Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): _____

Edgar Filing: VEOLIA ENVIRONNEMENT - Form 6-K

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): _____

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If “Yes” marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b):

PRESS RELEASE

Kuwait

**Veolia to build the desalination plant
at the Az Zour North complex for 320 million euros**

Paris, January 13, 2014 – Veolia Environnement has just won the contract to build the seawater desalination plant at the Az Zour North complex in Kuwait for 320 million euros.

Under this EPC (Engineering, Purchasing and Construction) contract won in partnership with Hyundai Heavy Industries, Veolia, through its subsidiary Sidem, will build a plant with a daily production capacity of 486,400 cubic meters of water. Hyundai will be responsible for building the 1,500-MW power station. All the electricity generated and the water produced will be purchased by the Kuwaiti government for 40 years. Work will begin before the end of 2013 and is scheduled for completion by the end of 2016. The Az Zour desalination plant will account for approximately 20% of Kuwait's installed capacity.

Sidem is one of the few companies in the world with complete command of thermal desalination technologies. The technology chosen for Az Zour North, Multi-effect distillation

(MED), is able to adapt to fluctuations in water demand over time. Additionally, it is one of the lowest energy consuming and most robust desalination techniques available on the market, and so the most economically efficient as

well. With a portfolio of more than 250 projects, representing more than 80% of the global market share, Veolia is the undeniable leader for this desalination process.

The construction of this desalination plant is part of the Az Zour North electricity generation and water production project located 100 kilometers south of the Kuwaiti capital. Awarded a year ago to the consortium of GDF Suez Energy International (France), Sumitomo Corporation (Japan) and Abdullah Hamad Al-Sager and Brothers (Kuwait), this is the country's first public-private partnership for an independent water and power project (IWPP). This project is part of the long-term plan to develop Kuwait's installed electricity generation and water production capacity.

In 2010, Veolia had already been selected to build the Az Zour South water desalination plant, for which it opted for reverse osmosis membrane technology. With a daily capacity of 136,000 cubic meters of water, this plant is currently in the start-up phase.

“Veolia's high-tech solutions for water services, as for environmental services and energy, are what differentiates the company from the international competition in this region of the Middle East that requires innovative solutions”, says Antoine Frérot, Chairman and Chief Executive Officer of Veolia Environnement. “We are honored to be working with Kuwait on its infrastructure policy to underpin its development and serve its growing population.”

Veolia Environnement (Paris Euronext: VIE and NYSE: VE) is the worldwide reference in environmental solutions. With 220,000 employees*, the company has operations all around the world and provides tailored solutions to meet the needs of municipal and industrial customers in three complementary segments: water management, waste management and energy management. Veolia Environnement recorded revenue of €29.4 billion* in 2012.
