May 01, 2015

**MARKET VECTORS URANIUM+NUCLEAR ENERGY ETF**

Ticker: NLR®  
Principal U.S. Listing Exchange: NYSE Arca, Inc.  
SUMMARY PROSPECTUS  
MAY 1, 2015

NLRSUM

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.vaneck.com/library/etfs/>. You can also get this information at no cost by calling 888.MKT.VCTR, or by sending an email request to [info@vaneck.com](mailto:info@vaneck.com). The Fund's prospectus and statement of additional information, both dated May 1, 2015, are incorporated by reference into this summary prospectus.

**INVESTMENT OBJECTIVE**

Market Vectors Uranium+Nuclear Energy ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Market Vectors® Global Uranium & Nuclear Energy Index (the Nuclear Energy Index).

**FUND FEES AND EXPENSES**

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

**Shareholders Fees** (*fees paid directly from your investment*)      None

**Annual Fund Operating Expenses**

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50%
Other Expenses	0.26%
Total Annual Fund Operating Expenses <sup>(a)</sup>	0.76%
Fee Waivers and Expense Reimbursement <sup>(a)</sup>	-0.16%
Total Annual Fund Operating Expenses After Fee Waiver and Expense	0.60%

Reimbursement<sup>(a)</sup>

<sup>(a)</sup> Van Eck Associates Corporation (the Adviser ) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.60% of the Fund's average daily net assets per year until at least May 1, 2016. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

**EXPENSE EXAMPLE**

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

**YEAR    EXPENSES**

1	\$	61
3	\$	227
5	\$	407
10	\$	927

## PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 31% of the average value of its portfolio.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Nuclear Energy Index is comprised of equity securities and depositary receipts issued by companies involved in uranium and nuclear energy and includes companies that generate at least 50% of their revenues from (or, in certain circumstances, have at least 50% of their assets related to): (i) uranium mining or uranium mining projects that have the potential, in Market Vectors Index Solutions GmbH's (the Index Provider) view, when such projects are developed are expected to generate at least 50% of a company's revenues or are expected to constitute at least 50% of such company's assets; (ii) the construction, engineering and maintenance of nuclear power facilities and nuclear reactors; (iii) the production of electricity from nuclear sources; or (iv) providing equipment, technology and/or services to the nuclear power industry. Such companies may include small- and medium-capitalization companies and foreign issuers. As of December 31, 2014, the Nuclear Energy Index included 52 securities of companies with a market capitalization range of between approximately \$161 million and \$59.1 billion and a weighted average market capitalization of \$27.6 billion. As of December 31, 2014, approximately 20% of the Fund's investments consisted of securities of Japanese issuers. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Nuclear Energy Index by investing in a portfolio of securities that generally replicates the Nuclear Energy Index.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Nuclear Energy Index concentrates in an industry or group of industries. As of December 31, 2014, the Nuclear Energy Index was concentrated in the nuclear energy and utilities sectors, and the industrials sector represented a significant portion of the Nuclear Energy Index.

## PRINCIPAL RISKS OF INVESTING IN THE FUND

**Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.**

**Risk of Investing in the Nuclear Energy Sector.** The companies represented in the Fund's portfolio may face considerable risk as a result of, among other risks, incidents and accidents, breaches of security, ill-intentioned acts or terrorism, air crashes, natural disasters (such as floods or earthquakes), equipment malfunctions or mishandling in storage, handling, transportation, treatment or conditioning of substances and nuclear materials. Such events could have serious consequences, especially in case of radioactive contamination and irradiation of the environment, for the general population, as well as a material, negative impact on the Fund's portfolio companies and thus the Fund's financial situation. In addition, the nuclear energy sector is subject to competitive risk associated with the prices of

other energy sources, such as natural gas and oil. Consumers of nuclear energy may have the ability to switch between nuclear energy and other energy sources and, as a result, during periods when competing energy sources are less expensive, the revenues of companies in the nuclear energy sector may decline with a corresponding impact on earnings.

Nuclear activity is also subject to particularly detailed and restrictive regulations, with a scheme for the monitoring and periodic re-examination of operating authorization, which primarily takes into account nuclear safety, environmental and public health protection, and also national security considerations (terrorist threats in particular). These regulations and any future regulations may be subject to significant tightening by national and international authorities. This could result in increased operating costs, which would have a negative impact on the Fund's portfolio companies and may cause operating businesses related to nuclear energy to become unprofitable or impractical to operate. Furthermore, uranium prices are subject to fluctuation. The price of uranium has been and will continue to be affected by numerous factors beyond the Fund's control. With respect to uranium, such factors include the demand for nuclear power, political and economic conditions in uranium producing and consuming countries, uranium supply from secondary sources and uranium production levels and costs of production. In addition, the prices of crude oil, natural gas and electricity produced from traditional hydro power and possibly other undiscovered energy sources could potentially have a negative impact on the competitiveness of nuclear energy companies in which the Fund invests.

**Risk of Investing in the Utilities Sector.** To the extent that the Nuclear Energy Index continues to be concentrated in the utilities sector, the Fund will be sensitive to changes in, and its performance will depend to a great extent on, the overall condition of the utilities sector. Companies in the utilities sector may be adversely affected by changes in exchange rates, domestic and international competition, difficulty in raising adequate amounts of capital and governmental limitation on rates charged to customers.

**Risk of Investing in the Industrials Sector.** To the extent that the industrials sector continues to represent a significant portion of the Nuclear Energy Index, the Fund will be sensitive to changes in, and its performance may depend on to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.

**Risk of Investing in Foreign Securities.** Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Because the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries.

**Risk of Investing in Depositary Receipts.** The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Nuclear Energy Index, may negatively affect the Fund's ability to replicate the performance of the Nuclear Energy Index.

**Special Risk Considerations of Investing in Japanese Issuers.** Investment in securities of Japanese issuers, including issuers located outside of Japan that generate significant revenues from Japan, involves risks that may negatively affect the value of your investment in the Fund. Japan is located in a part of the world that has historically been prone to natural disasters such as earthquakes, volcanoes and tsunamis and is economically sensitive to environmental events. Any such event could result in a significant adverse impact on the Japanese economy. In addition, such disasters, and the resulting damage, could impair the long-term ability of issuers in which the Fund invests to conduct their businesses in the manner normally conducted.

**Risk of Investing in Small- and Medium-Capitalization Companies.** Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger, more established companies. Returns on investments in securities of small- and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

**Equity Securities Risk.** The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and

therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

**Market Risk.** The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

**Index Tracking Risk.** The Fund's return may not match the return of the Nuclear Energy Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Nuclear Energy Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Nuclear Energy Index. The Fund also bears the costs and risks associated with buying and selling securities while such costs are not factored in to the return of the Nuclear Energy Index. In addition, the Fund may not be able to invest in certain securities included in the Nuclear Energy Index, or invest in them in the exact proportions in which they are represented in the Nuclear Energy Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or

other regulatory changes. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its net asset value ( NAV ) based on fair value prices and the value of Nuclear Energy Index is based on securities' closing prices on local foreign markets (*i.e.*, the value of the Nuclear Energy Index is not based on fair value prices), the Fund's ability to track the Nuclear Energy Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities to realize losses causing it to deviate from the performance of the Nuclear Energy Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Nuclear Energy Index.

**Replication Management Risk.** An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Nuclear Energy Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

**Premium/Discount Risk.** Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

**Non-Diversified Risk.** The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the 1940 Act ). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

**Concentration Risk.** The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Nuclear Energy Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Nuclear Energy Index continues to be concentrated in the nuclear energy and utilities sectors, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on those sectors will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

## PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by comparing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year, five year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after income taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at [www.marketvectorsetfs.com](http://www.marketvectorsetfs.com).

### Annual Total Returns(%) Calendar Years

**Best Quarter:** 28.59% 2Q 09

**Worst Quarter:** -33.93% 3Q 08

**Average Annual Total Returns for the Periods Ended December 31, 2014**

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax

situation and may differ from those shown below. After-tax returns are not relevant to investors who hold shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Past Five Years	Since Inception (8/13/2007)
Market Vectors Uranium+Nuclear Energy ETF (return before taxes)	9.61%	-0.77%	-7.06%
Market Vectors Uranium+Nuclear Energy ETF (return after taxes on distributions)	9.00%	-2.12%	-8.19%
Market Vectors Uranium+Nuclear Energy ETF (return after taxes on distributions and sale of Fund Shares)	5.97%	-0.91%	-5.23%
Market Vectors® Global Uranium & Nuclear Energy Index (reflects no deduction for fees, expenses or taxes)*	9.70%	-1.02%	-6.94%
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	13.69%	15.45%	7.15%

\* Prior to March 24, 2014, the Fund sought to replicate an index called the DAXglobal® Nuclear Energy Index.

Therefore, index data prior to March 24, 2014 reflects that of the DAXglobal® Nuclear Energy Index. From March 24, 2014 forward, the index data reflects that of the Market Vectors® Global Uranium & Nuclear Energy Index. All index history reflects a blend of the aforementioned indexes.

#### **PORTFOLIO MANAGEMENT**

**Investment Adviser.** Van Eck Associates Corporation.

**Portfolio Managers.** The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	August 2007
George Chao	Portfolio Manager	December 2007

#### **PURCHASE AND SALE OF FUND SHARES**

The Fund issues and redeems Shares at NAV only in a large specified number of Shares each called a Creation Unit, or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are listed on NYSE Arca, Inc. ( NYSE Arca ) and because Shares trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

#### **TAX INFORMATION**

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.

#### **PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.
