Forward-looking statements

Certain sections in this document contain 'forward-looking statements' as that term is defined in the United States Private Securities Litigation Reform Act of 1995, such as statements that include the words 'expect', 'estimate', 'project', 'anticipate', 'believes', 'should', 'intend', 'plan', 'could', 'probability', 'risk', 'Value-at-Risk (VaR)', 'target', 'goal', 'obje 'endeavour', 'outlook', 'optimistic', 'prospects' and similar expressions or variations on such expressions.

In particular, this document includes forward-looking statements relating, but not limited to: the Group's restructuring plans, divestments, capitalisation, portfolios, net interest margin, capital ratios, liquidity, risk weighted assets (RWAs), return on equity (ROE), profitability, cost:income ratios, leverage and loan:deposit ratios, funding and risk profile; discretionary coupon and dividend payments; certain ring-fencing proposals; sustainability targets; the Group's future financial performance; the level and extent of future impairments and write-downs, including sovereign debt impairments; the protection provided by the Asset Protection Scheme (APS); and the Group's potential exposures to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity and equity price risk. These statements are based on current plans, estimates and projections, and are subject to inherent risks, uncertainties and other factors which could cause actual results to differ materially from the future results expressed or implied by such forward-looking statements. For example, certain market risk disclosures are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and, as a result, actual future gains and losses could differ materially from those that have been estimated.

Other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this document include, but are not limited to: global economic and financial market conditions and other geopolitical risks, and their impact on the financial industry in general and on the Group in particular; the ability to implement strategic plans on a timely basis, or at all, including the disposal of certain Non-Core assets and of certain assets and businesses required as part of the State Aid restructuring plan; organisational restructuring, including any adverse consequences of a failure to transfer, or a further delay in transferring, certain business assets and liabilities from RBS N.V. to RBS; the ability to access sufficient sources of liquidity and funding when required; deteriorations in borrower and counterparty credit quality; litigation, government and regulatory investigations including investigations relating to the setting of LIBOR and other interest rates; costs or exposures borne by the Group arising out of the origination or sale of mortgages or mortgage-backed securities in the United States; the extent of future write-downs and impairment charges caused by depressed asset valuations; the value and effectiveness of any credit protection purchased by the Group; unanticipated turbulence in interest rates, yield curves, foreign currency exchange rates, credit spreads, bond prices, commodity prices, equity prices and basis, volatility and correlation risks; changes in the credit ratings of the Group; ineffective management of capital or changes to capital adequacy or liquidity requirements; changes to the valuation of financial instruments recorded at fair value; competition and consolidation in the banking sector; the ability of the Group to attract or retain senior management or other key employees; regulatory or legal changes (including those requiring any restructuring of the Group's operations) in the United Kingdom, the United States and other countries in which the Group operates or a change in United Kingdom Government policy; changes to regulatory requirements relating to capital and liquidity; changes to the monetary and interest rate policies of central banks and other governmental and regulatory bodies; changes in UK and foreign laws, regulations, accounting standards and taxes, including changes in regulatory capital regulations and liquidity requirements; the implementation of recommendations made by the Independent Commission on Banking (ICB) and their potential implications; impairments of goodwill; pension fund shortfalls; general operational risks; HM Treasury exercising influence over the operations of the Group; insurance claims; reputational risk; the ability to access the contingent capital arrangements with HM Treasury; the participation of the Group in the APS and the effect of the APS on the Group's financial and capital position; the conversion of the B Shares in accordance with their terms; limitations on, or additional requirements imposed on, the Group's activities as a result of HM Treasury's investment in

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form 6-K

the Group; and the success of the Group in managing the risks involved in the foregoing.

The forward-looking statements contained in this document speak only as of the date of this announcement, and the Group does not undertake to update any forward-looking statement to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

The information, statements and opinions contained in this document do not constitute a public offer under any applicable legislation or an offer to sell or solicitation of any offer to buy any securities or financial instruments or any advice or recommendation with respect to such securities or other financial instruments.

Presentation of information

Non-GAAP financial information

The directors manage the Group's performance by class of business, before certain reconciling items, as is presented in the segmental analysis on pages 90 to 97 (the "managed basis"). Discussion of the Group's performance focuses on the managed basis as the Group believes that such measures allow a more meaningful analysis of the Group's financial condition and the results of its operations. These measures are non-GAAP financial measures. A body of generally accepted accounting principles such as IFRS is commonly referred to as 'GAAP'. A non-GAAP financial measure is defined as one that measures historical or future financial performance, financial position or cash flows but which excludes or includes amounts that would not be so adjusted in the most comparable GAAP measure. Reconciliations of these non-GAAP measures are presented throughout this document or in the segmental analysis on pages 90 to 97. These non-GAAP financial measures are not a substitute for GAAP measures. Furthermore, RBS has divided its operations into "Core" and "Non- Core". Certain measures disclosed in this document for Core operations and used by RBS management are non- GAAP financial measures as they represent a combination of all reportable segments with the exception of Non-Core. In addition, RBS has further divided parts of the Core business into "Retail & Commercial" consisting of the UK Retail, UK Corporate, Wealth, International Banking, Ulster Bank and US Retail & Commercial divisions. This is a non GAAP financial measure. Lastly, the Basel III net stable funding ratio (see page 149) represents a non-GAAP financial measure given it is a metric that is not yet required to be disclosed by a government, governmental authority or self-regulatory organisation.

Disposal groups

In accordance with IFRS 5 'Non-current Assets Held for Sale and Discontinued Operations', in Q4 2011 the Group transferred the assets and liabilities relating to the planned disposal of its RBS England and Wales, and NatWest Scotland branch-based businesses, along with certain SME and corporate activities across the UK ('UK branch-based businesses'), to assets and liabilities of disposal groups.

Presentation of information (continued)

Restatements

Organisational change

In January 2012, the Group announced changes to its wholesale banking operations in light of a changed market and regulatory environment. The changes have seen the reorganisation of the Group's wholesale businesses into 'Markets' and 'International Banking' and the proposed exit and/or downsizing of selected activities. The changes will ensure the wholesale businesses continue to deliver against the Group's strategy.

The changes include an exit from cash equities, corporate broking, equity capital markets and mergers and acquisitions advisory businesses. Significant reductions in balance sheet, funding requirements and cost base in the remaining wholesale businesses will be implemented.

Revised allocation of Group Treasury costs

In the first quarter of 2012, the Group revised its allocation of funding and liquidity costs and capital for the new divisional structure as well as for a new methodology. The new methodology is designed to ensure that the allocated funding and liquidity costs more fully reflect each division's funding requirement.

Revised divisional return on equity ratios

For the purposes of divisional return on equity ratios, notional equity has been calculated as a percentage of the monthly average of divisional risk-weighted assets (RWAs), adjusted for capital deductions. Historically, notional equity was allocated at 9% of RWAs for the Retail & Commercial divisions and 10% of RWAs for Global Banking & Markets. This was revised in Q1 2012 and 10% of RWAs is now applied to both the Retail & Commercial and Markets divisions.

Fair value of own debt and derivative liabilities

The Group had previously excluded changes in the fair value of own debt (FVOD) in presenting the underlying performance of the Group on a managed basis given it is a volatile non-cash item. To better align our managed view of performance, movements in the fair value of own derivative liabilities (FVDL), previously incorporated within Markets operating performance, are now combined with movements in FVOD in a single measure, 'Own Credit Adjustments' (OCA). This took effect in Q1 2012 and Group and Markets operating results have been adjusted to reflect this change which does not affect profit/(loss) before and after tax.

Comparatives for all of the items discussed above were restated in Q1 2012. For further information on the restatements refer to the announcement dated 1 May 2012, available on www.sec.gov.

Share consolidation

Following approval at the Group's Annual General Meeting on 30 May 2012, the sub-division and consolidation of the Group's ordinary shares on a one-for-ten basis took effect on 6 June 2012. Consequently, disclosures relating to or affected by numbers of ordinary shares or share price have been restated.

Highlights

First half 2012 results summary

The Royal Bank of Scotland Group (RBS) reported a Group operating loss before tax of £1,505 million for the first half of 2012. Operating profit on a managed basis was £1,834 million. The results included a provision of £125 million for costs arising from the technology incident that affected the Group's systems in June, principally to cover customer redress. In addition, we have reserved £50 million for redress of a particular category of complex interest rate swaps based on agreement reached with the FSA. Excluding these provisions, operating profit on a managed basis was stable compared with H1 2011.

Core operating profit totalled £3,185 million in H1, down 19%, while return on equity was 10.2%.

Retail & Commercial (R&C) faced headwinds with a weakening economy and continuing low interest rates, but held costs flat and there was a continued improvement in impairments. R&C H1 operating profit was £2,067 million, down 12%. Although Q2 net interest margin was broadly stable at 2.94% compared with Q1, net interest income has remained under pressure as a consequence of muted lending demand. R&C ROE in H1 was 9.8%.

Markets also faced a difficult environment, reinforcing management's decision to restructure the business, as the increased liquidity and investor confidence that followed the European Central Bank's Long Term Refinancing Operation in Q1 proved short-lived. H1 operating profit fell 21% to £1,075 million, with weakness in currencies, credit markets and investor products and equity derivatives, mitigated by higher rates revenues. ROE for Markets' ongoing business was 14.0%.

Direct Line Group H1 operating profit of £219 million was 6% higher than in the prior year, with significantly improved claims ratios despite the impact of more severe weather this year.

Non-Core operating losses were 31% lower than H1 2011 at £1,351 million, with expenses down 20% and impairments down 56% from the prior year.

Q2 2012 Group operating loss before tax was £101 million. Operating profit on a managed basis totalled £650 million, down 22% from Q2 2011 but only 1% excluding the provisions totalling £175 million described earlier. Core operating profit for the quarter was £1,518 million, down 9% from Q1 2012 and down 11% versus Q2 2011 (down 1% year-on-year and up 2% quarter-on-quarter excluding the provision totalling £175 million).

One-off and other items

H1 integration and restructuring costs totalled £673 million, of which £213 million was recorded in the second quarter. This was largely offset by the gain of £577 million recorded in March following a restructuring of the Group's Lower Tier 2 debt. A disposal gain of £197 million was recorded on the sale of RBS Aviation Capital, completed in June 2012.

A further provision of £135 million in Q2 (H1 2012 - £260 million) was recorded for Payment Protection Insurance claims, bringing the cumulative charge taken to £1.3 billion, of which £0.7 billion in redress had been paid by 30 June 2012.

The significant narrowing of RBS's credit spreads in debt markets, reflecting strengthened investor perceptions, that occurred in the first quarter of 2012 continued in Q2, resulting in an own credit charge of £2,974 million in H1 2012, of which £518 million was booked in Q2 2012. H1 2012 operating loss before tax was £1,505 million and attributable loss was £1,990 million. Excluding own credit adjustments of £2,974 million, H1 pre-tax operating profit on a managed basis was £1,469 million and attributable profit £287 million*. Tangible net asset value per share rose to 489 pence.

*Attributable loss adjusted for post-tax effect of own credit adjustments.

First half 2012 results summary (continued)

Efficiency

Core expenses in H1 2012 were flat, with benefits from the Group's cost reduction programme and the restructuring of Markets and International Banking offsetting the £88 million litigation settlement booked by US R&C in Q1 and the £125 million provision for costs arising from the technology incident accrued in Group Centre in Q2.

Staff expenses were reduced by 4% from H1 2011, with employee numbers down by 5,700, principally in Markets and International Banking. The compensation:revenue ratio in Markets declined to 33%, compared with 35% in H1 2011.

Despite strong expense control the Group cost: income ratio, net of claims worsened to 66% compared with 61% in H1 2011. The Core cost:income ratio, net of claims, worsened to 61%, compared with 57% in H1 2011, reflecting the weaker income trends. R&C cost:income ratio was 59% in H1, improving slightly from 60% in Q1 to 57% in Q2.

Risk

Group impairment losses totalled £2,649 million in H1 2012, with Q2 2012 in line with Q1 2012 at £1,335 million. R&C impairments were £241 million lower than H1 2011, with improvements particularly in UK Retail and US R&C. Core Ulster Bank impairments were in line with H1 2011 at £717 million, with Q2 2012 down 18% on Q1 2012. Non-Core impairments were down £1,390 million in H1 2012 at £1,096 million, principally reflecting the substantial provisioning of development land values in the Ulster Bank portfolio during the first half of 2011. Non-Core's Q2 2012 impairments were £118 million higher than Q1 2012, largely reflecting one significant provision within the project finance portfolio.

Core annualised impairments represented 0.7% of loans and advances to customers in Q2 2012 compared with 0.8% in Q1. Group risk elements in lending totalled £41.1 billion at 30 June 2012, down from £42.4 billion at 31 December 2011, with provision coverage increasing from 49% to 51%. Ulster Bank provision coverage was 53% in Core and 57% in Non-Core.

Balance sheet

RBS made strong progress on the task of strengthening and derisking its balance sheet during the first half. Non-Core third party assets, which had been reduced by £11 billion in Q1, fell by a further £11 billion in Q2 to £72 billion at 30 June 2012, principally driven by the disposal of RBS Aviation Capital and run-off. In light of this strong progress the Group has lowered its year-end target for Non-Core assets to £60-65 billion.

Markets funded assets have been reduced by £60 billion over the 12 months to 30 June 2012, with a further £18 billion reduction in International Banking assets.

From its highest reported point in 2008 the Group has reduced its funded assets £298 billion (24%).

First half 2012 results summary (continued)

Liquidity and funding

The Group maintained its trajectory towards a more stable, deposit-led balance sheet with the Group loan:deposit ratio improving further to 104% at 30 June 2012, compared with 114% a year earlier. Customer deposits grew by £3 billion during Q2 2012 and at 30 June 2012 were up £7 billion from a year earlier. No material impact was experienced from the credit rating downgrade during Q2 2012, on either the Group's credit spreads or its ability to attract customer deposits.

Reflecting the Group's strategy of sharply reducing its dependence on short-term wholesale funding, this funding fell to $\pounds 62$ billion at 30 June 2012, down $\pounds 40$ billion since the end of 2011. Short-term wholesale funding was covered 2.5 times by the Group's liquidity buffer, which was maintained at $\pounds 156$ billion.

Capital

The Group's Core Tier 1 ratio remained strong at 11.1%, and the leverage ratio was 15.6x. Although regulatory changes continued to increase risk-weightings on a number of portfolios, the Group reduced risk-weighted assets in Markets and successfully restructured a large derivative position in Non-Core, resulting in a substantial decrease in exposure to a highly leveraged counterparty. The capital relief afforded by the Asset Protection Scheme fell from 85 basis points in Q1 2012 to 77 basis points in Q2 2012 and continues to diminish. It remains the Group's intention to exit the Scheme in H2 2012, subject to the approval of the Financial Services Authority. The Group has already expensed £2.5 billion for the APS, which equals the minimum fee payable.

Disposals

Preparations for the planned IPO of Direct Line Group in the latter part of 2012 remain on track. The company is prepared for separation and, from 1 July, is operating on a substantially standalone basis with its own corporate functions and HR platform. Residual IT services will be provided by the Group under a Transitional Services Agreement. Direct Line Group returned £800 million to the Group during H1 2012 as part of optimising its capital structure.

We continue to work with Santander on the sale of the RBS England & Wales and NatWest Scotland branch-based businesses along with certain SME and corporate activities. The complexity of the transaction and the focus on causing minimum disruption to our customers is likely to lead to an extension of the process well into 2013.

The sale of RBS Aviation Capital to Sumitomo Mitsui Banking Corporation, acting on behalf of a consortium comprising its parent, Sumitomo Mitsui Financial Group, and Sumitomo Corporation, was completed on 1 June 2012. The disposal realised a net gain of £197 million and removed £5 billion of funded assets from the Non-Core balance sheet.

First half 2012 results summary (continued)

Technology issues In late June, a number of our customers were impacted by a technology incident affecting our transaction batch processing.

The immediate software issue was promptly identified and rectified. Despite this, significant manual intervention in a highly automated and complex batch processing environment was required. This resulted in a significant backlog of daily data and information processing. The consequential technology problems and backlog took time to resolve. However, at no point was any customer data lost or destroyed. Regrettably, in Ulster Bank, our customers experienced extended problems with their accounts, which have now been largely rectified.

Throughout the incident, we took action to help customers experiencing difficulty. We opened our branches for longer, doubled the number of staff in our UK-based call centres and gave staff greater authority to provide on-the-spot help. Thereafter, we focused on honouring our commitment that we would put impacted Group and non-Group customers back to the position they would have been in had the incident not occurred.

A full and detailed investigation is under way into the causes of the problem, overseen by independent experts and reporting to the Group Board Risk Committee. It will consider both the Group's own operations and the role of third parties in the context of the incident. It will establish a full account of what happened, an assessment of how the Group responded and a thorough review of the root cause.

A charge of £125 million has been accrued in Q2 2012 in relation to the costs of this incident, principally covering redress to the Group's customers. Additional costs may arise once all redress and business disruption items are clear and a further update will be given in Q3.

First half 2012 results summary (continued)

Core UK franchise

The health of RBS's core UK retail and commercial banking franchises is directly dependent on the health and success of its customers. Over the first half of 2012 the Group has maintained its support for these customers, with UK Retail increasing net lending to homeowners by $\pounds 2.0$ billion, or 2%, while UK Corporate increased loans to the manufacturing industry by 4%.

Gross mortgage lending in H1 2012 totalled £7.7 billion, with net new lending of over £3 billion in the same period. Gross new lending to first time buyers was up 26% from H1 2011.

Gross new lending to UK non-financial businesses totalled £41.5 billion, of which £19.2 billion was to SME customers. This included £28.3 billion of new loans and facilities (of which £15.2 billion was to SMEs) as well as £13.2 billion of overdraft renewals (including £4.0 billion to SMEs). Customer confidence has weakened in the face of economic newsflow, with many companies scaling back their investment plans, given concerns about the prospects for demand, and this is reflected in weak SME application volumes, down 18% on H1 2011. As a result, Q2 gross lending volumes were lower, with some impact from the technology incident as relationship managers prioritised the provision of operational support for affected customers. Overall, utilisation of overdraft facilities remained below 50% as it has for over two years.

It is into this challenging environment that the Bank of England recently launched the new Funding for Lending Scheme (FLS), aimed at increasing lending to the real economy. The Group welcomes this new initiative and has taken immediate steps to ensure that the FLS delivers real benefits for customers. UK Retail has introduced a new set of mortgage rates and products, offering low fixed rates to first time buyers and buyers of newly built homes as well as a strong offering for buy-to-let purchasers. In UK Corporate, the scheme will be used to cut interest rates on $\pounds 2.5$ billion of SME loans by an average of 1 percentage point, with larger reductions for the smallest businesses. The division will also remove arrangement fees on $\pounds 2.5$ billion of new SME loans. For larger businesses, the FLS benefits will be targeted at specific client segments where there are good opportunities to increase support to customers.

The Group also played an active role in the UK Government's National Loan Guarantee Scheme (NLGS), launched in March, and by 30 June had provided over 8,000 loans and asset finance facilities, totalling £470 million. RBS was the only bank to make NLGS loans available for the full range of loans down to as little as £1,000, and approximately two-thirds of the facilities provided have been for amounts under £25,000, demonstrating the Group's commitment to supporting as wide a range of customers as possible.

First half 2012 results summary (continued)

Core UK franchise (continued)

We continue to conduct extensive research with our customers to ensure that we are well equipped to meet their needs. Customers' principal expectations are that we will make their banking straightforward and simple, enabling them to interact with us in a way and at a time that suits them. When their needs are more complex, our customers want fast access to business expertise. They want to be confident that the person they talk to understands their business well. Key initiatives to ensure that we can meet these expectations include:

The launch of Business Connect, an enhanced telephony service that now supports 210,000 customers, with 75% of customers very satisfied with the service received;

Continuing efforts to ensure our relationship managers are fully equipped to serve their customers, through an accreditation programme in partnership with the Chartered Banker Institute; and

The "Working with you" programme, in which managers, of all levels, including senior executives, spend at least two days a year working in customers' businesses. This has proved popular both with our managers and with our customers, and has substantially improved our ability to understand customers' needs.

Outlook

The economic and regulatory challenges we face are unlikely to abate over the remainder of the year. We will continue to focus on maintaining a strong balance sheet and capital position.

We expect our Retail and Commercial businesses to continue to perform satisfactorily albeit Ulster Bank impairments are expected to remain elevated. Net interest margin is expected to be slightly up compared with the first half of 2012.

Markets' revenues remain sensitive to client activity levels and broader market volatility.

Non-Core continues to make good progress operating within our loss expectations, with third party assets projected to fall to between £60 billion and £65 billion by the year end.

We will make an announcement regarding exit from the Asset Protection Scheme once formal regulatory clearance has been secured.

The divestment of Direct Line Group is on track and, subject to market conditions, the IPO is planned for October 2012.

Analysis of results

	Half year ended		Quarter ended		
	30 June	30 June	30 June	31 March	30 June
	2012	2011	2012	2012	2011

- Non-Core	0.28%	0.77%	0.24%	0.31%	0.83%

Note:

(1) Retail & Commercial (R&C) comprises the UK Retail, UK Corporate, Wealth, International Banking, Ulster Bank and US Retail & Commercial divisions.

Key points

H1 2012 compared with H1 2011

- Group net interest income decreased by £558 million, 9%, driven by a 5% fall in Retail & Commercial and a 73% fall in Non-Core.
- Retail & Commercial net interest income fell £286 million, reflecting the impact of lower long-term interest rate hedges and the impact of a competitive savings market on UK Retail. International Banking net interest income was also lower, as loans and advances to customers reduced by £15 billion. The decrease in Non-Core reflects continued run-down.
- Group net interest margin (NIM) declined by 8 basis points, largely reflecting the cost of precautionary liquidity and funding strategies adopted in the latter part of 2011.

Q2 2012 compared with Q1 2012

- Group NIM increased by 7 basis points, benefiting from lower liquidity and funding costs as average short-term wholesale funding fell and low-yielding portfolios were managed down across the Group.
- Group net interest income fell by 1%, driven by a £24 million decrease in Retail & Commercial, largely reflecting the roll-off of low yielding portfolios in International Banking.

Q2 2012 compared with Q2 2011

· Group NIM fell 1 basis point, reflecting increased funding and liquidity costs and pressure on liability margins.

	152	27	160	(8)	50

Key points

H1 2012 compared with H1 2011

- Non-interest income fell by £3,475 million, or 40%, driven by a £2,974 million charge in relation to own credit adjustments, given the significant tightening in the Group's credit spreads. This compares with a smaller charge of £236 million in H1 2011. H1 2012 also included a decrease of £807 million in Non-Core, which reflects significant gains recorded in H1 2011, and lower Markets non-interest income, down £470 million (15%). The Markets' fall reflects sluggish market conditions relative to a year ago, as investor confidence has waned.
- Retail & Commercial non-interest income of £2,924 million compares with £3,150 million in H1 2011. In UK Retail, lower card transaction volumes and changing customer behaviours drove a 20% decline. International Banking non-interest income fell as a result of lower revenue share from Markets as client activity levels were down.
- H1 2012 includes £577 million gain on the redemption of own debt completed during the first quarter.
- A net gain on strategic disposals of £152 million in H1 2012 largely reflects the sale of RBS Aviation Capital in June 2012.
- Insurance net premium income decreased by 17% to £1,867 million driven by a decrease in volumes written by Direct Line Group during 2011, reflecting a planned decrease in the Motor book, the exit of certain business lines and the run-off of legacy policies.

Q2 2012 compared with Q1 2012

- Group non-interest income increased by 43%, primarily reflecting an own credit adjustment charge of £518 million compared with a charge of £2,456 million in Q1 2012 partially offset by lower Markets revenues following a seasonal uplift in the first quarter.
- Non-Core recorded a £39 million loss on disposals in Q2 2012, compared with gains of £182 million in Q1 2012.
- Retail & Commercial non-interest income increased by £80 million, or 6%, largely driven by a gain of £47 million on the sale of Visa B shares in US Retail & Commercial.

Q2 2012 compared with Q2 2011

• Non-interest income decreased by £1,895 million, or 38%, principally driven by Non-Core as significant gains on restructured assets in Q2 2011 were not repeated and reflecting an own credit adjustment charge of £518 million compared to a gain of £324 million in Q2 2011.

Insurance net claims	1,225	1,705	576	649	793
Staff costs as a % of total income	42%	30%	35%	50%	27%

Key points

H1 2012 compared with H1 2011

- Group operating expenses decreased by 5%, largely driven by the on-going run-down of the Non-Core division and lower revenue-linked staff expenses in Markets and Payment Protection Insurance costs of £260 million compared to £850 million in H1 2011, bringing the cumulative charge to £1.3billion
- Retail & Commercial expenses were broadly flat as benefits from the Group cost reduction programme were largely offset by a litigation settlement of £88 million (\$138 million) in US Retail & Commercial in Q1.
- Insurance net claims of £1,225 million were £480 million lower than H1 2011 as Direct Line Group loss ratios improved, reflecting reduced exposure, tight underwriting discipline and reserve releases from prior years. Legacy business run-off also contributed to the reduction.
- Integration and restructuring costs totalled £673 million, driven by the restructure of Markets and International Banking, Group property exits and expenditure incurred in preparation for the divestment of Direct Line Group and the sale of branches to Santander.

Q2 2012 compared with Q1 2012

- Group operating expenses fell by 7%, with staff expenses down £427 million, largely driven by a seasonal fall in Markets revenues. This was partially offset by a 14% increase in other expenses, which includes a £125 million provision for customer redress relating to the technology incident in June 2012.
- Retail & Commercial expenses declined 5%, principally reflecting the litigation settlement of £88 million (\$138 million) in Q1 in US Retail & Commercial, and reductions in International Banking as a result of a planned

reduction in headcount following the Q1 2012 restructuring.

Insurance net claims decreased by £73 million largely reflecting prior year reserve releases.

•

Q2 2012 compared with Q2 2011

- Group operating expenses were down 15% compared with Q2 2011, as Non-Core run-down and lower expenses in Markets, largely driven by headcount reductions, and a provision of £135 million in respect of Payment Protection Insurance costs compared with £850 million in Q2 2011, were offset by the £125 million provision relating to the Q2 2012 technology incident.
- Retail & Commercial expenses decreased by 3% as a result of savings achieved as part of the Group cost reduction programme.
- Insurance net claims fell by 27% reflecting legacy business run-off and reduced exposures, particularly in Motor. Tightened claims management also supported prior year reserve releases.

Non-Core	3.6%	0.8 <i>%</i> 5.2%	4.2%	0.8 <i>%</i> 2.7%	6.0%	

Notes:

(1) In the second quarter of 2011, the Group recorded an impairment loss of £733 million in respect of its AFS portfolio of Greek government debt as a result of Greece's continuing fiscal difficulties. In Q1 2012, as part of Private Sector Involvement in the Greek government bail-out, the vast majority of this portfolio was exchanged for Greek sovereign debt and European Financial Stability Facility

notes; the Greek sovereign debt received in the exchange was sold.

(2) Customer loan impairment charge as a percentage of gross customer loans and advances excluding reverse repurchase agreements and including disposal groups.

Key points

H1 2012 compared with H1 2011

- Group loan impairment losses fell 34% to £2,730 million, compared with £4,135 million in H1 2011, driven by a significant reduction in Non-Core and improvements in Retail & Commercial.
- Non-Core loan impairment losses were 51% lower, reflecting the substantial provisioning of development land values in the Ulster Bank portfolio during H1 2011.
- Retail & Commercial loan impairment losses decreased by £206 million, 12%, driven by an overall improvement in asset quality reflecting risk appetite tightening in UK Retail and an improved credit environment for US Retail & Commercial.
- Total Ulster Bank (Core and Non-Core) loan impairments were £1,166 million, compared with £2,540 million in H1 2011, driven by the fall in Non-Core. Core Ulster Bank impairments decreased by 2%.
- The Group customer loan impairment charge as a percentage of loans and advances fell to 1.1% compared with 1.6% for H1 2011. For Core, the comparable percentages were 0.7% and 0.8%.

Q2 2012 compared with Q1 2012

- Group loan impairment losses increased 11%, driven by Non-Core, where loan impairments rose by £217 million, largely reflecting one large provision in the Project Finance portfolio.
- Retail & Commercial showed continuing improvement in credit trends, with loan impairment losses down 10%. This largely reflected a decrease in Ulster Bank, where significant provisions were recorded in Q1 2012 in respect of retail mortgages. UK Retail impairments also declined, with lower default volumes in both mortgages and unsecured lending reflecting risk appetite tightening.
- Core and Non-Core Ulster Bank loan impairments totalled £512 million, a decrease of £142 million. Credit conditions remained difficult leading to a deterioration in asset quality. However, the level of deterioration of mortgages in default and the rate of decline in house prices slowed during the quarter.

Q2 2012 compared with Q2 2011

- Group loan impairment losses decreased by 36%, driven by a decline in Non-Core impairments, due to the non repeat of the Q2 2011 development land provisions in Ulster Bank.
- Retail & Commercial loan impairment losses were down £147 million, or 17%.
 Excluding Ulster Bank, R&C loan impairment losses declined by £201 million

reflecting broad strengthening in credit metrics.

			31

Core Tier 1 ratio (1)	11.1%	10.8%	10.6%
Tier 1 ratio	13.4%	13.2%	13.0%
Total capital ratio	14.6%	14.0%	13.8%

Note:

(1) The benefit of APS in the Core Tier 1 ratio was 77 basis points at 30 June 2012 (31 March 2012 - 85 basis points; 31 December 2011 - 90 basis points).

30 June 2012 compared with 31 March 2012

- The Group's Core Tier 1 ratio improved to 11.1%. Core Tier 1 capital increased by £1.4 billion. This reflected the issue of new shares and the sale of surplus shares held by the Group's Employee Benefit Trust to fund deferred employee incentive awards, £0.5 billion, together with lower regulatory deductions, including APS, of £0.9 billion.
- The impact of the Asset Protection Scheme (APS) on the Core Tier 1 ratio continued to decline, from 85 basis points at 31 March 2012 to 77 basis points at 30 June 2012.
- Gross risk-weighted assets (RWAs) fell by £8 billion, reflecting a significant reduction in market risk coupled with Non-Core run-off and disposals.

30 June 2012 compared with 31 December 2011

- The Core Tier 1 ratio increased by 50 basis points compared with 31 December 2011, driven by attributable profits (net of movements in fair value of own debt), issuance of new shares, lower regulatory capital deductions, and a 4% reduction in gross risk-weighted assets.
- Gross risk-weighted assets fell by £20 billion, excluding the effect of the APS. Post APS, RWAs decreased by £4 billion.

Wholesale funding	£213bn	£234bn	£258bn
Liquidity portfolio	£156bn	£153bn	£155bn

Notes:

- (1) Funded balance sheet represents total assets less derivatives.
- (2) Excluding reverse repurchase agreements and stock borrowing, and including disposal groups.
- (3) Excluding repurchase agreements and stock lending, and including disposal groups.
- (4) Net of provisions, including disposal groups and excluding repurchase agreements. Excluding disposal groups, the loan:deposit ratios of Core and Group at 30 June 2012 were 92% and 105% respectively (31 March 2012 93% and 107% respectively; 31 December 2011 94% and 110% respectively).

30 June 2012 compared with 31 March 2012

- Group funded assets fell by £21 billion during Q2 2012 to £929 billion. Non-Core further reduced third party assets by £11 billion, including the disposal of RBS Aviation Capital.
- The Group loan:deposit ratio improved to 104% compared with 106% at 31 March 2012, as customer deposits increased by £3 billion through successful deposit-gathering initiatives. A credit rating downgrade during Q2 2012 had negligible impact.
- Short-term wholesale funding decreased by £18 billion in Q2 2012 to £62 billion, while a significant liquidity portfolio of £156 billion was maintained, a coverage ratio of 2.5 times.

30 June 2012 compared with 31 December 2011

- Funded assets decreased by £48 billion to £929 billion, reflecting the Group's programme of deleveraging and reducing capital intensive assets. Non-Core funded assets fell by £22 billion primarily reflecting disposals and run-off, and Markets reduced its assets by £11 billion.
- Loans and advances to customers were £19 billion lower, reflecting net customer repayments in International Banking, weak customer credit demand and Non-Core run-down and disposals.
- The Group loan:deposit ratio improved to 104% compared with 108% at 31 December 2011. The Core loan:deposit ratio improved to 92%.

Further analysis of the Group's liquidity and funding position is included on pages 139 to 150.

Notes:

- (1) Divisional return on equity is based on divisional operating profit after tax divided by average notional equity (based on 10% of the monthly average of divisional RWAs, adjusted for capital deductions).
- (2) Includes disposal groups: loans and advances to customers £7.5 billion (31 March 2012 and 31 December 2011 £7.3 billion), risk elements in lending £0.5 billion (31 March 2012 and 31 December 2011 £0.5 billion) and customer deposits £8.6 billion (31 March 2012 £8.7 billion; 31 December 2011 £8.8 billion).

Key points

UK Retail had a subdued H1 2012, with operating profit falling 13%, although the division continued to lend more despite the tough economic conditions reducing demand for unsecured lending. The division had a successful ISA season and has achieved balance growth well in excess of the market, although deposit margins remained under pressure.

UK Retail's aspiration to become the UK's most helpful bank suffered a setback in June, following the technology problems that affected a number of the Group's payment systems. The division's priority has been to take all steps possible to help customers experiencing difficulty by opening branches for longer, doubling staff numbers in UK-based call centres and giving greater authority to local staff to provide on-the-spot help.

In early July, the Bank of England announced the Funding for Lending Scheme (FLS) designed to boost lending to the real economy. UK Retail will use this scheme to cut costs for first time buyers, introducing a new set of mortgages with lower rates.

UK Retail (continued)

Key points (continued)

H1 2012 compared with H1 2011

- Net interest income was 9% lower with net interest margin falling 47 basis points to 3.59%. This was driven by the decline in liability margins due to the continued impact of low rates on long term interest rate hedges and the competitive savings market.
- Total customer lending grew by £3 billion, or 2%, with mortgage balances increasing 4% while unsecured balances fell 9%. Deposit balances grew 11%, with both savings and current account deposits up 11%.
- Costs decreased by 6% from H1 2011 with the majority of savings coming from direct cost initiatives.
- Impairment losses fell 27% in H1 2012, as overall asset quality improved reflecting risk appetite tightening and lower unsecured balances.

Q2 2012 compared with Q1 2012

- Operating profit decreased by 8%, with increased costs and falling income, partially offset by a 10% reduction in impairments.
- The division further reduced the loan to deposit ratio to 104%.

Customer deposits grew 2%, driven by increases of 2% in both savings and current account balances following successful savings campaigns in the quarter.

Mortgage balances increased by 1% in the quarter. Unsecured lending continued to be managed carefully, contracting by 1% as a result of the strategic decision to improve the Group's risk profile combined with customer deleveraging.

· Income growth has been challenging in the current economic environment, as total income fell by 3%.

Net interest margin declined 4 basis points largely due to the impact of lower rates on long term interest rate hedges. In addition, competition in the deposit market continued to drive down overall liability margins. Changes in consumer behaviour has reduced fee income and driven down unsecured interest-bearing balances, putting pressure on net interest income.

- · Costs increased, primarily due to the timing of regulatory expenses.
- · Impairment losses decreased 10%, reflecting the continued impact of tightening risk appetite. Impairments are expected to remain broadly stable subject to normal seasonal fluctuations and the economic environment.

Mortgage impairment losses decreased in the quarter due to further improvement in default volumes and a stable collection outlook.

The unsecured portfolio charge fell 4%, with slightly lower default volumes and continued good collections performance. Industry benchmarks for cards arrears remain stable, with RBS continuing to perform better than the market.

Risk-weighted assets decreased 2%, with volume growth in lower risk secured mortgages offset by a decrease in the unsecured portfolio, and a small improvement in credit quality across both the secured and unsecured portfolios.

.

UK Retail (continued)

Key points (continued)

Q2 2012 compared with Q2 2011

- Operating profit fell by £98 million with income down 14%, costs down 5% and impairments down 33%.
- Net interest income was £110 million lower than Q2 2011, with the unsecured book being managed down and continued pressure on liability margins, partly offset by strong mortgage growth.
- Costs were 5% lower than in Q2 2011 due to continued implementation of process efficiencies and headcount reductions.
- The continued effect of risk appetite tightening and muted demand for unsecured lending contributed to lower default volumes, with impairment losses decreasing by 33%.

Notes:

- (1) Divisional return on equity is based on divisional operating profit after tax, divided by average notional equity (based on 10% of the monthly average of divisional RWAs, adjusted for capital deductions).
- (2) Includes disposal groups: loans and advances to customers £11.9 billion (31 March 2012 £12.0 billion; 31 December 2011 £12.2 billion), risk elements in lending £0.9 billion (31 March 2012 and 31 December 2011 £1.0 billion) and customer deposits £13.1 billion (31 March 2012 £12.7 billion; 31 December 2011 £13.0 billion).

UK Corporate (continued)

Key points

In a challenging environment, UK Corporate delivered a resilient performance in the first half, with a stronger operating profit in Q2 than Q1. Customer confidence has weakened in the face of economic newsflow, with many companies scaling back their investment plans, given concerns about the prospects for demand. This was reflected in weak SME application volumes.

UK Corporate has, nevertheless, continued to support its customers, playing an active role in supporting government initiatives, including over 8,000 new loans and asset finance facilities under the Government's National Loan Guarantee Scheme. The Group has also welcomed the new FLS, and will use the scheme to cut interest rates on £2.5 billion of SME loans by an average of 1% and to remove arrangement fees on the same amount of new SME loans.

H1 2012 saw the launch of an enhanced telephony offering aimed at Business Banking customers: Business Connect. This service now supports 210,000 customers and has already processed over 28,000 calls with 75% of customers very satisfied with the service received. UK Corporate also rolled out an FX campaign, which uses expertise from Corporate & Institutional Banking, Transaction Services UK and Corporate Banking Risk Services to help customers trade internationally.

UK Corporate responded swiftly and decisively to minimise the impact on its customers from the recent Group technology incident. Corporate service centre hours were immediately extended, and business banking customers had access to additional support during extended branch opening hours, while relationship managers were empowered to take critical decisions to action customer payments and drawdowns.

H1 2012 compared with H1 2011

- Operating profit decreased 8% to £1,004 million, driven by higher net funding costs and lower non-interest income, partly offset by reduced costs.
- Net interest income decreased by 3%, predominantly driven by higher net funding costs. While lending income benefited from asset margin increases, this was offset by increased competition on deposit margins.
- Non-interest income decreased 2%, reflecting fee accelerations from refinancing and asset disposal gains in H1 2011, partially offset by a higher revenue share of Markets income.
- Total costs decreased 1% due to cost efficiencies achieved in discretionary spending categories.
- Impairments were 9% higher, primarily driven by the significant release of latent provisions in H1 2011, partially offset by lower individual and collectively assessed provisions.

UK Corporate (continued)

Key points (continued)

Q2 2012 compared with Q1 2012

- Operating profit increased by 4% to £512 million, driven by higher income and lower costs.
- Net interest income rose by 2% and net interest margin increased 8 basis points largely driven by lower net costs of funding. Strong customer deposit growth supported an improvement in the loan to deposit ratio to 85%.
- Non-interest income decreased 1% as a result of lower Markets revenue share income and valuation movements, partially offset by growth in operating lease activity.
- Total costs decreased 3%, due to the phasing of staff incentive costs and lower Markets revenue related costs, partly offset by operating lease costs.
- Impairments of £181 million were £5 million higher, exhibiting a similar profile to Q1 2012.

Q2 2012 compared with Q2 2011

- Operating profit increased by £40 million, or 8%, predominantly driven by lower impairments.
- Net interest income was broadly flat while net interest margin increased 14 basis points, benefiting from a revision to deferred income recognition assumptions, partially offset by deposit margin pressure and increased net funding costs.
- Non-interest income decreased by £9 million. Higher revenue share of Markets income in Q2 2012 was offset by the non-recurrence of asset disposal gains recorded in Q2 2011 and lower operating lease activity.
- Impairments decreased £39 million, with lower individual provisions slightly offset by reduced latent provision releases.

Wealth (continued)

Key points

H1 2012 delivered a strong income performance, driven by improved interest margins, more than offset by higher expenses and increased impairments. Continued volatile markets led to subdued client transactions, resulting in reduced brokerage and foreign exchange income.

The period saw further progress in the implementation of the refreshed Coutts divisional strategy across all jurisdictions. Coutts completed the sale of the Latin American, Caribbean and African business to RBC Wealth Management. The business, with client assets of around ± 1.5 billion, represented approximately 2% of Coutts' total client assets. The decision to sell the business was consistent with the new Coutts strategy of simplifying the business and sharpening the focus on key regions and countries, specifically the UK, Switzerland, the Middle East, Russia, the Commonwealth of Independent States and selected countries in Asia.

The UK rollout of the Coutts global technology platform was completed in Q1 2012. The platform, and related strategic investment, will transform the division's ability to serve clients globally, enabling the business to operate as an international organisation on a unified and common information technology platform.

The division continued to prepare for the implementation of the Retail Distribution Review (RDR) regulations in the UK. Revised Private Banker and Wealth Manager roles were announced aimed at ensuring clients continue to receive the best service and advice based on their specific needs.

H1 2012 compared with H1 2011

- Operating profit declined 16% with a strong income performance more than offset by higher expenses and increased impairments.
- Income increased 7% reflecting an improvement in lending and deposit margins and strong divisional treasury performance, together with the gain from the disposal of the Latin American, Caribbean and African business.
- Expenses increased by 11% reflecting continued strategic investment in the business, a client redress expense following a past business review into the sale of the ALICO Enhanced Variable Rate Fund announced in November 2011 and the Financial Services Authority (FSA) fine incurred during Q1 2012.
- Impairments were £22 million, up £14 million from the low level recorded in the prior period.
- Client assets and liabilities managed by the division declined 3%. Lending volumes remained stable and deposit volumes grew 3%, predominantly through the UK. Assets under management declined 11% with adverse market movements of £2.1 billion, and client outflows of £1.9 billion, predominantly in the latter half of 2011.
- Return on equity declined by 230 basis points to 11.6%, as operating profit declined.

Wealth (continued)

Key points (continued)

Q2 2012 compared with Q1 2012

- Operating profit increased 42% to £64 million in the second quarter, including the gain from the sale of the Latin American, Caribbean and African business and the phasing of incentive accruals.
- Income growth of 4% included a 13% increase in non-interest income, reflecting the disposal gain. Excluding the disposal gain, income declined 1%, with lower investment income linked to a decline in assets under management.
- Expenses which include client redress expense following a past business review into the sale of the ALICO Enhanced Variable Rate Fund announced in November 2011 decreased by 3% as a result of lower incentive accruals and the non-recurrence of the FSA fine in Q1 2012.
- Client assets and liabilities managed by the division declined 1%. Lending volumes were broadly stable and deposit volumes increased by 1%. Assets under management declined 3% due to adverse market movements which accounted for £0.6 billion of the movement and net new business outflows of £0.2 billion, mainly in international markets.

Q2 2012 compared with Q2 2011

- Operating profit rose 7% with strong growth in income including the disposal gain, partially offset by client redress costs and higher impairments.
- Income increased 7% as a result of the disposal gain and strong growth in net interest income. Net interest income grew as a result of a 14 basis points improvement in lending margins and strong growth in divisional treasury income. Deposit income also increased with sustained growth in volumes and improved margins. Excluding the impact of the business disposal, non-interest income declined 4% with continued volatile markets subduing client transactions, leading to reduced brokerage and foreign exchange income.
- Expenses increased by 3% due to the impact of the client redress. Excluding this, expenses decreased 5%, assisted by favourable exchange rate movements and management of discretionary costs.
- Impairments were £12 million, up £9 million from the low level recorded in the prior period.

Key points

H1 results for International Banking were affected by the division's restructuring, with a substantial reduction in exposures improving capital efficiency but with a consequential impact on income. Debt capital markets were sluggish during the period affecting loan portfolio revenues, but trade finance activity has shown significant growth, particularly in Asia. In Europe, the European Central Bank (ECB) lending and deposit rate cuts in Q2 underlined growing fragility across the region. Clients remain cautious following continued economic uncertainty.

The International Banking structure and governance were fully bedded down by the end of Q2 2012. Management is focused on leveraging the International network and the Transaction Services offering to ensure relevance and intimacy with the division's client base.

International Banking (continued)

Key points (continued)

H1 2012 compared with H1 2011

- Operating profit decreased by £111 million as reduced income was only partially mitigated by lower expenses and impairments.
- Income was 16% lower mainly due to a reduction in third party assets coupled with higher funding costs:

The lending portfolio decreased by 38%, as exposures were reduced to improve capital efficiency and liquidity levels. Ancillary debt financing income also declined, as economic uncertainty in H1 2012 resulted in sluggish debt capital markets.

Cash management increased 12% due to a higher funding surplus and robust deposit retention activity.

Trade finance was up by 11% reflecting significant growth in activity, particularly in Asia.

- Expenses were down by £62 million as planned cost initiatives in the Markets & International Banking restructuring took effect.
- Impairments fell by £36 million due to a single name trade finance provision in H1 2011.
- Third party assets fell by 23% mainly due to loan portfolio reductions of £14 billion, reflecting capital management discipline, and a reduced collateral requirement for Japanese business activities.
- Customer deposits decreased 11% as market conditions and a competitive environment created headwinds in raising deposits.

Q2 2012 compared with Q1 2012

- Operating profit was up £70 million driven primarily by planned cost reduction initiatives across the business (£43 million), higher loan portfolio-linked income, and lower impairment charges. Return on equity was 10.5%.
- Income was up £19 million to £561 million despite continued macroeconomic uncertainty and the low interest rate environment.

Lending portfolio income was up 18%, benefiting from lower balance sheet funding costs, and positive valuation adjustments on credit hedging activity.

Cash management decreased 8% as increasingly difficult economic conditions led to suppressed deposit levels.

- Expenses declined by £43 million, largely reflecting the planned headcount reduction following the formation of the International Banking division, and tight management of technology and support infrastructure costs.
- · Impairments in Q2 2012 included a charge of £18 million relating to a single name portfolio exposure.
- Third party assets declined 4%, reflecting a reduction in loan portfolio and in the collateral required for Japanese business activities. This was partially offset by growth in trade finance as the business sought to increase market share and grow capital efficient lending.
- Customer deposits fell by 6% as deposit gathering remained challenging due to continued macroeconomic uncertainty and a competitive environment.

International Banking (continued)

Key points (continued)

Q2 2012 compared with Q2 2011

- Operating profit was up £18 million with lower expenses and impairments partially offset by lower income driven by planned balance sheet reduction across the loan portfolio.
- Income decreased by 16%:

Loan portfolio income fell by £107 million, reflecting a reduction in assets in order to improve capital efficiency and liquidity levels, and lower ancillary revenues associated with debt financing following subdued market activity in Q2 2012. Cash management was up £4 million, despite weak European activity and lower global payments, as a result of a higher funding surplus arising from lower liquidity buffer requirements. Trade finance increased by 6% following continued business initiatives to increase penetration in chosen markets, primarily in Asia.

- Expenses fell by £45 million, largely reflecting planned headcount reduction and increased focus on the management of discretionary costs.
- Impairments were £77 million lower due to a single name trade finance provision in Q2 2011.

Note:

Key points

⁽¹⁾ Divisional return on equity is based on divisional operating loss after tax divided by average notional equity (based on 10% of the monthly average of divisional RWAs, adjusted for capital deductions).

Trading conditions remained difficult, as Irish economic indicators continue to be weak. The high cost of funding has an adverse impact on income, while impairment levels are still elevated, asset prices weakening over the period and residential mortgage arrears continue to rise, albeit with less deterioration in credit metrics in Q2 than in Q1 2012. Cost management remained a central priority.

The recent RBS Group technology incident, affecting a number of the Group's payments systems, has had an extended impact on Ulster Bank customers. During the period of disruption Ulster Bank's main priority was to help customers experiencing difficulty. Branches remained open for longer and the number of staff in call centres was trebled. Provision for costs arising from this incident are included in central items (see page 60).

Ulster Bank (continued)

Key points (continued)

H1 2012 compared with H1 2011

- The operating loss of £555 million was marginally higher than H1 2011, with lower income only partly offset by lower expenses and impairment losses.
- Income decreased by 10% due to a combination of reducing assets and higher funding costs. Net interest margin increased by 3 basis points with the benefit of loan re-pricing initiatives largely offsetting the higher cost of funds.
- Expenses decreased by 7% reflecting the benefits of cost saving initiatives, particularly relating to discretionary spend.
- Impairment losses reduced marginally by 2%, however credit conditions in Ireland remain challenging with asset prices deteriorating over the period and residential mortgage arrears rising.
- Loans and advances to customers declined by 12% reflecting further amortisation and the continuing weak demand for credit.
- Customer deposit balances declined by 15% due to outflows of wholesale balances over the period with Retail and SME balances remaining stable despite the competitive market, particularly in the Republic of Ireland.

Q2 2012 compared with Q1 2012

- The operating loss of $\pounds 245$ million decreased by $\pounds 65$ million primarily driven by a reduction in mortgage impairment losses.
- Net interest income reduced marginally due to the continuing high cost of deposits. Net interest margin decreased by 5 basis points, principally due to higher liquid assets during the period.
- Non-interest income fell by £3 million in the quarter largely due to lower volumes of derivative product sales during the period following the technology incident.
- Expenses fell by £2 million over the period as cost management initiatives continued to be implemented.
- Impairment losses decreased by £71 million reflecting a reduction in mortgage losses due to a reduced level of deterioration in credit metrics during the quarter.
- Customer deposit balances remained flat despite significant market volatility and the impact of a credit rating downgrade. Loans and advances to customers fell 3% during the quarter.
- Risk-weighted assets remained flat on a constant currency basis.

Q2 2012 compared with Q2 2011

- The operating loss increased by £67 million as higher impairment losses and lower income were only partly offset by a reduction in expenses.
- Income decreased by 12% due to lower earning asset volumes and higher funding costs. Net interest margin remained broadly flat.
- Expenses decreased by 10% due to active management of the cost base with a focus on reducing discretionary expenditure.
- Impairment losses increased by £54 million, largely reflecting affordability issues and the continued deterioration in asset quality as property prices declined further over the period.

Key point

Sterling strengthened relative to the US dollar during the first half of 2012, with the spot exchange rate increasing by 1.4% compared with 31 December 2011.

Divisional return on equity is based on divisional operating profit after tax divided by average notional equity (based on 10% of monthly average of divisional RWAs, adjusted for capital deductions).

Key points

US Retail & Commercial performed strongly in H1 2012, with a significant improvement in operating profit, largely reflecting lower impairment losses. The macroeconomic operating environment remained challenging, with low rates, high unemployment, a soft housing market, sluggish consumer activity and the continuing impact of legislative changes. However, the credit environment showed signs of improvement.

US Retail & Commercial has focused on its back-to-basics strategy; concentrating on core banking products and competing on service and product capabilities rather than price. This was supported by the four core Customer Commitments launched across the entire branch footprint last year. The division enhanced its mobile capabilities, launching an Android app along with an improved iPhone user experience, including a new person-to-person (P2P) payment application. Consumers also recognised Citizens Bank as within the top 10 US banks for corporate reputation in the 2012 American Banker survey, an increase of eight places from 2011.

US Retail & Commercial (US Dollar) (continued)

Key points (continued)

In Q2 2012, Commercial Banking introduced its own four core Client Commitments, which were built around client feedback. Standard & Poor's recently recognised US Retail & Commercial's continued focus on strengthening and growing valued Commercial Banking client relationships as delivering results and providing differentiation from competitors based on the quality of ideas and solutions.

The reintegration of both Corporate Risk Solutions and Treasury Solutions into Commercial Banking has significantly strengthened the cross-sell of Treasury Solutions products as well as foreign exchange and derivatives hedging to the Commercial client base. Referrals increased by 25% for derivatives, 6% for foreign exchange services and 36% for cash management compared with the same period last year.

In Q2 2012, Citizens executed a referral partnership with Oppenheimer & Company to address the corporate finance needs of its Commercial Enterprise Banking and Middle Market clients. As a result, Commercial bankers are now able to offer their clients timely and relevant corporate finance solutions, including mergers & acquisitions, joint ventures, divestitures and common equity underwriting.

H1 2012 compared with H1 2011

- US Retail & Commercial posted an operating profit of £331 million (\$523 million), up £94 million (\$140 million), or 40%, from H1 2011. Excluding the £88 million (\$138 million) litigation settlement in Q1 2012 and the £39 million (\$62 million) net gain on the sale of Visa B shares in Q2 2012, operating profit was up £143 million (\$216 million), or 60%, largely reflecting lower impairment losses due to an improved credit environment.
- Net interest income was up £66 million (\$66 million), or 7%, driven by commercial loan growth, deposit pricing discipline and lower funding costs, partially offset by consumer loan run-off and lower asset yields.
- Non-interest income was up £29 million (\$26 million), or 5%, reflecting the £47 million (\$75 million) gain on Visa B shares and strong mortgage banking fees, significantly offset by lower security gains and a decline in debit card fees as a result of the Durbin Amendment legislation.
- Citizens completed the sale of Visa B shares in June 2012 resulting in a net gain of £39 million (\$62 million) consisting of a £47 million (\$75 million) gain on sale and a £8 million (\$13 million) litigation reserve associated with two outstanding lawsuits against Visa (and all Visa Class B owners).
- The Durbin Amendment in the Dodd-Frank Act became effective 1 October 2011 and lowers the allowable interchange on debit transactions by approximately 50% to \$0.23 - \$0.24 per transaction.
- Total expenses were up £130 million (\$163 million), or 12%, as Q1 2012 included a £88 million (\$138 million) litigation settlement in a class action lawsuit relating to how overdraft fees were assessed on customer accounts prior to 2010. Citizens was one of more than 30 banks included in these class action lawsuits.

Excluding the litigation settlement and the £8 million (\$13 million) litigation reserve related to the sale of Visa B shares, total expenses were up £34 million (\$12 million), largely reflecting a change in accrual methodology related to the annual incentive plan during H1 2011. This was partially offset by lower loan collection costs and the elimination of the Everyday Points rewards programme for consumer debit card customers.

•

US Retail & Commercial (US Dollar) (continued)

Key points (continued)

H1 2012 compared with H1 2011 (continued)

- Impairment losses declined by £129 million (\$211 million), reflecting an improved credit environment as well as lower impairments related to securities.
- Customer deposits were up 4% with strong growth achieved in checking balances. Consumer checking balances grew by 3% while small business checking balances grew by 8% over the year.

Q2 2012 compared with Q1 2012

- Operating profit of £229 million (\$363 million), compared with £102 million (\$160 million) in the prior quarter, an increase of £127 million (\$203 million). Excluding the Q1 2012 litigation settlement and the Q2 2012 net gain on the sale of Visa B shares, operating profit was broadly in line with Q1 2012.
- Net interest income was in line with the prior quarter. Asset growth offset a decrease in net interest margin of 4 basis points to 3.02% reflecting lower asset yields, partially offset by lower funding costs.
- Loans and advances were up £1.3 billion (\$0.5 billion), or 3%, due to strong growth in commercial loan volumes partially offset by continued run-off of consumer loan balances reflecting reduced credit demand and the unwillingness to hold long term fixed rate products.
- Non-interest income was up £63 million (\$102 million), or 24%, reflecting a £47 million (\$75 million) gain on the sale of Visa B shares and securities gains of £16 million (\$26 million).
- Excluding the £88 million (\$138 million) litigation settlement and the £8 million (\$13 million) litigation reserve associated with the sale of Visa B shares, total expenses were up £3 million (\$11 million), or 1%, largely reflecting a mortgage servicing rights impairment.
- Impairment losses were up £9 million (\$12 million), although the credit environment remains broadly stable.

Q2 2012 compared with Q2 2011

- Excluding the £39 million (\$62 million) net gain on the sale of Visa B shares in Q2 2012, operating profit increased to £190 million (\$301 million) from £143 million (\$233 million), an increase of £47 million (\$68 million), or 33%, substantially driven by lower impairment losses.
- Total expenses were broadly in line with Q2 2011. Excluding the £8 million (\$13 million) litigation reserve related to the sale of Visa B shares, total expenses

increased by £9 million. In US dollar terms expenses fell \$10 million primarily reflecting lower loan collection costs and the elimination of the Everyday Points rewards programme for consumer debit card customers.

Markets (continued)

Key points

In both H1 2011 and H1 2012, Markets benefited from an initial surge in investor confidence, with H1 2012 helped by the increased liquidity provided in Q1 2012 by the ECB's Long Term Refinancing Operation (LTRO). In both periods, however, confidence fell away quickly, with the decline in H1 2012 being precipitated by heightened instability in peripheral European financial markets.

Trading conditions during Q2 2012 have been challenging, driven by renewed uncertainty in the Eurozone and slowing Chinese growth. Investor confidence and appetite for risk have declined, causing client volumes to weaken. This mirrors the conditions seen at the end of 2011 but contrasts with Q1 2012.

The difficult environment reinforces Markets' decision to restructure, announced in January of this year. The sale of the cash equities business in the Asia Pacific region has been announced and the remainder of cash equities is being efficiently wound down. Within the ongoing businesses the new structure has been largely cascaded through the front office - the division's focus remains the provision of a seamless service to clients within the context of the strategy to reduce the balance sheet.

H1 2012 compared with H1 2011

• Operating profit of the ongoing businesses fell 17% as revenue generation weakened across a range of products.

Currencies suffered from historically low levels of client activity. Asset backed products were less affected by the loss of confidence in markets, though the Q1 2012 recovery in demand was weaker than in Q1 2011, leading to an overall decrease in revenue in H1 2012 compared with H1 2011.

Credit and loan markets suffered from low origination activity as both issuers and investors lacked confidence and opportunity in difficult markets.

Investor products and equity derivatives fell 46%, as issuer and redemption volumes remained weak.

- Revenue in rates was 17% higher. However, the increase was partially driven by an improvement in counterparty exposure management, a c.£90 million gain in H1 2012 compared with a c.£40 million loss in H1 2011, despite high volatility in counterparty spreads and real rates.
- The overall decline in expenses was driven by a focus on cost discipline (including a reduction in headcount within the ongoing businesses), the wind-down of the run-off businesses and a lower level of variable compensation. The compensation ratio in the ongoing businesses declined to 33%, compared with 35% in H1 2011.

Q2 2012 compared with Q1 2012

- Markets' profitability was constrained by the difficult trading conditions during Q2 2012, despite a decrease in costs.
- Rates fell from a strong Q1 2012 as a heightened level of risk aversion limited trading opportunities. In the swaps market, underlying rates flattened and asset spreads widened.

In currencies, client volume remained subdued. Earnings were affected by the uncertainty in the Eurozone and slowing Chinese growth, with the generally risk-averse market sentiment negatively affecting emerging markets in particular, as investors sought safe havens.

•

Markets (continued)

Key points

Q2 2012 compared with Q1 2012 (continued)

- Asset backed products continued to perform strongly, benefiting from both strong client volumes and a robust trading performance, although markets were less buoyant than during Q1 2012. Asset prices remained firm, despite an increase in supply through a series of auctions by the New York Federal Reserve.
- The credit market recovery in Q1 2012 was short lived. Conditions began to deteriorate in March and this continued into Q2 2012, exacerbating the traditionally slow April and limiting recovery thereafter. Although the UK corporate debt capital market business maintained its market-leading position, opportunities for origination activity were limited. Flow credit trading remained robust, although weaker than a strong Q1 2012.
- Demand for investor products and equity derivatives remained weak. Client volumes remained well below 2011 levels amid unsettled equity markets, with UK volumes also affected by the impact of the Retail Distribution Review.
- Total expenses fell by 12%. Cost discipline remained a central focus for the division, with further reductions compared with Q1 2012 reflecting the wind-down of run-off businesses and a reduction in variable compensation, reflecting lower revenue. Other costs increased as a result of additional legal expenses in the quarter.
- Impairments in both Q1 2012 and Q2 2012 reflected a small number of individual provisions.
- Third party assets were flat and remain on track to meet previously disclosed targets.
- · Risk-weighted assets fell, reflecting a continued focus on mitigation actions.
- Return on equity for the ongoing businesses was 6.8% compared with 21.1% in Q1 2012.

Q2 2012 compared with Q2 2011

Operating profit of the ongoing businesses fell 18%, driven by lower revenue, partly offset by lower costs.

The increase in rates revenue reflected a positive contribution from counterparty exposure management, with a c.£70 million gain in Q2 2012 compared with a c.£30 million loss in Q2 2011, despite volatility in counterparty spreads and interest rates in the period.

Flow currencies revenues held up well despite lower client volumes, but the currency options business had poor trading results.

Investor products and equity derivatives fell sharply compared with the same period last year. Client activity declined significantly year on year.

- Cost reduction measures introduced during 2011 have driven down discretionary expenditure. Staff costs have been reduced through headcount reductions in the ongoing businesses and the wind-down of the run-off businesses. Other costs in Q2 2012 were higher due to additional legal expenses.
- A regulatory-led increase in risk-weighted assets in 2012 has been managed down through a range of mitigating actions, leading to a 10% reduction compared with 31 December 2011.

Notes:

- (1) 'Other' predominantly consists of the personal lines broker business and from Q1 2012 business previously reported in Non-Core.
- (2) Total in-force policies include travel and creditor policies sold through RBS Group. These comprise travel policies included in bank accounts e.g. Royalties Gold Account, and creditor policies sold with bank products including mortgage, loan and card payment protection.
- (3) Return on tangible equity is based on annualised operating profit after tax divided by average tangible equity adjusted for dividend payments.
- (4) Loss ratio is based on net claims divided by net premium income.
- (5) Commission ratio is based on fees and commissions divided by net premium income.
- (6) Expense ratio is based on expenses divided by net premium income.
- (7) Combined operating ratio is the sum of the loss, commission and expense ratios.
- (8) Consists of general and life insurance liabilities, unearned premium reserve and liability adequacy reserve. Q1 2012 includes business previously reported in Non-Core.

Key points

Direct Line Group continues to make good progress with improved loss ratios and stabilisation of in-force policies demonstrating that the transformation plan is effective.

Operating profit for H1 2012 of £219 million was 6% higher than H1 2011. Operating profit of £135 million for Q2 2012 was 61% higher than Q1 2012 but in line with Q2 2011. Q2 2012 included Home weather claims of approximately £40 million worse than expected for a summer quarter following the wettest April to June period since UK meteorological records began. This was more than offset by significant releases from reserves held against prior year claims across the portfolio. Reserve releases were in part attributable to benefits arising from Direct Line Group's claims transformation programme reflecting significant investment since 2010.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form 6-K

In 2012, Direct Line Group has made significant progress in developing its distribution capabilities. It has renewed or expanded partnership agreements that represent a substantial portion of its portfolio, especially in its home segment. The agreement with Sainsbury's to provide motor insurance to its customers is now in its second year and was recently extended to provide home insurance. Furthermore, Direct Line Group is in the process of agreeing terms with the UK Retail division for an arm's length, five year distribution agreement for the continued provision of general insurance products after the divestment.

Following launch on comparethemarket.com, Churchill and Privilege motor insurance products are now available on all four major price comparison websites in the UK. This move reinforces Direct Line Group's multi-channel distribution strategy.

Direct Line Group (continued)

Key points (continued)

Execution of Direct Line Group's clear strategic plan continues with further developments in its pricing capability, embedding peril level technical pricing models for Home and developing price optimisation for Motor. Within claims management, and following rigorous pilot testing, a number of claims initiatives were implemented and the benefits are beginning to emerge. Claims inflation in small bodily injury claims has reduced and together with lower litigation rates has contributed to higher reserve releases from estimates for prior year claims.

In-force policies of 20.1 million were up 2% in the quarter and 4% since the start of the year. The main growth was in Rescue and other personal lines due to an increase in travel policies from packaged bank accounts. Within Motor, in-force policies were stable marking a stabilisation in the portfolio following a period of de-risking and business exits during the period 2009 to 2011. The Motor market remained competitive with prices broadly stable in H1 2012.

Commercial income was slightly higher than the equivalent period for 2011. In-force policies continued to increase due to growth in Direct Line for Business.

International consolidated its position during the first half of 2012, although reported gross written premium was adversely affected by foreign exchange rates. This followed a period of strong growth in 2010 and 2011. Operating profit in the quarter improved, partially as a result of releases in prior year claims reserves. International continues to benefit from its multi-channel distribution model including partnerships.

In line with its strategic business transformation plan, Direct Line Group has identified further initiatives to realise $\pounds 100$ million of gross annual cost and claims savings by the end of 2014(1), with one-off restructuring costs, for all cost saving initiatives, expected to be c. $\pounds 100$ million. The initiatives include reducing administration costs in central functions and improving marketing efficiency.

Direct Line Group supports the current regulatory reviews and initiatives announced by the UK Government, the Ministry of Justice, the Office of Fair Trading and others in relation to the motor insurance industry. It is actively engaged with the major stakeholders, and supports the introduction of a coherent set of reforms.

Direct Line Group also made further progress in optimising its capital structure during the first six months of 2012. On 27 April 2012, £500 million of Tier 2 subordinated debt was raised following publication of inaugural credit ratings from both Standard and Poor's and Moody's Investor Services. In addition, a £500 million dividend was paid to RBS Group on 6 June 2012, a total of £800 million for H1 2012. At 30 June 2012, shareholders' equity was £2.9 billion, with tangible shareholders' equity of £2.6 billion.

Direct Line Group continues to be well capitalised, with an estimated Insurance Group's Directive (IGD) coverage ratio of 299%.

Investment markets remained challenging with continued low yields. Direct Line Group continues to manage its investment portfolios carefully, with portfolios composed primarily of cash, investment grade corporate bonds and gilts. At 30 June 2012, exposure to peripheral Eurozone debt was £51 million, less than 1% of the portfolio, comprising non-sovereign debt issued in Ireland, Italy and Spain. During the quarter Direct Line Group invested c.£400 million in US dollar corporate credit, hedged back to Sterling, through leading global third party asset managers.

Cost savings expected to be recognised in operating expenses and claims handling expenses.

Direct Line Group (continued)

Key points (continued)

Separation update

From 1 July 2012, Direct Line Group is operating on a substantially standalone basis with independent corporate functions and governance following successful execution of a comprehensive programme of initiatives. During H1 2012, these included: launching a new corporate identity, confirming further senior management appointments, appointing a chairman, agreeing and issuing new terms and conditions for staff, implementing independent HR systems and making progress on an arm's length transitional services agreement with RBS Group for residual services.

Overall, Direct Line Group continues to deliver on the transformation required to fulfil its aim to be Britain's best retail general insurer.

H1 2012 compared with H1 2011

- Operating profit of £219 million was £13 million, 6% higher than H1 2011 despite the impact of Home weather claims of c.£50 million more than expected, versus benign conditions in H1 2011. The result reflected stable underlying business performance in a competitive market.
- Gross written premium of £2,042 million was broadly flat compared with H1 2011 in a competitive market.
- Total income decreased by £216 million, predominantly driven by lower earned premiums following planned volume reduction on Motor and the exit of the personal lines Broker business. H1 2012 included commissions payable relating to business previously reported within Non-Core. Other income decreased by £32 million due to the loss of Tesco Personal Finance tariff income and reduced supply chain income, linked to lower claims volumes.
- Net claims of £1,225 million were £263 million, 18%, lower than the same period last year driven by a combination of reduced exposure, exit of the personal line Broker business, tight underwriting discipline and prior year reserve releases partly attributable to the claims transformation programme. This was partly offset by adverse weather experienced in H1 2012.
- Direct expenses increased by £20 million, mainly driven by the phasing of marketing expenditure in Q1 2012, and increased head office expenses as Direct Line Group prepares for separation from RBS Group.
- Investment income was up £30 million, 23%, due to the inclusion of income from investments from business previously reported in Non-Core, together with investment gains arising from portfolio management initiatives, partially offset by lower yields and interest on the recent Tier 2 debt issued.
- Total in-force policies remained relatively stable despite a competitive market. The decline in Motor was mainly due to termination of previous partnership arrangements and the exit of unprofitable business, partially offset by the

commencement of the Sainsbury's partnership. The decline was largely offset by growth in International and Personal Lines Rescue and other.

Direct Line Group (continued)

Key points (continued)

Q2 2012 compared with Q1 2012

- Operating profit of £135 million was £51 million, 61% higher, reflecting lower expenses, and the benefit of releases of reserves from prior years across most products. This was partially offset by lower investment income.
- Gross written premium of £996 million was £50 million, 5% lower primarily due to seasonality on the International book where a significant proportion of the business is written on 1 January each year.
- Total income of £934 million was £32 million, 3%, lower, primarily driven by reduced earned premium on International and higher commissions payable on business previously reported within Non-Core.
- Net claims fell by £73 million, 11%, to £576 million, largely reflecting reserve releases from prior years.
- Total direct expenses of £162 million were £8 million, 5%, lower, predominantly due to higher marketing expenditure in Q1 2012.
- Investment income of £73 million declined by £17 million, 19%, mainly as a result of lower yields combined with interest on the Tier 2 debt issued in April 2012.

Q2 2012 compared with Q2 2011

- Operating profit of £135 million was £4 million, 3%, lower compared with Q2 2011 as Q2 2012 included claims for adverse weather of £40 million more than expected.
- Gross written premium declined by £38 million, 4%, due to the impact of de-risking in Motor during 2011 and competitive market conditions.
- Total income decreased by £112 million, 11%, to £934 million, as a result of lower earned premiums following a managed reduction in volumes on Motor and run-off of personal lines Broker, together with higher commissions payable relating to business previously reported within Non-Core.
- Net claims fell £128 million, 18%, as a result of reduced exposure, particularly on Motor, together with prior year reserve releases. Home was affected by adverse weather experienced in the quarter compared with benign conditions experienced during Q2 2011.
- Total direct expenses increased by £13 million, 9%, as a result of increased head office expenses in preparation for separation from RBS Group.
- Investment income increased by £4 million, 6%, as a result of investment gains arising from portfolio management initiatives, including those relating to the

business previously reported in Non-Core. These gains were largely offset by lower investment yields in 2012 and interest associated with the Tier 2 debt issued in April 2012.

Central items

	Half year ended		Quarter ended			
	30 June 30 June		30 June 31 March		30 June	
	2012	2011	2012	2012	2011	
	£m	£m	£m	£m	£m	
Central items not allocated	(176)	24	(32)	(144)	56	

Note:

(1) Costs/charges are denoted by brackets.

Funding and operating costs have been allocated to operating divisions based on direct service usage, the requirement for market funding and other appropriate drivers where services span more than one division.

Residual unallocated items relate to volatile corporate items that do not naturally reside within a division.

Key points

H1 2012 compared with H1 2011

- Central items not allocated represented a debit of £176 million, a deterioration of £200 million compared with H1 2011.
- The movement was driven in part by a £125 million provision, taken in Q2 2012, for costs relating to the technology incident that affected the Group's systems in June 2012. The provision is principally to cover customer redress. A break down of the provision by division is provided on the next page.
- A provision of £50 million has also been recognised for redress in respect of interest rate hedging products. This follows the agreement reached with the FSA in June 2012 by a number of banks, including the Group, to carry out a review of sales of interest rate hedging products since 1 December 2001 to small and medium sized customers.

Q2 2012 compared with Q1 2012

- Central items not allocated represented a debit of £32 million, an improvement of £112 million compared with Q1 2012.
- The movement was due to increased available-for-sale bond disposals and unallocated volatility costs in Group Treasury, partially offset by the £125 million provision for the costs of redress following the technology incident.

Q2 2012 compared with Q2 2011

- Central items not allocated represented a debit of £32 million, a deterioration of £88 million compared with Q2 2011.
- The movement was driven primarily by the £125 million provision for the technology incident in Q2 2012, and the provision for redress partially offset by

unallocated volatility costs in Group Treasury.

Central items (continued)

Technology incident - costs of redress

The following table provides an analysis by division of the estimated costs of redress following the technology incident in June 2012. These costs are included in Central items above and include waiver of interest and other charges together with other compensation payments all of which are reported in expenses. Additional costs may arise once all redress and business disruption items are clear and a further update will be given in Q3.

Non-Core (continued)

Key points

Non-Core continues to make significant progress towards exiting approximately 85% of the portfolio by the end of 2013. In Q2 2012 third party assets fell to \pounds 72 billion, a reduction of \pounds 11 billion during the quarter and an overall reduction to date of 72%. The successful completion of the disposal of the RBS Aviation Capital business contributed c \pounds 5 billion of the Q2 2012 reduction and c \pounds 2 billion of the risk-weighted asset reduction.

Risk-weighted assets were reduced by £7 billion during Q2 2012 as the division continued to focus on run-off, disposals and reducing exposure to capital intensive positions.

H1 2012 compared with H1 2011

- Third party assets of £72 billion were £41 billion lower than H1 2011 reflecting disposals of £22 billion and run-off of £17 billion.
- Risk-weighted assets decreased by £42 billion principally reflecting the restructuring on monoline exposures in 2011, totalling £17 billion, and associated market risk reductions of £7 billion. Sales and run-off reduced risk-weighted assets by a further £16 billion.
- Non-Core operating loss decreased from £1,961 million in H1 2011 to £1,351 million in H1 2012. Lower impairments and costs were partially offset by a fall in income.
- Impairments in H1 2012 of £1,096 million were £1,390 million favourable to H1 2011, reflecting substantial provisioning in respect of development land values in the Ulster Bank portfolio during the first half of 2011.
- Costs fell by £133 million as the division continued to contract and headcount reduced. At the end of H1 2012, headcount totalled approximately 3,800, a decrease of 40% since June 2011.
- Income declined by £1,131 million with continued run-down of the balance sheet reducing income streams by £654 million. H1 2011 included gains on a number of securities arising from restructured assets totalling approximately £500 million, not repeated in H1 2012.

Q2 2012 compared with Q1 2012

- An operating loss of £868 million in Q2 2012 was £385 million higher than the previous quarter.
- Trading losses in Q2 2012 were £137 million favourable to Q1 2012 as significant losses on disposal of trading positions in the first quarter were not repeated. This was partially offset by higher dealing losses as market conditions deteriorated.
- Other income decreased by £341 million in Q2 2012 due to negative equity valuation movements of £147 million as well as losses on disposal of £39 million

compared with gains of £182 million in Q1 2012.

Impairment losses increased by $\pounds 118$ million during Q2 2012 largely reflecting one significant provision within the Project Finance portfolio.

•

Non-Core (continued)

Key points (continued)

Q2 2012 compared with Q1 2012 (continued)

- Third party assets fell by £11 billion to £72 billion in Q2 2012 reflecting disposals of £7 billion and run-off of £4 billion.
- Risk-weighted assets decreased by £7 billion resulting from sales and run-off of £6 billion, market risk movements of £2 billion and the £2 billion impact of derivative restructuring. These reductions were partially offset by adverse foreign exchange and mark-to-market movements of £2 billion and credit model changes.

Q2 2012 compared with Q2 2011

- The Q2 2012 operating loss of £868 million was broadly flat. Impairment losses fell significantly compared with Q2 2011, driven by a £789 million decrease in charges in relation to the Ulster Bank portfolio. Costs were £73 million lower as the division continued to run down and headcount reduces.
- Income declined by £965 million as continuing run-off and disposal activity reduced revenue streams by £355 million. Trading revenues and other income in Q2 2011 included gains on a number of securities arising from restructured assets, totalling approximately £500 million.

	(1,399)	(471)	154	(1,553)	650

Key points

• The movement in available-for-sale financial assets reflects net unrealised gains on high quality sovereign bonds.

• Cash flow hedging gains largely result from reductions in swap rates with significant movements during the second quarter of 2012.

• Currency translation losses during the half year largely result from the strengthening of Sterling against both the Euro, by 3.5%, and the US Dollar, by 1.4%. Movements in Q2 2012 reflect the weakening of Sterling against the US Dollar by 1.9%, partially offset by a 3.2% strengthening of Sterling against the Euro.

Commentary on condensed consolidated balance sheet

30 June 2012 compared with 31 December 2011

Key points

- Total assets of £1,415.2 billion at 30 June 2012 were down £91.7 billion, 6%, compared with 31 December 2011. This was principally driven by the Group's programme of deleveraging and reducing capital intensive assets, including Non-Core disposals and run-off, and the reduction in the mark-to-market value of derivatives.
- Loans and advances to banks decreased by £6.2 billion, 7%, to £77.1 billion. Excluding reverse repurchase agreements and stock borrowing ('reverse repos'), down £1.8 billion, 4%, to £37.7 billion, bank placings declined £4.4 billion, 10%, to £39.4 billion.
- Loans and advances to customers declined £20.4 billion, 4%, to £495.2 billion. Within this, reverse repurchase agreements were down £1.3 billion, 2%, to £60.2 billion. Customer lending decreased by £19.1 billion, 4%, to £435.0 billion, or £18.7 billion to £455.1 billion before impairments. This reflected planned reductions in Non-Core of £10.6 billion, along with declines in International Banking, £6.8 billion, Markets, £0.6 billion, UK Corporate, £0.5 billion and Ulster Bank, £0.2 billion, together with the effect of exchange rate and other movements, £3.6 billion. These were partially offset by growth in UK Retail, £2.2 billion, US Retail & Commercial, £1.3 billion and Wealth, £0.1 billion.
- Debt securities were down £21.5 billion, 10%, to £187.6 billion, driven mainly by a reduction in Eurozone government and financial institution bonds within Markets and Group Treasury.
- Settlement balance assets and liabilities increased £7.5 billion to £15.3 billion and £7.6 billion to £15.1 billion respectively as a result of increased customer activity from seasonal year-end lows.
- Movements in the value of derivative assets, down £43.2 billion, 8%, to £486.4 billion, and liabilities, down £43.2 billion, 8%, to £480.7 billion, primarily reflect decreases in interest rate and credit derivative contracts, together with the effect of currency movements, with Sterling strengthening against both the US dollar and the Euro.
- The reduction in assets and liabilities of disposal groups, down £4.4 billion, 17%, to £21.1 billion, and £0.9 billion, 4%, to £23.1 billion respectively, primarily reflects the disposal of RBS Aviation Capital in the second quarter.
- Deposits by banks decreased £2.1 billion, 2%, to £106.7 billion, with a reduction in repurchase agreements and stock lending ('repos'), down £0.6 billion, 1%, to £39.1 billion and a decrease in inter-bank deposits, down £1.5 billion, 2%, to £67.6 billion.
- Customer accounts decreased £1.2 billion to £501.7 billion. Within this, repos were broadly flat at £88.9 billion. Excluding repos, customer deposits were down £1.4 billion at £412.8 billion, reflecting decreases in International Banking, £2.2 billion, Markets, £1.9 billion, Non-Core, £0.7 billion and Ulster Bank, £0.6 billion, together with exchange and other movements, £2.2 billion. This was partially offset by increases in UK Retail, £4.8 billion, UK Corporate, £1.1 billion and Wealth, £0.3 billion.

Commentary on condensed consolidated balance sheet (continued)

- Debt securities in issue decreased £42.8 billion, 26%, to £119.9 billion reflecting the maturity of the remaining notes issued under the UK Government's Credit Guarantee Scheme, £21.3 billion, and the reduction of commercial paper and medium term notes in issue in line with the Group's strategy.
- Subordinated liabilities decreased by £0.7 billion, 3%, to £25.6 billion, primarily reflecting the net decrease in dated loan capital as a result of the liability management exercise completed in March 2012, with redemptions of £3.4 billion offset by the issuance of £2.8 billion new loan capital, together with exchange rate movements and other adjustments of £0.1 billion.
 - Owners' equity decreased by £0.8 billion, 1%, to £74.0 billion, due to the £1.9 billion attributable loss for the period together with movements in foreign exchange reserves, £0.5 billion and other reserve movements of £0.1 billion. Partially offsetting these reductions were positive movements in available-for-sale reserves, £0.5 billion and cash flow hedging reserves, £0.5 billion and share capital and reserve movements in respect of employee benefits, £0.7 billion.

Notes

1. Basis of preparation

The Group's condensed financial statements have been prepared in accordance with the Disclosure Rules and Transparency Rules of the Financial Services Authority and IAS 34 'Interim Financial Reporting'. They should be read in conjunction with the Group's 2011 annual accounts which were prepared in accordance with International Financial Reporting Standards issued by the IASB and interpretations issued by the IFRS Interpretations Committee of the IASB as adopted by the EU (together IFRS). The EU has not adopted the complete text of IAS 39 'Financial Instruments: Recognition and Measurement'; it has relaxed some of the standard's hedging requirements. The Group has not taken advantage of this relaxation and has adopted IAS 39 as issued by the IASB; the Group's financial statements are prepared in accordance with IFRS as issued by the IASB.

The condensed financial statements comprise the consolidated income statement, condensed consolidated statement of comprehensive income, condensed consolidated balance sheet, condensed consolidated statement of changes in equity, condensed consolidated cash flow statement and related explanatory notes 1 to 19 and have been prepared in accordance with IAS 34 'Interim Financial Reporting'.

In line with the Group's policy of providing users of its financial reports with relevant and transparent disclosures, it has adopted the British Bankers' Association Code for Financial Reporting Disclosure published in September 2010. The code sets out five disclosure principles together with supporting guidance: the overarching principle being a commitment to provide high quality, meaningful and decision-useful disclosures. The Group's 2012 interim financial statements have been prepared in compliance with the code.

The Group's business activities and financial position, and the factors likely to affect its future development and performance are discussed on pages 6 to 130. Its objectives and policies in managing the financial risks to which it is exposed and its capital are discussed in the risk and balance sheet management sections on pages 131 to 238. A summary of the risk factors which could materially affect the Group's future results are described on pages 239 and 240. The Group's regulatory capital resources are set on page 135 and 136. The Group's liquidity and funding management is described on pages 139 to 150. Having reviewed the Group's forecasts, projections and other relevant evidence, the directors have a reasonable expectation that the Group will continue in operational existence for the foreseeable future. Accordingly, the interim financial statements for the six months ended 30 June 2012 have been prepared on a going concern basis.

2. Accounting policies

There have been no significant changes to the Group's principal accounting policies as set out on pages 273 to 282 of the Group's Annual Report on Form 20-F for the year ended December 2011 (2011 Form 20-F).

Critical accounting policies and key sources of estimation uncertainty

The reported results of the Group are sensitive to the accounting policies, assumptions and estimates that underlie the preparation of its financial statements. The judgements and assumptions that are considered to be the most important to the portrayal of Group's financial condition are those relating to loan impairment provisions; pensions; financial instrument fair values; general insurance claims and deferred tax. These critical accounting policies and judgments are described on pages 282 to 284 of the Group's 2011 Form 20-F.

Recent developments in IFRS

In May 2012, the IASB issued Annual Improvements 2009-2011 Cycle which clarified:

- the requirements for comparative information in IAS 1 Presentation of Financial Statements and IAS 34 Interim Financial Reporting;
- the classification of servicing equipment in IAS 16 Property, Plant and Equipment;
- the accounting for the tax effect of distributions to holders of equity instruments in IAS 32 Financial Instruments: Presentation; and
- \cdot the requirement to disclose segmental net assets in IAS 34.

None of the amendments are effective before 1 January 2013. Earlier application is permitted. The Group is reviewing the amendments to determine their effect, if any, on the Group's financial reporting.

Payment Protection Insurance (PPI)

To reflect current experience of PPI complaints received, the Group strengthened its provision for PPI by £125 million in Q1 2012 and a further £135 million in Q2 2012, bringing the cumulative charge taken to £1.3 billion, of which £0.7 billion in redress had been paid by 30 June 2012. The eventual cost is dependent upon complaint volumes, uphold rates and average redress costs. Assumptions relating to these are inherently uncertain and the ultimate financial impact may be different than the amount provided. The Group will continue to monitor the position closely and refresh its assumptions as more information becomes available.

4. Loan impairment provisions

Operating loss is stated after charging loan impairment losses of £2,730 million (H1 2011 - £4,135 million). The balance sheet loan impairment provisions increased in the half year ended 30 June 2012 from £19,883 million to £20,297 million and the movements thereon were:

Provisions at 30 June 2012 include £119 million in respect of loans and advances to banks (31 March 2012 - £135 million; 30 June 2011 - £132 million).

5. Pensions

Pension costs for the half year ended 30 June 2012 amounted to £267 million (half year ended 30 June 2011 - £245 million; quarter ended 30 June 2012 - £132 million; quarter ended 31 March 2012 - £135 million; quarter ended 30 June 2011 - £108 million). Defined benefit schemes charges are based on the actuarially determined pension cost rates at 31 December 2011.

The most recent funding valuation of the main UK scheme, as at 31 March 2010, showed the value of liabilities exceeded the value of assets by £3.5 billion, a ratio of assets to liabilities of 84%. In order to eliminate this deficit, the Group has agreed to pay additional contributions each year over the period 2011 to 2018. These contributions started at £375 million in September 2011 and in March 2012, increasing to £400 million per annum in 2013 and from 2016 onwards will be further increased in line with price inflation. These contributions are in addition to the regular annual contributions of around £300 million for future accrual benefits.

6. Tax

The actual tax charge differs from the expected tax credit computed by applying the standard UK corporation tax rate of 24.5% (2011 - 26.5%).

6. Tax (continued)

The high tax charge for the half year ended 30 June 2012 reflects profits in high tax regimes (principally US) and losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland and the Netherlands) and the derecognition of deferred tax assets in respect of losses in Australia, following the strategic changes to the Markets and International Banking businesses announced in January 2012.

The combined effect of tax losses in Ireland and the Netherlands in the half year ended 30 June 2012 for which no deferred tax asset has been recognised and the derecognition of the deferred tax asset in respect of losses in Australia account for \pounds 502 million (63%) of the difference between the actual tax charge and the tax credit derived from applying the standard UK Corporation Tax rate to the results for the period.

The Group has recognised a deferred tax asset at 30 June 2012 of £3,502 million (31 March 2012 - £3,849 million; 31 December 2011 - £3,878 million) of which £3,029 million (31 March 2012 - £3,134 million; 31 December 2011 - £2,933 million) relates to carried forward trading losses in the UK. Under UK tax legislation, these UK losses can be carried forward indefinitely to be utilised against profits arising in the future. The Group has considered the carrying value of this asset as at 30 June 2012 and concluded that it is recoverable based on future profit projections.

7. (Loss)/profit attributable to non-controlling interests

Other	12	(2)	7	5	-
(Loss)/profit attributable to non-controlling					
interests	(19)	17	(5)	(14)	18

8. Dividends

On 26 November 2009, RBS entered into a State Aid Commitment Deed with HM Treasury containing commitments and undertakings that were designed to ensure that HM Treasury was able to comply with the commitments to be given by it to the European Commission for the purposes of obtaining approval for the State aid provided to RBS. As part of these commitments and undertakings, RBS agreed not to pay discretionary coupons and dividends on its existing hybrid capital instruments for a period of two years. This period commenced on 30 April 2010 for RBS Group instruments (the two year deferral period for RBS Holdings N.V. instruments commenced on 1 April 2011). On 30 April 2012 this period ended for RBS Group instruments.

On 4 May 2012, RBS determined that it was in a position to recommence payments on RBS Group instruments. The Core Tier 1 capital impact of discretionary amounts that will be payable over the remainder of 2012 on RBSG instruments on which payments have previously been stopped is c.£340 million. In the context of recent macro-prudential policy discussions, the Board of RBS decided to neutralise any impact on Core Tier 1 capital through equity issuance. Approximately 65% of this is ascribed to equity funding of employee incentive awards through the sale of surplus shares held by the Group's Employee Benefit Trust, which is now complete. The remaining 35% will be raised through the issue of new ordinary shares, which is expected to take place during the remainder of 2012.

In May 2012, the Directors declared the discretionary dividends on certain non-cumulative dollar preference shares which were payable on 30 June 2012, and announced that the discretionary distributions on certain RBSG innovative securities which were payable in June 2012 would also be paid. Future coupons and dividends on RBSG hybrid capital instruments will only be paid subject to, and in accordance with, the terms of the relevant instruments.

9. Share consolidation

Following approval at the Group's Annual General Meeting on 30 May 2012, the sub-division and consolidation of the Group's ordinary shares on a one-for-ten basis took effect on 6 June 2012. There was a corresponding change in the Group's share price to reflect this.

The Board believes that the consolidation will result in a more appropriate share price for a company of the Group's size in the UK market. It may also help reduce volatility, thereby enabling a more consistent valuation of the Group.

10. Earnings per ordinary and B share

Earnings per ordinary and B share have been calculated based on the following:

	Half yea	r ended	Quarter ended			
	30 June 2012	30 June 2011	30 June 2012	31 March 2012	30 June 2011

Prior period data have been adjusted for the sub-division and one-for-ten consolidation of ordinary shares, which took effect in June 2012.

11. Segmental analysis

In January 2012, the Group announced the reorganisation of its wholesale businesses into 'Markets' and 'International Banking'. Divisional results have been presented based on the new organisational structure. The Group has also revised its allocation of funding and liquidity costs and capital for the new divisional structure as well as for a new methodology. In addition, the Group had previously included movements in the fair value of own derivative liabilities within the Markets operating segment. These movements have now been combined with movements in the fair value of own debt in a single measure, 'own credit adjustments' and presented as a reconciling item. Refer to 'presentation of information' on page 5 for further details. Comparatives have been restated accordingly.

Analysis of divisional operating profit/(loss)

The following tables provide an analysis of divisional operating profit/(loss) by main income statement captions.

	Net interest income	Non- interest income	Total income		net claims	Impairment losses	Operating profit/(loss)

13. Financial instruments

Classification

The following tables analyse the Group's financial assets and liabilities in accordance with the categories of financial instruments in IAS 39 with assets and liabilities outside the scope of IAS 39 shown separately. There have been no reclassifications during H1 2012.

					Other financial instruments (amortised	Finance	Non financial assets/	T. ()

13. Financial instruments (continued)

Valuation reserves

Credit valuation adjustments (CVA) represent an estimate of the adjustment to fair value that a market participant would make to incorporate the credit risk inherent in counterparty derivative exposures. Certain credit derivative product companies (CDPC) exposures were restructured during the first half of the year and the CVA methodology applied to these exposures was updated to reflect the revised risk mitigation strategy that is now in place. There were no changes to other valuation methodologies.

When valuing financial instruments in the trading book, adjustments are made to mid-market valuations to cover bid-offer spread, liquidity and credit risk.

The following table shows credit valuation adjustments and other reserves.

			31
	30 June	31 March	December
	2012	2012	2011
	£m	£m	£m
CVA			
- Monoline insurers	481	991	1,198
- Credit derivative product companies	479	624	1,034
- Other counterparties	2,334	2,014	2,254
	3,294	3,629	4,486
Bid-offer, liquidity and other reserves	2,207	2,228	2,704
Valuation reserves	5,501	5,857	7,190

Key points

30 June 2012 compared with 31 December 2011

- The gross exposure to monolines reduced in the first half of the year from £1.9 billion to £0.9 billion primarily due to trade restructurings and unwinds and an increase in underlying asset prices. The CVA decreased on a total basis reflecting the lower exposure, and also on a relative basis (from 63% to 51%) due to the impact of restructurings and unwinds as well as tighter credit spreads.
- The exposure to CDPCs decreased from £1.9 billion to £1.1 billion. This was primarily driven by tighter credit spreads of underlying reference instruments, together with the impact of restructuring certain exposures. The CVA decreased on an absolute basis in line with the decrease in exposure and also on a relative basis (from 55% to 42%) due to the restructuring of certain exposures.
- The CVA held against exposure to other counterparties increased primarily due to counterparty rating downgrades and increased weighted average life assumptions, partially offset by tighter credit spreads.
- Within other reserves, bid-offer reserves decreased due to risk reduction and the impact of Greek government debt restructuring. Other reserves were also lower across a range of businesses and products.

13. Financial instruments (continued)

Key points (continued)

30 June 2012 compared with 31 March 2012

- The gross exposure to monolines reduced from £1.6 billion to £0.9 billion primarily due to trade restructurings and unwinds. The CVA decreased on a total basis reflecting the lower exposure, and also on a relative basis (from 60% to 51%) due to the impact of trade restructurings and unwinds.
- The exposure to CDPCs was stable as the impact of restructuring certain exposures was offset by wider credit spreads. The CVA decreased on a total basis and also on a relative basis (from 56% to 42%) due to restructuring of certain exposures.
- Other counterparty CVA increased primarily due to counterparty rating downgrades, increased weighted average life assumptions and wider credit spreads.

Own credit

The following table shows the cumulative own credit adjustment recorded on securities classified as fair value through profit or loss and derivative liabilities. There have been some refinements to methodologies during the first half of the year, but they did not have a material overall impact on cumulative own credit adjustment.

	1						
	Debt securities in issue (2) 1			liabilities			Total
	HFT	DFV	Total	DFV	Total D	erivatives	(3)
Cumulative own credit adjustment (1)	£m	£m	£m	£m	£m	£m	£m
30 June 2012	(323)	1,040	717	572	1,289	452 1	,741
31 March 2012	91	1,207	1,298	520	1,818	466 2	2,284
31 December 2011	882	2,647	3,529	679	4,208	602 4	,810
Carrying values of underlying liabilities	£bn	£bn	£bn	£bn	£bn		
30 June 2012	10.8	30.3	41.1	0.9	42.0		
31 March 2012	10.7	33.3	44.0	1.0	45.0		
31 December 2011	11.5	35.7	47.2	0.9	48.1		

Notes:

- (1) The own credit fair value adjustment does not alter cash flows and is not used for performance management. It is disregarded for regulatory capital reporting purposes and will reverse over time as the liabilities mature.
- (2) Consists of wholesale and retail note issuances.
- (3) The reserve movement between periods will not equate to the reported profit or loss for own credit. The balance sheet reserves are stated by conversion of underlying currency balances at spot rates for each period, whereas the income statement includes intra-period foreign exchange sell-offs.

Key points

- The total own credit adjustment decreased significantly during the first half of the year reflecting tightening of credit spreads.
- Senior issued debt valuation adjustments are determined with reference to secondary debt issuance spreads. At 30 June 2012, the five year level tightened to 246 basis points from 451 basis points at the year end, reflecting

strengthened investor perceptions.

- Significant tightening of credit spreads, buy-backs exceeding issuances and the impact of buying back certain securities at lower spreads than at issuance, resulted in overall negative own credit adjustment in respect of HFT debt securities at 30 June 2012.
- Derivative liability own credit adjustment decreased as credit default swaps spreads tightened.

13. Financial instruments (continued)

Valuation hierarchy

The following tables show financial instruments carried at fair value on the Group's balance sheet by valuation hierarchy - level 1, level 2 and level 3.

A detailed explanation of the valuation techniques and sensitivity analysis methodology are set out in the Group's 2011 Form 20-F on pages 304 to 317.

Notes:

- (1) Sensitivity represents the favourable and unfavourable effect respectively on the income statement or the statement of comprehensive income due to reasonably possible changes to valuations using reasonably possible alternative inputs to the Group's valuation techniques or models. Level 3 sensitivities are calculated at a sub-portfolio level and hence these aggregated figures do not reflect the correlation between some of the sensitivities. In particular, for some of the portfolios, the sensitivities may be negatively correlated where a downward movement in one asset would produce an upward movement in another, but due to the additive presentation above, this correlation cannot be observed.
- (2) Asset Protection Scheme.

14. Available-for-sale reserve

	Half year	ended	Q		
	30 June	30 June	30 June	31 March	30 June
	2012	2011	2012	2012	2011
Available-for-sale reserve	£m	£m	£m	£m	£m
At beginning of period	(957)	(2,037)	(439)	(957)	(2,063)
Unrealised losses on Greek sovereign debt	-	(842)	-	-	(842)
Impairment of Greek sovereign debt	-	842	-	-	842
Other unrealised net gains	1,152	1,785	428	724	1,623
Realised net gains	(582)	(413)	(370)	(212)	(216)
Tax	(63)	(361)	(69)	6	(370)
At end of period	(450)	(1,026)	(450)	(439)	(1,026)

The H1 2012 movement in available-for-sale reserve primarily reflects unrealised net gains on securities of £1,158 million, largely as yields tightened on German, US and UK sovereign bonds.

In Q2 2011, as a result of the deterioration in Greece's fiscal position and the announcement of proposals to restructure Greek government debt, the Group concluded that the Greek sovereign debt was impaired. Accordingly, £733 million of unrealised losses recognised in available-for-sale reserves together with £109 million related interest rate hedge adjustments were recycled to the income statement. Further losses of £224 million were recorded in Q4 2011.

Ireland, Italy, Portugal and Spain are facing less acute fiscal difficulties and the Group's sovereign exposures to these countries were not considered impaired at 30 June 2012.

Additional contingent liabilities arise in the normal course of the Group's business. It is not anticipated that any material loss will arise from these transactions.

16. Litigation, investigations and reviews

The Group and certain Group members are party to legal proceedings, investigations and regulatory matters in the United Kingdom, the United States and other jurisdictions, arising out of their normal business operations. All such matters are periodically reassessed with the assistance of external professional advisers, where appropriate, to determine the likelihood of the Group incurring a liability. The Group recognises a provision for a liability in relation to these matters when it is probable that an outflow of economic benefits will be required to settle an obligation which has arisen as a result of past events, and for which a reliable estimate can be made of the amount of the obligation.

In many proceedings, it is not possible to determine whether any loss is probable or to estimate the amount of any loss. Numerous legal and factual issues may need to be resolved, including through potentially lengthy discovery and determination of important factual matters, and by addressing novel or unsettled legal questions relevant to the proceedings in question, before a liability can be reasonably estimated for any claim. The Group cannot predict if, how, or when such claims will be resolved or what the eventual settlement, fine, penalty or other relief, if any, may be, particularly for claims that are at an early stage in their development or where claimants seek substantial or indeterminate damages.

While the outcome of the legal proceedings, investigations and regulatory matters in which the Group is involved is inherently uncertain, management believes that, based on the information available to it, appropriate provisions have been made in respect of legal proceedings, investigations and regulatory matters as at 30 June 2012.

Other than as set out in the following sub-sections of this Note entitled 'Litigation' and 'Investigations and reviews', no member of the Group is or has been involved in any governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which the Group is aware) during the 12 months prior to the date of this document which may have, or have had in the recent past, significant effects on the financial position or profitability of the Group.

In each of the material legal proceedings, investigations and reviews described below, unless specifically noted otherwise, it is not possible to reliably estimate with any certainty the liability, if any, or the effect these proceedings, investigations and reviews, and any related developments, may have on the Group. However, in the event that any such matters were resolved against the Group, these matters could, individually or in the aggregate, have a material adverse effect on the Group's consolidated net assets, operating results or cash flows in any particular period.

Litigation

Set out below are descriptions of the material legal proceedings involving the Group.

Shareholder litigation

RBS and certain of its subsidiaries, together with certain current and former individual officers and directors have been named as defendants in purported class actions filed in the United States District Court for the Southern District of New York involving holders of RBS preferred shares (the Preferred Shares litigation) and holders of American Depositary Receipts (the ADR claims).

16. Litigation, investigations and reviews (continued)

In the Preferred Shares litigation, the consolidated amended complaint alleges certain false and misleading statements and omissions in public filings and other communications during the period 1 March 2007 to 19 January 2009, and variously asserts claims under Sections 11, 12 and 15 of the US Securities Act of 1933, as amended (Securities Act). The putative class is composed of all persons who purchased or otherwise acquired Group Series Q, R, S, T and/or U non-cumulative dollar preference shares issued pursuant or traceable to the 8 April 2005 US Securities and Exchange Commission (SEC) registration statement. Plaintiffs seek unquantified damages on behalf of the putative class. The defendants have moved to dismiss the complaint and briefing on the motions was completed in September 2011.

With respect to the ADR claims, a complaint was filed in January 2011 and a further complaint was filed in February 2011 asserting claims under Sections 10 and 20 of the US Securities Exchange Act of 1934, as amended (Exchange Act) on behalf of all persons who purchased or otherwise acquired the Group's American Depositary Receipts (ADRs) between 1 March 2007 and 19 January 2009. On 18 August 2011, these two ADR cases were consolidated and lead plaintiff and lead counsel were appointed. On 1 November 2011, the lead plaintiff filed a consolidated amended complaint asserting ADR-related claims under Sections 10 and 20 of the Exchange Act and Sections 11, 12 and 15 of the Securities Act. The defendants moved to dismiss the complaint in January 2012 and briefing on the motions was completed in April 2012. The Court heard oral argument on the motions on 19 July 2012.

The Group has also received notification of similar prospective claims in the United Kingdom and elsewhere but no court proceedings have been commenced in relation to these claims. The Group recently submitted a detailed response to a letter before action from one purported plaintiff group in the United Kingdom.

The Group considers that it has substantial and credible legal and factual defences to the remaining and prospective claims and will defend itself vigorously.

Other securitisation and securities related litigation in the United States

Recently, the level of litigation activity in the financial services industry focused on residential mortgage and credit crisis related matters has increased. As a result, the Group has become and expects that it may further be the subject of additional claims for damages and other relief regarding residential mortgages and related securities in the future.

Group companies have been named as defendants in their various roles as issuer, depositor and/or underwriter in a number of claims in the United States that relate to the securitisation and securities underwriting businesses. These cases include actions by individual purchasers of securities and purported class action suits. Together, the individual and class action cases involve the issuance of more than US\$85 billion of mortgage-backed securities (MBS) issued primarily from 2005 to 2007. Although the allegations vary by claim, in general, plaintiffs in these actions claim that certain disclosures made in connection with the relevant offerings contained materially false or misleading statements and/or omissions regarding the underwriting standards pursuant to which the mortgage loans underlying the securities were issued. Group companies have been named as defendants in more than 30 lawsuits brought by purchasers of MBS, including five purported class actions. Among the lawsuits are six cases filed on 2 September 2011 by the US Federal Housing Finance Agency (FHFA) as conservator for the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac).

16. Litigation, investigations and reviews (continued)

The primary FHFA lawsuit pending in the federal court in Connecticut relates to approximately US\$32 billion of MBS for which Group entities acted as sponsor/depositor and/or lead underwriter or co-lead underwriter.

FHFA has also filed five separate lawsuits (against Ally Financial Group, Countrywide Financial Corporation, JP Morgan, Morgan Stanley and Nomura respectively) in which RBS Securities Inc. is named as a defendant by virtue of the fact that it was an underwriter of some of the securities at issue.

Other lawsuits against Group companies include two cases filed by the National Credit Union Administration Board (on behalf of US Central Federal Credit Union and Western Corporate Federal Credit Union) and eight cases filed by the Federal Home Loan Banks of Boston, Chicago, Indianapolis, Seattle and San Francisco.

The purported MBS class actions in which Group companies are defendants include New Jersey Carpenters Vacation Fund et al. v. The Royal Bank of Scotland plc et al.; New Jersey Carpenters Health Fund v. Novastar Mortgage Inc. et al.; In re IndyMac Mortgage-Backed Securities Litigation; Genesee County Employees' Retirement System et al. v. Thornburg Mortgage Securities Trust 2006-3, et al.; and Luther v. Countrywide Financial Corp. et al. and related cases.

Certain other institutional investors have threatened to bring claims against the Group in connection with various mortgage-related offerings. The Group cannot predict with any certainty whether any of these individual investors will pursue these threatened claims (or their outcome), but expects that several may. If such claims are asserted and were successful, the amounts involved may be material. In many of these actions, the Group has or will have contractual claims to indemnification from the issuers of the securities (where a Group company is underwriter) and/or the underlying mortgage originator (where a Group company is issuer). The amount and extent of any recovery on an indemnification claim, however, is uncertain and subject to a number of factors, including the ongoing creditworthiness of the indemnifying party.

With respect to the current claims described above, the Group considers that it has substantial and credible legal and factual defences to these claims and will continue to defend them vigorously.

London Interbank Offered Rate (LIBOR)

Certain members of the Group have been named as defendants in a number of class actions and individual claims filed in the US with respect to the setting of LIBOR. The complaints are substantially similar and allege that certain members of the Group and other panel banks individually and collectively violated US commodities and antitrust laws and state common law by manipulating LIBOR and prices of LIBOR-based derivatives in various markets through various means. The Group considers that it has substantial and credible legal and factual defences to these and prospective claims. It is possible that further claims may be threatened or brought in the US or elsewhere relating to the setting of interest rates or interest rate-related trading.

Details of LIBOR investigations affecting the Group are set out under 'Investigations and reviews' on page 117.

16. Litigation, investigations and reviews (continued)

Madoff

In December 2010, Irving Picard, as trustee for the bankruptcy estates of Bernard L. Madoff and Bernard L. Madoff Investment Securities LLC filed a claim against RBS N.V. for approximately US\$271 million. This is a clawback action similar to claims filed against six other institutions in December 2010. RBS N.V. (or its subsidiaries) invested in Madoff funds through feeder funds. The Trustee alleges that RBS N.V. received US\$71 million in redemptions from the feeder funds and US\$200 million from its swap counterparties while RBS N.V. 'knew or should have known of Madoff's possible fraud'. The Trustee alleges that those transfers were preferences or fraudulent conveyances under the US bankruptcy code and New York law and he asserts the purported right to claw them back for the benefit of Madoff's estate. A further claim, for US\$21.8 million, was filed in October 2011. The Group considers that it has substantial and credible legal and factual defences to these claims and intends to defend itself vigorously.

Unarranged overdraft charges

RBS Citizens Financial Group, Inc (RBS Citizens) and its affiliates were among more than thirty banks named as defendants in US class action lawsuits alleging that the manner in which defendant banks posted transactions to consumer accounts caused customers to incur excessive overdraft fees. The complaints against RBS Citizens, which concern the period between 2002 and 2010 and were consolidated into one case, alleged that this conduct violated its duty of good faith and fair dealing, was unconscionable and constituted an unfair trade practice and a conversion of customers' funds. RBS Citizens has agreed to settle this matter for US\$137.5 million and, as a result, the matter has been stayed. The Group has made a provision for the settlement although payment has not yet been made, pending court approval. If the settlement is given final approval by the United States District Court for the Southern District of Florida, consumers who do not opt out of the settlement will be deemed to have released any claims related to the allegations in the lawsuits.

Summary of other disputes, legal proceedings and litigation

In addition to the matters described above, members of the Group are engaged in other legal proceedings in the United Kingdom and a number of overseas jurisdictions, including the United States, involving claims by and against them arising in the ordinary course of business. The Group has reviewed these other actual, threatened and known potential claims and proceedings and, after consulting with its legal advisers, does not expect that the outcome of any of these other claims and proceedings will have a significant effect on the Group's consolidated net assets, operating results or cash flows in any particular period.

16. Litigation, investigations and reviews (continued)

Investigations and reviews

The Group's businesses and financial condition can be affected by the fiscal or other policies and actions of various governmental and regulatory authorities in the United Kingdom, the European Union, the United States and elsewhere. The Group has engaged, and will continue to engage, in discussions with relevant government and regulatory authorities, including in the United Kingdom and the United States, on an ongoing and regular basis regarding operational, systems and control evaluations and issues including those related to compliance with applicable anti-bribery, anti-money laundering and sanctions regimes. It is possible that any matters discussed or identified may result in investigatory or other action being taken by governmental and regulatory authorities, increased costs being incurred by the Group, remediation of systems and controls, public or private censure, restriction of the Group's business activities or fines. Any of these events or circumstances could have a significant effect on the Group, its business, authorisations and licences, reputation, results of operations or the price of securities issued by it.

Political and regulatory scrutiny of the operation of retail banking and consumer credit industries in the United Kingdom, United States and elsewhere continues. The nature and impact of future changes in policies and regulatory action are not predictable and are beyond the Group's control but could have a significant effect on the Group's consolidated net assets, operating results or cash flows in any particular period.

The Group is co-operating fully with the investigations, reviews and proceedings described below.

LIBOR

The Group continues to co-operate fully with investigations by various governmental and regulatory authorities into its submissions, communications and procedures relating to the setting of LIBOR and other interest rates. The relevant authorities include, amongst others, the US Commodity Futures Trading Commission, the US Department of Justice (Fraud Division), the FSA and the Japanese Financial Services Agency. The Group has dismissed a number of employees for misconduct as a result of its investigations into these matters.

The Group is also under investigation by competition authorities in a number of jurisdictions, including the European Commission, Department of Justice (Antitrust Division) and Canadian Competition Bureau, stemming from the actions of certain individuals in the setting of LIBOR and other interest rates, as well as interest rate-related trading. The Group is also co-operating fully with these investigations.

It is not possible to reliably measure what effect these investigations, any regulatory findings and any related developments may have on the Group, including the timing and amount of fines or settlements.

16. Litigation, investigations and reviews (continued)

Technology incident

On 19 June 2012, the Group was affected by a technology incident as a result of which the processing of certain customer accounts and payments were subject to considerable delay. The cause of the incident is being investigated by independent external counsel with the assistance of third party advisors, who have been instructed to carry out an independent review. The Group has agreed to reimburse customers for any loss suffered as a result of the incident and has made a provision of £125 million in its Q2 2012 results for this matter. Additional costs may arise once all redress and business disruption items are clear and a further update will be given in Q3.

The incident, the Group's handling of the incident and the systems and controls surrounding the processes affected, are the subject of regulatory enquiries (both from the UK and Ireland) and the Group could become a party to litigation. In particular, the Group could face legal claims from those whose accounts were affected and could itself have claims against third parties.

Interest rate hedging products

In June 2012, following an industry wide review, the FSA announced that the Group and other UK banks had agreed to a redress exercise and past business review in relation to the sale of interest rate hedging products to some small and medium sized businesses who were classified as retail clients under FSA rules.

The Group will provide fair and reasonable redress to non-sophisticated customers classified as retail clients, who were sold structured collars. The Group has made a provision of £50 million in its Q2 2012 results for the redress it expects to offer to these customers. As the actual amount that the Group will be required to pay will depend on the facts and circumstances of each case, there is no certainty as to the eventual costs of redress.

The Group will also write to non-sophisticated customers classified as retail clients sold other interest rate products (other than interest rate caps) on or after 1 December 2001 offering a review of their sale and, if it is appropriate in the individual circumstances, the Group will propose fair and reasonable redress on a case by case basis. Furthermore, non-sophisticated customers classified as retail clients who have purchased interest rate caps will be entitled to approach the Group and request a review. At this stage, the Group is not able to estimate reliably the cost of redress for these customers.

The redress exercise and the past business review will be scrutinised by an independent reviewer, who will review and agree any redress, and will be overseen by the FSA.

16. Litigation, investigations and reviews (continued)

Retail banking

In the European Union, regulatory actions included an inquiry into retail banking initiated on 13 June 2005 in all of the then 25 member states by the European Commission's Directorate General for Competition. The inquiry examined retail banking in Europe generally. On 31 January 2007, the European Commission (EC) announced that barriers to competition in certain areas of retail banking, payment cards and payment systems in the European Union had been identified. The EC indicated that it will consider using its powers to address these barriers and will encourage national competition authorities to enforce European and national competition laws where appropriate. In addition, in late 2010, the EC launched an initiative pressing for increased transparency in respect of bank fees. The EC is currently proposing to legislate for the increased harmonisation of terminology across Member States, with proposals expected in the second half of 2012. The Group cannot predict the outcome of these actions at this stage and is unable reliably to estimate the effect, if any, that these may have on the Group's consolidated net assets, operating results or cash flows in any particular period.

Multilateral interchange fees

In 2007, the EC issued a decision that, while interchange is not illegal per se, MasterCard's current multilateral interchange fee (MIF) arrangements for cross border payment card transactions with MasterCard and Maestro branded consumer credit and debit cards in the European Union are in breach of competition law. MasterCard was required by the decision to withdraw the relevant cross-border MIF (i.e. set these fees to zero) by 21 June 2008.

MasterCard appealed against the decision to the European Court of First Instance (subsequently re-named the General Court) in March 2008, and the Group intervened in the appeal proceedings. In addition, in summer 2008, MasterCard announced various changes to its scheme arrangements. The EC was concerned that these changes might be used as a means of circumventing the requirements of the infringement decision. In April 2009, MasterCard agreed an interim settlement on the level of cross-border MIF with the EC pending the outcome of the appeal process and, as a result, the EC advised it would no longer investigate the non-compliance issue. The General Court heard MasterCard's appeal in July 2011 and issued its judgment on 24 May 2012, upholding the EC's original decision. The Group understands that MasterCard will appeal further and is awaiting confirmation of the basis of such appeal.

Visa's cross-border MIFs were exempted in 2002 by the EC for a period of five years up to 31 December 2007 subject to certain conditions. In March 2008, the EC opened a formal inquiry into Visa's current MIF arrangements for cross border payment card transactions with Visa branded debit and consumer credit cards in the European Union and in April 2009 the EC announced that it had issued Visa with a formal Statement of Objections. At the same time Visa announced changes to its interchange levels and introduced some changes to enhance transparency. There is no deadline for the closure of the inquiry. However, in April 2010 Visa announced it had reached an agreement with the EC as regards immediate cross border debit card MIF rates only and in December 2010 the commitments were finalised for a four year period commencing December 2010 under Article 9 of Regulation 1/2003. The EC is continuing its investigations into Visa's cross border MIF arrangements for deferred debit and credit transactions.

16. Litigation, investigations and reviews (continued)

In the UK, the Office of Fair Trading (OFT) has carried out investigations into Visa and MasterCard domestic credit card interchange rates. The decision by the OFT in the MasterCard interchange case was set aside by the Competition Appeal Tribunal (CAT) in June 2006. The OFT's investigations in the Visa interchange case and a second MasterCard interchange case are ongoing. In February 2007, the OFT announced that it was expanding its investigation into domestic interchange rates to include debit cards. In January 2010 the OFT advised that it did not anticipate issuing a Statement of Objections prior to the General Court's judgment. The OFT has advised that it will issue a project update in due course.

The outcome of these investigations is not known, but they may have a significant effect on the consumer credit industry in general and, therefore, on the Group's business in this sector.

Payment Protection Insurance

In January 2009, the Competition Commission (CC) announced its intention to order a range of remedies in relation to Payment Protection Insurance (PPI), including a prohibition on actively selling PPI at point of sale of the credit product (and for 7 days thereafter), a ban on single premium policies and other measures to increase transparency (in order to improve customers' ability to search and improve price competition). In October 2010, the CC published its final decision on remedies which confirmed the point of sale prohibition. In March 2011, the CC issued a final order setting out its remedies with a commencement date of 6 April 2011. The key remedies came into force in two parts, in October 2011 and April 2012.

The FSA conducted a broad industry thematic review of PPI sales practices and in September 2008, the FSA announced that it intended to escalate its level of regulatory intervention. Substantial numbers of customer complaints alleging the mis-selling of PPI policies have been made to banks and to the Financial Ombudsman Service (FOS) and many of these are being upheld by the FOS against the banks.

The FSA published a final policy statement in August 2010 imposing significant changes with respect to the handling of complaints about the mis-selling of PPI. In October 2010, the British Bankers' Association (BBA) filed an application for judicial review of the FSA's policy statement and of related guidance issued by the FOS. In April 2011 the High Court issued judgment in favour of the FSA and the FOS and in May 2011 the BBA announced that it would not appeal that judgment. The Group then recorded an additional provision of £850 million in respect of PPI. In the first half of 2012 an additional provision of £260 million was recorded, with an overall total of £1.3 billion accrued as at 30 June 2012. During 2011, the Group reached agreement with the FSA on a process for implementation of its policy statement and for the future handling of PPI complaints. Implementation of the agreed processes is currently under way.

Personal current accounts

On 16 July 2008, the OFT published the results of its market study into Personal Current Accounts (PCA) in the United Kingdom. The OFT found evidence of competition and several positive features in the PCA market but believed that the market as a whole was not working well for consumers and that the ability of the market to function well had become distorted.

16. Litigation, investigations and reviews (continued)

On 7 October 2009, the OFT published a follow-up report summarising the initiatives agreed between the OFT and PCA providers to address the OFT's concerns about transparency and switching, following its market study. PCA providers will take a number of steps to improve transparency, including providing customers with an annual summary of the cost of their account and making charges prominent on monthly statements. To improve the switching process, a number of steps are being introduced following work with Bacs, the payment processor, including measures to reduce the impact on consumers of any problems with transferring direct debits.

On 22 December 2009, the OFT published a further report in which it stated that it continued to have significant concerns about the operation of the PCA market in the United Kingdom, in particular in relation to unarranged overdrafts, and that it believed that fundamental changes are required for the market to work in the best interests of bank customers. The OFT stated that it would discuss these issues intensively with banks, consumer groups and other organisations, with the aim of reporting on progress by the end of March 2010. On 16 March 2010, the OFT announced that it had secured agreement from the banks on four industry-wide initiatives, namely minimum standards on the operation of opt-outs from unarranged overdrafts, new working groups on information sharing with customers, best practice for PCA customers in financial difficulties and incurring charges, and PCA providers to publish their policies on dealing with PCA customers in financial difficulties. The OFT also announced its plan to conduct six-monthly ongoing reviews, to review the market again fully in 2012 and to undertake a brief analysis on barriers to entry.

The first six-monthly ongoing review was completed in September 2010. The OFT noted progress in the areas of switching, transparency and unarranged overdrafts for the period March to September 2010, as well as highlighting further changes the OFT expected to see in the market. In March 2011, the OFT published its update report in relation to PCAs. This noted further progress in improving consumer control over the use of unarranged overdrafts. In particular, the Lending Standards Board had led on producing standards and guidance to be included in a revised Lending Code. The OFT stated it would continue to monitor the market and would consider the need for, and appropriate timing of, further update reports in light of other developments, in particular the work of the UK Government's Independent Commission on Banking (ICB).

In May 2010, the OFT announced its review of barriers to entry. The review concerned retail banking for individuals and small and medium size enterprises (up to £25 million turnover) and looked at products which require a banking licence to sell mortgages, loan products and, where appropriate, other products such as insurance or credit cards where cross-selling may facilitate entry or expansion. The OFT published its report in November 2010. It advised that it expected its review to be relevant to the ICB, the FSA, HM Treasury and the Department for Business, Innovation and Skills and to the devolved governments in the United Kingdom. The OFT did not indicate whether it would undertake any further work. The report maintained that barriers to entry remain, in particular regarding switching, branch networks and brands. At this stage, it is not possible to estimate the effect of the OFT's report and recommendations regarding barriers to entry upon the Group.

16. Litigation, investigations and reviews (continued)

On 13 July 2012, the OFT launched its planned review of the PCA market. The review will look at whether the initiatives agreed by the OFT with banks have been successful. The OFT has also announced a wider programme of work on retail banking and will consider the operation of the payment systems and the banking market for SMEs. The PCA review and wider programme of work are aimed at informing the OFT's response to the Independent Commission on Banking's recommendation that the OFT consider making a reference to the Competition Commission by 2015 if it had not already done so and if sufficient improvements in the market have not been made by that time.

Private motor insurance

In December 2011, the OFT launched a market study into private motor insurance, with a focus on the provision of third party vehicle repairs and credit hire replacement vehicles to claimants. The OFT issued its report on 31 May 2012 and has advised that it believes there are features of the market that potentially restrict, distort or prevent competition in the market and that would merit a referral to the Competition Commission (CC). The OFT's particular focus is on credit hire replacement vehicles and third party vehicle repairs. Following publication of the consultation, which closed on 6 July 2012, the Group is awaiting the OFT's decision on whether to refer the market to the CC. If a referral is made, this is likely to take place in the second half of 2012. At this stage, it is not possible to estimate with any certainty the effect the market study and any related developments may have on the Group.

Independent Commission on Banking

Following an interim report published on 11 April 2011, the ICB published its final report to the Cabinet Committee on Banking Reform on 12 September 2011 (Final Report). The Final Report makes a number of recommendations, including in relation to (i) the implementation of a ring-fence of retail banking operations, (ii) loss-absorbency (including bail-in) and (iii) competition.

On 19 December 2011, the UK Government published a response to the Final Report (the 'Response'), reaffirming its intention to accept the majority of the ICB's recommendations. The Government agreed that "vital banking services - in particular the taking of retail deposits - should only be provided by 'ring-fenced banks', and that these banks should be prohibited from undertaking certain investment banking activities." It also broadly accepted the ICB's recommendations on loss absorbency and on competition.

Following an extensive first consultation, the UK Government published a White Paper on 14 June 2012 (White Paper), setting out its more detailed proposals for implementing the ICB's recommendations. Its intention remains to complete primary and secondary legislation before the end of the current Parliamentary term in May 2015 and for banks to comply with all the measures proposed in the paper by 2019, as the ICB recommended. The Government also reaffirmed its determination that changes to the account switching process should be completed by September 2013, as already scheduled. A further period of consultation has now been established, which runs until 6 September 2012.

The content of the White Paper was broadly in line with expectations following the Response, with ring-fencing to be implemented as set out in the ICB recommendations and loss-absorbency requirements also largely consistent.

16. Litigation, investigations and reviews (continued)

With regard to the competition aspects, the White Paper supports the Payment Council proposals to increase competition by making account switching easier and confirms that the Bank of England and the FSA will publish reviews on how prudential standards and conduct requirements can be a barrier to market entry. The White Paper also urges the OFT to consider what further transparency measures would be appropriate during its review of the PCA market in the second half of this year and a consultation regarding the structure of UK Payments Council is recommended.

While the UK Government's White Paper provides some additional detail, until the further consultation is concluded and significantly more is known on the precise detail of the legislative and regulatory framework it is not possible to estimate the potential impact of these measures with any level of precision.

The Group will continue to participate in the debate and to consult with the UK Government on the implementation of the proposals set out in the White Paper, the effects of which could have a negative impact on the Group's consolidated net assets, operating results or cash flows in any particular period.

Securitisation and collateralised debt obligation business

In the United States, the Group is involved in reviews, investigations and proceedings (both formal and informal) by federal and state governmental law enforcement and other agencies and self-regulatory organisations relating to, among other things, mortgage-backed securities, collateralised debt obligations (CDOs), and synthetic products. In connection with these inquiries, Group companies have received requests for information and subpoenas seeking information about, among other things, the structuring of CDOs, financing to loan originators, purchase of whole loans, sponsorship and underwriting of securitisations, due diligence, representations and warranties, communications with ratings agencies, disclosure to investors, document deficiencies, and repurchase requests.

In September and October 2010, the SEC requested voluntary production of information concerning residential mortgage-backed securities underwritten by subsidiaries of RBS during the period from September 2006 to July 2007 inclusive. In November 2010, the SEC commenced a formal investigation. The investigation is in its preliminary stages and it is not possible to predict any potential exposure that may result.

Also in October 2010, the SEC commenced an inquiry into document deficiencies and repurchase requests with respect to certain securitisations, and in January 2011, this was converted to a formal investigation. Among other matters, the investigation seeks information related to document deficiencies and remedial measures taken with respect to such deficiencies. The investigation also seeks information related to early payment defaults and loan repurchase requests.

In 2007, the New York State Attorney General issued subpoenas to a wide array of participants in the securitisation and securities industry, focusing on the information underwriters obtained from the independent firms hired to perform due diligence on mortgages. The Group completed its production of documents requested by the New York State Attorney General in 2008, principally producing documents related to loans that were pooled into one securitisation transaction. In May 2011, at the New York State Attorney General's request, representatives of the Group attended an informal meeting to provide additional information about the Group's mortgage securitisation business. The investigation is ongoing and the Group continues to provide requested information.

16. Litigation, investigations and reviews (continued)

In September 2010, RBS subsidiaries received a request from the Nevada State Attorney General requesting information related to securitisations of mortgages issued by three specific originators. The investigation by the Nevada State Attorney General continues. Whilst it is difficult to predict the final outcome of this investigation, it is not expected to have a material adverse effect on the Group's net assets, operating results or cash flows in any particular period.

US mortgages - loan repurchase matters

The Group's Markets & International Banking N.A. or M&IB N.A. business (formerly Global Banking & Markets N.A.) has been a purchaser of non-agency US residential mortgages in the secondary market, and an issuer and underwriter of non-agency residential mortgage-backed securities (RMBS). M&IB N.A. did not originate or service any US residential mortgages and it was not a significant seller of mortgage loans to government sponsored enterprises (GSEs) (e.g., the Federal National Mortgage Association and the Federal Home Loan Mortgage Association).

In issuing RMBS, M&IB N.A. generally assigned certain representations and warranties regarding the characteristics of the underlying loans made by the originator of the residential mortgages; however, in some circumstances, M&IB N.A. made such representations and warranties itself. Where M&IB N.A. has given those or other representations and warranties (whether relating to underlying loans or otherwise), M&IB N.A. may be contractually required to repurchase such loans or indemnify certain parties against losses for certain breaches of such representations and warranties. In certain instances where it is required to repurchase loans or related securities, M&IB N.A. may be able to assert claims against third parties who provided representations or warranties to M&IB N.A. when selling loans to it; although the ability to recover against such parties is uncertain. Between the start of 2009 and the end of June 2012, M&IB N.A. received approximately US\$512 million in repurchase demands in respect of loans made primarily from 2005 to 2008 and related securities sold where obligations in respect of contractual representations or warranties were undertaken by M&IB N.A.

However, repurchase demands presented to M&IB N.A. are subject to challenge and, to date, M&IB N.A. has rebutted a significant percentage of these claims.

RBS Citizens has not been an issuer or underwriter of non-agency RMBS. However, RBS Citizens is an originator and servicer of residential mortgages, and it routinely sells such mortgage loans in the secondary market and to GSEs. In the context of such sales, RBS Citizens makes certain representations and warranties regarding the characteristics of the underlying loans and, as a result, may be contractually required to repurchase such loans or indemnify certain parties against losses for certain breaches of the representations and warranties concerning the underlying loans. Between the start of 2009 and the end of June 2012, RBS Citizens received US\$69.1 million in repurchase demands in respect of loans originated primarily since 2003. However, repurchase demands presented to RBS Citizens are subject to challenge and, to date, RBS Citizens has rebutted a significant percentage of these claims.

Although there has been disruption in the ability of certain financial institutions operating in the United States to complete foreclosure proceedings in respect of US mortgage loans in a timely manner (or at all) over the last year (including as a result of interventions by certain states and local governments), to date, RBS Citizens has not been materially impacted by such disruptions and the Group has not ceased making foreclosures.

16. Litigation, investigations and reviews (continued)

The volume of repurchase demands is increasing and is expected to continue to increase, and the Group cannot currently estimate what the ultimate exposure of M&IB N.A. or RBS Citizens may be. Furthermore, the Group is unable to estimate the extent to which the matters described above will impact it, and future developments may have an adverse impact on the Group's net assets, operating results or cash flows in any particular period.

Other investigations

The Federal Reserve and state banking supervisors have been reviewing the Group's US operations and RBS and its subsidiaries have been required to make improvements with respect to various matters, including enterprise-wide governance, US Bank Secrecy Act and anti-money laundering compliance, risk management and asset quality. The Group is in the process of implementing measures for matters identified to date.

On 27 July 2011, the Group consented to the issuance of a Cease and Desist Order (the Order) setting forth measures required to address deficiencies related to governance, risk management and compliance systems and controls identified by the Federal Reserve and state banking supervisors during examinations of the RBS plc and RBS N.V. branches in 2010. The Order requires the Group to strengthen its US corporate governance structure, to develop an enterprise-wide risk management programme, and to develop and enhance its programmes to ensure compliance with US law, particularly the US Bank Secrecy Act and anti-money laundering laws, rules and regulations. The Group has established a strategic and remedial programme of change to address the identified concerns and is committed to working closely with the US bank regulators to implement the remedial measures required by the Order.

The Group's operations include businesses outside the United States that are responsible for processing US dollar payments. The Group is conducting a review of its policies, procedures and practices in respect of such payments and has initiated discussions with UK and US authorities to discuss its historical compliance with applicable laws and regulations, including US economic sanctions regulations. Although the Group cannot currently determine when the review of its operations will be completed or what the outcome of its discussions with UK and US authorities will be, the investigation costs, remediation required or liability incurred could have a material adverse effect on the Group's net assets, operating results or cash flows in any particular period.

The Group may become subject to formal and informal supervisory actions and may be required by its US banking supervisors to take further actions and implement additional remedial measures with respect to these and additional matters. Any limitations or conditions placed on the Group's activities in the United States, as well as the terms of any supervisory action applicable to RBS and its subsidiaries, could have a material adverse effect on the Group's net assets, operating results or cash flows in any particular period.

In July 2010, the FSA notified the Group that it was commencing an investigation into the sale by Coutts & Co of the ALICO (American Life Insurance Company) Premier Access Bond Enhanced Variable Rate Fund (EVRF) to customers between 2001 and 2008 as well as its subsequent review of those sales. Subsequently, on 11 January 2011 the FSA revised the investigation start date to December 2003.

16. Litigation, investigations and reviews (continued)

On 8 November 2011, the FSA published its Final Notice having reached a settlement with Coutts & Co, under which Coutts & Co agreed to pay a fine of £6.3 million. The FSA did not make any findings on the suitability of advice given in individual cases. Nonetheless, Coutts & Co has agreed to undertake a past business review of its sales of the product. This review is being overseen by an independent third party and considers the advice given to customers invested in the EVRF as at the date of its suspension, 15 September 2008. For any sales which are found to be unsuitable, redress will be paid to the customers to ensure that they have not suffered financially.

On 26 March 2012, the FSA published a Final Notice that it had reached a settlement with Coutts & Co under which Coutts agreed to pay a fine of £8.75 million. This follows an investigation by the FSA into Coutts & Co's anti-money laundering (AML) systems and controls in relation to high risk clients. The fine relates to historic activity undertaken between December 2007 and November 2010.

Coutts & Co has cooperated fully and openly with the FSA throughout the investigation. Coutts & Co has accepted the findings contained in the FSA's Final Notice regarding certain failures to meet the relevant regulatory standards between December 2007 and November 2010. Coutts & Co has found no evidence that money laundering took place during that time.

Since concerns were first identified by the FSA, Coutts & Co has enhanced its client relationship management process which included a review of its AML procedures, and is confident in its current processes and procedures.

On 18 January 2012, the FSA published its Final Notice having reached a settlement with U K Insurance Limited for breaches of Principle 2 by Direct Line and Churchill (the Firms), under which U K Insurance Limited agreed to pay a fine of £2.17 million. The Firms were found to have acted without due skill, care and diligence in the way that they responded to the FSA's request to provide it with a sample of their closed complaint files. The Firms' breaches of Principle 2 did not result in any customer detriment.

In March 2008, the Group was advised by the SEC that it had commenced a non-public, formal investigation relating to the Group's United States sub-prime securities exposures and United States residential mortgage exposures. In December 2010, the SEC contacted the Group and indicated that it would also examine valuations of various RBS N.V. structured products, including CDOs. With respect to the latter inquiry, in March 2012, the SEC communicated to the Group that it had completed its investigation and that it did not, as of the date of that communication and based upon the information then in its possession, intend to recommend any enforcement action against RBS.

17. Other developments

Proposed transfers of a substantial part of the business activities of RBS N.V. to The Royal Bank of Scotland plc (RBS plc)

On 19 April 2011, the Group announced its intention to transfer a substantial part of the business activities of The Royal Bank of Scotland N.V. (RBS N.V.) to RBS plc (the "Proposed Transfers"), subject, amongst other matters, to regulatory and other approvals, further tax and other analysis in respect of the assets and liabilities to be transferred and employee consultation procedures.

17. Other developments (continued)

It is expected that the Proposed Transfers will be implemented on a phased basis over a period ending 31 December 2013. The transfer of substantially all of the UK business was completed during Q4 2011. A large part of the remainder of the Proposed Transfers is expected to have taken place by the end of 2012.

On 26 March 2012, the Boards of The Royal Bank of Scotland Group plc (RBSG), RBS plc, RBS Holdings N.V., RBS N.V. and RBS II B.V. announced that (1) RBS N.V. (as the demerging company) and RBS II B.V. (as the acquiring company) filed a proposal with the Dutch Trade Register for a legal demerger and (2) following a preliminary hearing at the Court of Session in Scotland, RBS plc and RBS II B.V. made filings with Companies House in the UK and the Dutch Trade Register respectively for a proposed cross-border merger of RBS II B.V. into RBS plc ("the Dutch Scheme").

Upon implementation of these proposals, a substantial part of the business conducted by RBS N.V. in the Netherlands as well as in certain EMEA branches of RBS N.V. will be transferred to RBS plc. Implementation will be by the demerger of the transferring businesses into RBS II B.V. by way of a Dutch statutory demerger followed by the merger of RBS II B.V. into RBS plc through a cross-border merger. RBS plc and RBS N.V. have discussed the transfer in detail with De Nederlandsche Bank and the Financial Services Authority.

On 18 June 2012, the Court of Session in Scotland made an order approving the completion of the Merger. This order fixed the effective date of the Merger and its effects as 9 July 2012.

On 4 July 2012, it was announced that RBSG, RBS plc, RBS Holdings N.V., RBS N.V. and RBS II B.V. had decided that, as a result of technology issues which affected the RBS Group in the UK and Ireland, it would be prudent to defer the implementation of the Dutch Scheme. On 20 July 2012, it was announced that the Dutch Scheme is now expected to be implemented on 10 September 2012, subject to (among other matters) regulatory approvals and the approval of the Court of Session in Scotland.

Rating agencies

On 15 February 2012, the rating agency Moody's Investor Service ("Moody's") placed on review for possible downgrade, or extended reviews on, the ratings of 114 European banks and 17 firms with global capital markets activities. Included in the rating reviews were the ratings of RBS and certain subsidiaries. Moody's cited three reasons for their reviews across all of the affected firms; (i) the adverse and prolonged impact of the euro area crisis; (ii) the deteriorating creditworthiness of euro area sovereigns; and (iii) the substantial challenges faced by banks and securities firms with significant capital market activities.

On 22 February 2012, Moody's also placed on review for possible downgrade selected ratings of North American bank subsidiaries of European banks. Included in these rating actions were the ratings of RBS Citizens, N.A. and Citizens Bank of Pennsylvania.

17. Other developments (continued)

Moody's completed its ratings review on the Group on 21 June 2012. As a result the agency downgraded RBS Group plc's long-term ratings by one-notch (short-term ratings were affirmed unchanged) whilst downgrading ratings of RBS plc, NatWest Plc, RBS N.V., RBS Citizens, N.A. and Citizens Bank of Pennsylvania by one-notch: long term ratings and short term ratings. The long term ratings of Ulster Bank Ltd and Ulster Bank Ireland Ltd were downgraded by one-notch whilst the short-term ratings of these entities were affirmed as unchanged.

The outlook on RBS plc's standalone rating is now stable reflecting Moody's view that capital markets-related risk factors have now been fully incorporated into the bank's standalone rating. The outlook on RBS plc's long-term rating is negative (in line with other large UK banks) reflecting Moody's' view that government support for large UK banks may be lowered in the medium term.

There was very limited impact from these downgrades given the underlying robust improvement in the Group's liquidity, funding and capital position.

On 17 July 2012, Fitch affirmed its ratings on the Group and its subsidiaries. Fitch's ratings outlooks were also affirmed as unchanged at this time except for the outlook on Ulster Bank Ireland Ltd which was changed to Negative from Stable. This Negative outlook is in line with the outlook on the sovereign (Republic of Ireland).

No material rating actions have been undertaken on the Group or its subsidiaries by Standard & Poor's since the start of the year.

18. Related party transactions

UK Government

The UK Government and bodies controlled or jointly controlled by the UK Government and bodies over which it has significant influence are related parties of the Group. The Group enters into transactions with many of these bodies on an arm's length basis.

Asset Protection Scheme

The Group is party to the UK Government's Asset Protection Scheme (APS). Under the APS the Group purchased credit protection over a portfolio of specified assets and exposures (covered assets) from Her Majesty's Treasury. The contract is accounted for as a derivative financial instrument and recognised as a liability at a fair value of £25 million (31 December 2011 - £231 million). Changes in fair value of £45 million (2011 - £906 million) were charged to profit or loss (Income from trading activities).

Government credit and asset-backed securities guarantee schemes

Under these schemes the UK Government guarantees eligible debt issued by qualifying institutions for a fee. During the first half of 2012 the Group repaid all its borrowings under these schemes. At 31 December 2011, the amount outstanding was £21.3 billion.

Bank of England facilities

In the ordinary course of business, the Group may from time to time access market-wide facilities provided by the Bank of England.

National Loan Guarantee Scheme

Under the UK Government's National Loan Guarantee Scheme, launched on 20 March 2012, eligible customers receive a 1 per cent discount on their funding rate. Up to 30 June 2012, the Group had provided loans and asset finance facilities of £470 million under this scheme.

The Group's other transactions with the UK Government include the payment of taxes, principally UK corporation tax and value added tax; national insurance contributions; local authority rates; and regulatory fees and levies (including the bank levy and FSCS levies).

Other related parties

(a) In their roles as providers of finance, Group companies provide development and other types of capital support to businesses. These investments are made in the normal course of business and on arm's length terms. In some instances, the investment may extend to ownership or control over 20% or more of the voting rights of the investee company. However, these investments are not considered to give rise to transactions of a materiality requiring disclosure under IAS 24.

(b) The Group recharges The Royal Bank of Scotland Group Pension Fund with the cost of administration services incurred by it. The amounts involved are not material to the Group.

Full details of the Group's related party transactions for the year ended 31 December 2011 are included in the Group's 2011 Form 20-F.

19. Post balance sheet events

There have been no significant events between 30 June 2012 and the date of approval of this announcement which would require a change to or additional disclosure in the announcement.

General overview

The following table defines the main types of risk managed by the Group and presents a summary of the key developments for each risk in the first half of 2012.

Risk type	Definition	H1 2012 summary
Capital risk	The risk that the Group has insufficient capital.	The Core tier 1 ratio was 11.1%, despite regulatory changes increasing risk-weightings on various asset categories, particularly commercial real estate. The Group reduced RWAs in Markets and successfully restructured a large derivative position in Non-Core. Refer to the Capital section.
Liquidity and funding risk	The risk that the Group is unable to meet its financial liabilities as they fall due.	The Group maintained its trajectory towards a more stable deposit-led balance sheet with the loan:deposit ratio improving from 108% at 31 December 2011 to 104% at 30 June 2012. Short-term wholesale funding declined significantly from £102 billion at 31 December 2011 to £62 billion, covered 2.5 times by the liquidity buffer which was maintained at £156 billion. Refer to the Liquidity and funding risk section.
Credit risk (including counterparty risk)	The risk that the Group will incur losses owing to the failure of a customer to meet its obligation to settle outstanding amounts.	The Group's credit performance improved; the H1 2012 impairment charge of £2.7 billion was 34% lower than the H1 2011 charge. This was despite continued economic stress within the eurozone, including Ireland, and depressed markets elsewhere. Progress continued in reducing key credit concentration risks, with exposure to commercial real estate 7% lower than at 31 December 2011. Refer to the Credit risk section.
Country risk	The risk of material losses arising from significant country-specific events.	Sovereign risk continues to increase, resulting in further rating downgrades for a number of countries, including several eurozone members. Total eurozone exposures decreased by 8% to £218 billion in H1 2012 and within that exposures to the periphery, fell by 10% to £69 billion. The Group participated in the Greek sovereign bond restructuring in March 2012 and sold all resulting new Greek sovereign bonds as well as parts of its Spanish and Portuguese bond holdings. A number of further advanced countries were brought under limit control and exposure to a range of countries was further reduced. Refer to the Country risk section.

General overview (continued)

Risk type	Definition	H1 2012 summary
Market risk	The risk arising from changes in interest rates, foreign currency, credit spreads, equity prices and risk related factors such as market volatilities.	During H1 2012, the Group continued to manage down its market risk exposure in Non-Core through the disposal of assets and unwinding of trades. Refer to the Market risk section.
Insurance risk	The risk of financial loss through fluctuations in the timing, frequency and/or severity of insured events, relative to the expectations at the time of underwriting.	Direct Line Group introduced enhanced claims management systems and processes, improving its ability to handle and understand insured events. In addition, improvements in the Group's insurance risk policy, associated minimum standards and key risk indicators were implemented.
Operational risk	The risk of loss resulting from inadequate or failed processes, people, systems or from external events.	The Group continued to focus on tight management of operational risks, particularly with regard to risk and control assessment (including change risk assessment), scenario analysis and statistical modelling for capital requirements. The level of operational risk remains high due to the continued scale of structural change occurring across the Group, the pace of regulatory change, the economic downturn and other external threats, such as e-crime. During June 2012, the Group's technology incident led to significant payment system disruption. A detailed
		investigation is underway into the root cause of the problem.
Compliance risk	The risk arising from non-compliance with national and international laws, rules and regulations.	The Group agreed its conduct risk appetite and made significant progress towards finalising and embedding the associated policy framework and governance. In addition, Group-wide implementation of its Anti Money Laundering Change Programme continued.

	intiliada)	
Risk type	Definition	H1 2012 summary
Reputational risk	The risk of brand damage arising from financial and non-financial events arising from the failure to meet stakeholders' expectations of the Group's performance and behaviour.	The Group Sustainability Committee oversaw further development of the Group's policies for environmental, social and ethical risks focusing on the power generation and gambling sectors. As part of the Group's commitment to stakeholder engagement, the Group Sustainability Committee also met with key non-governmental organisations to discuss concerns over high profile issues including tax, oil and gas investment, corporate transparency and agricultural commodity trading. The disruption experienced by customers due to the Group's recent technology incident has presented reputational risks. The Group has informed customers that
		they will not suffer financially as a result and is undertaking an independent review of the incident.
Business risk	The risk of lower-than-expected revenues and/or higher-than-expected operating costs.	Business risk is fully incorporated within the Group's stress testing process through an analysis of the potential movement in revenues and operating costs under stress scenarios.
Pension risk	The risk that the Group will have to make additional contributions to its defined benefit pension schemes.	The Group continued to focus on improving pension risk management systems and modelling. This included the development of a policy setting out the governance framework for managing the Group's risk as sponsor of its defined pension schemes.

General overview (continued)

Balance sheet management

Capital

The Group aims to maintain an appropriate level of capital to meet its business needs and regulatory requirements. Capital adequacy and risk management are closely aligned. The Group's risk-weighted assets and risk asset ratios, calculated in accordance with Financial Services Authority (FSA) definitions, are set out below.

	30 June 2012	2012	31 December 2011
Risk-weighted assets (RWAs) by risk	£bn	£bn	£bn
Credit risk Counterparty risk	334.8 53.0	332.9 56.8	344.3 61.9
Market risk	54.0	61.0	64.0
Operational risk	45.8	45.8	37.9
Asset Protection Scheme relief	487.6 (52.9) 434.7	496.5 (62.2) 434.3	508.1 (69.1) 439.0
Risk asset ratios	%	%	%
Core Tier 1 Tier 1 Total	11.1 13.4 14.6	10.8 13.2 14.0	10.6 13.0 13.8

Key points

- The Core Tier 1 ratio improved to 11.1% reflecting reductions in RWAs and capital deductions. Gross RWAs decreased by £20.5 billion in H1 2012, 4%, primarily in Markets and Non-Core.
- Non-Core RWAs decreased by £10.6 billion as a result of sales, run-off, market risk movements and the impact of restructuring a large derivative exposure to a highly leveraged counterparty, which was partly offset by increases to regulatory risk-weightings.
- · In Markets, less market risk and a smaller balance sheet led to lower RWAs.
- Market risk RWAs decreased by £10.0 billion in the first half of 2012 and £7.0 billion in Q2 2012 reflecting de-risking of the Non-Core portfolio and a reduction in trading VaR in both Markets and Non-Core.
- The Asset Protection Scheme relief decreased by £16.2 billion in the first half of 2012, £9.3 billion in Q2 2012.
 This results from the £19.6 billion (Q2 2012 £8.6 billion) drop in covered assets to £112.2 billion at 30 June 2012.

Balance sheet management: Capital (continued)

Regulatory developments

The regulatory change agenda remains intense, although we are now seeing a change of emphasis. At a global level, the G20 financial sector reform action plan, first developed in 2008, has mostly been addressed, with focus at that forum now shifting to growth and other issues. The G20 is expected to endorse policy proposals on 'shadow banking' by the end of 2012 but its regulation agenda is increasingly geared towards the implementation of agreed standards. Although policy initiation at the G20 level is drawing to an end, there remains a substantial pipeline of policy development, particularly in the EU and US, and RBS does not anticipate any easing of this for some time.

Balance sheet management: Regulatory capital developments (continued)

In the H1 2012, there were new regulatory proposals in Europe for data protection and crisis management as well as initial discussions on a banking union and the launch of the Liikanen Group to look at a structural reform of the industry. Negotiations, which are still incomplete, continued throughout the period on the adoption of the Basel III enhanced capital and liquidity standards in Europe. The European Banking Authority published several draft technical standards in anticipation of final agreement.

Basel III capital proposals were also issued in the US, as well as final rules for Basel 2.5. These were drawn up to be consistent with the Dodd-Frank Act and several other proposed and final rules were issued under the auspices of that legislation during the period. Significant activity took place in both Europe and the US to finalise rules requiring central clearing, where possible, and other reforms of over-the-counter (OTC) derivatives, as the end of 2012 deadline set by the G20 approaches. Additionally, work continued on the finalisation of recovery and resolution planning frameworks for Europe and the UK.

In the UK, the Financial Services Bill to introduce the 'twin peaks' model of financial regulation was published as the FSA continued to alter its structure in anticipation of its formal split into the Prudential Regulation Authority and the Financial Conduct Authority in 2013. The government also published its White Paper on the implementation of the Vickers Report. The Group is evaluating the impact of these developments.

CRD IV impacts

The Group, in conjunction with the FSA, continues to evaluate its models for the assessment of RWAs ascribed to credit risk across various classes. This together with the changes introduced by CRD IV relating primarily to counterparty risk, is expected to increase RWA requirements by the end of 2013 by £50 billion to £65 billion. These estimates are still subject to change; a degree of uncertainty remains around implementation details as the guidelines are not finalised and must still be enacted into EU law. There could be other future changes and associated impacts from these model reviews. See page 73 of the Group's 2011 Form 20-F on background on Basel III and related proposals. The Group is also in the process of implementing changes to the RWA requirements for commercial real estate portfolios consistent with revised industry guidance from the FSA. This is projected to increase RWA requirements by circa £20 billion by the end of 2013, of which circa £10 billion will apply in 2012. Certain of the changes referred to above have been implemented, adding circa £15 billion to RWAs as of 30 June 2012.

The reported Core Tier 1 ratio following the implementation of the above changes is currently projected(1) to be 10.3% at 31 December 2013, while the fully loaded Basel III Core Tier 1 ratio at that date is estimated at 9.0% - 9.5%.

CRD IV legislation implementing Basel III proposals was due to be finalised in early July for implementation by 1 January 2013. However there are a number of areas still under consideration. On 1 August 2012, the FSA issued a statement indicating that it was unlikely that the legislation will be adopted earlier than autumn 2012 and enter into force on the envisaged implementation date of 1 January 2013. No alternative implementation date has yet been communicated by the EU institutions.

(1) Projected using consensus earnings and company balance sheet forecasts.

Balance sheet management

Liquidity and funding risk

Liquidity risk is the risk that the Group is unable to meet its obligations, including financing maturities as they fall due. Liquidity risk is heavily influenced by the maturity profile and mix of the Group's funding base, as well as the quality and liquidity value of its liquidity portfolio.

Overview

The Group continues to improve the structure and composition of its balance sheet through persistently difficult market conditions.

- The second quarter saw the final maturity of the Group's government guaranteed debt and robust liquidity management through a series of major market-wide credit rating actions. Short-term wholesale funding continued its downward trend to £62 billion and the liquidity coverage of this funding remains strong at 2.5 times. Short-term wholesale funding at 30 June 2012 was 7% of the funded balance sheet and 34% of wholesale funding, compared with 10% and 45% at 31 December 2011.
- Short-term wholesale funding excluding derivative collateral declined by £40.1 billion in H1 2012 (Q2 2012 £17.4 billion), reflecting the continued downsizing of the Markets balance sheet.
- The Group's customer deposits, excluding derivative collateral, increased by £1.4 billion in the quarter despite headwinds from a credit rating downgrade reflecting the strength of the Group's Retail & Commercial franchise. Deposits now account for 67% of the Group's primary funding sources.
- The deleveraging process being driven by Non-Core and Markets continued, allowing the Group to further reduce wholesale funding requirements. During the second quarter of 2012 the Group did not access the public markets for senior term debt (secured or unsecured).
- Progress against the goals of the Group's strategic plan has resulted in a balance sheet structure which is broadly matched. At 30 June 2012 the Group's loan:deposit ratio improved to 104% with a Core ratio of 92%.
- The Core funding surplus increased from £27 billion at the end of 2011 to £34 billion at 30 June 2012, spread evenly across the first two quarters.

Balance sheet management: Liquidity and funding risk (continued)

Funding sources

The table below shows the Group's primary funding sources including deposits in disposal groups and excluding repurchase agreements.

			31
	30 June	31 March	December

Key point

Short-term debt securities in issue declined by £34.6 billion (Q2 2012 - £12.3 billion) primarily due to the final tranches of notes issued under the Credit Guarantee Scheme maturing (£21.3 billion in H1 2012 and £5.7 billion in Q2 2012) and the reduction of commercial paper in issue of £10.2 billion (Q2 2012 - £6.4 billion) in line with the Group's strategy.

Deposit and repo funding

The table below shows the composition of the Group's deposits excluding repos and repo funding including disposal groups.

	30 June 2012		31 March 2012		31 Decem	ber 2011
	Deposits	Repos	Deposits	Repos	Deposits	Repos
	£m	£m	£m	£m	£m	£m

- other financial institutions	65,563	87,789	61,552	84,743	66,009	86,032
Personal and corporate deposits	369,737	1,161	370,936	2,560	370,744	2,780
	502,920	128,075	498,306	128,718	505,867	128,503

Key points

- The central and other bank balances include €10 billion in relation to funding accessed through the European Central Banks long-term refinancing operation facility.
- Of the deposits above, about a third are insured through the UK Financial Services Compensation Scheme, US Federal Deposit Insurance Corporation and similar schemes.

- (2) Excluding repurchase agreements and stock lending but including disposal groups.
- (3) Based on loans and advances to customers net of provisions and customer deposits as shown.
- (4) All conduits relate to International Banking and have been extracted and shown separately.

Key point

The Group's customer loan:deposit ratio improved by 400 basis points in the first half 2012 (Q2 2012 - 200 basis points) despite a credit rating downgrade in June 2012, reflecting the growth of Core Retail & Commercial deposits and the ongoing contraction of Non-Core loans.

Long-term debt issuance

The table below shows debt securities issued by the Group in the period with an original maturity of one year or more. The Group also executes other long-term funding arrangements (predominantly term repurchase agreements) which are not reflected in the following tables.

> Half year ended 31 30 June December 30 June 2012 2011 2011

Net issuance	1,510	5,954	14,960
Incl issuallee	1,310	5,954	14,900

Key point

· Issuance in 2012 has been modest, demonstrating reduced reliance on capital markets for funding.

Balance sheet management: Liquidity and funding risk (continued)

Securitisations and asset transfers

Secured funding

The Group has access to secured funding markets through own-asset securitisation and covered bond funding programme. This complements existing wholesale funding programmes and access to the repo markets. The Group monitors and manages encumbrance levels related to these secured funding programmes including the potential encumbrance of Group assets that could be used in own-asset securitisations and/or covered bonds that could be used as contingent liquidity.

Own-asset securitisations

The Group has a programme of own-asset securitisations where assets are transferred to bankruptcy remote special purpose entities (SPEs) funded by the issue of debt securities. The majority of the risks and rewards of the portfolio are retained by the Group and these SPEs are consolidated with all of the transferred assets retained on the Group's balance sheet. In some own-asset securitisations, the Group may purchase all the issued securities which are available to be pledged as collateral for repurchase agreements with major central banks.

Covered bond programme

Certain loans and advances to customers have been assigned to bankruptcy remote limited liability partnerships to provide security for issues of covered bonds by the Group. The Group retains all of the risks and rewards of these loans, the partnerships are consolidated, the loans retained on the Group's balance sheet and the related covered bonds included within debt securities in issue.

The following table shows:

- (i) the asset categories that have been pledged to secured funding structures, including assets backing publicly issued own-asset securitisations and covered bonds; and
- (ii) any currently unencumbered assets that could be substituted into those portfolios or used to collateralise debt securities which may be retained by the Group for contingent liquidity purposes.

	106,633	24,071	81,387	105,458	
Cash deposits (4)	11,998				
	118,631				

Notes:

- (1) Assets that have been pledged to the SPEs which itself is a subset of the total portfolio of eligible assets within a collateral pool.
- (2) Debt securities that have been sold to third party investors and represents a source of external wholesale funding.
- (3) Debt securities issued pursuant to own-asset securitisations where the debt securities are retained by the Group as a source of contingent liquidity where those securities can be used in repurchase agreements with central banks.

(4) Cash deposits comprise £4.4 billion (31 March 2012 - £10.4 billion; 31 December 2011 - £11.2 billion) from mortgage repayments and £0.8 billion (31 March 2012 and 31 December 2011 - £0.8 billion) from other loan repayments held in the SPEs, to repay debt securities issued by the own-asset securitisation vehicles.

Key point

• The Group unwound a number of own-asset securitisations as part of its strategy on assets used for the Bank of England discount window facility. At 30 June 2012 the Group had £37.1 billion of pre-positioned whole loans in relation to this facility in addition to the balances above.

Balance sheet management: Liquidity and funding risk (continued)

Securitisations and asset transfers (continued)

Securities repurchase agreements

The Group enters into securities repurchase agreements and securities lending transactions (repos) under which it transfers securities in accordance with normal market practice. Generally, the agreements require additional collateral to be provided if the value of the securities falls below a predetermined level. Under standard terms for repurchase transactions in the UK and US markets, the recipient of collateral has an unrestricted right to sell or repledge it, subject to returning equivalent securities on settlement of the transaction.

Securities sold under repurchase transactions are not derecognised if the Group retains substantially all the risks and rewards of ownership. The fair value (which is equivalent to the carrying value) of securities transferred under such repurchase transactions included within securities on the balance sheet is set out below. All of these securities could be sold or repledged by the holder.

		31 March	31
	30 June	2012	December
	2012	£m	2011
Assets pledged against repos	£m		£m
Debt securities	81,871	80,010	79,480
Equity shares	5,069	3,390	6,534

Balance sheet management: Liquidity and funding risk (continued)

Conduits

The Group sponsors and administers a number of asset-backed commercial paper conduits. The liquidity commitments from the Group to each conduit exceeds the nominal amount of assets funded by a conduit as liquidity commitments are sized to cover the cost of the related assets. Refer to pages 83 to 84 of the Group's 2011 Form 20-F for more information.

The total assets and other aspects relating to the Group's consolidated conduits are set out below.

	30 June 2012			31 December 2011		
	Core	Non-Core	Total	Core Non-Core		Total
	£m	£m	£m	£m	£m	£m
Total assets held by the conduits	6,672	1,575	8,247	11,208	1,893	13,101
•	· · · · · ·	· · · · · · · · · · · · · · · · · · ·	,	,	,	·
Commercial paper issued (1)	5,361	96	5,457	10,590	859	11,449
Liquidity and credit enhancements Deal specific liquidity						
- drawn	752	1,493	2,245	321	1,051	1,372
- undrawn	9,104	366	9,470	15,324	1,144	16,468
PWCE (2)	417	155	572	795	193	988
	10,273	2,014	12,287	16,440	2,388	18,828
	0.050	1.050	11 515	15 646	2 10 4	15 0 10
Maximum exposure to loss (3)	9,856	1,859	11,715	15,646	2,194	17,840

Notes:

- (1) Includes £1.3 billion of asset backed commercial paper issued to RBS plc (31 December 2011 £0.3 billion).
- (2) Programme-wide credit enhancement (PWCE) is an additional programme-wide credit support which would absorb the first loss on transactions where liquidity support is provided by a third party.
- (3) Maximum exposure to loss quantifies the Group's exposure to its sponsored conduits. It is determined as the Group's liquidity commitment to its sponsored conduits and additional PWCE which would absorb the first loss on transactions where liquidity support is provided by third parties. Historically, PWCE has been greater than third party liquidity. Therefore the maximum exposure to loss is total deal specific liquidity.
- (4) Liquidity commitments from the Group to the conduit exceed the nominal amount of assets funded by the conduit given that liquidity commitments are sized to cover the accrued funding cost of the related assets.

Key points

- During the half year, conduit assets decreased by £4.9 billion reflecting the accelerated run-off of the portfolio in line with Group strategy
- The Group drawn liquidity increased by $\pounds 0.9$ billion to $\pounds 2.2$ billion as the rating downgrade resulted in a number of conduits being unable to issue commercial paper.

Balance sheet management: Liquidity and funding risk (continued)

Liquidity portfolio

The table below shows the composition of the Group's liquidity portfolio (at estimated liquidity value). All assets within the liquidity portfolio are unencumbered.

Total liquidity portfolio	157,465	156,001	159,702	152,723	167,309	155,330

Notes:

Includes FSA eligible government bonds of £29.7 billion (31 March 2012 - £30.5 billion; 31 December 2011 - £36.7 billion).

- (2) Includes US government guaranteed and US government sponsored agencies.
- (3) Other assets are a diversified pool of unencumbered assets that would be accepted as collateral by central banks as part of open market operations.

Key points

- The liquidity portfolio was maintained at £156 billion representing 17% of the funded balance sheet and covers short-term wholesale funding 2.5 times.
- AAA rated government and US agencies bonds held decreased by £3.3 billion in the first half of 2012, mainly in the second quarter, tracking the reducing short-term wholesale funding balances.

Balance sheet management: Liquidity and funding risk (continued)

Net stable funding ratio

The table below shows the composition of the Group's net stable funding ratio (NSFR) (this represents a non-GAAP measure as described on page 4, estimated by applying the Basel III guidance issued in December 2010. The Group's NSFR will also continue to be refined over time in line with regulatory developments and related interpretations. It may also be calculated on a basis that may differ from other financial institutions. The Group has disclosed that this information will continue to be refined over time in line with regulatory developments and may not be calculated on a basis that is consistency with other financial institutions.

Balance sheet management: Liquidity and funding risk (continued)

Net stable funding ratio (continued)

Key points

- The NSFR improved by 400 basis points in H1 2012 (Q2 2012 600 basis points) to 115%. Long-term funding decreased by £3 billion all in Q2 2012 with £5 billion (Q2 2012 £6 billion) in term wholesale funding. This was partly offset by a £3 billion net increase in customer deposits in ASF terms all in Q1 2012 and predominately in more stable deposits (Retail & Commercial increased by £8 billion).
- The funding requirement in relation to lending decreased £19 billion in H1 2012 (Q2 2012 £27 billion) reflects derisking, sales and repayments in Non-Core and capital management led loan portfolio reductions in International Banking.

Non-traded interest rate risk

Non-traded interest rate risk impacts earnings arising from the Group's banking activities. This excludes positions in financial instruments or commodities which are deemed to be held-for-trading or hedging items that are held-for-trading.

The Group provides a range of financial products to meet a variety of customer requirements. These products differ with regard to repricing frequency, tenor, indexation, prepayments, optionality and other features. When aggregated, they form portfolios of assets and liabilities with varying degrees of sensitivity to changes in market rates.

Mismatches in these sensitivities give rise to net interest income volatility as interest rates rise and fall. For example, a bank with a floating rate loan portfolio and largely fixed rate deposits will see its net interest income rise as interest rates rise and fall as rates decline.

The Group policy is to manage interest rate sensitivity in banking book portfolios within defined risk limits. Interest rate risk is transferred from the banking divisions to Group Treasury. Aggregate positions are then hedged externally using cash and derivative instruments, primarily interest rate swaps, to manage exposures within Group Asset and Liability Management Committee (GALCO) approved limits.

The Group assesses interest rate risk in the banking book (IRRBB) using a set of standards to define, measure and report the risk. These standards incorporate the expected divergence between contractual terms and the actual behaviour of fixed rate loan portfolios due to refinancing incentives and the risks associated with structural hedges of interest rate insensitive balances.

Key measures used to evaluate IRRBB are subject to approval by divisional Asset and Liability Management Committees (ALCOs) and GALCO. Limits on IRRBB are proposed by the Group Treasurer for approval by the Executive Risk Forum annually. Residual risk positions are reported on a regular basis to divisional ALCOs and monthly to the Group Balance Sheet Management Committee, GALCO, the Group Board and the Executive Risk Forum.

Balance sheet management: Non-traded interest rate risk (continued)

The Group uses a variety of approaches to quantify its interest rate risk encompassing both earnings and value metrics. IRRBB is measured using a version of the same VaR methodology that is used for the Group's trading portfolios. Net interest income exposures are measured in terms of earnings sensitivity over time against movements in interest rates.

VaR metrics are based on interest rate repricing gap reports as at the reporting date. These incorporate customer products and associated funding and hedging transactions as well as non-financial assets and liabilities such as property, equipment, capital and reserves. Behavioural assumptions are applied as appropriate.

The VaR does not provide a dynamic measurement of interest rate risk since static underlying repricing gap positions are assumed. Changes in customer behaviour under varying interest rate scenarios are captured by way of earnings risk measures.

Interest rate risk

Value-at-risk

IRRBB VaR for the Group's retail and commercial banking activities at 99% confidence level and currency analysis of period end VaR were as follows:

	Average £m	Period end £m	Maximum £m	Minimum £m
30 June 2012	56	55	65	51
31 December 2011	63	51	80	44
			30 June	31
			2012	December
			£m	2011
				£m
Euro			21	26
Sterling			43	57
US dollar			62	61
Other			4	5

Sensitivity of net interest income

Earnings sensitivity to rate movements is derived from a central forecast over a twelve month period. Market implied forward rates and new business volume, mix and pricing consistent with business assumptions are used to generate a base case earnings forecast. The rates used to calculate this forecast are then shifted up and down by 100 basis points and the earnings recalculated. New business assumptions and the behavioural maturity profile of existing business may vary under the different rate scenarios.

Risk and balance sheet management (continued)

Balance sheet management: Interest rate risk (continued)

The following table shows the sensitivity of net interest income, over the next twelve months, to an immediate upward or downward change of 100 basis points to all interest rates. In addition, the table includes the impact of a gradual 400 basis point steepening and a gradual 300 basis point flattening of the yield curve at tenors greater than a year.

30 June 2012	I	Euro £m	Sterling £m	US dollar £m	Other £m	Total £m
+ 100 basis points shift in yield curves - 100 basis points shift in yield curves Bear steepener Bull flattener		14 20	214 (273)	90 (25)	26 (36)	344 (314) 237 (161)
31 December 2011						
 + 100 basis points shift in yield curves - 100 basis points shift in yield curves Bear steepener Bull flattener 		(19) 25	190 (188)	59 (4)	14 (16)	244 (183) 443 (146)

Key points

• The Group remains slightly asset sensitive, largely as a consequence of the current low interest rate environment. An increase in rates would be positive for both deposit margins and the reinvestment of structural hedges. Conversely, falling rates would result in a further deposit margin compression and the reinvestment of structural hedges at lower levels than forecast.

• Steepening and flattening scenarios which impact the long end of the yield curve serve to emphasise the impact of reinvesting structural hedges and the extent of any customer optionality.

Structural hedges

Banks generally have the benefit of a significant pool of stable, non and low interest bearing liabilities, principally comprising equity and money transmission accounts. These balances are usually invested in longer-term fixed rate assets, either directly or by the use of interest rate swaps, in order to minimise earnings volatility and to provide a consistent and predictable revenue stream.

The Group targets a weighted average life for these economic hedges. This is accomplished using a continuous rolling maturity programme to achieve the desired profile and is primarily managed by Group Treasury.

It is estimated that this programme, encompassing both equity and product structural hedges, contributed an additional $\pounds750$ million to the Group's net interest income over the half year 2012 relative to base rate. The maturity profile of the hedge aims to reduce the potential sensitivity of income to rate movements and residual sensitivity is estimated at $\pounds50$ to $\pounds75$ million for a 100 basis point adverse movement in rates over a twelve month horizon.

Fixed rate returns on liability structural hedges are expected to decline over the next twelve months as projected market rates continue to trend below historic averages. However, the portfolio maturity profile continues to moderate this impact and the Group expects the net contribution from these hedges to remain broadly stable.

Balance sheet management: Structural foreign currency exposures

The Group does not maintain material non-trading open currency positions, other than the structural foreign currency translation exposures arising from its investments in foreign subsidiaries and associated undertakings and their related currency funding.

The table below shows the Group's structural foreign currency exposures.

	NT. 4		NT-4		Structural foreign		Residual
	Net		Net		currency		structural
	assets of		investments		exposures		foreign
	overseas	RFS	in foreign	investment p	pre-economic	Economic	currency
	operations	MI	operations	hedges	hedges	hedges (1)	exposures

US dollar	17,518	1	17,517	(2,394)	15,123	(4,014)	11,109
Euro	8,975	(1)	8,976	(831)	8,145	(2,159)	5,986
Other non-sterling	4,751	268	4,483	(3,631)	852	-	852
	31,244	268	30,976	(6,856)	24,120	(6,173)	17,947
31 December 2011							
US dollar	17,570	1	17,569	(2,049)	15,520	(4,071)	11,449
Euro	8,428	(3)	8,431	(621)	7,810	(2,236)	5,574
Other non-sterling	5,224	272	4,952		852	,	852
	31,222	270	30,952	(6,770)	24,182	(6,307)	17,875

Note:

(1) The economic hedges represents US and EU preference shares in issue that are treated as equity under IFRS and do not qualify as hedges for accounting purposes.

Key points

• The Group's structural foreign currency exposure at 30 June 2012 was £24.1 billion and £17.9 billion before and after economic hedges respectively, broadly unchanged from the end of 2011 position.

Changes in foreign currency exchange rates will affect equity in proportion to structural foreign currency exposure. A 5% strengthening in foreign currencies against sterling would result in a gain of £1.2 billion (2011 - £1.2 billion) in equity, while a 5% weakening would result in a loss of £1.1 billion (2011 - £1.2 billion) in equity.

Risk management: Credit risk

Credit risk is the risk of financial loss due to the failure of a customer to meet its obligation to settle outstanding amounts. The quantum and nature of credit risk assumed across the Group's different businesses vary considerably, while the overall credit risk outcome usually exhibits a high degree of correlation with the macroeconomic environment.

Financial assets

The table below sets out the Group's financial asset exposures by caption, both gross and net of offset and netting arrangements.

Notes:

- (1) Relates to offset arrangements that comply with IFRS criteria.
- (2) This reflects the amounts by which the Group's credit risk is reduced through arrangements such as master netting agreements and current account pooling. In addition the Group holds collateral in respect of individual loans and advances. This collateral includes mortgages over property (both personal and commercial); charges over business assets such as plant, inventories and trade debtors; and guarantees of lending from parties other than the borrower. The Group obtains collateral in the form of securities in reverse repo and derivative transactions.

Risk management: Credit risk: Financial assets (continued)

Key points

- Financial asset net exposures excluding disposal groups decreased by £52 billion or 6% to £851 billion, reflecting the Group's focus on reducing its funded balance sheet, primarily in Non-Core, Markets and International Banking.
- Reductions in lending (£24 billion), debt securities (£21 billion) and derivatives (£10 billion) were partially offset by higher seasonal settlement balances (£7 billion).
- Exposures to central and local governments decreased by £15 billion principally in debt securities. This was driven by Markets de-risking its balance sheet, management of the Group Treasury liquidity portfolio as well as overall risk reduction in respect of eurozone exposures.
- Exposure to financial institutions was £14 billion lower, across securities, loans and derivatives.
- Within lending:

UK Retail increased its lending to homeowners, including first-time buyers, whilst unsecured lending balances fell.

UK Corporate reduced its Core commercial real estate lending by £1.8 billion, contributing to the decrease in Core property and construction exposure.

Non-Core continued to make significant progress on its balance sheet strategy and lending declined across all sectors, principally property and construction, where commercial real estate lending decreased by ± 3.9 billion, reflecting repayments and asset sales.

Risk management: Credit risk: Financial assets (continued)

Sector concentration

The table below analyses balance sheet financial assets on the balance sheet by sector.

Asset quality

The following table analyses the Group's financial assets excluding debt securities and off-balance sheet exposures by internal asset quality ratings. For further details on internal asset quality ratings refer to page 130 of the Group's 2011 Form 20-F. Debt securities are analysed by external ratings and are therefore excluded from the table below and are set out on page 163.

Note:

 Excludes items in the course of collection from other banks of £1,866 million (31 December 2011 - £1,470 million).

Key points

- Overall the asset quality of the Group's exposures was broadly maintained despite the difficult external conditions in the UK and ongoing eurozone concerns.
- The high proportion of AQ1 exposures in Core included reverse repos and derivatives, most of which are transacted with investment-grade market counterparties.
- Impaired and past due assets comprise more than 30% of Non-Core balances. Continued weakness in commercial real estate market overall and difficult conditions in Ireland were significant contributors to this.

Risk management: Credit risk: Financial assets: Debt securities The table analyses debt securities by issuer and IFRS measurement classifications.
