The Gorman-Rupp Company (Registrant , Gorman-Rupp or the Company) designs, manufactures and globally sells pumps and related equipment (pump and motor controls) for use in water, wastewater, construction, industrial, petroleum, original equipment, agriculture, fire protection, heating, ventilating and air conditioning (HVAC), military and other liquid-handling applications.

On October 1, 2010 the Company acquired substantially all of the assets and certain liabilities of privately-held National Pump Company LLC for a purchase price of approximately \$36.6 million, net of cash acquired. National Pump Company s specialty expertise is in designing, manufacturing and distributing deep-well vertical turbine pumps for industrial process water supply, agricultural irrigation supply and municipal water supply. Additionally it provides specialty pumps for petroleum, mining and OEM applications.

PRODUCTS

The Company operates principally in one business segment, the manufacture and international sale of pumps and related fluid control equipment and systems. The following table sets forth, for the years 2008 through 2010, the total net sales, income before income taxes and total assets (\$000 omitted) of the Company.

	2010	2009	2008
Net Sales	\$ 296,808	\$ 266,242	\$ 330,646
Income Before Income Taxes	38,333	27,255	40,494
Assets	286,707	249,424	231,538

The Company s product line consists of pump models ranging in size from 1/4" to 144" and ranging in rated capacity from less than one gallon per minute to in excess of 700,000 gallons per minute. The types of pumps which the Company produces include self priming centrifugal, standard centrifugal, magnetic drive centrifugal, axial and mixed flow, vertical turbine line shaft, submersible, high pressure booster, rotary gear, diaphragm, bellows and oscillating. The pumps have drives that range from 1/35 horsepower electric motors up to much larger electric motors or internal combustion engines. Many of the larger units comprise encased, fully integrated water and wastewater pumping stations. In certain cases, units are designed for the inclusion of customer-supplied drives.

The Company s larger pumps are sold principally for use in the construction, industrial, water and wastewater handling fields; for boosting low residential water pressure; for pumping refined petroleum products, including the ground refueling of aircraft; for fluid control in HVAC applications; and for various agricultural purposes.

The Company s pumps are also utilized for dewatering and flood control purposes. Additionally, pumps manufactured for fire protection are used for sprinkler systems, fire hydrants, stand pipes, fog systems and deluge systems at hotels, banks, factories, airports, schools, public buildings and hundreds of other facilities throughout the world.

ITEM 1. BUSINESS CONTINUED

Many of the Company's smallest pumps are sold to customers for incorporation into such products as food processing, chemical, photo processing, waste treatment, HVAC equipment, appliances, solar heating, and for automated explosives detection systems in airports.

MARKETING

Except for government and export sales, the Company's pumps are marketed in the United States and Canada through a network of about 1,000 distributors, through manufacturers' representatives (for sales to many original equipment manufacturers), through third-party distributor catalogs, and by direct sales. The Company is continuously seeking alliances to further enhance marketing opportunities. Government sales are handled directly by the Company and export sales are made primarily through foreign distributors and representatives.

During 2010, 2009 and 2008, there were no shipments to any single customer that exceeded 10% of total net sales. Gorman-Rupp continues to actively pursue international business opportunities and, in 2010, shipped its pumps to over 100 countries. However, the Company's foreign operations do not involve material financial or other risks due to their relatively small size, both individually and collectively.

As a result of this active pursuit of international business, approximately \$116 million of 2010 sales were shipped outside the United States, as compared to \$96.4 million in 2009 and \$103.2 million in 2008. International sales represented 39%, 36% and 31% of total sales in 2010, 2009 and 2008, respectively. No sales made to customers in any one foreign country amounted to more than 5% of total sales during 2010, 2009 or 2008. The Company continues its efforts to penetrate international markets principally by its aggressive responses to worldwide pumping needs.

COMPETITION

Since the late 1990's, a number of consolidations have occurred within the highly competitive pump industry. As a consequence, numerous pump competitors now exist as subsidiaries, divisions or departments within significantly larger corporations. Foreign-sourced pumps have also increasingly penetrated into the Company's domestic markets. Gorman-Rupp estimates that 80 other domestic and global companies selling pumps and pump units compete in one or more of the lines of business and applications in which comparable products of the Company are utilized. International competitors are based mostly in Europe and Asia.

Many pumps are specifically designed and engineered for a particular customer's application. The Company believes that proper application, product performance, and quality of delivery and service are the principal methods of competition, and attributes its success to its continued emphasis in these areas.

PURCHASING AND PRODUCTION**

Virtually all materials, supplies, components and accessories used by the Company in the fabrication of its products, including all castings (for which most patterns are made and owned by the Company), structural steel, bar stock, motors, solenoids, engines, seals, and plastic and elastomeric components are purchased by the Company from other suppliers and manufacturers. No purchases are made under long-term contracts and the Company is not dependent upon a single source for any materials, supplies, components or accessories which are of material importance to its business.

The Company purchases motors for its polypropylene bellows pumps and magnetic drive pumps from several alternative vendors; and motor components for its large submersible pumps, and motors and engines for its pump systems, from a limited number of suppliers. Small motor requirements are also currently sourced from alternative suppliers.

The other production operations of the Company consist of the machining of castings, the cutting, shaping and welding of bar stock and structural members, the design and assembly of electrical control panels, the manufacture of a few minor components, and the assembling, painting and testing of its products. Virtually all of the Company's products are tested prior to shipment.

OTHER ASPECTS

As of December 31, 2010, the Company employed approximately 1,082 persons, of whom approximately 638 were hourly employees. The Company has no collective bargaining agreements, has never experienced a strike and considers its labor relations to be satisfactory.

Although the Company owns a number of patents, and several of them are important to its business, Gorman-Rupp believes that the business of the Company is not materially dependent upon any one or more patents. The Company's patents, trademarks and other intellectual property are adequate for its business purposes.

The backlog of orders at December 31, 2010 was valued at \$107.4 million compared to \$93.7 million at December 31, 2009. Approximately 97% of the Company's backlog of unfilled orders is scheduled to be shipped during 2011, with the remainder during 2012.

AVAILABLE INFORMATION

The Company maintains a website accessible through its Internet address of *www.gormanrupp.com*. Gorman-Rupp makes available free of charge on or through *www.gormanrupp.com* its Annual Report to Shareholders, its annual reports on Form 10-K, its quarterly reports on Form 10-Q, and its current reports on Form 8-K, and any amendments to those reports, as soon as reasonably practicable after those reports (and any amendments) are electronically filed with or furnished to the Securities and Exchange Commission (Commission). However, the information contained on the Company's website is not a part of this Form 10-K or any other report filed with or furnished to the Commission.

ITEM 1A. RISK FACTORS

Market influences and cost pressures

The overall pump industry is cyclical in nature, and some of its business activity is generally related to business conditions in the durable goods and capital equipment markets. The Company cannot predict the timing or extent of future economic or market swings. Additionally, raw material and energy purchases are major drivers of costs in the manufacture of pumps, and these costs are usually highly unpredictable. While efforts are made to recoup higher production costs through increased prices, the future acceptability of such price increases by customers is not guaranteed due to the highly competitive market place.

Compliance with a variety of import and export laws and regulations, and the cost of compliance as well as the consequences of failure to properly comply with such laws

The Company is subject to a variety of laws regarding international operations, including regulations issued by the U.S. Department of Commerce Bureau of Industry and Security and various foreign governmental agencies. The Company cannot predict the nature, scope or effect of future regulatory requirements to which our international operations and trading practices might be subject or the manner in which existing laws might be administered or interpreted. Future regulations could limit the countries in which certain of our products may be manufactured or sold or could restrict our access to, and increase the cost of obtaining, products from foreign sources. In addition, actual or alleged violations of import-export laws could result in enforcement actions and substantial financial penalties.

Results of operations could vary as a result of the methods, estimates and judgments used in applying accounting policies or due to changes in accounting standards

The methods, estimates and judgments the Company uses in applying our accounting policies are, by their nature, subject to substantial risks, uncertainties and assumptions, and factors may arise over time that lead the Company to change our methods, estimates and judgments. Changes in those methods, estimates and judgments could significantly affect our results of operations. Additionally, changes in accounting standards, including new interpretations and application of accounting standards, may change the Company's reported financial condition, results of operations or cash flow.

Family ownership of common equity

A substantial percentage of the Company's Common Shares is held by various members of the Gorman and Rupp families and their affiliates. These family holdings do not typically trade; therefore, the Common Shares, in part because of these circumstances, generally have a history of relatively thin trading experiences on the NYSE Amex Exchange.

ITEM 2. PROPERTIES

The Company's corporate headquarters is located in Mansfield, Ohio. The production operations of the Company are conducted at 10 locations throughout the United States and 3 locations in other countries as set forth below. All of these properties, except the plants in Fresno, California; Zolfo Springs, Florida; Leeuwarden, The Netherlands and County Westmeath, Ireland are owned in fee without any material encumbrance. The Company similarly owns a facility in Sparks, Nevada comprising a training center and warehouse, and a former production plant in Oklahoma now used for warehousing and office space. In addition, the Company leases warehouse facilities in Bangkok, Thailand and Culemborg, The Netherlands to house pumps and pump parts.

The Company's production operations are:

ITEM 3. LEGAL PROCEEDINGS

For more than ten years, numerous business entities in the pump and fluid-handling industries, as well as a multitude of companies in many other industries, have been targeted in a series of lawsuits in several jurisdictions by various individuals seeking redress to claimed injury as a result of the entities' alleged use of asbestos in their products. The Company and two of its subsidiaries remain drawn into this mass-scaled litigation, typically as one of hundreds of co-defendants in a particular proceeding (the vast majority of these cases are against Patterson Pump Company). The allegations in the lawsuits involving the Company and/or its subsidiaries are vague, general and speculative, and most cases have not advanced beyond the early stage of discovery. In certain situations, the plaintiffs have voluntarily dismissed the Company and/or its subsidiaries from some of the lawsuits after the plaintiffs have acknowledged that there is no basis for their claims. In other situations, the Company and/or its subsidiaries have been dismissed from some of the lawsuits as a result of court rulings in favor of motions to dismiss and/or motions for summary judgment. In forty-three cases, the Company and/or its subsidiaries have entered into nominal economic settlements recommended and paid for by insurers, coupled with dismissal of the lawsuits. Insurers of the Company have engaged legal counsel to represent the Company and its subsidiaries and to protect their interests.

In addition, the Company and/or its subsidiaries are parties in a small number of legal proceedings arising out of the ordinary course of business. Management does not currently believe that these proceedings, or the industry-wide asbestos litigation, will materially impact the Company's results of operations, liquidity or financial condition.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company maintains a set of disclosure controls and procedures designed to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. The Company's disclosure controls and procedures are also designed to ensure that information required to be disclosed in Company reports filed under the Exchange Act of 1934 is accumulated and communicated to the Company's Management, including the principal executive officer and the principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

An evaluation was carried out under the supervision and with the participation of the Company's Management, including the principal executive officer and the principal financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report on Form 10-K. Based on that evaluation, the principal executive officer and the principal financial officer have concluded that the Company's disclosure controls and procedures were effective as of December 31, 2010.

Management's Report on Internal Control over Financial Reporting

There were no material weaknesses identified at any Division or Subsidiary of the Company during 2010. The 2010 Report of Management on Internal Control over Financial Reporting and the related Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting are incorporated herein by this reference from pages 28 and 29 of the Company's 2010 Annual Report to Shareholders.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's disclosure controls and procedures that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

The Company has no information required to be disclosed in a report on Form 8-K during the fourth quarter of the year covered by this report on Form 10-K that has not otherwise been reported on a Form 8-K.

On May 22, 1997, the Company s Board of Directors adopted a Non-Employee Directors Compensation Plan. This Plan became effective without shareholder approval and constitutes the Company s only equity compensation plan. The Plan provides (originally through 2006) for share compensation for regular services performed by each of the Company s non-employee Directors. In addition to cash compensation, non-employee Directors receive an automatic award of 500 Common Shares (from the Company s treasury) on each July 1. On July 27, 2006, the Company s Board of Directors adopted a resolution extending the Non-Employee Directors Compensation plan for an additional term until the earlier of (i) May 21, 2017, (ii) at such time as all of the Company s Common Shares authorized for award under the Plan and registered under Form S-8 Registration Statement No. 333-30159 shall have been awarded and issued, (iii) at such time as the Company deregisters any Common Shares not issued under the foregoing Registration Statement, or (iv) at such time as the Plan is terminated by action of the Board of Directors. The number of Common Shares which may be awarded under the Plan cannot exceed 50,000, subject to certain conditions (e.g., stock splits, stock dividends).

As of December 31, 2010, 40,000 Common Shares had been issued to non-employee Directors and 32,085 Common Shares remained available for future issuance. (6,875 Common Shares were added as a result of the 5 for 4 stock split effective September 10, 2004; 7,093 Common Shares were added as a result of the 5 for 4 stock split effective December 8, 2006; and 8,117 Common Shares were added as a result of the 5 for 4 stock split effective December 10, 2007). No options, warrants or rights are available for issuance under the Plan. Attention is directed to the section
