ITEM 1 – BUSINESS

INTRODUCTION

Titan International, Inc. and its subsidiaries (Titan or the Company) hold the unique position in North America of manufacturing both wheels and tires for its target markets. As a leading manufacturer in the off-highway industry, Titan produces a broad range of specialty products to meet the specifications of original equipment manufacturers (OEMs) and aftermarket customers in the agricultural, earthmoving/construction and consumer markets. Titan's earthmoving/construction market includes wheels and tires supplied to the mining industry, while the consumer market includes bias truck tires in Latin America, products for all-terrain vehicles (ATVs) and recreational/utility trailers.

As one of the few companies dedicated to off-highway wheel and tire products, Titan's engineering and manufacturing resources are focused on designing quality products that address the needs of our end-users. Titan's team of experienced engineers continually works on new and improved engineered products that evolve with today's applications for the off-highway wheel and tire markets.

History

Titan traces its roots to the Electric Wheel Company in Quincy, Illinois, which was founded in 1890. The Company was incorporated in 1983. The Company has grown through three major acquisitions in recent years. In 2005, Titan Tire Corporation, a subsidiary of the Company, acquired The Goodyear Tire & Rubber Company's North American farm tire assets. In 2006, Titan Tire Corporation of Bryan, a subsidiary of the Company, acquired the off-the-road (OTR) tire assets of Continental Tire North America, Inc. In April 2011, the Company acquired the The Goodyear Tire & Rubber Company's Latin American farm tire business. These acquisitions have allowed Titan to achieve higher sales levels and enhance product offering in the Company's target markets.

Market Sales

In 2011, Titan's agricultural market sales represented 64% of net sales, the earthmoving/construction market represented 21% and the consumer market represented 15% of net sales. For information concerning the revenues, certain expenses, income from operations and assets attributable to each of the segments in which the Company operates, see Note 29 to the consolidated financial statements of Titan, included in Item 8 herein.

COMPETITIVE STRENGTHS

Titan's strong market position in the off-highway wheel and tire market and its long-term core customer relationships contribute to the Company's competitive strengths. These strengths, along with Titan's dedication to the off-highway wheel and tire market, continue to drive the Company forward.

Strong Market Position

Titan's ability to offer a broad range of specialized wheels, tires and assemblies has resulted in the Company's strong position in the domestic off-highway market. Through a diverse dealer network, the Company is able to reach an increasing number of customers in the aftermarket and build Titan's image and brand recognition. The Company's acquisition of the Goodyear Farm Tire brand in North America and Latin America contributes to overall visibility and customer confidence. Years of product design and engineering experience have enabled Titan to improve existing products and develop new ones that have been well received in the marketplace. In addition, Titan believes it has benefited from significant barriers to entry, such as the substantial investment necessary to replicate the Company's manufacturing equipment and numerous tools, dies and molds, many of which are used in custom processes.

Long-Term Core Customer Relationships

The Company's top customers, including global leaders in agricultural and construction equipment manufacturing, have been purchasing products from Titan or its predecessors for numerous years. Customers including AGCO Corporation, CNH Global N.V., Deere & Company and Kubota Corporation have helped sustain Titan's leadership in wheel, tire and assembly innovation.

BUSINESS STRATEGY

Titan's business strategy is to continue its growth into the giant OTR market, increase its presence in the tire aftermarket, continue to improve operating efficiencies, maintain emphasis on new product development and explore additional strategic acquisitions.

Giant Mining Tire Product

The Company's 2006 acquisition of the OTR tire assets of Continental Tire North America, Inc. in Bryan, Ohio, expanded Titan's product offering into larger earthmoving, construction and mining tires. The Company subsequently expanded the Bryan facility production capacity to include giant mining tires. The mining tire market currently offers attractive opportunities and the Company is expanding capacity to help meet the growing demand for these giant tires. The "Big Daddy" giant tire is approximately 13 feet tall and weighs in at approximately 12,500 pounds.

Increase Aftermarket Tire Business

The Company has concentrated on increasing its presence in the tire aftermarket, which historically has tended to be somewhat less cyclical than the OEM market. The aftermarket also offers the potential for higher profit margins and is larger in most cases.

Improve Operating Efficiencies

The Company continually works to improve the operating efficiency of its assets and manufacturing facilities. Titan integrates each facility's strengths, which may include transferring equipment and business to the facilities that are best equipped to handle the work. This provides capacity to increase utilization and spread operating costs over a greater volume of products. Titan is also continuing a comprehensive program to refurbish, modernize and enhance the computer technology of its manufacturing equipment.

Enhance Design Capacity and New Product Development

Equipment manufacturers constantly face changing industry dynamics. Titan directs its business and marketing strategy to understand and address the needs of its customers and demonstrate the advantages of its products. In particular, the Company often collaborates with customers in the design of new and enhanced products. Titan recommends modified products to its customers based on its own market information. These value-added services enhance Titan's relationships with its customers. The Company tests new designs and technologies and develops methods of manufacturing to improve product quality and performance. Titan's engineers have introduced designs for giant mining wheels and tires, which employ an innovative steel radial construction technology, new to the OTR tire industry, to enhance performance and durability.

Explore Additional Strategic Acquisitions

The Company's expertise in the manufacture of off-highway wheels and tires has permitted it to take advantage of opportunities to acquire businesses that complement this product line, including companies engaged in the tire market and companies that have wheel and tire assembly capabilities. In the future, Titan may make additional strategic acquisitions of businesses that have an off-highway focus. The Company is currently exploring worldwide opportunities to expand manufacturing and distribution into new geographies.

AGRICULTURAL MARKET

Titan's agricultural rims, wheels and tires are manufactured for use on various agricultural and forestry equipment, including tractors, combines, skidders, plows, planters and irrigation equipment, and are sold directly to OEMs and to the aftermarket through independent distributors, equipment dealers and Titan's own distribution centers. The wheels and rims range in diameter from 9 to 54 inches, with the 54-inch diameter being the largest agricultural wheel manufactured in North America. Basic configurations are combined with distinct variations (such as different centers and a wide range of material thickness) allowing the Company to offer a broad line of products to meet customer specifications. Titan's agricultural tires range from approximately 1 foot to approximately 7 foot in outside diameter

and from 5 to 44 inches in width. The Company offers the added value of delivering a complete wheel and tire assembly to customers.

EARTHMOVING/CONSTRUCTION MARKET

The Company manufactures rims, wheels and tires for various types of OTR earthmoving, mining, military and construction equipment, including skid steers, aerial lifts, cranes, graders and levelers, scrapers, self-propelled shovel loaders, articulated dump trucks, load transporters, haul trucks and backhoe loaders. The earthmoving/construction market is often referred to as OTR, an acronym for off-the-road. The Company provides OEM and aftermarket customers with a broad range of earthmoving/construction wheels ranging in diameter from 20 to 63 inches and in weight from 125 pounds to 7,000 pounds. The 63-inch diameter wheel is the largest manufactured in North America for the earthmoving/construction market. Titan's earthmoving/construction tires range from approximately 3 feet to approximately 13 feet in outside diameter and in weight from 50 pounds to 12,500 pounds. The Company offers the added value of wheel and tire assembly for certain applications in the earthmoving/construction market.

CONSUMER MARKET

Titan manufactures bias truck tires in Latin America, provides wheels and tires and assembles brakes, actuators and components for the domestic boat, recreational and utility trailer markets. Titan also offers select products for ATVs, turf, and golf car applications. Likewise, Titan produces a variety of tires for the consumer market.

	\$1,486,998		\$881,591		\$727,599	

MARKET CONDITIONS OUTLOOK

In 2011, Titan experienced significantly higher sales than 2010. The higher sales were primarily the result of increased demand and price increases in all of the Company's segments, as well as additional sales resulting for the acquisition of Goodyear's Latin American farm tire business and accompanying supply agreements. For 2012, the Company expects sales to continue at strong levels.

OPERATIONS

Titan's operations include manufacturing wheels, manufacturing tires, and combining these wheels and tires into assemblies for use in the agricultural, earthmoving/construction and consumer markets. These operations entail many manufacturing processes in order to complete the finished products.

Wheel Manufacturing Process

Most agricultural wheels are produced using a rim and a center disc. A rim is produced by first cutting large steel sheets to required width and length specifications. These steel sections are rolled and welded to form a circular rim, which is flared and formed in the rollform operation. The majority of discs are manufactured using presses that both blank and form the center to specifications in multiple stage operations. The Company e-coats wheels using a multi-step process prior to the final paint top coating.

Large earthmoving/construction steel wheels are manufactured from hot and cold-rolled steel sections. Hot-rolled sections are generally used to increase cross section thickness in high stress areas of large diameter wheels. A special cold forming process for certain wheels is used to increase cross section thickness while reducing the number of wheel components. Rims are built from a series of hoops that are welded together to form a rim base. The complete rim base is made from either three or five separate parts that lock together after the rubber tire has been fitted to the wheel and inflated.

For most consumer market wheels, the Company manufactures rims and center discs from steel sheets. Rims are rolled and welded, and discs are stamped and formed from the sheets. The manufacturing process then entails welding the rims to the centers and painting the assembled product.

Tire Manufacturing Process

The first stage in tire production is the mixing of rubber, carbon black and chemicals to form various rubber compounds. These rubber compounds are then extruded and processed with textile or steel materials to make specific components. These components – beads (wire bundles that anchor the tire with the wheel), plies (layers of fabric that give the tire strength), belts (fabric or steel fabric wrapped under the tread in some tires), tread and sidewall – are then

assembled into an uncured tire carcass. The uncured carcass is placed into a press that molds and vulcanizes the carcass under set time, temperature and pressure into a finished tire.

Wheel and Tire Assemblies

The Company's position as a manufacturer of both wheels and tires allows Titan to mount and deliver one of the largest selections of off-highway assemblies in North America. Titan offers this value-added service of one-stop shopping for wheel and tire assemblies for the agricultural, earthmoving/construction and consumer markets. Customer orders are entered into the Company's system either through electronic data interchange or manually. The appropriate wheel-tire assembly delivery schedule is established based on each customer's requirements and products are received by the customer on a just-in-time basis.

Quality Control

The Company is ISO certified at all six main manufacturing facilities located in Bryan, Ohio; Des Moines, Iowa; Freeport, Illinois; Quincy, Illinois; Saltville, Virginia; and Sao Paulo, Brazil. The ISO series is a set of related and internationally recognized standards of management and quality assurance. The standards specify guidelines for establishing, documenting and maintaining a system to ensure quality. The ISO certifications are a testament to Titan's dedication to providing quality products for its customers.

RAW MATERIALS

Steel and rubber are the primary raw materials used by the Company in all segments. To ensure a consistent steel supply, Titan purchases raw steel from key steel mills and maintains relationships with steel processors for steel preparation. The Company is not dependent on any single producer for its steel supply. Rubber and other raw materials for tire manufacture represent some of the Company's largest commodity expenses. Titan buys rubber in markets where there are usually several sources of supply. In addition to the development of key domestic suppliers, the Company's strategic procurement plan includes international steel and rubber suppliers to assure competitive price and quality in the global marketplace. As is customary in the industry, the Company does not have long-term contracts for the purchase of steel or rubber and, therefore, purchases are subject to price fluctuations.

CAPITAL EXPENDITURES

Capital expenditures for 2011, 2010 and 2009 were \$35.7 million, \$28.9 million and \$39.5 million, respectively. The capital expenditures in each year were used primarily for updating manufacturing equipment, expanding manufacturing capacity and for further automation at the Company's facilities. Capital expenditures for 2012 are forecasted to be approximately \$50 million. These capital expenditures are anticipated to be used to expand capacity and enhance the Company's existing facilities and manufacturing capabilities.

PATENTS, TRADEMARKS AND ROYALTIES

The Company owns various patents and trademarks and continues to apply for patent protection for new products. While patents are considered significant to the operations of the business, at this time Titan does not consider any one of them to be of such importance that the patent's expiration or invalidity could materially affect the Company's business. However, due to the difficult nature of predicting the interpretation of patent laws, the Company cannot anticipate or predict the material adverse effect on its operations, cash flows or financial condition as a result of associated liabilities created under such patent interpretations.

The Company has a trademark license agreement with The Goodyear Tire & Rubber Company to manufacture and sell certain off-highway tires in North America and Latin America under the Goodyear name. The North American and Latin American royalties were prepaid for seven years as a part of the Goodyear Latin American farm tire acquisition.

MARKETING AND DISTRIBUTION

The Company employs an internal sales force and utilizes several manufacturing representative firms for sales in North America and Latin America. Sales representatives are primarily organized within geographic regions.

Titan distributes wheels and tires directly to OEMs. The distribution of aftermarket tires occurs primarily through a network of independent and OEM-affiliated dealers. The Company distributes wheel and tire assemblies directly to OEMs and aftermarket customers through its distribution network consisting of facilities in the United States and Latin America.

SEASONALITY

Agricultural equipment sales are seasonal by nature. Farmers generally order equipment to be delivered before the growing season. Shipments to OEMs in the U.S. usually peak during the Company's first and second quarters for the spring planting period. Earthmoving/construction and consumer markets also historically tend to experience higher demand in the first and second quarters. These markets are affected by mining, building and economic conditions.

RESEARCH, DEVELOPMENT AND ENGINEERING

The Company's research, development and engineering staff tests original designs and technologies and develops new manufacturing methods to improve product performance. These services enhance the Company's relationships with its customers. Titan's engineers have introduced designs for giant OTR tires. These giant tires employ an innovative steel radial construction technology, new to the OTR tire industry, to enhance performance and durability. Research and development (R&D) expenses are expensed as incurred. R&D costs were \$4.2 million, \$6.3 million and \$8.9 million for the years of 2011, 2010 and 2009, respectively.

CUSTOMERS

Titan's 10 largest customers accounted for approximately 55% of net sales for the year ended December 31, 2011, compared to approximately 58% for the year ended December 31, 2010. Net sales to Deere & Company in Titan's agricultural, earthmoving/construction and consumer markets combined represented approximately 18% and 26% of the Company's consolidated revenues for the years ended December 31, 2011 and 2010, respectively. Net sales to CNH Global N.V. in Titan's three markets represented approximately 11% and 15% of the Company's consolidated revenues for the years ended December 31, 2011 and 2010, respectively. No other customer accounted for more than 10% of the Company's net sales in 2011 or 2010. Management believes the Company is not totally dependent on any single customer; however, certain products are dependent on a few customers. While the loss of any substantial customer could impact Titan's business, the Company believes that its diverse product mix and customer base may minimize a longer-term impact caused by any such loss.

ORDER BACKLOG

As of January 31, 2012, Titan estimates \$542 million in firm orders compared to \$227 million at January 31, 2011, for the Company's operations. Orders are considered firm if the customer would be obligated to accept the product if manufactured and delivered pursuant to the terms of such orders. The Company believes that the majority of the current order backlog will be filled during the present year.

INTERNATIONAL OPERATIONS

In April of 2011, the Company closed on the acquisition of The Goodyear Tire & Rubber Company's Latin American farm tire business. Subsequent to this transaction, the Company is operating a manufacturing facility in Sao Paulo, Brazil. The Latin American operations recorded approximately 19% of the Company's 2011 sales. The Company also maintains an investment in Titan Europe Plc, which is recorded as an available-for-sale security and reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of comprehensive income in stockholders' equity. The Company's stock ownership interest in Titan Europe Plc was 21.8% at December 31, 2011 and 22.9% at December 31, 2010. The fair value of the Company's investment in Titan Europe Plc was \$29.0 million and \$22.7 million at December 31, 2010 and 2009, respectively. Titan Europe Plc is publicly traded on the AIM market in London, England.

EMPLOYEES

At December 31, 2011, the Company employed approximately 3,600 people in the United States and Latin America. Approximately 34% of the Company's employees were covered by a collective bargaining agreement. This 34% is comprised of employees at the Des Moines, Iowa facility, with a collective bargaining agreement that expires in November 2012, and the Brazil facility, with a collective bargaining agreement that expires in May 2012. The labor agreements for the Company's Bryan, Ohio and Freeport, Illinois, facilities expired in November 2010, for the employees covered by their respective collective bargaining agreements, which account for approximately 26% of the Company's employees. As of December 31, 2011, the employees of these two facilities were working without a contract under the terms of the Company's latest offer.

ENVIRONMENTAL LAWS AND REGULATIONS

In the ordinary course of business, like other industrial companies, Titan is subject to extensive and evolving federal, state and local environmental laws and regulations, and has made provisions for the estimated financial impact of environmental cleanup. The Company's policy is to accrue environmental cleanup-related costs of a non-capital nature when those costs are believed to be probable and can be reasonably estimated. Expenditures that extend the life of the related property, or mitigate or prevent future environmental contamination, are capitalized. The Company does not currently anticipate any material capital expenditures for environmental control facilities. The quantification of environmental exposures requires an assessment of many factors, including changing laws and regulations, advances in environmental technologies, the quality of information available related to specific sites, the assessment stage of the

site investigation, preliminary findings and the length of time involved in remediation or settlement. Due to the difficult nature of predicting future environmental costs, the Company cannot anticipate or predict the material adverse effect on its operations, cash flows or financial condition as a result of efforts to comply with, or its liabilities under, environmental laws.

EXPORT SALES

The Company had total aggregate export sales of approximately \$164.4 million, \$80.2 million and \$82.7 million, for the years ended December 31, 2011, 2010 and 2009, respectively.

COMPETITION

The Company competes with several domestic and international companies, some of which are larger and have greater financial and marketing resources than Titan. The Company believes it is a primary source of steel wheels and rims to the majority of its North American customers. Major competitors in the off-highway wheel market include Carlisle Companies Incorporated, GKN Wheels, Ltd., Topy Industries, Ltd. and certain other foreign competitors. Significant competitors in the off-highway tire market include Bridgestone/Firestone, Carlisle Companies Incorporated, Michelin, Pirelli and certain other foreign competitors.

The Company competes primarily on the basis of price, quality, customer service, design capability and delivery time. The Company's ability to compete with international competitors may be adversely affected by currency fluctuations. Titan owns the molds and dies used to produce its wheels and tires. However, certain of the Company's OEM customers could, under individual circumstances, elect to manufacture the Company's products to meet their requirements or to otherwise compete with the Company. There can be no assurance that the Company will not be adversely affected by increased competition in the markets in which it operates, or that competitors will not develop products that are more effective, less expensive or otherwise render certain of Titan's products less competitive. From time to time, certain of the Company's competitors have reduced their prices in particular product categories, which has prompted Titan to reduce prices as well. There can be no assurance that competitors of the Company will not further reduce prices in the future or that any such reductions would not have a material adverse effect on the Company.

PURCHASE OF GOODYEAR'S LATIN AMERICAN FARM TIRE BUSINESS

On April 1, 2011, Titan closed on the acquisition of The Goodyear Tire & Rubber Company's Latin American farm tire business for approximately \$98.6 million U.S. dollars, subject to post-closing conditions and adjustments. The transaction includes Goodyear's Sao Paulo, Brazil manufacturing plant, property, equipment; inventories; a licensing agreement that allows Titan to sell Goodyear-brand farm tires in Latin America for seven years; and extends the North American licensing agreement for seven years.

NEW YORK STOCK EXCHANGE CERTIFICATION

The Company submitted to the New York Stock Exchange during fiscal 2011 the Annual CEO Certification required by Section 303A.12(a) of the New York Stock Exchange Listed Company Manual.

ITEM 1A – RISK FACTORS

The Company is subject to various risks and uncertainties relating to or arising out of the nature of its business and general business, economic, financing, legal and other factors or conditions that may affect the Company. Realization of any of the following risks could have a material adverse effect on Titan's business, financial condition, cash flows and results of operations.

•The Company is exposed to price fluctuations of key commodities.

The Company does not generally enter into long-term commodity contracts and does not use derivative commodity instruments to hedge exposures to commodity market price fluctuations. Therefore, the Company is exposed to price fluctuations of key commodities, which consist primarily of steel and rubber. Although the Company attempts to pass on certain material price increases to its customers, there is no assurance that the Company will be able to do so in the future. Any increase in the price of steel and rubber that is not passed on to customers could have an adverse material effect on Titan's results of operations.

•The Company relies on a limited number of suppliers.

The Company currently relies on a limited number of suppliers for certain key commodities, which consist primarily of steel and rubber, in the manufacturing of Titan products. The loss of key suppliers or their inability to meet price, quality, quantity and delivery requirements could have a significant adverse impact on the Company's results of operations.

•The Company's revolving credit facility and debt obligations contain covenants.

The Company's revolving credit facility and debt obligations contain covenants and restrictions. These covenants and restrictions could limit Titan's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure to meet these items could result in the Company ultimately being in default. Titan's ability to comply with the covenants may be affected by events beyond its control, including prevailing economic, financial and industry conditions.

•The Company operates in cyclical industries and is subject to numerous changes in the economy.

The Company's sales are substantially dependent on three major industries: agricultural equipment, earthmoving/construction equipment and consumer products. The business activity levels in these industries are subject to specific industry and general economic cycles. Any downturn in these industries or the general economy could have an adverse material effect on Titan's business.

The agricultural equipment industry is affected by crop prices, farm income and farmland values, weather, export markets and government policies. The earthmoving/construction industry is affected by the levels of government and private construction spending and replacement demand. The consumer products industry is affected by consumer disposable income, weather, competitive pricing, energy prices and consumer attitudes. In addition, the performance of these industries is sensitive to interest rate and foreign exchange rate changes and varies with the overall level of economic activity.

•The Company's customer base is relatively concentrated.

The Company's ten largest customers, which are primarily original equipment manufacturers (OEMs), accounted for approximately 55% of Titan's net sales for 2011. Net sales to Deere & Company and CNH Global N.V. represented 18% and 11%, respectively, of total 2011 net sales. No other customer accounted for more than 10% of net sales in 2011. As a result, Titan's business could be adversely affected if one of its larger customers reduces its purchases from Titan due to work stoppages or slow-downs, financial difficulties, as a result of termination provisions, competitive

pricing or other reasons. There is also continuing pressure from the OEMs to reduce costs, including the cost of products and services purchased from outside suppliers such as Titan. The Company has had long-term relationships with major customers and expects to continue these relationships. There can be no assurance that Titan will be able to maintain such ongoing relationships. Any failure to maintain the Company's relationship with a leading customer could have an adverse effect on results of operations.

¶The Company's revenues are seasonal in nature due to Titan's dependence on seasonal industries. The agricultural, earthmoving/construction and recreational industries are seasonal, with typically lower sales during the second half of the year. This seasonality in demand has resulted in fluctuations in the Company's revenues and operating results. Because much of Titan's overhead expenses are fixed, seasonal trends can cause reductions in quarterly profit margins and financial condition, especially during slower periods.

¶The Company may be adversely affected by changes in government regulations and policies.

Domestic and foreign political developments and government regulations and policies directly affect the agricultural, earthmoving/construction and consumer products industries in the United States and abroad. Regulations and policies in the agricultural industry include those encouraging farm acreage reduction in the United States and granting ethanol subsidies. Regulations and policies relating to the earthmoving/construction industry include the construction of roads, bridges and other items of infrastructure. The modification of existing laws, regulations or policies or the adoption of new laws, regulations or policies could have an adverse effect on any one or more of these industries and therefore on Titan's business.

¶The Company is subject to corporate governance requirements, and costs related to compliance with, or failure to comply with, existing and future requirements could adversely affect Titan's business.

The Company is subject to corporate governance requirements under the Sarbanes-Oxley Act of 2002, as well as new rules and regulations subsequently adopted by the Securities and Exchange Commission (SEC), the Public Company Accounting Oversight Board (PCAOB) and the New York Stock Exchange (NYSE). These laws, rules and regulations continue to evolve and may become increasingly restrictive in the future. Failure to comply with these laws, rules and regulations may have an adverse material effect on Titan's reputation, financial condition and the value of the Company's securities.

¶The Company faces substantial competition from domestic and international companies.

The Company competes with several domestic and international competitors, some of which are larger and have greater financial and marketing resources than Titan. Titan competes primarily on the basis of price, quality, customer service, design capability and delivery time. The Company's ability to compete with international competitors may be adversely affected by currency fluctuations. In addition, certain OEM customers could, under certain circumstances, elect to manufacture certain products to meet their own requirements or to otherwise compete with Titan.

There can be no assurance that Titan's businesses will not be adversely affected by increased competition in the Company's markets or that competitors will not develop products that are more effective or less expensive than Titan products or which could render certain products less competitive. From time to time certain competitors have reduced prices in particular product categories, which has caused Titan to reduce prices. There can be no assurance that in the future Titan's competitors will not further reduce prices or that any such reductions would not have a material adverse effect on Titan's business.

¶The Company could be negatively impacted if Titan fails to maintain satisfactory labor relations.

At December 31, 2011, approximately 34% of Titan employees were covered by a collective bargaining agreement. This 34% is comprised of employees at the Des Moines, Iowa facility, with collective bargaining agreement that expires in November 2012, and the Brazil facility, with a collective bargaining agreement that expires in May 2012. Upon the expiration of any of the collective bargaining agreements, however, Titan may be unable to negotiate new collective bargaining agreements on terms that are cost effective to the Company. The business operations may be affected as a result of labor disputes or difficulties and delays in the process of renegotiating collective bargaining agreements.

The labor agreements for the Company's Bryan, Ohio and Freeport, Illinois, facilities expired in November 2010, for the employees covered by their respective collective bargaining agreements, which account for approximately 26% of Titan employees. As of December 31, 2011, the employees of these two facilities were working without a contract under the terms of the Company's latest offer. The respective unions have retained their rights to challenge the Company's actions.

¶Unfavorable outcomes of legal proceedings could adversely affect results of operations.

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

Acquisitions may require significant resources and/or result in significant losses, costs or liabilities.

Any future acquisitions will depend on the ability to identify suitable acquisition candidates, to negotiate acceptable terms for their acquisition and to finance those acquisitions. Titan will also face competition for suitable acquisition candidates that may increase costs. In addition, acquisitions require significant managerial attention, which may be diverted from current operations. Furthermore, acquisitions of businesses or facilities entail a number of additional risks, including:

- problems with effective integration of operations
- the inability to maintain key pre-acquisition customer, supplier and employee relationships
- the potential that expected benefits or synergies are not realized and operating costs increase
- exposure to unanticipated liabilities

Subject to the terms of indebtedness, the Company may finance future acquisitions with cash from operations, additional indebtedness and/or by issuing additional equity securities. These commitments may impair the operation of Titan's businesses. In addition, the Company could face financial risks associated with incurring additional indebtedness such as reducing liquidity and access to financing markets and increasing the amount of cash flow required to service such indebtedness.

The Company has export sales and purchases raw material from foreign suppliers.

The Company had total aggregate export sales of approximately \$164.4 million, \$80.2 million and \$82.7 million, for the years ended December 31, 2011, 2010 and 2009, respectively.

Export Sales – Exports to foreign markets are subject to a number of special risks, including but not limited to risks with respect to currency exchange rates, economic and political destabilization, other disruption of markets and restrictive actions by foreign governments (such as restrictions on transfer of funds, export duties and quotas and foreign customs). Other risks include changes in foreign laws regarding trade and investment; difficulties in obtaining distribution and support; nationalization; reforms of United States laws and policies affecting trade, foreign investment and loans; and foreign tax laws. There can be no assurance that one, or a combination of these factors will not have a material adverse effect on the Company's ability to increase or maintain its export sales.

Foreign Suppliers – The Company purchases raw materials from foreign suppliers. The production costs, profit margins and competitive position of the Company are affected by the strength of the currencies in countries where Titan purchases goods, relative to the strength of the currencies in countries where the products are sold. The Company's results of operations, cash flows and financial position may be affected by fluctuations in foreign currencies.

The Company may be subject to product liability and warranty claims.

The Company warrants its products to be free of certain defects and accordingly may be subject in the ordinary course of business to product liability or product warranty claims. Losses may result or be alleged to result from defects in Titan products, which could subject the Company to claims for damages, including consequential damages. There can be no assurance that Company insurance will be adequate for liabilities actually incurred or that adequate insurance will be available on terms acceptable to the Company. Any claims relating to defective products that result in liability exceeding Titan's insurance coverage could have a material adverse effect on financial condition and results of operations. Further, claims of defects could result in negative publicity against Titan, which could adversely affect the Company's business.

¶The Company has incurred, and may incur in the future, net losses.

The Company reported net loss of \$(5.9) million for the year ended December 31, 2010 and \$(24.6) million for the year ended December 31, 2009.

•The Company may be adversely affected by a disruption in, or failure of, information technology systems.

The Company relies upon information technology systems, some of which are managed by third parties, to process, transmit and store electronic information. Technology systems are used in a variety of business processes and activities, including purchasing, manufacturing, distribution, invoicing and financial reporting. The Company utilizes security measures and business continuity plans to prevent, detect and remediate damage from computer viruses, natural disasters, unauthorized access, utility failures and other similar disruptions. Despite these measures, a security breach or information technology system failure may disrupt and adversely affect the Company's operations.

¶The Company is subject to risks associated with climate change and climate change regulations.

Governmental regulatory bodies in the United States and other countries have, or are, contemplating introducing regulatory changes in response to the potential impacts of climate change. Laws and regulations regarding climate change and energy usage may impact the Company directly through higher costs for energy and raw materials. The Company's customers may also be affected by climate change regulations that may impact future purchases. Physical climate change may potentially have a large impact on the Company's two largest industry segments, agriculture and earthmoving/construction. The potential impacts of climate change and climate change regulations are highly uncertain at this time, and the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of climate change and climate change regulations.

¶The Company is subject to risks associated with environmental laws and regulations.

The Company's operations are subject to federal, state, local and foreign laws and regulations governing, among other things, emissions to air, discharge to waters and the generation, handling, storage, transportation, treatment and disposal of waste and other materials. The Company's operations entail risks in these areas, and there can be no assurance that Titan will not incur material costs or liabilities. In addition, potentially significant expenditures could be required in order to comply with evolving environmental and health and safety laws, regulations or requirements that may be adopted or imposed in the future.

ITEM 1B – UNRESOLVED STAFF COMMENTS

None.

ITEM 2 – PROPERTIES

The Company's properties are detailed by the location, size and focus of each facility as provided in the table below:

(a) The Union City facility was purchased in November of 2011. The Company is in the process of determining the use for this facility.

(b) The Brownsville, Greenwood and Natchez facilities are currently being used for storage. The Company's facilities in Brownsville, Texas; Greenwood, South Carolina, and Natchez, Mississippi, are not in operation. Approximately

293,000 square feet of the Brownsville facility is being leased to a third party.

The Company considers each of its facilities to be in good condition and adequate for present use. Management believes that the Company has sufficient capacity to meet current market demand with the active facilities. The Company has no current plans to restart manufacturing at the storage facilities described in note (b) above.

ITEM 3 – LEGAL PROCEEDINGS

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

ITEM 7—MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

MANAGEMENT’S DISCUSSION AND ANALYSIS

Management’s discussion and analysis of financial condition and results of operations (MD&A) is designed to provide readers of these financial statements with a narrative from the perspective of the management of Titan International, Inc. (Titan or the Company) on Titan’s financial condition, results of operations, liquidity and other factors which may affect the Company’s future results.

FORWARD-LOOKING STATEMENTS

This Form 10-K contains forward-looking statements, including statements regarding, among other items:

- Anticipated trends in the Company’s business
- Future expenditures for capital projects
- The Company’s ability to continue to control costs and maintain quality
- Ability to meet financial covenants and conditions of loan agreements
- The Company’s business strategies, including its intention to introduce new products
- Expectations concerning the performance and success of the Company’s existing and new products
- The Company’s intention to consider and pursue acquisition and divestiture opportunities

Readers of this Form 10-K should understand that these forward-looking statements are based on the Company’s expectations and are subject to a number of risks and uncertainties, including those in Item 1A, Part I of this report, “Risk Factors,” certain of which are beyond the Company’s control.

Actual results could differ materially from these forward-looking statements as a result of certain factors, including:

- The effect of a recession on the Company and its customers and suppliers
- Changes in the Company’s end-user markets as a result of world economic or regulatory influences
- Changes in the marketplace, including new products and pricing changes by the Company’s competitors
- Ability to maintain satisfactory labor relations
- Unfavorable outcomes of legal proceedings
- Availability and price of raw materials
- Levels of operating efficiencies
- Unfavorable product liability and warranty claims
- Actions of domestic and foreign governments
- Results of investments
- Fluctuations in currency translations
- Climate change and related laws and regulations
- Risks associated with environmental laws and regulations

Any changes in such factors could lead to significantly different results. The Company cannot provide any assurance that the assumptions referred to in the forward-looking statements or otherwise are accurate or will prove to transpire. Any assumptions that are inaccurate or do not prove to be correct could have a material adverse effect on the Company’s ability to achieve the results as indicated in forward-looking statements. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. In light of these risks and uncertainties, there can be no assurance that the forward-looking information contained in this document will in fact transpire.

OVERVIEW

Titan International, Inc. and its subsidiaries are leading manufacturers of wheels, tires and assemblies for off-highway vehicles used in the agricultural, earthmoving/construction and consumer markets. Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

The Company's major OEM customers include large manufacturers of off-highway equipment such as AGCO Corporation, CNH Global N.V., Deere & Company and Kubota Corporation, in addition to many other off-highway equipment manufacturers. The Company distributes products to OEMs, independent and OEM-affiliated dealers, and through a network of distribution facilities.

The following table provides highlights for the year ended December 31, 2011, compared to 2010 (amounts in thousands):

	2011	2010
Net sales	\$1,486,998	\$881,591
Income from operations	132,173	30,945
Net income (loss)	58,136	(5,926)

The Company recorded sales of \$1,487.0 million for 2011, which were approximately 69% higher than the 2010 sales of \$881.6 million. The higher sales levels were primarily the result of increased demand and pricing/mix improvements which resulted largely from increased raw material prices that were passed on to customers. In addition, sales increased as the result of the April 2011 acquisition of the Goodyear Latin American farm tire business including the Sao Paulo, Brazil manufacturing facility which recorded sales of \$276.5 million for the year ended December 31, 2011.

The Company's income from operations was \$132.2 million for 2011 compared to \$30.9 million for 2010. Titan's net income was \$58.1 million for 2011 compared to net loss of \$(5.9) million in 2010. Diluted income per share was \$1.18 in 2011, compared to diluted loss per share of \$(0.17) in 2010. The operating gains were primarily related to increased sales levels as well as gains from improved plant utilization resulting from the higher sales levels.

PURCHASE OF GOODYEAR'S LATIN AMERICAN FARM TIRE BUSINESS

On April 1, 2011, Titan closed on the acquisition of The Goodyear Tire & Rubber Company's Latin American farm tire business for approximately \$98.6 million U.S. dollars, subject to post-closing conditions and adjustments. The transaction includes Goodyear's Sao Paulo, Brazil manufacturing plant, property, equipment; inventories; a licensing agreement that allows Titan to sell Goodyear-brand farm tires in Latin America for seven years; and extends the North American licensing agreement for seven years.

CONVERTIBLE SENIOR SUBORDINATED NOTES CONVERSION

In the first quarter of 2011, the Company closed an Exchange Agreement with a note holder of the convertible notes, pursuant to which such holder exchanged approximately \$59.6 million in aggregate principal amount of the convertible notes for approximately 6.6 million shares of the Company's common stock, plus a payment for the accrued and unpaid interest. In connection with the exchange, the Company recognized a noncash charge of \$16.1 million in accordance with ASC 470-20 Debt - Debt with Conversion and Other Options.

DISCHARGE OF SENIOR UNSECURED NOTES

In the first quarter of 2011, Titan satisfied and discharged the indenture relating to the 8% senior unsecured notes due January 2012 by depositing with the trustee \$1.1 million cash representing the outstanding principal of such notes and interest payments due on July 15, 2011, and at maturity on January 15, 2012. Titan irrevocably instructed the trustee to apply the deposited money toward the interest and principal of the notes.

RESULTS OF OPERATIONS

The following table sets forth the Company's statement of operations expressed as a percentage of net sales for the periods indicated. This table and subsequent discussions should be read in conjunction with the Company's audited consolidated financial statements and notes thereto.

CRITICAL ACCOUNTING ESTIMATES

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The Company's application of these policies involves assumptions that require difficult subjective judgments regarding many factors, which, in and of themselves, could materially impact the financial statements and disclosures. A future change in the estimates, assumptions or judgments applied in determining the following matters, among others, could have a material impact on future financial statements and disclosures.

Asset and Business Acquisitions

The allocation of purchase price for asset and business acquisitions requires management estimates and judgment as to expectations for future cash flows of the acquired assets and business and the allocation of those cash flows to identifiable intangible assets in determining the estimated fair value for purchase price allocations. If the actual results differ from the estimates and judgments used in determining the purchase price allocations, impairment losses could occur. To aid in establishing the value of any intangible assets at the time of acquisition, the Company typically

engages a professional appraisal firm.

18

Impairment of Goodwill

The Company reviews goodwill to assess recoverability from future operations during the fourth quarter of each annual reporting period, and whenever events and circumstances indicate that the carrying values may not be recoverable. The carrying value of the Company's goodwill was \$19.8 million at December 31, 2011 and zero at December 31, 2010. The Company has elected to early adopt Accounting Standards Update (ASU) 2011-08 and first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. Based on a qualitative assessment at December 31, 2011, the Company determined the two-step goodwill impairment test was not required. Significant assumptions relating to future operations must be made when estimating future cash flows in analyzing goodwill for impairment.

When the two-step goodwill impairment test is performed, the Company evaluates the recoverability of goodwill by estimating the future discounted cash flows of the reporting unit to which the goodwill relates and using an earnings before interest, taxes, depreciation, and amortization (EBITDA) multiple approach. In determining the estimated future cash flows, the Company considers current and projected future levels of income as well as business trends and economic conditions. When the Company's estimated fair value of the reporting unit is less than the carrying value, a second step of the impairment analysis is performed. In this second step, the implied fair value of goodwill is calculated as the excess of the fair value of a reporting unit over the fair values assigned to its assets and liabilities. If the implied fair value of goodwill is less than the carrying value of the reporting unit's goodwill, the difference is recognized as an impairment loss.

Inventories

Inventories are valued at the lower of cost or market. At December 31, 2011, approximately 30% of the Company's inventories were valued under the last-in, first out (LIFO) method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. The remaining inventories were valued under the first-in, first out (FIFO) method or average cost method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory.

Income Taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and liabilities. The Company assesses the realizability of its deferred tax asset positions and recognizes and measures uncertain tax positions in accordance with ASC 740 Income Taxes.

Retirement Benefit Obligations

Pension benefit obligations are based on various assumptions used by third-party actuaries in calculating these amounts. These assumptions include discount rates, expected return on plan assets, mortality rates and other factors. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and obligations. The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. Titan expects to contribute approximately \$7 million to these frozen defined pension plans in 2012. For more information concerning these costs and obligations, see the discussion of the "Pensions" and Note 23 to the Company's financial statements.

The effect of hypothetical changes to selected assumptions on the Company's frozen pension benefit obligations would be as follows (amounts in thousands):

Assumptions	Percentage Change	December 31, 2011		2012
		Increase (Decrease) PBO (a)	Increase (Decrease) Equity	Increase (Decrease) Expense

Pension

Discount rate	+/-5	\$(5,334)/\$5,802	\$5,334/\$(5,802)	\$(338)/\$356
Expected return on assets	+/-5			\$(334)/\$334

(a) Projected benefit obligation (PBO) for pension plans.

Product Warranties

The Company provides limited warranties on workmanship on its products in all market segments. The majority of the Company's products have a limited warranty that ranges from zero to ten years, with certain products being prorated after the first year. The Company calculates a provision for warranty expense based on past warranty experience. Actual warranty experience may differ from historical experience. The Company's warranty accrual was \$17.7 million at December 31, 2011, and \$12.5 million at December 31, 2010.

FISCAL YEAR ENDED DECEMBER 31, 2011, COMPARED TO FISCAL YEAR ENDED DECEMBER 31, 2010

RESULTS OF OPERATIONS

Highlights for the year ended December 31, 2011, compared to 2010 (amounts in thousands):

	2011	2010	% Increase	
Net sales	\$1,486,998	\$881,591	69	%

Net Sales

Net sales for the year ended December 31, 2011, were \$1,487.0 million compared to \$881.6 million for the year ended December 31, 2010. The higher sales levels were primarily the result of increased demand and pricing/mix improvements which resulted largely from increased raw material prices that were passed on to customers. In addition, sales increased as the result of the April acquisition of the Goodyear Latin American farm tire business including the Sao Paulo, Brazil manufacturing facility which recorded sales of \$276.5 million for the year ended December 31, 2011.

Cost of Sales and Gross Profit

Cost of sales was \$1,254.9 million for the year ended December 31, 2011, as compared to \$777.5 million in 2010. The higher cost of sales resulted from the significant increase in the sales levels and increased raw material prices. The cost of sales increased 61%, compared to a 69% increase in net sales.

Gross profit for the year 2011 was \$232.1 million, or 15.6% of net sales, compared to \$104.1 million, or 11.8% of net sales for 2010. The Sao Paulo, Brazil manufacturing facility provided gross profit of \$21.7 million for the year ended December 31, 2011. The remaining increase in the Company's gross profit was primarily related to increased sales levels as well as gains from improved plant utilization resulting from the higher sales levels.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were as follows (amounts in thousands):

	2011	2010	% Increase	
Selling, general and administrative	\$85,917	\$57,565	49	%
Percentage of net sales	5.8	% 6.5		%

Selling, general and administrative (SG&A) expenses were \$85.9 million, or 5.8% of net sales, for the year ended December 31, 2011, as compared to \$57.6 million, or 6.5% of net sales, for 2010. The higher SG&A expenses were primarily the result of higher selling and marketing expenses related to the increased sales levels, higher legal fees, an increase in incentive compensation, travel, and a write off of a receivable related to an equipment sale. Selling and marketing expenses were approximately \$7 million higher, primarily due to increased sales levels. Legal related cost and fees were approximately \$3 million higher. Incentive compensation, travel, and a write-off of receivables from equipment sales each increased approximately \$2 million. Approximately \$11 million of SG&A expenses of recently acquired facilities also contributed to the increase.

Research and Development Expenses

Research and development expenses were as follows (amounts in thousands):

	2011	2010	% Decrease	
Research and development	\$4,228	\$6,317	(33)	%

Percentage of net sales	0.3	%	0.7	%
-------------------------	-----	---	-----	---

Research and development (R&D) expenses were \$4.2 million, or 0.3% of net sales, for the year ended December 31, 2011, as compared to \$6.3 million, or 0.7% of net sales, for 2010. The Company R&D costs related to the Giant OTR products were less in 2011 than 2010.

20

Royalty Expense

Royalty expense was as follows (amounts in thousands):

	2011	2010	% Increase	
Royalty expense	\$9,790	\$9,263	6	%

The Company has a trademark license agreement with The Goodyear Tire & Rubber Company to manufacture and sell certain off-highway tires in North America and Latin America under the Goodyear name. Royalty expenses were \$9.8 million for the year ended December 31, 2011, as compared to \$9.3 million in 2010. The North American and Latin American royalties were prepaid through March 2018 as a part of the Goodyear Latin American farm tire acquisition.

Income from Operations

Income from operations was as follows (amounts in thousands):

	2011	2010	% Increase	
Income from operations	\$132,173	\$30,945	327	%
Percentage of net sales	8.8	% 3.5	%	

Income from operations for the year ended December 31, 2011, was \$132.2 million, or 8.8% of net sales, compared to \$30.9 million, or 3.5% of net sales, in 2010. This increase was the net result of the items previously discussed above.

Interest Expense

Interest expense was as follows (amounts in thousands):

	2011	2010	% Decrease	
Interest expense	\$25,259	\$26,667	(5)%

Interest expense for the year 2011 was \$25.3 million compared to \$26.7 million in 2010. The Company's interest expense for 2011 decreased from the previous year primarily as a result of the repurchase of 8% senior unsecured notes in 2010 and the exchange agreement for 5.625% convertible senior subordinated notes in the first quarter of 2011, offset by the interest recorded for the 7.875% senior secured notes issued in the fourth quarter of 2010. Interest expense from Titan Brazil also offset the decreased interest expense for 2011.

Noncash Convertible Debt Conversion Charge

Noncash convertible debt conversion charge was as follows (amounts in thousands):

	2011	2010	% Increase
Noncash convertible debt conversion charge	\$16,135	\$—	n/a

In the first quarter of 2011, the Company closed an exchange agreement converting approximately \$59.6 million of the 5.625% convertible senior subordinated notes into approximately 6.6 million shares of the Company's common stock. In connection with the exchange, the Company recognized a noncash charge of \$16.1 million in accordance with ASC 470-20 Debt - Debt with Conversion and Other Options.

Loss on Senior Note Repurchase

Loss on senior note repurchase was as follows (amounts in thousands):

	2011	2010	% Decrease	
Loss on senior note repurchase	\$—	\$14,573	(100)%

In June 2010, the Company closed on a tender transaction to purchase \$47.4 million of its 8% outstanding senior unsecured notes due January 2012 (senior unsecured notes). In October 2010, the Company closed on another tender

transaction to purchase \$138.9 million of its outstanding senior unsecured notes. In connection with these tender offers and an additional note repurchase of \$6.5 million in July 2010, the Company recorded expenses of \$14.6 million. These expenses were related to: (i) early tender premium of \$13.0 million, (ii) unamortized deferred financing fees of \$1.2 million and (iii) other fees of \$0.4 million.

Other Income

Other income was as follows (amounts in thousands):

	2011	2010	% Increase	
Other income	\$5,116	\$1,105	363	%

Other income was \$5.1 million for the year ended December 31, 2011, as compared to \$1.1 million in 2010. The major items included in 2011 were: (i) discount amortization on prepaid royalty of \$3.1 million; (ii) investment gain on marketable securities of \$1.6 million; and (iii) gain on purchase transaction of \$0.3 million.

The major items included in 2010 were: (i) investment gain on contractual obligations of \$0.8 million; (ii) interest income of \$0.4 million; and (iii) other expense of \$(0.1) million.

Provision (Benefit) for Income Taxes

Provision (benefit) for income taxes was as follows (amounts in thousands):

	2011	2010	% Increase
Provision (benefit) for income taxes	\$37,759	\$(3,264)) n/a

The Company recorded provision for income taxes of \$37.8 million in 2011 and benefit from income taxes of \$(3.3) million in 2010. The Company's effective tax rate was 39% in 2011 and 36% in 2010. The Company's 2011 income tax expense and rate differs from the amount of income tax determined by applying the U.S. Federal income tax rate to pre-tax income primarily as a result of the \$16.1 million noncash charge taken in connection with the exchange agreement on the Company's convertible debt. This noncash charge is not fully deductible for income tax purposes. The Company's 2010 income tax expense and rate differs from the amount of income tax determined by applying the U.S. Federal income tax rate to the pre-tax income primarily as the result of state taxes.

Net Income (Loss)

Net income (loss) was as follows (amounts in thousands):

	2011	2010	% Increase
Net income (loss)	\$58,136	\$(5,926)) n/a

Net income for the year ended December 31, 2011, was \$58.1 million, compared to net loss of \$(5.9) million in 2010. Basic earnings per share was \$1.40 for the year ended December 31, 2011 as compared to loss per share of \$(.17) in 2010. Diluted earnings per share was \$1.18 for the year ended December 31, 2011 as compared to loss per share of \$(.17) in 2010. The Company's net income and earnings per share were higher due to the items previously discussed.

Agricultural Segment Results

Agricultural segment results were as follows (amounts in thousands):

	2011	2010	% Increase	
Net sales	\$960,693	\$675,178	42	%
Gross profit	177,055	108,102	64	%
Income from operations	158,295	91,953	72	%

Net sales in the agricultural market were \$960.7 million for the year ended December 31, 2011, as compared to \$675.2 million in 2010. The increase in net sales was the result of increasing demand and pricing/mix improvements which were primarily the result of increased raw material prices that were passed to customers, and manufacturing capacity resulting from the acquisition of the Goodyear Latin American farm tire business including the Sao Paulo, Brazil manufacturing facility. Agricultural market sales from this facility were \$89.7 million for the year ended December 31, 2011.

Gross profit in the agricultural market was \$177.1 million for the year 2011, as compared to \$108.1 million in 2010. Income from operations in the agricultural market was \$158.3 million for the year 2011, as compared to \$92.0 million in 2010. The Company's gross profit and income from operations benefited from improved plant utilization resulting from the higher sales levels.

Earthmoving/Construction Segment Results

Earthmoving/construction segment results were as follows (amounts in thousands):

	2011	2010	% Increase	
Net sales	\$306,821	\$191,042	61	%
Gross profit (loss)	39,328	(3,400)) n/a	
Income (loss) from operations	32,781	(11,296)) n/a	

The Company's earthmoving/construction market net sales were \$306.8 million for the year ended December 31, 2011, as compared to \$191.0 million in 2010. The increase in net sales was the result of increasing demand and pricing/mix improvements which were primarily the result of increased raw material prices that were passed to customers and price increases resulting from additional demand. The Company continues to see increasing demand in the earthmoving/construction segment.

Gross profit in the earthmoving/construction market was \$39.3 million for the year 2011, as compared to gross loss of \$(3.4) million in 2010. The Company's earthmoving/construction market income from operations was \$32.8 million for the year 2011, as compared to a loss of \$(11.3) million in 2010. The Company's gross profit and income from operations benefited from improved plant utilization resulting from the higher sales levels.

Consumer Segment Results

Consumer segment results were as follows (amounts in thousands):

	2011	2010	% Increase	
Net sales	\$219,484	\$15,371	1,328	%
Gross profit	18,900	2,867	559	%
Income from operations	11,104	2,542	337	%

Consumer market net sales were \$219.5 million for the year ended December 31, 2011, as compared to \$15.4 million in 2010. The increase in net sales was primarily the result of the Goodyear Latin American farm tire acquisition agreement, which included supply agreements for certain product sales, which are included in the consumer segment. Sales under these agreements were \$186.8 million for the year ended December 31, 2011.

Gross profit from the consumer market was \$18.9 million in 2011 as compared to \$2.9 million in 2010. Consumer market income from operations was \$11.1 million for the year 2011, as compared to \$2.5 million in 2010. The Company's increase in gross profit and income from operations primarily resulted from the supply agreements.

Segment Summary

Corporate Expenses

Income from operations on a segment basis does not include corporate expenses or depreciation and amortization expense related to property, plant and equipment carried at the corporate level totaling \$70.0 million for the year ended December 31, 2011, as compared to \$52.3 million in 2010.

Corporate expenses for the year ended December 31, 2011, were composed of selling and marketing expenses of approximately \$28 million and administrative expenses of approximately \$42 million.

Corporate expenses for the year ended December 31, 2010, were composed of selling and marketing expenses of approximately \$20 million and administrative expenses of approximately \$32 million.

Selling & marketing expenses were approximately \$8 million higher in 2011 primarily as the result of higher sales levels. Corporate administrative expenses were approximately \$10 million higher in 2011, when compared to 2010. Corporate administrative expenses were higher primarily as the result of (i) legal related cost and fees which were approximately \$3 million higher, (ii) incentive compensation which was approximately \$2 million higher, (iii) travel which was approximately \$2 million higher, and (iv) write-off of a receivable from an equipment sale of approximately \$2 million in 2011.

FISCAL YEAR ENDED DECEMBER 31, 2010, COMPARED TO FISCAL YEAR ENDED DECEMBER 31, 2009

RESULTS OF OPERATIONS

Highlights for the year ended December 31, 2010, compared to 2009 (amounts in thousands):

	2010	2009	% Increase	
Net sales	\$881,591	\$727,599	21	%
Cost of sales	777,501	671,634	16	%
Gross profit	104,090	55,965	86	%
Gross profit percentage	11.8	% 7.7	%	

Net Sales

Net sales for the year ended December 31, 2010, were \$881.6 million compared to \$727.6 million for the year ended December 31, 2009. The higher sales were primarily the result of a substantial increase in demand in the Company's agricultural segment, up approximately 20%; and earthmoving/construction segment, up approximately 32%. Second half sales in 2009 were affected by reduced demand for the Company's products, as many of the Company's major customers implemented extended shutdowns during the period as a consequence of the recession. Titan in turn implemented extended shutdowns at its production facilities to manage lower demand during this time period. Extended shutdowns were not required during the second half of 2010 as Titan's customers were aided by the stabilization of the overall economy and an increase in demand for their products.

Cost of Sales and Gross Profit

Cost of sales was \$777.5 million for the year ended December 31, 2010, as compared to \$671.6 million in 2009. The cost of sales increased 16% as a result of higher sales levels of 21%.

Gross profit for the year 2010 was \$104.1 million, or 11.8% of net sales, compared to \$56.0 million, or 7.7% of net sales for 2009. The gross profit margin for 2010 was higher than 2009 primarily due to the negative margins in the second half of 2009 resulting from extended production facility shutdowns and improved plant utilization resulting from the higher sales levels.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were as follows (amounts in thousands):

	2010	2009	% Increase	
Selling, general and administrative	\$57,565	\$46,734	23	%
Percentage of net sales	6.5	% 6.4	%	

Selling, general and administrative (SG&A) expenses were \$57.6 million, or 6.5% of net sales, for the year ended December 31, 2010, as compared to \$46.7 million, or 6.4% of net sales, for 2009. The higher SG&A expenses for 2010 were primarily the result of an increase in CEO and management incentive compensation, higher selling and marketing expenses related to sales levels, and higher legal and professional fees. Expenses recorded for CEO and management incentive compensation were approximately \$6 million higher in 2010, when compared to 2009. Selling and marketing expenses for 2010 were approximately \$2 million higher than 2009 primarily due to the higher sales levels. Legal and professional fees for 2010 were approximately \$2 million higher than 2009 due primarily to fees associated with potential acquisitions.

Research and Development Expenses

Research and development expenses were as follows (amounts in thousands):

	2010	2009	% Decrease	
Research and development	\$6,317	\$8,850	(29)%
Percentage of net sales	0.7	% 1.2	%	

Research and development (R&D) expenses were \$6.3 million, or 0.7% of net sales, for the year ended December 31, 2010, as compared to \$8.9 million, or 1.2% of net sales, for 2009. The Company R&D costs related to the Giant OTR products were less in 2010 than 2009.

Royalty Expense

Royalty expense was as follows (amounts in thousands):

	2010	2009	% Increase	
Royalty expense	\$9,263	\$7,573	22	%

The Company has a trademark license agreement with The Goodyear Tire & Rubber Company to manufacture and sell certain off-highway tires in North America under the Goodyear name. Royalty expenses were \$9.3 million for the year ended December 31, 2010, as compared to \$7.6 million in 2009. As sales subject to the license agreement increased in 2010, the Company's royalty expense increased accordingly.

Noncash Goodwill Impairment Charge

Noncash goodwill impairment charge was as follows (amounts in thousands):

	2010	2009	% Decrease	
Noncash goodwill charge	\$—	\$11,702	(100)%

In the fourth quarter of 2009, the Company recorded a noncash charge for the impairment of goodwill of \$11.7 million on both a pre-tax and after-tax basis. The charge was associated with the reporting units of the Company's agricultural (\$6.9 million), earthmoving/construction (\$3.6 million), and consumer (\$1.2 million) segments. The Company performed a fourth quarter 2009 goodwill assessment using a discounted cash flow model that employed a 12.25% discount rate and 2.5% terminal growth rate assumption and an EBITDA multiple approach.

Income (loss) from Operations

Income (loss) from operations was as follows (amounts in thousands):

	2010	2009	% Increase	
Income (loss) from operations	\$30,945	\$(18,894))	n/a
Percentage of net sales	3.5	% (2.6)%	

Income from operations for the year ended December 31, 2010, was \$30.9 million, or 3.5% of net sales, compared to loss from operations of \$(18.9) million, or (2.6)% of net sales, in 2009. This increase was the net result of the items previously discussed above.

Interest Expense

Interest expense was as follows (amounts in thousands):

	2010	2009	% Increase	
Interest expense	\$26,667	\$16,246	64	%

Interest expense for the year 2010 was \$26.7 million compared to \$16.2 million in 2009. The Company's interest expense for 2010 increased from the previous year primarily as a result of additional interest expense of

approximately \$10 million related to the 5.625% convertible senior subordinated notes that were issued in December 2009.

25

Gain (Loss) on Note Repurchase

Gain (loss) on note repurchase was as follows (amounts in thousands):

	2010	2009	% Decrease
Gain (loss) on note repurchase	\$(14,573) \$1,398	n/a

In June 2010, the Company closed on a tender transaction to purchase \$47.4 million of its 8% outstanding senior unsecured notes due January 2012 (senior unsecured notes). In October 2010, the Company closed on another tender transaction to purchase \$138.9 million of its outstanding senior unsecured notes. In connection with these tender offers and an additional note repurchase of \$6.5 million in July 2010, the Company recorded expenses of \$14.6 million. These expenses were related to: (i) early tender premium of \$13.0 million, (ii) unamortized deferred financing fees of \$1.2 million and (iii) other fees of \$0.4 million. For 2009, the Company recorded a gain on a note repurchase of \$1.4 million resulting from the Company's repurchase of \$6.2 million of principal value of senior unsecured notes for approximately \$4.8 million in the first quarter of 2009.

Other Income

Other income was as follows (amounts in thousands):

	2010	2009	% Decrease
Other income	\$1,105	\$1,740	(36)%

Other income was \$1.1 million for the year ended December 31, 2010, as compared to \$1.7 million in 2009. The major items included in 2010 were: (i) investment gain on contractual obligations of \$0.8 million; (ii) interest income of \$0.4 million; and (iii) other expense of \$(0.1) million.

The major items included in 2009 were: (i) investment gain on contractual obligations of \$1.3 million; (ii) interest income of \$0.2 million; and (iii) other income of \$0.2 million.

Provision (Benefit) for Income Taxes

Provision (benefit) for income taxes was as follows (amounts in thousands):

	2010	2009	% Decrease
Provision (benefit) for income taxes	\$(3,264) \$(7,357) (56)%

The Company recorded benefit for income taxes of \$(3.3) million in 2010 and \$(7.4) million in 2009. The Company's effective tax rate was 36% in 2010 and 23% in 2009. The Company's 2010 income tax expense and rate differs from the amount of income tax determined by applying the U.S. Federal income tax rate to the pre-tax income primarily as the result of state taxes. The Company's 2009 income tax expense and rate differs from the amount of income tax determined by applying the U.S. Federal income tax rate to pre-tax income primarily as a result of the \$11.7 million noncash goodwill impairment charge. This noncash goodwill charge is not deductible for income tax purposes.

Net Loss

Net loss was as follows (amounts in thousands):

	2010	2009	% Decrease
Net income (loss)	\$(5,926) \$(24,645) (76)%

Net loss for the year ended December 31, 2010, was \$(5.9) million, compared to \$(24.6) million in 2009. Basic and diluted loss per share was \$(.17) for the year ended December 31, 2010, as compared to \$(.71) in 2009. The Company's net loss and loss per share were lower due to the items previously discussed.

Agricultural Segment Results

Agricultural segment results were as follows (amounts in thousands):

	2010	2009	% Increase	
Net sales	\$675,178	\$563,528	20	%
Gross profit	108,102	51,955	108	%
Income from operations	91,953	26,980	241	%

Net sales in the agricultural market were \$675.2 million for the year ended December 31, 2010, as compared to \$563.5 million in 2009. Agricultural segment sales for the first quarter of 2010 sales were lower by \$36.2 million when compared to the first quarter of 2009. However, sales for the remainder of the year increased; more than offsetting the first quarter reduction.

Gross profit in the agricultural market was \$108.1 million for the year 2010, as compared to \$52.0 million in 2009. Income from operations in the agricultural market was \$92.0 million for the year 2010, as compared to \$27.0 million in 2009. The gross profit margin for 2010 was higher than 2009 primarily due to the negative margins in the second half of 2009 resulting from extended production facility shutdowns and improved plant utilization resulting from higher sales levels.

Earthmoving/Construction Segment Results

Earthmoving/construction segment results were as follows (amounts in thousands):

	2010	2009	% Increase	
Net sales	\$191,042	\$144,589	32	%
Gross profit (loss)	(3,400)) 3,595	n/a	
Loss from operations	(11,296) (7,999) 41	%

The Company's earthmoving/construction market net sales were \$191.0 million for the year ended December 31, 2010, as compared to \$144.6 million in 2009. The sales in the earthmoving/construction segment have improved, yet remain at low levels, down over 30 percent when compared to 2008 or 2007. A primary reason for the low sales levels in this segment was the continued weakness in the construction areas related to the commercial, residential and infrastructure industries.

Gross loss in the earthmoving/construction market was \$(3.4) million for the year 2010, as compared to gross profit of \$3.6 million in 2009. The Company's earthmoving/construction market loss from operations was \$(11.3) million for the year 2010, as compared to \$(8.0) million in 2009. The lower gross profit in 2010 when compared to 2009 was primarily the result of a write-down in inventory value of approximately \$15 million for certain large earthmoving/construction tires partially offset by substantially higher plant utilization rates.

Consumer Segment Results

Consumer segment results were as follows (amounts in thousands):

	2010	2009	% Increase (Decrease)	
Net sales	\$15,371	\$19,482	(21)%
Gross profit	2,867	1,604	79	%
Income (loss) from operations	2,542	(206) n/a	

Consumer market net sales were \$15.4 million for the year ended December 31, 2010, as compared to \$19.5 million in 2009. The continued reduction in consumer market sales was primarily attributed to the sustained contraction in consumer discretionary spending.

Gross profit from the consumer market was \$2.9 million in 2010 as compared to \$1.6 million in 2009. Consumer market income from operations was \$2.5 million for the year 2010, as compared to loss from operations of \$(0.2) million in 2009. The gross profit and income from operations in 2009 were negatively affected by the second half extended production facility shutdowns.

Income (loss) from operations	26,980	(7,999)	(206)	(37,669)	(18,894)

Corporate Expenses

Income from operations on a segment basis does not include corporate expenses or depreciation and amortization expense related to property, plant and equipment carried at the corporate level totaling \$52.3 million for the year ended December 31, 2010, as compared to \$37.7 million in 2009.

Corporate expenses for the year ended December 31, 2010, were composed of selling and marketing expenses of approximately \$20 million and administrative expenses of approximately \$32 million.

Corporate expenses for the year ended December 31, 2009, were composed of selling and marketing expenses of approximately \$18 million and administrative expenses of approximately \$20 million.

Selling & marketing expenses were approximately \$2 million higher in 2010 as the result of higher sales levels. Corporate administrative expenses were approximately \$12 million higher in 2010, when compared to 2009. Corporate administrative expenses were higher primarily as the result of (i) CEO and management incentive compensation which was approximately \$6 million higher, (ii) legal and professional fees which were approximately \$2 million higher due primarily to fees associated with potential acquisitions, and (iii) approximately \$2 million additional group insurance expense.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

As of December 31, 2011, the Company had \$129.2 million of cash within various bank accounts. The cash balance decreased by \$(110.3) million from December 31, 2010, due to the following items.

(amounts in thousands)	Year ended December 31,		
	2011	2010	Change
Cash	\$ 129,170	\$ 239,500	\$(110,330)

Operating Cash Flows

Summary of cash flows from operating activities:

Other operating activities	(7,261)	13,614	(20,875)
Cash provided by operating activities	\$4,426	\$50,711	\$(46,285)

For the year ended December 31, 2011, operating activities provided cash of \$4.4 million, that was \$46.3 million less than the prior year, primarily due to changes in operational working capital. The major source of funds was net income of \$58.1 million, adjusted for noncash provision of depreciation and amortization of \$44.9 million, and the noncash convertible debt conversion charge of \$16.1 million, all of which increased from the prior year. The changes in operational working capital decreased cash flows by \$109.3 million in 2011 compared to an increase of \$1.6 million in 2010, primarily due to the acquisition of The Goodyear Tire & Rubber Company's Latin American farm tire business that did not include accounts receivable, and an increase in inventory due to sales growth in the business and increased raw material costs. For additional details, see the Consolidated Statement of Cash Flows on page F-6.

In comparison, for the year ended December 31, 2010, operating activities provided cash of \$50.7 million which included a net loss of \$(5.9) million, an increase in accounts payable of \$11.0 million, an increase in other current liabilities of \$11.4 million and cash flows from other operating activities of \$13.6 million. Net loss included noncash charges of \$37.6 million for depreciation and amortization and a \$14.6 million loss on note repurchase. Positive cash flows were offset by increases in accounts receivable and inventory of \$21.5 million and \$8.0 million, respectively.

For the year ended December 31, 2009, operating activities provided cash of \$72.3 million. This cash was primarily provided by decreases in accounts receivable of \$59.0 million and inventories of \$37.2 million. Positive cash flows were offset by net loss of \$(24.6) million and decreases in accounts payable of \$41.3 million. Included as a reduction to net income were noncash charges of \$34.3 million for depreciation and amortization and \$11.7 million for the noncash goodwill impairment charge.

Operating cash flows decreased \$21.6 million from the year ended December 31, 2009, to December 31, 2010. The net loss for 2010 decreased \$18.7 million from the loss in 2009. When comparing 2010 to 2009, cash flows from

accounts receivable and inventories decreased \$80.5 million and \$45.2 million, respectively. These decreases were offset by increases in cash flow from accounts payable of \$52.3 million. The increases in accounts receivable and accounts payable is the result of significantly higher fourth quarter sales, which increased approximately 59% when comparing the fourth quarter of 2010 to the fourth quarter of 2009. The inventory increase in 2010 was due to rebuilding inventory balances from the substantially reduced year-end 2009 inventory levels.

Investing Cash Flows

Summary of cash flows from investing activities:

(Amounts in thousands)

	Year ended December 31,		
	2011	2010	Change
Acquisitions	\$ (99,118)	\$—	\$ (99,118)
Purchases of marketable securities	(30,000)	—	(30,000)
Sales of marketable securities	31,586	—	31,586
Capital expenditures	(35,744)	(28,854)	(6,890)
Other investing activities	2,473	106	2,367
Cash used for investing activities	\$ (130,803)	\$ (28,748)	\$ (102,055)

Net cash used for investing activities was \$130.8 million in 2011, as compared to \$28.7 million in 2010 and \$40.9 million in 2009. The Company invested a total of \$99.1 million in acquisitions, and \$30.0 million in marketable securities in 2011. This was partially offset by sales of marketable securities of \$31.6 million. The Company invested a total of \$35.7 million in capital expenditures in 2011, compared to \$28.9 million in 2010 and \$39.5 million in 2009. In 2011, approximately \$9 million of the capital expenditures related to the purchase of land, buildings, and certain equipment at Goodyear's Union City, TN closed tire plant. In 2010, approximately \$7 million of the capital expenditures related to the purchase of Denman Tire molds and equipment. Capital expenditures include Giant OTR Project expenditures of approximately \$23 million in 2009. The remaining capital expenditures of approximately \$27 million in 2011, approximately \$22 million in 2010, and approximately \$16 million in 2009, represent various equipment purchases and improvements to enhance production capabilities of Titan's existing business and maintaining existing equipment.

Cash used for investing increased \$102.1 million from the year ended December 31, 2010, to December 31, 2011. This increase in cash use was primarily the result of acquisitions, which included Goodyear's Latin American farm tire business for approximately \$98.6 million.

Financing Cash Flows

Summary of cash flows from financing activities:

(Amounts in thousands)

	Year ended December 31,		
	2011	2010	Change
Proceeds from borrowings	\$—	\$200,000	\$ (200,000)
Repurchase of senior notes	(1,064)	(206,166)	205,102
Term loan borrowing	25,879	—	25,879
Proceeds from exercise of stock options	524	285	239
Payment of financing fees	—	(5,057)	5,057
Payment on debt	(8,856)	—	(8,856)
Excess tax benefit from stock options exercised	706	—	706
Dividends paid	(809)	(707)	(102)
Cash provided by (used for) financing activities	\$ 16,380	\$ (11,645)	\$ 28,025

Net cash provided by financing activities was \$16.4 million in 2011. The cash was primarily provided by term loan borrowings of \$25.9 million used to provide working capital to Titan's Latin American operations. This was partially offset by payment on debt of \$8.9 million.

Net cash used for financing activities was \$11.6 million in 2010. \$206.2 million was used to repurchase senior notes and \$5.1 million was used for payment of financing fees. This was offset by proceeds from the issuance of \$200.0 million of 7.875 % senior secured notes due 2017.

Net cash provided by financing activities was \$136.1 million in 2009. This cash was provided primarily by 5.625% convertible senior subordinated notes proceeds of \$172.5 million. This was offset by payments on the Company's credit facility of \$25 million, payment of financing fees of \$7.1 million and repurchase of senior notes of \$4.7 million.

Financing cash flows increased by \$28.0 million when comparing 2011 to 2010. Also, financing cash flows decreased \$147.8 million when comparing 2010 to 2009. The changes from year to year are primarily the result of activity related to debt borrowings and payments.

Debt Covenants

The Company's revolving credit facility (credit facility) contains various covenants and restrictions. The financial covenants in this agreement require that:

• Collateral coverage be equal to or greater than 1.2 times the outstanding revolver balance.

• If the 30-day average of the outstanding revolver balance exceeds \$70 million, the fixed charge coverage ratio be equal to or greater than a 1.1 to 1.0 ratio.

Restrictions include:

• Limits on payments of dividends and repurchases of the Company's stock.

• Restrictions on the ability of the Company to make additional borrowings, or to consolidate, merge or otherwise fundamentally change the ownership of the Company.

• Limitations on investments, dispositions of assets and guarantees of indebtedness.

• Other customary affirmative and negative covenants.

These covenants and restrictions could limit the Company's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure by Titan to meet these covenants could result in the Company ultimately being in default on these loan agreements.

The Company was in compliance with these covenants and restrictions as of December 31, 2011. The collateral coverage ratio was not applicable as there were no outstanding borrowings under the revolving credit facility at December 31, 2011. The fixed charge coverage ratio did not apply for the quarter ended December 31, 2011.

Other Issues

The Company's business is subject to seasonal variations in sales that affect inventory levels and accounts receivable balances. Historically, Titan tends to experience higher sales demand in the first and second quarters. However, in 2011, Titan's third and fourth quarter sales continued at a high level due to increased demand in all of the Company's segments: agricultural, earthmoving/construction and consumer.

LIQUIDITY OUTLOOK

At December 31, 2011, the Company had \$129.2 million of cash and cash equivalents and \$88.0 million of unused availability under the terms of its credit facility. The availability under the Company's \$100 million credit facility was reduced by \$12.0 million for letters of credit used to provide working capital for the Sao Paulo, Brazil manufacturing facility. Titan expects to contribute approximately \$7 million to its frozen defined benefit pension plans during 2012.

Capital expenditures for 2012 are forecasted to be approximately \$50 million. Cash payments for interest are currently forecasted to be approximately \$24 million in 2012 based on the Company's year-end 2011 debt balances.

In the future, Titan may seek to grow by making acquisitions which will depend on the ability to identify suitable acquisition candidates, to negotiate acceptable terms for their acquisition and to finance those acquisitions.

Subject to the terms of indebtedness, the Company may finance future acquisitions with cash on hand, cash from operations, additional indebtedness and/or by issuing additional equity securities. Cash on hand, anticipated internal cash flows from operations and utilization of remaining available borrowings are expected to provide sufficient liquidity for working capital needs, capital expenditures and potential acquisitions.

INFLATION

The Company is subject to the effect of price fluctuations. During 2011, 2010 and 2009, the Company realized price increases for certain purchases of steel and rubber used in the manufacture of its products. While the cost outlook for commodities used in the Company's production is not certain, management believes it can manage these inflationary pressures by introducing appropriate sales price adjustments and through contract provisions with OEMs. However, these price adjustments may lag the inflationary pressures.

CONTRACTUAL OBLIGATIONS

The Company's contractual obligations at December 31, 2011, consisted of the following (amounts in thousands):

Contractual Obligations	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
7.875% senior secured notes due 2017	\$200,000	\$—	\$—	\$—	\$200,000
5.625% senior subordinated convertible notes due 2017	112,881	—	—	—	112,881
Other debt	16,723	11,723	5,000	—	—
Interest expense (a)	123,918	23,210	44,432	44,199	12,077
Operating leases	1,427	567	805	55	—
Purchase obligations	42,613	15,464	26,271	878	—
Other long-term liabilities (b)	38,100	7,000	10,400	7,700	13,000
Total	\$535,662	\$57,964	\$86,908	\$52,832	\$337,958

(a) Interest expense is estimated based on the Company's year-end 2011 debt balances, maturities and interest rates. The estimates assume no credit facility borrowings. The Company's actual debt balances and interest rates may fluctuate in the future. Therefore, actual interest payments may vary from those payments detailed in the above table.

(b) Other long-term liabilities represent the Company's estimated funding requirements for the frozen defined benefit pension plans. The Company's liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined with the assistance of outside actuaries. Assumptions are based on past experience and anticipated future trends and are subject to a number of risks and uncertainties and may lead to significantly different pension liability funding requirements.

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no material off-balance sheet arrangements.

MARKET RISK SENSITIVE INSTRUMENTS**Exchange Rate Sensitivity**

The Company is exposed to fluctuations in the Brazilian Real, British pound, Euro and other world currencies. Titan does not hedge foreign currency transaction or translation exposures. The Company's net investment in foreign entities translated into U.S. dollars was \$111.4 million at December 31, 2011, and \$22.7 million at December 31, 2010. The hypothetical potential loss in value of the Company's net investment in foreign entities resulting from a 10% adverse change in foreign currency exchange rates at December 31, 2011, would amount to approximately \$11.1 million.

Commodity Price Sensitivity

The Company does not generally enter into long-term commodity contracts and does not use derivative commodity instruments to hedge its exposures to commodity market price fluctuations. Therefore, the Company is exposed to price fluctuations of its key commodities, which consist primarily of steel, natural rubber, synthetic rubber and carbon black. The Company attempts to pass on certain material price increases and decreases to its customers, depending on market conditions.

Interest Rate Sensitivity

The Company has a \$100 million credit facility that has a variable interest rate. If the credit facility were fully drawn, a change in the interest rate of 100 basis points, or 1%, would change the Company's interest expense by approximately \$1.0 million. At December 31, 2011, there were no borrowings under the credit facility.

MARKET CONDITIONS AND OUTLOOK

In 2011, Titan experienced significantly higher sales when compared to 2010. The higher sales were primarily the result of increased demand and price increases in all of the Company's segments, as well as additional sales resulting from the acquisition of Goodyear's Latin American farm tire business and accompanying supply agreements. For 2012, the Company expects overall sales to remain at strong levels.

Energy, raw material and petroleum-based product costs have been volatile and may negatively impact the Company's margins. Many of Titan's overhead expenses are fixed; therefore, lower seasonal trends may cause negative fluctuations in quarterly profit margins and affect the financial condition of the Company.

The labor agreements for the Company's Bryan, Ohio and Freeport, Illinois, facilities expired on November 19, 2010, for the employees covered by their respective collective bargaining agreements, which account for approximately 26% of the Company's employees. As of December 31, 2011, the employees of these two facilities were working without a contract under the terms of the Company's latest offer. The respective unions have retained the rights to challenge the Company's actions.

AGRICULTURAL MARKET OUTLOOK

Agricultural market sales were significantly higher in 2011 when compared to 2010. The addition of Goodyear's Latin American farm tire business, price increases, and continued strong demand contributed to the higher sales levels. The increase in the global population and the rising middle class in emerging countries may help grow future demand. The gradual increase in the use of biofuels may help sustain future production. Many variables, including weather, grain prices, export markets and future government policies and payments can greatly influence the overall health of the agricultural economy.

EARTHMOVING/CONSTRUCTION MARKET OUTLOOK

Earthmoving and mining sales continue to improve, aided by increases in metals, oil and gas prices. Although they may fluctuate in the short-term, in the long-term, these prices are expected to remain at levels that are attractive for continued investment, which should help support future earthmoving and mining sales. The decline in the United States housing market continues to cause a lower demand for equipment used for construction. The earthmoving/construction segment is affected by many variables, including commodity prices, road construction, infrastructure, government appropriations, housing starts and the on-going banking and credit issues. For 2012, the Company expects strong demand to continue.

CONSUMER MARKET OUTLOOK

Consumer market sales were significantly higher in 2011, when compared to previous years. The increase in net sales was primarily the result of the Goodyear Latin American farm tire acquisition agreement, which included supply agreements for certain non-agricultural product sales, which are included in the consumer segment. The supply agreement sales, which currently make up a large portion of consumer market sales, may fluctuate from period to period.

PENSIONS

The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. These plans are described in Note 23 of the Company's Notes to Consolidated Financial Statements.

The Company's recorded liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined by the Company with the assistance of outside actuaries. Assumptions are based on past experience and anticipated future

trends. These assumptions are reviewed on a regular basis and revised when appropriate. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and the carrying value of the related obligations. During the year ended December 31, 2011, the Company contributed cash funds of \$3.6 million to the frozen defined benefit pension plans. Titan expects to contribute approximately \$7 million to these frozen defined benefit pension plans during 2012.

Titan's projected benefit obligation at December 31, 2011, was \$112.0 million as compared to \$98.8 million at December 31, 2010. The Company's defined benefit pension plans were underfunded by \$42.9 million at December 31, 2011. During 2011, the Company recorded net periodic pension expense of \$4.3 million. Accumulated other comprehensive loss recorded for defined benefit pension plans, net of tax, was \$35.0 million and \$27.4 million at December 31, 2011 and 2010, respectively. Other comprehensive income (loss) is recorded as a direct charge to stockholders' equity and does not affect net income. Titan will be required to record net periodic pension cost in the future; these costs may fluctuate based upon revised assumptions and could negatively affect the Company's financial position, cash flows and results of operations.

RECENTLY ISSUED ACCOUNTING STANDARDS

Fair Value Measurement

In May 2011, the FASB issued ASU No. 2011-04, "Fair Value Measurement (Topic 820) - Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs." This update establishes common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS). The amendments in this update are effective during interim and annual periods beginning after December 15, 2011. The adoption of this update is not expected to have a material effect on the Company's financial position, results of operations or cash flows.

Comprehensive Income

In June 2011, the FASB issued ASU No. 2011-05, "Comprehensive Income (Topic 220) - Presentation of Comprehensive Income." The objective of this update is to improve the comparability, consistency, and transparency of financial reporting to increase the prominence of items reported in other comprehensive income. This update requires that all nonowner changes in stockholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments in this update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. In December of 2011, the FASB issued ASU No. 2011-12, "Comprehensive Income (Topic 220) - Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05." The adoption of these updates is not expected to have a material effect on the Company's financial position, results of operations or cash flows.

Goodwill Impairment Testing

In September 2011, the FASB issued ASU No. 2011-08, "Intangibles-Goodwill and Other (Topic 350) - Testing Goodwill for Impairment." The objective of this update is to simplify how entities test goodwill for impairment. The amendments in the update permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. The amendments in this update are effective for interim and annual goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted and the Company elected to adopt this update for the year ended December 31, 2011. The adoption of this update did not have a material effect on the Company's financial position, results of operations or cash flows.

ITEM 9A – CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company's principal executive officer and principal financial officer have concluded the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) are effective as of the end of the period covered by this Form 10-K based on an evaluation of the effectiveness of disclosure controls and procedures.

Management's Report on Internal Control Over Financial Reporting

Titan's management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed by, or under the supervision of, Titan's principal executive officer and principal financial officer, and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States of America. Internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has performed an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2011, based on criteria described in the "Internal Control-Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, management concluded the Company maintained effective internal control over financial reporting as of December 31, 2011.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2011, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is presented in this Annual Report on Form 10-K.

Remediation of Previously Disclosed Material Weakness

Management previously reported a material weakness in the Company's internal control over financial reporting, related to accounting for Gen 1 inventory in the Annual Report on Form 10-K/A for the year ended December 31, 2010. A material weakness is a deficiency or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

The Company has enhanced the monthly control related to the review of the Gen 1 inventory reserve by incorporating external market data from the mining industry, in addition to receiving input from a variety of management personnel, including those within the sales, marketing and accounting functions, to accurately calculate the value of the Gen 1 inventory.

The Company completed documentation and testing of the corrective actions above and as of December 31, 2011 has concluded that the steps taken have remediated the material weakness related to accounting for Gen 1 inventory.

Changes in Internal Controls Over Financial Reporting

Other than the completed remediation actions described above, there were no material changes in internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) that occurred during the fourth quarter ended December 31, 2011 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Responsibility for Financial Statements

Management is responsible for the preparation of the Company's consolidated financial statements included in this annual report on Form 10-K. Management believes that the consolidated financial statements fairly reflect the Company's financial transactions and the financial statements reasonably present the Company's financial position and results of operations in conformity with accounting principles generally accepted in the United States of America.

The Board of Directors of the Company has an Audit Committee comprised entirely of outside directors who are independent of management. The Committee meets periodically with management, the internal auditors and the independent registered public accounting firm to review accounting control, auditing and financial reporting matters. The Audit Committee is responsible for the appointment of the independent registered public accounting firm and approval of their fees.

The independent registered public accounting firm audits the Company's consolidated financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). The consolidated financial statements as of December 31, 2011, have been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which is included herein.

F- 1

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of
Titan International, Inc.:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Titan International, Inc. and its subsidiaries at December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2011 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

TITAN INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. DESCRIPTION OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES

Business

Titan International, Inc. and its subsidiaries (Titan or the Company) are leading manufacturers of wheels, tires and assemblies for off-highway vehicles used in the agricultural, earthmoving/construction and consumer markets. Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

Principles of consolidation

The consolidated financial statements include the accounts of the Company and its wholly- and majority-owned subsidiaries. Investments in publicly traded entities of less than 20% and those that Titan does not exercise significant influence over are carried at fair value in accordance with Accounting Standards Codification (ASC) 320 Investments – Debt and Equity Securities. The Company has considered the applicable guidance in ASC 323 Investments – Equity Method and Joint Ventures and has concluded that the Company’s 21.8% investment in Titan Europe Plc should be accounted for as an available-for-sale security and recorded at fair value in accordance with ASC 320 Investments – Debt and Equity Securities. The Company has determined after considering the facts and circumstances relating to the investment that the equity method of accounting is not appropriate as the Company does not have significant influence over Titan Europe Plc. All significant intercompany accounts and transactions have been eliminated.

Inventories

Inventories are valued at the lower of cost or market. At December 31, 2011, approximately 30% of the Company's inventories were valued under the last-in, first out (LIFO) method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. The remaining inventories were valued under the first-in, first-out (FIFO) method or average cost method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory.

Deferred financing costs

Deferred financing costs are costs incurred in connection with the Company’s revolving credit facility, 7.875% senior secured notes and 5.625% convertible senior subordinated notes. The deferred financing costs associated with each of the debt facilities are being amortized over the life of the debt. Amortization of deferred financing costs for the debt facilities approximates the effective interest rate method.

Fixed assets

Property, plant and equipment have been recorded at cost. Depreciation is provided using the straight-line method over the following estimated useful lives of the related assets:

	Years
Building and improvements	25 - 40
Machinery and equipment	10 - 15
Tools, dies and molds	5 - 9

Maintenance and repairs are expensed as incurred. When property, plant and equipment are retired or otherwise disposed of, the related cost and accumulated depreciation are eliminated, and any gain or loss on disposition is included in the accompanying consolidated statements of operations.

Interest is capitalized on fixed asset projects which are constructed over a period of time. The amount of interest capitalized is determined by applying a weighted average interest rate to the average amount of accumulated expenditures for the asset during the period. The interest rate used is based on the rates applicable to borrowings outstanding during the period.

TITAN INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fair value of financial instruments

The Company records all financial instruments, including cash and cash equivalents, accounts receivable, notes receivable, accounts payable, other accruals and notes payable at cost, which approximates fair value. Investments in marketable equity securities are recorded at fair value. The 7.875% senior secured notes due 2017 (senior secured notes) and 5.625% convertible senior subordinated notes due 2017 (convertible notes) are carried at cost of \$200.0 million and \$112.9 million at December 31, 2011, respectively. The fair value of these notes at December 31, 2011, as obtained through independent pricing sources, was approximately \$209.0 million for the senior secured notes and approximately \$242.4 million for the convertible notes. The increase in the fair value of the convertible notes is due primarily to the increased value of the underlying common stock.

Available-for-sale securities

The Company has an investment in Titan Europe Plc that was valued at \$29.0 million as of December 31, 2011, representing a 21.8% ownership position, at that time. Titan Europe Plc is publicly traded on the AIM market in London, England. The investment in Titan Europe Plc is included as a component of other assets on the Consolidated Balance Sheets. The Company has considered the applicable guidance in ASC 323 Investments – Equity Method and Joint Ventures and has concluded that the Company’s investment in Titan Europe Plc should continue to be accounted for as an available-for-sale security and recorded at fair value in accordance with ASC 320 Investments – Debt and Equity Securities as the Company does not have significant influence over Titan Europe Plc. In accordance with ASC 320, the Company records the Titan Europe Plc investment as an available-for-sale security and reports this investment at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income. Should the fair value decline below the cost basis, the Company would be required to determine if this decline is other than temporary. If the decline in fair value were judged to be other than temporary, an impairment charge would be recorded. Declared dividends on this investment are recorded in income as a component of other income. See Note 7 for additional information.

Impairment of fixed assets

The Company reviews fixed assets to assess recoverability from future operations whenever events and circumstances indicate that the carrying values may not be recoverable. Impairment losses are recognized in operating results when expected undiscounted future cash flows are less than the carrying value of the asset. Impairment losses are measured as the excess of the carrying value of the asset over the discounted expected future cash flows or the estimated fair value of the asset.

Foreign currency translation

The financial statements of the Company’s foreign subsidiaries are translated to United States currency in accordance with ASC 830 Foreign Currency Matters. Assets and liabilities are translated to United States dollars at period-end exchange rates. Income and expense items are translated at average rates of exchange prevailing during the period. Translation adjustments are included in “Accumulated other comprehensive loss” in stockholders’ equity. At December 31, 2011, the Company’s investment in Titan Europe Plc was classified as available-for-sale securities and this investment is included as a component of other assets on the Consolidated Balance Sheets. Gains and losses that result from foreign currency transactions are included in the accompanying consolidated statements of operations.

Impairment of goodwill

The Company reviews goodwill for impairment during the fourth quarter of each annual reporting period, and whenever events and circumstances indicate that the carrying values may not be recoverable. The Company has elected to early adopt Accounting Standards Update (ASU) 2011-08 and first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. See

Note 9 for additional information.

Revenue recognition

The Company records sales revenue when products are shipped to customers and both title and the risks and rewards of ownership are transferred. Provisions are established for sales returns and uncollectible accounts based on historical experience. Should trends change, adjustments would be necessary to the estimated provisions.

Cost of sales

Cost of sales is comprised primarily of direct materials and supplies consumed in the manufacturing of the Company's products, as well as manufacturing labor, depreciation expense and overhead expense necessary to acquire and convert the purchased materials and supplies into a finished product. Cost of sales also includes all purchasing, receiving, inspection, internal transfers, and related distribution costs.

TITAN INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Selling, general and administrative expense

Selling, general and administrative (SG&A) expense is comprised primarily of sales commissions, marketing expense, selling and administrative wages, information system costs, legal fees, bank charges, audit fees, depreciation and amortization expense on non-manufacturing assets, and other administrative items.

Research and development expense

Research and development (R&D) expenses are expensed as incurred. R&D costs were \$4.2 million, \$6.3 million and \$8.9 million for the years of 2011, 2010 and 2009, respectively. The lower R&D costs recorded during the past two years primarily resulted from less R&D related to the Giant OTR products.

Advertising

Advertising expenses are included in SG&A expense and are expensed as incurred. Advertising costs were approximately \$2 million for each of the years ended December 31, 2011, 2010 and 2009.

Warranty costs

The Company provides limited warranties on workmanship on its products in all market segments. The provision for estimated warranty costs is made in the period when such costs become probable and is based on past warranty experience. See Note 11 for additional information.

Income taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and liabilities. The Company assesses the realizability of its deferred tax asset positions to determine if a valuation allowance is necessary. In assessing the realizability of deferred tax assets, the Company considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. The Company considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment.

Earnings per share

Basic earnings per share (EPS) is computed by dividing consolidated net earnings by the weighted average number of common shares outstanding. Diluted EPS is computed by dividing adjusted consolidated net earnings by the sum of the weighted average number of common shares outstanding and the weighted average number of potential common shares outstanding. Potential common shares consist of outstanding options under the Company's stock option plans and the conversion of the Company's 5.625% convertible senior subordinated notes.

Cash equivalents

The Company considers short-term debt securities with an original maturity of three months or less to be cash equivalents.

Interest paid

The Company paid \$24.8 million, \$23.7 million and \$16.7 million for interest in 2011, 2010 and 2009, respectively.

Income taxes paid

Titan paid \$30.8 million, \$0.2 million and \$0.4 million for income taxes in 2011, 2010 and 2009, respectively.

Environmental liabilities

Environmental expenditures that relate to current operations are expensed or capitalized as appropriate. Expenditures that relate to an existing condition caused by past operations and that do not contribute to current or future revenue are expensed. Liabilities are recorded when environmental assessments and/or remedial efforts are probable and can be reasonably estimated.

Stock-based compensation

At December 31, 2011, the Company has two stock-based compensation plans, which are described in Note 24. Compensation expense for stock-based compensation is recognized over the requisite service period at the estimated fair value of the award at the grant date. The Company granted 492,500 and 494,938 stock options in 2011 and 2010, respectively. The Company granted no stock options in 2009.

Reclassification

Certain amounts from prior years have been reclassified to conform to the current year's presentation.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Use of estimates

The policies utilized by the Company in the preparation of the financial statements conform to accounting principles generally accepted in the United States of America and require management to make estimates, assumptions and judgments that affect the reported amount of assets and liabilities, and disclosure of contingent assets and liabilities, at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual amounts could differ from these estimates and assumptions.

Recently issued accounting standards

Fair Value Measurement

In May 2011, the FASB issued ASU No. 2011-04, "Fair Value Measurement (Topic 820) - Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs." This update establishes common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS). The amendments in this update are effective during interim and annual periods beginning after December 15, 2011. The adoption of this update is not expected to have a material effect on the Company's financial position, results of operations or cash flows.

Comprehensive Income

In June 2011, the FASB issued ASU No. 2011-05, "Comprehensive Income (Topic 220) - Presentation of Comprehensive Income." The objective of this update is to improve the comparability, consistency, and transparency of financial reporting to increase the prominence of items reported in other comprehensive income. This update requires that all nonowner changes in stockholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments in this update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. In December of 2011, the FASB issued ASU No. 2011-12, "Comprehensive Income (Topic 220) - Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05." The adoption of these updates is not expected to have a material effect on the Company's financial position, results of operations or cash flows.

Goodwill Impairment Testing

In September 2011, the FASB issued ASU No. 2011-08, "Intangibles-Goodwill and Other (Topic 350) - Testing Goodwill for Impairment." The objective of this update is to simplify how entities test goodwill for impairment. The amendments in the update permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. The amendments in this update are effective for interim and annual goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted and the Company elected to adopt this update for the year ended December 31, 2011. The adoption of this update did not have a material effect on the Company's financial position, results of operations or cash flows.

2. ACQUISITIONS

Acquisition of AII Holding, Inc.

On April 1, 2011, Titan purchased a 70% controlling interest in AII Holding, Inc. (AII) for \$1.3 million of Titan stock and payment of \$2.3 million for AII's debt. The fair value of the identified assets acquired less liabilities assumed

exceeded the fair value of the consideration transferred and noncontrolling interest. Therefore, a bargain purchase gain of \$0.3 million was recorded on the transaction.

Acquisition of Goodyear's Latin American Farm Tire Business

On April 1, 2011, Titan closed on the acquisition of The Goodyear Tire & Rubber Company's (Goodyear) Latin American farm tire business for approximately \$98.6 million U.S. dollars. In addition, there were approximately \$1.3 million of acquisition related costs recorded as selling, general and administrative costs during the year ended December 31, 2011. The transaction includes Goodyear's Sao Paulo, Brazil manufacturing plant, property, equipment; inventories; a licensing agreement that allows Titan to sell Goodyear-brand farm tires in Latin America for seven years; and extends the North American licensing agreement for seven years. Net sales and net income before taxes from the acquisition date included in the statement of operations was \$276.5 million and \$13.8 million, respectively.

F- 10

TITAN INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company funded the acquisition with cash on hand. The purchase price was allocated to the assets acquired and liabilities assumed based on their fair values. Inventory was valued using the comparative sales method. Real and personal property was valued at fair value. The excess of the purchase price over the identifiable assets acquired and liabilities assumed was reflected as goodwill. The goodwill was allocated to the agricultural segment.

The purchase price allocation of the Latin American farm tire business consisted of the following (in thousands):

Cash	\$1,018	
Inventories	14,562	
Prepaid & other current assets	4,929	
Property, plant & equipment	108,905	
Goodwill	22,896	
Other assets	39,263	
Other current liabilities	(21,127))
Deferred income taxes	(30,985))
Other noncurrent liabilities	(40,823))
Net assets acquired	\$98,638	

The purchase price allocation includes \$42.5 million for prepaid royalty. The prepaid royalty is for a seven year period and was calculated using a 2% royalty discounted at a 10% rate. The prepaid royalty and discount will be amortized over the seven year period of the agreement. The current portion of the prepaid royalty was \$3.9 million and is included in prepaid & other current assets. The noncurrent portion of the prepaid royalty was \$38.6 million and is included in other assets. At December 31, 2011, the current balance of the prepaid royalty was \$4.3 million and the noncurrent balance of the prepaid royalty was \$33.8 million.

The purchase price allocation includes \$53.9 million for supply agreement liability which was valued using the incremental income method. The supply agreement liability was recorded as the supply agreements are for sales at below market prices. The liability will be amortized with an increase to sales over the three year life of the agreement. The current portion of the supply agreement was \$18.0 million and is included in other current liabilities. The noncurrent portion of the supply agreement was \$35.9 million and is included in other noncurrent liabilities. At December 31, 2011, the current balance of the supply agreement liability was \$15.6 million and the noncurrent balance of the supply agreement liability was \$19.5 million.

Pro forma financial information

The following unaudited pro forma financial information gives effect to the acquisition of Goodyear's Latin American farm tire business as if the acquisition had taken place on January 1, 2010. The pro forma financial information for the Sao Paulo, Brazil manufacturing facility was derived from The Goodyear Tire & Rubber Company's historical accounting records. These amounts have been calculated by adjusting the historical results of the Sao Paulo, Brazil facility to reflect the additional depreciation and the amortization of the prepaid royalty discount and supply agreement liability assuming the fair value adjustments had taken place.

Pro forma financial information is as follows (in thousands, except per share data):

	2011	2010
Net sales	\$1,519,892	\$1,011,568
Net income	62,266	13,760
Net income attributable to Titan	62,282	13,760
Basic earnings per share	\$1.50	\$.39
Diluted earnings per share	1.26	.39

The pro forma information is presented for illustrative purposes only and may not be indicative of the results that would have been obtained had the acquisition actually occurred on January 1, 2010, nor is it necessarily indicative of Titan's future consolidated results of operations or financial position.

7. INVESTMENT IN TITAN EUROPE

Investment in Titan Europe Plc at December 31, 2011 and 2010, consisted of the following (amounts in thousands):

	2011	2010
Investment in Titan Europe Plc	\$28,998	\$22,693

Titan Europe Plc is publicly traded on the AIM market in London, England. The Company's investment in Titan Europe represents a 21.8% ownership percentage. The Company has considered the applicable guidance in ASC 323 Investments – Equity Method and Joint Ventures and has concluded that the Company's investment in Titan Europe Plc should be accounted for as an available-for-sale security and recorded at fair value in accordance with ASC 320 Investments – Debt and Equity Securities as the Company does not have significant influence over Titan Europe Plc. The investment in Titan Europe Plc is included as a component of other assets on the Consolidated Condensed Balance Sheets. Titan's cost basis in Titan Europe is \$5.0 million. Titan's accumulated other comprehensive income includes a gain on the Titan Europe Plc investment of \$15.5 million, which is net of tax of \$8.5 million. The increased value in the Titan Europe Plc investment at December 31, 2011, was due primarily to a higher publicly quoted Titan Europe Plc market price.

8. OTHER ASSETS

Other assets at December 31, 2011 and 2010, consisted of the following (amounts in thousands):

	2011	2010
Investment in Titan Europe Plc	\$28,998	\$22,693

F- 13

TITAN INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company reviews goodwill for impairment during the fourth quarter of each annual reporting period, and whenever events and circumstances indicate that the carrying values may not be recoverable. The Company has elected to early adopt Accounting Standards Update (ASU) 2011-08 and first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. For the December 31, 2011 qualitative assessment, the Company assessed various qualitative factors including the Brazilian economy, the agricultural equipment market and the 2011 performance of the Brazilian manufacturing facility. Based on the review, the Company determined the two-step goodwill impairment test was not required.

When the two-step goodwill impairment test is performed, the Company evaluates the recoverability of goodwill by estimating the future discounted cash flows of the reporting unit to which the goodwill relates and using an earnings before interest, taxes, depreciation, and amortization (EBITDA) multiple approach. In determining the estimated future cash flows, the Company considers current and projected future levels of income as well as business trends and economic conditions. When the Company's estimated fair value of the reporting unit is less than the carrying value, a second step of the impairment analysis is performed. In this second step, the implied fair value of goodwill is calculated as the excess of the fair value of a reporting unit over the fair values assigned to its assets and liabilities. If the implied fair value of goodwill is less than the carrying value of the reporting unit's goodwill, the difference is recognized as an impairment loss.

10. OTHER CURRENT LIABILITIES

Other current liabilities at December 31, 2011 and 2010, consisted of the following (amounts in thousands):

	2011	2010
Warranty	\$17,659	\$12,471
Supply agreement liability	15,578	—

Warranty payments made	(21,939)	(16,493)
Warranty liability, December 31	\$17,659	\$12,471

The Company provides limited warranties on workmanship on its products in all market segments. The majority of the Company's products have a limited warranty that ranges from zero to ten years, with certain products being prorated after the first year. The Company calculates a provision for warranty expense based on past warranty experience. Warranty accruals are included as a component of other current liabilities on the Consolidated Balance Sheets.

7.875% senior secured notes due 2017

The Company's 7.875% senior secured notes (senior secured notes) are due October 2017. These notes are secured by the land and buildings of the following subsidiaries of the Company: Titan Tire Corporation, Titan Tire Corporation of Bryan, Titan Tire Corporation of Freeport and Titan Wheel Corporation of Illinois. The Company's senior secured notes outstanding balance was \$200.0 million at December 31, 2011.

5.625% convertible senior subordinated notes due 2017

The Company's 5.625% convertible senior subordinated notes (convertible notes) are due January 2017. The initial base conversion rate for the convertible notes is 93.0016 shares of Titan common stock per \$1,000 principal amount of convertible notes, equivalent to an initial base conversion price of approximately \$10.75 per share of Titan common stock. If the price of Titan common stock at the time of determination exceeds the base conversion price, the base conversion rate will be increased by an additional number of shares (up to 9.3002 shares of Titan common stock per \$1,000 principal amount of convertible notes) as determined pursuant to a formula described in the indenture. The base conversion rate will be subject to adjustment in certain events. The Company's convertible notes balance was \$112.9 million at December 31, 2011.

In the first quarter of 2011, the Company closed an Exchange Agreement with a note holder of the convertible notes, pursuant to which such holder converted approximately \$59.6 million in aggregate principal amount of the Convertible Notes into approximately 6.6 million shares of the Company's common stock, plus a payment for the accrued and unpaid interest. In connection with the exchange, the Company recognized a noncash charge of \$16.1 million in accordance with ASC 470-20 Debt - Debt with Conversion and Other Options.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

8% senior unsecured notes due 2012

In the first quarter of 2011, Titan satisfied and discharged the indenture relating to the 8% senior unsecured notes due January 2012 by depositing with the trustee \$1.1 million cash representing the outstanding principal of such notes and interest payments due on July 15, 2011, and at maturity on January 15, 2012. Titan irrevocably instructed the trustee to apply the deposited money toward the interest and principal of the notes. In 2010, the Company repurchased \$192.7 million of principal value of senior unsecured notes resulting in a loss on note repurchase of \$14.6 million.

Revolving credit facility

The Company's \$100 million revolving credit facility (credit facility) with agent Bank of America, N.A. has a January 2014 termination date and is collateralized by the accounts receivable and inventory of Titan and certain of its domestic subsidiaries. During 2011 and at December 31, 2011, there were no borrowings under the credit facility. Outstanding letters of credit were \$12.0 million at December 31, 2011, leaving \$88.0 million of unused availability on the credit facility. The credit facility contains certain financial covenants, restrictions and other customary affirmative and negative covenants. Titan is in compliance with these covenants and restrictions as of December 31, 2011.

Other debt

Brazil Term Loan

In May 2011, the Company entered into a two-year, unsecured \$10.0 million Term Loan with Bank of America, N.A. (BoA Term Loan) to provide working capital for the Sao Paulo, Brazil manufacturing facility. Borrowings under the BoA Term Loan bear interest at a rate equal to LIBOR plus 200 basis points. The BoA Term Loan shall be a minimum of \$5.0 million with the option for an additional \$5.0 million loan for a maximum of \$10.0 million. The BoA Term Loan is due May 2013. The Company entered into an interest rate swap agreement and cross currency swap transaction with Bank of America Merrill Lynch Banco Multiplo S.A. that is designed to convert the outstanding \$5.0 million US Dollar based LIBOR loan to a Brazilian Real based CDI loan. See Note 14 for additional information. As of December 31, 2011, the Company had \$5.0 million outstanding on this loan and the interest rate including the effect of the swap agreement was approximately 14%.

Brazil Revolving Line of Credit

The Company's wholly-owned Brazilian subsidiary, Titan Pneus Do Brasil Ltda (Titan Brazil), has a revolving line of credit (Brazil line of credit) established with Bank of America Merrill Lynch Banco Multiplo S.A. in May 2011 that is secured by a \$12.0 million line of credit between the Company and Bank of America N.A. under the Company's \$100.0 million credit facility. Titan Brazil could borrow up to 16.0 million Brazilian Reais, which equates to approximately \$8.5 million dollars as of December 31, 2011, for working capital purposes. Under the terms of the Brazil line of credit, borrowings, if any, bear interest at a rate of LIBOR plus 247 basis points. At December 31, 2011 there was \$4.3 million outstanding due May 2012 and the interest rate was approximately 17%.

Brazil Term Loan

In December 2011, the Company entered into a short term loan due in February of 2012. At December 31, 2011 there was \$7.4 million outstanding and the interest rate was approximately 17%.

14. DERIVATIVE FINANCIAL INSTRUMENTS

The Company uses a financial derivative to mitigate its exposure to volatility in the interest rate and foreign currency exchange rate in Brazil. The Company uses this derivative instrument to hedge exposure in the ordinary course of business and does not invest in derivative instruments for speculative purposes. In order to reduce interest rate and foreign currency risk on the BoA Term Loan, the Company entered into an interest rate swap agreement and cross

currency swap transaction with Bank of America Merrill Lynch Banco Multiplo S.A. that is designed to convert the outstanding \$5.0 million US Dollar based LIBOR loan to a Brazilian Real based CDI loan. The Company has not designated this agreement as a hedging instrument. Changes in the fair value of the cross currency swap are recorded in other income (expense) and changes in the fair value of the interest rate swap agreement are recorded as interest expense (or gain as an offset to interest expense). For the year ended December 31, 2011, the Company recorded \$0.1 million of other income and \$0.4 million of interest expense related to this derivative.

16. STOCKHOLDERS' EQUITY

The Company is authorized by the Board of Directors to repurchase up to 2.5 million common shares subject to debt agreement covenants. The Company repurchased no Titan common shares in 2011, 2010, or 2009. The Company has no plans at this time to repurchase any Titan common stock. Titan paid cash dividends of \$.02 per share of common stock for 2011, 2010, and 2009. Dividends declared totaled \$0.8 million, \$0.7 million and \$0.7 million for 2011, 2010 and 2009, respectively.

17. FAIR VALUE MEASUREMENTS

ASC 820 Fair Value Measurements establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers are defined as:

Level 1 – Quoted prices in active markets for identical instruments;

Level 2 – Inputs other than quoted prices in active markets that are either directly or indirectly observable.

Level 3 – Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

18. ROYALTY EXPENSE

The Company has a trademark license agreement with Goodyear to manufacture and sell certain off-highway tires in North America and Latin America under the Goodyear name. The North American and Latin American royalties were prepaid for seven years as a part of the Goodyear Latin American farm tire acquisition. Royalty expenses recorded for the years ended December 31, 2011, 2010 and 2009, were \$9.8 million, \$9.3 million and \$7.6 million, respectively.

19. NONCASH CONVERTIBLE DEBT CONVERSION CHARGE

Noncash convertible debt conversion charge consisted of the following (amounts in thousands):

	2011	2010	2009
Noncash convertible debt conversion charge	\$ (16,135) \$—	\$—

In the first quarter of 2011, the Company closed an Exchange Agreement with a note holder of its 5.625% convertible senior subordinated notes (convertible notes), pursuant to which such holder converted approximately \$59.6 million in aggregate principal amount of the Convertible Notes into approximately 6.6 million shares of the Company's common stock, plus a payment for the accrued and unpaid interest. In connection with the exchange, the Company recognized a noncash charge of \$16.1 million in accordance with ASC 470-20 Debt - Debt with Conversion and Other Options.

20. GAIN (LOSS) ON NOTE REPURCHASE

Gain (loss) on note repurchase consisted of the following (amounts in thousands):

	2011	2010	2009
Gain (loss) on note repurchase	\$—	\$ (14,573) \$ 1,398

In June 2010, the Company closed on a tender transaction to purchase \$47.4 million of its outstanding 8% senior unsecured notes due January 2012 (senior unsecured notes). In October 2010, the Company closed on another tender transaction to purchase \$138.9 million of its outstanding senior unsecured notes. In connection with these tender offers and an additional note repurchase of \$6.5 million in July 2010, the Company recorded expenses of \$14.6 million. These expenses were related to: (i) early tender premium of \$13.0 million, (ii) unamortized deferred financing fees of \$1.2 million and (iii) other fees of \$0.4 million.

For 2009, the Company recorded a gain on a note repurchase of \$1.4 million resulting from the Company's repurchase of \$6.2 million of principal value of senior unsecured notes for approximately \$4.8 million in the first quarter of 2009.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities at December 31, 2011 and 2010, are as follows (amounts in thousands):

	2011	2010
Deferred tax assets:		
Net operating loss carryforwards	\$815	\$9,755

Fixed assets	(62,062) (34,049
Deferred tax liabilities	(62,062) (34,049
Net deferred tax asset	\$(11,916) \$14,376

The Company recorded income tax expense of \$37.8 million for the year ended December 31, 2011, and income tax benefit of \$(3.3) million for the year ended December 31, 2010, and an income tax benefit of \$(7.4) million for the year ended December 31, 2009. The Company's income tax expense (benefit) and rate differs from the amount of income tax determined by applying the U.S. Federal income tax rate to pre-tax income primarily as a result of state taxes. The Company has various state net operating loss carryforwards which are subject to expiration from 2018 to 2025.

At December 31, 2011, U.S. income taxes have not been provided on approximately \$1 million of unremitted earnings of subsidiaries operating outside the U.S. These earnings, which are considered to be invested indefinitely, would become subject to income tax if they were remitted as dividends, were lent to the Company or a U.S. affiliate, or if the Company were to sell its stock in the subsidiaries. The amount of unrecognized deferred U.S. income tax liability on these unremitted earnings is insignificant.

The Company has applied the provisions of ASC 740, "Income Taxes" related to unrecognized tax benefits. No adjustment was made to retained earnings in adopting these provisions in 2007. At December 31, 2011, 2010 and 2009, there were no unrecognized tax benefits. At this time the Company does not expect any significant increases or decreases to its unrecognized tax benefits within 12 months of this reporting date. Titan has identified its federal tax return and its Illinois state tax return as "major" tax jurisdictions. The Company is subject to (i) federal tax examinations for periods 2010 to 2011 and (ii) Illinois state income tax examinations for years 2008 to 2011.

23. EMPLOYEE BENEFIT PLANS

Pension plans

The Company has a frozen defined benefit pension plan covering certain employees of Titan Tire Corporation (Titan Tire) and has a frozen defined benefit pension plan covering certain employees of Titan Tire Corporation of Bryan (Bryan). The Company also has a frozen contributory defined benefit pension plan covering certain former eligible

bargaining employees of its Walcott, Iowa, facility (Walcott). Additionally, the Company maintains a contributory defined benefit plan that covered former eligible bargaining employees of Dico, Inc (Dico). This Dico plan purchased a final annuity settlement contract in October 2002. As a part of the Goodyear Latin America farm tire acquisition, the Company has a pension plan in Brazil. As of December 31, 2011, the pension plan assets were not yet transferred to Titan. However, the Company is accounting for the net liabilities of these plans. The Company's policy is to fund pension costs as required by law, which is consistent with the funding requirements of federal laws and regulations.

TITAN INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company's defined benefit plans have been aggregated in the following table. Included in the December 31, 2011, presentation are the Titan Tire, Bryan, Walcott and Brazil plans which have a projected benefit obligation of \$112.0 million, exceeding the fair value of plan assets of \$68.6 million at December 31, 2011. Included in the December 31, 2010, presentation are the Titan Tire, Bryan and Walcott plans which have a projected benefit obligation of \$98.8 million, exceeding the fair value of plan assets of \$72.6 million at December 31, 2010. The Company absolved itself from the liabilities associated with the Dico plan with the purchase of a final annuity settlement contract in 2002. Therefore, the plan no longer maintains a benefit obligation. The fair value of the Dico plan assets was \$0.5 million at December 31, 2011 and 2010.

The following table provides the change in benefit obligation, change in plan assets, funded status and amounts recognized in the consolidated balance sheet of the defined benefit pension plans as of December 31, 2011 and 2010 (amounts in thousands):

The Company invests in a diversified portfolio consisting of an array of asset classes in an attempt to maximize returns while minimizing risk. These asset classes include U.S. equities, fixed income, cash and cash equivalents, and international equities. The investment objectives are to provide for the growth and preservation of plan assets on a long-term basis through investments in: (i) investment grade securities that provide investment returns that meet or exceed the Standard & Poor's 500 Index and (ii) investment grade fixed income securities that provide investment returns that meet or exceed the Barclays Capital Aggregate Bond Index. The U.S. equities asset category included the Company's common stock in the amount of \$3.3 million (approximately five percent of total plan assets) at December 31, 2011, and \$3.5 million (approximately five percent of total plan assets) at December 31, 2010.

The fair value of money market funds, stock, bonds, U.S. government securities and mutual funds are determined based on valuation for identical instruments in active markets. The fair value of common and collective trusts is determined based on the fair value of the underlying instruments.

TITAN INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The long-term rate of return for plan assets is determined using a weighted-average of long-term historical approximate returns on cash and cash equivalents, fixed income securities, and equity securities considering the anticipated investment allocation within the plans. The expected return on plan assets is anticipated to be 7.5% over the long-term. This rate assumes long-term historical returns of approximately 9% for equities and approximately 6% for fixed income securities using the plans' target allocation percentages. Professional investment firms, none of which are Titan employees, manage the plan assets.

Although the 2012 minimum pension funding calculations are not finalized, the Company estimates those funding requirements will be approximately \$7 million.

Projected benefit payments from the plans as of December 31, 2011, are estimated as follows (amounts in thousands):

2012	\$6,916
2013	6,997
2014	7,170
2015	7,296
2016	7,533

401(k)

The Company sponsors four 401(k) retirement savings plans. One plan is for the benefit of substantially all employees who are not covered by a collective bargaining arrangement. Titan provides a 25% matching contribution in the form of the Company's common stock on the first 6% of the employee's contribution in this plan. The Company issued 26,346 shares, 49,536 shares and 59,257 shares of treasury stock in connection with this 401(k) plan during 2011, 2010 and 2009, respectively. Expenses to the Company related to this common stock matching contribution were \$0.5 million, \$0.5 million and \$0.4 million for 2011, 2010 and 2009.

The other three 401(k) plans are for employees covered by collective bargaining arrangements at (i) Titan Tire Corporation; (ii) Titan Tire Corporation of Freeport; and (iii) Titan Tire Corporation of Bryan. These three plans do not include a Company matching contribution. Employees are fully vested with respect to their contributions.

24. STOCK OPTION PLANS

The Company accounts for stock options using ASC 718 Compensation – Stock Compensation. The Company recorded stock-based compensation of \$2.4 million in 2011 and \$0.2 million in 2010. No stock-based compensation expense was recorded during 2009. The Company granted 492,500 stock options in 2011 and 494,938 stock options in 2010. Options to the Board of Directors vest immediately and options to employees vest over three years. All options expire 10 years from the grant date. The Company granted no stock options during 2009. All stock options granted before 2010 were fully vested before January 1, 2009.

Non-Employee Director Stock Option Plan

The Company adopted the 1994 Non-Employee Director Stock Option Plan (the Director Plan) to provide for grants of stock options as a means of attracting and retaining qualified independent directors for the Company. There will be no additional issuance of stock options under this plan as it has expired. Options previously granted are fully vested and expire 10 years from the grant date of the option.

2005 Equity Incentive Plan

The Company adopted the 2005 Equity Incentive Plan to provide stock options as a means of attracting and retaining qualified independent directors and employees for the Company. A total of 2.3 million shares are available for future

issuance under the equity incentive plan. The exercise price of stock options may not be less than the fair market value of the common stock on the date of the grant. The vesting and term of each option is set by the Board of Directors. The Company granted 492,500 stock options under this plan in 2011 and 494,938 stock options under this plan in 2010. In 2009, no stock options were granted under this equity incentive plan.

Exercisable, December 31, 2011	495,805	14.53	6.00	\$2,782

The total intrinsic value of options exercised in 2011 was \$1.3 million. Cash received from the exercise of stock options was \$0.5 million for 2011. Tax benefit realized for the tax deductions from stock options exercised was \$0.7 million for 2011. The weighted-average per share estimated grant date fair value of options issued in 2011 was \$13.30. Pre-tax unrecognized compensation expense for stock options was \$8.1 million at December 31, 2011, and will be recognized as expense over a weighted-average period of 2.6 years.

The total intrinsic value of options exercised in 2010 was \$0.4 million. Cash received from the exercise of stock options was \$0.3 million for 2010. The weighted-average per share estimated grant date fair value of options issued in 2010 was \$8.65. There was no tax benefit realized for the tax deductions from stock options exercised for 2010.

The total intrinsic value of options exercised in 2009 was \$0.2 million. Cash received from the exercise of stock options was \$1.1 million for 2009. There was no tax benefit realized for the tax deductions from stock options exercised for 2009.

The Company currently uses treasury shares to satisfy any stock option exercises. At December 31, 2011, the Company had 0 thousand 1.9 million shares of treasury stock.

Valuation Assumptions

The Company uses the Black-Scholes option pricing model to determine the fair value of its stock options. The determination of the fair value of stock option awards on the date of grant using option pricing models is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables. These variables include the Company's expected stock price volatility over the expected term of the awards, actual and projected stock option exercise behaviors, risk-free interest rates and expected dividends. The expected term of options represents the period of time over which options are expected to be outstanding and is estimated based on historical experience. Expected volatility is based on the historical volatility of the Company's common stock calculated over the expected term of the option. The risk-free interest rate is based on U.S. Treasury yields in effect at the date of grant.

Weighted average assumptions used for stock options issued in 2011 and 2010 (no options were issued in 2009):

	2011	2010	
Expected life (in years)	6.0	6.1	
Expected volatility	65.8	% 55.5	%
Expected dividends	0.1	% —	
Risk-free interest rate	1.21	% 1.82	%

25. LITIGATION

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

26. LEASE COMMITMENTS

The Company leases certain buildings and equipment under operating leases. Certain lease agreements provide for renewal options, fair value purchase options, and payment of property taxes, maintenance and insurance by the Company. Total rental expense was \$1.5 million, \$2.1 million and \$2.5 million for the years ended December 31, 2011, 2010 and 2009, respectively.

At December 31, 2011, future minimum rental commitments under noncancellable operating leases with initial or remaining terms in excess of one year are as follows (amounts in thousands):

2012	\$567
2013	452
2014	353
Thereafter	55
Total future minimum lease payments	\$1,427

27. CONCENTRATION OF CREDIT RISK

Net sales to Deere & Company in Titan's agricultural, earthmoving/construction and consumer markets represented 18% of the Company's consolidated revenues for the year ended December 31, 2011, 26% of the Company's consolidated revenues for the year ended December 31, 2010, and 24% of the Company's consolidated revenues for the year ended December 31, 2009. Net sales to CNH Global N.V. in Titan's three markets represented 11% of the Company's consolidated revenues for the year ended December 31, 2011, 15% of the Company's consolidated revenues for the year ended December 31, 2010, and 13% of the Company's consolidated revenues for the year ended December 31, 2009. No other customer accounted for more than 10% of Titan's net sales in 2011, 2010 or 2009.

28. RELATED PARTY TRANSACTIONS

The Company sells products and pays commissions to companies controlled by persons related to the chief executive officer of the Company. The related party is Mr. Fred Taylor and is Mr. Maurice Taylor's brother. The companies which Mr. Fred Taylor is associated with that do business with Titan include the following: Blackstone OTR, LLC; FBT Enterprises; and OTR Wheel Engineering. During 2011, 2010 and 2009, sales of Titan product to these companies were approximately \$2.6 million, \$1.9 million and \$1.0 million, respectively. Titan had trade receivables due from these companies of approximately \$0.0 million at December 31, 2011, and approximately \$0.4 million at December 31, 2010. On other sales referred to Titan from these manufacturing representative companies, commissions were approximately \$2.3 million, \$1.6 million and \$1.3 million during 2011, 2010 and 2009, respectively.

29. SEGMENT AND GEOGRAPHICAL INFORMATION

The Company has aggregated its operating units into reportable segments based on its three customer markets: agricultural, earthmoving/construction and consumer. These segments are based on the information used by the chief executive officer to make certain operating decisions, allocate portions of capital expenditures and assess segment performance. The accounting policies of the segments are the same as those described in Note 1, "Description of Business and Significant Accounting Policies." Segment external revenues, expenses and income from operations are determined on the basis of the results of operations of operating units of manufacturing facilities. Segment assets are generally determined on the basis of the tangible assets located at such operating units' manufacturing facilities and the intangible assets associated with the acquisitions of such operating units. However, certain operating units' goodwill

and property, plant and equipment balances are carried at the corporate level.

Titan is organized primarily on the basis of products being included in three marketing segments, with each reportable segment including wheels, tires and wheel/tire assemblies.
