Forward Looking Statements

We have included or incorporated by reference in this Annual Report on Form 10-K, and from time to time our management may make, statements that may constitute "forward-looking statement" within the meaning of the safe harbour provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements are not historical facts but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. These statements include statements other than historical information or statements of current condition and may relate to our future plans and objectives and results, as well as statements about the objective and effectiveness of our risk management and liquidity policies, statements about trends in or growth opportunities for our business, statements about our future status, and activities or reporting under U.S. banking and financial regulation. Forward-looking statements generally are identified by the words "believe," "project," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," "will likely result," and similar expressions. By identifying these statements for you in this manner, we are alerting you to the possibility that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition to differ from those indicated in the forward-looking statements include, among others, those discussed below and under "Risk Factors" in Part 1, Item 1A of this Annual Report on Form 10-K.

Magyar Bancorp, MHC

Magyar Bancorp, MHC is the New Jersey-chartered mutual holding company of Magyar Bancorp, Inc. Magyar Bancorp, MHC's only business is the ownership of 54.03% of the issued shares of common stock of Magyar Bancorp, Inc. So long as Magyar Bancorp, MHC exists, it will be required to own a majority of the voting stock of Magyar Bancorp, Inc. The executive office of Magyar Bancorp, MHC is located at 400 Somerset Street, New Brunswick, New Jersey 08903, and its telephone number is (732) 342-7600. Magyar Bancorp, MHC is subject to comprehensive regulation and examination by the Board of Governors of the Federal Reserve System and the New Jersey Department of Banking and Insurance.

Magyar Bancorp, Inc.

Magyar Bancorp, Inc. is the mid-tier stock holding company of Magyar Bank. Magyar Bancorp, Inc. is a Delaware-chartered corporation and owns 100% of the outstanding shares of common stock of Magyar Bank. Magyar Bancorp, Inc. has not engaged in any significant business activity other than owning all of the shares of common stock of Magyar Bank. At September 30, 2011, Magyar Bancorp, Inc. had consolidated assets of \$524.0 million, total deposits of \$424.9 million and stockholders' equity of \$44.5 million. Magyar Bancorp, Inc.'s net loss for the fiscal year ended September 30, 2011 was \$249,000. The executive offices of Magyar Bancorp, Inc. are located at 400 Somerset Street, New Brunswick, New Jersey 08903, and its telephone number is (732) 342-7600. Magyar Bancorp, Inc. is subject to comprehensive regulation and examination by the Board of Governors of the Federal Reserve System and the New Jersey Department of Banking and Insurance.

On January 23, 2006, Magyar Bancorp, Inc. sold 2,618,550 shares of its common stock at a price of \$10.00 per share, issued an additional 3,200,450 shares of its common stock to Magyar Bancorp, MHC, and contributed 104,742 shares to Magyar Bank Charitable Foundation.

Magyar Bank

Magyar Bank is a New Jersey-chartered savings bank headquartered in New Brunswick, New Jersey that was originally founded in 1922 as a New Jersey building and loan association. In 1954, Magyar Bank converted to a New Jersey savings and loan association, before converting to the New Jersey savings bank charter in 1993. We conduct business from our main office located at 400 Somerset Street, New Brunswick, New Jersey, and our six branch offices located in New Brunswick, North Brunswick, South Brunswick, Branchburg, Bridgewater, and North Edison, New Jersey. The telephone number at our main office is (732) 342-7600.

General

Our principal business consists of attracting retail deposits from the general public in the areas surrounding our main office in New Brunswick, New Jersey and our branch offices located in Middlesex and Somerset Counties, New Jersey, and investing those deposits, together with funds generated from operations and wholesale funding, in residential mortgage loans, home equity loans, home equity lines of credit, commercial real estate loans, commercial business loans, Small Business Administration ("SBA") loans, construction loans and investment securities. We also originate consumer loans, which consist primarily of secured demand loans. We originate loans primarily for our loan portfolio. However, from time to time we have sold some of our long-term fixed-rate residential mortgage loans into the secondary market, while retaining the servicing rights for such loans. Our revenues are derived principally from interest on loans and securities. Our investment securities consist primarily of mortgage-backed securities and U.S. Government and government-sponsored enterprise obligations. We also generate revenues from fees and service charges. Our primary sources of funds are deposits, borrowings and principal and interest payments on loans and securities. We are subject to comprehensive regulation and examination by the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation.

Market Area

We are headquartered in New Brunswick, New Jersey, and our primary deposit market area is concentrated in the communities surrounding our headquarters branch and our branch offices located in Middlesex and Somerset Counties, New Jersey. Our primary lending market area is broader than our deposit market area and includes all of New Jersey. At September 30, 2011, 51.4% of our mortgage loan portfolio consisted of loans secured by real estate located in Middlesex and Somerset Counties in New Jersey.

The economy of our primary market area is largely urban and suburban with a broad economic base that is typical for counties surrounding the New York metropolitan area. The median household income in Middlesex and Somerset county rank among the highest in the nation.

Competition

We face intense competition within our market area both in making loans and attracting deposits. Our market area has a high concentration of financial institutions including large money center and regional banks, community banks and credit unions. Some of our competitors offer products and services that we currently do not offer, such as trust services and private banking. According to the Federal Deposit Insurance Corporation's annual Summary of Deposit report, at June 30, 2011 our market share of deposits was 1.60% and 0.48% in Middlesex and Somerset Counties, respectively. Our market share of deposits was 1.81% and 0.36%, respectively, at June 30, 2010.

Our competition for loans and deposits comes principally from commercial banks, savings institutions, mortgage banking firms and credit unions. We face additional competition for deposits from short-term money market funds, brokerage firms, mutual funds and insurance companies. Our primary focus is to build and develop profitable customer relationships across all lines of business while maintaining our role as a community bank.

Lending Activities

We originate residential mortgage loans to purchase or refinance residential real property. Residential mortgage loans represented \$159.2 million, or 41.4% of our total loans at September 30, 2011. Historically, we have not originated a significant number of loans for the purpose of reselling them in the secondary market. In the future, however, to help manage interest rate risk and to increase fee income, we may increase our origination and sale of residential mortgage loans. No loans were held for sale at September 30, 2011. We also originate commercial real estate, commercial

business and construction loans. At September 30, 2011, these loans totaled \$121.0 million, \$36.2 million and \$34.1 million, respectively. We also offer consumer loans, which consist primarily of home equity lines of credit and stock-secured demand loans. At September 30, 2011, home equity lines of credit and stock-secured demand loans totaled \$22.4 million and \$12.0 million, respectively.

Loan Portfolio Composition. The following table sets forth the composition of our loan portfolio by type of loan, at the dates indicated.

Residential Mortgage Loans. We originate residential mortgage loans, most of which are secured by properties located in our primary market area and most of which we hold in portfolio. At September 30, 2011, \$159.2 million, or 41.4% of our total loan portfolio, consisted of residential mortgage loans (including home equity loans). Residential mortgage loan originations are generally obtained from our in-house loan representatives, from existing or past customers, through advertising, and through referrals from local builders, real estate brokers and attorneys, and are underwritten pursuant to Magyar Bank's policies and standards. Generally, residential mortgage loans are originated in amounts up to 80% of the lesser of the appraised value or purchase price of the property, with private mortgage insurance required on loans with a loan-to-value ratio in excess of 80%. We generally will not make residential mortgage loans with a loan-to-value ratio in excess of 95%, which is the upper limit that has been established by the Board of Directors. Mortgage loans have been primarily originated for terms of up to 30 years. Magyar Bank has not participated in "sub-prime" (mortgages granted to borrowers whose credit history is not sufficient to get a conventional mortgage) or option ARM mortgage lending. At September 30, 2011, non-performing residential mortgage loans totaled \$4.1 million, or 2.5% of the total residential loan portfolio. Interest income not recorded on non-performing residential mortgage loans for the year ended September 30, 2011 was \$307,000. During the year ended September 30, 2011, \$55,000 had been charged-off against the allowance for loan loss for two impaired residential real estate loans.

We also originate home equity loans secured by residences located in our market area. The underwriting standards we use for home equity loans include a determination of the applicant's credit history, an assessment of the applicant's ability to meet existing obligations, the ongoing payments on the proposed loan and the value of the collateral securing the loan. The maximum combined (first and second mortgage liens) loan-to-value ratio for home equity loans and home equity lines of credit is 80%. Home equity loans are generally offered with fixed rates of interest with the loan amount not to exceed \$500,000 and with terms of up to 30 years.

Generally, all fixed-rate residential mortgage loans are underwritten according to Federal Home Loan Mortgage Corporation ("Freddie Mac") guidelines, policies and procedures. Historically, we have not originated a significant number of loans for the purpose of reselling them in the secondary market. However, to help manage interest rate risk and to increase fee income during fiscal year 2011, sixty-two fixed-rate loans totaling \$11.0 million were sold to Freddie Mac with servicing retained. In the future we may increase our origination and sale of fixed-rate residential mortgage loans to help manage interest rate risk and to increase fee income. No loans were held for sale at September 30, 2011.

We generally do not purchase residential mortgage loans, except for loans to low-income borrowers to enhance our Community Reinvestment Act performance. At September 30, 2011, we had \$2.8 million of purchased one-to four-family residential mortgage loans. No loans were purchased in the fiscal year ended September 30, 2011.

At September 30, 2011, we had \$110.7 million of fixed-rate residential mortgage loans, which represented 69.5% of our total residential mortgage loan portfolio. At September 30, 2011, our largest fixed-rate residential mortgage loan was for \$4.4 million. The loan was performing in accordance with its terms at September 30, 2011.

We also offer adjustable-rate residential mortgage loans with interest rates based on the weekly average yield on U.S. Treasuries or the London Interbank Offering Rate ("LIBOR") adjusted to a constant maturity of one year, which adjusts either annually from the outset of the loan or which adjusts annually after a one-, three-, five-, seven-, and ten-year initial fixed-rate period. Our adjustable-rate mortgage loans generally provide for maximum rate adjustments of 2% per adjustment, with a lifetime maximum adjustment up to 5%, regardless of the initial rate. We also offer adjustable-rate mortgage loans with an interest rate based on the prime rate as published in The Wall Street Journal or the Federal Home Loan Bank of New York advance rates.

Adjustable-rate mortgage loans decrease the risk associated with changes in market interest rates by periodically repricing. However, these loans have other risks because, as interest rates increase, the underlying payments by the borrower increase, which increases the potential for default by the borrower. At the same time, the marketability of the underlying collateral may be adversely affected by higher interest rates. The maximum periodic and lifetime interest rate adjustments also may limit the effectiveness of adjustable-rate mortgage loans during periods of rapidly rising interest rates.

At September 30, 2011, adjustable-rate residential mortgage loans totaled \$48.6 million, or 30.5% of our total residential mortgage loan portfolio. Of these loans, \$17.9 million were interest-only loans originated with an average original loan-to-value ratio of 69.6%. Interest-only loans allow the borrower to make interest-only payments during an initial fixed-rate period. Following the initial period, the borrower is required to make principal and interest payments. At September 30, 2011, our largest adjustable-rate residential mortgage loan was for \$3.0 million. The loan was performing in accordance with its terms at September 30, 2011.

In an effort to provide financing for low-and moderate-income home buyers, we offer low-to-moderate income residential mortgage loans. These loans are offered with fixed rates of interest and terms of up to 40 years, and are secured by one-to four-family residential properties. All of these loans are originated using underwriting guidelines of U.S. government-sponsored enterprises such as Freddie Mac or Federal National Mortgage Association ("Fannie Mae"). These loans are originated with maximum loan-to-value ratios of 95%.

All residential mortgage loans we originate include "due-on-sale" clauses, which give us the right to declare a loan immediately due and payable if the borrower sells or otherwise disposes of the real property securing the mortgage loan. All borrowers are required to obtain title insurance, fire and casualty insurance and, if warranted, flood insurance on properties securing real estate loans.

Commercial Real Estate Loans. As part of our strategy to add to and diversify our loan portfolio, we have continued our focus on increasing our originations of commercial real estate loans. At September 30, 2011, \$121.0 million, or 31.4%, of our total loan portfolio consisted of these types of loans. Commercial real estate loans are generally secured by five-or-more-unit apartment buildings, industrial properties and properties used for business purposes such as small office buildings and retail facilities primarily located in our market area. We generally originate adjustable-rate commercial real estate loans with a maximum term of 25 years with adjustable rate periods every five years. The maximum loan-to-value ratio for our commercial real estate loans is 75%, based on the appraised value of the property.

We consider a number of factors when we originate commercial real estate loans. During the underwriting process we evaluate the business qualifications and financial condition of the borrower, including credit history, profitability of the property being financed, as well as the value and condition of the mortgaged property securing the loan. When evaluating the business qualifications of the borrower, we consider the financial resources of the borrower, the borrower's experience in owning or managing similar property and the borrower's payment history with us and other financial institutions. In evaluating the property securing the loan, we consider the net operating income of the mortgaged property before debt service and depreciation, the ratio of the loan amount to the appraised value of the mortgaged property and the debt service coverage ratio (the ratio of net operating income to debt service) to ensure it is at least 120% of the monthly debt service. We require personal guarantees on all commercial real estate loans made to individuals. Generally, commercial real estate loans made to corporations, partnerships and other business entities require personal guarantees by the principals. All borrowers are required to obtain title, fire and casualty insurance and, if warranted, flood insurance.

Loans secured by commercial real estate generally are larger than residential mortgage loans and involve greater credit risk. Commercial real estate loans often involve large loan balances to single borrowers or groups of related borrowers. Repayment of these loans depends to a large degree on the results of operations and management of the properties securing the loans or the businesses conducted on such property, and may be affected to a greater extent by adverse conditions in the real estate market or the economy in general. Accordingly, the nature of these loans makes them more difficult for management to monitor and evaluate.

The maximum amount of a commercial real estate loan is limited by our Board-established loans-to-one-borrower limit, which is currently 15% of Magyar Bank's capital, or \$6.9 million. At September 30, 2011, our largest commercial real estate loan was \$5.5 million and was secured by a mixed use building currently used for retail office space and a senior living facility. The loan was performing in accordance with its terms at September 30, 2011. At September 30, 2011, nine commercial real estate loans totaling \$7.6 million were non-performing. During the year ended September 30, 2011, \$652,000 had been charged-off against the allowance for loan loss for three impaired commercial real estate loans. Interest income not recorded on non-performing commercial real estate loans for the year ended September 30, 2011 was \$744,000. All other loans secured by commercial real estate were performing in accordance with their terms.

Construction Loans. We also originate construction loans for the development of one-to four-family homes, town homes, condominiums, apartment buildings and commercial properties. Construction loans are generally offered to experienced local developers operating in our primary market area and to individuals for the construction of their personal residences. The Bank ceased originating new construction loans for the development of non-owner occupied real estate in 2008. At September 30, 2011, our construction loans totaled \$34.1 million, or 8.9% of total loans

At September 30, 2011, construction loans for the development of one-to four-family residential properties totaled \$19.3 million, or 5.0% of total loans. These construction loans generally have a maximum term of 24 months. We provide financing for land acquisition, site improvement and construction of individual homes. Land acquisition funds are limited to 50% to 75% of the sale price of the land. Site improvement funds are limited to 100% of the bonded site improvement costs. Construction funds are limited to 75% of the lesser of the contract sale price or appraised value of the property (less funds already advanced for land acquisition and site improvement).

At September 30, 2011, construction loans for the development of town homes, condominiums and apartment buildings totaled \$11.6 million, or 3.0% of total loans. These construction loans also generally have a maximum term of 24 months. The maximum loan-to-value ratio limit applicable to these loans has been 75% of the appraised value of the property, but was decreased to 70% in 2007 to reduce Magyar Bank's potential exposure to a downturn in the real estate market. Properties must maintain a debt service coverage ratio of 125%. Finally, we may retain up to 10% of each loan advance until the property attains a 90% occupancy level.

At September 30, 2011, construction loans for the development of commercial properties totaled \$3.2 million, or 0.8% of total loans. These construction loans have a maximum term of 24 months. The maximum loan-to-value ratio limit applicable to these loans is 75% of the appraised value of the property. In addition, the property must maintain a debt service coverage ratio of 125%.

The maximum amount of a construction loan is limited by our loans-to-one-borrower limit, which is currently 15% of Magyar Bank's capital, or \$6.9 million. At September 30, 2011, our largest outstanding construction loan balance was for \$3.4 million. The loan was secured by seven four-unit residential condominium buildings to be built in Union City, NJ. Two homes are completed and the loan is in the foreclosure process. At September 30, 2011, fifteen construction loans totaling \$15.5 million (see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for details on these loans), were non-performing. During the year ended September 30, 2011, \$1.6 million had been charged-off against the allowance for loan loss for fourteen impaired construction loans. Interest income not

recorded on non-performing construction loans for the year ended September 30, 2011 was \$711,000.

Before making a commitment to fund a construction loan, we require an appraisal of the property by an independent licensed appraiser. We generally also engage an outside engineering firm to review and inspect each property before disbursement of funds during the term of a construction loan. Loan proceeds are disbursed after inspection based on the percentage of completion method. We require a personal guarantee from each principal of all of our construction loan borrowers.

Construction lending is generally considered to involve a higher degree of credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction loan depends largely upon the accuracy of the initial estimate of the value of the property at completion of construction compared to the estimated cost (including interest) of construction and other assumptions. If the estimate of construction cost is inaccurate, we may be required to advance funds beyond the amount originally committed in order to protect the value of the property. Additionally, if our estimate of the value of the completed property is inaccurate, our construction loan may exceed the value of the collateral.

Commercial Business Loans. At September 30, 2011, our commercial business loans totaled \$36.2 million, or 9.4% of total loans. We make commercial business loans primarily in our market area to a variety of professionals, sole proprietorships and small and mid-sized businesses. Our commercial business loans include term loans and revolving lines of credit. The maximum term of a commercial business loan is 15 years. Such loans are generally used for longer-term working capital purposes such as purchasing equipment or furniture. Commercial business loans are made with either adjustable or fixed rates of interest. The interest rates for adjustable commercial business loans are typically based on the prime rate as published in The Wall Street Journal.

When making commercial business loans, we consider the financial strength of the borrower, our lending history with the borrower, the debt service capabilities of the borrower, the projected cash flows of the business and the value and type of the collateral. Commercial business loans generally are secured by a variety of collateral, primarily accounts receivable, inventory, equipment, savings instruments and readily marketable securities. In addition, we generally require the business principals to execute personal guarantees.

Commercial business loans generally have greater credit risk than residential mortgage loans. Unlike residential mortgage loans, which generally are made on the basis of the borrower's ability to repay the loan from his or her employment income, and which are secured by real property with ascertainable value, commercial business loans generally are made on the basis of the borrower's ability to repay the loan from the cash flow of the borrower's business. As a result, the repayment of commercial business loans may depend substantially on the success of the borrower's business. Further, any collateral securing commercial business loans may depreciate over time, may be difficult to appraise and may fluctuate in value. We try to minimize these risks through our underwriting standards.

The maximum amount of a commercial business loan is limited by our loans-to-one-borrower limit, which is 15% of Magyar Bank's capital, or \$6.9 million currently. At September 30, 2011, our largest commercial business loan was a \$3.5 million loan to a company that provides janitorial services and was secured by the accounts receivable of the company. This loan was performing according to its terms at September 30, 2011. At September 30, 2011, three commercial business loans totaling \$255,000 were non-performing. Interest income not recorded on non-performing commercial business loans for the year ended September 30, 2011 was \$32,000. During the year ended September 30, 2011, \$342,000 had been charged-off against the allowance for loan loss for impaired commercial business loans and \$31,000 was recovered from a prior year charge-off.

Home Equity Lines of Credit and Other Loans. We originate home equity lines of credit secured by residences located in our market area. At September 30, 2011, these loans totaled \$22.4 million, or 5.8% of our total loan portfolio. The underwriting standards we use for home equity lines of credit include a determination of the applicant's credit history, an assessment of the applicant's ability to meet existing obligations, the ongoing payments on the proposed loan and

the value of the collateral securing the loan. The maximum combined (first and second mortgage liens) loan-to-value ratio for home equity lines of credit is 80%. Home equity lines of credit have adjustable rates of interest, indexed to the prime rate, as reported in The Wall Street Journal, with terms of up to 25 years.

The maximum amount of a home equity line of credit loan is limited by our loans-to-one-borrower limit, which is 15% of Magyar Bank's capital, or \$6.9 million currently. At September 30, 2011, our largest home equity line of credit was a \$1.1 million loan. The loan is performing according to its terms at September 30, 2011. At September 30, 2011, all home equity lines of credit were performing in accordance with their terms with the exception of four non-performing loans totaling \$788,000. During the year ended September 30, 2011, \$98,000 had been charged-off against the allowance for loan loss for one impaired home equity line of credit. Interest income not recorded on non-performing home equity lines of credit for the year ended September 30, 2011 was \$23,000.

We also originate loans secured by the common stock of publicly traded companies, provided their shares are listed on the New York Stock Exchange, the American Stock Exchange or the NASDAQ Stock Market, and provided the company is not a banking company. Stock-secured loans are interest-only and are offered for terms up to twelve months and for adjustable rates of interest indexed to the prime rate, as reported in The Wall Street Journal. The loan amount is not to exceed 70% of the value of the stock securing the loan at any time.

At September 30, 2011, stock-secured loans totaled \$11.5 million, or 3.0% of our total loan portfolio. Generally, we limit the aggregate amount of loans secured by the common stock of any one corporation to 15% of Magyar Bank's capital, with the exception of Johnson & Johnson, for which the collateral concentration limit is 150% of Magyar Bank's capital. At September 30, 2011, \$11.4 million, or 3.0% of our loan portfolio, was secured by the common stock of Johnson & Johnson, a New York Stock Exchange company that operates a number of facilities in our market area and employs a substantial number of residents. Although these loans are underwritten based on the ability of the individual borrower to repay the loan, the concentration of our portfolio secured by this stock subjects us to the risk of a decline in the market price of the stock and, therefore, a reduction in the value of the collateral securing these loans. As of September 30, 2011, the aggregate loan-to-value ratio of the stock-secured portfolio was 37.2%.

Loan Originations, Purchases, Participations and Servicing of Loans. Lending activities are conducted primarily by our loan personnel operating at our main and branch office locations. All loans originated by us are underwritten pursuant to our policies and procedures. We originate both adjustable rate and fixed rate loans. Our ability to originate fixed or adjustable rate loans is dependent upon the relative customer demand for such loans, which is affected by the current and expected future levels of market interest rates.

Generally, we retain in our portfolio substantially all loans that we originate. Historically, we have not originated a significant number of loans for the purpose of reselling them in the secondary market. In the future, however, to help manage our interest rate risk and to increase fee income, we may increase our origination and sale of fixed-rate residential loans and commercial business loans guaranteed by the SBA. All one-to four-family residential mortgage loans that we sell in the secondary market are sold with servicing rights retained pursuant to master commitments negotiated with Freddie Mac. We sell our loans to Freddie Mac without recourse. No loans were held for sale at September 30, 2011.

At September 30, 2011, we were servicing loans sold to Freddie Mac in the amount of \$18.2 million and SBA guaranteed loans sold in the amount of \$5.8 million. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, contacting delinquent mortgagors, supervising foreclosures and property dispositions in the event of unremedied defaults, making certain insurance and tax payments on behalf of the borrowers and generally administering the loans.

From time-to-time, we will also participate in loans, sometimes as the "lead lender." Whether we are the lead lender or not, we underwrite our participation portion of the loan according to our own underwriting criteria and procedures. At September 30, 2011, we had \$17.2 million of loan participation interests in which we were the lead lender, and \$5.5 million in loan participations in which we were not the lead lender. We have entered into loan participations when the aggregate outstanding balance of a particular customer relationship exceeds our loan-to-one-borrower limit. All loan participations are loans secured by real estate that adhere to our loan policies. At September 30, 2011, all participation loans were performing in accordance with their terms.

During the fiscal year ended September 30, 2011, we originated \$26.1 million of fixed-rate and adjustable-rate one-to four-family residential mortgage loans. The fixed-rate loans are primarily of loans with terms of 30 years or less. We also originated \$13.7 million of commercial real estate loans, \$2.1 million of owner-occupied construction loans, \$3.8 million of commercial business loans, and \$303,000 of home equity lines of credit and other loans during the fiscal year ended September 30, 2011.

We generally do not purchase residential mortgage loans, except for loans to low-income borrowers as part of our Community Reinvestment Act lenders program. At September 30, 2011, we had \$2.8 million of one-to four-family residential mortgage loans that were purchased from other lenders. No loans were purchased in the fiscal year ended September 30, 2011.

Loan Approval Procedures and Authority. Our lending activities follow written, non-discriminatory underwriting standards and loan origination procedures established by our Board of Directors. In the approval process for loans, we assess the borrower's ability to repay the loan and the value of the property securing the loan. To assess an individual borrower's ability to repay, we review income and expense, employment and credit history. To assess a business entity's ability to repay, we review financial statements (including balance sheets, income statements and cash flow statements), rent rolls, other debt service, and projected income and expense.

We generally require appraisals for all real estate securing loans. Appraisals are performed by independent licensed appraisers who are approved annually by our Board of Directors. We require borrowers to obtain title, fire and casualty, general liability, and, if warranted, flood insurance in amounts at least equal to the principal amount of the loan. For construction loans, we require a detailed plan and cost review, to be reviewed by an outside engineering firm, and all construction-related state and local approvals necessary for a particular project.

Our loan approval policies and limits are established by our Board of Directors. All loans are approved in accordance with the loan approval policies and limits. Lending authorities are approved annually by the Board of Directors, and Magyar Bank lending staff members are authorized to approve loans up to their lending authority limits, provided the loan meets all of our underwriting guidelines.

Loan requests for aggregate borrowings up to \$1.5 million must be approved by Magyar Bank's Chief Lending Officer or President. Other members of our lending staff have lesser amounts of lending authority based on their experience as lending officers. Loan requests for aggregate borrowings up to 35% of Magyar Bank's loans-to-one-borrower limit, or \$2.4 million, must be approved by Magyar Bank's Management Loan Committee. The Management Loan Committee is comprised of the President, Chief Lending Officer, Chief Financial Officer and various bank officers appointed by the Board of Directors. A quorum of three members including either the President or the Chief Lending Officer is required for all Management Loan Committee meetings. The Directors Loan Committee must approve all loan requests for aggregate borrowings in excess of 35% of Magyar Bank's loans-to-one-borrower limit, or \$2.4 million. The Board of Directors must approve all loan requests for aggregate borrowings in excess of 80% of Magyar Bank's loans-to-one-borrower limit, or \$5.5 million.

Asset Quality

We commence collection efforts when a loan becomes 15 days past due with system-generated reminder notices. Subsequent late charge and delinquent notices are issued and the account is monitored on a regular basis thereafter. Personal, direct contact with the borrower is attempted early in the collection process as a courtesy reminder and later to determine the reason for the delinquency and to safeguard our collateral. When a loan is more than 60 days past due, the credit file is reviewed and, if deemed necessary, information is updated or confirmed and collateral re-evaluated. We make every effort to contact the borrower and develop a plan of repayment to cure the delinquency. Loans are placed on non-accrual status when they are delinquent for more than three months. When loans are placed on non-accrual status, unpaid accrued interest is fully reversed, and further income is recognized only to the extent received.

A summary report of all loans 30 days or more past due is provided to the Board of Directors on a monthly basis. If no repayment plan is in process, the file is referred to counsel for the commencement of foreclosure or other collection efforts.

Non-Performing Assets. The table on the following page sets forth the amounts and categories of our non-performing assets at the dates indicated. The table includes troubled debt restructurings (loans for which a portion of interest or principal has been forgiven and loans modified at interest rates materially less than current market rates) for each date presented.

At September 30, 2011, our portfolio of commercial business, commercial real estate and construction loans totaled \$191.3 million, or 49.7% of our total loans, compared to \$207.0 million, or 50.7% of our total loans, at September 30, 2010. Commercial business, commercial real estate and construction loans generally have more risk than one-to

four-family residential mortgage loans. As shown in the table above, our troubled debt restructuring and total non-performing assets increased \$5.2 million to \$49.5 million at September 30, 2011 from \$44.3 million at September 30, 2010, and increased \$10.0 million from \$39.5 million at September 30, 2009, reflecting the adverse economic conditions affecting borrowers during the "Great Recession". The repayment of the Company's construction loan portfolio is dependent upon the sale of the collateral securing the loans and has been particularly impacted by the rapid deterioration in the housing market and decreased buyer demand. (See Item 7. - Management's Discussion and Analysis of Financial Condition and Results of Operations for additional discussion of non-performing assets).

Additional interest income of approximately \$1.8 million and \$2.6 million would have been recorded during the fiscal years ended September 30, 2011 and 2010, respectively, if the non-accrual loans summarized in the above table had performed in accordance with their original terms.

The Company accounts for its impaired loans in accordance with generally accepted accounting principles, which require that a creditor measure impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate except that, as a practical expedient, a creditor may measure impairment based on a loan's observable market price less estimated costs of disposal, or the fair value of the collateral less estimated costs of disposal if the loan is collateral dependent. Regardless of the measurement method, a creditor may measure impairment based on the fair value of the collateral when the creditor determines that foreclosure is probable.

The Company records cash receipts on impaired loans that are non-performing as a reduction to principal before applying amounts to interest or late charges unless specifically directed by the Bankruptcy Court to apply payments otherwise. The Company continues to recognize interest income on impaired loans that are performing.

Troubled debt restructurings ("TDRs") occur when a creditor, for economic or legal reasons related to a debtor's financial condition, grants a concession to the debtor that it would not otherwise consider, such as a below market interest rate, extending the maturity of a loan, or a combination of both. At September 30, 2011, there were fifteen loans totaling \$4.7 million that were classified as TDRs by the Company. These loans are not included in the non-performing loan figures listed above, as they continue to perform under their modified terms.

Delinquent Loans. The following table sets forth certain information with respect to our loan portfolio delinquencies at the dates indicated. Loans delinquent more than three months are generally classified as non- accrual loans.

Real Estate Owned. Real estate we acquire as a result of foreclosure or by deed in lieu of foreclosure is classified as real estate owned until sold. When property is acquired it is recorded at fair value at the date of foreclosure, establishing a new cost basis. Holding costs and declines in fair value result in charges to expense after acquisition.

The Company held \$16.6 million of real estate owned properties at September 30, 2011 and \$12.7 million of real estate owned properties at September 30, 2010. During the year ended September 30, 2011, the Company was able to successfully dispose of nine properties with an aggregate carrying value of \$3.2 million for a net loss of \$107,000 and the Company was able to secure the title for nine other properties totaling \$6.9 million.

Other real estate owned at September 30, 2011 consisted of seven residential properties, four substantially completed condominium projects, seventeen real estate lots, and one commercial real estate building. The Bank is determining the proper course of action for its other real estate owned, which may include holding the properties until the real estate market improves, selling the properties to a developer and completing partially completed homes for either rental or sale.

The Company also incurred a \$292,000 write down during the year on one property under contract of sale at September 30, 2011. The property was sold in November 2011. Further declines in real estate values may result in a charge to expense in the future. Routine holding costs are charged to expense as incurred and improvements to real estate owned that enhance the value of the real estate are capitalized.

Classified Assets. Federal banking regulations provide that loans and other assets of lesser quality should be classified as "substandard," "doubtful" or "loss" assets. An asset is considered "substandard" if it is inadequately protected by the curren net worth and paying capacity of the obligor or of the collateral pledged, if any. "Substandard" assets include those characterized by the "distinct possibility" we will sustain "some loss" if the deficiencies are not corrected. Assets classified as "doubtful" have all of the weaknesses inherent in those classified "substandard," with the added characteristic that the weaknesses present make "collection or liquidation in full," on the basis of currently existing facts, conditions, and values, "highly questionable and improbable." Assets classified as "loss" are those considered "un-collectible" and of such little value their continuance as assets without the establishment of a specific loss reserve is not warranted. We classify an asset as "special mention" if the asset has a potential weakness that warrants management's close attention. While such assets are not impaired, management has concluded that if the potential weakness in the asset is not addressed, the value of the asset may deteriorate, adversely affecting the repayment of the asset. On the basis of our review of assets at September 30, 2011, classified assets consisted of \$22.7 million of special mention assets and \$32.5 million of substandard assets.

We are required to establish an allowance for loan losses in an amount deemed prudent by management for loans classified substandard or doubtful, as well as for other problem loans. General allowances represent loss allowances which have been established to recognize the inherent losses associated with lending activities, but which, unlike impairment allowances, have not been allocated to particular problem assets. When we classify problem assets, we are required to determine whether or not impairment exists. A loan is impaired when, based on current information and events, it is probable that Magyar Bank will be unable to collect all amounts due according to the contractual terms of the loan agreement. When it is determined that impairment exists, a specific allowance for loss is established. For collateral-dependent loans, the loan is reduced by the impairment amount via a reduction to the loan and the allowance for loan loss. Our determination as to the classification of our assets and the amount of our valuation allowances is subject to review by the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation, which can direct us to establish additional loss allowances.

The loan portfolio is reviewed on a regular basis to determine whether any loans require classification in accordance with applicable regulations. Not all classified assets constitute non-performing assets.

Allowance for Loan Losses

Our allowance for loan losses is maintained at a level management deems necessary to absorb loan losses that are both probable and reasonably estimable. Management, in determining the allowance for loan losses, considers the losses in our loan portfolio both probable and reasonably estimable, and changes in the nature and volume of loan activities, along with the general economic and real estate market conditions. The allowance for loan losses as of September 30, 2011 was maintained at a level that represents management's best estimate of losses in the loan portfolio both probable and reasonably estimable. However, this analysis process is inherently subjective, as it requires us to make estimates that are susceptible to revisions as more information becomes available. Although we believe we have established the allowance at levels to absorb probable and estimable losses, future additions may be necessary if economic or other conditions in the future differ from the current environment.

In addition, as an integral part of their examination process, the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation will periodically review our allowance for loan losses. Such agencies may require us to recognize additions to the allowance based on their judgments of information available to them at the time of their examination.

Allowance for Loan Losses. The following table sets forth activity in our allowance for loan losses for the periods indicated.

	2011		2010		September 2009 Illars in tho		2008 s)		2007

Allocation of Allowance for Loan Losses. The following table sets forth the allowance for loan losses allocated by loan category, the percent of the allowance to the total allowance and the percent of loans in each category to total loans at the dates indicated. The allowance for loan losses allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories.

At September 30, 2011		Amount	Percent of Allowance In Category to Total Allowance (Dollars in thousands)	Percent of Loans In Category to Total Loans

Investments

Our Board of Directors has adopted our Investment Policy. This policy determines the types of securities in which we may invest. The Investment Policy is reviewed annually by the Board of Directors and changes to the policy are recommended to and subject to approval by our Board of Directors. While general investment strategies are developed by the Asset and Liability Committee, the execution of specific actions rests primarily with our President and our Chief Financial Officer. They are responsible for ensuring the guidelines and requirements included in the Investment Policy are followed and only prudent securities are considered for investment. They are authorized to execute transactions that fall within the scope of the established Investment Policy up to \$2.5 million per transaction individually or \$5.0 million per transaction jointly. Investment transactions in excess of \$5.0 million must be approved by the Asset and Liability Committee. Investment transactions are reviewed and ratified by the Board of Directors at their regularly scheduled meetings.

Our investments portfolio may include U.S. Treasury obligations, debt and equity securities issued by various government-sponsored enterprises, including Fannie Mae and Freddie Mac, mortgage-backed securities, certain certificates of deposit of insured financial institutions, overnight and short-term loans to other banks, investment-grade corporate debt instruments, and municipal securities. In addition, we may invest in equity securities subject to certain limitations and not in excess of Magyar Bank's Tier 1 capital.

The Investment Policy requires that securities transactions be conducted in a safe and sound manner, and purchase and sale decisions be based upon a thorough analysis of each security to determine its quality and inherent risks and fit within our overall asset/liability management objectives. The analysis must consider the effect of an investment or sale on our risk-based capital and prospects for yield and appreciation.

At September 30, 2011, our securities portfolio totaled \$70.3 million, or 13.4% of our total assets. Securities are classified as held-to-maturity or available-for-sale when purchased. At September 30, 2011, \$45.0 million of our securities were classified as held-to-maturity and reported at amortized cost, and \$25.3 million were classified as available-for-sale and reported at fair value. At September 30, 2011, we held no investment securities classified as held-for-trading.

U.S. Government Agency and Government-Sponsored Enterprise Obligations. At September 30, 2011, our U.S. Government Agency and Government-Sponsored Enterprise Obligations totaled \$64.2 million, or 91.4% of our total securities portfolio. Of this amount, \$55.7 million were mortgage-backed securities and \$8.5 million were debt securities. While these securities generally provide lower yields than other securities in our securities portfolio, we hold these securities, to the extent appropriate, for liquidity purposes and as collateral for certain borrowings. We invest in these securities to achieve positive interest rate spreads with minimal administrative expense, and to lower our credit risk as a result of the guarantees provided by these issuers.

Mortgage-Backed Securities. We purchase mortgage-backed pass through and collateralized mortgage obligation ("CMO") securities insured or guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. To a lesser extent, we also invest in mortgage-backed securities issued or sponsored by private issuers. At September 30, 2011, our mortgage-backed securities, including CMOs, totaled \$58.7 million, or 83.5% of our total securities portfolio. Included in this balance was \$3.0 million of mortgage-backed securities issued by private issuers. Our policy is to limit purchases of privately issued mortgage-backed securities to non-high risk securities rated "A" or higher by a nationally recognized credit rating agency. High risk securities generally are defined as those exhibiting significantly greater volatility of estimated average life and price due to changes in interest rates than 30-year fixed rate securities.

Mortgage-backed pass through securities are created by pooling mortgages and issuing a security with an interest rate less than the interest rate on the underlying mortgages. Mortgage-backed pass through securities represent a

participation interest in a pool of single-family or multi-family mortgages. As loan payments are made by the borrowers, the principal and interest portion of the payment is passed through to the investor as received. CMOs are also backed by mortgages. However they differ from mortgage-backed pass through securities because the principal and interest payments on the underlying mortgages are structured so that they are paid to the security holders of pre-determined classes or tranches at a faster or slower pace. The receipt of these principal and interest payments, which depends on the estimated average life for each class, is contingent on a prepayment speed assumption assigned to the underlying mortgages. Variances between the assumed payment speed and actual payments can significantly alter the average lives of such securities. Mortgage-backed securities and CMOs generally yield less than the loans that underlie such securities because of the cost of payment guarantees and credit enhancements. However, mortgage-backed securities are usually more liquid than individual mortgage loans and may be used to collateralize borrowings and other liabilities.

Mortgage-backed securities present a risk that actual prepayments may differ from estimated prepayments over the life of the security, which may require adjustments to the amortization of any premium or accretion of any discount relating to such instruments that can change the net yield on the securities. There is also reinvestment risk associated with the cash flows from such securities or if the securities are redeemed by the issuer. In addition, the market value of such securities may be adversely affected by changes in interest rates.

Our mortgage-backed securities portfolio had a weighted average yield of 3.61% at September 30, 2011. The estimated fair value of our mortgage-backed securities portfolio at September 30, 2011 was \$59.5 million, which was \$1.3 million more than the amortized cost of \$58.2 million. Mortgage-backed securities in Magyar Bank's portfolio do not contain sub-prime mortgage loans.

Corporate and Other Securities. At September 30, 2011, we held fair value of \$3.0 million in bonds which are classified as held to maturity and have a total amortized cost value of \$3.1 million, or 4.4% of our total securities portfolio. Our Investment Policy allows for the purchase of such instruments and requires that corporate debt obligations be rated in one of the four highest categories by a nationally recognized rating service. We may invest up to 25% of Magyar Bank's investment portfolio in corporate debt obligations and up to 15% of Magyar Bank's capital in any one issuer.

Equity Securities. At September 30, 2011, we held no equity securities other than \$2.3 million in Federal Home Loan Bank of New York stock. The investment in Federal Home Loan Bank of New York stock is classified as a restricted security, carried at cost and evaluated for impairment. Equity securities are not insured or guaranteed investments and are affected by market interest rates and stock market fluctuations. Such investments other than the Federal Home Loan Bank of New York are carried at their fair value and fluctuations in the fair value of such investments, including temporary declines in value, directly affect our net capital position.

Securities Portfolios. The following table sets forth the composition of our securities portfolio (excluding Federal Home Loan Bank of New York common stock) at the dates indicated.
