EXHIBIT 1

Edgar Filing: SUNCOR ENERGY INC - Form 6-K

FOR IMMEDIATE RELEASE

JANUARY 17, 2002

SUNCOR ENERGY ENDS 2001 WITH PROJECT MILLENNIUM COMPLETE, INCREASED PRODUCTION AND EARNINGS

(All financial figures are in Canadian dollars unless noted otherwise. Natural gas converts to oil at a 6:1 ratio. Financial figures for the year ended December 31, 2001 and quarterly figures are unaudited.)

CALGARY, ALBERTA -- Suncor Energy Inc. today announced it set a new company record for oil production and recorded unaudited consolidated earnings for 2001 of \$388 million (\$1.63 per common share), up from \$377 million in 2000 (\$1.58 per common share). Cash flow from operations for 2001 was \$831 million (\$3.52 per common share), compared with \$958 million (\$4.11 per common share) in 2000. Suncor's daily average production rate was 156,600 barrels of oil equivalent (BOE), compared with 154,400 BOE per day the year before.

"The year 2001 was a landmark year for Suncor in that we completed Millennium, a project that is delivering increased production for Suncor and serves as a foundation for our long-term growth strategy," said Rick George, president and chief executive officer. "We delivered on our objective of doubling production capacity to 225,000 barrels per day by year end."

Suncor expects production at the oil sands plant to average about 210,000 barrels per day in 2002 as the new Millennium facilities are fully integrated with base operations. Project Millennium was a four-year expansion of Suncor's oil sands operation with a \$3.4 billion capital cost.

The increase in production, combined with higher natural gas commodity prices and retail margins earlier in the year, contributed to the year-over-year increase in earnings. Suncor's cash flow declined from 2000 primarily as a result of the cost of Project Millennium start-up.

"With Project Millennium behind us, Suncor can focus on getting back to basics in 2002," said George. "We'll focus our efforts on strengthening our business by delivering steady, reliable production and reducing operating costs. And we'll also seek opportunities to debottleneck our oil sands operation and add additional oil production. The company's growth plans will also stay high on our agenda."

George said Suncor will continue construction of its Firebag In-Situ Oil Sands Project and further plans to expand its oil sands business up to 550,000 barrels per day over the next decade.

Another key priority for Suncor is to reduce its \$3.1 billion debt. As part of that effort, Suncor has hedged 40 per cent of its 2002 production to mitigate the impact of an uncertain crude oil market on the company's ability to reduce debt.

EARNINGS COMPONENTS (\$ millions after income taxes)	Year ended December 2001

CASH FLOW FROM OPERATIONS	831

OPERATING HIGHLIGHTS DURING 2001

OIL SANDS

Oil Sands production hit a new record in 2001, averaging 123,200 barrels per day, up approximately eight per cent from 2000. Cash operating costs at Oil Sands increased during the year to \$17.00 per barrel, including Project Millennium start-up costs.

OIL SANDS CASH OPERATING COSTS (dollars per barrel)	Year ended December 2001

Base plant	11.90

Edgar Filing: SUNCOR ENERGY INC - Form 6-K

Start-up expenses - Project Millennium	5.10
TOTAL CASH OPERATING COSTS	17.00

NATURAL GAS

Suncor's Natural Gas business production averaged 33,400 BOE per day, down from 40,500 BOE per day in 2000. Although production decreased, a reflection of asset divestments in 2000, the business benefited from increased commodity prices that contributed to improved operational earnings.

SUNOCO

Sunoco, Suncor's refining and marketing arm, recorded higher operational earnings in 2001 that reflected the higher margins from industrial/commercial sales channels, stronger retail natural gas margins, and continued growth in sales volume. Refining margins were lower compared to last year.

FOURTH QUARTER RESULTS

Suncor's earnings for the fourth quarter 2001 were \$26 million (\$0.09 per common share), compared to \$111 million (\$0.47 per common share) in the fourth quarter of 2000.

Operational earnings in the fourth quarter were \$71 million, compared to \$108 million in the fourth quarter of 2000. This \$37 million decrease in operational earnings reflects lower crude oil and natural gas prices, lower refining margins and a higher anticipated proportion of lower value (sour crude oil) production associated with the start-up of Project Millennium. Prices and margins remained volatile in light of weakening demand coinciding with the global economic slowdown, events of September 11 and warmer weather. Partially offsetting these factors were lower crude oil hedging losses and higher oil production.

Operational cash flow was \$242 million, compared with \$236 million last year. Revenues in the fourth quarter of 2001 were \$883 million, compared to \$927 million in the fourth quarter of 2000.

EARNINGS COMPONENTS (\$ millions after income taxes)	Fourth Quarter 2001
OPERATIONAL EARNINGS	71
NATURAL GAS	
Asset divestments	4
OIL SANDS	
Start-up expenses - Project Millennium	(49)
ADJUSTMENT RELATED TO REVALUATION OF FUTURE INCOME TAX BALANCES	-

* The determination of operational earnings for 2000 has been restated to be consistent with the treatment and presentation

Edgar Filing: SUNCOR ENERGY INC - Form 6-K

in 2001 of the "adjustment related to revaluation of future income tax balances" in 2001 noted above.

CASH FLOW COMPONENTS (\$ millions)	2001	Fourth Quarter
OPERATIONAL CASH FLOW	242	
OIL SANDS		
Start-up expenses - Project Millennium	(76)	
Overburden removal - Project Millennium	(33)	
CASH FLOW FROM OPERATIONS	133	

OIL SANDS

For the fourth quarter of 2001, Oil Sands recorded earnings of \$37 million, down from fourth quarter 2000 earnings of \$68 million. Operational earnings were \$86 million, before the impact of start-up expenses associated with Project Millennium, compared to operational earnings of \$71 million in the same period in 2000. The \$15 million increase in operational earnings primarily reflects higher sales volumes from the Project Millennium facilities and lower hedging losses. The expenses associated with the start-up of Project Millennium have been excluded from operational earnings. If the incremental start-up volumes had been excluded from the determination of operational earnings, it is estimated that operational earnings would have been lower compared to the fourth quarter of 2000. Partially offsetting the above favourable factors were lower commodity prices and the sale of proportionately more lower-value sour oil products.

Oil Sands production during the fourth quarter averaged 153,000 barrels of oil per day, compared to 110,000 barrels per day during the same period in 2000. The production increase was the result of Project Millennium start-up volumes, offset by production losses in October that occurred as a result of an unscheduled seven-day maintenance shutdown.

Base plant cash operating costs for the fourth quarter were \$9.35 per barrel, before start-up expenses associated with Project Millennium. Not all of the expenses associated with the additional volumes from Millennium are included in the \$9.35 per barrel cash cost. As a result, the \$9.35 per barrel cash cost is not indicative of cash costs in the future.

OIL SANDS CASH OPERATING COSTS (dollars per barrel)	2001	Fourth Quarter	2000
Base plant	9.35		14.
Start-up expenses - Project Millennium	8.10		1.

TOTAL CASH OPERATING COSTS

17.45

16.

NATURAL GAS

Natural Gas reported \$12 million in earnings for the fourth quarter of 2001, compared with \$31 million in the same period in 2000. Operational earnings in the fourth quarter of 2001 declined to \$8 million, compared to \$31 million for the fourth quarter of 2000. Gas prices in the fourth quarter averaged \$3.10 per thousand cubic feet, 61 per cent lower than in the fourth quarter of 2000. Although production was three per cent lower in the fourth quarter of 2001, compared to the fourth quarter of 2000, Natural Gas exited December with a production rate that was slightly higher than the previous year.

Finding and development costs (excluding acquisitions) for the five-year period ended 2001 were \$11.30 per BOE, compared to \$7.70 per BOE for the five-year period ending 2000. Natural Gas activities over the last two years have been directed towards bringing non-producing reserves to the producing stage in support of the business's 2002 production goal of an average of 180 to 190 mmcf per day.

SUNOCO

Sunoco had breakeven earnings in the fourth quarter of 2001, compared to earnings of \$23 million in the fourth quarter of 2000. Operational earnings were breakeven for the fourth quarter of 2001, compared to operational earnings of \$17 million in the fourth quarter 2000. The Rack-Back business had an operational loss of \$8 million in the quarter, compared to operational earnings of \$16 million in the fourth quarter of 2000, reflecting a 36 per cent decline in refining margins. The quarter was also impacted by a two-week extension of a planned turnaround at the Sarnia Refinery. Sunoco's Rack-Forward business had operational earnings of \$8 million in the fourth quarter 2001, up from \$1 million in the same period last year.

CORPORATE

The corporate centre had costs of \$23 million in the fourth quarter of 2001, compared to \$11 million in the fourth quarter of 2000. This increase reflects higher interest costs, an increase in funding to the Suncor Energy Foundation and higher compensation costs including the effect associated with a higher share price that increased incentive plan costs.

On January 10, 2002, Suncor filed a US\$1 billion unallocated base shelf prospectus with securities regulators in Canada and the United States for the issuance of securities. Suncor will monitor the debt capital markets for opportunities to refinance bank debt with longer-term debt.

Suncor Energy is an integrated Canadian energy company. Suncor's Oil Sands business, located near Fort McMurray, AB, mines and upgrades oil sand into custom-blended refinery feedstock and premium transportation fuels. Suncor is also a conventional natural gas producer in western Canada and operates a refining and marketing business in Ontario under the Sunoco brand. At the same time as Suncor meets today's energy needs, the company invests in alternative and renewable energy for the future. Suncor's common shares and preferred securities are listed for trading on the Toronto and New York stock exchanges.

CERTAIN STATEMENTS IN THIS NEWS RELEASE ARE FORWARD-LOOKING, INCLUDING

SUNCOR ENERGY INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

1. ACCOUNTING POLICIES

These financial statements follow the same accounting policies and methods of computation as, and should be read in conjunction with, the most recent annual financial statements, with the exception to the elimination of intercompany sales as discussed in note 2.

2. ELIMINATION OF INTERCOMPANY SALES

During the first quarter of 2001, the company changed the methodology of accounting for sales from its upstream operations (Oil Sands and Natural Gas) to its downstream operations (Sunoco) from a deeming concept to the actual tracking of product shipped. This change was made to better reflect the current operational activities within the company. This prospective change increased sales and other operating revenues and purchases of crude oil by \$128 million for the quarter and \$473 million year to date and has no impact on consolidated and segmented net earnings in the accompanying financial statements.

3. START-UP EXPENSES

Start-up expenses represent pre-operating costs incurred in the commissioning of the company's Oil Sands Project Millennium.

Edgar Filing: SUNCOR ENERGY INC - Form 6-K

For 2001 and 2002, Suncor has in place U.S. dollar swaps in the amounts of U.S. \$312 million and \$314 million respectively, at an exchange rate of Canadian\$ to U.S.\$ of \$0.71.

5. OIL SHALE PROJECT

Effective April 5, 2001, the company sold its interest in the Stuart Oil Shale Project to joint venture co-owners Southern Pacific Petroleum NL and Central Pacific Minerals NL (SPP/CPM). Under the terms of the purchase, the company retains a 5% royalty interest in Stage 1 of the project and SPP/CPM and Suncor retain world wide rights to the ATP technology. The company made total payments as part of the transaction in the amount of \$5 million (AUD\$7 million), which SPP/CPM will use to fund Stage 1 operating, capital and transition costs. The company received 2.5 million SPP shares and 0.926 million CPM shares in consideration. SPP/CPM issued the company 12.5 million SPP share options and 4.6 million CPM share options, exercisable over five years at a strike price of AUD\$1.25 per SPP share and AUD\$3.38 per CPM share. Suncor has agreed to surrender its partly paid Restricted Class shares (SPP 57 million and CPM 18.85 million) which were acquired in 1997.

During the second quarter of 2001, the company wrote off the carrying value of the capital assets and extinguished the long-term borrowings and accrued interest. The earnings impact of the sale of our remaining interest in the project was \$48 million pre-tax, \$3 million after-tax.

6. INCOME TAX RATE REDUCTION

Effective April 1, 2001, the Alberta and Ontario governments passed legislation that reduced the provincial income tax rates. The future tax balances for the company have been revalued at the new rates resulting in a cumulative future tax recovery of \$43 million. The new rates are reflected in the tax provisions for the current period. The income tax rate reduction does not affect the company's cash flow or liquidity.

7. EARNINGS PER COMMON SHARE

The following table provides a reconciliation between basic and diluted earnings per common share:

(\$ MILLIONS)	Fourth quarter		Years ended December 31	
	2001	2000	2001	2000
Net earnings attributable to common shareholders	21	104	362	351
Dividends on preferred securities	-**	6	-**	26***
Net earnings before deducting dividends on preferred securities	21**	110***	362**	377***
(MILLIONS OF COMMON SHARES)				

Edgar Filing: SUNCOR ENERGY INC - Form 6-K

Weighted-average number of common shares	223	222	222	221

Dilutive securities:				

Options/shares issued under long term incentive plan	3	2	3	2

Preferred securities converted	-**	15***	-**	17***

Weighted-average number of diluted common shares	226	239	225	240

(DOLLARS PER COMMON SHARE)				

Basic earnings per share	0.09*	0.47*	1.63*	1.58*

Diluted earnings per share	0.09**	0.46***	1.61**	1.57***

* Basic earnings per share is the net earnings attributable to common shareholders divided by the weighted-average number of common shares.

** For the quarter and year ended December 31, 2001, diluted earnings per share is the net earnings attributable to common shareholders divided by the weighted-average number of diluted common shares. Dividends on preferred securities of \$5 million and \$26 million respectively, and preferred securities converted of 12 million shares and 13 million shares respectively, have an anti-dilutive impact, therefore they are not included in the calculation of diluted earnings per share.

*** For the quarter and year ended December 31, 2000, diluted earnings per share is the net earnings before deducting dividends on preferred securities divided by the weighted-average number of diluted common shares.

8. ISSUANCE OF MEDIUM TERM NOTES

On August 21, 2001, the company issued \$500 million of Series 2 Medium Term Notes at an interest rate of 6.7%, which is payable semi-annually. The net proceeds received were used to repay commercial paper and bank borrowings. These notes will mature August 22, 2011.

9. RESTRUCTURING

In 2000, the carrying value of certain assets of the company's Natural Gas business were written down to their net estimated recoverable amount and a provision for estimated restructuring costs was recorded.

In the third quarter of 2001, some of these properties that were previously written down were sold, realizing a gain before tax of \$3 million. Provisions for estimated restructuring costs were also increased by \$1 million before tax to reflect increased employee termination.

* Excludes the impact of hedging activities.

** Currently all Natural Gas production is located in the Western Canada Sedimentary Basin.

*** Before deducting fourth quarter 2001 Alberta Crown royalty of 0.2 thousand barrels per day (fourth quarter 2000 - 0.2 thousand barrels per day).

**** Excludes exploratory wells in progress.

***** Excludes sales through joint venture interests.

(a) thousands of barrels per day

(b) dollars per barrel

(c) dollars per barrel rounded to the nearest \$0.05

(d) millions of cubic feet per day

(e) BOE (6:1 basis) per day

(f) dollars per thousand cubic feet

(g) thousands of cubic metres per day

(h) cents per litre

DEFINITIONS

(1) Cash operating costs - operating, selling and general expenses, taxes other than income taxes and overburden cash expenditures for the period

(2) Total operating costs - cash and non-cash operating costs (total Oil Sands expenses less purchases of crude oil and products and royalties in Schedules of Segmented Data).

(3) Refining margin - average wholesale unit price from all products minus average unit cost of crude oil.

(4) Retail margin - average street price of Sunoco branded retail gasoline minus refining gasoline price.

METRIC CONVERSION

Crude oil, refined products, etc 1m3 (cubic metre) = approx. 6.29 barrels

Edgar Filing: SUNCOR ENERGY INC - Form 6-K

Natural gas

1m3 (cubic metre) = approx. 35.49 cubic feet

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
