VANECK VECTORS™ NATURAL RESOURCES ETF*

Ticker: HAP®
 Principal U.S. Listing Exchange: NYSE Arca, Inc.
SUMMARY PROSPECTUS
 MAY 1, 2016

HAPSUM

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.vaneck.com/library/etfs/>. You can also get this information at no cost by calling 800.826.2333, or by sending an email request to info@vaneck.com. The Fund's prospectus and statement of additional information, both dated May 1, 2016, are incorporated by reference into this summary prospectus.

INVESTMENT OBJECTIVE

VanEck Vectors Natural Resources ETF* (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of The *Rogers*™-Van Eck Natural Resources Index (the Natural Resources Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder expenses (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50%
Other Expenses	0.25%
Total Annual Fund Operating Expenses^(a)	0.75%
Fee Waivers and Expense Reimbursement ^(a)	-0.25%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement^(a)	0.50%

Reimbursement^(a)

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.49% of the Fund's average daily net assets per year until at least May 1, 2017. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR EXPENSES

1	\$	51
3	\$	215
5	\$	392
10	\$	907

* Prior to May 1, 2016, the Fund's name was Market Vectors Natural Resources ETF. Prior to May 1, 2014, the Fund's name was Market Vectors RVE Hard Assets Producers ETF.

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 9% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Natural Resources Index is comprised of publicly traded companies engaged (derive greater than 50% of revenues from applicable sources) in the production and distribution of commodities and commodity-related products and services in the following sectors: 1) Agriculture; 2) Alternatives (Water & Alternative Energy); 3) Base and Industrial Metals; 4) Energy; 5) Forest Products; and 6) Precious Metals. Such companies may include small- and medium-capitalization companies and foreign issuers. As of December 31, 2015, the Natural Resources Index included 304 securities of companies with a market capitalization range of between approximately \$411 million and \$324.5 billion and a weighted average market capitalization of \$52.1 billion. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be change without shareholder approval upon 60 days prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Natural Resources Index by investing in a portfolio of securities that generally replicates the Natural Resources Index.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Natural Resources Index concentrates in an industry or group of industries. As of December 31, 2015, the Natural Resources Index was concentrated in natural resources companies and the energy and basic materials sectors, and the consumer staples sector represented a significant portion of the Natural Resources Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Risk of Investing in Natural Resources Companies. The Fund will be sensitive to, and its performance will depend to a greater extent on, the overall condition of the natural resources sector. Investments in natural resources and the natural resources sector, which include agriculture, alternatives (*e.g.*, water and alternative energy), base and industrial metals, energy, forest products and precious metals, can be significantly negatively affected by events relating to these industries, including international political and economic developments, inflation, limits on exploration and other factors. The Fund's portfolio securities may experience substantial price fluctuations as a result of these factors, and may move independently of the trends of operating companies. Companies engaged in the sectors listed above may be adversely affected by changes in government policies and regulations, technological advances and/or obsolescence, environmental damage claims and competition from new market entrants. Changes in general economic conditions, including commodity price volatility, changes in exchange rates, imposition of import controls, depletion of resources

and labor relations, could adversely affect the Fund's portfolio companies.

Risk of Investing in the Basic Materials Sector. To the extent that the Fund continues to be concentrated in the basic materials sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the basic materials sector. Companies engaged in the production and distribution of basic materials may be adversely affected by changes in world events, political and economic conditions, energy conservation, environmental policies, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

Risk of Investing in the Energy Sector. To the extent that the Fund continues to be concentrated in the energy sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the energy sector. Companies operating in the energy sector are subject to risks including, but not limited to, economic growth, worldwide demand, political instability in the regions that the companies operate, government regulation stipulating rates charged by utilities, interest rate sensitivity, oil price volatility, energy conservation, environmental policies, depletion of resources and the cost of providing the specific utility services. Recently, oil prices continue to remain at low levels following a significant decrease. Oil prices are subject to significant volatility, which has adversely impacted companies operating in the energy sector. In addition, these companies are at risk of civil liability from accidents resulting in injury, loss of life or property, pollution or other environmental damage claims and risk of loss from terrorism and natural disasters.

Risk of Investing in the Consumer Staples Sector. To the extent that the consumer staples sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the consumer staples sector. These companies may be adversely affected by changes in the worldwide economy, consumer spending, competition, demographics and consumer preferences, exploration and production spending.

Risk of Investing in Foreign Securities. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Because the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries.

Risk of Investing in Depositary Receipts. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Natural Resources Index, may negatively affect the Fund's ability to replicate the performance of the Natural Resources Index.

Risk of Investing in Small- and Medium-Capitalization Companies. Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of small-capitalization and medium capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Risk of Cash Transactions. Unlike other exchange-traded funds (ETFs), the Fund expects to effect its creations and redemptions partially for cash, rather than in-kind securities. Therefore, it may be required to sell portfolio securities and subsequently recognize gains on such sales that the Fund might not have recognized if it were to distribute portfolio securities in kind. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Index Tracking Risk. The Fund's return may not match the return of the Natural Resources Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Natural Resources Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Natural Resources Index and raising cash to meet redemptions or deploying cash with newly created Creation Units (defined herein). The Fund also bears the costs and risks associated with buying and selling securities while such costs and risks are not factored into the return of the Natural Resources Index. In addition, the Fund may not be able to invest in certain securities included in the Natural Resources Index, or invest in them in the exact proportions in which they are represented in the Natural Resources Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons (such as diversification requirements). The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its net asset value (NAV) based on fair value prices and the value of Natural Resources Index is based on securities' closing prices on local foreign markets (*i.e.*, the value of the Natural Resources Index is not based on fair value prices), the Fund's ability to track the Natural Resources Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to

realize a loss and deviate from the performance of the Natural Resources Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Natural Resources Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as Authorized Participants (APs), none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, Shares may trade like closed-end funds at a discount to NAV and possibly face trading halts and/or de-listing.

No Guarantee of Active Trading Market. While Shares are listed on NYSE Arca, there can be no assurance that an active trading market for the Shares will be maintained especially for recently organized Funds. Further, secondary markets may be subject to irregular trading activity, market dislocations, wide bid/ask spreads and extended trade settlement periods, which could cause a material decline in the Fund's NAV.

Trading Issues. Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Natural Resources Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

ETF Shares Trading and Premium/Discount Risk. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NYSE Arca. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NYSE Arca is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NYSE Arca and the resulting premium or discount to the Shares' NAV may widen.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Natural Resources Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Natural Resources Index continues to be concentrated in natural resources companies and the energy and basic materials sectors, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on those companies and sectors will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

Edgar Filing: VanEck Vectors ETF Trust - Form 497K

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by comparing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year, five year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after income taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

Annual Total Returns(%) Calendar Years**Best Quarter:** 20.01% 3Q 10**Worst Quarter:** -22.20% 3Q 11**Average Annual Total Returns for the Periods Ended December 31, 2015**

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Past Five Years	Since Inception (8/29/2008)
VanEck Vectors Natural Resources ETF (return before taxes)	-19.48%	-5.22%	-3.60%
VanEck Vectors Natural Resources ETF (return after taxes on distributions)	-20.10%	-5.74%	-4.01%
VanEck Vectors Natural Resources ETF (return after taxes on distributions and sale of Fund Shares)	-10.64%	-3.79%	-2.59%
Rogers™-Van Eck Natural Resources Index (reflects no deduction for fees, expenses or taxes)*	-19.49%	-5.05%	-3.39%

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	August 2008
George Chao	Portfolio Manager	August 2008

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems Shares at NAV only in a large specified number of Shares each called a Creation Unit, or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are listed on NYSE Arca, Inc. (NYSE Arca) and because Shares trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

TAX INFORMATION

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.
