MIMEDX GROUP, INC.  
(A DEVELOPMENT STAGE ENTERPRISE)  
NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE THREE MONTH PERIODS ENDED JUNE 30, 2009 AND 2008 AND THE PERIOD FROM  
INCEPTION (NOVEMBER 22, 2006)  
THROUGH JUNE 30, 2009

**1. Basis of Presentation:**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ( GAAP ) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulations S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the results of operations for the periods presented have been included. Operating results for the three months ended June 30, 2009 and 2008 are not necessarily indicative of the results that may be expected for the fiscal year. The balance sheet at March 31, 2009 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by GAAP for complete financial statements.

You should read these condensed consolidated financial statements together with the historical consolidated financial statements of the Company for the years ended March 31, 2009 and 2008, and the period from inception (November 22, 2006) through March 31, 2009 included in our Annual Report on Form 10-K for the year ended March 31, 2009, filed with the Securities and Exchange Commission ( SEC ) on June 15, 2009.

MiMedx, Inc. ( MiMedx ) was incorporated in Florida in 2006. MiMedx entered into an Agreement and Plan of Merger ( Merger Agreement ) on January 29, 2008 with a publicly-traded Nevada Corporation, Alynx, Co. ( Alynx ), a public shell company, which was consummated on February 8, 2008. As a result of this transaction, MiMedx shareholders owned approximately 97% of the outstanding shares, thus giving MiMedx substantial control.

Under GAAP, MiMedx was deemed to be the accounting acquirer since the shareholders of MiMedx own a substantial majority of the issued and outstanding shares, and thus this reverse merger was accounted for as a capital transaction. The historical financial statements are a continuation of the financial statements of the accounting acquirer and the capital structure of the consolidated enterprise is now different from that appearing in the historical financial statements of the accounting acquirer in earlier periods due to the recapitalization.

On March 31, 2008, MiMedx Group, Inc. a Florida corporation, and Alynx merged. As a result of this transaction, MiMedx Group, Inc. became the surviving corporation. The Company refers to MiMedx Group, Inc., a development stage company, as well as its two operating subsidiaries: MiMedx, Inc. and SpineMedica, LLC.

The financial statements include the accounts of MiMedx Group, Inc. and its wholly-owned subsidiaries MiMedx, Inc. and SpineMedica, LLC. All significant inter-company balances and transactions have been eliminated.

**2. Significant accounting policies:**

*Net loss per share*

Basic net loss per common share is computed using the weighted-average number of common shares outstanding during the period. Diluted net loss per common share is typically computed using the weighted-average number of common and dilutive common equivalent shares from stock options, warrants and convertible debt using the treasury stock method.

**Table of Contents**

For all periods presented, diluted net loss per share is the same as basic net loss per share, as the inclusion of equivalent shares from outstanding common stock options, warrants and convertible debt would be anti-dilutive. The following table sets forth the computation of basic and diluted net loss per share:

	Three Months Ended June 30,	
	2009	2008
Net loss	\$ (1,597,543)	\$ (3,151,882)
Denominator for basic earnings per share-weighted average shares	39,244,628	37,073,595
Effect of dilutive securities: Stock options and warrants outstanding <sup>(a)</sup>		
Denominator for diluted earnings per share weighted average shares adjusted for dilutive securities	39,244,628	37,073,595
Loss per common share basic and diluted	\$ (.04)	\$ (.09)

(a) Securities outstanding that were excluded from the computation, prior to the use of the treasury stock method, because they would have been anti-dilutive are as follows:

	Three Months Ended June 30,	
	2009	2008
Stock options, warrants, and convertible debt	12,423,521	4,581,501

*Recently issued accounting pronouncements:*

The Financial Accounting Standards Board ( FASB ) issued SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles ( SFAS No. 168 ), on June 29, 2009 and, in doing so, authorized the Codification as the sole source for authoritative U.S. GAAP. SFAS No. 168 will be effective for financial statements issued for reporting periods that end after September 15, 2009. Once effective, it will supersede all accounting standards in U.S. GAAP, aside from those issued by the SEC. SFAS No. 168 replaces SFAS No. 162 to establish a new hierarchy of GAAP sources for non-governmental entities under the FASB Accounting Standards Codification.

Management has adopted the provisions set forth in SFAS No. 165, *Subsequent Events*, and considered subsequent events through August 7, 2009.

**Table of Contents****3. Liquidity and management's plans:**

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. For the period from inception (November 22, 2006) through June 30, 2009 the Company experienced net losses of \$31,539,066 (unaudited) and cash used in operations of \$18,839,290 (unaudited). As of June 30, 2009, the Company has not emerged from the development stage. Assuming it receives no additional funds, the Company estimates that it has sufficient funds to operate through mid-September 2009. In order to fund on-going operating cash requirements beyond that point or to further accelerate and execute its business plan, the Company will need to raise significant additional funds. In view of these matters, the ability of the Company to continue as a going concern is dependent upon the Company's ability to secure additional financing sufficient to support its research and development activities, approval of developed products for sale by regulatory authorities, including the FDA, and ultimately to generate revenues sufficient to cover all costs. Since inception, the Company has financed its activities principally from the sale of equity securities and convertible debt. While the Company has been successful in the past in obtaining the necessary capital to support its operations, there is no assurance that the Company will be able to obtain additional equity capital or other financing under commercially reasonable terms and conditions, or at all. Furthermore, if the Company issues equity or debt securities to raise additional funds, existing shareholders may experience dilution and the new equity or debt securities it issues may have rights, preferences and privileges senior to those of existing shareholders. In addition, if the Company raises additional funds through collaboration, licensing or other similar arrangements, it may be necessary to relinquish valuable rights to products or proprietary technologies, or grant licenses on terms that are not favorable. If the Company cannot raise funds on acceptable terms, the Company will not be able to continue as a going concern, develop or enhance products, obtain the required regulatory clearances or approvals, execute the Company's business plan, take advantage of future opportunities, or respond to competitive pressure or unanticipated customer requirements. Any of these events would adversely affect the Company's ability to achieve the Company's development and commercialization goals, which could have a material adverse effect on the Company's business, results of operations and financial condition. The Company's financial statements do not include any adjustments relating to the recoverability or classification of assets or the amounts of liabilities that might result from the outcome of these uncertainties.

**4. Intangible assets and royalty agreement:**

Intangible assets activity is summarized as follows:

	<b>License (a)</b>	<b>License (b)</b>	<b>License (c)</b>	<b>Intellectual Property (d)</b>	<b>Total</b>
<b>April 1, 2009</b>	\$ 781,866	1,899,471	2,336,400	98,600	\$ 5,116,337
<b>Additions</b>					
<b>Amortization</b>	(24,900)	(74,004)	(64,900)	(2,900)	(166,704)
<b>June 30, 2009</b>	756,966	1,825,467	2,271,500	95,700	4,949,633

(a) On January 29, 2007, the Company acquired a license from Shriners Hospitals for Children and University of South Florida

Research Foundation, Inc. The acquisition price of this license was a one-time fee of \$100,000 and 1,120,000 shares of common stock valued at \$896,000 (based upon the estimated fair value of the common stock on the transaction date). Within thirty days after the receipt by the Company of approval by the FDA allowing the sale of the first licensed product, the Company is required to pay an additional \$200,000 to the licensor. This amount is not recorded as a liability based on its contingent nature. The Company will also be required to pay a royalty of 3% on all commercial sales revenues of the licensed products.

- (b) License from SaluMedica, LLC (SaluMedica) for the use of

certain  
developed  
technologies  
related to spine  
repair. This  
license was  
acquired  
through the  
acquisition of  
SpineMedica  
Corp.

**Table of Contents**

- (c) On March 31, 2008, the Company entered into a license agreement for the use of certain developed technologies related to surgical sheets made of polyvinyl alcohol cryogel. The acquisition price of the asset was 400,000 shares of common stock valued at \$2,596,000 (based upon the closing price of the common stock on the transaction date). The agreement also provides for the issuance of an additional 600,000 shares upon the Company meeting certain milestones related to future sales. There are no amounts accrued for this obligation due to its contingent nature.
- (d) During the year ended March 31, 2008,

the Company issued 200,000 stock options valued at \$116,000 for certain technologies relating to medical device designs for products used in hand surgery. The agreement also provides for royalty payments upon approval and sale of certain products. There are no amounts accrued for this obligation due to its contingent nature.

Expected future amortization of intangible assets is as follows:

Year ending June 30,	
2010	666,821
2011	666,821
2012	666,821
2013	666,821
2014	666,821
Thereafter	1,615,528
	\$ 4,949,633

##### **5. Convertible Debt:**

In April 2009, the Company commenced a private placement to sell 3% Convertible Senior Secured Promissory Notes (the Notes) to accredited investors. The Company completed the offering on June 17, 2009 and received aggregate proceeds of \$3,472,000; also representing the face value of the Notes. The aggregate proceeds include \$250,000 of Notes sold to the Chairman of the Board, President and CEO, and \$150,000 of Notes sold to one other director.

In total, the Notes are convertible into up to 6,944,000 shares of common stock at \$.50 per share (a) at any time upon the election of the holder of the note; (b) automatically immediately prior to the closing of the sale of all or substantially all of the assets or more than 50% of the equity securities of the Company by way of a merger transaction or otherwise which would yield a price per share of not less than \$.50; or (c) at the election of the Company, at such time as the closing price per share of the Company's common stock (as reported by the OTCBB or on any national securities exchange on which the Company's shares may be listed, as the case may be) closes at not less than \$1.50 for not less than twenty (20) consecutive trading days in any period prior to the maturity date. If converted, the Common Stock will be available to be sold following satisfaction of the applicable conditions set forth in Rule 144. The Notes mature in 3 years and earn interest at 3% per annum on the outstanding principal amount payable in cash on the maturity date or convertible into shares of common stock of the Company as provided for

above. The Notes are secured by a first priority lien on all of the assets, including intellectual property, of MiMedx, Inc. The Notes shall be junior in payment and lien priority to any bank debt of the Company in an amount not to exceed \$5,000,000 hereafter incurred by the Company.

We have evaluated the Notes for accounting purposes under Statements of Financial Accounting Standards No. 133 *Derivative Financial Instruments and Hedging Activities* ( SFAS 133 ) and have determined that the conversion feature meets the conventional-convertible exemption and, accordingly, bifurcation and fair-value measurement of the conversion feature is not required. We are required to re-evaluate this conclusion upon each financial statement closing date while the Notes are outstanding. Notwithstanding, the Notes were issued with a beneficial conversion feature, having an intrinsic value of approximately \$676,500. The intrinsic value of the beneficial conversion feature was determined in accordance with EITF No. 98-5 *Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios* by comparing the contracted conversion price to the fair value of the common stock on the date of the respective Notes. A beneficial conversion feature only exists when the embedded conversion feature is in-the-money at the commitment date.

**Table of Contents**

As a result of the beneficial conversion feature, the Notes were recorded net of a discount of \$676,500 related to the beneficial conversion feature, which is recorded in paid-in capital, and the discount will be amortized through periodic charges to interest expense over the term of the Notes using the effective interest method.

In conjunction with the offering the Company is obligated to pay a placement fee of \$138,040 of which \$127,540 was paid prior to June 30, 2009. In addition the Company issued warrants to the placement agents totaling 315,520 at an exercise price of \$.50 per share. The fair value of the warrants was determined to be \$98,574 using the Black-Scholes-Merton valuation technique. The total direct costs of \$236,614 are recorded as deferred financing costs and are being amortized over the term of the Notes using the effective interest method. Further, the placement agent warrants are classified in stockholders' equity because they achieved all of the requisite conditions for equity classification in accordance with EITF 00-19 *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*.

**6. Common Stock Placements:***September 2008 Private Placement*

On September 25, 2008, the Company commenced a private placement of up to 13,333,333 units (at \$3.00 per unit) wherein each unit consists of one share of common stock and a warrant to purchase one share of common stock for \$3.50 over a five year term (the September 2008 Private Placement). The Company sold 487,500 units for total proceeds of \$1,462,500 under the September 2009 Private Placement.

In connection with the September 2008 Private Placement, the Company entered into a Registration Rights Agreement related solely to the common stock that requires the Company to among other things, (i) file a Registration Statement within 90 days from the closing of the September 2008 Private Placement; and (ii) make required filings under the Securities Act of 1933 and the Securities and Exchange Act of 1934. It also provides for (i) achieving and maintaining effectiveness; and (ii) listing the shares on any exchange on which the Company's shares are then listed and maintain the listing; each on a best-efforts basis. The Registration Rights Agreement does not provide for an alternative or contain a penalty in the event the Company is unable to fulfill its requirements. In addition, the terms of the sale of common stock provide that the investor has an option, for a period of six months following the purchase, to exchange the common shares for other financial instruments (including those that may require classification outside of stockholders' equity) that may be issued at a price, or effective price in the case of convertible instruments, lower than the original purchase price. As a result of the registration rights obligation to file within a specified period, which is presumed not to be within the Company's control, and the contingent redemption feature (which lapsed as of March 31, 2009), the Company is required, to classify the common stock outside of stockholders' equity as common stock with registration rights. Further, given the nature of the contingent redemption provision and the registration rights requirement, the standard required the Company to initially record the common stock at its fair value, which was accomplished with a charge to retained earnings of \$1,423,823.

Upon the filing of the registration statement, the common stock with registration rights will be reclassified to stockholders' equity (See Note 11, Subsequent Events).

**Table of Contents**

The warrants included in the unit offering are indexed to 487,500 shares of the Company's common stock and were evaluated for purposes of their classification under EITF 00-19 *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*. These warrants are not subject to the Registration Rights Agreement referred to above, and they otherwise meet the conditions for equity classification provided in that standard. Accordingly, these warrants are recorded in stockholders' equity. The Company is required to reevaluate that classification on each reporting date.

The total basis in the financing was allocated to the redeemable common stock and warrants based upon their relative fair values as provided in EITF D-98 and related standards. The fair value of the redeemable common stock represents the value of the number of shares at the trading market price. The warrants were valued using the Black-Scholes-Merton technique, and the Company estimated (i) the expected term as equal to the five-year warrant term, (ii) the volatility, based upon a reasonable peer group, at 75.33% and (iii) the risk free rate as the published rate for zero coupon government securities with terms consistent with the expected term, or 3.09%. The following table illustrates the allocation:

Financial Instrument	Fair Values	Relative Fair Values
Common Stock with registration rights	\$ 2,291,250	\$ 867,427
Warrants	1,571,846	595,073
	\$ 3,863,096	\$ 1,462,500

On February 19, 2009 the investors exercised their right to restructure their investment (the new transaction) as a result of the February 2009 Private Placement described below. The investors were granted an additional 682,500 shares of common stock which increased the aggregate total of common shares issued in conjunction with the September Private Placement to 1,170,000. The re-set provision in the original transaction was removed and the investors were granted registration rights, with respect to the new shares, identical to those related to the September transaction.

Additionally, the new transaction provided for the cancellation of the original 487,500 warrants and the Company issued new warrants to purchase 975,000 shares of common stock for \$.73 per share. The Company deemed this transaction to be additional compensation subject to SFAS No. 123(R). Under SFAS No. 123(R) the Company recorded the \$334,100 excess of the fair value of the new warrants over that of the cancelled warrants on the date of the transaction as compensation expense during the year ended March 31, 2009. The warrants met all the requirements for equity classification as noted above under EITF-00-19 and are recorded in stockholders' equity (See Note 11, Subsequent Events).

*November 2008 Private Placement*

On November 21, 2008, the Company commenced a private placement of up to 30,000,000 shares of common stock at \$1.00 per share (the November 2008 Private Placement). The Company sold 210,000 shares for total proceeds of \$210,000.

In connection with the November 2008 Private Placement, the Company entered into a Registration Rights Agreement related to the common stock that requires the Company to among other things, (i) file a Registration Statement within 90 days from the closing of the November 2008 Private Placement; and (ii) make required filings under the Securities Act of 1933 and the Securities and Exchange Act of 1934. It also provides for (i) achieving and maintaining effectiveness of the registration statement; and (ii) listing the shares on any exchange on which the Company's shares are then listed and maintain the listing; each on a best-efforts basis. The Registration Rights Agreement does not provide for an alternative or contain a penalty in the event the Company is unable to fulfill its requirements. As a result of the registration rights obligation to file within a specified period, which is presumed not to be within the Company's control, the Company is required to classify the common stock outside of stockholders' equity as common stock with registration rights. Further, the Company was required to record the stock at its fair value, which was

accomplished with a charge to retained earnings of \$735,000. Upon the filing of the required registration statement, the common stock with registration rights will be reclassified to stockholders' equity (See Note 11, Subsequent Events).

**Table of Contents***February 2009 Private Placement*

In February 2009, the November 2008 Private Placement was extended under identical terms except the number of common shares offered was reduced to 15,000,000. In February and March 2009 the Company sold 525,000 shares of common stock for total proceeds of \$525,000.

The Company entered into a Registration Rights Agreement, with respect to the new shares, with terms identical to those discussed above in the November 2008 Private Placement. As a result of the registration rights obligation to file within a specified period, which is presumed not to be within the Company's control, the Company is required to classify the common stock outside of stockholders' equity as common stock with registration rights. The Company recorded the stock at its per share selling price, which exceeded the then per share trading price of the Company's common stock. Upon the filing of the required registration statement, the common stock with registration rights will be reclassified to stockholders' equity (See Note 11, Subsequent Events).

**7. Gain on Settlement of Payables**

During the three months ended June 30, 2009 we negotiated a settlement of certain outstanding payables primarily related to legal expenses incurred during the fiscal year ended March 31, 2009. As a result of this negotiation the Company recognized a gain on settlement of payables of \$564,838.

**8. Stock Options and Warrants***Stock Options:*

Activity with respect to the stock options is summarized as follows:

	Shares	Weighted-average Exercise Prices	Intrinsic Value
Options outstanding at April 1, 2009	4,301,250	\$ 1.60	\$ 18,000
Granted			
Forfeited/Cancelled	(297,500)	4.13	
Exercised			
Options outstanding at June 30, 2009	4,003,750	1.42	\$ 24,300
Options exercisable at June 30, 2009	3,232,082	1.40	\$ 15,525

**Table of Contents**

Following is a summary of stock options outstanding and exercisable at June 30, 2009:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
\$ .0001 - 1.00	2,195,000	6.12	\$ .85	1,778,749	\$ .88
1.80-2.40	1,783,750	5.11	2.06	1,428,333	1.98
5.38	25,000	8.83	5.38	25,000	5.38
	4,003,750	5.59	1.42	3,232,082	1.40

A summary of the status of the Company's unvested stock options follows:

Unvested Stock Options	Shares	Weighted Average Grant Date Fair Value
Unvested at April 1, 2009	1,092,501	.55
Granted		
Expired	(32,500)	2.80
Vested	(288,333)	.55
Unvested at June 30, 2009	771,668	.45

Total unrecognized compensation expense related to granted stock options at June 30, 2009 was approximately \$325,000 and will be charged to expense through February, 2012.

The fair value of options granted by the Company is estimated on the date of grant using the Black-Scholes option-pricing model that uses assumptions for expected volatility, expected dividends, expected term, and the risk-free interest rate. Expected volatilities are based on historical volatility of peer companies and other factors estimated over the expected term of the options. The term of employee options granted is derived using the simplified method which computes expected term as the average of the sum of the vesting term plus the contract term. The term for non-employee options is generally based upon the contractual term of the option. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for the period of the expected term or contractual term as described.

No options were granted during the three months ended June 30, 2009.

The weighted-average grant date fair value for options granted during the three months ended June 30, 2009, and 2008, was approximately \$0, and \$3.45, respectively.

**Table of Contents***Warrants:*

A summary of our common stock warrant activity for the three months ended June 30, 2009 is as follows:

	Number		Weighted Average Exercise Price per Share
Warrants outstanding at April 1, 2009	1,160,251	\$	.91
Issued to placement agents in connection with the 3% Convertible Senior Secured Promissory Notes Offering	315,520		.50
Warrants outstanding at June 30, 2009	1,475,771	\$	.82

The Company grants common stock warrants, in connection with equity share purchases by investors as an additional incentive for providing long term equity capital to the Company, to placement agents in connection with direct equity share and convertible debt purchases by investors and as additional compensation to consultants and advisors.

Warrants may be exercised in whole or in part by:

notice given by the holder accompanied by payment of an amount equal to the warrant exercise price multiplied by the number of warrant shares being purchased; or

election by the holder to exchange the warrant (or portion thereof) for that number of shares equal to the product of (a) the number of shares issuable upon exercise of the warrant (or portion) and (b) a fraction, (x) the numerator of which is the market price of the shares at the time of exercise minus the warrant exercise price per share at the time of exercise and (y) the denominator of which is the market price per share at the time of exercise.

These warrants are not mandatorily redeemable, do not obligate the Company to repurchase its equity shares by transferring assets or issue a variable number of shares.

The warrants require that the Company deliver shares as part of a physical settlement or a net-share settlement, at the option of the holder, and do not provide for a net-cash settlement.

All of our warrants are classified as equity.

**9. Income taxes:**

The Company has incurred net losses since its inception and, therefore, no current income tax liabilities have been incurred for the periods presented. Due to the Company's losses, management has established a valuation allowance equal to the amount of net deferred tax assets since management cannot determine that realization of these benefits is more likely than not.

**Table of Contents****10. Contractual Commitments:**

The table below sets forth our known contractual obligations as of June 30, 2009:

Contractual Obligations	Total	Payments due by period			
		Less than 1 year	2	3 years	4 5 years
Consulting Agreements	\$ 367,000	\$ 305,000	\$ 62,000	\$	
Employment Agreements	1,096,000	721,000	375,000		
Operating Lease Obligations	741,000	281,000	437,000		23,000
Total	\$ 2,204,000	\$ 1,307,000	\$ 874,000	\$	23,000

**11. Subsequent Events**

On June 4, 2009 the Company's Board of Directors agreed to issue additional shares of its common stock, to investors who had purchased shares of its common stock in conjunction with the September 2008 Private Placement, the November 2008 Private Placement and the February 2009 Private Placement in order to bring the cost of the acquired shares to \$.50 per share. The Board approved the issuance of the additional shares to be fair to the investors who had invested in the Company during the year ended March 31, 2009 when it was most in need of funding and to enable the Company's future fundraising efforts. The investors include a Director of the Company and companies controlled by the Company's Chief Executive Officer. The issuance was approved by all of the disinterested members of the Board of Directors. As a condition to the receipt of the additional shares, the investors are required to waive registration rights otherwise available with respect to the shares issued in the private placements. The Company expects to issue 2,490,000 additional shares as a result of this action and will recognize an expense representing the fair value of the additional shares issued. Subsequent to June 30, 2009 the Company has received registration rights waivers representing 2,070,000 of the additional shares resulting in an expense of approximately \$1,100,000 which will be recognized in our second quarter ending September 30, 2009.

**Table of Contents****Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.*****Forward-Looking Statements***

This Form 10-Q and certain information incorporated herein by reference contain forward-looking statements and information within the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934. This information includes assumptions made by, and information currently available to management, including statements regarding future economic performance and financial condition, liquidity and capital resources, acceptance of the Company's products by the market, and management's plans and objectives. In addition, certain statements included in this and our future filings with the Securities and Exchange Commission (SEC), in press releases, and in oral and written statements made by us or with our approval, which are not statements of historical fact, are forward-looking statements. Words such as may, could, should, would, believe, expect, anticipate, estimate, intend, seeks, plan, will, should, and other words or expressions of similar meaning are intended by us to identify forward-looking statements, although not all forward-looking statements contain these identifying words. These forward-looking statements are found at various places throughout this report and in the documents incorporated herein by reference. These statements are based on our current expectations about future events or results and information that is currently available to us, involve assumptions, risks, and uncertainties, and speak only as of the date on which such statements are made.

All forward-looking statements are subject to the risks and uncertainties inherent in predicting the future. Our actual results may differ materially from those projected, stated or implied in these forward-looking statements as a result of many factors, including our critical accounting policies and risks and uncertainties related, but not limited to, overall industry environment, delay in the introduction of products, regulatory delays, negative clinical results, and our financial condition. These and other risks and uncertainties are described in more detail in our most recent Annual Report on Form 10-K, as well as other reports that we file with the SEC.

Forward-looking statements speak only as of the date they are made and should not be relied upon as representing our views as of any subsequent date. We undertake no obligation to update or revise such statements to reflect new circumstances or unanticipated events as they occur, except as required by applicable laws, and you are urged to review and consider disclosures that we make in this and other reports that we file with the SEC that discuss factors germane to our business.

**Overview**

We are a development stage enterprise based in Tampa, Florida. The Company has generated no operating revenue and has a history of losses since its inception in November 2006.

Our business is the business conducted by our three divisions, MiMedx, SpineMedica and Level Orthopedics. We currently operate in one business segment, musculoskeletal products, which will include the design, manufacture and marketing of products for three major market categories: Orthopedic- Sports Medicine, with soft-tissue reconstructive products aimed at repairing tendons and ligaments, Orthopedics-Spine, including products such as our Paradís Vaso Shield, which is indicated for use as a cover for vessels following anterior vertebral surgery, and Orthopedic-Extremities, with implants for fracture fixation in the upper extremities (hand, wrist, elbow and shoulder). SpineMedica completed the development of its Paradís Vaso Shield surgical sheet product, culminating in a submission to the FDA for 510(k) marketing clearance, which we received on April 20, 2009. We anticipate introducing this product to the marketplace within the next 90 to 120 days.

**Table of Contents****Results of Operations for the Three Months Ended June 30, 2009 Compared to the Three Months Ended June 30, 2008*****Research and Development Expenses***

Our research and development expenses decreased approximately \$180,000 or 18.9% to \$774,000 during the three months ended June 30, 2009 compared to \$954,000 during the three months ended June 30, 2008 reflecting our focus on reducing costs. Our research and development expenses consist of internal personnel costs, fees paid to external consultants and service providers supporting our development efforts, and supplies and instruments used in our laboratories. Our internal personnel costs increased approximately \$116,000 or 31.8% to \$481,000 for the three months ended June 30, 2009 compared to \$365,000 for the three months ended June 30, 2008. The increase in personnel costs is attributed to hiring additional personnel to further our research and development activities and manufacturing our products for testing, slightly offset by reassigning one individual to a general and administrative position. As of June 30, 2009 we employed 24 employees devoted to research and development, compared to 22 employees devoted to research and development at June 30, 2008. Fees paid to external consultants and service providers decreased approximately \$228,000 or 52.7%, to \$204,000 for the three months ended June 30, 2009 compared to \$432,000 for the same period in 2008. This decrease is attributed to reduced activity with external consultants and service providers as they have completed certain of their assigned projects. Supplies and instruments used for research and development decreased approximately \$68,000 or 43.3% to \$89,000 for the three month period ending June 30, 2009 as compared to \$157,000 for the same period in 2008. This decrease is attributed to our cost reduction initiatives. We anticipate continued activity in the area of research and development in the foreseeable future as we progress our technologies into clinical development to obtain approval from the FDA to market our technologies.

***General and Administrative Expenses***

General and administrative expenses for the three months ended June 30, 2009 decreased approximately \$902,000 or 40.3% to \$1,334,000 compared to approximately \$2,236,000 for the three months ended June 30, 2008 reflecting our focus on reducing costs. General and administrative expenses primarily consist of personnel costs, legal and accounting fees, facilities costs and other administrative costs. During the three months ended June 30, 2009, salaries and benefits decreased approximately \$593,000 or 53.6% to \$514,000 compared to \$1,107,000 for the three months ended June 30, 2008. As of June 30, 2009, we employed 13 personnel not related to research and development functions as compared to 17 as of June 30, 2008. Additionally, our management team has been reduced from the same period in the prior year due to resignations of previous officers who have not been replaced. The significant factors contributing to the net decrease in personnel costs are; (i) reductions in salaries and wages of approximately \$173,000, (ii) \$152,000 reduction in stock compensation expense, (iii) \$223,000 reduction in bonuses and bonus accruals, and (iv) \$45,000 reduction in recruiting and relocation expenses.

Professional fees decreased approximately \$188,000 or 43.5% to \$244,000 during the three months ended June 30, 2009 as compared to \$432,000 incurred during the three months ended June 30, 2008. These professional fees are primarily attributed to general and patent counsel, and accounting fees. The decrease is primarily attributed to costs associated with merger and acquisition activity that we did not continue to pursue and the hiring of key individuals who have reduced our need for outside assistance.

Facilities and other administrative costs decreased approximately \$140,000 or 32.3% to \$293,000 during the three months ended June 30, 2009 compared to \$433,000 incurred in the three months ended June 30, 2008 reflecting our focus on reducing costs and controlling all discretionary costs. Our primary offices, laboratories and manufacturing facilities are located in leased spaces located in Marietta, Georgia and Tampa, Florida.

During the three months ended June 30, 2009, we recorded \$116,000 in depreciation expense and \$167,000 in amortization expense as compared to \$97,000 and \$167,000, respectively, for these expenses in the same period in 2008. We depreciate our assets on a straight-line basis, principally over five to seven years and amortize our intangible assets over a period of 10 years, which we believe represents the remaining useful lives of the patents underlying the licensing rights and intellectual property. We do not amortize goodwill, but at least annually we test goodwill for impairment and periodically evaluate other intangibles for impairment based on events or changes in circumstances as they occur.

**Table of Contents*****Share Based Compensation***

We follow the provisions of Statement of Financial Accounting Standards No. 123R – Share-based Payments ( FAS123R ) which requires the use of the fair-value based method to determine compensation for all arrangements under which employees and others receive shares of stock or equity instruments (options). The total share based compensation recognized during the three months ended June 30, 2009 and 2008 approximated \$78,000 and \$230,000, respectively.

***Other Expense/Income***

We recorded net interest expense of approximately \$55,000 during the three months ended June 30, 2009 and approximately \$38,000 of net interest income during the three months ended June 30, 2008. All our interest expense recorded in the current period is related to our convertible notes offering which closed in June 2009. In the three month period ending June 30, 2008 we had no debt and received interest income on our cash balance as a result of our investment of the net proceeds of the issuance of our Series A Preferred Stock, which occurred in March 2007.

During the three months ended June 30, 2009 we negotiated a settlement of certain outstanding payables primarily related to legal expenses incurred during the fiscal year ended March 31, 2009. As a result of this settlement we wrote off these payables and recognized a gain approximating \$565,000.

***Liquidity and Capital Resources***

Since inception, we have funded our development, operating costs and capital expenditures through issuances of stock and convertible debt. We had approximately \$1,621,000 of cash and cash equivalents on hand as of June 30, 2009.

As of June 30, 2009, the Company has not emerged from the development stage. Assuming it receives no additional funds, the Company estimates that it has sufficient funds to operate through mid-September 2009. In order to fund on-going operating cash requirements beyond that point or to further accelerate and execute its business plan, the Company will need to raise significant additional funds. We are considering the possible issuance of additional shares of our common stock, in connection with a PIPE transaction, and are working toward such a financing transaction, but there can be no assurance that funds will be available, or the price we can obtain will be acceptable. In view of these matters, the ability of the Company to continue as a going concern is dependent upon the Company's ability to secure additional financing sufficient to support its research and development activities, approval of developed products for sale by regulatory authorities, including the FDA, and ultimately to generate revenues sufficient to cover all costs. While the Company has been successful in the past in obtaining the necessary capital to support its operations, there is no assurance that the Company will be able to obtain additional equity capital or other financing under commercially reasonable terms and conditions, or at all. Furthermore, if the Company issues equity or debt securities to raise additional funds, existing shareholders may experience dilution and the new equity or debt securities it issues may have rights, preferences and privileges senior to those of existing shareholders. In addition, if the Company raises additional funds through collaboration, licensing or other similar arrangements, it may be necessary to relinquish valuable rights to products or proprietary technologies, or grant licenses on terms that are not favorable. If the Company cannot raise funds on acceptable terms, the Company will not be able to continue as a going concern, develop or enhance products, obtain the required regulatory clearances or approvals, execute the Company's business plan, take advantage of future opportunities, or respond to competitive pressure or unanticipated customer requirements. Any of these events would adversely affect the Company's ability to achieve the Company's development and commercialization goals, which could have a material adverse effect on the Company's business, results of operations and financial condition.

***Discussion of cash flows***

Net cash used in operations during the three months ended June 30, 2009 decreased approximately \$893,000 to \$1,750,000 compared to \$2,643,000 used in operating activities for the three month period ended June 30, 2008 reflecting our efforts in controlling expenses. Our operating cash outflows are used to fund our research and development activities as well as for general corporate purposes.

**Table of Contents**

Our convertible notes offering which occurred during the three months ended June 30, 2009 provided us cash from financing activities of \$3,344,460, net of placement agent fees.

As discussed above, the ability of the Company to continue as a going concern is dependent upon the Company's ability to secure additional financing sufficient to support its research and development activities, approval of developed products for sale by regulatory authorities, including the FDA, and ultimately to generate revenues sufficient to cover all costs.

**Contractual Obligations**

Contractual obligations associated with our ongoing business activities are expected to result in cash payments in future periods. A table summarizing the amounts and estimated timing of these future cash payments as of June 30, 2009 is provided in Note 10 of the unaudited condensed consolidated financial statements included in Item 1.

**Critical Accounting Policies**

We follow accounting principles generally accepted in the United States in preparing our financial statements, which require us to make certain estimates and apply judgments that affect our financial position and results of operations. We continually review our accounting policies and financial information disclosures. A summary of our significant accounting policies that require the use of estimates and judgments in preparing the financial statements was provided in our Annual Report on Form 10-K for the year ended March 31, 2009. During the first three months of fiscal 2010, there were no material changes to the accounting policies and assumptions previously disclosed.

**Recent Accounting Pronouncements**

The Financial Accounting Standards Board ( FASB ) issued SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles ( SFAS No. 168 ), on June 29, 2009 and, in doing so, authorized the Codification as the sole source for authoritative U.S. GAAP. SFAS No. 168 will be effective for financial statements issued for reporting periods that end after September 15, 2009. Once it is effective, it will supersede all accounting standards in U.S. GAAP, aside from those issued by the SEC. SFAS No. 168 replaces SFAS No. 162 to establish a new hierarchy of GAAP sources for non-governmental entities under the FASB Accounting Standards Codification.

Management has adopted the provisions set forth in SFAS No. 165, *Subsequent Events*, and considered subsequent events through August 7, 2009.

**Off-Balance Sheet Arrangements**

We have no off-balance sheet arrangements.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

In the normal course of doing business we are not exposed to the risks associated with foreign currency exchange rates and changes in interest rates. We do not engage in trading market risk sensitive instruments or purchasing hedging instruments or other than trading instruments that are likely to expose us to significant market risk, whether interest rate, foreign currency exchange, commodity price or equity price risk.

Our exposure to market risk relates to our cash and investments.

The primary objective of our investment activities is to preserve principal while at the same time maximizing yields without significantly increasing risk. To achieve this objective, we invest our excess cash in debt instruments of the U.S. Government and its agencies, bank obligations, repurchase agreements and high-quality corporate issuers, and, by policy, restrict our exposure to any single corporate issuer by imposing concentration limits. To minimize the exposure due to adverse shifts in interest rates, we maintain investments at an average maturity of generally less than three months.

**Table of Contents**

**Item 4. Controls and Procedures.**

**Disclosure Controls and Procedures**

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended (the Exchange Act ), we have carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. This evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Principal Financial Officer. Based upon that evaluation, our Chief Executive Officer and Principal Financial Officer concluded that our controls and procedures were effective as of the end of the period covered by this report.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Principal Financial Officer, as appropriate, to allow timely decisions regarding disclosures.

**Changes in Internal Control Over Financial Reporting**

There was no change in our internal control over financial reporting that occurred during the three months ended June 30, 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**Limitations on the Effectiveness of Controls**

We have confidence in our internal controls and procedures. Nevertheless, our management, including our Chief Executive Officer and Principal Financial Officer, does not expect that our disclosure procedures and controls or our internal controls will prevent all errors or intentional fraud. An internal control system, no matter how well-conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of such internal controls are met. Further, the design of an internal control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all internal control systems, no evaluation of controls can provide absolute assurance that all our control issues and instances of fraud, if any, have been detected.

**PART II OTHER INFORMATION**

**Item 1A. Risk Factors**

As of the date of this report, there have been no material changes to the risk factors included in Item 1A to our Annual Report on Form 10-K for the year ended March 31, 2009.
