Presentation of information

In this document and unless specified otherwise, the term ‘company’ or ‘RBSG’ means The Royal Bank of Scotland Group plc, ‘RBS’, ‘RBS Group’ or the ‘Group’ means the company and its subsidiaries, ‘the Royal Bank’ means The Royal Bank of Scotland plc and ‘NatWest’ means National Westminster Bank Plc.

The company publishes its financial statements in pounds sterling (‘£’ or ‘sterling’). The abbreviations ‘£m’ and ‘£bn’ represent millions and thousands of millions of pounds sterling, respectively, and references to ‘pence’ represent pence in the United Kingdom (‘UK’). Reference to ‘dollars’ or ‘\$’ are to United States of America (‘US’) dollars. The abbreviations ‘\$m’ and ‘\$bn’ represent millions and thousands of millions of dollars, respectively, and references to ‘cents’ represent cents in the US. The abbreviation ‘€’ represents the ‘euro’, the European single currency, and the abbreviations ‘€m’ and ‘€bn’ represent millions and thousands of millions of euros, respectively.

Certain information in this report is presented separately for domestic and foreign activities. Domestic activities primarily consist of the UK domestic transactions of the Group. Foreign activities comprise the Group's transactions conducted through those offices in the UK specifically organised to service international banking transactions and transactions conducted through offices outside the UK.

The geographic analysis in the Business Review, including the average balance sheet and interest rates, changes in net interest income and average interest rates, yields, spreads and margins in this report have been compiled on the basis of location of office - UK and overseas. Management believes that this presentation provides more useful information on the Group's yields, spreads and margins of the Group's activities than would be provided by presentation on the basis of the domestic and foreign activities analysis used elsewhere in this report as it more closely reflects the basis on which the Group is managed. ‘UK’ in this context includes domestic transactions and transactions conducted through the offices in the UK which service international banking transactions.

The results, assets and liabilities of individual business units are classified as trading or non-trading based on their predominant activity. Although this method may result in some non-trading activity being classified as trading, and vice versa, the Group believes that any resulting misclassification is not material.

International Financial Reporting Standards

As required by the Companies Act 2006 and Article 4 of the European Union IAS Regulation, the consolidated financial statements of the Group are prepared in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) and interpretations issued by the IFRS Interpretations Committee of the IASB as adopted by the European Union (together ‘IFRS’). They also comply with IFRS as issued by the IASB.

RBS Holdings N.V. (formerly ABN AMRO Holding N.V.)

In 2007, RFS Holdings B.V., which was jointly owned by the Group, the Dutch State (successor to Fortis) and Santander (together, the “Consortium Members”) completed the acquisition of ABN AMRO Holding N.V.

On 6 February 2010, the businesses of ABN AMRO Holding N.V. acquired by the Dutch State were legally demerged to a newly established company, ABN AMRO Bank N.V., which on 1 April 2010 was transferred to ABN AMRO Group N.V., itself owned by the Dutch State. Following legal separation, RBS Holdings N.V. (formerly ABN AMRO Holding N.V.) has one operating subsidiary, The Royal Bank of Scotland N.V. (“RBS N.V.”), a fully operational bank within the Group. RBS N.V. is independently rated and regulated by the Dutch Central Bank. Certain assets within RBS N.V. continue to be shared by the Consortium Members.

On 19 April 2011, the Group announced the proposed transfers of a substantial part of the business activities of RBS N.V. to the Royal Bank. Subject to, among other matters, regulatory and other approvals and procedures, it is expected that the transfers will be implemented on a phased basis over a period ending 31 December 2013. A large part of the transfers is expected to have taken place by the end of 2012.

On 17 October 2011, the Group completed the transfer of a substantial part of the UK activities of RBS N.V. to the Royal Bank pursuant to Part VII of the UK Financial Services and Markets Act 2000.

Approximately 98% of the issued share capital of RFS Holdings B.V. is held by the Group.

Non-GAAP financial information

The directors manage the Group's performance by class of business, before certain reconciling items, as is presented in the segmental analysis on pages 371 to 375 (the "managed basis"). Discussion of the Group's performance focuses on the managed basis as the Group believes that such measures allow a more meaningful analysis of the Group's financial condition and the results of its operations. These measures are non-GAAP financial measures. A body of generally accepted accounting principles such as IFRS is commonly referred to as 'GAAP'. A non-GAAP financial measure is defined as one that measures historical or future financial performance, financial position or cash flows but which excludes or includes amounts that would not be so adjusted in the most comparable GAAP measure. Reconciliations of these non-GAAP measures are presented throughout this document or in the segmental analysis on pages 371 to 375. These non-GAAP financial measures are not a substitute for GAAP measures. Furthermore, RBS has divided its operations into "Core" and "Non- Core". Certain measures disclosed in this document for Core operations and used by RBS management are non-GAAP financial measures as they represent a combination of all reportable segments with the exception of Non-Core. In addition, RBS has further divided parts of the Core business into "Retail & Commercial" consisting of the UK Retail, UK Corporate, Wealth, International Banking, Ulster Bank and US Retail & Commercial divisions. This is a non-GAAP financial measure. Lastly, the Basel III net stable funding ratio (see page 81) represents a non-GAAP financial measure given it is a metric that is not yet required to be disclosed by a government, governmental authority or self-regulatory organisation.

Glossary

A glossary of terms is provided on pages 440 to 447.

Forward-looking statements

Certain sections in this document contain 'forward-looking statements' as that term is defined in the United States Private Securities Litigation Reform Act of 1995, such as statements that include the words 'expect', 'estimate', 'project', 'anticipate', 'believes', 'should', 'intend', 'plan', 'could', 'probability', 'risk', 'Value-at-Risk (VaR)', 'target', 'goal', 'objective', 'endeavour', 'outlook', 'optimistic', 'prospects' and similar expressions or variations on such expressions.

In particular, this document includes forward-looking statements relating, but not limited to: the Group's restructuring plans, divestments, capitalisation, portfolios, net interest margin, capital ratios, liquidity, risk weighted assets (RWAs), return on equity (ROE), profitability, cost:income ratios, leverage and loan:deposit ratios, funding and risk profile; certain ring-fencing proposals; sustainability targets; the Group's future financial performance; the level and extent of future impairments and write-downs, including sovereign debt impairments; the protection provided by the Asset Protection Scheme (APS); and the Group's potential exposures to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity and equity price risk. These statements are based on current plans, estimates and projections, and are subject to inherent risks, uncertainties and other factors which could cause actual results to differ materially from the future results expressed or implied by such forward-looking statements. For example, certain market risk disclosures are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and, as a result, actual future gains and losses could differ materially from those that have been estimated.

Other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this document include, but are not limited to: the global economic and financial market conditions and other geopolitical risks, and their impact on the financial industry in general and on the Group in particular; the ability to access sufficient sources of liquidity and funding; the recommendations made by the Independent Commission on Banking (ICB) and their potential implications; the ability to implement strategic plans on a timely basis, or at all, including the disposal of certain Non-Core assets and assets and businesses required as part of the State Aid restructuring plan; organisational restructuring, including any adverse consequences of a failure to transfer, or delay in transferring, certain business assets and liabilities from RBS N.V. to RBS; the full nationalisation of the Group or other resolution procedures under the Banking Act 2009; deteriorations in borrower and counterparty credit quality; costs or exposures borne by the Group arising out of the origination or sale of mortgages or mortgage-backed securities in the United States; the extent of future write-downs and impairment charges caused by depressed asset valuations; the value and effectiveness of any credit protection purchased by the Group; unanticipated turbulence in interest rates, yield curves, foreign currency exchange rates, credit spreads, bond prices, commodity prices, equity prices and basis, volatility and correlation risks; changes in the credit ratings of the Group; ineffective management of capital or changes to capital adequacy or liquidity requirements; litigation and regulatory investigations; changes to the valuation of financial instruments recorded at fair value; competition and consolidation in the banking sector; the ability of the Group to attract or retain senior management or other key employees; regulatory or legal changes (including those requiring any restructuring of the Group's operations) in the United Kingdom, the United States and other countries in which the Group operates or a change in United Kingdom Government policy; changes to regulatory requirements relating to capital and liquidity; changes to the monetary and interest rate policies of central banks and other governmental and regulatory bodies; changes in UK and foreign laws, regulations, accounting standards and taxes, including changes in regulatory capital regulations and liquidity requirements; impairments of goodwill; pension fund shortfalls; general operational risks; HM Treasury exercising influence over the operations of the Group; insurance claims; reputational risk; the ability to access the contingent capital arrangements with HM Treasury; the participation of the Group in the APS and the effect of the APS on the Group's financial and capital position; the conversion of the B Shares in accordance with their terms; limitations on, or additional requirements imposed on, the Group's activities as a result of HM Treasury's investment in the Group; and the success of the Group in managing the risks involved in the foregoing.

The forward-looking statements contained in this document speak only as of the date of this announcement, and the Group does not undertake to update any forward-looking statement to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

The information, statements and opinions contained in this document do not constitute a public offer under any applicable legislation or an offer to sell or solicitation of any offer to buy any securities or financial instruments or any advice or recommendation with respect to such securities or other financial instruments.

Explanatory note

Divisional reorganisation and Group reporting changes

The company is filing this Form 6-K to restate certain segmental disclosures that were made in the company's annual report on Form 20-F for the year ended 31 December 2011, filed with the Securities and Exchange Commission on 27 March 2012 (the "2011 Form 20-F") to reflect the Group's new organisational structure, the revised allocation of Group Treasury costs, and the revised divisional return on equity ratios, and to combine movements in the fair value of own derivative liabilities, previously incorporated within Markets' operating performance, with changes in the fair value of own debt, in a single measure Own Credit Adjustments.

The Group presented segmental disclosures that reflect the new organisational structure in its interim results for the half year ended 30 June 2012, which were filed with the Securities and Exchange Commission on a separate Form 6-K on 8 August 2012. To facilitate comparison with these interim results, the segmental disclosures in the 2011 Form 20-F have been restated in this Form 6-K.

Consolidating financial information

As a result of filing this Form 6-K, the Group has presented a statement of comprehensive income within the consolidating financial information note, for all applicable periods.

Share consolidation

Following approval at the Annual General Meeting of the Company held on 30 May 2012, an ordinary share sub-division and one-for-ten consolidation took effect on 6 June 2012. This resulted in the 59,554,319,127 ordinary shares of 25p each, in issue at the record date of 1 June 2012, being sub-divided and consolidated into 5,955,431,912 ordinary shares of £1 each. Consequently, the Group has also restated in this Form 6-K certain disclosures relating to or impacted by numbers of ordinary shares or share prices.

The Group presented disclosures that reflect the changes discussed above in its interim results, which were filed with the Securities and Exchange Commission on a separate Form 6-K on 8 August 2012. To facilitate comparison with these interim results, the disclosures included in the 2011 Form 20-F have been restated in this Form 6-K.

Accordingly, the following pages that correspond to the 2011 Form 20-F have been restated to reflect the amendments identified above.

3b

Description of business

Introduction

The Royal Bank of Scotland Group plc is the holding company of a large global banking and financial services group. Headquartered in Edinburgh, the Group operates in the United Kingdom, the United States and internationally through its principal subsidiaries, the Royal Bank and NatWest. Both the Royal Bank and NatWest are major UK clearing banks. In the United States, the Group's subsidiary Citizens is a large commercial banking organisation. Globally, the Group has a diversified customer base and provides a wide range of products and services to personal, commercial and large corporate and institutional customers.

Following the placing and open offers in December 2008 and in April 2009, HM Treasury owned approximately 70.3% of the enlarged ordinary share capital of the company. In December 2009, the company issued a further £25.5 billion of new capital to HM Treasury. This new capital took the form of B shares, which do not generally carry voting rights at general meetings of ordinary shareholders but are convertible into ordinary shares and qualify as Core Tier 1 capital. Following the issuance of the B shares, HM Treasury's holding of ordinary shares of the company remained at 70.3% although its economic interest rose to 84.4%.

At 31 December 2011, HM Treasury's holding in the company's ordinary shares was 66.9% and its economic interest was 82.2%.

The Group had total assets of £1,506.9 billion and owners' equity of £74.8 billion at 31 December 2011. The Group's risk asset ratios at 31 December 2011, were a Total capital ratio of 13.8%, a Core Tier 1 capital ratio of 10.6% and a Tier 1 capital ratio of 13.0%.

Organisational change

In January 2012, the Group announced changes to its wholesale banking operations in light of a changed market and regulatory environment. The changes saw the reorganisation of the Group's wholesale businesses into 'Markets' and 'International Banking' and the exit and downsizing of selected activities. The changes ensure the wholesale businesses continue to deliver against the Group's strategy.

The changes include an exit from cash equities, corporate brokering, equity capital markets and mergers and acquisitions businesses. Significant reductions in balance sheet, funding requirements and cost base in the remaining wholesale businesses will be implemented.

GBM and GTS divisions have been reorganised as follows:

- The 'Markets' business maintains its focus on fixed income, with strong positions in debt capital raising, securitisation, risk management, foreign exchange and rates. It will serve the corporate and institutional clients of all Group businesses.
- GBM's corporate banking business has been combined with the international businesses of the GTS arm into a new 'International Banking' unit and provides clients with a 'one-stop shop' access to the Group's debt financing, risk management and payments services. This international corporate business will be self-funded through its stable corporate deposit base.
- The domestic small and mid-size corporates previously served within GTS is now managed within RBS's domestic corporate banking businesses in the UK, Ireland (Ulster Bank) and the US (US Retail & Commercial).

Our wholesale business retains its international footprint ensuring that it can serve our customers' needs globally. We believe, that despite current challenges to the sector, wholesale banking services can play a central role in supporting

cross border trade and capital flows, financing requirements and risk management and we remain committed to this business.

Organisational structure and business overview

The Group's activities are organised on a divisional basis as follows:

UK Retail offers a comprehensive range of banking products and related financial services to the personal market. It serves customers through a number of channels including: the RBS and NatWest network of branches and ATMs in the United Kingdom, telephony, online and mobile. UK Retail remains committed to delivering 'Helpful and Sustainable' banking and to the commitments set out in its Customer Charter - the results of which are externally assessed and published every six months.

UK Corporate is a leading provider of banking, finance and risk management services to the corporate and SME sector in the United Kingdom. It offers a full range of banking products and related financial services through a nationwide network of relationship managers, and also through telephone and internet channels. The product range includes asset finance through the Lombard brand.

Wealth provides private banking and investment services in the UK through Coutts & Co and Adam & Company, offshore banking through RBS International, NatWest Offshore and Isle of Man Bank, and international private banking through Coutts & Co Ltd.

International Banking serves the world's largest companies with a leading client proposition focused on financing, transaction services and risk management. International Banking serves as the delivery channel for Markets products to corporate clients and serves international subsidiaries of both International Banking and clients from UK Corporate, Ulster Bank and US Retail & Commercial through its international network.

Ulster Bank is a leading retail and commercial bank in Northern Ireland and the Republic of Ireland. It provides a comprehensive range of financial services through both its Retail Banking division, which has a network of branches and operates in the personal and bancassurance sectors, and its Corporate Banking division, which provides services to business customers, corporate customers and institutional markets.

Business review [continued](#)

US Retail & Commercial provides financial services primarily through the Citizens and Charter One brands. US Retail & Commercial is engaged in retail and corporate banking activities through its branch network in 12 states in the United States and through non-branch offices in other states.

The divisions discussed above are collectively referred to as Retail & Commercial.

Markets is a leading origination, sales and trading business across debt finance, fixed income, currencies, investor products and equity derivatives. The division offers a unified service to the Group's corporate and institutional clients. The Markets' sales and research teams build strong ongoing client partnerships, provide market perspective and access, and work with the division's trading and structuring teams to meet the client's objectives across financing, risk management, investment, securitisation and liquidity.

Direct Line Group provides a wide range of general insurance products to consumers through a number of well known brands including; Direct Line, Churchill and Privilege. It also provides insurance services via a number of partner brands. In the commercial sector, its NIG and Direct Line for Business operations provide insurance products for businesses via brokers or direct respectively. Through its international division, Direct Line Group sells general insurance, mainly motor, in Germany and Italy. In addition to insurance services, Direct Line Group continues to provide support and reinsurance to millions of UK motorists through its Green Flag breakdown recovery service and stolen vehicle recovery and telematics business (Tracker). On 15 February 2012, a new corporate brand, Direct Line Group, was announced.

To comply with EC State Aid requirements, the Group has agreed to dispose of Direct Line Group. It continues to be reported as a separate operating segment rather than within the Non-Core division as its business is distinct from the activities of the Non-Core division.

Central Functions comprises Group and corporate functions, such as treasury, funding and finance, risk management, legal, communications and human resources. The Centre manages the Group's capital resources and Group-wide regulatory projects and provides services to the operating divisions.

Non-Core division manages separately assets that the Group intends to run off or dispose of. The division contains a range of businesses and asset portfolios primarily from the legacy GBM businesses, higher risk profile asset portfolios including excess risk concentrations, and other illiquid portfolios. It also includes a number of other portfolios and businesses including regional markets businesses that the Group has concluded are no longer strategic.

Business Services supports the customer-facing businesses and provides operational technology, customer support in telephony, account management, lending and money transmission, global purchasing, property and other services. Business Services drives efficiencies and supports income growth across multiple brands and channels by using a single, scalable platform and common processes wherever possible. It also leverages the Group's purchasing power and is the Group's centre of excellence for managing large-scale and complex change. For reporting purposes, Business Services costs are allocated to the divisions above. It is not deemed a reportable segment.

Business divestments

To comply with EC State Aid requirements the Group agreed a series of restructuring measures to be implemented over a four year period from December 2009. This supplements the measures in the Strategic Plan previously announced by the Group. These include divesting Direct Line Group, 80.01% of GMS (completed in 2010) and substantially all of RBS Sempra Commodities JV business (largely completed in 2010), as well as divesting the RBS branch-based business in England and Wales and the NatWest branches in Scotland, along with the Direct SME customers across the UK.

Recent developments

Share consolidation

Following approval at the Group's Annual General Meeting on 30 May 2012, the sub-division and consolidation of the Group's ordinary shares on a one-for-ten basis took effect on 6 June 2012. There was a corresponding change in the Group's share price to reflect this.

The Board believes that the consolidation will result in a more appropriate share price for a company of the Group's size in the UK market. It may also help reduce volatility, thereby enabling a more consistent valuation of the Group.

Liability management: Exchange offer

On 28 February 2012, The Royal Bank of Scotland plc announced an invitation to offer to exchange certain Canadian Dollar, Australian Dollar, US Dollar, Euro and Swiss Franc denominated subordinated notes for new Canadian Dollar, Australian Dollar, US Dollar, Euro and Swiss Franc denominated subordinated notes, due 2022 and callable 2017. The new notes, other than the Australian Dollar denominated new notes, were issued on 16 March 2012, and the Australian Dollar denominated new notes were issued on 19 March 2012, in each case under the £90,000,000,000 Euro Medium Term Note Programme of The Royal Bank of Scotland plc and The Royal Bank of Scotland Group plc.

Business review [continued](#)

National Loan Guarantee Scheme

On 20 March 2012, RBS agreed to participate in the National Loan Guarantee Scheme (the Scheme), pursuant to which The Commissioners of Her Majesty's Treasury (HM Treasury) have agreed to unconditionally and irrevocably guarantee the due payment of all sums due and payable by RBS under any senior unsecured notes issued by RBS in accordance with the terms of the Scheme in respect of which HM Treasury issues a Guarantee Certificate (as defined in a deed of guarantee dated 20 March 2012 (the "Deed of Guarantee")). The Guarantor's obligations in that respect, are contained in the Deed of Guarantee, the form of which is available at www.dmo.gov.uk.

2012 Budget

In the Budget statement on 21 March 2012, the Chancellor of the Exchequer announced a further reduction of 1% in the rate of corporation tax such that the rate will fall by 2% from 26% to 24% in April 2012, to 23% in April 2013 and to 22% in April 2014. It was also announced in the Budget statement that the full rate of the bank levy will increase to 0.105 per cent. from 1 January 2013.

Competition

The Group faces strong competition in all the markets it serves. Banks' balance sheets have strengthened whilst loan demand has been subdued as many customers have sought to delever and the UK economy has remained weak. Competition for retail deposits remains intense as institutions continue to target strong and diverse funding platforms for their balance sheets.

Competition for corporate and institutional customers in the UK is from UK banks and from large foreign financial institutions who are also active and offer combined investment and commercial banking capabilities. In asset finance, the Group competes with banks and specialist asset finance providers, both captive and non-captive. In European and Asian corporate and institutional banking markets the Group competes with the large domestic banks active in these markets and with the major international banks.

In the small business banking market, the Group competes with other UK clearing banks, specialist finance providers and building societies.

In the personal banking segment, the Group competes with UK clearing banks and building societies, major retailers and life assurance companies. In the mortgage market, the Group competes with UK clearing banks and building societies. The ambitions of non-traditional players in the UK market remain strong, with new entrants active and potentially seeking to build their platforms by acquiring businesses made available through restructuring of incumbents. The Group distributes life assurance products to banking customers in competition with independent advisors and life assurance companies.

In the UK credit card market large retailers and specialist card issuers are active in addition to the UK banks. In addition to physical distribution channels, providers compete through direct marketing activity and the internet.

In Wealth Management, The Royal Bank of Scotland International competes with other UK and international banks to offer offshore banking services. Coutts and Adam & Company compete as private banks with UK clearing and private banks, and with international private banks. Competition in wealth management remains strong as banks maintain their focus on competing for affluent and high net worth customers.

Direct Line Group competes in personal lines insurance and, to a more limited extent, in commercial insurance. There is strong competition from a range of insurance companies which now operate telephone and internet direct sales businesses. Competition in the UK motor market remains intense, and price comparison internet sites now play a major role in the marketplace. These sites are now extending their scope to home insurance and other lines. Direct

Line Group also competes with local insurance companies in the direct motor insurance markets in Italy and Germany.

In Ireland, Ulster Bank competes in retail and commercial banking with the major Irish banks and building societies, and with other UK and international banks and building societies active in the market. The challenging conditions in the Irish economy persist and many of the domestic Irish banks have required State support and are engaged in significant restructuring actions.

In the United States, Citizens competes in the New England, Mid-Atlantic and Mid-West retail and mid-corporate banking markets with local and regional banks and other financial institutions. The Group also competes in the US in large corporate lending and specialised finance markets, and in fixed-income trading and sales. Competition is principally with the large US commercial and investment banks and international banks active in the US. The economic recovery in the US is proving weaker than expected and loan demand is weak in Citizens' markets.

Risk factors

Set out below is a summary of certain risks which could adversely affect the Group; it should be read in conjunction with the Risk and balance sheet management section of the Business review (pages 58 to 207). This summary should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties. A fuller description of these and other risk factors is included on pages 405 to 418.

- The Group's businesses, earnings and financial condition have been and will continue to be affected by geopolitical conditions, the global economy, the instability in the global financial markets and increased competition. Together with a perceived increased risk of default on the sovereign debt of certain European countries and unprecedented stresses on the financial system within the eurozone, these factors have resulted in significant changes in market conditions including interest rates, foreign exchange rates, credit spreads, and other market factors and consequent changes in asset valuations.
- The Group's ability to meet its obligations' including its funding commitments, depends on the Group's ability to access sources of liquidity and funding. The inability to access liquidity and funding due to market conditions or otherwise could adversely affect the Group's financial condition. Furthermore, the Group's borrowing costs and its access to the debt capital markets and other sources of liquidity depend significantly on its and the UK Government's credit ratings.
- The Independent Commission on Banking has published its final report on competition and possible structural reforms in the UK banking industry. The Government has indicated that it supports and intends to implement the recommendations substantially as proposed which could have a material adverse effect on the Group.
- The Group's ability to implement its Strategic Plan depends on the success of its efforts to refocus on its core strengths and its balance sheet reduction programme. As part of the Group's Strategic Plan and implementation of the State Aid restructuring plan agreed with the European Commission and HM Treasury, the Group is undertaking an extensive restructuring which may adversely affect the Group's business, results of operations and financial condition and give rise to increased operational risk and may impair the Group's ability to raise new Tier 1 capital due to restrictions on its ability to make discretionary dividend or coupon payments on certain securities.
- The occurrence of a delay in the implementation of (or any failure to implement) the approved proposed transfers of a substantial part of the business activities of RBS N.V. to the Royal Bank may have a material adverse effect on the Group.
- The Group or any of its UK bank subsidiaries may face the risk of full nationalisation or other resolution procedures and various actions could be taken by or on behalf of the UK Government, including actions in relation to any securities issued, new or existing contractual arrangements and transfers of part or all of the Group's businesses.
- The actual or perceived failure or worsening credit of the Group's counterparties or borrowers and depressed asset valuations resulting from poor market conditions have adversely affected and could continue to adversely affect the Group.
- The value of certain financial instruments recorded at fair value is determined using financial models incorporating assumptions, judgements and estimates that may change over time or may ultimately not turn out to be accurate.
 - The Group's insurance businesses are subject to inherent risks involving claims on insured events.
- The Group's business performance, financial condition and capital and liquidity ratios could be adversely affected if its capital is not managed effectively or as a result of changes to capital adequacy and liquidity requirements,

including those arising out of Basel III implementation (globally or by European or UK authorities), or if the Group is unable to issue Contingent B Shares to HM Treasury under certain circumstances.

- The Group could fail to attract or retain senior management, which may include members of the Group Board, or other key employees, and it may suffer if it does not maintain good employee relations.
- Any significant developments in regulatory or tax legislation could have an effect on how the Group conducts its business and on its results of operations and financial condition, and the recoverability of certain deferred tax assets recognised by the Group is subject to uncertainty.
- The Group is subject to substantial regulation and oversight, and any significant regulatory or legal developments could have an adverse effect on how the Group conducts its business and on its results of operations and financial condition. In addition, the Group is, and may be, subject to litigation and regulatory investigations that may impact its business, results of operations and financial condition.
 - Operational and reputational risks are inherent in the Group's operations.
- The Group may be required to make contributions to its pension schemes and government compensation schemes, either of which may have an adverse impact on the Group's results of operations, cash flow and financial condition.
- As a result of the UK Government's majority shareholding in the Group it can, and in the future may decide to, exercise a significant degree of influence over the Group including on dividend policy, modifying or cancelling contracts or limiting the Group's operations. The offer or sale by the UK Government of all or a portion of its shareholding in the company could affect the market price of the equity shares and other securities and acquisitions of ordinary shares by the UK Government (including through conversions of other securities or further purchases of shares) may result in the delisting of the Group from the Official List.

Overview of results

The results of RFS Holdings B.V., the entity that acquired ABN AMRO, are fully consolidated in the Group's financial statements. The interests of the State of the Netherlands and Santander in RFS Holdings are included in non-controlling interests. Legal separation of ABN AMRO Bank N.V. took place on 1 April 2010. As a result, RBS presents the interests of the Consortium Members in ABN AMRO as discontinued operations.

Results summary

2011 compared with 2010

Operating profit

Group operating loss before tax for the year was £766 million compared with £399 million in 2010. Group operating profit on a managed basis was £1,824 million compared with £1,845 million in 2010. Adjusting for the impact of the disposal of GMS in 2010, which recorded an operating profit of £207 million, Group operating profit on a managed basis was up 11%. The improvement was driven by a strong Retail & Commercial (R&C) operating performance and the return to profit of Direct Line Group. Ulster Bank and Markets faced more difficult conditions, leaving total Core operating profit on a managed basis at £6,045 million. Non-Core operating loss in 2011 was 26% lower compared with 2010, despite the acceleration of disposals in the second half of the year.

Total income

Total income fell by 9% to £28,937 million, primarily reflecting lower net interest income, lower trading income in Markets and Non-Core and a fall in insurance net premium income.

Net interest income

Group net interest income fell 11% to £12,679 million largely driven by the run-off of balances and exit of higher margin and higher risk segments in Non-Core. Group NIM was 14 basis points lower, reflecting the cost of carrying a higher liquidity portfolio and by the impact of non-performing assets in the Non-Core division. However, R&C NIM

was up 6 basis points, with strengthening asset margins in the first half of the year offsetting the impact of a competitive deposit market.

Non-interest income

Non-interest income decreased to £16,258 million from £17,659 million in 2010. This included movements in the fair value of the Asset Protection Scheme resulting in a £906 million charge (2010 - £1,550 million), gain on redemption of own debt of £255 million (2010 - £553 million) and a gain in own credit adjustments of £1,914 million (2010 - £242 million gain). Excluding these items, non-interest income was down 19% primarily reflecting a reduction in income from trading activities and lower net fees and commissions.

Business review [continued](#)

Operating expenses

Operating expenses decreased to £18,026 million (2010 - £18,228 million). Operating expenses on a managed basis fell to £15,478 million from £16,710 million in 2010.

This decrease was primarily driven by cost savings achieved as a result of the cost reduction programme and Non-Core run-off, largely reflecting the disposal of RBS Sempra and specific country exits. Staff costs fell 9%, driven by lower Markets and International Banking variable compensation as a result of its decrease in revenues, and in Non-Core, given the impact of a 32% reduction in headcount and continued business disposals and country exits.

The Group cost:income ratio was 62% in 2011 compared with 57% in 2010.

Net insurance claims

Bancassurance and general insurance claims, after reinsurance, reduced by 38% to £2,968 million.

General insurance claims were £1,730 million lower, mainly due to the non-repeat of bodily injury reserve strengthening in 2010, de-risking of the motor book, more benign weather in 2011 and claims in Non-Core decreasing as legacy policies ran-off.

Impairment losses

Impairment losses were £8,709 million compared with £9,256 million in 2010, with Core loan impairments falling by £260 million and Non-Core by £1,557 million, despite continuing challenges in Ulster Bank and corporate real estate portfolios, partially offset by an impairment of £1,099 million and interest rate hedge adjustments on impaired available-for-sale Greek government bonds of £169 million.

Risk elements in lending represented 8.6% of gross loans and advances to customers excluding reverse repos at 31 December 2011 (2010 - 7.3%).

Provision coverage of risk elements in lending was 49% (2010 - 47%).

Tax

The tax charge was £1,250 million in 2011, compared with £634 million in 2010. The high tax charge in the year reflects profits in high tax regimes (principally US) and losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland and the Netherlands) and the effect of the two reductions of 1% in the rate of UK corporation tax enacted in March 2011 and July 2011 on the net deferred tax balance.

Earnings

Basic loss per ordinary and B share from continuing operations increased from a loss of 4.5p to a loss of 18.5p.

Business review [continued](#)

Results summary continued
2010 compared with 2009

Operating loss

Operating loss before tax for the year was £399 million compared with a loss of £2,647 million in 2009. The improvement in performance is primarily driven by stronger Core Retail & Commercial operating profits offsetting more normal results from Markets, coupled with lower impairments in the Non-Core division.

After tax, non-controlling interests and preference share and other dividends, the loss attributable to ordinary and B shareholders was £1,125 million, compared with an attributable loss of £3,607 million in 2009.

Total income

Total income decreased 4% to £31,868 million in 2010 reflecting the return to more normal levels in Markets compared with the favourable market conditions seen in 2009. This was offset by good growth in Core Retail & Commercial and the improvement in Non-Core.

Net interest income

Net interest income increased by 6% to £14,209 million, reflecting improvements in net interest margin which more than offset lower interest-earning assets and interest-bearing liabilities. Group net interest margin increased from 1.83% to 2.06% largely reflecting expanding asset margins in UK Retail and UK Corporate divisions as well as in US Retail & Commercial. The run-off of low-yielding Non-Core assets also contributed to this increase. The Group net interest margin was also affected by increased funding costs.

Non-interest income

Non-interest income decreased to £17,659 million from £19,638 million in 2009. This included movements in the fair value of the Asset Protection Scheme - credit default swap resulting in a £1,550 million charge and gain on redemption of own debt of £553 million (2009 - £3,790 million). Excluding these items, non-interest income was up 18% primarily reflecting an increase in income from trading activities.

Operating expenses

Operating expenses increased to £18,228 million (2009 - £17,417 million). The main driver of this 5% increase was the impact of a £2,148 million gains on pension curtailment in 2009. This was partially offset by gains on the recognition of benefits from the Group-wide efficiency programme. The programme continues to deliver material savings which have been funding investments to strengthen our Core franchises. Annualised savings are now just ahead of the £2.5 billion target for 2011 and are forecast to exceed £3 billion by 2013. Integration and restructuring costs were £1,032 million compared with £1,286 million in 2009. Write-down of goodwill and other intangible assets was £10 million compared with £363 million in 2009. Premises and equipment costs fell by 7% in the year largely driven by efficiency cost savings, significant one-off property impairments recognised in 2009 and country exits following Non-Core disposals.

Net insurance claims

Bancassurance and general insurance claims, after reinsurance, increased by 10% to £4,783 million.

Impairment losses

Impairment losses were £9,256 million compared with £13,899 million in 2009, with Core impairments falling by £898 million and Non-Core by £3,745 million. The decrease reflects an overall improvement in the economic environment. Impairments fell in all businesses, except Ulster Bank, which has faced an economic environment that remains challenging.

Risk elements in lending and potential problem loans represented 7.4% of gross loans and advances to customers excluding reverse repos at 31 December 2010 (2009 - 5.5%).

Provision coverage of risk elements in lending and potential problem loans was 46% (2009 - 45%).

Tax

The Group recorded a tax charge of £634 million in 2010, compared with a tax credit of £429 million in 2009.

Earnings

Basic loss per ordinary and B share from continuing operations improved from a loss of 63.1p to a loss of 4.5p.

Analysis of change in net interest income - volume and rate analysis

Volume and rate variances have been calculated based on movements in average balances over the period and changes in interest rates on average interest-earning assets and average interest-bearing liabilities. Changes due to a combination of volume and rate are allocated pro rata to volume and rate movements.

	2011 over 2010

Total non-interest income	16,258	17,659	19,638

2011 compared with 2010

Non-interest income decreased by £1,401 million in 2011 principally driven by lower trading income in Markets and Non-Core and a fall in insurance net premium income, partially offset by a higher gain on movements in own credit adjustments.

Volatile market conditions led to a reduction in Markets trading income, driven by the deterioration in global credit markets as sovereign difficulties in the eurozone grew.

Non-Core trading losses increased by £704 million, reflecting costs incurred as part of the division's focus on reducing capital trading assets, with activity including the restructuring of monoline exposures, which mitigated both significant immediate and future regulatory uplifts in risk-weighted assets.

A gain in own credit adjustments of £1,914 million was recorded as a result of Group credit spreads widening, partially offset by the 2011 charges. This compares with a smaller gain of £242 million in 2010.

Insurance net premium income fell by 17% largely driven by Direct Line Group's exit from certain business segments, along with reduced volumes driven by the de-risking of the motor book. Insurance net premium income in Non-Core also decreased as legacy policies ran-off.

2010 results included £482 million of income recorded for GMS prior to its disposal in November 2010.

2010 compared with 2009

Net fees and commissions increased by £34 million to £5,982 million primarily due to improved performance in Markets (£173 million), driven by higher portfolio management and origination income, and UK Corporate (£123 million), principally reflecting strong refinancing levels and increased operating lease activity. This increase was partially offset by reduced fees in UK Retail (£160 million) and Ulster Bank (£73 million) principally reflecting the restructuring of current account overdraft fees.

Income from trading activities, excluding fair value movements in the Asset Protection Scheme, rose substantially during the year by £2,306 million to £6,067 million. Trading revenues in Markets were lower than 2009, which saw

unusually buoyant market conditions as rapidly falling interest rates generated significant revenue opportunities. This was more than offset by the improvement in Non-Core trading losses from £5,122 million for 2009 to £16 million for 2010 as underlying asset prices recovered and monoline spreads tightened. The unwinding of some banking book hedges also helped reduce trading losses.

The Asset Protection Scheme is accounted for as a credit derivative, and movements in the fair value of the contract are recorded as income from trading activities. The charge of £1,550 million in 2010 reflects improving credit spreads on the portfolio of covered assets.

A gain of £553 million was booked associated with the liability management exercise undertaken in May 2010, through which the Group strengthened its Core Tier 1 capital base by repurchasing existing Tier 1 securities and exchanging selected existing Upper Tier 2 securities for new senior debt securities. A similar series of exchange and tender offers concluded in April 2009 resulted in a gain of £3,790 million.

Other operating income increased by £606 million to £1,479 million. This improvement principally reflected a profit on sale of securities of £496 million compared with £162 million in 2009, higher profits from associated entities and an increased credit of £249 million compared with £51 million in 2009 relating to movements in own credit adjustments. These were partially offset by losses in the fair value of securities and investment properties.

Insurance net premium income fell by £138 million to £5,128 million principally reflecting lower general insurance premiums, driven by a managed reduction in the risk of the UK motor book, largely offset by price increases.

Insurance net claims	2,968	4,783	4,357
Staff costs as a percentage of total income	30%	30%	30%

2011 compared with 2010

Group operating expenses fell by 1% in 2011, driven by cost savings achieved as a result of the cost reduction programme and Non-Core run-off, largely reflecting the disposal of RBS Sempra and specific country exits, partially offset by Payment Protection Insurance costs.

Staff costs fell 10%, driven by lower Markets and International Banking discretionary compensation as a result of its decrease in revenues, and in Non-Core, given the impact of a 32% reduction in headcount and continued business disposals and country exits.

In May 2011, following the decision of the British Bankers' Association not to appeal the judgement of the judicial review, the Group recorded a provision of £850 million in respect of the costs of Payment Protection Insurance redress.

General insurance claims were £1,730 million lower, mainly due to the non-repeat of bodily injury reserve strengthening in 2010, de-risking of the motor book, more benign weather in 2011 and claims in Non-Core decreasing as legacy policies ran-off.

The Group's cost reduction programme delivered cost savings with an underlying run rate of over £3 billion by the end of 2011.

Business review [continued](#)Operating expenses and insurance claims continued
2010 compared with 2009

The main driver of a 7% decrease in operating expenses, excluding gains on pensions curtailment of £2,148 million, is the recognition of benefits from the Group-wide efficiency programme. The programme continues to deliver material savings which have been funding investments to strengthen our Core franchises. Annualised savings are now just ahead of the £2.5 billion target for 2011 and are forecast to exceed £3 billion by 2013.

Staff costs, excluding pension schemes curtailment gains, fell by £322 million to £9,671 million, driven by savings in Markets, UK Retail, International Banking and Non-Core partially offset by higher costs in Group Centre.

Premises and equipment costs fell by 7% in the year to £2,402 million largely driven by efficiency cost savings, significant one-off property impairments recognised in 2009 and country exits following Non-Core disposals.

Other administrative expenses fell by £454 million to £3,995 million principally reflecting continued savings from the Group's efficiency programme.

Insurance net claims increased 10% to £4,783 million.

Integration costs

	2011	2010	2009
	£m	£m	£m
Staff costs	38	210	365
Premises and equipment	6	3	78
Other administrative expenses	51	143	398
Depreciation and amortisation	11	20	18
	106	376	859

Note:

(1) Integration costs for 2011 above exclude £2 million charge included within net interest income and a loss of £3 million within other operating income in respect of integration activities.

2011 compared with 2010

Integration costs were £106 million compared with £376 million in 2010. Integration costs decreased primarily due to a reduction of RBS N.V. (formerly ABN AMRO) integration activity during the year.

2010 compared with 2009

Integration costs were £376 million compared with £859 million in 2009. The fall in integration costs primarily relates to RBS N.V., as they migrate onto RBS systems.

Accruals in relation to integration costs are set out below.

	At 1 January 2011 £m	Charge to income statement £m	Utilised during the year £m	At 31 December 2011 £m

Impairment losses

	2011	2010	2009
	£m	£m	£m
New impairment losses	9,236	9,667	14,224
Less: recoveries of amounts previously written-off	(527)	(411)	(325)
Charge to income statement	8,709	9,256	13,899
Comprising:			
Loan impairment losses	7,241	9,144	13,090
Securities			
- managed basis	200	112	809
- sovereign debt impairment	1,099	—	—
- interest rate hedge adjustments on impaired available-for-sale sovereign debt	169	—	—
	1,468	112	809
Charge to income statement	8,709	9,256	13,899

2011 compared with 2010

Impairment losses decreased by 6% compared with 2010, driven largely by a £1,569 million reduction in Non-Core loan impairments, despite continuing challenges in Ulster Bank and corporate real estate portfolios. This was partially offset by impairments taken on the Group's available-for-sale bond portfolio, as a result of the decline in the value of Greek sovereign bonds.

Retail & Commercial impairment losses fell by £227 million, driven by improving credit metrics in UK Retail and US Retail & Commercial partially offset by increases in Ulster Bank, largely reflecting a deterioration in credit metrics on the mortgage portfolio, and a single name provision in International Banking.

Total Core and Non-Core Ulster Bank impairment losses decreased by 4%, as the £223 million increase in Core Ulster Bank losses was more than offset by a decrease in losses recognised in Non-Core.

The Group holds Greek government bonds with a notional amount of £1.45 billion. As a result of Greece's continuing fiscal difficulties, the Group recorded impairment charges on these bonds totalling £1,099 million during the year. These charges were recorded to write the bonds down to their market price as at 31 December 2011 (c.21% of notional).

2010 compared with 2009

Impairment losses were £9,256 million, compared with £13,899 million in 2009. The 33% decrease reflects an overall improvement in the economic environments in which the Group operates.

Impairments fell in all Core businesses, except Ulster Bank Group, which faced an economic environment that remains challenging, with rising default levels across both personal and corporate portfolios.

Impairments for Ulster Bank Group (Core and Non-Core) increased to £3,843 million compared with £1,927 million in 2009.

A significant proportion of the reduction in Core impairments relates to lower specific and latent provisions in UK Retail, UK Corporate, International Banking, US Retail & Commercial and Markets.

Non-Core impairments fell by 41% in 2010 reflecting the gradual improvement in the economic environment through 2010 and lower specific provisions, alongside a non-repeat of the large single name losses seen in 2009.

Business review [continued](#)

Tax	2011	2010	2009
	£m	£m	£m
Tax (charge)/credit	(1,250)	(634)	429
	%	%	%
UK corporation tax rate	26.5	28.0	28.0
Effective tax rate	nm	nm	16.2

nm = not meaningful

The actual tax (charge)/credit differs from the expected tax credit computed by applying the standard rate of UK corporation tax as follows:

	2011	2010	2009
	£m	£m	£m
Expected tax credit	203	112	741
Sovereign debt impairment where no deferred tax asset recognised	(275)	—	—
Other losses in year where no deferred tax asset recognised	(530)	(450)	(780)
Foreign profits taxed at other rates	(417)	(517)	(276)
UK tax rate change - deferred tax impact	(110)	(82)	—
Unrecognised timing differences	(20)	11	274
Non-deductible goodwill impairment	(24)	(3)	(102)
Items not allowed for tax			
- losses on strategic disposals and write-downs	(72)	(311)	(152)
- UK Bank levy	(80)	—	—
- employee share schemes	(113)	(32)	(29)
- other disallowable items	(271)	(296)	(327)
Non-taxable items			
- gain on sale of Global Merchant Services	12	221	—
- gain on redemption of own debt	—	11	693
- other non-taxable items	245	341	410
Taxable foreign exchange movements	4	4	1
Losses brought forward and utilised	2	2	94
Adjustments in respect of prior years	196	355	(118)
Actual tax (charge)/credit	(1,250)	(634)	429

2011 compared with 2010

The high tax charge in 2011 reflects profits in high tax regimes (principally US) and losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland and the Netherlands) and the effect of two reductions of 1% in the rate of UK corporation tax enacted in March 2011 and July 2011 on the net deferred tax balance.

2010 compared with 2009

The high tax charge in 2010 reflects profits in high tax regimes and losses in low tax regimes, together with £450 million relating to losses in overseas subsidiaries for which a deferred tax asset has not been recognised, and £311 million mainly in respect of losses on disposal of businesses for which no tax relief is available. This was offset in part by the non-taxable gain arising on the disposal of 80.01% of the GMS business.

Notes:

- (1) Divisional return on equity is based on divisional operating profit after tax divided by average notional equity (based on 10% of the monthly average of divisional RWAs, adjusted for capital deductions).
- (2) Adjusted cost:income ratio is based on total income after netting insurance claims, and operating expenses.
- (3) Includes disposal groups: loans and advances to customers - £7.3 billion; customer deposits - £8.8 billion; risk elements in lending - £0.5 billion.

Business review [continued](#)

UK Retail continued

In 2010, UK Retail set out an aspiration to become the UK's most helpful bank and launched the Customer Charter. In 2011, we made good progress on our Customer Charter commitments and the roll-out of innovation that actually helps customers. In December 2011, UK Retail refined its staff incentive scheme to further strengthen the role of customer service and to help build long lasting customer relationships.

Progress against the Customer Charter commitments is independently assessed and has shown encouraging results. By the end of 2011, we achieved the goal of serving 80% of our customers in less than 5 minutes in our busiest branches. Branch opening hours have also been extended and standardised, which means that our branches are now open for an additional 5,000 hours per week at times our customers have told us suit them.

Innovation has supported the delivery of Helpful Banking by focusing on solutions that make it easier for customers to bank with RBS and NatWest. An important example has been giving customers access to 24 hour emergency cash from NatWest and RBS ATMs when their cards are lost or stolen. We also updated our market-leading iPhone application and by the end of the year 1 million customers had downloaded the application. With successful apps also launched for iPad, Android and Blackberry, RBS is now the leading mobile bank in the UK.

2011 compared with 2010

UK Retail delivered strong full year results, as operating profit increased by £673 million to £2,021 million, despite continued uncertainty in the economic climate and the low interest rate environment. Impairments fell by £372 million, with further improvements in the unsecured book and continued careful mortgage underwriting. Return on equity improved to 24.5%.

The division continued to focus on growing secured lending while at the same time building customer deposits, thereby reducing the Group's reliance on wholesale funding. Loans and advances to customers grew 2%, with a change in mix from unsecured to secured as the Group actively sought to improve its risk profile. Mortgage balances grew by 5%, while unsecured lending contracted by 11%.

- Mortgage growth reflected continued strong new business levels. Gross mortgage lending market share of 10% continues above our stock position of 8%.
- Customer deposits grew 6%, outperforming the market total deposit growth of 3%. Savings balances grew by £6 billion, or 9%, with 1.5 million accounts opened, demonstrating the strength of our customer franchise and our strategy to further develop primary banking relationships.

Net interest income increased by 6% to £4,302 million, driven by strong balance sheet growth. Net interest margin decreased 6 basis points with recovering asset margins more than offset by more competitive savings rates and lower long term swap rate returns adversely impacting liability margins.

Non-interest income declined 15% to £1,206 million, primarily driven by lower investment and protection income as a result of the dissolution of the bancassurance joint venture. In addition, a number of changes have been made to support delivery of Helpful Banking, such as 'Act Now' text alerts, which have decreased fee income.

Overall expenses decreased by 6%, with the adjusted cost:income ratio improving from 53% to 49%. Cost reductions were driven by a clear management focus on process re-engineering and operational efficiency together with benefits from the dissolution of the bancassurance joint venture, partly offset by higher inflation rates in utility and mail costs.

Impairment losses decreased 32% to £788 million reflecting the impact of a strengthened risk appetite, and a more stable economic environment.

Risk-weighted assets were broadly stable, with volume growth in lower risk secured mortgages partly offset by a decrease in the unsecured portfolio.

2010 compared with 2009

Operating profit recovered strongly from the low levels recorded in 2008 and 2009 to £1,348 million and impairments fell by £519 million as the economic environment continued to recover.

The division has continued to focus in 2010 on growing secured lending while at the same time building customer deposits, thereby reducing the Group's reliance on wholesale funding. Loans and advances to customers grew 5%, with a change in mix from unsecured to secured as the Group actively sought to improve its risk profile. Mortgage balances increased by 9% while unsecured lending contracted by 10%.

- Mortgage growth was due to good retention of existing customers and new business, the majority of which comes from the existing customer base. Gross mortgage lending market share remained broadly in line with 2009 at 12%, with the Group on track to meet its Government target on net mortgage lending.
- Customer deposits grew 10% on 2009, reflecting the strength of the UK Retail customer franchise, which outperformed the market in an increasingly competitive environment. Savings balances grew by £8 billion or 13% with 1.8 million accounts opened, outperforming the market total deposit growth of 3%. Personal current account balances increased by 3% on 2009.

Net interest income increased significantly by 13% to £4,054 million, driven by strong balance sheet growth and repricing. Net interest margin improved by 15 basis points to 3.89%, with widening asset margins partially offset by contracting liability margins in the face of a competitive deposit market.

Non-interest income declined 13% to £1,422 million, principally reflecting the restructuring of current account overdraft fees in the final quarter of 2009.

Expenses decreased by 5%, with the cost:income ratio (net of insurance claims) improving from 60% to 53%.

- Direct staff costs declined by 8%, largely driven by a clear management focus on process re-engineering enabling a 7% reduction in headcount.
- RBS continues to progress towards a more convenient, lower cost operating model, with over 4.8 million active users of online banking and a record share of new sales achieved through direct channels. More than 7.8 million accounts have switched to paperless statements and 276 branches now utilise automated cash deposit machines.

Impairment losses decreased 31% to £1,160 million primarily reflecting the recovery in the economic environment.

- The mortgage impairment charge was £177 million (2009 - £124 million) on a total book of £91 billion. Mortgage arrears rates marginally increased in 2010 but remain below the industry average, as reported by the Council of Mortgage Lenders. Repossessions showed only a small increase on 2009, as the Group continues to support customers facing financial difficulties.
- The unsecured lending impairment charge was £983 million (2009 - £1,555 million) on a total book of £18 billion.

Risk-weighted assets decreased by 5% to £48.8 billion, with lower unsecured lending, improving portfolio credit metrics and small procyclicality benefits more than offsetting growth in mortgages.

(1) Includes disposal groups: loans and advances to customers - £12.2 billion; customer deposits - £21.8 billion; risk elements in lending - £1.0 billion.

In 2011, UK Corporate focused on supporting its customers through challenging economic times. As a result of over 5,000 hours of customer research, UK Corporate launched the 'Ahead for Business' promise to its small and medium-sized enterprise (SME) customers.

To deliver on this, the division launched a number of initiatives to improve the service it offers to customers. For example, the 'Working with You' initiative, has seen over 4,600 visits to customer businesses since its launch in Q2 2011. Additionally, following the launch of the relationship manager accreditation programme, also in Q2 2011, almost all relationship managers have gained full accreditation in the initial phase.

UK Corporate continued to support new and existing businesses during 2011:

- launching its best ever fixed rate loan product for SMEs;
- reacting quickly after the August riots to give affected businesses access to special interest rate and fee free lending products;
- answering over 4,000 calls on the Start-up Hotline, offering free advice and a complementary business plan review service; and
- supporting more debt capital and loan market deals for larger corporates than any other bank.

The division also took measures to reduce the risk retained in the business allowing for quicker and more consistent decisions by simplifying the credit underwriting process and improving automated decision making.

2011 compared with 2010

Operating profit increased 2% to £1,924 million, as higher income was only partially offset by higher impairments and an increase in expenses. Net interest income remained broadly flat. Net interest margin improved 17 basis points with benefits from re-pricing the lending portfolio and the revision to income deferral assumptions in Q1 2011 partially

offset by increased funding costs together with continued pressure on deposit margins. A 1% increase in deposit balances supported an improvement in the loan:deposit ratio to 86%.

Non-interest income decreased by 1% as a result of lower Markets cross-sales and fee income, partially offset by increased Invoice Finance and Lombard income.

Excluding the £29 million OFT penalty in 2010, total costs increased by 2%, largely reflecting increased investment in the business and higher costs of managing the non-performing book.

Impairments of £793 million were 3% higher due to increased specific impairments and collectively assessed provisions, partially offset by lower latent loss provisions.

2010 compared with 2009

Operating profit grew by £501 million, 36%, compared with 2009, driven by strong income growth and significantly lower impairments, partially offset by higher costs.

UK Corporate performed strongly in the deposit market, with customer deposit balance growth of £14 billion contributing to a 11 percentage point improvement in the loan:deposit ratio in 2010. While customer lending increased only marginally (with gross lending largely offset by customer deleveraging) net interest income rose by £367 million, 14%, and net interest margin rose by 36 basis points driven primarily by the good progress made on loan repricing.

Non-interest income increased 4% reflecting strong refinancing levels and increased operating lease activity, partially offset by lower sales of financial market products.

Total costs increased 5% (£102 million) or 4% excluding the OFT penalty in 2010.

Impairments were 18% lower, primarily as a result of higher charges taken during the first half of 2009 to reflect potential losses in the portfolio not yet specifically identified.

Return on equity increased from 10.4% to 13.6%, reflecting higher operating profit and lower RWAs as a result of improved risk metrics.

Notes:

(1) Divisional return on equity is based on divisional operating profit after tax divided by average notional equity (based on 10% of the monthly average of divisional RWAs, adjusted for capital deductions).

(2) 2010 and 2009 comparatives have been revised to reflect the current reporting methodology.

2011 has been a significant year for the Coutts businesses from a strategic perspective. In Q1 2011, a new divisional strategy was defined with the execution of early changes already making an impact.

Key strategic changes in 2011 included:

- A refreshed Coutts brand bringing Coutts UK and RBS Coutts under one single contemporary brand.
- A refocus on territories where the businesses have the opportunity for greatest scale or growth such as UK, Asia, Middle East, and Eastern Europe.
- Further development of client propositions as well as the portfolio of products and services for key international markets.
- Strategic investment in technology leading to the development of a single global technology platform for the Wealth division. The platform was successfully deployed in Adam & Company in 2011 with Coutts UK to follow in 2012.
- Strengthening the connectivity between Wealth and other Group divisions including referrals in international jurisdictions and improved connectivity with UK Corporate.
- Continued activity to ensure the division responds to new or expected regulatory changes with proactive solution design and preparation.
- Injection of new management into key roles from both internal and external sources including key segment heads, marketing, products & services, and international executive leadership.

Following the establishment of a single global brand in Q4 2011, focus turned to the reorganisation of key global functions such as marketing and product & services, as well as some local management structures. These reorganisations have realigned the division to maximise execution of the divisional strategy. The execution plan for the strategy will continue into 2012 and position Wealth strongly against its peers.

2011 compared with 2010

Operating profit decreased by 12% on 2010 to £248 million, driven by increases in expenses (13%) and impairments (39%) partially offset by a 7% growth in income.

Income increased by £69 million with a 24 basis points improvement in lending margins, strong treasury income and increases in lending and deposit volumes. Non-interest income rose 3%, with investment income growing 2% despite turbulent market conditions.

Expenses increased by £97 million, largely driven by adverse foreign exchange movements and headcount growth to service the increased revenue base. Additional strategic investment in technology enhancement, rebranding and programmes to support regulatory change also contributed to the increase.

Client assets and liabilities managed by the division decreased by 1%. Customer deposits grew 3% in a competitive environment and lending volumes grew 5%. Assets under management declined 9%, with fund outflows contributing 3% of the decrease and market conditions making up the balance.

2010 compared with 2009

2010 operating profit fell by 24% driven by lower net interest income and higher expenses, partly offset by a 45% decline in impairments in the year.

Income declined by 3% primarily due to lower net interest income. Strong lending and investment income was offset by the impact of a competitive deposit market.

Expenses grew by 12% to £734 million. Direct expenses were up 5%, £23 million reflecting additional strategic investment. Indirect expenses increased by £55 million reflecting a change in allocation of Business Services costs.

Assets under management grew by 4% largely through improving market conditions.

Notes:

(1) Divisional return on equity is based on divisional operating profit after tax divided by average notional equity (based on 10% of the monthly average of divisional RWAs, adjusted for capital deductions).

(2) Run-off businesses consist of the exited corporate finance businesses.

International Banking serves companies with a leading client proposition focused on financing, transaction services and risk management. The International Banking structure and governance were complete by the end of June 2012. Management is focused on leveraging the International network and the Transaction Services offering to ensure relevance and intimacy with the division's client base.

During the year, International Banking invested in improving existing products and services and also in developing new ones. To help corporate treasurers manage their global positions, the division launched a global Liquidity Solutions Portal, giving its customers a view of their operational and investment balances and rates all in one place, improving transparency, and enabling them to execute and redeem investments effectively.

2011 compared with 2010

Operating profit was down 42%, partly reflecting the sale of Global Merchant Services (GMS) which completed on 30 November 2010. Adjusting for the disposal, operating profit decreased 32%, driven by an impairment provision on a single name in 2011.

Excluding GMS income of £451 million, income was 10% lower despite the success of deposit-gathering initiatives, as deposits increased £2 billion in a competitive environment.

Excluding GMS expenses of £244 million, expenses decreased by £4 million, reflecting business improvement initiatives and investment in technology and support infrastructure.

Impairment losses increased to £168 million compared with £86 million in 2010 reflecting a single name impairment.

For the eleven months in 2010 before completion of the disposal, GMS generated income of £451 million, total expenses of £244 million and an operating profit of £207 million.

2010 compared with 2009

Operating profit increased 17%, driven by lower costs and impairment losses (which has more than compensated for the loss of Global Merchant Services (GMS) income). Adjusting for the disposal operating profit increased 28%.

For the eleven months before disposal, International Banking booked income of £451 million (2009 - £505 million) and total expenses of £244 million (2009 - £249 million) for GMS, generating an operating profit of £207 million (2009 - 256 million).

Income was down 8%, or 7% excluding GMS, reflecting lower deposit volumes in Cash Management business, a decline in the Trade Finance business.

Expenses decreased 7% to £1,880 million, as increased investment in front office and support infrastructure was offset by tight management of business costs.

Third party assets increased by £2.6 billion, or £1.5 billion excluding GMS, as Yen clearing activities were brought in-house and loans and advances increased.

2011 was another difficult year for the business due to the continued challenging economic environment. This was reflected in the financial performance, with ongoing pressure on income and a further increase in impairment losses.

Ulster Bank continues to make progress on its customer commitments and deposit gathering strategy, while cost management and targeting growth in areas that leverage competitive advantage, remain priorities. In 2011, customer numbers increased by 2%, representing a strong performance in current and savings accounts, driven by the enhanced customer service highlighted by our 'Help for what matters' programme.

Following a review of the cost base and operating model, 950 proposed job losses were announced in January 2012, the majority of which are expected by the end of 2012. This decision is a necessary part of the changes required to build a stronger sustainable business for the future.

2011 compared with 2010

Operating profit before impairment losses decreased by £78 million in 2011 with lower income partially mitigated by cost savings. Impairment losses of £1,384 million increased by 19% from 2010 resulting in an operating loss of £984 million, 44% higher than 2010.

Income fell by 10% driven by a contracting performing loan book coupled with higher funding costs. Loans and advances to customers decreased by 8% during 2011.

Expenses fell by 5% reflecting tight management of the cost base across the business.

Impairment losses increased by 19% largely reflecting the deterioration in credit metrics on the mortgage portfolio driven by a combination of higher debt flow and further fall in asset prices.

Despite intense competition, retail and small business deposit balances have grown strongly throughout 2011, driven by the benefits of a focused deposit gathering strategy. However, total customer deposit balances fell by 6% terms largely driven by the outflow of wholesale customer balances due to rating downgrades.

Risk-weighted assets increased by 15% in 2011 reflecting the deterioration in credit risk metrics.

Business review [continued](#)

Ulster Bank continued

2010 compared with 2009

Overall performance deteriorated in 2010, largely as a result of an increase in impairment losses of £512 million. Operating profit before impairment increased to £478 million, up 81%, driven by the culmination of a bank-wide cost saving programme during 2010.

Net interest income increased by 10%, as tightening deposit margins due to intensive market competition and movements in foreign exchange rates were offset by actions to increase asset margins.

Non-interest income was 16% lower, basis reflecting a non-recurring gain in 2009.

Loans to customers fell by 7%. On 1 July 2010 the division transferred a portfolio of development property assets to the Non-Core division, partially offset by a simultaneous transfer of a portfolio of retail mortgage assets to the core business.

Despite intense competition, customer deposit balances increased by 5% over the year with strong growth across all deposit categories, driven by a focus on improving the bank's funding profile.

Expenses were 24% lower. The strong year-on-year performance in expenses was primarily driven by an increased focus on active management of the cost base, and the benefits derived from the business restructuring and cost-saving programme which commenced in 2009.

Impairment losses increased by £512 million to £1,161 million reflecting the deteriorating economic environment in Ireland and rising default levels across both personal and corporate portfolios. Lower asset values, particularly in property-related lending together with pressure on borrowers with a dependence on consumer spending have resulted in higher corporate loan losses, while higher unemployment, lower incomes and increased taxation have driven mortgage impairment increases.

Risk-weighted assets have increased due to deteriorating credit risk metrics.

Customer numbers increased by 3% during 2010, with a strong performance in current and savings accounts switchers.

Sterling weakened relative to the US dollar during the fourth quarter, with the average exchange rate decreasing by 2% compared with Q3 2011.

US R&C continued to focus on its back-to-basics strategy, with good progress made in developing the division's customer franchise during 2011. The bank continued to re-energise the franchise through new branding, product development and competitive pricing.

To strengthen retail alignment and improve efficiencies, US R&C formed a consolidated Consumer Banking division by combining management of the retail banking franchise with the consumer lending division during H2 2011. This continued focus on alignment is expected to further contribute to the improved penetration of loan products to deposit households, which has already increased in ten consecutive quarters. The penetration of on-line banking customers, a key indicator of customer retention, also continued to improve during 2011.

To enhance the customer experience, in Q4 2011, Consumer Banking introduced four core Customer Commitments, built around feedback received from customers in Massachusetts. In Q1 2012, the Commitments will be rolled out to Citizens Financial Group's (CFG's) entire branch footprint.

Significant organisational changes and investment in Commercial Banking, including unification under the RBS Citizens brand, has been important in positioning the business for growth. The enhanced sales training programme for managers and sales colleagues in this business has begun to deliver results with both higher credit balances and increased client satisfaction. External researchers TNS awarded Citizens the second highest score in relationship manager satisfaction among its competitors for 2011.

Risk management was also an important focus for 2011 and in Q4 2011, CFG's Board of directors approved a new formal risk appetite statement aimed at ensuring sustained predictable earnings and further strengthening the control environment.

2011 compared with 2010

Operating profit increased to £537 million (\$860 million) from £349 million (\$540 million), an increase of £188 million (\$320 million), or 54%. Excluding a credit of £73 million (\$113 million) related to changes to the defined benefit plan in Q2 2010, operating profit increased by £261 million (\$433 million), or 95%, substantially driven by lower impairments and improved income.

The macroeconomic operating environment remained challenging, with low rates, high unemployment, a soft housing market, sluggish consumer activity and the continuing impact of legislative changes including the Durbin Amendment in the Dodd-Frank Act which became effective on 1 October 2011.

The Durbin Amendment lowers the allowable interchange on debit transactions to \$0.23-\$0.24 per transaction. The current annualised impact of the Durbin Amendment is estimated at £94 million (\$150 million).

Net interest income was down £2 million. In US dollar terms, net interest income increased by \$108 million, 4%. Net interest margin improved by 24 basis points to 3.06% reflecting changes in deposit mix, continued discipline around deposit pricing and the positive impact from the balance sheet restructuring programme carried out during Q3 2010 combined with strong commercial loan growth, partially offset by run-off of consumer loans.

Non-interest income was down £23 million, 2%. In US dollar terms, non-interest income increased by \$31 million, 2%. The increase is primarily driven by higher account and transaction fees, partially offset by the impact of legislative changes on debit card and deposit fees.

Excluding the defined benefit plan credit of £73 million (\$113 million) in Q2 2010, total expenses were down £93 million, 4% (\$16 million in US dollar terms) due to a number of factors including lower Federal Deposit Insurance Corporation (FDIC) deposit insurance levies, and lower litigation and marketing costs, partially offset by higher regulatory costs.

Impairment losses declined by £193 million (\$278 million), or 37%, largely reflecting an improved credit environment slightly offset by higher impairments related to securities. Loan impairments as a percent of loans and advances improved to 0.5% from 1.0%.

Customer deposits were up 1% with particularly strong growth achieved in checking balances. Consumer checking balances grew by 6%, while small business checking balances grew by 5% over the year.

2010 compared with 2009

Operating profit of £349 million (\$540 million) represented a marked improvement from an operating loss of £52 million (\$81 million) with income up 8% and impairment losses down 26%.

Net interest income was up 8%, despite a smaller balance sheet, with net interest margin improving by 48 basis points to 2.82%.

Non-interest income was up 7% reflecting higher mortgage banking and debit card income, commercial banking fees and higher gains on securities realisations. This was partially offset by lower deposit fees which were impacted by Regulation E legislative changes in 2010. In addition, gains of £213 million (\$330 million) were recognised on the sale of available-for-sale securities as part of the balance sheet restructuring exercise, but these were almost wholly offset by losses crystallised on the termination of swaps hedging fixed-rate funding.

Total expenses were up £1 million (\$45 million), reflecting a £73 million (\$113 million) credit related to changes to the defined benefit pension plan, and lower Federal Deposit Insurance Corporation (FDIC) deposit insurance levies,

partially offset by the impact of changing rates on the valuation of mortgage servicing rights and litigation costs.

Impairment losses declined 26%, following significant loan reserve building in 2009 and a gradual improvement in the underlying credit environment, offset by higher impairments related to securities. Loan impairments as a percentage of loans and advances decreased from 1.4% to 1.0%.

During Q4 2011, the market environment continued to weaken. Market volatility remained elevated and liquidity depressed as markets reacted to developments in the European sovereign debt crisis. Deal flow was weak reflecting investor pessimism about the outlook for the world economy. Throughout the year, Markets continued to deliver core products and innovative solutions to clients, while also focusing on management of its cost base and on tight control of its risk positions.

On 12 January 2012 the Group announced changes to its wholesale banking operations in light of a changed market and regulatory environment. The changes saw the reorganisation of RBS's wholesale businesses into 'Markets' and 'International Banking' and the exit and downsizing of selected activities. The changes will ensure the wholesale businesses continue to deliver against the Group's strategy.

2011 compared with 2010

Operating profit fell by 67%, from £2,724 million for 2010 to £899 million for 2011, driven by a 29% decrease in revenue. The year was characterised by volatile and deteriorating credit markets, especially during the second half of the year when the European sovereign debt crisis drove a sharp widening in credit spreads.

Due to this deterioration in the markets both the Rates and Credit businesses suffered significantly, and income from trading activities, which is after funding costs both internal and external, fell from £5,234 million in 2010, to £4,601 million in 2011. The heightened volatility increased risk aversion amongst clients and limited opportunities for revenue generation in the secondary markets.

Total costs increased by 1% due increased investment costs in 2011, which included a programme to meet new regulatory requirements. The compensation ratio in Markets was 44%, driven by fixed salary costs and prior year deferred awards.

Variable compensation accrued in the first half of the year were reduced in the second half of the year, leaving the former GBM 2011 variable compensation awards 58% lower than 2010.

Third party assets fell from £338.0 billion in 2010 to £312.6 billion in 2011 as a result of lower levels of activity and careful management of balance sheet exposures.

A 9% increase in risk-weighted assets reflected the impact of significant regulatory changes, with a £21 billion uplift as a result of CRD III, largely offset by the impact of the division's focus on risk management.

2010 compared with 2009

A fall in operating profit, of 45% year on year reflects sharply reduced revenue partially offset by lower costs and a significant improvement in impairments.

Total income was £2,557 million lower in 2010 driven by increased risk aversion in the market during Q3 and Q4 2010, combined with the non-repeat of favourable market conditions seen in the first half of 2009.

- Higher revenue across the Rates and Currencies businesses during 2009 was driven by rapidly falling interest rates and wide bid-offer spreads generating exceptional revenue opportunities, which have not been repeated in 2010.
- The Credit Markets business weakened by 16%, reflecting lower levels of activity in debt capital markets.

Expenses fell by 3% to £3,444 million. This was largely driven by a decrease in staff costs, including on-going benefits from cost synergies.

The low level of impairments in 2010 reflected a small number of specific cases partially offset by an improved picture on latent loss provisions. This contrasted with 2009, which witnessed a significantly higher level of specific impairments.

Notes:

- (1) 'Other' predominately consists of the personal lines broker business.
- (2) Total in-force policies include travel and creditor policies sold through RBS Group. These comprise travel policies included in bank accounts e.g. Royalties Gold Account, and creditor policies sold with bank products including mortgage, loan and card payment protection.
- (3) Return on regulatory capital required is based on annualised operating profit/(loss) after tax divided by average notional regulatory equity.
- (4) Return on tangible equity is based on annualised operating profit/(loss) after tax divided by average tangible equity.
- (5) Loss ratio is based on net claims divided by net premium income.
- (6) Commission ratio is based on fees and commissions divided by gross written premium income.
- (7) Expense ratio is based on expenses divided by gross written premium.
- (8) Combined operating ratio is the sum of the loss, commission and expense ratios.
- (9) Consists of general and life insurance liabilities, unearned premium reserves and liability adequacy reserve.

Business review [continued](#)

Direct Line Group continued

Direct Line Group continues to make good progress ahead of its divestment from the Group. Operating profit of £454 million for 2011 shows a return to full year profitability and represents close to a £750 million turnaround from 2010. These results demonstrate the success of the first phase of management's transformation plan - to return to profit in 2011. The full year combined operating ratio improved to 100% (2010 - 121%) with a full year return on equity of 10.3% compared with a negative return of 6.8% in 2010.

The second phase of the Direct Line Group transformation plan, to build competitive advantage, is underway and tangible benefits are already being delivered. All new Churchill, Direct Line and Privilege motor claims, as well as all new Churchill home claims, are now being processed through a new claims management system. Within motor, the rollout of a new rating engine and new pricing tools ensured more accurate and tailored pricing with the aim of generating greater value from Direct Line Group's multi-brand, multi-distribution strategy.

As part of the plan to build competitive advantage, the rationalisation of occupied sites continues, with 15 site exits by the end of 2011. The consolidation of the four UK general insurance underwriting entities within the Direct Line Group was successfully completed in December 2011. All UK general insurance business is now written through one underwriter with the aim of improving operational and capital efficiency.

Marking a significant new partnership, Direct Line Group signed a five-year contract with Sainsbury's Finance in 2011 to provide underwriting, sales, service and claims management for its car insurance customers. Following the successful launch and development of the car insurance partnership, a further contract was signed early in 2012 to provide home insurance for Sainsbury's customers. Building on Direct Line Group's established successful relationship with Nationwide Building Society, a deal was concluded to extend its provision of home insurance until the end of 2015. Direct Line Group is also concluding terms with RBS Group's UK Retail bank on the details of a five-year agreement for the continued provision of general insurance products post separation. The term would commence from the point of initial divestment.

While overall gross written premium fell by 5% in 2011, it increased by 10% in Commercial, which includes NIG, the commercial broker business, and Direct Line for Business, the direct SME insurer. A new brand identity was unveiled for NIG and work continued to improve its product offering and service to brokers. Direct Line for Business continued to develop well.

Direct Line Group's international division showed strong growth in gross written premiums primarily in Italy, assisted by the first full year of its sales agreements with FGA Capital, a joint venture between Fiat and Credit Agricole. The German business also showed good growth following improvements in the second half of 2011 to its direct and partnership business, including strengthening its relationship with Renault.

Ahead of the planned divestment in the second half of 2012, Direct Line Group has begun separating its activities and operations from RBS Group. Its corporate functions have been strengthened, arm's length agreements are under discussion with the Group where appropriate, a new corporate brand, Direct Line Group was announced on 15 February 2012 and a new risk and control framework has been implemented, in readiness for standalone status.

Overall, Direct Line Group has powerful brands, improved earnings, a robust balance sheet and is executing the second phase of its transformation plan to rebuild competitive advantage.

2011 compared with 2010

Operating profit rose by £749 million in 2011, principally due to the non repeat of the bodily injury reserve strengthening in 2010, derisking of the motor book, exit of certain business segments and more benign weather in 2011.

Gross written premium fell £200 million, 5%, as the business continued to drive improved profitability through reduced volumes in unattractive segments. This was partially offset by growth in Commercial and International.

Total income fell £444 million, 10%, following the exit of personal lines broker, a decline in premiums reflecting reduced motor volumes and higher reinsurance costs to reduce the risk profile of the book. Investment income fell £12 million, 4%, reflecting decreased yields on the portfolio in 2011, partially offset by higher realised gains.

Total direct expenses rose by £9 million principally driven by project activity to support the transformation plan.

Net claims fell £1,160 million, 30%, due to the non recurrence of bodily injury reserve strengthening in 2010, actions taken to de-risk the book, the exit of certain business segments and more benign weather in 2011.

At the end of 2011, Direct Line Group 's investment portfolios comprised primarily cash, gilts and investment grade bonds. Within the UK portfolio, £8.9 billion, and the International portfolio, £827 million, there was no exposure to sovereign debt issued by Portugal, Ireland, Italy, Greece or Spain.

Total in-force policies fell 6% in the year due to planned de-risking of the motor book and the exiting of certain other segments and partnerships, including personal lines broker.

2010 compared with 2009

Direct Line Group has embarked on a significant programme of investment designed to achieve a substantial lift in operational and financial performance, ahead of the planned divestment of the business, with a current target date of 2012. This programme encompasses the enhancement of pricing capability, transformation of claims operations and expense reduction, together with a range of other improvements across the business, including a greater focus on capital management.

2010 as a whole was a disappointing profit year, impacted by significant reserve strengthening for bodily injury claims and severe weather, resulting in a loss of £295 million.

Income was down 2% (£98 million) against 2009, driven by a managed reduction in the risk of the UK motor book, largely offset by significant price increases:

- This de-risking was achieved by a combination of rating action to reduce the mix of higher-risk drivers, and the partial or total exit of higher risk business lines (significantly scaling back the fleet and taxi business and the exit of personal lines business sold through insurance brokers). As a result in-force motor policies fell 14% compared with 2009.
- Even with the significant reduction in the risk mix of the book, average motor premiums were up 7% in the year, due to significant price increases. The prices of like-for-like policies have increased by 35-40% over the last year. These increases were in addition to the significant increases achieved in 2009.

Initiatives to grow ancillary income were also implemented during the year resulting in revenues of £46 million in 2010 (£25 million in 2009). Away from UK motor, overall home gross written premiums grew by 1%. This included the exit from less profitable business in line with overall strategy. Our underlying own brands business continues to

grow successfully, with gross written premiums increasing 4%.

The International business continued to invest in growth in 2010 with gross written premiums of £425 million up 20% on 2009. The Italian business successfully grew to a market share approaching 30% of the direct insurer market. The German business grew 7% and is well positioned to take advantage of the emerging shift to direct/internet distribution in that market.

Several programmes to further improve the overall efficiency of the business took effect during the year, including a reduction of six sites and operational process improvements, which will continue to improve efficiency.

Total in-force policies declined by 3%, driven by a fall of 14% in motor policies. This was partly offset by higher travel policies, up 64% with new business from a partnership with Nationwide Building Society commencing in Q4 2010. The personal lines broker segment overall declined by 43%, in line with business strategy.

Total income declined by £98 million, with lower motor premium income, driven by rating action. Increased fees and commissions reflected profit sharing arrangements with UK Retail in relation to insurance distribution to bank customers. Investment income was £28 million lower, reflecting the impact of low interest rates on returns on the investment portfolio as well as lower gains realised on the sale of investments.

Net claims were £326 million higher than in 2009, driven by increases to bodily injury reserves relating to prior years, including allowance for higher claims costs in respect of Periodic Payment Orders due to an increased settlement rate of such claims. Although bodily injury frequency has stabilised, severity has continued to deteriorate. Claims were also impacted by the adverse weather experienced in the first and fourth quarters.

Expenses were down 7%, driven by lower industry levies and marketing costs.

Central items

	2011	2010	2009
	£m	£m	£m
Central items not allocated	191	630	456

Funding and operating costs have been allocated to operating divisions, based on direct service usage, requirement for market funding and other appropriate drivers where services span more than one division.

Residual unallocated items relate to volatile corporate items that do not naturally reside within a division.

2011 compared with 2010

Central items not allocated represented a credit of £191 million in 2011, a decline of £439 million compared with 2010. 2010 benefited from c.£300 million of accounting gains on hybrid securities, c.£150 million of which was amortised during 2011. A VAT recovery of £176 million in 2010 compared with £85 million recovered in 2011.

2010 compared with 2009

Central items not allocated including available-for-sale (AFS) gains of £237 million and one-off VAT recovery in 2010 of £170 million, amounted to a net credit of £630 million, an increase of £174 million on 2009.

The Group's credit spreads have fluctuated over the course of the year, but ended the year slightly wider, resulting in an overall annual decrease in the carrying value of own debt.

51

Non-Core third party assets fell to £94 billion, below the revised year end target of £96 billion and significantly ahead of the original guidance of £118 billion. Further reductions will include the sale of RBS Aviation Capital for £4.7 billion, which was signed in January 2012. Since the division was formed in 2009, the reduction totals £164 billion, or 64%. By the end of 2011, the Non-Core funded balance sheet equated to less than 10% of the Group funded balance sheet compared with 21% when the division was created.

The division focused on reducing capital intensive trading assets, with activity including the restructuring of monoline exposures, which, at a cost of c.£600 million in 2011, achieved a reduction of £60 billion in risk-weighted assets.

An operating loss of £4,221 million for 2011 was £1,494 million lower than 2010. Income declined by £1,566 million reflecting continued divestment, including business and country exits. The decrease was partially offset by a reduction in expenses of £961 million, largely driven by the fall in headcount. Impairment losses fell by £1,557 million despite ongoing challenges in the real estate and Ulster Bank portfolios.

2011 compared with 2010

Operating loss of £4,221 million in 2011 was £1,494 million lower than the loss recorded in 2010. The continued divestment of Non-Core businesses and portfolios has reduced revenue streams as well as the cost base.

Losses from trading activities increased by £704 million compared with 2010, principally as a result of the disposal of RBS Sempra Commodities in 2010 and costs incurred as part of the division's focus on reducing capital intensive trading assets and mitigating future regulatory uplifts in risk-weighted assets.

Impairment losses fell by £1,557 million despite ongoing challenges in the real estate and Ulster Bank portfolios, reflecting improvements in other asset classes.

Third party assets declined by £44 billion (32%) reflecting disposals of £22 billion and run-off of £22 billion.

Risk-weighted assets were £60 billion lower than 2010, principally driven by significant disposal activity on trading book assets combined with run-off.

Headcount declined by 2,189 (32%) to 4,669 in 2011, largely reflecting the divestment activity in relation to Asia, Non-Core Insurance and RBS Sempra Commodities.

2010 compared with 2009

By the end of 2010 third party assets (excluding derivatives) had decreased to £138 billion, £5 billion lower than the end of year target, as a result of a successful disposal strategy, managed portfolio run-off and impairments.

2010 operating losses in Non-Core were 60% lower than those recorded in 2009. The improvement in performance was driven by significantly lower trading losses, reduced expenses and a marked decline in impairments.

Losses from trading activities declined from £5,122 million for 2009 to £16 million for 2010 as underlying asset prices recovered, offset by continuing weakness in credit spreads. The division has recorded profits on the disposal of many asset-backed securities positions. In addition, a significantly smaller loss of £82 million was recorded on banking book hedges as spreads tightened, compared with £1,727 million in 2009.

Staff expenses fell by 14% over the year, largely driven by the impact of business divestments, including a number of country exits and the disposal of substantially all of the Group's interest in the RBS Sempra Commodities JV.

Impairments were £3,745 million lower than 2009. The decline reflects the overall improvement in the economic environment, although still high loss rates reflect the difficult conditions experienced in specific sectors, including both UK and Irish commercial property sectors.

Wholesale country exits completed during 2010 were Chile, Colombia, Pakistan and Taiwan.

Risk-weighted assets decreased by £18 billion (10%), reflecting active management to reduce trading book risk and disposals, partially offset by the impact of regulatory changes (£30 billion) and more conservative weightings applied to large corporate exposures.

Commentary on consolidated balance sheet

2011 compared with 2010

Total assets of £1,506.9 billion at 31 December 2011 were up £53.3 billion, 4%, compared with 31 December 2010. This principally reflects an increase in cash and balances at central banks and the mark-to-market value of derivatives in Markets, partly offset by decreases in debt securities and equity shares and the continuing disposal and run-off of Non-Core assets.

Cash and balances at central banks were up £22.3 billion, 39%, to £79.3 billion due to improvements in the Group's structured liquidity position during 2011.

Loans and advances to banks decreased by £17.2 billion, 17%, to £83.3 billion. Reverse repurchase agreements and stock borrowing ('reverse repos') were down £3.2 billion, 7%, to £39.4 billion and bank placings declined £14.0 billion, 24%, to £43.9 billion, primarily as a result of the reduction in exposure to eurozone banks and lower cash collateral requirements.

Loans and advances to customers were down £39.7 billion, 7%, to £515.6 billion. Within this, reverse repurchase agreements were up £9.0 billion, 17%, to £61.5 billion. Customer lending decreased by £48.7 billion, 10%, to £454.1 billion or £46.9 billion, 9%, to £473.9 billion before impairment provisions. This reflected the transfer to disposal groups of £19.5 billion of customer balances relating to the UK branch-based businesses. There were also planned reductions in Non-Core of £28.1 billion, together with declines in International Banking, £4.7 billion, UK Corporate, £3.0 billion and Ulster Bank, £2.0 billion, together with the effect of exchange rate and other movements, £1.9 billion. These were partially offset by growth in Markets, £6.4 billion, Wealth, £0.8 billion, UK Retail, £2.3 billion and US Retail & Commercial, £2.8 billion.

Debt securities were down £8.4 billion, 4%, to £209.1 billion driven mainly by a reduction in holdings of government and financial institution bonds in Markets and Group Treasury.

Equity shares decreased £7.0 billion, 32%, to £15.2 billion which largely reflects the closure of positions to reduce the Group's level of unsecured funding requirements to mitigate the potential impact of unfavourable market conditions.

Settlement balances declined £3.8 billion, 33% to £7.8 billion as a result of decreased customer activity.

Movements in the value of derivative assets up £102.5 billion, 24%, to £529.6 billion, and liabilities, up £100.0 billion, 24%, to £524.0 billion, primarily reflect increases in interest rate contracts as a result of a significant downward shift in interest rates across all major currencies, together with increases in the mark-to-market value of credit derivatives as a result of widening credit spreads and rising credit default swap prices.

Property, plant and equipment declined £4.7 billion, 28%, to £11.9 billion, primarily as a result of the transfer of RBS Aviation Capital's operating lease assets to disposal groups.

Deferred taxation was down £2.5 billion, 39%, to £3.9 billion, largely as a result of the utilisation of brought forward tax losses in the UK.

The increase in assets and liabilities of disposal groups reflects the reclassification of the UK branch-based businesses and RBS Aviation Capital pending their disposal, partly offset by the completion of disposals, primarily RBS Sempra Commodities JV and certain Non-Core project finance assets.

Deposits by banks increased £10.0 billion, 10%, to £108.8 billion, with higher repurchase agreements and stock lending ('repos'), up £6.9 billion, 21%, to £39.7 billion and higher inter-bank deposits, up £3.1 billion, 5%, to £69.1

billion.

Customer accounts fell £7.7 billion, 2%, to £503.0 billion. Within this, repos increased £6.7 billion, 8%, to £88.8 billion. Excluding repos, customer deposits were down £14.4 billion, 3%, to £414.1 billion, reflecting the transfer to disposal groups of £21.8 billion of customer accounts relating to the UK branch-based businesses. This was partly offset by the net effect of growth in International Banking £1.7 billion, UK Corporate, £1.8 billion, UK Retail, £5.8 billion, US Retail & Commercial, £0.5 billion and Wealth, £1.8 billion, together with exchange rate and other movements of £0.5 billion and declines in Markets, £1.1 billion, Ulster Bank, £0.8 billion and Non-Core, £2.9 billion.

Debt securities in issue were down £55.8 billion, 26% to £162.6 billion driven by reductions in the level of certificates of deposit and commercial paper in Markets and Group Treasury.

Settlement balances declined £3.5 billion, 32%, to £7.5 billion and short positions were down £2.1 billion, 5%, to £41.0 billion due to decreased customer activity.

Subordinated liabilities were down £0.7 billion, 3%, to £26.3 billion, primarily reflecting the redemption of £0.2 billion US dollar and £0.4 billion Euro denominated dated loan capital.

The Group's non-controlling interests decreased by £0.5 billion, 28%, to £1.2 billion, primarily due to the disposal of the majority of the RBS Sempra Commodities JV business, £0.4 billion.

Owners' equity decreased by £0.3 billion to £74.8 billion. This was driven by the attributable loss for the year, £2.0 billion, together with the recognition of actuarial losses in respect of the Group's defined benefit pension schemes, net of tax, £0.5 billion and exchange rate and other movements of £0.3 billion. Offsetting these reductions were gains in available-for-sale reserves, £1.1 billion and cashflow hedging reserves, £1.0 billion and the issue of shares under employee share schemes, £0.4 billion.

Business review continued

Commentary on consolidated balance sheet
2010 compared with 2009

Total assets of £1,453.6 billion at 31 December 2010 were down £242.9 billion, 14%, compared with 31 December 2009. This principally reflects the disposal of the RFS minority interest, the continuing planned disposal of Non-Core assets, together with a reduction in the level of debt securities and the mark-to-market value of derivatives.

Cash and balances at central banks were up £4.8 billion, 9%, to £57.0 billion principally due to an improvement in the Group's structural liquidity position during 2010.

Loans and advances to banks increased by £8.8 billion, 10%, to £100.5 billion. Adjusting for the disposal of the RFS minority interest, the increase was £16.6 billion, 20%. Reverse repurchase agreements and stock borrowing ('reverse repos') were up £7.5 billion, 21% to £42.6 billion and bank placings rose £9.1 billion, 19%, to £57.9 billion, primarily as a result of the investment of surplus liquidity in short-term assets.

Loans and advances to customers decreased £173.1 billion, 24%, to £555.3 billion. Excluding the disposal of the RFS minority interest, lending to customers was down £40.4 billion, 7%. Within this, reverse repurchase agreements were up £11.5 billion, 28%, to £52.5 billion. Customer lending decreased by £51.9 billion to £502.7 billion or £48.9 billion before impairment provisions. This reflected planned reductions in Non-Core of £39.6 billion along with declines in Markets, £11.9 billion, International Banking, £3.6 billion, US Retail & Commercial, £2.6 billion and Ulster Bank, £1.9 billion. These were partially offset by growth in UK Retail, £5.4 billion, Wealth, £2.4 billion and UK Corporate, £0.8 billion, together with the effect of exchange rate and other movements, £2.1 billion.

Debt securities were down £49.8 billion, 19%, to £217.5 billion, or £31.6 billion, 13%, adjusting for the disposal of the RFS minority interest, driven mainly by reductions in Markets.

The value of derivative assets were down £14.4 billion, 3%, to £427.1 billion, primarily reflecting a decrease in interest contracts, movements in five to ten year interest yields, and the combined effect of currency movements, with Sterling weakening against the dollar but strengthening against the Euro.

The reduction in assets and liabilities of disposal groups resulted from the completion of disposals of certain of the Group's Asian and Latin American businesses, and substantially all of the RBS Sempra Commodities JV business.

Deposits by banks declined £43.4 billion, 31%, to £98.8 billion or £66.1 billion, 36% following the disposal of the RFS minority interest, with reduced inter-bank deposits, down £49.7 billion, 43%, to £66.1 billion and lower repurchase agreements and stock lending ('repos'), down £5.3 billion, 14%, to £32.7 billion.

Customer accounts decreased £103.5 billion, 17%, to £510.7 billion but excluding the disposal of the RFS minority interest were up £28.1 billion, 6%. Within this, repos increased £13.7 billion, 20%, to £82.1 billion. Excluding repos, customer deposits were up £14.3 billion, 3%, to £428.6 billion, reflecting growth in UK Corporate, £13.7 billion, International Banking, £5.4 billion, UK Retail, £7.0 billion, Ulster Bank, £1.7 billion and Wealth, £0.7 billion, together with exchange rate and other movements of £3.4 billion. This was partially offset by decreases in Markets, £7.8 billion, US Retail & Commercial, £3.8 billion and Non-Core, £6.0 billion.

Debt securities in issue were down £49.2 billion, 18%, to £218.4 billion. Excluding the RFS minority interest disposal, they declined £28.0 billion, 11%, to £218.4 billion. Reductions in the level of certificates of deposit and commercial paper in Markets were partially offset by a programme of new term issuances totalling £38.4 billion.

Subordinated liabilities decreased by £10.6 billion, 28% to £27.1 billion or £4.5 billion, 14% excluding the disposal of the RFS minority interest. This reflected the redemption of £2.6 billion undated loan capital, debt preference shares and trust preferred securities under the liability management exercise completed in May, together with the conversion of £0.8 billion US dollar and Sterling preference shares and the redemption of £1.6 billion of other dated and undated loan capital, which were partially offset by the effect of exchange rate movements and other adjustments of £0.5 billion.

The Group's non-controlling interests decreased by £15.2 billion, primarily reflecting the disposal of the RFS minority interest, £14.4 billion, the majority of the RBS Sempra Commodities JV business, £0.6 billion, and the life assurance business, £0.2 billion.

Owner's equity decreased by £2.6 billion, 3%, to £75.1 billion. This was driven by the partial redemption of preference shares and paid-in equity, £3.1 billion less related gains of £0.6 billion, the attributable loss for the period, £1.1 billion, together with an increase in own shares held of £0.7 billion and higher losses in available-for-sale reserves, £0.3 billion. Offsetting these reductions were the issue of £0.8 billion ordinary shares on conversion of US dollar and Sterling non-cumulative preference shares classified as debt and exchange rate and other movements, £1.2 billion.

Business review [continued](#)

Cash flow

	2011	2010	2009
	£m	£m	£m
Net cash flows from operating activities	3,325	19,291	(992)
Net cash flows from investing activities	14	3,351	54
Net cash flows from financing activities	(1,741)	(14,380)	18,791
Effects of exchange rate changes on cash and cash equivalents	(1,473)	82	(8,592)
Net increase in cash and cash equivalents	125	8,344	9,261

2011

The major factors contributing to the net cash inflow from operating activities of £3,325 million were the elimination of foreign exchange differences of £2,702 million, depreciation and amortisation of £1,875 million and inflow from other items of £2,900 million, partially offset by the net operating loss before tax of £708 million from continuing and discontinued operations and the decrease of £3,444 million in operating assets and liabilities.

Net cash inflows from investing activities of £14 million related to the net inflows from sales of securities of £3,074 million, and sale of property, plant and equipment of £1,840 million offset by net cash outflows from investments in business interests and intangible assets of £1,428 million and from the purchase of property, plant and equipment of £3,472 million.

Net cash outflows from financing activities of £1,741 million relate primarily to interest on subordinated liabilities of £714 million, repayment of subordinated liabilities of £627 million and redemption of non-controlling interests of £382 million.

2010

The major factors contributing to the net cash inflow from operating activities of £19,291 million were the increase of £17,095 million in operating assets less operating liabilities, depreciation and amortisation of £2,220 million and income taxes received of £565 million, partly offset by the net operating loss before tax of £940 million from continuing and discontinued operations.

Net cash flows from investing activities of £3,351 million relate to the net inflows from sales of securities of £4,119 million and investments in business interests and intangibles of £3,446 million. This was partially offset by the outflow of £4,112 million from investing activities of discontinued operations.

Net cash outflow from financing activities of £14,380 million primarily arose from the redemption of non-controlling interests of £5,282 million, dividends paid of £4,240 million, repayment of subordinated liabilities of £1,588 million and the redemption of preference shares of £2,359 million.

2009

The major factors contributing to the net cash outflow from operating activities of £992 million were the net operating loss before tax of £2,696 million from continuing and discontinued operations, the decrease of £15,964 million in operating liabilities less operating assets, partly offset by the elimination of foreign exchange differences of £12,217 million and other items of £5,451 million.

Net cash flows from investing activities of £54 million relate to the net sales and maturities of securities of £2,899 million and a net cash inflow of £105 million in respect of other acquisitions and disposals less the net cash outflow on disposals of property, plant and equipment of £2,950 million.

Net cash flows from financing activities of £18,791 million primarily arose from the capital raised from the issue of B shares of £25,101 million, the placing and open offer of £5,274 million and the issue of subordinated liabilities of £2,309 million. This was offset in part by the cash outflow on repayment of subordinated liabilities of £5,145 million, redemption of preference shares of £5,000 million, interest paid on subordinated liabilities of £1,746 million and dividends paid of £1,248 million.

Capital resources

The following table analyses the Group's regulatory capital resources on a fully consolidated basis at 31 December as monitored by the FSA for regulatory purposes.

	2011	2010	2009	2008	2007
	£m	£m	£m	£m	£m
Capital base					
Tier 1 capital	56,990	60,124	76,421	69,847	44,364
Tier 2 capital	8,546	9,897	15,389	32,223	33,693
Tier 3 capital	—	—	—	260	200
	65,536	70,021	91,810	102,330	78,257
Less: Supervisory deductions	(4,828)	(4,732)	(4,565)	(4,155)	(10,283)
Total regulatory capital	60,708	65,289	87,245	98,175	67,974
Risk-weighted assets (1)					
Credit risk	344,300	385,900	513,200	551,300	
Counterparty risk	61,900	68,100	56,500	61,100	
Market risk	64,000	80,000	65,000	46,500	
Operational risk	37,900	37,100	33,900	36,900	
	508,100	571,100	668,600	695,800	
Asset Protection Scheme relief	(69,100)	(105,600)	(127,600)	n/a	
	439,000	465,500	541,000	695,800	
Banking book:					
On-balance sheet					480,200
Off-balance sheet					84,600
Trading book					44,200
					609,000
Risk asset ratios	%	%	%	%	%
Core Tier 1	10.6	10.7	11.0	6.6	4.5
Tier 1	13.0	12.9	14.1	10.0	7.3
Total	13.8	14.0	16.1	14.1	11.2

Note:

(1) The data for 2008 onwards are on a Basel II basis; 2007 is on a Basel I basis.

It is the Group's policy to maintain a strong capital base, to expand it as appropriate and to utilise it efficiently throughout its activities to optimise the return to shareholders while maintaining a prudent relationship between the capital base and the underlying risks of the business. In carrying out this policy, the Group has regard to the supervisory requirements of the Financial Services Authority (FSA). The FSA uses Risk Asset Ratio (RAR) as a measure of capital adequacy in the UK banking sector, comparing a bank's capital resources with its risk-weighted assets (the assets and off-balance sheet exposures are 'weighted' to reflect the inherent credit and other risks); by international agreement, the RAR should be not less than 8% with a Tier 1 component of not less than 4%. At 31 December 2011, the Group's total RAR was 13.8% (2010 - 14.0%) and the Tier 1 RAR was 13.0% (2010 - 12.9%). For further information refer to Balance sheet management: Capital management on pages 68 to 73.

Business review Risk and balance sheet management

Risk and balance sheet management

In this section (pages 58 to 207) of the Business review, certain information has been audited and is part of the Group's financial statements as permitted by IFRS 7. Other disclosures are unaudited and are labelled with an asterisk (*). In this section, the 2009 data relate to the Group before RFS Holdings minority interest (RFS MI).

Introduction*

All the disclosures in this section (pages 58 to 67) are unaudited as indicated by an asterisk (*).

Risk management plays an integral role in the delivery of the Group's strategic goal to be a safe and secure banking group. The implementation of a stronger and more effective culture of risk management and control provides the platform necessary to address historical vulnerabilities, rebuild upon the Group's core strengths and position it on a sustainable and profitable path for future growth.

Financial strength and resilience are at the heart of the Group's Strategic Plan. The Group has defined this level of robustness as that which is capable of achieving and sustaining a standalone credit rating (i.e. without government support) that is in line with those of its strongest international peers.

Given this central aim, in 2009 the Group Board set out four key strategic risk objectives, aligned to the Group's Strategic Plan. These are to:

- maintain capital adequacy: to ensure that the Group has sufficient (and easily accessible) capital resources to meet regulatory requirements and to cover the potential for unexpected losses in its asset portfolio;
- deliver stable earnings growth: to ensure that strategic growth is based around a longer-term risk versus reward consideration, with significantly lower volatility in underlying profitability than was seen over the previous five years;
- ensure stable and efficient access to funding and liquidity: such that the Group has sufficient funding to meet its obligations, taking account of the constraint that some forms of funding may not be available when they are most needed; and
- maintain stakeholder confidence: to ensure that stakeholders have confidence in the Group's recovery plan, its ability to deliver its strategic objectives and the effectiveness of its business culture and operational controls.

Each objective is essential in its own right, but also mutually supportive of the others.

These strategic risk objectives are the bridge between the Group-level business strategy and the frameworks, limits and tolerances that are used to set risk appetite and manage risk in the business divisions on a day-to-day basis.

In 2011, the Group made significant progress in strengthening its approach to risk management in an external environment that remained challenging.

The task of setting a comprehensive risk appetite and aligning it with the Group's business strategy demands a clear understanding of the types of risk the Group faces and their potential size. With this goal in mind, over the past year the Group has developed a catalogue of the risks it faces (a risk taxonomy) and undertaken a Group-wide material risk assessment to analyse the scale of each risk and the potential interactions between them (for a detailed discussion of risk appetite, see page 59).

The delivery of proactive and effective risk management relies on high quality data inputs on which to make assessments. It also requires robust forward-looking measurement and stress testing capabilities (see stress testing on page 60). Both of these areas continue to be enhanced and improvements embedded across the Group.

Risk control frameworks are used to identify and address concentrations of risk. These systems are reinforced by a Group Policy Framework (see page 60), which was enhanced during 2011, with assurance activity ongoing to ensure the policy standards it comprises remain appropriate.

Effective risk management also requires a robust governance framework. During 2011, the roles and responsibilities of the Executive Risk Forum and its supporting committees were reviewed and more clearly defined (see pages 62 to 64).

The Group has launched a common set of values for the risk community that impact directly on behaviours and help to engender a risk management function that is widely respected and valued across the Group. A Group-wide policy that explicitly aligns remuneration with effective risk management has also been put in place.

The focus is now on fully embedding the Group's strategy for risk management into the day-to-day management of its businesses, as well as preparing the Group to face future challenges in a rapidly evolving external environment. More detailed discussions on how the Group strengthened its approach to risk management in 2011 and the areas of focus going forward is contained within the relevant sub-sections on the following pages.

* unaudited

Risk appetite*

The Group's focus on setting a clear risk appetite and embedding a strong culture of risk management and control is designed to ensure it is able to proactively identify and reduce risk exposures and has the resilience to respond effectively to any unforeseen shocks.

The Group's risk appetite identifies and establishes the level and type of risks that it is able and willing to take in order to:

- meet its strategic objectives - this includes the Group's stated objective of achieving and sustaining a standalone credit rating in line with those of its strongest international peers; and
- meet its wider obligations to stakeholders - the Group's Strategic Plan is built on the core foundations of serving its customers well, acting responsibly and creating sustainable value for its shareholders.

A clear risk appetite provides a greater understanding across the Group of the acceptable levels of risk for each business. It provides a solid platform from which the Group can focus on its key business strengths and competitive advantages over the long-term.

Approach and key principles

The Strategic Plan set key performance indicators for capital, leverage, liquidity and funding, aligned with the Group's strategic objectives. It also established a Non-Core division to manage, dispose of and run-off assets that the Group was seeking to exit from, which by definition were outside its appetite.

Building on these core foundations, the Group has developed a framework that sets and implements an appropriate risk appetite for the Group (and its main businesses), supported by a regular monitoring and review process.

Under this framework, risk appetite targets - based on both the quantitative and qualitative aspects of risk - have been set by the Group Board, aligned with Group and divisional strategic objectives. These targets support and augment the strategic, financial and risk controls that are already in place and help to shape the way the Group operates at all levels. Clear roles and responsibilities are established to measure, cascade and report performance against risk appetite and to provide assurances that business is being conducted within approved risk limits and tolerances.

The development of this framework has been based on the following best practice principles:

- strong leadership from the Group Board in establishing and setting risk appetite and in ensuring its purpose is understood and its use promoted as good business practice;
- a strong risk management culture, in which risk is clearly and meaningfully aligned with business behaviours and outcomes;
- a close collaborative partnership between the risk, strategy, treasury and finance functions that facilitates a broader internal debate on key issues; and
- clear accountability by each division (and business unit) for the level of risk it is prepared to take to achieve its business objectives.

Group-wide stress testing is used to assess whether strategic plans are consistent with risk appetite and to measure the key drivers of risk (down to business unit level), with mitigating actions identified whenever the risk profile is considered to be outside (or close to) acceptable levels (see page 60).

Design to delivery

The Group's risk appetite has been set by the Group Board and is now operational. Significant progress has been made in establishing the underlying framework and rolling it out across the Group and its divisions.

The key channels through which risk appetite is cascaded throughout and embedded in each division are:

- divisional risk appetite statements - each division has developed its own risk appetite statement, which is based on the four strategic risk objectives and is appropriate for its business plans but also aligned with the Group's risk appetite targets;
- risk control frameworks and limits - risk control frameworks set clear guidance on acceptable limits and tolerances for all material risk types (e.g. credit, market and country risk), aligned with the Group's risk appetite targets;
- Group operational and conduct risk appetite - the Group has developed a robust control environment to ensure it conducts its activities in accordance with its regulatory and other obligations; and
- culture, values and remuneration - a programme of communication, engagement and training is being rolled out across the Group to engender a wide understanding of the purpose of risk appetite.

The Group regards the implementation of its risk appetite framework as an essential step in driving the cultural change required to achieve its strategic objectives and a dynamic, ongoing process. The Board Risk Committee (see the Report of the Board Risk Committee on pages 226 to 229) reviews both the targets and the framework on a regular basis, to ensure they remain aligned to strategic objectives, business performance, emerging risks and changes in the external environment.

Business review Risk and balance sheet management [continued](#)

Introduction*: Stress testing

Stress testing describes the evaluation of a bank's financial position under severe but plausible stress scenarios. Stress testing refers to the application of individual stress tests and the broader framework under which these tests are developed, evaluated and used within the Group's decision-making process in the context of the wider economic environment.

Internal stress tests

The Group's stress testing framework is designed to embed stress testing as a key risk management technique into mainstream risk reporting, capital planning and business processes at both Group and divisional levels.

The Executive Risk Forum (see Risk governance on page 61) is the main body overseeing the Group's stress testing approach, processes and results. The forum is primarily responsible for reviewing and challenging the results of any Group-wide stress test and ensuring that, where necessary, appropriate management actions are undertaken. The Board Risk Committee will provide oversight and challenge as appropriate.

Stress testing forms part of the Group's risk and capital management framework and is a major component of the Basel III requirements. It highlights to senior management potential adverse unexpected outcomes related to a mixture of risks and provides an indication of how much capital might be required to absorb losses should adverse scenarios materialise.

Stress testing is used at both divisional and Group levels to assess risk concentrations and estimate the impact of stressed earnings, impairments and write-downs on capital as well as the liquidity and funding position of the Group. It determines overall capital adequacy under a variety of adverse scenarios.

A series of stress events are monitored on a regular basis to assess the potential impact of a severe yet plausible event on the Group. There are four core types of scenario stress testing:

- macroeconomic stress testing, which considers the impact on both earnings and capital for a range of scenarios;
- enterprise-wide stress testing, which considers scenarios that are not macroeconomic in nature but are sufficiently broad to entail multiple risks or affect multiple divisions and are likely to affect earnings, capital and funding;
- cross-divisional stress testing, which includes scenarios that affect multiple divisions due to their sensitivity to a common risk factor; and
- divisional and risk-specific stress testing, which is undertaken to support risk identification and management.

Portfolio analysis, using historical performance and forward-looking indicators of change, uses stress testing to assess potential exposure to events and seeks to quantify the impact of an adverse change in factors that drive the performance and profitability of a portfolio.

Industry-wide stress tests

The Group takes part in a number of industry-wide stress tests, in particular, the European Banking Authority Stress Test and IMF UK Financial Sector Assessment Program, results of which were published in July 2011. These confirmed that the Group remains well capitalised with a strong Core Tier 1 capital ratio and a strong Total capital

ratio under both baseline and adverse scenarios. During 2011, the Group also undertook the FSA anchor scenario test.

In December 2011, the European Banking Authority published the results of its recapitalisation exercise - a review of banks' actual capital positions on sovereign exposures - showing the Group had no overall capital shortfall after including the sovereign capital buffer.

Group Policy Framework*

Achieving and sustaining a robust control framework in line with those of the Group's strongest international peers is critical to achieving the successful delivery of the Group's risk objectives.

With this goal in mind, the Group Policy Framework (GPF) has been revised and broadened. The GPF consolidates a large number of individual policies under a consistent and structured overarching framework for conduct, control and governance. It provides clear guidance and controls on how the Group does business, linked to its risk appetite, its business conduct and compliance responsibilities and its focus on delivering a control environment consistent with best practice against relevant external benchmarks.

The GPF and related initiatives aim to ensure that:

- the Group has clear control standards and ethical principles to cover the risks that it faces to support effective risk management and meet regulatory and legal requirements;
- policies are followed across the Group and compliance can be clearly evidenced, assessed and reported by line management; and
- the control environment is monitored and overseen through good governance.

Communication and training programmes are provided to all relevant staff as the policies are embedded, ensuring that staff are aware of their responsibilities. The GPF is structured to ensure that policy standard owners and sponsors review their policies on a regular basis, with any identified shortfalls against industry best practice documented and addressed within an agreed time frame.

* unaudited

The GPF was introduced in 2009. Enhancements applied in 2011 included the following:

- the Group's policy standards, which comprise the GPF, were rewritten to ensure they clearly express the mandatory controls required to mitigate the key risks the Group faces;
- all of the Group's policy standards were benchmarked against relevant external reference points such as peer organisations to challenge and verify the content of the policy standards. Where identified, further improvements to the policy standards are now being implemented;
- for each policy standard, appropriate risk based assurance activity was introduced to ensure each division is appropriately controlled and compliance with policy can be demonstrated; and
- risk appetite has its own policy standard within the GPF that clearly sets out roles and responsibilities in relation to the implementation of the risk appetite framework and provides assurance that risks are being actively managed within approved levels and tolerances.

The GPF will continue to be improved and embedded. The results of assurance activity, monitoring and analysis of the internal and external environment will be used to reassess the policy standards on a regular basis.

Risk governance*

The Group is committed to the highest standards of corporate governance in every aspect of the business, including risk management. A key aspect of the Group Board's responsibility as the main decision making body at Group level is the setting of Group risk appetite to ensure that the levels of risk that the Group is willing to accept in the attainment of its strategic business and financial objectives are clearly understood.

To enable the Group Board to carry out its objectives, it has delegated authority to senior Board and executive committees, as required and appropriate. A number of key committees specifically consider risk across the Group, as set out in the diagram below.

Notes:

- (1) The Capital and Stress Testing Committee is a sub-committee of the Group Asset and Liability Management Committee.
- (2) The following specialist sub-committees report directly to the Group Risk Committee: Global Markets Risk Committee, Group Country Risk Committee, Group Models Committee, Group Credit Risk Committee and Operational Risk Executive Committee. In addition, Divisional Risk Committees report to the Group Risk Committee.

Business review Risk and balance sheet management [continued](#)

Introduction*: Risk governance continued

The key risk responsibilities of each of these committees as well as their membership are set out in the table below. Further information on the Group Board and Board Committees is available on page 210.

These committees are supported at a divisional level by a risk governance structure embedded in the business. These committees play a key role in ensuring that the Group's risk appetite is supported by effective risk management frameworks, limits and policies, together with clear accountabilities for approval, monitoring, oversight, reporting and escalation.

During 2011, the roles and responsibilities of the Executive Risk Forum and its supporting committees were reviewed and more clearly defined, to meet the future needs of the Group.

In particular, the Executive Risk Forum was repositioned as a strategic committee focusing on strategic level risks and issues, and retaining the approval authority for the most material risk limits and decisions. The Group Risk Committee was refocused to operate primarily as an oversight committee across risk types, concentrating particularly on thematic and emerging risks and issues.

The committees that sit below the Group Risk Committee were streamlined significantly, aligned more closely to key risk types and given clearer empowerment and accountability where required.

A Capital and Stress Testing Committee was created as a sub-committee of the Group Asset and Liability Management Committee to cover risk and capital matters.

The improvements made in 2011 provide further clarity of roles and responsibilities, as well as clear reporting lines and accountabilities. They promote clearer and timelier decision making and more effective risk management and oversight.

The role and remit of the Group committees is set out below. These committees are supported at a divisional level by a risk governance structure embedded in the business.

Board/Committee	Risk focus	Membership
Group Board	The Group Board ensures that the Group manages risk effectively through approving and monitoring the Group's risk appetite, considering Group stress scenarios and agreed mitigants and identifying longer-term strategic threats to the Group's business operations.	The Board of directors
Executive Committee	The Executive Committee considers recommendations on risk management matters referred by the Executive Risk Forum and/or Group Risk Committee, including recommendations on risk appetite, risk policies and risk	Group Chief Executive Group Finance Director Chief Administrative Officer Chief Executive Officers of divisions Head of Restructuring and Risk

management strategies.

Board Risk
Committee

The Board Risk Committee provides oversight and advice to the Group Board on current and potential future risk exposures of the Group and future risk strategy, including determination of risk appetite and tolerance. It also provides a risk review of remuneration arrangements and provides advice to the Remuneration Committee. It operates under delegated authority from the Group Board.

At least three independent non-executive directors, one of whom is the Chairman of the Group Audit Committee.

Introduction*:Risk coverage

The main risk types faced by the Group are presented below, together with a summary of the key areas of focus and how the Group managed these risks in 2011.

Risk type	Definition	Features	How the Group managed risk and the focus in 2011
Capital, liquidity and funding risk	The risk that the Group has insufficient capital or is unable to meet its financial liabilities as they fall due.	<p>Potential to disrupt the business model and stop normal functions of the Group.</p> <p>Potential to cause the Group to fail to meet the supervisory requirements of regulators.</p> <p>Significantly driven by credit risk losses.</p>	<p>The Group plans for and maintains an adequate amount and mix of capital consistent with its risk profile. This ensures that in any foreseeable scenario the Group holds minimum capital to meet the standards and requirements of investors, regulators and depositors. The amount of capital required is determined through risk assessments and stress testing.</p> <p>Active run-off of capital intensive assets in Non-Core and other risk mitigation left the Core Tier 1 ratio strong at 10.6%, despite a £21 billion uplift in RWAs from the implementation of CRD III in December 2011. Refer to pages 68 to 73.</p> <p>Maintaining the structural integrity of the Group's balance sheet requires active management of both asset and liability portfolios as necessary. Strong term debt issuance and planned reductions in the funded balance sheet enabled the Group to strengthen its liquidity and funding position as market conditions worsened. Refer to pages 74 to 88.</p>
Credit risk (including counterparty risk)	The risk that the Group will incur losses owing to the failure of a customer to meet its obligation to settle outstanding amounts.	<p>Loss characteristics vary materially across portfolios.</p> <p>Significant link between losses and the macroeconomic environment.</p> <p>Can include concentration risk - the risk of loss due to the concentration of credit risk to a specific product, asset class, sector or counterparty.</p>	<p>The Group manages credit risk based on a suite of credit approval and risk concentration frameworks and associated risk management systems and tools. It also continues to reduce the risk associated with legacy exposures through further reductions in Non-Core assets.</p> <p>During 2011, asset quality continued to improve, resulting in loan impairment charges 21% lower than in 2010 despite continuing challenges in Ulster Bank Group (Core and Non-Core) and corporate real estate portfolios. The Group continued to make progress in reducing key credit concentration risks, with credit exposures in excess of single name concentration limits</p>

declining 15% during the year and exposure to commercial real estate declining 14%. Refer to pages 92 to 165.

Country risk	The risk of material losses arising from significant country-specific events.	Can arise from sovereign events, economic events, political events, natural disasters or conflicts.	All country exposures are covered by the Group's country risk management framework. This includes active management of portfolios either when these have been identified as exhibiting signs of stress through the Group's country Watchlist process or when it is otherwise considered appropriate. Portfolio reviews are undertaken to align country risk profiles to the Group's country risk appetite in light of economic and political developments.
		Potential to affect parts of the Group's credit portfolio that are directly or indirectly linked to the country in question.	Sovereign risk increased in 2011, resulting in rating downgrades for a number of countries, including several eurozone members. This resulted in an impairment charge recognised by the Group in 2011 in respect of available-for-sale Greek government bonds. In response, the Group further strengthened its country risk appetite setting and risk management systems during the year and brought a number of advanced countries under limit control. This contributed to a reduction in exposure to a range of countries. Refer to pages 166 to 186.

Business review Risk and balance sheet management [continued](#)

Introduction*: Risk coverage continued

Risk type	Definition	Features	How the Group managed risk and the focus in 2011
Market risk	The risk arising from changes in interest rates, foreign currency, credit spreads, equity prices and risk related factors such as market volatilities.	Frequent small losses which are material in aggregate. Infrequent large material losses due to stress events.	<p>A comprehensive structure is in place aimed at ensuring the Group does not exceed its qualitative and quantitative tolerance for market risk.</p> <p>The Group's market risk policy statements set out its qualitative tolerance for market risk. They define the governance, responsibilities and requirements for the identification, measurement, analysis, management and communication of the market risk arising from the Group's trading and non-trading investment activities.</p> <p>The Group Market Risk limit framework expresses the Group's quantitative tolerance for market risk. The Group limit metrics capture, in broad terms, the full range of market risk exposures, ensuring the risk is appropriately defined and communicated.</p>
Insurance risk	The risk of financial loss through fluctuations in the timing, frequency and/or severity of insured events, relative to the expectations at the time of underwriting.	Frequent small losses which are material in aggregate. Infrequent large material losses.	<p>The Group's framework for managing insurance risk, with associated risk appetite and policy frameworks, is designed to ensure insurance risks are appropriately identified, controlled, managed, monitored, reported and mitigated.</p> <p>Procedures are in place to address any issues, such as breaches of risk appetite that are identified through monitoring and reporting activities. If a breach occurs, an action plan to address the issue is developed, implemented and monitored to ensure the risk is adequately mitigated or a decision is taken to accept it.</p>

During 2011, focus on insurance risk appetite resulted in the de-risking and significant re-pricing of certain classes of business and exiting some altogether. Refer to page 194.

Operational risk	The risk of loss resulting from inadequate or failed processes, people, systems or from external events.	Frequent small losses. Infrequent material losses.	The objective of operational risk management is to manage it to an acceptable level. Processes to achieve this objective take into account the cost of minimising the risk against the resultant reduction in exposure.
------------------	--	--	---

During 2011, the Group took steps to enhance its management of operational risks. This was particularly evident in respect of risk appetite, the Group Policy Framework, risk assessment, scenario analysis and statistical modelling for capital requirements.

The level of operational risk remains high due to the scale of structural change occurring across the Group, the pace of regulatory change, the economic downturn and other external threats, such as e-crime. Refer to pages 194 to 197.

* unaudited

Risk type	Definition	Features	How the Group managed risk and the focus in 2011
Compliance risk	The risk arising from non-compliance with national and international laws, rules and regulations.	<p>Adverse impacts on strategy, capital structure, business models and operational effectiveness.</p> <p>Financial cost of adapting to changes in laws, rules or regulations or of penalties for non-compliance.</p>	<p>Management of compliance risk entails early identification and effective management of changes in legislative, regulatory and other requirements that may affect the Group.</p> <p>It also requires active engagement with regulators, close analysis of emerging regulatory themes, and interaction with rule-makers and legislators.</p> <p>Within the GPF, compliance risk policies define minimum standards to which all businesses must adhere. GPF policies are supplemented, where appropriate, by divisional policies to meet local product or market requirements.</p> <p>During 2011, the Group managed the increased levels of scrutiny and legislation by enlarging the capacity of its compliance, anti-money laundering and regulatory affairs teams and taking steps to improve its operating models, tools, systems and processes. Refer to pages 197 to 202.</p>
Reputational risk	The risk of brand damage arising from financial and non-financial events arising from the failure to meet stakeholders' expectations of the Group's performance and behaviour.	<p>Potential to put the entire business at risk. Otherwise, could lead to negative publicity, loss of revenue, costly litigation or a decline in customer base.</p> <p>Can arise from actions taken by the Group or a failure to take action.</p>	<p>The Group Sustainability Committee and risk committees continue to assess reputational risk issues. In 2011, an Environmental, Social and Ethical (ESE) Risk Policy was developed with sector ESE risk appetite positions drawn up to assess the Group's appetite to support customers in sensitive sectors including defence, oil and gas. This also included the establishment of divisional reputational risk committees.</p> <p>Stakeholder engagement was broadened with the implementation of formal sessions between the Group Sustainability Committee and relevant advocacy groups and non-governmental organisations. Refer to page 202.</p>
Business risk	The risk of lower-than-expected revenues and/or	Influenced by many factors such as pricing, sales volume,	Forecasts of revenues and costs are tested against a range of stress scenarios to identify key risk drivers and the

	higher-than-expected operating costs.	input costs, regulations and market and economic conditions.	appropriate actions to address and manage them. Business risk is incorporated within the Group's risk appetite target for earnings volatility that was set in 2011. Refer to page 202.
Pension risk	The risk that the Group will have to make additional contributions to its defined benefit pension schemes.	Funding position can be volatile due to the uncertainty of future investment returns and the projected value of schemes' liabilities.	The Group manages pension risk from a sponsor perspective using a framework that encompasses risk reporting and monitoring, stress testing, modelling and an associated governance structure that helps ensure the Group is able to fulfil its obligation to support the defined benefit pension schemes to which it has exposure. In 2011, the Group focused on improved stress testing and risk governance mechanisms. This included the establishment of the Pension Risk Committee and the articulation of its view of risk appetite for the various Group pension schemes. Refer to pages 203 and 204.

Each risk type maps into the Group's risk appetite framework and contributes to the overall achievement of its strategic objectives with underlying frameworks and limits. The key frameworks and developments over the past year are described in the relevant sections of the following pages.

Business review Risk and balance sheet management [continued](#)

Balance sheet management

All disclosures in this section (pages 68 to 91) are audited unless otherwise indicated by an asterisk (*).

Two of the Group's four key strategic risk objectives relate to the maintenance of capital adequacy and ensuring stable and efficient access to liquidity and funding. This section on balance sheet management explains how the Group is performing on achieving these objectives.

Capital management

Introduction*

The Group aims to maintain an appropriate level of capital to meet its business needs and regulatory requirements as capital adequacy and risk management are closely aligned. The Group operates within an agreed risk appetite whilst optimising the use of shareholders' funds to deliver sustainable returns.

The appropriate level of capital is determined based on the dual aims of: (i) meeting minimum regulatory capital requirements; and (ii) ensuring the Group maintains sufficient capital to uphold investor and rating agency confidence in the organisation, thereby supporting the business franchise and funding capacity.

Governance*

The Group Asset and Liability Management Committee (GALCO) is responsible for ensuring the Group maintains adequate capital at all times. The newly established Capital and Stress Testing Committee (CAST) is a cross-functional body driving and directing integrated risk capital activities including stress testing economic capital and capital allocation. These activities have linkages to capital planning, risk appetite and regulatory change. CAST reports through GALCO and comprises senior representatives from Risk Management, Group Finance and Group Treasury.

Determining appropriate capital*

The minimum regulatory capital requirements are identified by the Group through the Internal Capital Adequacy Assessment Process and then agreed between the Group Board and the appropriate supervisory authority.

The Group's own determination of how much capital is sufficient is derived from the desired credit rating level and the application of both internally and externally defined stress tests that identify potential changes in capital ratios over time.

Monitoring and maintenance*

Based on these determinations, which are continually reassessed, the Group aims to maintain capital adequacy both at Group level and in each regulated entity.

The Group operates a rigorous capital planning process aimed at ensuring the capital position is controlled within the agreed parameters. This incorporates regular re-forecasts of the capital positions of the regulated entities and the overall Group. In the event that the projected position deteriorates beyond acceptable levels, the Group would issue further capital and/or revise business plans accordingly.

Stress testing approaches are used to determine the level of capital required to ensure the Group remains adequately capitalised.

Capital allocation*

Capital resources are allocated to the Group's businesses based on key performance parameters agreed by the Group Board in the annual strategic planning process. Principal among these is a profitability metric which assesses the effective use of the capital allocated to the business. Projected and actual return on equity is assessed against target returns set by the Group Board. The allocations also reflect strategic priorities and balance sheet and funding metrics.

Economic profit is also planned and measured for each division during the annual planning process. It is calculated by deducting the cost of equity utilised in the particular business from its operating profit and measures the value added over and above the cost of equity.

The Group aims to deliver sustainable returns across the portfolio of businesses with projected business returns stressed to test key vulnerabilities.

The divisions use return on capital metrics when making pricing decisions on products and transactions with a view to ensuring customer activity is appropriately aligned with Group and divisional targets and allocations.

The FSA uses the risk asset ratio as a measure of capital adequacy in the UK banking sector, comparing a bank's capital resources with its RWAs (the assets and off-balance sheet exposures are weighted to reflect the inherent credit and other risks); by international agreement the risk asset ratios should not be less than 8% with a Tier 1 component of not less than 4%.

* unaudited

Capital adequacy*

The Group's RWAs and risk asset ratios, calculated in accordance with FSA definitions, are set out below.

	Statutory		Proportional	
	2011	2010	2009	2009
Risk-weighted assets by risk	£bn	£bn	£bn	£bn
Credit risk	344.3	385.9	513.2	410.4
Counterparty risk	61.9	68.1	56.5	56.5
Market risk	64.0	80.0	65.0	65.0
Operational risk	37.9	37.1	33.9	33.9
Asset Protection Scheme relief	508.1	571.1	668.6	565.8
	(69.1)	(105.6)	(127.6)	(127.6)
	439.0	465.5	541.0	438.2
Risk asset ratios	%	%	%	%
Core Tier 1	10.6	10.7	11.0	11.0
Tier 1	13.0	12.9	14.1	14.4
Total	13.8	14.0	16.1	16.3

Key points*

- Market risk RWAs were impacted by the new CRD III rules but decreased overall by £16 billion in 2011 reflecting de-risking of Non-Core and a reduction in trading VaR.
- APS relief decreased by £36.5 billion, reflecting pool movements, assets moving into default and changes in risk parameters.

Pillar 3*

The Group publishes its Pillar 3 Disclosures on its website, providing a range of additional information relating to Basel II and risk and capital management across the Group. The disclosures focus on capital resources and adequacy and discuss a range of credit risk measures and management methods (such
