**PRESS RELEASE**

**TELECOM ITALIA: 3.450 MILLION ORDERS RECEIVED FOR MOBILE PHONES, OVER 50%  
UMTS/HSDPA**

**ANNOUNCING MAXXI TIM CASA , TELECOM ITALIA S HOME ZONE: TALKING ON A MOBILE  
PHONE FROM HOME NOW**

**HAS EVEN BETTER VALUE**

**At the Berlin dealer convention, Telecom Italia launches out the ultrabroadband mobile network, offering web  
speeds in excess of 7 Mbit/s**

**Presenting ultrafast PC Cards that bring digital mobile TV to the PC**

*Rome, October 22, 2007* - Telecom Italia presented its latest range of imminent offers in Berlin, where the company **took orders for 3.450 million mobile phones, of which over 50 % were UMTS/HSDPA models**. This exceeded the May 2007 Convention, where orders for 3.1 million cellphones were placed.

**The TIM Home Zone**

Telecom is rolling out **Maxxi TIM Casa** from November 15, a new offer that allows people to use mobile phones to make calls from home at particularly convenient rates. For €5 per month (including VAT), customers can make calls for up to eight hours a day (500 minutes of daily traffic) to landlines and TIM mobile phones for just €0.16 per call. TIM Casa Home Zone calls cost €0.16 per call, regardless of how long they last; the longer the customer stays on the phone, the greater the saving. "Home Zone" is also available in a fixed-only formula for €3 per month (including VAT).

**The offer also enables you to bring your home fixed line number onto your cell phone and use the cellphone to make and receive calls at home. Even when not at home, one may always be reached:** when somebody calls the home number, the customer is alerted by a free text message or via voice-mail service (according to customer preference).

In the Home Zone (within and around the home), the cellphone screen displays TIM Casa ; outside the home, it reads TIM , so **one may always know how one is spending on the call before it is made.** To use TIM Casa , customers must have a 128K SIM Card, which is replaced free of charge upon activation of the Home Zone .

The launch of TIM Casa is a continuation of the fixed-mobile convergence strategy begun with the Unica quadruple play offer, which enables calls from both the fixed-line and the mobile network using the same phone, as well as providing Internet navigation and access to Alice Home TV content.

### **Mobile ultrabroadband now live, offering mobile Internet connection at over 7 Mbit/s**

Telecom Italia launches its mobile ultrabroadband service, which increases UMTS connection speed up to 7.2 Mbit/s thanks to HSDPA and HSUPA technology.

TIM is also simplifying its mobile internet pricing with the new Alice Mobile time-based plans: 10 hours of web traffic per month costs €10; 100 hours of net traffic per month costs €20. Both of these packages include, at no extra cost, a USB modem or a PC card for high-speed websurfing without any set-up costs. The new ultrabroadband USB modules are **Onda MT 505, MT 502HS and HUAWAI E220**, and the **ET502HS PC Card**.

### **Mobile broadband delivers digital TV to laptops**

TIM is the first operator to bring the Magic Card™ to Italy. Made by Onda, the DT501HS is a new-generation PC card that offers high-speed net access and sends digital TV to personal computers, offering DVB-H TV programming without a fixed network connection.

Mobile broadband is available for €20 per month. Digital TV quality is comparable to DVD standard. TIM mobile TV's selection of channels includes Mediaset's Premium channels, La7 Digital, Sky themed channels, all Italian 2007/2008 football matches and top European soccer action.

In addition to new PC card launches, TIM is also introducing new cellphone models including the Nokia N95 8GB and the Nokia N81, both of which can broadcast video over broadband.

At the end of Q1 2007 (30 June 07), the company supplied 34.3 million lines in Italy, of which 5.1 million using UMTS technology.

Cautionary Statement for Purposes of the "Safe Harbor" Provision of the United States Private Securities Litigation Reform Act of 1995.

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for forward-looking statements. The Press Release included in this Form 6-K contains certain forward looking statements and forecasts reflecting management's current views with respect to certain future events. The ability of the Telecom Italia Group to achieve its projected results is dependent on many factors which are outside of management's control. Actual results may differ materially from those projected or implied in the forward-looking statements. Such forward-looking information involves risks and uncertainties that could significantly affect expected results and are based on certain key assumptions.

The following important factors could cause the Telecom Italia Group's actual results to differ materially from those projected or implied in any forward-looking statements:

- the continuing impact of increased competition in a liberalized market, including competition from global and regional alliances formed by other telecommunications operators in the core domestic fixed-line and wireless markets of the Telecom Italia Group;

- the ability of the Telecom Italia Group to introduce new services to stimulate increased usage to its fixed and wireless networks to offset declines in its traditional fixed-line business due to the continuing impact of

## Edgar Filing: TELECOM ITALIA S P A - Form 6-K

regulatory required price reductions, market share loss and pricing pressures generally and shifts in usage pattern;

- the level of demand for telecommunications services, particularly wireless telecommunication services in the maturing Italian market and for new higher value added products and services such as broadband;

- the ability of the Telecom Italia Group to successfully implement its reorganization;

- the success of Telecom Italia's customer loyalty and retention programs and the impact of such programs on revenues;

- the impact of regulatory decisions and changes in the regulatory environment, including implementation of recently adopted EU directives in Italy;

- the impact of economic development generally on the international business of the Telecom Italia Group and on its foreign investments and capital expenditures;

- the continuing impact of rapid or "disruptive" changes in technologies;

- the impact of political and economic developments in Italy and other countries in which the Telecom Italia Group operates;

- the impact of fluctuations in currency exchange and interest rates;

- Telecom Italia's ability to successfully implement its strategy over the 2007-2009 period;

- the ability of the Telecom Italia Group to successfully achieve its debt reduction targets;

- Telecom Italia's ability to successfully implement its internet and broadband strategy;

- the ability of the Telecom Italia Group to achieve the expected return on the significant investments and capital expenditures it has made and continues to make in Brazil and in Europe on broadband;

- the amount and timing of any future impairment charges for Telecom Italia's licences, goodwill or other assets; and

- the impact of litigation or decreased mobile communications usage arising from actual or perceived health risks or other problems relating to mobile handsets or transmission masts.

The foregoing factors should not be construed as exhaustive. Such factors should also be considered together with risk factors included in Telecom Italia Group's Annual Report on Form 20-F for 2005. Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof. Accordingly, there can be no assurance that the Group will achieve its projected results.
