It is expected that the Registrant's sales be approximately \$30.1 million for the three months ended September 30, 2006 compared to \$28.8 million for the three months ended September 30, 2005 and approximately \$76.4 million for the nine months ended September 30, 2006 compared to \$83.9 million for the nine

months ended September 30, 2005. The increase in sales for the three months ended September 30, 2006 compared to those ended September 30, 2005 was attributable to the market expectation of release of Microsoft Vista and new wave of the personal PC upgrading, stocking activity for System Memory demand for both DDR1 and DDR2 which leads to increase of the Company's profits for the current year. The decrease in sales for the nine months ended September 30, 2006 compared to those ended September 30, 2005 was mainly due to the saturated demand for FLASH component. Due to the increase of gross margin of System Memory (DDR1 and DDR2) products, the net profits are expected to be higher for the nine months ended September 30, 2006 compared to those for the nine months ended September 30, 2005 even though the overall sales volume was lower for the current year.
