	0.1)
2012	\$631.6	\$(22.3))

Net sales increased \$355.5 million, primarily due to the VAC acquisition in August 2011 for which 2012 includes a full 12 months of sales activity. Sales in Magnetic Technologies were bolstered in both 2011 and 2012 by the positive effects of rare-earth pricing, which drove results higher. As rare-earth pricing retreated throughout 2012, these pricing benefits trended downward and then were essentially absent by fourth quarter 2012, when the Company recorded a lower of cost or market charge, at year-end excluding purchase accounting impacts, of approximately \$18 million (in addition to a \$22 million lower of cost or market charge in the second quarter) to reflect market prices at year-end. In 2012 compared to 2011, volumes were lower due to lower demand caused primarily by the weaker European economy. 2012 sales were also impacted by the weaker Euro against the USD in 2012 versus the 2011 period.

Operating profit in 2012 increased \$44.6 million when compared with 2011. Adjusting for the VAC inventory step-up and other acquisition-related charges, operating profit decreased by \$10.7 million. The decrease was driven by LCM charges in 2012; lower rare-earth pricing benefits in 2012 compared to 2011; lower volumes, as customer demand was negatively impacted by the weak European economy; and higher operating expenses. These factors were partially offset by a full twelve months of profit in 2012 compared to 2011.

Battery Technologies

The segment is focused on developing new battery chemistries and products and expanding its served markets while reducing its cost structure in response to the uncertainty around government spending.

For the year ended December 31,

(in millions)	2012	2011	2010	
Net sales	\$143.0	\$128.8	\$113.9	(a)
Operating profit	\$19.6	\$12.1	\$5.1	(a)(b)
Acquisition-related charges	\$—	\$—	\$3.2	
Adjusted operating profit	\$19.6	\$12.1	\$8.3	

(a) Includes activity since the acquisition of EaglePicher on January 29, 2010.

(b) Includes purchase accounting adjustments which reduced operating profit in 2010 by \$3.2 million for acquired inventories and deferred revenue. These acquisition-related charges will not recur in the future.

The Battery Technologies segment tracks backlog, which is equal to the value of unfulfilled orders for which funding is contractually obligated by the customer and for which revenue has not been recognized. At December 31, 2012,

backlog was \$128.0 million as compared with \$122.9 million at December 31, 2011. \$14.6 million of the backlog at December 31, 2012 is not expected to be converted into sales during the next twelve months.

Table of Contents

2012 Compared with 2011

The following table identifies the components of change in net sales and operating profit:

(in millions)	Sales	Operating profit
2011	\$128.8	\$12.1
Increase (decrease) in 2012 from:		
Sales volume	14.6	2.1
Price/mix	(0.4) 3.6
Other	—	1.8
2012	\$143.0	\$19.6

Battery Technologies net sales increased in 2012 due to increased volume, driven by non-U.S. defense sales and higher medical sales. Operating profit benefited from higher volumes and favorable mix.

2011 Compared with 2010

The following table identifies the components of change in net sales and operating profit:

(in millions)	Sales	Operating profit
2010	\$113.9	\$5.1
Increase (decrease) in 2011 from:		—
January 2011 sales volume	10.1	—
February - December sales volume	2.7	—
Volume	—	1.0
Price/mix	—	1.3
Operating expenses	—	(0.9
Purchase accounting adjustment in 2010	0.8	3.2
Other, principally sale of recycled material	1.3	2.4
2011	\$128.8	\$12.1

Operating profit in 2011 benefited from higher volumes, prices and income from sales of recycled material. 2010 operating profit reflects acquisition-related adjustments of \$3.2 million.

Specialty Chemicals

During 2012, this segment experienced lower demand due to the 2011 Thailand floods, which continued to negatively impact customer demand in the overall supply chain in the early part of the year, weak consumer electronics demand, and the weak European economy.

For the year ended December 31,

(in millions)	2012	2011	2010
Net sales	\$417.0	\$470.0	\$462.7
Operating profit (loss)	\$38.0	\$62.3	\$59.6
Gain on sale of property	(2.9) (9.7) —
Adjusted operating profit	\$35.1	\$52.6	\$59.6

Table of Contents

2012 Compared with 2011

The following table identifies the components of change in net sales and operating profit:

(in millions)	Sales	Operating profit
2011	\$470.0	\$62.3
Increase (decrease) in 2012 from:		
Volume	(32.1) (13.2
Selling price/mix	(13.1) (6.5
Foreign currency	(8.6) 0.1
Gain on sale of property	—	(6.8
Other	0.8	2.1
2012	\$417.0	\$38.0

The sales and operating profit decrease in 2012 compared to 2011 was primarily due to decreased volume caused by economic conditions in Europe and continued weak consumer demand, particularly in electronics. Selling price/mix was negatively impacted by lower average selling prices in tire, coatings and chemicals markets as well as pricing pressures in the very competitive photomasks market. The segment also recorded lower land sale gains in 2012 compared to 2011.

2011 Compared with 2010

The following table identifies the components of change in net sales and operating profit:

(in millions)	Sales	Operating profit
2010	\$462.7	\$59.6
Increase (decrease) in 2011 from:		
Volume	0.6	(0.5
Price/mix	1.0	(8.9
Gain on sale of land	—	9.7
Foreign currency	8.8	0.7
Other	(3.1) 1.7
2011	\$470.0	\$62.3

The operating profit increase in 2011 compared to 2010 was primarily due to the gain recognized on the sale of land at a former manufacturing facility, mostly offset by an unfavorable shift in mix of products sold.

Advanced Materials

As discussed above, in January 2013 the Company entered into agreements to exit this business. During 2012 and through the date of sale, this business manufactures inorganic products using unrefined cobalt and other metals, for the mobile energy storage, renewable energy, automotive systems, construction and mining, and industrial end markets. It also has a 55% interest in GTL.

Related to our exit from this business and to assist in the transition of the downstream portion of the business to the new owner, we entered into two agreements pursuant to which: (1) We will act as intermediary in a supply agreement between GTL and the Kokkola refinery in back-to-back arrangements for a period of at least two years subject to delivery of a minimum of 7000 MT of cobalt feed. This arrangement is extendable for up to an additional six months in order to deliver a minimum of 7000 MT of cobalt feed; and, (2) We will continue to serve as the U.S. distributor for the purchaser of refined cobalt products in primarily back-to-back arrangements for a period of one year after the closing. These agreements are expected to result in minimal profit or net cash flow for us. The related activity will be reported in the Advanced Materials segment until the agreements expire. After the expiration of these agreements, the Advanced Materials segment is expected to be discontinued and will no longer be reported.

The primary raw material used by Advanced Materials is unrefined cobalt. The cost of Advanced Materials raw materials, and prices charged to customers, fluctuate due to many variables including changes in the cobalt reference price, actual or perceived changes in supply and demand of raw materials, changes in availability from suppliers, and changes in demand for the segment's refined products.

Table of Contents

For the year ended December 31,

(in millions)	2012	2011	2010
Net sales	\$447.0	\$640.9	\$620.6
Operating profit	\$6.4	\$81.2	\$95.6

The following table summarizes the average quarterly reference price per pound of low grade cobalt (as published in Metal Bulletin magazine):

	2012	2011	2010
First Quarter	\$14.59	\$18.38	\$20.11
Second Quarter	\$14.24	\$17.05	\$19.36
Third Quarter	\$13.06	\$16.13	\$18.10
Fourth Quarter	\$11.95	\$14.18	\$17.41
Full Year	\$13.45	\$16.44	\$18.74

The following table summarizes the average quarterly London Metal Exchange (“LME”) price per pound of copper:

	2012	2011	2010
First Quarter	\$3.77	\$4.37	\$3.29
Second Quarter	\$3.57	\$4.14	\$3.18
Third Quarter	\$3.49	\$4.08	\$3.28
Fourth Quarter	\$3.59	\$3.40	\$3.91
Full Year	\$4.00	\$4.00	\$3.42

2012 Compared with 2011

The following table identifies the components of change in net sales and operating profit:

(in millions)	Sales	Operating profit
2011	\$640.9	\$81.2
Increase (decrease) in 2012 from:		
Selling price/mix	(74.7) (40.6
Cobalt volume	(26.0) (14.3
Cobalt metal resale	(52.3) (5.1
By-product sales (price and volume)	(41.7) (15.7
Foreign currency	0.2	5.9
Process-based material costs	—	(6.0
Other	0.6	1.0
2012	\$447.0	\$6.4

Unfavorable cobalt prices resulted in lower selling price/mix, and unfavorable price and volume for copper and other metals resulted in lower by-product revenues in 2012 compared to 2011. Volumes in 2012 were negatively impacted by the weak European economy. Expiration of certain supply agreements in the first quarter of 2012 resulted in lower cobalt metal resale volumes which, also negatively impacted profitability. The decrease in operating profit in 2012 was primarily caused by the same factors impacting net sales as described above along with higher costs.

2011 Compared with 2010

The following table identifies the components of change in net sales and operating profit:

Table of Contents

(in millions)	Sales	Operating profit
2010	\$620.6	\$95.6
Increase (decrease) in 2011 from:		
Price/mix (including cobalt metal resale)	(62.5) (34.1
Cobalt volume (including cobalt metal resale)	52.8	24.9
Process-based material cost	—	(15.7
By-product sales (price and volume)	35.8	11.6
Foreign currency	(4.3) (1.4
Operating expenses	—	3.1
Other	(1.5) (2.8
2011	\$640.9	\$81.2

The increase in cobalt volume was the result of increased demand across all Advanced Materials end markets in 2011 compared to 2010; however, this benefit was largely offset by lower prices, which also affected cobalt metal resale revenues. Stronger global demand, share gains and favorable price for copper and other metals enabled the segment to realize higher by-product revenues.

Increased operating profit from higher sales volumes was more than offset by lower cobalt price/mix and higher process-based material costs, principally due to increases in caustic, propane and sulphuric acid. Lower operating costs included a reduced allowance for a GTL joint venture partner note receivable and the non-recurrence of a write-down in the value of a cost method investment.

Corporate Expenses

Corporate expenses consist of corporate overhead supporting the operating segments but not specifically allocated to an operating segment, including certain legal, finance, human resources and strategic development activities, as well as all share-based compensation.

2012 Compared with 2011

Corporate expenses were \$43.1 million in 2012 compared with \$52.1 million in 2011. Corporate expenses in 2012 include a \$2.5 million settlement charge associated with lump-sum cash settlements to certain participants in one of our U.S. defined benefit pension plans. 2011 corporate expenses include \$15.4 million in fees related to the VAC acquisition. Excluding these special items, Corporate expenses in 2012 were higher primarily due to fees associated with exiting the Advanced Materials business.

2011 Compared with 2010

Corporate expenses were \$52.1 million in 2011 compared with \$37.6 million in 2010. Corporate expenses in 2011 include \$15.4 million in fees related to the VAC acquisition. 2010 corporate expenses include \$2.2 million in fees related to the acquisition of EaglePicher.

Liquidity and Capital Resources

Cash Flow Summary

The Company's cash flows from operating, investing and financing activities for 2012, 2011 and 2010, as reflected in the Statements of Consolidated Cash Flows, are summarized and discussed in the following tables (in millions) and related narrative:

	2012	2011	2010
Net cash provided by (used for):			
Operating activities	\$208.4	\$124.8	\$126.6
Investing activities	(60.5) (779.2) (199.8
Financing activities	(213.8) 548.0	120.3
Effect of exchange rate changes on cash	1.4	(2.0) (1.9
Increase (decrease) from continuing operations	\$(64.5) \$(108.4) \$45.3

Table of Contents

Operating Activities

2012 cash flow from operations was higher than 2011, benefiting from improvements in the principal element of working capital (inventory, accounts receivable, accounts payable) that contributed positive cash flow of \$70.9 million, and from the receipt of a \$37.9 million tax refund in the fourth quarter of 2012.

2011 cash flow from operations was comparable to 2010. 2011 lower net income was offset by lower working capital balances, primarily driven by (excluding amounts related to the acquisitions) a decrease in accounts receivable and an increase in accounts payable at December 31, 2011 compared to December 31, 2010.

Investing Activities

Net cash used in investing activities included capital expenditures of \$71.7 million primarily to expand capacity, improve productivity, comply with regulations and sustain operations.

In 2011, net cash used in investing activities included \$725.3 million for the VAC (\$686.2 million) and Rahu (\$39.1 million) acquisitions, and capital expenditures of \$56.5 million primarily to support growth and productivity programs and for sustaining operations. Investing cash flows also included proceeds of \$9.7 million from the sale of land at the former Manchester, England manufacturing facility.

In 2010, net cash used for investing activities included \$172 million for the acquisition of EaglePicher and capital expenditures of \$26.4 million.

The Company expects capital spending in 2013 to decrease from 2012 levels due to the sale of the Advanced Materials business.

Financing Activities

Net cash used in financing activities in 2012 included \$213.5 million of debt repayments.

Net cash provided by financing activities in 2011 included borrowings of \$698 million to fund the VAC acquisition and repay the Company's former revolving credit line.

Net cash provided by financing activities in 2010 included net borrowings under the Company's Revolver of \$120 million to partially fund the EaglePicher acquisition.

Financial Condition

Cash balances are held in numerous locations throughout the world. As of December 31, 2012, most of the Company's cash and cash equivalents were held outside the United States, primarily in Germany and Finland, and most of the Company's cash and cash equivalents were denominated in U.S. dollars. Most of the amounts held outside the U.S. could be repatriated to the U.S. but, under current law, would be subject to U.S. income taxes, less applicable foreign tax credits. The Company's intent is to retain the majority of its cash balances outside of the U.S. and to meet U.S. liquidity needs through cash generated from operations in the U.S., limited repatriation of foreign earnings, and external borrowings. We expect our available cash, 2013 operating cash flows and availability under our Senior Secured Credit Facility to be adequate to fund 2013 operating needs and capital expenditures.

Debt and Other Financing Activities

On August 2, 2011, in connection with the acquisition of VAC, the Company terminated its credit facilities and entered into the Senior Secured Credit Facility, primarily to finance the acquisition of VAC and repay existing indebtedness of the Company under its former revolving credit facility. The Senior Secured Credit Facility includes a \$100 million term loan A facility, a \$350 million term loan B facility, a €175 million term loan B facility, and a \$200 million undrawn revolving credit facility. The term A facility and the revolving credit facility mature on August 2,

2016. The term B facilities mature on August 2, 2017. See Note 7 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of the Senior Credit Facility, including interest rates and covenant restrictions.

Pension Plans

As a result of the VAC acquisition, the Company assumed pension obligations of \$149.8 million (based on the exchange rate on August 2, 2011), substantially all of which are unfunded. VAC sponsors various defined benefit plans for its employees, including pension, early retirement benefits and anniversary benefits, mainly in Germany. As a result of the EaglePicher acquisition, the Company assumed the EaglePicher defined benefit pension obligations, made up of two frozen and two active, partially-funded defined benefit pension plans. Certain non-U.S. employees are covered

Table of Contents

under other defined benefit plans. See Critical Accounting Policies below and Note 11 to the Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion of the Company's pension plans.

Contractual Obligations

The Company has entered into contracts with various third parties in the normal course of business that will require future payments. The following table summarizes the Company's contractual cash obligations and their expected maturities at December 31, 2012 (in thousands).

	Payments due by period						Total
	2013	2014	2015	2016	2017	Thereafter	
Purchase and other obligations(1)	\$296,601	\$82,326	\$77,126	\$76,517	\$10,003	\$10,323	\$552,896
Senior Secured Credit Facility	13,309	15,809	20,809	67,059	350,377	—	467,363
Interest payments on Senior Secured Credit Facility	25,119	24,414	23,673	21,840	—	11,830	106,876
Capital lease obligations (principal and interest)	1,104	889	691	623	529	1,191	5,027
Operating lease obligations	5,688	3,375	2,311	1,610	1,429	3,718	18,131
Total	\$341,821	\$126,813	\$124,610	\$167,649	\$362,338	\$27,062	\$1,150,293

For 2013 through 2017, purchase obligations include raw material contractual obligations reflecting estimated future payments based on committed tons of material per the applicable contract multiplied by the reference price (1) of each metal. The price used in the computation is the average daily price for the last week of December 2012 for each respective metal. Commitments made under these contracts represent future purchases in line with expected usage.

Interest payments are calculated based upon the debt amortization requirements of the Company's Senior Secured Credit Facility and using December 31, 2012 interest rates.

Not included in the table above is \$86.6 million of the VAC purchase price the Company withheld to fund indemnification claims, if any. See Note 5 to the Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion of the amount withheld.

Pension funding can vary significantly each year due to changes in the market value of plan assets, legislation and the Company's funding decisions to contribute any excess above the minimum legislative funding requirements. As a result, pension funding has not been included in the table above. The Company expects to contribute \$3.2 million to its U.S. pension plans in 2013. Pension benefit payments for the U.S. pension plans are made from assets of the pension plans. The Company expects to make annual benefit payments of approximately \$10.2 million related to its non-U.S. pension plans in 2013.

At December 31, 2012, the liability for uncertain tax positions includes \$0.2 million for which it is reasonably possible that the uncertainty will be resolved within the next twelve months. However, the decrease would not result in any cash payments as the Company would be able to utilize available foreign tax credits. The Company is not able to reasonably estimate the period in which cash outflows related to the remaining \$17.8 million of uncertain tax positions could occur. See Note 10 to the Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion of the Company's uncertain tax positions.

Off Balance Sheet Arrangements

The Company has not entered into any off balance sheet financing arrangements, other than operating leases, which are disclosed in the contractual obligations table above and in Note 16 to the Consolidated Financial Statements included in Item 8 of this Form 10-K.

Critical Accounting Policies

The preparation of these financial statements in conformity with U.S. generally accepted accounting principles requires our management to make its best estimates, judgments and assumptions of certain amounts included in the

financial statements related to the critical accounting policies described below. Actual results could differ from our estimates. In addition, other companies may utilize different estimates, which may impact the comparability of our results of operations to similar businesses.

Table of Contents

Revenue Recognition — Revenues are recognized when the revenue is realized or realizable, and has been earned, in accordance with the U.S. Securities and Exchange Commission's Staff Accounting Bulletin No. 104, "Revenue Recognition". The majority of our sales are product sales, which are recognized when persuasive evidence of an arrangement exists, unaffiliated customers take title and assume risk of loss, the sales price is fixed or determinable and collection of the related receivable is reasonably assured. Revenue recognition generally occurs upon shipment of product or usage of consignment inventory. Freight costs and any directly related associated costs of transporting finished product to customers are recorded as Cost of goods sold.

The Battery Technologies segment uses the percentage-of-completion method to recognize the majority of its revenue. See Note 1 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion on revenue recognized under the percentage of completion method.

Inventories — Magnetic Technologies' inventories are valued using the average cost method. Cost of sales, under the average cost method, represents the weighted average cost of the items sold. We believe the average cost method provides for a better matching of inventory costs with related sales, based on Magnetic Technologies' manufacturing process. The remaining inventory held is valued using the first-in, first-out ("FIFO") method. Inventory accounted for under the percentage-of-completion method is included in work-in-process inventory and represents accumulated contract costs less the portion of such costs allocated to delivered units. The costs attributed to units delivered are based on the estimated average cost of all units expected to be produced on a contract-by-contract basis.

We evaluate the need for a lower of cost or market ("LCM") adjustment to inventories based on the selling prices of our finished products. Changes in the price of cobalt and rare earth materials can have a significant impact on inventory valuation. Declines in the selling prices of finished goods due to decreases in the market price of raw materials or other factors can result in the inventory carrying value being written down to a lower market value.

As part of the allocation of the purchase price of VAC to the acquired assets and liabilities assumed, we recorded a step-up of inventory to its estimated fair value on the August 2, 2011 date of acquisition, as required under purchase accounting. Acquired inventory with a book value of \$194.7 million on the date of acquisition was estimated to have a fair value of \$362.8 million. This step-up was fully turned through Cost of goods sold as of December 31, 2012. See Note 3 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion on the VAC inventory step-up.

Notes Receivable from Joint Venture Partner — In years prior to 2009, we refinanced the capital contribution for a GTL joint venture partner. At December 31, 2012 and 2011, the notes receivable net balance from this partner was \$16.0 million, net of a full allowance against unpaid interest receivable under the notes receivable. The note receivable is secured by 80% of the partner's interest in GTL. We evaluate the collectability of the Notes based on estimated future cash flows of the joint venture because repayment of the Notes is expected to be funded by future dividends and capital returns from GTL to the joint venture partners. Actual realizability of these notes could materially differ from recorded amounts.

GTL Prepaid Taxes — At December 31, 2012 and 2011, GTL had a prepaid tax asset of \$2.0 million and \$8.2 million, net of valuation allowances of \$11.3 million and \$5.7 million, respectively. Management evaluates the net realizability of GTL's prepaid assets based on a number of factors, including the expectation of GTL's future pre-tax income and all DRC income tax (and other tax) regulations and pronouncements.

Although the Company believes the assumptions, judgments and estimates used in the evaluation of the recoverability of the GTL prepaid tax asset are reasonable and appropriate, different assumptions, judgments and estimates could materially affect the evaluation of the collectability of the recoverability of the GTL prepaid tax asset and the Company's results of operations and financial position. See Note 10 in our Consolidated Financial Statement included in Item 8 of this Form 10-K for a more complete discussion of income taxes.

Goodwill — The Company had goodwill of \$543.3 million and \$544.5 million at December 31, 2012 and 2011, respectively. The Company tests goodwill for impairment annually and more often if indicators of impairment exist. The Company's reporting units have been determined to be the Company's reportable segments or one level below the

reportable segments in certain instances.

We conduct our annual goodwill impairment test as of October 1. The results of the testing as of October 1, 2012 confirmed the fair value of each of the reporting units exceeded its carrying value and therefore no impairment loss was required to be recognized for the year end December 31, 2012.

28

Table of Contents

The estimated fair value of the Magnetic Technologies reporting unit exceeded its carrying value by 4%. At December 31, 2012 Magnetic Technologies reporting unit had goodwill of \$205.4 million. We believe the assumptions regarding future performance of the reporting unit and the weighted average cost of capital rate used in our impairment testing were consistent with the risk inherent in the business models of the reporting unit at the time the impairment test was performed. Although we believe the assumptions, judgments and estimates used are reasonable and appropriate, different assumptions, judgments and estimates could materially affect the goodwill test and, potentially, the Company's results of operations and financial position.

The Company estimates the fair value of the reporting units utilizing a discounted cash flow valuation technique ("DCF"). The Company selected DCF as it believes it is comparable to what would be used by market participants to estimate its fair value. The impairment test incorporates the Company's judgment and estimates of future cash flows, future growth rates, terminal value amounts, allocations of certain assets, liabilities and cash flows among reporting units, and the applicable weighted-average cost of capital used to discount those estimated cash flows. The estimates and projections used in the estimate of fair value are consistent with the Company's current budget and long-range plans, including anticipated changes in market conditions, industry trends, growth rates, and planned capital expenditures, among other considerations. See Note 6 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of goodwill.

Other Intangible Assets — Intangible assets consist of (i) definite-lived assets subject to amortization and (ii) indefinite-lived intangible assets not subject to amortization. At December 31, 2012, the Company had definite-lived intangible assets of \$319.3 million and indefinite-lived intangible assets of \$110.4 million. Definite-lived intangible assets consist principally of customer relationships, know-how, developed technology and capitalized software and are being amortized using the straight-line method. Indefinite-lived intangible assets consist of trade names. The carrying value of indefinite-lived intangible assets are also evaluated for impairment annually as of October 1 and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The definite-lived intangible asset would be considered impaired if the future net undiscounted cash flows generated by the asset are less than its carrying value. The results of the testing as of October 1, 2012 confirmed the fair value of each of the reporting units exceeded its carrying value and therefore no impairment loss was required to be recognized. See Note 6 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of other intangible assets.

Pension Plans — Our long-term pension obligations as of December 31, 2012 amounted to \$233.8 million. In addition, we have an unfunded obligation to our former chief executive officer in settlement of an unfunded supplemental executive retirement plan ("SERP"). See Note 11 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of the Company's defined benefit pension obligations. Calculations of the amount of defined benefit pension expense and obligations depend on the assumptions used in the actuarial valuations including the discount rate used in calculating the present value of benefits, the expected long-term rate of return on defined benefit plan assets, and the rate of compensation increase. Changes in key economic indicators can result in changes in the assumptions used by the Company. While the Company believes that the assumptions used in calculating its defined benefit pension expense and obligations are appropriate, differences in actual experience or changes in the assumptions may affect the Company's results of operations or financial position.

For the VAC defined benefit pension obligations, the Company used a weighted average discount rate of 3.41% in computing the amount of the defined benefit pension obligations to be recorded at December 31, 2012. A 25 basis point reduction in the discount rate used for the plans would have increased the net obligation by \$4.0 million from the amount recorded in the financial statements at December 31, 2012.

For the EaglePicher defined benefit pension obligations, the Company used a weighted average discount rate of 3.69% and 3.50% for the two active and two frozen EaglePicher plans, respectively, in computing the amount of the defined benefit pension obligations to be recorded at December 31, 2012. A 25 basis point reduction in the discount rate used

for the plans would have increased the net obligation related to the four EaglePicher plans by \$6.3 million from the amount recorded in the financial statements at December 31, 2012.

Defined benefit pension plan assets consist primarily of publicly traded stocks and government and corporate bonds. See Note 11 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of pension plans.

Table of Contents

There is no guarantee the actual return on the plans' assets will equal the expected long-term rate of return on plan assets or that the plans will not incur investment losses. For 2012, the expected long-term rate of return assumptions applicable to assets held in the four EaglePicher plans were estimated at 8.00% and 5.75% for the two active and two frozen plans, respectively. These expected rates of return reflect the asset allocation of the plans and the expected long-term returns on equity and debt investments included in plan assets. If the expected long-term rates of return on plan assets in the four EaglePicher plans were reduced by 0.5%, pension expense for 2012 would have increased by \$0.9 million.

Income Taxes — Significant judgment is required in determining the Company's income tax expense and in evaluating tax positions. Deferred income tax assets and liabilities have been recorded for the differences between the financial accounting and income tax basis of assets and liabilities. When the Company determines, based on all available evidence, that it is more likely that not that deferred tax assets will not be realized, a valuation allowance is established. The Company assesses its income tax positions and records accruals when it determines that a position is more likely than not to be unsustainable. The ultimate resolution of these events could result in adjustments to the Company's financial statements and such adjustments could be material. The Company believes the current assumptions, judgments and other considerations used to estimate the current year accrued and deferred tax positions are appropriate. If the actual outcome of future tax consequences differs from these estimates and assumptions, due to changes or future events, the resulting change to the provision for income taxes could have a material impact on the Company's results of operations and financial position. The Company reviews its tax positions on a regular basis and adjusts the balances as new information becomes available. See Note 10 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of income taxes.

Share-Based Compensation — We use a Black-Scholes option pricing model to calculate the fair value of our stock options. The fair value of time-based and performance-based restricted stock grants is calculated based upon the market value of an unrestricted share of the Company's common stock at the date of grant. The performance-based restricted stock vests solely upon the Company's achievement of specific measurable performance objectives over a three-year performance period, and the related compensation expense is based upon current performance projections. See Note 14 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of share-based compensation. This requires the use of assumptions, including estimating the length of time employees will retain their vested stock options before exercising and the volatility of the Company's common stock price. Expected stock price volatility is based on historical volatility of the Company's stock price. Changes in these assumptions may result in a material change to the fair value calculation of share-based awards.

Acquisitions - The allocation of the purchase price to the tangible assets and liabilities and identifiable intangible assets acquired requires management to make significant estimates in determining the fair values of assets acquired and liabilities assumed, especially with respect to intangible assets in the VAC, Rahu, and EaglePicher acquisitions; inventory in the VAC acquisition; and the contingent consideration in the Rahu acquisition. These estimates are based on historical experience, information obtained from management of the acquired companies, and future volume forecasts with respect to contingent consideration. These estimates are dependent on assumptions that are difficult to predict, and if different estimates were used, the purchase price for the acquisition may have been allocated to the acquired assets differently from the current allocation. Although the Company believes the assumptions, judgments and estimates used are reasonable and appropriate, different assumptions, judgments and estimates could materially affect the value ascribed to an acquired asset and, potentially, the Company's results of operations and financial position if impairment charges were required to be recorded.

Recently Issued Accounting Standards

See Note 1 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for recently issued accounting standards and the effects, in any, on our financial statements.

Effects of Foreign Currency

See Item 7A for a discussion of the Company's foreign currency effects and related risks.

Environmental Matters

We are subject to a wide variety of environmental laws and regulations in the United States and in foreign countries as a result of our operations and use of certain substances that are, or have been, used, produced or discharged by our plants. In addition, soil and/or groundwater contamination presently exists and may in the future be discovered at levels that require remediation under environmental laws at properties now or previously owned, operated or used by the Company.

30

Table of Contents

The European Union's REACH legislation established requirements to register and evaluate chemicals manufactured in, or imported to, the European Union and requires additional testing, documentation and risk assessments for the chemical industry. Due to the ongoing development and understanding of facts and remedial options and due to the possibility of unanticipated regulatory developments, the amount and timing of future environmental expenditures could vary significantly. Although it is difficult to quantify the potential impact of compliance with or liability under environmental protection laws, based on presently available information, we believe that the Company's ultimate aggregate cost of environmental remediation as well as liability under environmental protection laws will not result in a material adverse effect upon its financial condition or results of operations.

See Item I of this Annual Report on Form 10-K for further discussion of these matters.

Cautionary Statement for "Safe Harbor" Purposes under the Private Securities Litigation Reform Act of 1995

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements made by or on behalf of the Company. This report contains statements that we believe may be "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934. These forward-looking statements are not historical facts and generally can be identified by use of statements that include words such as "believe," "expect," "anticipate," "intend," "plan," "foresee" or other words or phrases of similar import. Similarly, statements that describe our business objectives, plans or goals also are forward-looking statements. These forward-looking statements are subject to risks and uncertainties that are difficult to predict, may be beyond our control and could cause actual results to differ materially from those currently anticipated. We undertake no obligation to publicly revise these forward-looking statements to reflect events or circumstances that arise after the date hereof. Significant factors affecting these expectations are set forth under Item 1A — Risk Factors in this Annual Report on Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Quantitative and Qualitative Disclosures about Market Risk

As a result of our global operating and financing activities, we are exposed to changes in raw material prices, interest rates and foreign currency exchange rates, which may have a material adverse effect on our business, financial condition and results of operation. In seeking to minimize the risks and/or costs associated with such activities, we manage exposures to changes in raw material prices, interest rates and foreign currency exchange rates through our regular operating and financing activities, which may include the use of derivative instruments. By using derivative instruments to hedge exposures to changes commodity prices, foreign exchange rates and interest rates, we become exposed to market risk. Market risk is the change in value of a derivative instrument that results from a change in material prices or interest rates. The market risk associated with raw material prices and interest is managed by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken.

Raw Material Price Risk

The primary raw materials used by Magnetic Technologies are nickel, cobalt and certain rare earth materials, mostly dysprosium and neodymium. Unrefined cobalt is the principal raw material we use in manufacturing Advance Materials products. The cost of raw materials fluctuates due to changes in the reference prices (cobalt), actual or perceived changes in supply and demand of raw materials and changes in availability from suppliers. Fluctuations in the price of cobalt, rare earth materials, and other raw materials have been significant in the past and we believe price fluctuations could occur in the future.

The Company attempts to mitigate increases in raw material prices by passing through such increases to its customers in the prices of its products and, when possible, by entering into sales contracts that contain variable pricing that adjusts based on changes in the price of certain raw materials. During periods of rapidly changing metal prices there may be price lags that can positively or negatively impact the short-term profitability and cash flow from operations of the Company. Declines in the selling prices of the Company's finished goods, which can result from decreases in the market price of raw materials or other factors, can result in the Company's inventory carrying value being written down to a lower market value.

The Company, from time to time, employs derivative instruments in connection with certain purchases and sales of nickel in order to establish a fixed margin and mitigate the risk of price volatility. This hedging limits the Company's ability to participate in gains from favorable commodity price fluctuations and it limits the risk of loss from adverse commodity price fluctuations.

Interest Rate Risk

The Company is exposed to interest rate risk primarily through its borrowing activities. There is an inherent rollover risk for borrowings as they mature and are renewed at current market rates. The extent of this risk is not quantifiable

Table of Contents

or predictable because of the variability of future interest rates and business financing requirements (see Note 7 to the consolidated financial statements contained in Item 8 of this Annual Report).

From time-to-time, the Company enters into derivative instruments and hedging activities to manage interest rate risk related to borrowings. The Company uses interest rate swap agreements to partially reduce risks related to floating rate financing agreements that are subject to changes in the market rate of interest. Terms of the interest rate swap agreements require the Company to receive a variable interest rate and pay a fixed interest rate. The Company's interest rate swap agreements and its variable rate financings are based upon the three-month LIBOR. The Company had interest rate swaps with notional values that totaled \$115.0 million and \$199.5 million at December 31, 2012 and 2011, respectively. The outstanding contracts as of December 31, 2012 had maturities ranging up to 12 months.

Foreign Currency Exchange Rate Risk

We manufacture and sell our products worldwide. Although a significant portion of the Company's raw material purchases and product sales are based on the U.S. dollar, prices of certain raw materials, non-U.S. operating expenses and income taxes are denominated in local currencies. As such, the results of operations are subject to the variability that arises from exchange rate movements (particularly the Euro). In addition, fluctuations in exchange rates may affect product demand and profitability in U.S. dollars of products provided by the Company in foreign markets in cases where payments for its products are made in local currency. Accordingly, fluctuations in currency prices affect the Company's operating results. The primary currencies for which the Company has foreign currency rate exposure are the European Union Euro, Taiwanese Dollar, Malaysian Ringgit, Singapore Dollar, British Pound Sterling, Japanese Yen, Congolese Franc, Chinese Renminbi and the Canadian Dollar.

The functional currency for our Finnish operating subsidiary is the U.S. dollar since a majority of its purchases and sales are denominated in U.S. dollars. Accordingly, foreign currency exchange gains and losses related to transactions of this subsidiary denominated in other currencies (principally the Euro) are included in the Statements of Consolidated Operations. While a majority of our subsidiary's raw material purchases are in U.S. dollars, it also has some Euro-denominated expenses. From time-to-time, we have entered into foreign currency forward contracts to mitigate a portion of the earnings volatility in those Euro-denominated cash flows due to changes in the Euro/U.S. dollar exchange rate. We had no Euro forward contracts at December 31, 2012 and 90.0 million Euro at December 31, 2011 with the maturities ranging up to 12 months.

Credit Risk

The use of derivative instruments to hedge exposures to changes in commodity prices, foreign exchange rates and interest rates exposes the Company to credit risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, which creates credit risk for us. To mitigate credit risk, it is our policy to execute such instruments with creditworthy banks and not enter into derivative instruments for speculative purposes. There were no counterparty defaults during the years ended December 31, 2012, 2011 and 2010.

Table of Contents

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of OM Group, Inc.

We have audited the accompanying consolidated balance sheets of OM Group, Inc. and subsidiaries, (“the Company”) as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income (loss), total equity, and cash flows for each of the three years in the period ended December 31, 2012. Our audits also included the financial statement schedule listed in the index at Item 15. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of OM Group, Inc. and subsidiaries at December, 31, 2012 and 2011, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), OM Group, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2013, expressed an adverse opinion on the effectiveness of internal control over financial reporting as of December 31, 2012.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of OM Group, Inc.

We have audited OM Group, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). OM Group, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting appearing on Page 71 and 72. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. The following material weakness has been identified and included in management's assessment:

Management has identified a material weakness in internal controls over its classification of Selling, general and administrative expenses and Cost of goods sold related to the Company's Magnetic Technologies Segment.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income (loss), total equity, and cash flows for each of the three years in the period ended December 31, 2012. This material weakness was considered in determining the nature, timing and extent of audit tests applied in our audit of the 2012 financial statements, and this report does not affect our

report dated February 28, 2013 which expressed an unqualified opinion on those financial statements.

Table of Contents

In our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, OM Group, Inc. and subsidiaries has not maintained effective internal control over financial reporting as of December 31, 2012 based on the COSO criteria.

Notes to Consolidated Financial Statements

OM Group, Inc. and Subsidiaries

(In thousands, except as noted and share and per share amounts)

Note 1 — Significant Accounting Policies

Principles of Consolidation — The consolidated financial statements include the accounts of OM Group, Inc. (the “Company”) and its consolidated subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation. The Company has a 55% interest in a joint venture (Groupement pour le Traitement du Terril de Lubumbashi Limited or “GTL”) that has a smelter in the Democratic Republic of Congo (the “DRC”) which is consolidated because the Company has a controlling interest. Noncontrolling interest is recorded for the remaining 45% interest.

On December 22, 2011, the Company completed the acquisition of Rahu Catalytics Limited (“Rahu”), which is included in the Company's Specialty Chemicals segment.

On August 2, 2011, the Company completed the acquisition of VAC. The Company's Magnetic Technologies segment consists of VAC.

On January 29, 2010, the Company completed the acquisition of EaglePicher Technologies, LLC (“EaglePicher”). The Company's Battery Technology segment consists of EaglePicher.

The financial position, results of operations and cash flows of acquisitions are included in the Consolidated Financial Statements from the dates of acquisition.

Unless otherwise indicated, all disclosures and amounts in the Notes to Consolidated Financial Statements relate to the Company's continuing operations.

Restatement - In August 2011, the Company completed the acquisition of VAC Holding GmbH (“VAC”) and formed the Magnetic Technologies segment for that business. In the Fourth Quarter of 2012, the Company, as a result of enhancing its financial planning and analysis efforts, discovered that a portion of Magnetic Technologies' Cost of goods sold were misclassified in Selling, general and administrative expenses (“SG&A”) since the acquisition when the business converted the basis of its financial reporting from International Financial Reporting Standards to US GAAP. The Company corrected the classification of these expenses by restating its Quarterly Reports on Form 10-Q filed during 2012. The reclassification has no impact on previously-reported net sales, operating profit, net income, or net income per share on the Company's Condensed Statements of Consolidated Operations, nor does it have any effect on the Company's previously-reported Condensed Consolidated Balance Sheets, Statements of Consolidated Comprehensive Income (Loss), Condensed Statements of Consolidated Cash Flows, Condensed Statements of Consolidated Total Equity or segment net sales and operating profit. The Company has evaluated the error for the period ending December 31, 2011 in accordance with Staff Accounting Bulletin (SAB) 99, SAB 108 and Accounting Standards Codification (ASC) 250 and determined that the impact of the misclassification in 2011 is not material. The Company made correction of the amounts related to this misstatement for 2011 in this Annual Report for 2012.

(in millions)	Reported Twelve Months Ended December 31, 2011	Restated Twelve Months Ended December 31, 2011
Cost of goods sold	\$1,240.0	\$1,258.6
Gross profit	274.5	255.9
SG&A expenses	247.7	229.1

Equity Investment - In the fourth quarter of 2012, we changed from the cost method to the equity method of accounting for Magnetic Technologies investment in China due to changes in our management and the strategic nature

of the operation that allowed us to exercise significant influence. In accordance with ASC 323, the Company recorded a retrospective adjustment to the investment balance, results of operations and retained earnings as if the equity method had been in effect during all previous periods since August 2011 in which the investment was acquired. The effect of the change to the Company's 2011 consolidated results of operations and financial condition was to increase Other Income by \$4.1 million.

Table of Contents

Use of Estimates — The preparation of financial statements, in conformity with U.S. generally accepted accounting principles, requires management to make estimates and assumptions in certain circumstances that affect the amounts reported in the accompanying consolidated financial statements and notes. Actual results could differ from these estimates.

Cash Equivalents — All highly-liquid investments, with a maturity of three months or less when purchased, are considered to be cash equivalents.

Restricted Cash on Deposit — In 2009 and 2010, GTL was served in Jersey, Channel Islands, with injunctions requiring payments to a GTL supplier be instead placed on deposit with the Royal Court of Jersey. At December 31, 2012 and 2011, \$22.8 million and \$92.8 million, respectively, were deposited with the court related to these injunctions and recorded on the Consolidated Balance Sheet as Restricted cash on deposit and Liability related to joint venture partner injunction. See Note 15 for further disclosure related to this matter.

Allowance for Doubtful Accounts — The Company has recorded an allowance for doubtful accounts to reduce accounts receivable to their estimated net realizable value. The allowance is based upon an analysis of historical bad debts, a review of the aging of accounts receivable and the current creditworthiness of customers. Accounts are written off against the allowance when it becomes evident that collections will not occur. Trade credit is generally extended on a short-term basis; thus accounts receivable generally do not bear interest.

Receivables from Joint Venture Partners and Noncontrolling Interests - The noncontrolling interest in GTL is owned by two partners at 25% and 20%, respectively. In years prior to 2010, the Company refinanced the capital contribution for the 25% stockholder. At December 31, 2012 and 2011, the notes receivable, net balance from this partner was \$16.0 million. Due to the uncertainty of collection, the Company continues to record a full allowance against unpaid interest receivable under the notes receivable. The note receivable is secured by 80% of the partner's interest in the joint venture.

Inventories - Magnetic Technologies' inventories are valued using the average cost method. Cost of sales under the average cost method represents the weighted average cost of the items sold. The Company believes the average cost method provides for a better matching of inventory costs with related sales based on Magnetic Technologies' manufacturing process. The remaining inventory held by the Company is valued using FIFO. Inventory costs include raw materials, labor and manufacturing overhead. Inventory accounted for under the percentage-of-completion method is included in work-in-process inventory and represents accumulated contract costs less the portion of such costs allocated to delivered units. The costs attributed to units delivered are based on the estimated average cost of all units expected to be produced on a contract-by-contract basis.

Changes in the price of rare earth materials and cobalt can have a significant impact on inventory valuation. The Company evaluates the need for a lower of cost or market (“LCM”) adjustment to inventories based on the selling prices of its finished products generally at the end of the period. To the extent raw material prices increase subsequent to the balance sheet date, the Company considers these price movements in its LCM evaluation. Declines in the selling prices of the Company's finished goods, which can result from decreases in the market price of raw materials or other factors, can result in the Company's inventory carrying value being written down to a lower market value.

Property, Plant and Equipment - Property, plant and equipment is recorded at historical cost less accumulated depreciation. Depreciation of plant and equipment, including assets recorded under capital leases, is provided by the straight-line method over the useful lives of 5 to 25 years for land improvements, 5 to 40 years for buildings and improvements, 5 to 15 years for machinery and equipment (with the majority in the range of 5 to 10 years), 5 to 10 years for furniture and fixtures and 3 to 5 years for vehicles and computers and related equipment. Leasehold improvements are depreciated over the shorter of the estimated useful life or the term of the lease.

Long-lived Assets other than Goodwill - Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount may not be recoverable. Events or circumstances that would result in an

impairment review primarily include operating losses, a significant change in the use of an asset, or the planned disposal or sale of the asset. The asset would be considered impaired when the future net undiscounted cash flows generated by the asset are less than its carrying value. An impairment loss would be recognized based on the amount by which the carrying value of the asset exceeds its estimated fair value.

Goodwill and Intangible Assets - The Company evaluates the carrying value of goodwill and indefinite-lived intangible assets for impairment annually as of October 1 and between annual evaluations if changes in circumstances or the occurrence of certain events indicate potential impairment. If the carrying value of goodwill or an indefinite-lived

Table of Contents

intangible asset exceeds its fair value, an impairment loss is recognized.

Intangible assets consist of (i) definite-lived assets subject to amortization and (ii) indefinite-lived intangible assets not subject to amortization. Definite-lived intangible assets consist principally of customer relationships, developed technology, know-how, capitalized software and license agreements and are being amortized using the straight-line method. Indefinite-lived intangible assets consist of trade names.

Retained Liabilities of Businesses Sold - Retained liabilities of businesses sold include obligations of the Company related to its former Precious Metals Group (“PMG”), which was sold in 2003. Under terms of the sale agreement, the Company will reimburse the buyer of this business for certain items that become due and payable by the buyer subsequent to the sale date. Such items are principally comprised of taxes payable related to periods during which the Company owned PMG. The net liability was \$8.0 million and, \$7.6 million as of December 31, 2012 and December 31, 2011, respectively.

Revenue Recognition — Except for revenue recognized under the percentage of completion method of accounting in Battery Technologies (see discussion below), the Company recognizes revenue when persuasive evidence of an arrangement exists, unaffiliated customers take title and assume risk of loss, the sales price is fixed or determinable and collection of the related receivable is reasonably assured. Revenue recognition generally occurs upon shipment of product or usage of inventory consigned to customers. All amounts in a sales transaction billed to a customer related to shipping and handling are reported as sales.

The Battery Technologies segment uses the percentage of completion method to recognize the majority of its revenue. The majority of defense contracts use the units-of-delivery method while the majority of aerospace contracts use the cost-to-cost method as the basis to measure progress toward completing a contract. Under the units-of-delivery method, revenues are recognized based on the contract price of units delivered. Under the cost-to-cost method, revenue is recognized based on the ratio of cost incurred compared to management's estimate of total costs expected to be incurred under the contract. The percentage of completion method requires substantial judgment on the part of management due to the duration of the contracts as well as the technical nature of the products involved. Contract revenues and cost estimates are reviewed at least quarterly and adjustments are reflected in the accounting period such amounts are determined. Billings in excess of amounts earned are deferred. Anticipated losses on contracts are recorded in full in the period in which the loss becomes evident.

Cost of Goods Sold — Cost of goods sold is comprised of raw material costs, direct production, maintenance and utility costs, depreciation, other overhead costs and shipping and handling costs.

Research and Development — Research and development costs are charged to expense when incurred, are included in selling, general and administrative expenses and amounted to \$32.5 million, \$24.8 million and \$11.8 million in 2012, 2011 and 2010, respectively. These amounts do not include development and application engineering costs incurred in conjunction with fulfilling customer orders and executing projects.

Accounting for Operating Leases — Lease expense is recorded on a straight-line basis. The noncancellable lease term used to calculate the amount of the straight-line expense is generally determined to be the initial lease term, including any optional renewal terms that are reasonably assured. Certain leases include step rent provisions and escalation clauses, which are recognized on a straight-line basis over the lease term. Lease payments that depend on an existing index or rate are included in our minimum lease payments that are recognized on a straight-line basis over the minimum lease term.

Income Taxes — Deferred income taxes are provided to recognize the effect of temporary differences between financial and tax reporting. Deferred income taxes are not provided for undistributed earnings of foreign consolidated subsidiaries, to the extent such earnings are determined to be reinvested for an indefinite period of time.

Foreign Currency Translation — The functional currency for the majority of the Company’s operating subsidiaries outside of the United States is the applicable local currency. For those operations, assets and liabilities are translated into U.S. dollars at period-ending exchange rates and revenues and expenses are translated into U.S. dollars using weighted average exchange rates. The resulting translation adjustments are recorded as a component of Accumulated

other comprehensive income (loss) in stockholders' equity. The functional currency for the Company's Finnish subsidiary and related DRC operations is the U.S. dollar because a majority of their purchases and sales are denominated in U.S. dollars. Accordingly, foreign currency exchange gains and losses related to assets, liabilities and transactions denominated in other currencies (principally the Euro) are included in the Statements of Consolidated Operations.

43

Table of Contents

Derivative Instruments — The Company enters into derivative instruments and hedging activities to manage, where possible and economically efficient, commodity price risk, foreign currency exchange rate risk and interest rate risk related to borrowings. It is the Company's policy to execute such instruments with creditworthy banks and not enter into derivative instruments for speculative purposes. All derivatives are reflected at their fair value and recorded in other current assets and other current liabilities as of December 31, 2012 and 2011. The accounting for the fair value of a derivative depends upon whether it has been designated as a hedge and on the type of hedging relationship. To qualify for designation in a hedging relationship, specific criteria must be met and appropriate documentation prepared. Changes in the fair values of derivatives not designated in a hedging relationship are recognized in earnings. The Company, from time to time, employs derivative instruments in connection with purchases and sales of inventory in order to establish a fixed margin and mitigate the risk of price volatility. Some customers request fixed pricing and the Company may use a derivative to mitigate price risk. While this hedging may limit the Company's ability to participate in gains from favorable commodity price fluctuations, it eliminates the risk of loss from adverse commodity price fluctuations.

Periodically, the Company enters into certain derivative instruments designated as cash flow hedges. For these hedges, the effective portion of the gain or loss from the financial instrument is initially reported as a component of Accumulated other comprehensive income (loss) in stockholders' equity and subsequently reclassified into earnings in the same line as the hedged item in the same period or periods during which the hedged item affects earnings.

Note 2 — Recently Issued Accounting Guidance

Accounting Guidance Adopted in 2012:

In May 2011, the Financial Accounting Standards Board ("FASB") issued additional authoritative guidance relating to fair value measurement and disclosure requirements that provides a uniform framework for fair value measurements and related disclosures between U.S. generally accepted accounting principles and International Financial Reporting Standards. We adopted this guidance on January 1, 2012 and such adoption did not have any effect on our results of operations or financial position.

In June 2011, the FASB issued new accounting guidance regarding the presentation of comprehensive income in financial statements prepared in accordance with U.S. GAAP. We adopted this guidance on January 1, 2012. As this new guidance is related to presentation only, such adoption did not have any effect on our results of operations or financial position.

In September 2011, the FASB issued amendments to the goodwill impairment guidance which provides an option for companies to use a qualitative approach to test goodwill for impairment if certain conditions are met. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. This new guidance did not have any impact on our results of operations or financial position.

Accounting Guidance Not Yet Adopted:

In July 2012, the FASB issued amendments to the intangible assets guidance which provides an option for companies to use a qualitative approach to test indefinite lived intangible assets for impairment if certain conditions are met. The amendments are effective for annual and interim indefinite lived intangible assets impairment tests performed for fiscal years beginning after September 15, 2012, however, early adoption is permitted. This new guidance is not expected to have any impact on our results of operations or financial position.

In October 2012, the FASB issued amendments to the technical correction and improvements guidance clarifying fair value measurements. This guidance is effective for annual periods beginning after December 15, 2012. This new guidance is not expected to have any impact on our results of operations or financial position.

Table of Contents

Note 3 — Inventories

Inventories consist of the following as of December 31,

	2012	2011
Raw materials and supplies	\$ 137,093	\$236,336
Work-in-process	188,145	227,139
Finished goods	137,855	151,543
	\$463,093	\$615,018

As part of the allocation of the purchase price of VAC to the acquired assets and liabilities assumed, we recorded a \$168.1 million step-up of inventory to its estimated fair value on the date of acquisition. In 2012 the Company recognized \$38.0 million of lower of cost or market charges related to the VAC purchase accounting step-up and additional lower of cost or market charges of \$40.4 million. At December 31, 2012 all of the inventory step-up had been recognized in cost of goods sold. At December 31, 2011 \$56.4 million remained within the value of inventory. In 2011 the Company recognized a net change of \$14.5 million of lower of cost or market charges related to the VAC purchase accounting inventory step-up. These charges related to the decline in prices of certain rare earth materials.

Note 4 — Property, Plant and Equipment, net

Property, plant and equipment, net consists of the following as of December 31,

	2012	2011
Land and improvements	\$48,839	\$47,725
Buildings and improvements	236,823	217,294
Machinery and equipment	719,271	667,130
Furniture and fixtures	17,294	15,931
Property, plant and equipment, at cost	1,022,227	948,080
Less accumulated depreciation	525,472	465,767
	\$496,755	\$482,313

Operating losses due to lower cobalt prices and electrical supply disruptions at GTL led us to evaluate the potential impairment of its long-lived assets at December 31, 2012. Estimated future cash flows based on our assumptions of cobalt prices and volumes supported the net book value of GTL's long-lived assets indicating no impairment at December 31, 2012.

Total depreciation expense on property, plant and equipment was \$62.4 million in 2012, \$51.7 million in 2011 and \$40.8 million in 2010.

Note 5 — Acquisitions

VAC

On August 2, 2011, the Company acquired the equity interests in VAC and the financial position, results of operations and cash flows of VAC are included in the Consolidated Financial Statements from that date. VAC is engaged in the development, manufacturing and distribution of industrial-use magnetic products for electronic equipment markets, including the alternative energy, automotive, electrical installation, and energy conversion and distribution sectors. The Company's Magnetic Technologies segment consists of VAC.

The total purchase price of \$812.2 million included total cash consideration of \$686.2 million, withheld consideration of \$86.3 million, and the issuance of Company shares valued at \$39.7 million. The withheld consideration relates to

potential indemnification claims made by OM Group and accepted by the seller, if any, primarily within two years of the closing date of the acquisition. The Company financed the purchase with borrowings under a new senior secured credit facility (the “Senior Secured Credit Facility”) and cash on hand.

The following table summarizes the final purchase price allocation based on estimated fair values as of the acquisition date (in millions):

45

Table of Contents

Accounts receivable	\$81.0
Inventories	362.8
Property, plant and equipment	244.1
Identifiable intangible assets	307.5
Other assets	35.0
Total assets acquired	1,030.4
Accounts payable	43.5
Deferred income taxes	184.9
Pension liabilities	149.8
Other liabilities	60.8
Total liabilities assumed	439.0
Net assets acquired	591.4
Purchase price, net of cash acquired	812.2
Goodwill	\$220.8

The goodwill of \$220.8 million resulting from the VAC acquisition was attributable to (i) reputation in its markets, (ii) strength of its management team, (iii) efficiency of its operations, and (iv) future cash flows and income projections and is not expected to be deductible for tax purposes.

Identifiable intangible assets arising from the VAC acquisition include the following (in millions):

	Estimated fair value	Weighted average useful lives
Tradename	\$87.9	indefinite
Developed technology	93.5	17.0
Customer relationships	126.1	14.3
	\$307.5	

Tradename represents the VAC name that the Company will continue to use. Customer relationships represent the estimated fair value of relationships with customers acquired in connection with the acquisition. The majority of the products sold under the VAC trade name use either patented technology or trade secrets, related to the manufacturing process that allow provide a competitive advantage in the marketplace. The customer relationship and developed technology intangible assets are being amortized on a straight-line basis. The tradename is an indefinite-lived intangible asset and therefore is not being amortized but will instead be tested, at least annually, for impairment.

Rahu

On December 22, 2011, the Company acquired the shares of Rahu Catalytics Limited ("Rahu"), a developer of a unique iron ligand-based chemistry for use in environmentally-friendly coatings, composites and inks. The Company previously had a license and supply agreement with Rahu. The purchase price included a \$39.1 million cash payment and contingent consideration of up to an additional €20.0 million (\$26.4 million at December 31, 2012) based on achieving certain volume targets over a fifteen year period ending on December 31, 2026. The estimated fair value of the contingent consideration of \$10.8 million as of the acquisition date was finalized in the fourth quarter of 2012 based on the probability of future anticipated payouts and was recorded at the net present value of those future anticipated cash flows. Subsequent to the date of acquisition, the estimated fair value of the liability for contingent consideration increased to \$12.4 million as a result of accretion expense (included in interest expense in the Statement of Consolidated Operations) for the passage of time. The purchase price allocation based on estimated fair values as of the acquisition date was \$27.7 million of intangible assets, \$6.9 million of deferred income tax liabilities and \$29.1 million of goodwill.

In 2011, the Company incurred \$17.8 million of expenses in conjunction with the acquisitions of VAC and Rahu that are included in Selling, general and administrative expense in the Statements of Consolidated Operations. \$2.4 million of these expenses were included in the results of the Magnetic Technologies segment, and the balance was included in Corporate expenses.

Table of Contents

EaglePicher Technologies

On January 29, 2010, the Company completed the acquisition of EaglePicher for approximately \$172 million in cash. Based in Joplin, Missouri, EaglePicher Technologies is a leader in portable power solutions and energy storage technologies serving aerospace, defense and medical markets, and is developing products to serve new applications such as power storage for alternative energy and power grid customers.

The purchase price was allocated to the assets acquired and liabilities assumed based upon their estimated fair values at the date of acquisition. The purchase price exceeded the fair value of the net assets acquired, resulting in \$65.1 million of goodwill, most of which is not deductible for tax purposes. The excess purchase price over net assets acquired primarily reflects the Company's view that this acquisition will add broad technical expertise in battery applications, which will be critical to the Company's growth in battery materials and technologies.

Identifiable intangible assets arising from the EaglePicher acquisition included tradename, know-how, developed technology, and customer relationships totaling \$83.1 million. The know-how, developed technology and customer relationships are being amortized on a straight-line basis. The tradename is an indefinite-lived intangible asset and therefore is not being amortized but will instead be tested, at least annually for impairment. In 2012, the Company received \$6.0 million in an escrow settlement with former owner.

In connection with the EaglePicher acquisition, the Company incurred \$2.2 million in acquisition-related costs in 2010. Acquisition-related costs were recognized as a corporate expense and included in Selling, general and administrative expenses in the Statement of Consolidated Operations.

Note 6 — Goodwill and Other Intangible Assets

Goodwill is tested for our reporting units on an annual basis, or more frequently as impairment indicators arise. The Company estimates the fair value of a reporting unit (including goodwill) and compares that amount to the carrying value of that reporting unit. If the estimated fair value of the reporting unit is less than its carrying value, a second step is undertaken to determine the implied fair value of goodwill of the reporting unit, which is then compared with the carrying value of the goodwill of the reporting unit. This second step includes valuing all of the tangible and intangible assets and liabilities of the reporting unit as if they had been acquired in a business combination on the testing date. The Company has developed a model to estimate the fair value of the reporting units utilizing a discounted cash flow valuation technique ("DCF model"). The Company selected the DCF model as it believes it is comparable to what would be used by market participants to estimate fair value. The DCF model incorporates the Company's estimates of future cash flows; future growth rates; terminal value amounts; allocations of certain assets, liabilities and cash flows among reporting units; and the applicable weighted-average cost of capital (the "WACC") used to discount those estimated cash flows. These estimates require significant judgment and are consistent with the Company's forecast and long-range plans.

The Company conducts its annual goodwill impairment test as of October 1. The results of testing as of October 1, 2012 and 2011 confirmed that the estimated fair value of each of the reporting units exceeded its carrying value and therefore no impairment loss was required to be recognized. The estimated fair value of the Magnetic Technologies reporting unit exceeded its carrying value by 4%. At December 31, 2012 Magnetic Technologies reporting unit had goodwill of \$205.2 million. We believe the assumptions used in our impairment testing were consistent with the risk inherent in the business models of the reporting unit at the time the impairment test was performed. Although we believe the assumptions, judgments and estimates used are reasonable and appropriate, different assumptions, judgments and estimates could materially affect the goodwill test and, potentially, the Company's results of operations and financial position. The change in the carrying amount of goodwill is as follows:

	Magnetic Technologies	Advanced Materials	Specialty Chemicals	Battery Technologies	Consolidated
Balance at January 1, 2011	\$—	\$103,326	\$138,211	\$65,351	\$306,888

47

Table of Contents

Intangible assets consist of (i) definite-lived assets subject to amortization and (ii) indefinite-lived intangible assets not subject to amortization. All intangible assets subject to amortization are amortized on a straight-line basis over the estimated useful lives.

A summary of intangible assets follows:

	2012			2011		
	Carrying Value	Accumulated Amortization (a)	Net	Carrying Value	Accumulated Amortization (a)	Net
	(In thousands)					
Tradenames	\$116,952	\$(6,559)) \$110,393	\$116,952	\$(8,344)) \$108,608
Customer relationships	234,536	(57,943)) 176,593	234,536	(43,869)) 190,667
Developed technology	136,451	(16,926)) 119,525	123,315	(13,325)) 109,990
Know-how	18,600	(2,713)) 15,887	18,600	(1,783)) 16,817
Capitalized software	20,947	(14,626)) 6,321	18,652	(12,641)) 6,011
Other intangibles	4,383	(3,430)) 953	4,447	(3,265)) 1,182
Total	\$531,869	\$(102,197)) \$429,672	\$516,502	\$(83,227)) \$433,275

(a) - Actual amounts of amortization expense may differ from the estimated amounts due to changes in foreign currency exchange rates, impairment of intangible assets, intangible assets additions, accelerated amortization of intangible assets, acquisition and divestiture and other factors.

The weighted average amortization period is 14 years for Customer Relationships, 17 years for Developed Technology, 20 years for Know-How and 3 years for Capitalized Software. Indefinite-lived intangible assets are tested for impairment annually and between annual evaluations if changes in circumstances or the occurrence of certain events indicate potential impairment.

Amortization expense related to intangible assets, including capitalized software, for the years ended December 31, 2012, 2011 and 2010 was \$26.9 million, \$18.7 million and \$13.3 million, respectively, reflecting the acquisitions of VAC and Rahu in 2011.

We estimate that the annual pre-tax amortization expense will be approximately \$26.7 million for 2013, \$26.4 million for 2014, \$26.3 million for 2015, \$25.7 million for 2016 and \$24.7 million for 2017.

Note 7 — Debt

On August 2, 2011, in connection with the acquisition of VAC, the Company terminated its revolving credit facility and the Kokkola Credit Facility and entered into the Senior Secured Credit Facility. The borrowers under the Senior Secured Credit Facility are the Company and Harko C.V., a limited partnership organized under the laws of the Netherlands and a wholly-owned subsidiary of the Company (“Harko”).

The Senior Secured Credit Facility provides for (i) a \$100 million term loan A facility (the “Term A Facility”), which was fully drawn on August 2, 2011, (ii) a \$350 million term loan B facility (the “Dollar Term B Facility”), which was fully drawn on August 2, 2011, (iii) a €175 million term loan facility (the “Euro Term B Facility” and, together with the Dollar Term B Facility, the “Term B Facility” and, together with the Term A Facility, the “Term Loan Facility”), which was fully drawn on August 2, 2011, and (iv) a \$200 million undrawn revolving credit facility (the “Revolving Credit Facility”), of which up to \$100 million may be denominated in Euros.

During the third and fourth quarters of 2012, we made principal pre-payments totaling \$197.0 million on the Euro Term B facility using cash on hand and recognized accelerated amortization of deferred financing fees of \$6.5 million. The balance of the Euro Term B facility was \$28.0 million at December 31, 2012.

The obligations of the Company under the Senior Secured Credit Facility are guaranteed by the Company and all of the Company's U.S. subsidiaries. In addition, the obligations of the Company under the Senior Secured Credit Facility are secured by a first priority security interest in substantially all of the existing and future property and assets of the

Company and its U.S. subsidiaries and 65% of the voting capital stock of the Company's direct foreign subsidiaries. The obligations of Harko under the Senior Secured Credit Facility are secured by a first priority security interest in substantially all of the existing and future property and assets of Harko and the Company's subsidiaries and a 100% pledge of the voting capital stock of the Company's subsidiaries, subject to certain exceptions, including limitations relating to German capital maintenance rules and other financial assistance limitations in certain foreign jurisdictions.

We have the option to specify that interest be calculated based on either a London interbank offered rate (“LIBOR”) or on a variable base rate, plus, in each case, a calculated applicable margin. The interest rate for base rate loans will

Table of Contents

be the greater of (i) the federal funds rate plus 0.5%, (ii) Bank of America's prime rate or (iii) LIBOR plus 1%. The applicable margins for the Term A Facility, the Dollar Term B Facility and the Revolving Credit Facility range from 2.75% to 3.25% for base rate loans and 3.75% to 4.25% for LIBOR loans. The margin for the Euro Term B Facility is 4.75%. The LIBOR rates under the Term B Loan Facility are subject to a floor of 1.5%. At December 31, 2012 and 2011, the weighted average interest rate for the outstanding borrowings under the Senior Secured Credit Facility was 5.57% and 5.66%, respectively.

The Term A Facility and the Revolving Credit Facility mature on August 2, 2016. The Term B Facility matures on August 2, 2017. In addition, the Term Loan Facility requires mandatory prepayments of principal based on certain percentages of Excess Cash Flow (as defined in the Senior Secured Credit Facility), beginning in 2013, subject to certain exceptions. In addition, subject to certain thresholds and exceptions, the Company will be required to prepay the loans outstanding under the Term Loan Facility with some or all of the net cash proceeds of certain asset sales and from the issuance or incurrence of additional debt of the Company.

Annual maturities of long-term debt are as follows (amounts in thousands):

2013	\$ 13,309
2014	15,809
2015	20,809
2016	67,059
2017	350,377
	\$467,363

The Senior Secured Credit Facility contains customary representations and warranties and certain covenants that limit the ability of the Company to, among other things: (i) incur or guarantee additional indebtedness; (ii) pay distributions on capital stock; (iii) make investments; (iv) sell assets; (v) incur or suffer to exist liens securing indebtedness; (vi) consolidate, merge or transfer all or substantially all of their assets; and (vii) engage in transactions with affiliates. In addition, the Senior Secured Credit Facility contains financial covenants that limit capital expenditures in any fiscal year and that measure (i) the ratio (the "Consolidated Leverage Ratio") of the Company's total indebtedness to the amount of the Company's adjusted "Consolidated EBITDA" as defined in the Senior Secured Credit Facility ("Covenant EBITDA"), and (ii) the ratio of the amount of Covenant EBITDA to the Company's cash interest expense (the "Consolidated Interest Coverage Ratio"). Covenant EBITDA is consolidated net income plus (i) federal, state, local and foreign income taxes payable, (ii) interest expense, (iii) amortization, (iv) depreciation, and (v) certain "non-cash" items, such as non-cash compensation recorded in accordance with FASB ASC Topic 718, non-cash goodwill or other intangible asset impairment charges and write-offs of goodwill and other intangible assets in accordance with FASB ASC Topic 350, non-cash restructuring charges, non-cash purchase accounting charges required by FASB ASC Topic 805 and foreign currency translation gains and losses, minus (vi) interest income. Capital expenditures are compared quarterly on a year-to-date basis to an annual cap set forth in the Senior Secured Credit Facility. The Consolidated Leverage Ratio and the Consolidated Interest Coverage Ratio are required to be met quarterly for each trailing four-consecutive-quarter period. The maximum permitted Consolidated Leverage Ratio for the fiscal quarter ending December 31, 2012 was 3.25 to 1.00 and the minimum permitted Consolidated Interest Coverage Ratio for the fiscal quarter ending December 31, 2012 was 4.25 to 1.00. At December 31, 2012, the Company's Consolidated Leverage Ratio was 2.86 to 1.00 and its Consolidated Interest Coverage Ratio was 4.33 to 1.00. As of December 31, 2012, the Company was in compliance with all of the covenants under the Senior Secured Credit Facility.

The Company incurred fees and expenses of \$30.2 million related to the Senior Secured Credit Facility. These fees and expenses were deferred and are being amortized to interest expense over the term of the Senior Secured Credit Facility.

Interest paid on long-term debt was \$38.4 million, \$18.9 million and \$2.9 million for 2012, 2011 and 2010, respectively. Interest expense has not been allocated to discontinued operations. No interest was capitalized in 2012, 2011 or 2010.

Note 8 — Derivative Instruments

All derivatives are reflected on the balance sheet at fair value and recorded in other current assets and other current liabilities in the Consolidated Balance Sheets. The accounting for the fair value of a derivative depends upon whether it has been designated as a hedge and on the type of hedging relationship. Changes in the fair value of derivative instruments are recognized immediately in earnings, unless the derivative is designated as a hedge and qualifies for hedge accounting. Under hedge accounting, recognition of derivative gains and losses can be matched in the same period with that of the hedged exposure and thereby minimize earnings volatility.

Table of Contents

For a fair value hedge, the change in fair value of the hedging instrument and the change in fair value of the hedged item attributable to the risk being hedged are both recognized currently in earnings. For a cash flow hedge, the effective portion of the change in fair value of a hedging instrument is initially recognized in Accumulated other comprehensive income (loss) ("AOCI(L)") in stockholders' equity and subsequently reclassified to earnings when the hedged item affects income. Any ineffective portion of the change in fair value of a cash flow hedge is recognized immediately in earnings.

Commodity Price Risk

The Company, from time to time, employs derivative instruments in connection with certain purchases of certain commodities in order to establish a fixed margin and mitigate the risk of price volatility. This hedging limits the Company's ability to participate in gains from favorable commodity price fluctuations and it limits the risk of loss from adverse commodity price fluctuations.

Derivative instruments employed by the Company to manage commodity price risk include some contracts designated as cash flow hedges as well as some other contracts that are not designated as hedges for accounting purposes.

In October 2012, we entered into nickel forward derivative contracts to establish a fixed margin and mitigate the risk of price volatility related to certain sales expected in 2013 of nickel-containing finished products that were priced based on a formula that included a fixed nickel price component. These forward derivative contracts have been designated as cash flow hedges for accounting purposes.

Other Forward Contracts

In 2011, we entered into nickel forward purchase contracts to establish a fixed margin and mitigate the risk of price volatility related to certain sales expected in 2012 of nickel-containing finished products that were priced based on a formula that included a fixed nickel price component. These forward purchase contracts were not designated as cash flow hedges for accounting purposes. Accordingly, these contracts were adjusted to fair value as of the end of each reporting period, with the gain or loss recorded in Cost of goods sold. As of December 31, 2012, there were no nickel forward purchase contracts outstanding that were not designated as cash flow hedges.

Foreign Currency Exchange Rate Risk

The functional currency for our Finnish operating subsidiary is the U.S. dollar since a majority of its purchases and sales are denominated in U.S. dollars. Accordingly, foreign currency exchange gains and losses related to transactions of this subsidiary denominated in other currencies (principally the Euro) are included in earnings. While a majority of the subsidiary's raw material purchases are in U.S. dollars, it also has some Euro-denominated operating expenses. From time to time, we enter into foreign currency forward contracts to mitigate a portion of the earnings volatility in those Euro-denominated cash flows due to changes in the Euro/U.S. dollar exchange rate. As of December 31, 2012, we had no Euro forward contracts outstanding. As of December 31, 2011, we had Euro forward contracts with notional values that totaled 90.0 million Euros with maturities ranging up to twelve months. AOCI(L) included a cumulative loss, related to these contracts, of \$3.7 million, all of which was reclassified to earnings within 2012. We had designated these foreign currency derivatives as cash flow hedges of the subsidiary's forecasted Euro-denominated expenses.

No hedge ineffectiveness was recorded in income in the years ended December 31, 2012, 2011 or 2010 for these hedges.

Interest Rate Risk

We utilize interest rate swap agreements to partially reduce risks related to variable rate financing agreements that are subject to changes in the market rate of interest.

In December 2012, we entered into an interest rate swap agreement to manage the variable interest rate risk associated with the Term B Facility. This interest rate swap agreement establishes a fixed interest rate of 5.82% on \$115.0 million of the Term B Facility. We have designated this interest rate swap agreement, which expires on December 31, 2013, as a cash flow hedge.

We had interest rate swaps with notional values that totaled \$115.0 million and \$199.5 million at December 31, 2012 and 2011, respectively. The outstanding contracts as of December 31, 2012 had maturities ranging up to 12 months. As of December 31, 2012, AOCI(L) included a cumulative loss of \$0.1 million related to these contracts, all of which is expected to be reclassified to earnings within the next twelve months. As of December 31, 2011, AOCI(L) included a cumulative loss of \$0.4 million related to these contracts, all of which was reclassified to earnings within 2012. No hedge ineffectiveness was recorded in income in 2012, 2011 or 2010 for these hedges.

Table of Contents

The following table summarizes the fair value of derivative instruments recorded in the Consolidated Balance Sheets (amounts in thousands):

	Derivatives Designated as Hedging Instruments			
	Derivative Liabilities		Derivative Liabilities	
	December 31, 2012		December 31, 2011

Note 9 — Fair Value Disclosures

The following table shows the Company's assets and liabilities accounted for at fair value on a recurring basis:

Description	December 31, 2012	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Liabilities:				
Interest rate swap agreements	\$(80)	\$—	\$(80)	\$—
Contingent consideration payable	(12,411)	—	—	(12,411)
Total	\$(12,491)	\$—	\$(80)	\$(12,411)

We use significant other observable inputs to value derivative instruments used to hedge foreign currency and interest rate risk; therefore, they are classified within Level 2 of the valuation hierarchy. The fair value for these contracts is determined based on exchange rates and interest rates, respectively. Our valuation techniques and Level 3 inputs used to estimate the fair value of contingent consideration payable in connection with our acquisition of Rahu are described below. There were no transfers into or out of Levels 1, 2 or 3 in 2012.

The following table summarizes changes in Level 3 liabilities measure at fair value on a recurring basis:

		Contingent Consideration
Fair Value at	December 31, 2011	\$14,343
Change in estimate		(3,392)
Accretion expense		1,375
Foreign exchange		85
Fair Value at	December 31, 2012	\$12,411

We acquired Rahu on December 22, 2011. The purchase price included contingent consideration of up to an additional €20.0 million (\$26.4 million at December 31, 2012) based on achieving certain volume targets over a fifteen year period ending on December 31, 2026. We estimated the fair value of the contingent consideration liability using probability-weighted expected future cash flows and applied a discount rate that appropriately captures a market participant's view of the risk associated with the liability. During the year ended December 31, 2012, the estimate of the contingent consideration liability decreased by \$3.4 million as we revised the purchase price allocation reflecting information known as of the acquisition date. This adjustment and the final allocation adjustment did not impact cash flows. The liability for contingent consideration is included in Other non-current liabilities in the Unaudited Condensed Consolidated Balance Sheet. The valuation of contingent consideration is classified utilizing Level 3

inputs consistent with reasonably available assumptions which would be made by other market participants. Changes in the risk profile of this liability and achievement of volume targets over the term of this arrangement could impact the value of the contingent consideration.

We also hold financial instruments consisting of cash, accounts receivable, and accounts payable. The carrying amounts of cash, accounts receivable and accounts payable approximate fair value due to the short-term maturities of these instruments. Long-term debt and the current portion of long-term debt had a carrying value of \$467.4 million and a fair value of \$470.4 million at December 31, 2012, based on quoted market prices which are Level 1 inputs. Derivative instruments are recorded at fair value as indicated above.

Table of Contents

The Company utilizes a “relief from royalty” methodology in estimating fair values for indefinite-lived trade names. The methodology estimates the fair value of each trade name by determining the present value of the royalty payments that are avoided as a result of owning the trade name and includes judgmental assumptions about sales growth that are consistent with the assumptions used to determine the fair value of reporting units in the Company's goodwill testing. The fair value measurements were calculated using unobservable inputs, classified as Level 3, requiring significant management judgment due to the absence of quoted market prices or observable inputs for assets of a similar nature. Accounts receivable potentially subjects the Company to a concentration of credit risk. The Company maintains significant accounts receivable balances with several large customers. At December 31, 2012 and 2011 the accounts receivable balance from our largest customer represented 3% of the Company's net accounts receivable, respectively. Generally, the Company does not obtain security from its customers in support of accounts receivable. Sales to the top three customers in the Battery Technologies segment represented approximately 52%, 54% and 50% of Battery Technologies' net sales in 2012, 2011 and 2010, respectively. The loss of one or more of these customers could have a material adverse effect on Battery Technologies' business, results of operations or financial position.

Note 10 — Income Taxes

Income (loss) from continuing operations before income tax expense consists of the following:

	Year Ended December 31		
	2012	2011	2010
United States	\$ (14,818) \$ (6,909) \$ (21,370
Outside the United States	(33,631) 35,852	128,685
	\$ (48,449) \$ 28,943	\$ 107,315

Income tax expense is summarized as follows:

	Year Ended December 31		
	2012	2011	2010
Current tax provision (benefit):			
United States:			
Federal	\$ (3,051) \$ 1,974	\$ 321
State and local	(49) 202	376
Outside the United States	30,902	11,595	34,090
Total current	27,802	13,771	34,787
Deferred tax provision (benefit):			
United States	2,353	498	542
Outside the United States	(32,926) (32,065) (5,673
Total deferred	(30,573) (31,567) (5,131
	\$ (2,771) \$ (17,796) \$ 29,656

A reconciliation of income taxes computed using the United States statutory rate to income taxes computed using the Company's effective income tax rate is as follows:

Table of Contents

	Year Ended December 31			
	2012	2011	2010	
Income (loss) from continuing operations before income tax expense	\$(48,449) \$28,943	\$107,315	
Income taxes at the United States statutory rate (35)%	(16,957) 8,692	37,560	
Increase (decrease) in taxes resulting from:				
Effective tax rate differential on income outside of the United States	(3,755) (25,850) (25,447)
Repatriation of foreign earnings	7,350	6,482	5,564	
Malaysian tax holiday	—	(3,662) (4,545)
Valuation allowance (reversal)	4,473	2,875	(1,037)
Uncertain tax positions	(1,910) (1,618) 1,936	
Allowance (reversal) on GTL prepaid tax asset	5,645	(6,225) 11,465	
Other, net	2,383	1,510	4,160	
Income tax (benefit) expense	\$(2,771) \$(17,796) \$29,656	
Effective income tax rate	5.7	% (a)	27.6	%
(a)not meaningful				

The effective income tax rate for the year ended December 31, 2012 is impacted by VAC purchase accounting related inventory charges of \$55.9 million and GTL. During 2012, the Company recorded a tax expense of \$10.4 million related to GTL. This includes a \$5.6 million tax expense related to GTL prepaid tax asset impairment and \$6.6 million related to other GTL permanent differences, of which the Company's share is 55%, or \$6.7 million.

Excluding the impact of VAC purchase accounting related inventory charges and GTL discrete and permanent items, the effective tax rate for the year ended December 31, 2012 would have been 30%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., and a tax efficient financing structure, partially offset by losses and carry-forwards in certain jurisdictions (including the U.S. and Germany) with no corresponding tax benefit.

The effective income tax rate for the year ended December 31, 2011 was affected by the acquisition of VAC, including the impact of acquisition-related charges of \$126.6 million. Also during 2011, the Company recorded a net discrete tax benefit of \$7.4 million, which includes a \$6.2 million discrete tax benefit related to GTL, of which the Company's share is 55%, or \$3.4 million.

Excluding the impact of the VAC acquisition and discrete items, the effective income tax rate for the year ended December 31, 2011 would have been 12%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., a tax holiday in Malaysia and a tax efficient financing structure, partially offset by losses in certain jurisdictions (including the U.S.) with no corresponding tax benefit.

During 2010, the Company recorded discrete tax items related to continuing operations netting to expense of \$5.4 million. Included in this amount is \$10.1 million of discrete tax expense related to the GTL joint venture, of which the Company's share is 55%, or \$5.6 million. Excluding the discrete items, the effective income tax rate for 2010 would have been 22.6%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., a tax holiday in Malaysia and a tax efficient financing structure, partially offset by losses in certain jurisdictions with no corresponding tax benefit (including the U.S.).

During fourth quarter of 2012, the Company received \$37.9 million tax refund which was included in the Refundable and prepaid income tax on the Consolidated Balance Sheet as of December 31, 2011.

The Company intends to repatriate only future earnings and therefore has not provided additional United States income taxes on approximately \$346 million of undistributed earnings of consolidated foreign subsidiaries. Such earnings could become taxable upon the sale or liquidation of these foreign subsidiaries or upon dividend repatriation. The Company's intent is for such earnings to be permanently reinvested by the foreign subsidiaries. It is not practicable

to estimate the amount of unrecognized withholding taxes and tax liability on such earnings.

In connection with an investment incentive arrangement, the Company had a “tax holiday” from income taxes in Malaysia that expired on December 31, 2011. This arrangement reduced income tax expense by \$3.7 million and \$4.5 million for 2011 and 2010, respectively. The benefit of the tax holiday on net income per diluted share was approximately \$0.12 and \$0.15 in 2011 and 2010, respectively.

Table of Contents

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. The Company's major tax jurisdictions include the U.S., Finland and Germany. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2006. The Internal Revenue Service is currently examining the Company's 2010 U.S. federal income tax return, and Finnish tax authorities are currently examining the Company's Finnish tax returns for the years 2007-2011. VAC's German tax returns have been audited through 2005. The Company is indemnified, subject to certain limitations, for any pre-acquisition income tax liabilities of VAC. German tax authorities are currently examining VAC's income tax returns for the years 2006-2009.

Income tax payments were \$33.9 million, \$23.8 million and \$26.5 million in 2012, 2011 and 2010, respectively.

Significant components of the Company's deferred income taxes are as follows:

	December 31	
	2012	2011
Employee benefit accruals	\$50,601	\$36,148
Foreign operating loss carryforwards	13,225	8,599
Foreign tax credit carryforwards	12,193	12,457
State operating loss carryforwards	7,110	6,401
Operating accruals	32,838	29,453
Investment credit carryforwards	3,393	3,414
Valuation allowance	(77,993) (65,864
Deferred tax assets	41,367	30,608
Depreciation	(46,446) (49,700
Amortization	(108,164) (101,012
VAC, inventory reserve - purchase accounting step-up	—	(22,110
Other	19	(485
Deferred tax liabilities	(154,591) (173,307
Net deferred tax liabilities	\$(113,224) \$(142,699

Deferred income taxes are recorded in the Consolidated Balance Sheets in the following accounts:

	December 31	
	2012	2011
Other current assets	\$7,807	\$7,523
Other non-current assets	5,144	3,172
Other current liabilities	(4,724) (23,449
Deferred income taxes — non-current liabilities	(121,451) (129,945
	\$(113,224) \$(142,699

The Company has a U.S. net deferred tax asset of \$1.1 million which is expected to be recovered based on temporary differences that will reverse in 2013-2014. At December 31, 2012 and 2011, the Company had U.S. state net operating loss carryforwards representing a potential future tax benefit of \$7.1 million and \$6.4 million, respectively. These carryforwards expire at various dates from 2013 through 2032. The Company has recorded a full valuation allowance against the U.S. state net operating loss carryforwards. The Company has foreign net operating loss carryforwards of \$47.6 million, representing a potential future tax benefit of \$13.2 million in various jurisdictions, some of which expire in 2013 through 2031, and some of which have no expiration. The Company has established a \$3.8 million valuation allowance against the foreign net operating loss carryforwards as the Company believes that some of these assets will not be realized. The Company has foreign investment tax credit and allowance carryforwards of \$3.4 million, of which \$2.2 million expire in 2028, while the remaining \$1.2 million have no expiration. The Company has recorded a \$2.2 million valuation allowance against the foreign investment tax credit and allowance carryforwards as

the Company believes that a portion of these assets will not be realized. For the year ended December 31, 2012, the Company's valuation allowance increased primarily due to the increase in U.S. deferred tax assets and foreign carryforwards.

A reconciliation of the beginning and ending amount of uncertain tax positions is as follows:

55

Table of Contents

Balance at January 1, 2011	\$21,326	
Additions for tax positions related to the current year	6,575	
Additions for tax positions of prior years	71	
Reductions for tax positions of prior years	(2,817)
Reductions for lapses of statute of limitations	(90)
Foreign currency translation	(48)
Balance at December 31, 2011	25,017	
Additions for tax positions related to the current year	877	
Additions for tax positions of prior years	411	
Reductions for tax positions of prior years	(8,396)
Reductions for lapses of statute of limitations	(126)
Foreign currency translation	174	
Balance at December 31, 2012	\$17,957	

With the exception of those relating to the VAC acquisition, all uncertain tax positions would affect the effective tax rate if recognized. However, \$5.6 million of the uncertain tax positions relate to foreign tax credit carryforwards, which, if recognized, would be offset by an adjustment to the valuation allowance. At December 31, 2012, there are no uncertain tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. The decrease in uncertain tax positions in 2012 primarily results from effective settlements during 2012 in various tax jurisdictions. The increase in uncertain tax positions in 2011 resulted from VAC uncertain tax positions, partially offset by reductions for prior year uncertain tax positions as a result of a favorable court decision. At December 31, 2012, the liability for uncertain tax positions includes \$0.2 million for which it is reasonably possible that the uncertain tax position will decrease within the next twelve months. These uncertain tax positions primarily relate to transfer pricing and may decrease upon expiration of the statute of limitations.

The Company recognizes interest accrued related to uncertain tax positions and penalties as a component of income tax expense. During 2012, 2011 and 2010, the Company recognized a \$0.4 million benefit, \$0.1 million expense and \$0.1 million benefit related to interest and penalties, respectively. At December 31, 2012 and 2011, the Company had \$0.8 million and \$1.3 million accrued for interest and penalties.

Note 11 — Pension and Other Post-Retirement Benefit Plans

The Company has defined contribution plans covering substantially all eligible U.S. employees. Contributions are directed by the employee into various investment options. These defined contribution plans do not have any direct ownership of the Company's common stock. Under these plans, the Company matches participants' contributions based on plan provisions. Certain plans provide for a discretionary Company contribution based on employee compensation. The Company maintains additional defined contribution plans in certain locations outside the United States. Aggregate defined contribution plan expenses were \$6.1 million, \$5.8 million and \$5.7 million in 2012, 2011 and 2010, respectively.

The Company has defined benefit pension obligations of \$149.8 million at VAC (based on the Euro to U.S. dollar exchange rate on August 2, 2011), substantially all of which are unfunded. VAC sponsors various defined benefits plans for its employees, including pension, early retirement benefits and anniversary benefits, mainly in Germany. The EaglePicher Technologies pension plans consist of four, non-contributory, defined benefit pension plans. The Technologies Salaried Plan is a defined benefit, cash balance plan that covers EaglePicher Technologies salaried employees hired prior to January 1, 2007. The Technologies Hourly Plan is a defined benefit plan that covers EaglePicher Technologies non-union hourly employees hired prior to January 1, 2007 and union hourly employees hired prior to May 3, 2008. The Company also assumed the liabilities of two frozen defined benefit pension plans. Pension benefits are paid to plan participants directly from pension plan assets.

In addition to the pension liabilities for VAC and EaglePicher Technologies, the Company has a non-contributory, defined benefit pension plan for certain retired employees in the United States related to a divested business. Pension benefits under this plan are paid to plan participants directly from pension plan assets.

Certain other non-U.S. employees are covered under other defined benefit plans. These other non-U.S. plans are not material to the Company.

The Company also has an obligation to its former chief executive officer in settlement of an unfunded supplemental executive retirement plan (“SERP”). Payments under the SERP are made directly from the Company.

Table of Contents

The following table sets forth the changes in the benefit obligation and the plan assets during the year and reconciles the funded status of the defined benefit plans with the amounts recognized in the Consolidated Balance Sheet at December 31:

	Pension Benefits		Non-U.S. Plans	
	U.S. Plans 2012	2011	2012	2011
Change in benefit obligation				
Projected benefit obligation at beginning of year	\$(238,454)	\$(215,194)	\$(146,115)	\$(3,333)
Acquisitions	—	—	—	(153,728)
Service cost	(1,087)	(989)	(3,993)	(2,054)
Interest cost	(9,346)	(11,505)	(7,587)	(3,527)
Actuarial gain (loss)	(13,585)	(24,390)	(30,155)	(1,045)
Benefits paid	17,536	13,624	9,392	3,963
Foreign currency exchange rate changes	—	—	(3,730)	13,609
Projected benefit obligation at end of year	(244,936)	(238,454)	(182,188)	(146,115)
Change in plan assets				
Fair value of plan assets at beginning of year	168,084	159,447	4,020	292
Acquisitions	—	—	—	4,081
Actual return on plan assets	22,064	11,587	17	12
Employer contributions	7,837	10,674	9,282	3,963
Foreign currency exchange rate changes	—	—	77	(365)
Benefits paid	(17,536)	(13,624)	(9,392)	(3,963)
Fair value of plan assets at end of year	180,449	168,084	4,004	4,020
Funded status — plan assets less than benefit obligations	(64,487)	(70,370)	(178,184)	(142,095)
Recognized in accumulated other comprehensive income:				
Net actuarial (gain) loss	34,782	36,838	31,646	1,587
Amounts not yet recognized as a component of net postretirement benefit cost	\$34,782	\$36,838	\$31,646	\$1,587
Amounts recorded in the balance sheet consist of:				
Accrued benefit liability — current	\$(849)	\$(692)	\$(7,999)	\$(7,525)
Accrued benefit liability — long-term	(63,638)	(69,678)	(170,185)	(134,570)
Accumulated other comprehensive loss	34,782	36,838	31,646	1,587
Net amount recognized	\$(29,705)	\$(33,532)	\$(146,538)	\$(140,508)
Accumulated benefit obligation at end of year	\$(226,243)	\$(220,580)	\$(180,355)	\$(144,836)

Table of Contents

Set forth below is a detail of the net periodic pension and other post-retirement benefit expense for the defined benefit plans for the years ended December 31:

	Pension Benefits		
	U.S. Plans		
	2012	2011	2010
Service cost	\$1,087	\$989	\$913
Interest cost	9,346	11,505	11,078
Amortization of unrecognized net loss	1,532	387	364
Expected return on plan assets	(10,429)	(10,527)	(9,621)
Net periodic benefit cost	1,536	2,354	2,734
Net (gain) loss arising during the year	1,287	23,330	2,731
Net (gain) loss recognized during the year	(3,343)	(387)	(363)
Total recognized in other comprehensive income	(2,056)	22,943	2,368
Total recognized in net periodic benefit cost and other comprehensive income	\$(520)	\$25,297	\$5,102

	Pension Benefits		
	Non-U.S. Plans		
	2012	2011	2010
Service cost	\$3,993	\$2,054	\$228
Interest cost	7,587	3,527	129
Amortization of unrecognized net loss	792	(14)	3
Amortization of prior service credit	8	8	5
Expected return on plan assets	(9)	(10)	(9)
Net periodic benefit cost	12,371	5,565	356
Net (gain) loss arising during the year	30,147	1,085	411
Net (gain) loss recognized during the year	(880)	14	(3)
Amortization of prior service credit	(8)	(8)	(5)
Exchange rate gain (loss)	801	(76)	(9)
Total recognized in other comprehensive income	30,060	1,015	394
Total recognized in net periodic benefit cost and other comprehensive income	\$42,431	\$6,580	\$750

Future pension benefit payments expected to be paid are as follows:

Expected benefit payments	Pension	
	U.S. Plans	Non-U.S. Plans
2013	\$14,192	\$10,160
2014	\$14,066	\$10,963
2015	\$14,088	\$11,619
2016	\$14,200	\$11,441
2017	\$14,158	\$11,149
2018-2022	\$72,711	\$53,954

Pension benefit payments for the U.S. pension plans are made from assets of the pension plans. The Company expects to contribute \$3.2 million to its U.S. pension plans, in 2013. Expected contributions are dependent on many variables, including the variability of the market value of the assets as compared to the obligation and other market or regulatory conditions. Accordingly, actual funding may differ significantly from current estimates. The Company expects to make annual benefit payments of approximately \$10.2 million related to its non-U.S. pension plans in 2013.

Table of Contents

The amounts in Accumulated other comprehensive income (loss) that are expected to be recognized as components of net periodic benefit cost during 2013 are as follows:

	U.S. Plans	Non-U.S. Plans	Total
Net actuarial loss	\$3,348	\$685	\$4,033
Prior service cost	—	6	6
Total	\$3,348	\$691	\$4,039

The following weighted-average assumptions were used to determine the Company's pension benefit obligations for the year ended December 31:

	2012	2011
U.S. Plans		
Discount rate — EPT Active Plans	3.69%	4.18%
Discount rate — EPT Inactive Plans	3.50%	4.05%
Discount rate — SCM Plans	3.35%	4.05%
Expected return on pension plan assets — EPT Active Plans	7.00%	8.00%
Expected return on pension plan assets — EPT Inactive Plans	4.68%	5.75%
Expected return on pension plan assets — SCM Plans	6.00%	6.50%
Rate of increases in compensation	3.50%	3.50%
Non U.S. Plans		
Discount rate	3.49%	5.48%
Rate of increases in compensation	2.50% – 3.00%	2.50% – 3.00%

The following weighted-average assumptions were used to determine the Company's net periodic pension benefit costs for the year ended December 31:

	2012	2011
U.S. Plans		
Discount rate — EPT Active Plans	4.11%	5.22%
Discount rate — EPT Inactive Plans	4.04%	5.13%
Discount rate — SCM Plans	4.05%	5.12%
Expected return on pension plan assets — EPT Active Plans	8.00%	8.25%
Expected return on pension plan assets — EPT Inactive Plans	5.75%	6.00%
Expected return on pension plan assets — SCM Plans	6.50%	6.75%
Non U.S. Plans		
Discount rate	5.47%	4.32%
Expected return on pension plan assets	3.41%	3.63%

The Company's investment objective for defined benefit plan assets is to meet the plan's benefit obligations, without undue exposure to risk. The investment strategy focuses on asset class diversification, liquidity to meet benefit payments and an appropriate balance of long-term investment return and risk. The Investment Committee oversees the investment allocation process, which includes the selection and evaluation of the investment manager, the determination of investment objectives and risk guidelines, and the monitoring of actual investment performance. In determining the expected long-term rate of return on defined benefit pension plan assets, management considers the historical rates of return over a period of time that is consistent with the long-term nature of the underlying obligations of these plans, the nature of investments and an expectation of future investment strategies.

The Company utilizes the services of independent third-party investment managers to oversee the management of U.S. pension plan assets. The investment managers are allowed to exercise investment discretion, subject to limitations established by the Company.

The EaglePicher Technologies plan assets are managed as two "pools" in recognition of the differences in the obligations of the active and frozen plans. Below are the Company's actual and established target allocations for the EaglePicher Technologies Pension Plans, representing 94% of U.S. pension plan assets:

Table of Contents

	Active Plans		Frozen Plans		
	Actual Allocation	Target Allocation	Actual Allocation	Target Allocation	
U.S. equity securities	34	% 35	% 12	% 12	%
International equity securities	31	% 30	% 8	% 8	%
Fixed income	24	% 25	% 70	% 70	%
High yield	—	% —	% 1	% 2	%
TIPS	5	% 5	% 6	% 6	%
Global REITS	5	% 5	% 2	% 2	%
Cash	1	% —	% 1	% —	%
Total assets	100	% 100	% 100	% 100	%

Active plan investments include domestic equity securities which are invested broadly in U.S. companies in various industries using the Wilshire 5000 Index as the asset class benchmark. International equity securities are invested broadly in non-U.S. companies in various industries using the MSCI ACWI ex-U.S. Index as the asset class benchmark. Long-term Core Fixed Income (“Fixed income”) consists of broad investment grade fixed income bonds using the Barclays Capital Long Government/Credit Index as the asset class benchmark. U.S. Treasury Inflation Protected Fixed Income (“TIPS”) invests in the U.S. Treasury inflation protected securities market using the Barclays U.S. TIPS Index as the asset class benchmark. Real estate investments are invested in the broad global real estate securities market with the FTSE EPRA/NAREIT Developed RE Index (or other comparable index) as the asset class benchmark. The Frozen plan investments are the same as the active plans except that fixed income consists of long-credit fixed income bonds using the Barclays Capital Long Credit Index as the asset class benchmark. High Yield Fixed Income (“High yield”) invests in broad U.S. non-investment grade fixed income bonds using the Merrill Lynch U.S. High Yield Master II Index as the asset class benchmark.

The Company’s asset allocations by asset category for the SCM and non-U.S. plans are as follows:

	December 31, 2012		December 31, 2011	
	Actual	Allocation	Actual	Allocation
Equity securities	35	%	37	%
Corporate bonds	9	%	9	%
Government bonds	12	%	10	%
Other fixed income	15	%	19	%
Foreign assets	27	%	24	%
Cash	2	%	1	%
Total assets	100	%	100	%

Equity securities are invested broadly in U.S. companies in various industries. Foreign assets consist of equity securities of non-U.S. companies in various industries as well as foreign mutual funds.

Table of Contents

The fair value measurements of defined benefit pension plan assets by category at December 31, 2012 are as follows:

Category	December 31, 2012	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Equity securities — US	\$33,536	\$4,485	\$29,051	\$—
Equity securities — Non US	23,751	—	23,751	—
Fixed income:				
Bonds	89,744	—	89,744	—
Other fixed income	22,391	213	22,178	—
High yield	1,884	—	1,884	—
TIPS	2,080	—	2,080	—
Global REITS	5,544	—	5,544	—
Foreign assets	4,002	—	4,002	—
Cash and cash equivalents	1,521	1,521	—	—
Total	\$184,453	\$6,219	\$178,234	\$—

Equity securities and fixed income, high-yield, TIPS and Global REITS investments are primarily comprised of mutual funds and common/collective trust funds. Investments in mutual funds and common/collective trust funds are valued at the net asset value per share or unit multiplied by the number of shares or units held as of the measurement date.

The defined benefit pension plans do not have any direct ownership of the Company's common stock.

Note 12 — Accumulated Other Comprehensive Income (Loss)

	Foreign Currency Translation	Unrealized Gains and Losses on Cash Flow Hedging Derivatives	Pension and Post-Retirement Obligation	Accumulated Other Comprehensive Income (Loss)

Note 13 — Earnings Per Share

The following table sets forth the computation of basic and dilutive income (loss) per common share from continuing operations attributable to OM Group, Inc. common stockholders for the years ended December 31:

	2012	2011	2010
	(in thousands, except per share amounts)		
Income (loss) from continuing operations attributable to OM Group, Inc. common stockholders	\$ (38,615) \$ 42,070	\$ 82,648
Weighted average shares outstanding — basic	31,885	31,079	30,433
Dilutive effect of stock options and restricted stock	—	165	132
Weighted average shares outstanding — assuming dilution	31,885	31,244	30,565

Earnings per common share:

Income (loss) from continuing operations attributable to OM Group, Inc. common stockholders — basic	\$ (1.21) \$ 1.35	\$ 2.72
Income (loss) from continuing operations attributable to OM Group, Inc. common stockholders — assuming dilution	\$ (1.21) \$ 1.35	\$ 2.70

The following table sets forth the computation of basic and diluted net income (loss) per common share attributable to OM Group, Inc. common stockholders for the years ended December 31:

	2012	2011	2010
	(in thousands, except per share amounts)		
Net income (loss) attributable to OM Group, Inc. common stockholders	\$ (38,881) \$ 42,011	\$ 83,374
Weighted average shares outstanding — basic	31,885	31,079	30,433
Dilutive effect of stock options and restricted stock	—	165	132
Weighted average shares outstanding — assuming dilution	31,885	31,244	30,565

Earnings per common share:

Net income (loss) attributable to OM Group, Inc. common stockholders — basic	\$ (1.22) \$ 1.35	\$ 2.74
Net income (loss) attributable to OM Group, Inc. common stockholders — assuming dilution	\$ (1.22) \$ 1.35	\$ 2.73

The Company uses the treasury stock method to calculate the effect of outstanding share-based compensation awards, which requires the Company to compute total employee proceeds as the sum of (a) the amount the employee must pay upon exercise of the award, (b) the amount of unearned share-based compensation costs attributed to future services and (c) the amount of tax benefits, if any, that would be credited to additional paid-in capital assuming exercise of the award. Shares, under share-based compensation awards, for which the total employee proceeds exceed the average market price over the applicable period have an antidilutive effect on earnings per share, and accordingly, are excluded from the calculation of diluted earnings per share.

In the years ended December 31, 2012 and 2011, stock options to purchase 0.6 million shares and 0.2 million shares, respectively, of common stock were excluded from the calculation of dilutive earnings per share because the options' exercise prices were greater than the average market price of the common shares and, therefore, the effect would have been anti dilutive. As the Company had a loss from continuing operations for the year ended December 31, 2012, the effect of including dilutive securities in the earnings per share calculation would have been anti-dilutive. Accordingly, all shares under share-based compensation awards were excluded from the calculation of loss from continuing operations attributable to OM Group, Inc. common stockholders assuming dilution and net loss attributable to OM Group, Inc. common stockholders assuming dilution.

Note 14 — Share-Based Compensation

On May 8, 2007, the stockholders of the Company approved the 2007 Incentive Compensation Plan (the "2007 Plan"). Under the 2007 Plan, the Company may grant stock options, stock appreciation rights, restricted stock awards and

phantom stock and restricted stock unit awards to selected employees and non-employee directors. The 2007 Plan also provides for the issuance of common stock to non-employee directors as all or part of their annual compensation for serving as directors, as may be determined by the board of directors. The total number of shares of common stock

Table of Contents

available for awards under the 2007 Plan (including any annual stock issuances made to non-employee directors) is 3,000,000. The 2007 Plan provides that no more than 1,500,000 shares of common stock may be the subject of awards that are not stock options or stock appreciation rights. In addition, no more than 250,000 shares of common stock may be awarded to any one person in any calendar year, whether in the form of stock options, restricted stock or another form of award. The 2007 Plan provides that all options granted must have an exercise price of not less than the per share fair market value on the date of grant and that no option may have a term of more than ten years. The Company satisfies stock option exercises and restricted stock awards through the issuance of authorized but unissued shares or treasury shares.

Set forth below is a summary of share-based compensation expense for option grants, restricted stock awards and restricted stock unit awards included as a component of Selling, general and administrative expenses in the Statements of Consolidated Operations for the year ended December 31 (in thousands):

	2012	2011	2010
Stock options and restricted stock awards	\$5,023	\$6,130	\$5,082
Restricted stock unit awards	212	51	363
Share-based compensation expense - employees	\$5,235	\$6,181	\$5,445

Share-based compensation expense - non-employee directors	\$525	\$380	\$260
---	-------	-------	-------

No tax benefit for share-based compensation was realized during 2012, 2011 or 2010 as a result of the valuation allowance against U.S. deferred tax assets.

At December 31, 2012, there was \$6.1 million of unrecognized compensation expense related to unvested share-based awards. That cost is expected to be recognized as follows: \$4.0 million in 2013, \$2.0 million in 2014 and \$0.1 million in 2015 as a component of Selling, general and administrative expenses. Unearned compensation expense is recognized over the vesting period for the particular grant. Total unrecognized compensation cost will be adjusted for future changes in actual and estimated forfeitures, updated vesting assumptions for the performance awards, and fluctuations in the fair value of restricted stock unit awards.

Non-employee directors of the Company are paid a portion of their annual retainer in unrestricted shares of common stock. For purposes of determining the number of shares of common stock to be issued, the 2007 Plan provides that shares are to be valued at the average of the high and low sale price of the Company's common stock on the NYSE on the last trading date of the quarter. Pursuant to this plan, the Company issued 23,752 shares in 2012, 10,239 shares in 2011 and 8,458 shares in 2010 to non-employee directors.

Stock Options

Options granted generally vest in equal increments over a three-year period from the grant date. Upon any change in control of the Company, as defined in the applicable plan, or upon death, disability or retirement, the stock options become 100% vested and exercisable. The Company accounts for options that vest over more than one year as one award and recognizes expense related to those awards on a straight-line basis over the vesting period.

During 2012, 2011 and 2010 the Company granted stock options to purchase 238,319, 217,489 and 243,050 shares of common stock, respectively. Included in the 2012 and 2011 grants are stock options to purchase 4,419 and 5,289 shares of common stock with a vesting period of one year, which were granted to the Company's Chief Executive Officer ("CEO") in connection with achievement of financial performance criteria in 2011 and 2010 under the Company's high-performance incentive plan.

The fair value of options was estimated at the date of grant using a Black-Scholes options pricing model with the following weighted-average assumptions:

	2012	2011	2010	
Risk-free interest rate	1.1	% 2.7	% 2.7	%
Dividend yield	—	—	—	
Volatility factor of Company common stock	55	% 56	% 58	%
Weighted-average expected option term (years)	6	6	6	

Weighted-average grant-date fair value	\$15.29	\$19.93	\$17.24
--	---------	---------	---------

63

Table of Contents

The risk-free interest rate assumption is based upon the U.S. Treasury yield curve appropriate for the term of the options being valued. The dividend yield assumption is zero, as the Company intends to continue to retain earnings for use in the operations of the business and does not anticipate paying dividends in the foreseeable future. Expected volatilities are based on historical volatility of the Company's common stock. The expected term of options granted is determined using the simplified method allowed by Staff Accounting Bulletin ("SAB") No. 110 as historical data was not sufficient to provide a reasonable estimate. Under this approach, the expected term is presumed to be the mid-point between the vesting date and the end of the contractual term.

The following table sets forth the number of option shares and weighted-average grant-date fair value:

	Shares	Weighted-Average Fair Value at Grant Date
Non-vested at December 31, 2010	397,914	\$ 17.07
Granted during 2011	217,489	19.93
Vested during 2011	(183,642) 18.63
Forfeited during 2011	(8,016) 18.17
Non-vested at December 31, 2011	423,745	18.17
Granted during 2012	238,319	15.29
Vested during 2012	(205,087) 16.85
Forfeited during 2012	(15,852) 19.03
Non-vested at December 31, 2012	441,125	\$ 17.20

A summary of the Company's stock option activity for 2012 is as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2012	1,235,197	\$35.95		
Granted	238,319	15.29		
Exercised	—	—		
Expired unexercised	(66,698) 38.04		
Forfeited	(15,852) 33.85		
Outstanding at December 31, 2012	1,390,966	\$34.81	5.93	\$409
Vested or expected to vest at December 31, 2012	1,376,265	\$34.84	5.90	\$409
Exercisable at December 31, 2012	949,509	\$36.20	4.74	\$399

The fair value of options that vested during 2012, 2011 and 2010 was \$3.5 million, \$3.4 million and \$3.6 million, respectively. No stock options were exercised in 2012. The intrinsic value of the options exercised in 2011 and 2010 was \$0.1 million and \$2.2 million, respectively. The intrinsic value of an option represents the amount by which the market value of the stock exceeds the exercise price of the option.

The Company received cash payments of \$0.4 million and \$4.1 million in 2011 and 2010, respectively, in connection with the exercise of stock options previously granted. The Company does not settle stock options for cash.

Restricted Stock

The Company issues restricted stock and, beginning in 2012, issues stock-settled restricted stock units to its employees in the U.S. ("Restricted Stock," and "US-Based RSUs," respectively). The Company issues restricted stock units to employees outside the U.S. ("International RSUs"). Certain of the Restricted Stock, US-Based RSUs, and International RSU awards contain time-based vesting conditions and certain of the awards contain performance-based vesting conditions.

The Restricted Stock and US-Based RSU awards are in all cases settled in the Company's common stock. The value of the Restricted Stock and US-Based RSU awards are based upon the market price of an unrestricted share of the Company's common stock at the date of grant. The Company recognizes compensation expense ratably over the requisite performance period based upon the number of awards that are anticipated to vest. The number of awards

Table of Contents

anticipated to vest is evaluated quarterly and compensation expense is adjusted accordingly. The Company may withhold shares issued upon vesting if directed by individual employees as a means of meeting minimum statutory tax withholding requirements. The surrendered shares are held by the Company as treasury stock.

The International RSUs are settled in a cash payment that is based on the market price of an unrestricted share of the Company's common stock at the vesting date. Since the awards will be settled in cash, they are treated as a liability award in accordance with the "Stock Compensation" topic of the ASC and are presented as a component of Other non-current liabilities on the Consolidated Balance Sheets. During the vesting period the Company remeasures the fair value of the International RSUs at each reporting date until the award is settled. Fluctuations in the fair value of the International RSUs are recorded as increases or decreases to compensation expense. Over the life of these awards, the cumulative amount of compensation expense recognized will match the actual cash paid.

Performance-Based Awards

During 2012, 2011 and 2010, the Company awarded 130,500, 117,770 and 121,700 shares, respectively, of performance-based Restricted stock to U.S. employees and 33,450, 31,125, and 19,850 performance-based International RSUs, respectively, to employees outside the U.S. (collectively "Performance-Based Awards").

The number of Performance-Based Awards that ultimately vest is based upon the Company's achievement of specific measurable financial performance criteria. A recipient of Performance-Based Awards may earn a total award ranging from 0% to 100% of the initial grant, with target being 50% of the initial grant. The Performance-Based Awards granted during 2012 and 2011 will vest upon the satisfaction of established performance criteria based on consolidated EBITDA margin percentage (defined as adjusted operating profit plus depreciation and amortization expense divided by net sales) percentage and average return on net assets, in each case over a three-year performance period ending December 31, 2014 and 2013, respectively.

The performance period for Performance-Based Awards granted during 2010 ended on December 31, 2012. These awards were based on the achievement of consolidated EBITDA margin percentage (as defined above) measured against a predetermined peer group, and average return on net assets, in each case over three-year performance periods ending December 31, 2012. Based upon the Company's performance against the stated performance objectives, 0.8% of the Performance-Based Awards granted in 2010 remain available to vest, or roughly 890 shares of Restricted Stock and 150 International RSUs. Vesting is conditional on approval from the Compensation Committee that the performance objectives were satisfied. The Compensation Committee makes this determination in the first quarter of 2013.

Upon any change in control of the Company, as defined in the plan, or upon retirement, the Performance-Based Awards become vested at the target level. In the event of death or disability, a pro rata number of Performance-Based Awards shall remain eligible for vesting at the end of the performance period.

A summary of the Company's Performance-Based Awards for 2012 is as follows:

	Restricted Stock Units	Shares of Restricted Stock	Weighted Average Grant Date Fair Value
Non-vested at January 1, 2012	67,435	312,050	\$29.78
Granted	33,450	130,500	30.11
Vested	(335)) —	—
Forfeited	(18,161)) (101,340)) 21.85
Non-vested at December 31, 2012	82,389	341,210	\$32.26
Expected to vest as of December 31, 2012	8,411	31,158	

Edgar Filing: OM GROUP INC - Form 10-K

For awards granted prior to 2010, the following performance-based shares vested and were issued for the year ended December 31:

	2012	2011	2010
Vested based on meeting performance criteria	—	1,773	74,676
Shares surrendered to pay withholding taxes	—	(578) (26,651
Net shares issued	—	1,195	48,025

65

Table of Contents

Time-Based Awards

During 2012, 2011 and 2010, the Company awarded 87,150 time-based US-Based RSUs, and 60,825, and 63,100 shares of time-based Restricted Stock, respectively (collectively "US Time-Based Awards"). In addition, during 2012 and 2011, the Company awarded 2,177 and 2,767 shares of US Time-Based Awards with a vesting period of one year to its CEO in connection with achievement of financial performance criteria under the Company's high-performance annual incentive program. The value of the restricted stock units and restricted stock awarded in 2012, 2011 and 2010, based upon the market price of an unrestricted share of the Company's common stock at the date of grant, was \$2.6 million, \$2.3 million and \$1.9 million, respectively. During 2012, 2011 and 2010, the Company also awarded 17,060, 9,095, and 10,550 Time-Based International RSUs, respectively.

The US Time-Based Awards and Time-Based International RSUs have similar terms and vest three years from the date of grant, subject to the recipient remaining employed by the Company on that date. Upon any change in control of the Company, as defined in the plan, or upon retirement, the Time-Based Awards become become 100% vested. A pro rata number of Time-Based Awards will vest in the event of death or disability prior to the stated vesting date. A summary of the Company's Time-Based awards for 2012 is as follows:

	Time-Based International RSUs	Shares of US Time-Based Awards	Weighted Average Grant Date Fair Value - US Time-Based Awards
Non-vested at January 1, 2012	22,145	145,122	\$31.59
Granted - three year vesting	17,060	87,150	28.51
Granted - one year vesting	—	2,177	30.21
Vested	(3,600) (24,867) 21.94
Forfeitures	(100) (10,945) 31.01
Non-vested at December 31, 2012	35,505	198,637	\$31.46
Expected to vest as of December 31, 2012	33,456	195,605	

The following US Time-Based Awards vested and were issued in the respective years ended December 31:

	2012	2011	2010
Vested - three year vesting period	22,100	15,575	22,760
Vested -one year vesting period	2,767	—	4,127
Shares surrendered to pay withholding taxes	(8,538) (5,023) (9,233
Net shares issued	16,329	10,552	17,654

Note 15 — Commitments and Contingencies

In March 2009, GTL was served in Jersey, Channel Islands, with an injunction seeking to enforce two arbitration awards made in 2003 by an arbitral tribunal operating under the auspices of the International Court of Arbitration against the DRC and Société Nationale D'Electricité for \$108.3 million (the "Arbitration Awards"). One of the terms of the injunction prohibited GTL from making payments to Gécamines, a minority partner in GTL, including amounts payable for raw material purchases. In October 2010, GTL was served in Jersey, Channel Islands, with a second injunction which restrains Gécamines from removing any of its assets from the island of Jersey up to the amount of 14.5 million British Pounds, pending the resolution of other proceedings against Gécamines. In both matters, payments which would typically have been made by the Company to Gécamines were instead placed on deposit with the Royal Court of Jersey (Court). At December 31, 2011, our Consolidated Balance Sheet included Restricted cash on deposit, and Liability related to joint venture partner injunction, of \$92.8 million.

The first injunction was resolved and the related funds were released during the third quarter of 2012. As of December 31, 2012, \$22.8 million related to the second injunction remained on deposit with the Court and was recorded as Restricted cash on deposit and Liability related to joint venture partner injunction in the Consolidated Balance Sheets. In January 2013, the case related to the second injunction was dropped, and remaining funds on deposit with the Court were released on February 13, 2013. Upon receipt of final documentation, funds will be released by GTL to Gécamines.

Table of Contents

We have potential contingent liabilities with respect to environmental matters related to its former operations in Brazil and Germany which were sold in 2003. Environmental-cost sharing arrangements are in place between the original owner and operator of these operations, the Company and the subsequent purchaser of these operations. We have reviewed the limited information made available to us on the environmental conditions and are awaiting more detailed information from the purchaser. We cannot currently evaluate whether or not, or to what extent, we will be responsible for any remediation costs until more detailed information is received.

From time to time, we are subject to various legal and regulatory proceedings, claims and assessments that arise in the normal course of business. The ultimate resolution of such proceedings, claims and assessments is inherently unpredictable and, as a result, the Company's estimates of liability, if any, are subject to change and actual results may materially differ from such estimates. Our estimate of any costs to be incurred as a result of these proceedings, claims and assessments are accrued when the liability is considered probable and the amount can be reasonably estimated.

We believe the amount of any potential liability with respect to legal and regulatory proceedings, claims and assessments will not have a material adverse effect upon our financial condition, results of operations, or cash flows.

Note 16 — Lease Obligations

The Company rents office space, equipment, land and an airplane under long-term operating leases. The Company's operating lease expense was \$9.6 million in 2012, \$10.7 million in 2011 and \$8.8 million in 2010.

Future minimum payments under noncancellable operating leases at December 31, 2012 are as follows for the year ending December 31:

2013	\$7,398
2014	4,885
2015	3,748
2016	2,923
2017	2,719
Thereafter	4,217
Total minimum lease payments	\$25,890

Note 17 — Reportable Segments and Geographic Information

The Company determines its segments based on how the chief operating decision maker makes decisions about allocating resources to segments and measuring their performance. The Company operates and reports its results in four operating segments: Magnetic Technologies, Battery Technologies, Specialty Chemicals and Advanced Materials. Intersegment transactions are generally recognized based on current market prices and are eliminated in consolidation. Corporate is comprised of general and administrative expenses not allocated to the operating segments.

The Magnetic Technologies segment is engaged in the development, manufacturing and distribution of industrial-use magnetic products and systems for electronic equipment markets, including the renewable energy, automotive systems, construction & mining and industrial sectors.

The Battery Technologies segment provides advanced batteries, battery management systems, battery-related research and energetic devices for defense, aerospace and medical markets.

The Specialty Chemicals segment develops, produces and supplies chemicals for electronic and industrial applications, and photomasks used by customers to produce semiconductors and related products.

The Advanced Materials segment manufactures inorganic products using unrefined cobalt and other metals and serves the mobile energy storage, renewable energy, automotive systems, construction and mining, and industrial end markets.

There are a limited number of supply sources for rare earth materials and cobalt. Production problems, incurred demand, and instability in some supplier countries may affect supply and market price of these materials.

(a) Net sales attributed to the geographic area are based on the location of the manufacturing facility, except for Japan, which is a sales office.

(b) Long-lived assets consists of property, plant and equipment, net.

Note 18 — Quarterly Results of Operations (Unaudited)

In August 2011, the Company completed the acquisition of VAC and formed the Magnetic Technologies segment for that business. In the Fourth Quarter of 2012, the Company, as a result of enhancing its financial planning and analysis efforts, discovered that a portion of Magnetic Technologies' Cost of goods sold were misclassified in Selling, general and administrative expenses ("SG&A") since the acquisition when the business converted the basis of its financial reporting from International Financial Reporting Standards to US GAAP. The Company corrected the classification of these expenses by restating its Quarterly Reports on Form 10-Q filed during 2012. The reclassification has no impact on previously-reported net sales, operating profit, net income, or net income per share on the Company's Condensed Statements of Consolidated Operations, nor does it have any effect on the Company's previously-reported Condensed Consolidated Balance Sheets, Statements of Consolidated Comprehensive Income (Loss), Condensed Statements of Consolidated Cash Flows, Condensed Statements of Consolidated Total Equity or segment net sales and operating profit. The Company has evaluated the error for the period ending December 31, 2011 in accordance with Staff Accounting Bulletin (SAB) 99, SAB 108 and Accounting Standards Codification (ASC) 250 and determined that the impact of the misclassification in 2011 is not material. The Company made correction of the amounts related to this misstatement for 2011 in this Annual Report for 2012.

Table of Contents

The third quarter of 2011 includes a pre-tax gain of \$9.7 million recognized on the sale of land and a \$3.4 million discrete tax benefit (excluding noncontrolling interests) to reduce the allowance against GTL's prepaid tax asset. Acquisition-related charges, including purchase accounting charges related to inventory, acquisition fees and severance charges, were \$4.0 million, \$104.7 million and \$17.9 million in the second, third and fourth quarter of 2011, respectively.

Note 19 - Subsequent Events

On January 21, 2013, the Company and certain of its affiliates, entered into a definitive Asset and Stock Purchase Agreement (the "Purchase Agreement") with Freeport-McMoRan Corporation and Koblotti Chemical Holdings Limited to divest the downstream portion of the business of its Advanced Materials segment for an aggregate purchase price of approximately \$325 million in cash at closing, plus a potential earn-out payment over three years of up to \$110 million in cash based on the acquired business achieving certain revenue levels. An agreement providing for the transfer of the Company's shares in the Congo-based GTL joint venture to the other GTL partners was also signed and will be effective upon closing of the transaction. Due to the uncertain value of the three year earn-out payment, the Company cannot determine the financial impact of this transaction at this time. The net asset value associated with the transactions was approximately \$390 million at December 31, 2012.

The closing purchase price for the Freeport-McMoRan deal is subject to a customary working capital adjustment. The Purchase Agreement provides for customary representations, warranties, covenants and agreements, including, among others, that each party will use reasonable best efforts to complete the transactions expeditiously.

The closing of the transaction is expected to occur before the end of April 2013 subject to the expiration or termination of any waiting period under certain antitrust filings and the satisfaction or waiver of other customary closing conditions.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There are no such changes or disagreements.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of December 31, 2012. As defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"), disclosure controls and procedures are controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported on a timely basis, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Our disclosure controls and procedures include components of our internal control over financial reporting.

Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were not effective as of December 31, 2012, due solely to the material weakness in the Company's internal control over financial reporting as described below in "Management's Report on Internal Control over Financial Reporting." In light of this material weakness, the Company performed additional analysis as deemed necessary to ensure that the consolidated financial statements were prepared in accordance with U.S. generally accepted accounting principles. Accordingly, management believes that the consolidated financial statements included in this report present fairly in all material respects the Company's financial position, results of operations and cash flows for the period presented.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision of the Chief Executive Officer and Chief Financial Officer, management conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2012 based on the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in "Internal Control-Integrated Framework". Based on that evaluation, management has concluded that the Company's internal control over financial reporting was not effective as of December 31, 2012 solely as a result of the following material weakness:

Table of Contents

The Company did not maintain effective controls over its classification of SG&A expenses and Cost of goods sold on its Statements of Consolidated Operations of the VAC business, which comprises the Company's Magnetic Technologies segment.

The Company's independent registered public accounting firm, Ernst & Young LLP, audited the Company's internal control over financial reporting and, based on that audit, issued an attestation report regarding the Company's internal control over financial reporting, which is included in this Annual Report.

Changes in Internal Controls

Since acquiring VAC, the Company has been reviewing and assessing VAC's internal controls and disclosure processes to fully integrate the VAC business into the Company's existing control environment by the end of the twelve month exception period. In the fourth quarter of 2012, as a result of enhancing its financial planning and analysis efforts, the Company discovered that a portion of Magnetic Technologies' costs were consistently misclassified beginning in the third quarter of 2011, when the business was acquired and converted the basis of its financial reporting from International Financial Reporting Standards to U.S. GAAP. Solely as a result of this misclassification, we concluded that our disclosure controls and procedures were not effective as of March 31, 2012, June 30, 2012, and September 30, 2012. Management corrected these misclassifications by amending its previously filed Form 10-Qs for 2012. It was determined that the impact of the misclassification in 2011 is not material. We made correction of the amounts related to this misstatement for 2011 in this Annual Report for 2012.

Subsequent to December 31, 2012, we believe that we have fully remediated the material weakness in our internal control over financial reporting with respect to the account mapping between Cost of goods sold and SG&A expenses within the Magnetic Technologies segment before the filing of this Form 10-K. The remedial actions included:

- Examination of the underlying financial records to determine the proper classification of operating costs into cost of goods sold and SG&A expenses.

- The implementation of a reconciliation of the components of overhead capitalized into inventory and expenses reported into costs of goods sold accumulated from our Magnetic Technologies' ERP system.

- Enhanced analysis of gross margins and SG&A expenses as a percentage of sales at our Magnetic Technologies business.

There were no other changes in the Company's internal control over financial reporting in connection with the Company's fourth quarter 2012 evaluation that would materially affect, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

Table of Contents

PART III

Item 10. Directors, Executive Officers of the Registrant and Corporate Governance

Information with respect to directors of the Company will be set forth under the heading “Proposal 1. Election of Directors” in the Company’s proxy statement to be filed pursuant to Regulation 14A under the Exchange Act in connection with the 2013 Annual Meeting of Stockholders of the Company (the “2013 Proxy Statement”) and is incorporated herein by reference. For information with respect to the executive officers of the Company, see “Executive Officers of the Registrant” in Part I of this Form 10-K.

Information with respect to the Company’s audit committee, nominating and governance committee, compensation committee and the audit committee financial experts will be set forth in the 2013 Proxy Statement under the heading “Corporate Governance and Board Matters” and is incorporated herein by reference.

Information with respect to compliance with Section 16(a) of the Exchange Act will be set forth in the 2013 Proxy Statement under the heading “Section 16(a) Beneficial Ownership Reporting Compliance” and is incorporated herein by reference.

The Company has adopted a Code of Conduct and Ethics that applies to all of its employees, including the principal executive officer, the principal financial officer and the principal accounting officer. The Code of Conduct and Ethics, the Company’s corporate governance principles and all committee charters are posted on the “Corporate Governance” portion of the Company’s website (www.omgi.com). A copy of any of these documents is available in print free of charge to any stockholder who requests a copy, by writing to OM Group, Inc., 127 Public Square, 1500 Key Tower, Cleveland, Ohio 44114-1221 USA, Attention: Rob Pierce, Vice President, Finance.

On June 4, 2012, the Company filed the annual certification by its CEO that, as of the date of the certification, he was unaware of any violation by the Company of the corporate governance listing standards of the New York Stock Exchange.

Item 11. Executive Compensation

Information with respect to executive and director compensation and compensation committee interlocks and insider participation, together with the report of the compensation committee regarding the compensation discussion and analysis will be set forth in the 2013 Proxy Statement under the headings “Executive Compensation,” “Corporate Governance and Board Matters — Compensation Committee Interlocks and Insider Participation” and “Compensation Committee Report” and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information with respect to security ownership of certain beneficial owners and management will be set forth in the 2013 Proxy Statement under the heading “Security Ownership of Directors, Executive Officers and Certain Beneficial Owners — Beneficial Ownership” and is incorporated herein by reference.

Equity Compensation Plan Information

The following table sets forth information concerning common stock issuable pursuant to the Company’s equity compensation plans as of December 31, 2012.

	Number of securities to be issued upon exercise of outstanding options	Weighted-average exercise price of outstanding options	Number of securities remaining available for future issuance under equity compensation plans (excluding securities issuable under outstanding options)
Equity Compensation Plans Approved by the Stockholders	1,301,752	\$34.93	1,101,934
