SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-K/A-1

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended August 31, 2003

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to .

Commission file number: 0-50150

CHS Inc.

(Exact name of registrant as specified in its charter)

Minnesota

(State or other jurisdiction of incorporation or organization)

41-0251095

(I.R.S. Employer Identification Number)

5500 Cenex Drive

Inver Grove Heights, Minnesota 55077

(Address of principal executive office, including zip code)

(651) 355-6000

(Registrant's Telephone number, including area code)

Securities Registered Pursuant to Section 12(b) of the Act:

None

Securities Registered Pursuant to Section 12(g) of the Act:

8% Cumulative Redeemable Preferred Stock

(Title of Class)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K:

Indicate by check mark whether the Registrant is an accelerated filer (as defined in Rule 12b-2 of the Exchange Act). Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter:

Edgar Filing: CHS INC - Form 10-K/A

The registrant's voting and non-voting common equity has no market value (the registrant is a member cooperative).

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date: The registrant has no common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

None.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

The information in this Annual Report on Form 10-K for the year ended August 31, 2003, includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to the Company. In addition, the Company and its representatives and agents may from time to time make other written or oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and its reports to its members and securityholders. Words and phrases such as will likely result, are expected to, will continue, is anticipated, estimate, project and similar expressions identify forward-looking statements. The Company wishes to caution readers not to place undue reliance on any forward-looking statements, which speak only as of the date made.

The Company's forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those discussed in the forward-looking statements. This Cautionary Statement is for the purpose of qualifying for the safe harbor provisions of the Act and is intended to be a readily available written document that contains factors which could cause results to differ materially from those projected in the forward-looking statements. The following matters, among others, may have a material adverse effect on the business, financial condition, liquidity, results of operations or prospects, financial or otherwise, of the Company. Reference to this Cautionary Statement in the context of a forward-looking statement shall be deemed to be a statement that any one or more of the following factors may cause actual results to differ materially from those which might be projected, forecasted, estimated or budgeted by the Company in the forward-looking statement or statements.

The following factors are in addition to any other cautionary statements, written or oral, which may be made or referred to in connection with any particular forward-looking statement. The following review should not be construed as exhaustive.

The Company undertakes no obligation to revise any forward-looking statements to reflect future events or circumstances.

OUR REVENUES AND OPERATING RESULTS COULD BE ADVERSELY AFFECTED BY CHANGES IN COMMODITY PRICES. Our revenues and earnings are affected by market prices for commodities such as crude oil, natural gas, grain, oilseeds, and flour. Commodity prices generally are affected by a wide range of factors beyond our control, including the weather, disease, insect damage, drought, the availability and adequacy of supply, government regulation and policies, and general political and economic conditions. We are also exposed to fluctuating commodity prices as the result of our inventories of commodities, typically grain and petroleum products, and purchase and sale contracts at fixed or partially fixed prices. At any time, our inventory levels and unfulfilled fixed or partially fixed price contract obligations may be substantial. Increases in market prices for commodities that we purchase without a corresponding increase in the prices of our products or our sales volume or a decrease in our other operating expenses could reduce our revenues and net income.

In our energy operations, profitability depends largely on the margin between the cost of crude oil that we refine and the selling prices that we obtain for our refined products. Prices for both crude oil and for gasoline, diesel fuel, and other refined petroleum products fluctuate widely. Factors influencing these prices, many of which are beyond our control, include:

levels of worldwide and domestic supplies;

capacities of domestic and foreign refineries;

the ability of the members of OPEC to agree to and maintain oil price and production controls, and the price and level of foreign imports generally;

Table of Contents

political instability or armed conflict in oil-producing regions;

the level of consumer demand;

the price and availability of alternative fuels;

the availability of pipeline capacity; and

domestic and foreign governmental regulations and taxes.

The long-term effects of these and other conditions on the prices of crude oil and refined petroleum products are uncertain and ever-changing. Accordingly, we expect our margins on and the profitability of our energy business to fluctuate, possibly significantly, over time.

OUR OPERATING RESULTS COULD BE ADVERSELY AFFECTED IF OUR MEMBERS WERE TO DO BUSINESS WITH OTHERS RATHER THAN WITH US. We do not have an exclusive relationship with our members and our members are not obligated to supply us with their products or purchase products from us. Our members often have a variety of distribution outlets and product sources available to them. If our members were to sell their products to other purchasers or purchase products from other sellers, our revenues would decline and our results of operations could be adversely affected.

WE PARTICIPATE IN HIGHLY COMPETITIVE BUSINESS MARKETS IN WHICH WE MAY NOT BE ABLE TO CONTINUE TO COMPETE SUCCESSFULLY. We operate in several highly competitive business segments and our competitors may succeed in developing new or enhanced products that are better than ours, and may be more successful in marketing and selling their products than we are with ours. Competitive factors include price, service level, proximity to markets, product quality and marketing. In some of our business segments, such as Energy, we compete with companies that are larger, better known and have greater marketing, financial, personnel and other resources. As a result, we may not be able to continue to compete successfully with our competitors.

CHANGES IN FEDERAL INCOME TAX LAWS OR IN OUR TAX STATUS COULD INCREASE OUR TAX LIABILITY AND REDUCE OUR NET INCOME. Current federal income tax laws, regulations and interpretations regarding the taxation of cooperatives, which allow us to exclude income generated through business with or for a member (patronage income) from our taxable income, could be changed. If this occurred, or if in the future we were not eligible to be taxed as a cooperative, our tax liability would significantly increase and our net income significantly decrease.

WE INCUR SIGNIFICANT COSTS IN COMPLYING WITH APPLICABLE LAWS AND REGULATIONS. ANY FAILURE TO MAKE THE CAPITAL INVESTMENTS NECESSARY TO COMPLY WITH THESE LAWS AND REGULATIONS COULD EXPOSE US TO FINANCIAL LIABILITY. We are subject to numerous federal, state and local provisions regulating our business and operations and we incur and expect to incur significant capital and operating expenses to comply with these laws and regulations. We may be unable to pass on those expenses to customers without experiencing volume and margin losses. For example, capital expenditures for upgrading our refineries, largely to comply with regulations requiring the reduction of sulfur levels in refined petroleum products, are expected to be approximately \$87.0 million for our Laurel, Montana refinery and \$324.0 million for National Cooperative Refinery Association's McPherson, Kansas refinery, of which \$8.7 million had been spent at the Laurel refinery and \$36.5 million had been spent by NCRA at the McPherson refinery as of August 31, 2003. We expect all of these compliance capital expenditures at the refineries to be complete by December 31, 2005, and anticipate funding these projects with a combination of cash flows from operations and debt proceeds.

We establish reserves for the future cost of meeting known compliance obligations, such as remediation of identified environmental issues. However, these reserves may prove inadequate to meet our actual liability. Moreover, amended, new or more stringent requirements, stricter interpretations of existing requirements or the future discovery of currently unknown compliance issues may require us to make material expenditures or subject us to liabilities that we currently do not anticipate. Furthermore, our

Table of Contents

failure to comply with applicable laws and regulations could subject us to administrative penalties and injunctive relief, civil remedies including fines and injunctions, and recalls of our products.

ENVIRONMENTAL LIABILITIES COULD ADVERSELY AFFECT OUR RESULTS AND FINANCIAL CONDITION. Many of our current and former facilities have been in operation for many years and, over that time, we and other operators of those facilities have generated, used, stored and disposed of substances or wastes that are or might be considered hazardous under applicable environmental laws, including chemicals and fuels stored in underground and above-ground tanks. Any past or future actions in violation of applicable environmental laws could subject us to administrative penalties, fines and injunctions. Moreover, future or unknown past releases of hazardous substances could subject us to private lawsuits claiming damages and to adverse publicity.

ACTUAL OR PERCEIVED QUALITY, SAFETY OR HEALTH RISKS ASSOCIATED WITH OUR PRODUCTS COULD SUBJECT US TO LIABILITY AND DAMAGE OUR BUSINESS AND REPUTATION. If any of our food or feed products became adulterated or misbranded, we would need to recall those items and could experience product liability claims if consumers were injured as a result. A widespread product recall or a significant product liability judgment could cause our products to be unavailable for a period of time or a loss of consumer confidence in our products. Even if a product liability claim is unsuccessful or is not fully pursued, the negative publicity surrounding any assertion that our products caused illness or injury could adversely affect our reputation with existing and potential customers and our corporate and brand image. Moreover, claims or liabilities of this sort might not be covered by our insurance or by any rights of indemnity or contribution that we may have against others. In addition, general public perceptions regarding the quality, safety or health risks associated with particular food or feed products, such as the concern in some quarters regarding genetically modified crops, could reduce demand and prices for some of the products associated with our businesses. To the extent that consumer preferences evolve away from products that our members or we produce for health or other reasons, such as the growing demand for organic food products, and we are unable to develop products that satisfy new consumer preferences, there will be a decreased demand for our products.

OUR OPERATIONS ARE SUBJECT TO BUSINESS INTERRUPTIONS AND CASUALTY LOSSES; WE DO NOT INSURE AGAINST ALL POTENTIAL LOSSES AND COULD BE SERIOUSLY HARMED BY UNEXPECTED LIABILITIES. Our operations are subject to business interruptions due to unanticipated events such as explosions, fires, pipeline interruptions, transportation delays, equipment failures, crude oil or refined product spills, inclement weather and labor disputes. For example:

our oil refineries and other facilities are potential targets for terrorist attacks that could halt or discontinue production;

our inability to negotiate acceptable contracts with unionized workers in our operations could result in strikes or work stoppages; and

the significant inventories that we carry could be damaged or destroyed by catastrophic events, extreme weather conditions or contamination.

We maintain insurance against many, but not all, potential losses or liabilities arising from these operating hazards, but uninsured losses or losses above our coverage limits are possible. Uninsured losses and liabilities arising from operating hazards could have a material adverse effect on our financial position or results of operations.

OUR COOPERATIVE STRUCTURE LIMITS OUR ABILITY TO ACCESS EQUITY CAPITAL. As a cooperative, we may not sell common equity in our company. In addition, existing laws and our articles of incorporation and bylaws contain limitations on dividends of 8% of any preferred stock that we may issue. These limitations restrict our ability to raise equity capital and may adversely affect our ability to compete with enterprises that do not face similar restrictions.

CONSOLIDATION AMONG THE PRODUCERS OF PRODUCTS WE PURCHASE AND CUSTOMERS FOR PRODUCTS WE SELL COULD ADVERSELY AFFECT OUR REVENUES AND OPERATING

Table of Contents

RESULTS. Consolidation has occurred among the producers of products we purchase, including crude oil and grain, and is likely to continue in the future. Consolidation could increase the price of these products and allow suppliers to negotiate pricing and other contract terms that are less favorable to us. Consolidation also may increase the competition among consumers of these products to enter into supply relationships with a smaller number of producers resulting in potentially higher prices for the products we purchase.

Consolidation among purchasers of our products and in wholesale and retail distribution channels has resulted in a smaller customer base for our products and intensified the competition for these customers. For example, ongoing consolidation among distributors and brokers of food products and food retailers has altered the buying patterns of these businesses, as they have increasingly elected to work with product suppliers who can meet their needs nationwide rather than just regionally or locally. If these distributors, brokers, and retailers elect not to purchase our products, our sales volumes, revenues, and profitability could be significantly reduced.

IF OUR CUSTOMERS CHOSE ALTERNATIVES TO OUR REFINED PETROLEUM PRODUCTS OUR REVENUES AND PROFITS MAY DECLINE. Numerous alternative energy sources currently under development that could serve as alternatives to our gasoline, diesel fuel and other refined petroleum products. If any of these alternative products become more economically viable or preferable to our products for environmental or other reasons, demand for our energy products would decline. Demand for our gasoline, diesel fuel and other refined petroleum products also could be adversely affected by increased fuel efficiencies.

OUR AGRONOMY BUSINESS IS DEPRESSED AND COULD CONTINUE TO UNDERPERFORM IN THE FUTURE. Demand for agronomy products in general has been adversely affected in recent years by drought and poor weather conditions, idle acreage and development of insect and disease-resistant crops. These factors could cause Agriliance, LLC, an agronomy marketing and distribution venture in which we own a minority interest, to be unable to operate at profitable margins. In addition, these and other factors, including fluctuations in the price of natural gas and other raw materials, an increase in recent years in domestic and foreign production of fertilizer, and intense competition within the industry, in particular from lower-cost foreign producers, have created particular pressure on producers of fertilizers. As a result, CF Industries, Inc., a fertilizer manufacturer in which we hold a minority cooperative interest, has suffered significant losses in recent years as it has incurred increased prices for raw materials but has been unable to pass those increased costs on to its customers.

TECHNOLOGICAL IMPROVEMENTS IN AGRICULTURE COULD DECREASE THE DEMAND FOR OUR AGRONOMY PRODUCTS. Technological advances in agriculture could decrease the demand for crop nutrients, and other crop input products and services that we provide. Genetically engineered seeds that resist disease and insects or meet certain nutritional requirements could affect the demand for our crop nutrients and crop protection products, as well as the demand for fuel that we sell and which is used to operate application equipment relating to these products.

WE OPERATE SOME OF OUR BUSINESS THROUGH JOINT VENTURES IN WHICH OUR RIGHTS TO CONTROL BUSINESS DECISIONS ARE LIMITED. Several parts of our business, including in particular our agronomy business segment and portions of our grain marketing, wheat milling and foods businesses, are operated through joint ventures with unaffiliated third parties. By operating a business through a joint venture, we have less control over business decisions than we have in our wholly owned businesses. In particular, we generally cannot act on major business initiatives in our joint ventures without the consent of the other party or parties in that venture.

THE COMPANY

CHS Inc. (CHS or the Company) is one of the nation's leading integrated agricultural companies. As a cooperative, the Company is owned by farmers and ranchers and their local cooperatives from the Great Lakes to the Pacific Northwest and from the Canadian border to Texas. CHS buys commodities from and

Table of Contents

provides products and services to its members and other customers. The Company provides a wide variety of products and services, from initial agricultural inputs such as fuels, farm supplies, crop nutrients and crop protection products, to agricultural outputs that include grains and oilseeds, grain and oilseed processing and food products. A portion of the Company's operations are conducted through equity investments and joint ventures whose operating results are not fully consolidated with the Company's results; rather, a proportionate share of the income or loss from those entities is included as a component in the Company's net income under the equity method of accounting. For the fiscal year ended August 31, 2003, the Company's total revenues were \$9.4 billion.

The Company's operations are organized into five business segments: Agronomy, Energy, Country Operations and Services, Grain Marketing and Processed Grains and Foods. Together these business segments create vertical integration to link producers with consumers. The first two segments, Agronomy and Energy, produce and provide for the wholesale distribution of inputs that are essential for crop production. The third segment, Country Operations and Services, serves as the Company-owned retailer of a portion of these crop inputs and also serves as the first handler of a significant portion of the crops marketed and processed by the Company. The fourth segment, Grain Marketing, purchases and resells grains and oilseeds originated by the Country Operations and Services segment, by member cooperatives and also by third parties. The fifth business segment, Processed Grains and Foods, converts grains and oilseeds into value-added products.

Only producers of agricultural products and associations of producers of agricultural products may be members of CHS. The Company's earnings derived from business conducted with these members are allocated to members based on the volume of business they do with the Company. Members receive earnings in the form of patronage refunds (which are also called patronage dividends) in cash and patron's equities, which may be redeemed over time. Earnings derived from non-members are taxed at regular corporate rates and are retained by the Company as unallocated equity. The Company also receives patronage refunds from the cooperatives in which it is a member if those cooperatives have earnings to distribute and the Company qualifies for patronage refunds from them.

The origins of CHS date back to the early 1930s with the founding of the predecessor companies of Cenex, Inc. and Harvest States Cooperatives. CHS emerged as the result of the merger of the two entities in 1998, and is headquartered in Inver Grove Heights, Minnesota. In August 2003, the Company changed its name from Cenex Harvest States Cooperatives to CHS Inc.

The international sales information and segment information in Notes 2 and 11 to the consolidated financial statements are incorporated by reference into the following business segment descriptions.

The business segment financial information presented below does not represent the results that would have been obtained had the relevant business segment been operated as an independent business.

AGRONOMY

Overview

Through the Agronomy business segment, the Company is engaged in the manufacture of crop nutrients and the wholesale distribution of crop nutrients and crop protection products. The Company conducts its agronomy operations primarily through two investments—a 20% cooperative ownership interest in CF Industries, Inc. (CF Industries) and, effective January 2000, a 25% ownership interest in Agrilience, LLC (Agrilience). CF Industries manufactures crop nutrient products, particularly nitrogen and phosphate fertilizers, and is one of the largest suppliers to Agrilience. Agrilience is one of North America's largest wholesale distributors of crop nutrients, crop protection products and other agronomy products based on sales.

There is significant seasonality in the sale of crop nutrients and crop protection products and services, with peak activity coinciding with the planting and input seasons.

Table of Contents

The Company's minority ownership interests in CF Industries and Agrilience are treated as investments, and therefore, those entities' revenues and expenses are not reflected in the Company's operating results. CF Industries is treated as a cost method investment and Agrilience is treated as an equity method investment. CF Industries and Agrilience each have their own line of financing, without recourse to the Company.

Operations

CF Industries. CF Industries is an interregional agricultural cooperative involved in the manufacturing of crop nutrient products. It is one of North America's largest producers of nitrogen and phosphate fertilizers based on plant capacity. Through its members, CF Industries' nitrogen and phosphate fertilizer products reach farmers and ranchers in 48 states and two Canadian provinces. CF Industries conducts its operations primarily from the following facilities:

a nitrogen manufacturing and processing facility at Donaldsonville, Louisiana;

a phosphate mine and phosphate fertilizer plant in central Florida; and

a 66% ownership interest in a nitrogen fertilizer manufacturing and processing facility in Alberta, Canada.

Agrilience. Agrilience is one of the nation's largest wholesale distributors of crop nutrients (fertilizers) and crop protection products (insecticides, fungicides and pesticides) based on sales, accounting for an estimated 19% of the U.S. market for crop nutrients and approximately 26% of the U.S. market for crop protection products. As a wholesale distributor, Agrilience has warehouse, distribution and service facilities located throughout the country. Agrilience also owns and operates retail agricultural units in the southern United States. Agrilience purchased approximately 36% of its fertilizer from CF Industries during fiscal year 2003, and purchases most of its crop protection products from Monsanto and Sygenta.

Agrilience was formed in 2000 when CHS, Farmland Industries Inc. (Farmland) and Land O' Lakes, Inc. (Land O' Lakes) contributed their respective agronomy businesses to the new company in consideration for ownership interests (25% each for CHS and Farmland and 50% for Land O' Lakes) in the venture. CHS and Farmland hold their interests in Agrilience through United Country Brands, LLC, a 50/50 jointly-owned holding company.

In April, 2003, CHS acquired a 13.1% additional economic interest in the crop protection products business of Agrilience (the "CPP Business") for a cash payment of \$34.3 million. After the transaction, the economic interests in Agrilience are owned 50% by Land O' Lakes, 25% plus an additional 13.1% of the CPP Business by CHS and 25% less 13.1% of the CPP Business by Farmland. The ownership or governance interests in Agrilience did not change with the purchase of this additional economic interest. Agrilience's earnings are split among the members based upon the respective economic interests of each member.

Products and Services

CF Industries manufactures crop nutrient products, primarily nitrogen and phosphate fertilizers and potash. Agrilience wholesales crop nutrient products and crop protection products that include insecticides, fungicides, and pesticides. Agrilience also provides field and technical services, including soil testing, adjuvant and herbicide formulation, application and related services.

Sales and Marketing; Customers

CF Industries sells its crop nutrient products to large agricultural cooperatives and distributors. Its largest customers are Land O' Lakes, CHS and seven other regional cooperatives that wholesale the products to their members. Agrilience distributes agronomy products through approximately 2,200 local cooperatives from Ohio to the West Coast and from the Canadian border south to Kansas. Agrilience also provides sales and services through 48 Agrilience Service Centers and other retail outlets. Agrilience's

Table of Contents

largest customer is the Company's Country Operations and Services business segment. In 2003, Agriliance sold approximately \$1.3 billion of crop nutrient products and approximately \$1.2 billion of crop protection and other products.

Industry; Competition

CF Industries. North American fertilizer producers operate in a highly competitive, global industry. Commercial fertilizers are world-traded commodities and producers compete principally on the basis of price and service. Many of the raw materials that are used in fertilizer production, such as natural gas, are often more expensive in the U.S. than other parts of the world. Crop nutrient margins and earnings have historically been cyclical; large profits generated throughout the mid-1990's attracted additional capital and expansion and the industry now suffers from excess capacity. These factors have produced depressed margins for North American fertilizer manufacturers over the past several years, although recently fertilizer margins have stabilized.

CF Industries competes with numerous domestic and international crop nutrient manufacturers.

Agriliance. The wholesale distribution of agronomy products is highly competitive and dependent upon relationships with agricultural producers and local cooperatives, proximity to producers and local cooperatives and competitive pricing. Moreover, the crop protection products industry is mature with slow growth predicted for the future, which has led distributors and suppliers to turn to consolidation and strategic partnerships to benefit from economies of scale and increased market share. Agriliance competes with other large agronomy distributors, as well as other regional or local distributors and retailers. Agriliance competes on the strength of its relationships with the members of the Company, Farmland and Land O' Lakes, its purchasing power and competitive pricing, and its attention to service in the field.

Major competitors of Agriliance in crop nutrient distribution include Agrium, Growmark, Cargill, United Suppliers and West Central. Major competitors of Agriliance in crop protection products distribution include Helena, ConAgra (UAP), Tenkoz and numerous smaller distribution companies.

Summary Operating Results

The Company accounts for its Agronomy business segment as follows:

CF Industries. The Company's investment in CF Industries of \$153 million on August 31, 2003 is carried on the balance sheet at cost, including allocated patronage. Since CF Industries is a cooperative, the Company recognizes income from the investment only if it receives patronage refunds. Over the past five years CF Industries has realized operating losses and, as a result, it has not issued any patronage refunds to its members. Historically, crop nutrients manufacturing earnings have been cyclical in nature. CHS management has performed the appropriate impairment tests of this investment, and based upon those tests, believes that fair market value exceeds its carrying value. The Company will continue to perform impairment tests annually, including reviewing operating results, or as circumstances dictate, which could result in an impairment to its CF Industries investment.

Agriliance. At August 31, 2003 the Company's equity investment in Agriliance was \$129.3 million. The Company recognizes earnings from Agriliance using the equity method of accounting, which results in the Company including its economic interest percentage of Agriliance's net earnings as equity income from investments. The Company applies related internal expenses against those earnings.

Table of Contents

Summary operating results and identifiable assets for the Agronomy business segment for the fiscal years ended August 31, 2003, 2002 and 2001 are shown below:

	2003	2002	2001
(dollars in thousands)			
Revenues:			
Net sales

Operating losses	(8,222)	(9,046)	(8,307)
Interest	(974)	(1,403)	(4,529)
Equity income from investments	(20,773)	(13,425)	(7,360)
Income before income taxes	\$ 13,525	\$ 5,782	\$ 3,582
Total identifiable assets August 31	\$285,906	\$242,015	\$230,051

ENERGY**Overview**

CHS is the nation's largest cooperative energy company based on sales, with operations that include petroleum refining and pipelines; the supply, marketing and distribution of refined fuels (gasoline, diesel, and other energy products); the blending, sale and distribution of lubricants; and the wholesale supply of propane. The Energy business segment processes crude oil into refined petroleum products at refineries in Laurel, Montana (wholly-owned) and McPherson, Kansas (an entity in which CHS has an approximately 74.5% ownership interest) and sells those products under the Cenex brand to CHS's member cooperatives and others, through a network of approximately 1,500 independent retailers, including approximately 800 that operate Cenex/ Ampride convenience stores.

Operations

Laurel Refinery. The Company's Laurel, Montana refinery processes medium and high sulfur crude oil into refined petroleum products that primarily include gasoline, diesel, and asphalt. The Laurel refinery sources approximately 90% of its crude oil supply from Canada, with the balance obtained from domestic sources. Laurel has access to Canadian and northwest Montana crude through the Company's wholly-owned Front Range Pipeline, LLC and other common carrier pipelines. The Laurel refinery also has access to Wyoming crude via common carrier pipelines from the south.

The Laurel facility processes approximately 55,000 barrels of crude oil per day to produce refined products that consist of approximately 42% gasoline, 30% diesel and other distillates and 28% asphalt and other residual products. Refined fuels produced at Laurel, Montana are available via the Yellowstone Pipeline to western Montana terminals and to Spokane and Moses Lake, Washington, south via common carrier pipelines to Wyoming terminals and Denver, Colorado, and east via the Company's wholly-owned Cenex Pipeline, LLC to Glendive, Montana, and Minot and Fargo, North Dakota.

McPherson Refinery. The McPherson, Kansas refinery is owned and operated by the National Cooperative Refinery Association (NCRA), of which the Company owns approximately 74.5%. The McPherson refinery processes low and medium sulfur crude oil into gasoline, diesel and other distillates,

Table of Contents

propane, and other products. McPherson sources approximately 95% of its crude oil from Kansas, Oklahoma, and Texas through NCRA-owned and common carrier pipelines.

The McPherson refinery processes approximately 80,000 barrels of crude oil per day to produce refined products that consist of approximately 57% gasoline, 34% diesel and other distillates, and 9% propane and other products. Approximately 90% of the refined fuels are shipped via NCRA's proprietary products pipeline to its terminal in Council Bluffs, Iowa and to other markets via common carrier pipelines. The balance of the fuels are loaded into trucks at the refinery.

Other Energy Operations. The Company owns and operates three propane terminals, four asphalt terminals and three lubricants blending and packaging facilities. The Company also owns and leases a fleet of liquid and pressure trailers and tractors which are used to transport refined fuels, propane and anhydrous ammonia.

Products and Services

The Energy business segment produces and sells (primarily wholesale) gasoline, diesel, propane, asphalt, lubricants and other related products and provides transportation services. It obtains the petroleum products that it sells both from the Laurel and McPherson refineries and from third parties.

Sales and Marketing; Customers

The Company makes approximately 75% of its refined fuel sales to members, with the balance sold to non-members. Sales are made wholesale to member cooperatives and through a network of independent retailers that operate convenience stores under the Cenex/ Ampride tradename. The Company sold approximately 1.5 billion gallons of gasoline and approximately 1.3 billion gallons of diesel fuel in fiscal year 2003. The Company also wholesales auto and farm machinery lubricants to both members and non-members. In fiscal year 2003, energy operations sold approximately 23 million gallons of lube oil. The Company is one of the nation's largest propane wholesalers based on gallons sold. In fiscal year 2003, energy operations sold approximately 844 million gallons of propane. Most of the propane sold in rural areas is for heating and agricultural consumption. Annual sales volumes of propane vary greatly depending on weather patterns and crop conditions.

Industry; Competition

Governmental regulations and policies, particularly in the areas of taxation, energy and the environment, have a significant impact on the Company's Energy business segment. Like many other refineries, the Energy business segment's refineries are currently focusing their capital spending on reducing pollution. In particular, these refineries are currently working to comply with the Environmental Protection Agency low sulfur fuel regulations required by 2006, which are intended to lower the sulfur content of gasoline and diesel. The Company currently expects that the cost of compliance will be approximately \$87.0 million for the Company's Laurel, Montana refinery and \$324.0 million for NCRA's McPherson, Kansas refinery, of which \$8.7 million had been spent at the Laurel refinery and \$36.5 million had been spent by NCRA at the McPherson refinery as of August 31, 2003. The Company expects all of these compliance capital expenditures at the refineries to be complete by December 31, 2005, and anticipates funding these projects with a combination of cash flows from operations and debt proceeds.

The energy business is highly cyclical. Demand for crude oil and its products are driven by the condition of local and worldwide economies, local and regional weather patterns and taxation relative to other energy sources. Most of the Company's energy product market is located in rural areas, so sales activity tends to follow the planting and harvesting cycles. More fuel efficient equipment, reduced crop tillage, depressed prices for crops, warm winter weather, and government programs which encourage idle acres may all reduce demand for the Company's energy products.

The refining and wholesale fuels business is very competitive. Among the Company's competitors are some of the world's largest integrated petroleum companies, which have their own crude oil supplies,

Table of Contents

distribution and marketing systems. The Company also competes with smaller domestic refiners and marketers in the midwestern and northwestern United States, with foreign refiners who import products into the United States and with producers and marketers in other industries supplying other forms of energy and fuels to consumers. Given the commodity nature of the end products, profitability in the refining and marketing industry depends largely on margins, as well as operating efficiency, product mix, and costs of product distribution and transportation. The retail gasoline market is highly competitive, with much larger competitors that have greater brand recognition and distribution outlets throughout the country and the world. CHS owned and non-owned retail outlets are located primarily in the southern, midwestern and northwestern United States.

Summary Operating Results

Summary operating results and identifiable assets for the Energy business segment for the fiscal years ended August 31, 2003, 2002 and 2001 are shown below:

	2003	2002	2001
	(dollars in thousands)		
Revenues:			
Net sales	\$ 3,648,093	\$ 2,657,689	\$ 2,781,243
Patronage dividends	415	458	712
Other revenues	10,461	6,392	4,036
	3,658,969	2,664,539	2,785,991
Cost of goods sold	3,475,947	2,489,352	2,549,099

COUNTRY OPERATIONS AND SERVICES**Overview**

The Country Operations and Services business segment purchases a variety of grains from the Company's producer members and provides cooperative members and producers with access to a full range of products and services including farm supplies, programs for crop and livestock production, hedging and insurance services, and agricultural operations financing. Country Operations and Services operates at 282 locations dispersed throughout Minnesota, North Dakota, South Dakota, Nebraska, Montana, Idaho, Washington and Oregon. Most of these locations purchase grain from farmers and sell agronomy products, energy products and feed to those same producers and others, although not all locations provide every product and service.

Products and Services

Grain Purchasing. The Company is one of the largest country elevator operators in North America based on the number of country elevators. Through a majority of its elevator locations, the Country Operations and Services business segment purchases grain from member and non-member producers and other elevators and grain dealers. Most of the grain purchased is either sold through the Company's Grain Marketing business segment or used for local feed and processing operations. For the year ended August 31, 2003, the Country Operations and Services business segment purchased approximately

Table of Contents

298 million bushels of grain, primarily wheat (136 million bushels), corn (79 million bushels) and soybeans (46 million bushels). Of these bushels, 274 million were purchased from members and 204 million were sold through the Grain Marketing business segment.

Other Products. Country Operations and Services manufactures and sells other products, both directly and through ownership interests in other entities. These include seed; plant food; energy products; animal feed ingredients, supplements and products; animal health products; crop protection products; and processed sunflowers. The Company sells agronomy products at 155 locations, feed products at 128 locations and energy products at 93 locations. Farm supplies are purchased through cooperatives whenever possible.

Financial Services. The Company has provided open account financing to more than 150 CHS members that are cooperatives (cooperative association members) in the past year. These arrangements involve the discretionary extension of credit in the form of term and seasonal loans and can also be used as a clearing account for settlement of grain purchases and as a cash management tool. A substantial part of the term and seasonal loans are sold to the National Bank for Cooperatives (CoBank), with CoBank purchasing up to 90% of any loan. The Company's guarantee exposure on these loans at August 31, 2003 was approximately \$6.7 million. Through its wholly-owned subsidiary Fin-Ag, Inc. the Company provides seasonal cattle feeding and swine financing loans, facility financing loans and crop production loans. It also provides consulting services to member cooperatives. Most loans are sold to CoBank under a separate program from that described above, under which the Company has guaranteed a portion of the loans. The Company's exposure at August 31, 2003 was approximately \$43.0 million. The Company's borrowing arrangements allow for the Company to retain up to \$110.0 million of loans in aggregate for both finance programs, or to sell the loans and extend guarantees up to \$150.0 million in aggregate.

The Company's wholly-owned subsidiary Country Hedging, Inc., which is a registered futures commission merchant and a clearing member of both the Minneapolis Grain Exchange and the Kansas City Board of Trade, is a full service commodity futures and options broker.

Ag States Agency, LLC is an independent insurance agency in which the Company holds a majority ownership interest. It sells insurance, including group benefits, property and casualty, and bonding programs. Its approximately 1,600 customers are primarily agricultural businesses, including local cooperatives and independent elevators, oil stations, agronomy and feed/seed plants, implement dealers, fruit and vegetable packers/warehouses, and food processors.

Industry; Competition

Competitors for the purchase of grain include other elevators and large grain marketing companies. Competitors for farm supply include a variety of cooperatives, privately held and large national companies. The Company competes primarily on the basis of price, services and patronage.

Competitors to the Company's financing operations are primarily other financial institutions. The Company competes primarily on the basis of price, services and patronage. Country Hedging's competitors include international brokerage firms, national brokerage firms, regional brokerage firms (both cooperatives and non-cooperatives) as well as local introducing brokers, with competition driven by price and level of service. Ag States Agency, LLC competes with other insurance agencies, primarily on the basis of price and services.

GRAIN MARKETING**Overview**

CHS is the nation's largest cooperative marketer of grain and oilseed based on grain storage capacity and grain sales, handling about 1.1 billion bushels annually. During fiscal year 2003, the Company purchased approximately 67% of total grain volumes from individual and member cooperatives and the Country Operations and Services business segment, with the balance purchased from third parties. CHS arranges for the transportation of the grains either directly to customers or to Company owned or leased grain terminals and elevators awaiting delivery to domestic and foreign purchasers. The Company primarily conducts its Grain Marketing operations directly, but does conduct some of its business through two 50% owned joint ventures.

Operations

The Grain Marketing segment purchases grain directly and indirectly from agricultural producers primarily in the midwestern and western United States. The purchased grain is typically contracted for sale for future delivery at a specified location, with the Company responsible for handling the grain and arranging for its transportation to that location. The sale of grain is recorded after title to the commodity has transferred and final weights, grades and settlement price have been agreed upon. Amounts billed to the customer as part of a sales transaction include the costs for shipping and handling. The Company's ability to arrange efficient transportation, including loading capabilities onto unit trains, ocean-going vessels, and barges, is a significant part of the service it offers to its customers. Rail, vessel, barge and truck transportation is carried out by third parties, often under long-term freight agreements with the Company. Grain intended for export is usually shipped by rail or barge to an export terminal, where it is loaded onto ocean-going vessels. Grain intended for domestic use is usually shipped by rail or truck to various locations throughout the country.

CHS owns export terminals, river terminals, and elevators involved in the handling and transport of grain. River terminals at St. Paul, Savage, and Winona, Minnesota, and Davenport, Iowa are used to load

Table of Contents

grains onto barges for shipment to both domestic and export customers via the Mississippi River System. The Company's export terminal at Superior, Wisconsin provides access to the Great Lakes and St. Lawrence Seaway, and an export terminal at Myrtle Grove, Louisiana serves the Gulf market. In the Pacific Northwest, the Company conducts its grain marketing operations through United Harvest, LLC (a 50% joint venture with United Grain Corporation) and TEMCO, LLC (a 50% joint venture with Cargill, Incorporated). United Harvest, LLC operates grain terminals in Vancouver and Kalama, Washington. TEMCO, LLC operates a large export terminal in Tacoma, Washington. These facilities serve the Pacific market, as well as domestic grain customers in the western United States. Grain Suppliers, LLC, a wholly-owned subsidiary (previously a 50% joint venture), operates elevator facilities in Friona, Texas and Collins, Mississippi. In 2003, the Company opened an office in Sao Paulo, Brazil for the procurement of soybeans for the Grain Marketing segment's international customers.

Grain Marketing purchases most of its grain during the summer and fall harvest period. Because of the Company's geographic location and the fact that it is further from its export facilities, grain tends to be sold later than in other parts of the country. However, as many producers have significant on-farm storage capacity and in light of the Company's own storage capacity, the Grain Marketing business segment buys and ships grain throughout the year. Due to the amount of grain purchased and held in inventory, the Grain Marketing business segment has significant working capital needs at various times of the year. The amount of borrowings for this purpose, and the interest rate charged on those borrowings, directly affect the profitability of the Grain Marketing segment.

Products and Services

The primary grains purchased by the Grain Marketing business segment for the year ended August 31, 2003 were corn (412 million bushels), wheat (329 million bushels) and soybeans (245 million bushels). Of the total grains purchased by the Grain Marketing business segment during the year ended August 31, 2003, 508 million bushels were purchased from the Company's individual and cooperative association members, 204 million bushels were purchased from the Country Operations and Services business segment and the remainder were purchased from third parties.

Sales and Marketing; Customers

Purchasers include domestic and foreign millers, maltsters, feeders, crushers, and other processors. To a much lesser extent purchasers include intermediaries and distributors. Grain Marketing operations are not dependent on any one customer. The Grain Marketing segment has supply relationships calling for delivery of grain at prevailing market prices.

Industry; Competition

The Grain Marketing business segment competes for both the purchase and sale of grain. Competition is intense and margins are low. Some competitors are integrated food producers, which may also be customers. A few major competitors have substantially greater financial resources than the Company.

In the purchase of grain from producers, location of the delivery facility is a prime consideration, but producers are increasingly willing to truck grain longer distances for sale. Price is affected by the capabilities of the facility; for example, if it is cheaper to deliver to a customer by unit train than by truck, a facility with unit train capability provides a price advantage. The Company believes that its relationships with individual members serviced by local Country Operations and Services locations and with cooperative members gives it a broad origination capability.

The Grain Marketing business segment competes for grain sales based on price, services and ability to provide the desired quantity and quality of grains. Location of facilities is a major factor in the ability to compete. Grain marketing operations compete with numerous grain merchandisers, including major grain merchandising companies such as Archer Daniels Midland (ADM), Cargill, Incorporated (Cargill), ConAgra, Bunge and Louis Dreyfus, each of which handle grain volumes of more than one billion bushels annually.

Table of Contents

The results of the grain marketing business may be adversely affected by relative levels of supply and demand, both domestic and international, commodity price levels (including grain prices reported on national markets) and transportation costs and conditions. Supply is affected by weather conditions, disease, insect damage, acreage planted and government regulations and policies. Demand may be affected by foreign governments and their programs, relationships of foreign countries with the United States, the affluence of foreign countries, acts of war, currency exchange fluctuations and substitution of commodities. Demand may also be affected by changes in eating habits, by population growth, and by increased or decreased per capita consumption of some products.

Summary Operating Results

PROCESSED GRAINS AND FOODS**Overview**

The Processed Grains and Foods business segment converts raw agricultural commodities into ingredients for finished food products or into finished consumer food products. The Company has focused on areas that allow it to utilize the products supplied by member producers. These areas are oilseed processing, wheat milling and foods.

Oilseed Processing

The Company's oilseed processing operations convert soybeans into soybean meal, soyflour, crude soyoil, refined soybean oil and associated by-products. These operations are conducted at a facility in Mankato, Minnesota that can crush 39 million bushels of soybeans on an annual basis, producing approximately 940,000 short tons of soybean meal and 460 million pounds of crude soybean oil. The same facility is able to produce approximately 1 billion pounds of refined soybean oil annually. Another crushing facility in Fairmont, Minnesota has a crushing capacity and crude soyoil output similar to the Mankato facility. The facility in Fairmont was essentially complete and became operational in the first fiscal quarter of 2004. Total costs for this new facility are estimated to be approximately \$85.0 million, of which \$68.9 million has been spent through August 31, 2003.

The Company's oilseed processing operations produce three primary products: refined oils, soybean meal and soyflour. Refined oils are used in processed foods, such as margarine, shortening, salad dressings

Table of Contents

and baked goods and, to a lesser extent for certain industrial uses for plastics, inks and paints. Soybean meal has a high protein content and is used for feeding livestock. Soyflour is used in the baking industry, as a milk replacement in animal feed and in industrial applications.

The Company's soy processing facilities are located in areas with a strong production base of soybeans and end-user market for the meal and soyflour. The Company purchases virtually all of its soybeans from members. The oilseed crushing operations currently produce approximately 45% of the crude oil that the Company refines; it purchases the balance from outside suppliers. Once the Fairmount, Minnesota crushing facility is fully operational, the oilseed crushing operations will produce approximately 85% of the crude oil the Company refines.

The Company's customers for refined oil are principally large food product companies located throughout the United States. However, over 50% of the customers are located in the midwest due to lower freight costs and slightly higher profitability. The largest customer for refined oil products is Ventura Foods, LLC (Ventura Foods), in which the Company holds a 50% ownership interest and with which the Company has a long-term supply agreement to supply minimum quantities of edible soybean oils as long as the Company maintains a minimum 25.5% ownership interest and the Company's price is comparative with other suppliers of the product. The Company's sales to Ventura Foods were \$78.5 million in fiscal year 2003. The Company also sells soymeal to almost 400 customers, primarily feed lots and feed mills in southern Minnesota; five of these customers accounted for approximately 58% of the soymeal sold. One customer accounted for 25% of soymeal sold and another customer accounted for 12% of soymeal sold. The Company sells soyflour to customers in the baking industry both domestically and for export.

The refined soybean products industry is highly competitive. Major industry competitors include ADM, Cargill, Ag Processing, Inc., and Bunge. These and other competitors have acquired other processors and have expanded existing plants, or are proposing to construct new plants, both domestically and internationally. Price, transportation costs, services and product quality drive competition. The Company estimates that it has a market share of approximately 4% to 5% of the domestic refined soybean oil market and less than 3% of the domestic soybean crushing capacity.

Soybeans are a commodity and their price can fluctuate significantly depending on production levels, demand for the refined products, and other supply and demand factors.

Wheat Milling

In January 2002, the Company and Cargill formed Horizon Milling, LLC (Horizon Milling), in which the Company owns 24% and Cargill owns the remaining 76%. Horizon Milling is the largest U.S. wheat miller based on milling capacity. Sales and purchases of wheat and durum by the Company to Horizon Milling during fiscal year 2003 were \$191.3 million and \$8.8 million, respectively. Horizon Milling's advance payments on grain to the Company were \$7.5 million on August 31, 2003, and are included in "Customer advance payments" on the Company's Consolidated Balance Sheets.

The Company ceased operations at its Huron, Ohio mill prior to the formation of Horizon Milling and the Company's facility lease expired on September 30, 2002. The Company has dismantled the milling equipment and is currently negotiating for the sale of the equipment that has not yet been sold. The Processed Grains and Foods business segment established an impairment of approximately \$6.5 million on the equipment during the fourth quarter of fiscal year 2002.

Foods

The Company has two primary areas of focus in the foods area: Ventura Foods, which produces oilseed based products such as margarine and salad dressing and which is 50% owned by the Company, and the production of Mexican foods such as tortillas, tortilla chips and entrees.

Ventura Foods. Ventura Foods manufactures, packages, distributes and markets bulk margarine, salad dressings, mayonnaise, salad oils, syrups, soup bases and sauces, many of which utilize soybean oil as a primary ingredient. Approximately 30% of Ventura Food's volume, based on sales revenues, comes from

Table of Contents

products for which Ventura Foods owns the brand, and the remainder comes from products that it produces for third parties. A variety of Ventura Food s product formulations and processes are proprietary to it or its customers. Ventura Foods is one of the largest manufacturers of margarine in the U.S. based on sales and is a major producer of many other products.

Ventura Foods has 13 manufacturing and distribution locations across the United States. It sources its raw materials, which consists primarily of soybean oil, canola oil, cottonseed oil, peanut oil and various other ingredients and supplies, from various national suppliers, including the Company s oilseed processing operations. It sells the products it manufactures to third parties as a contract manufacturer, as well as directly to retailers, food distribution companies and large institutional food service companies. Ventura Foods sales are approximately 60% in foodservice and the remainder split between retail and industrial customers who use edible oil products as ingredients in foods they manufacture for resale. One customer accounted for 23% of net sales during Ventura Foods 2003 fiscal year.

Ventura Foods competes with a variety of large companies in the food manufacturing industry. Some of its major competitors are ADM, Cargill, Bunge, Unilever, ConAgra, ACH, Smuckers, Kraft, and CF Sauer.

Ventura Foods was created in 1996 and at the time was owned 40% by the Company and 60% by Wilsey Foods, Inc., a majority owned subsidiary of Mitsui & Co., Ltd. In March 2000, the Company purchased an additional 10% interest from Wilsey Foods, Inc. bringing the Company s total equity investment in Ventura Foods to 50%. The Company accounts for the Ventura Foods investment under the equity method of accounting.

Mexican Foods. Since June 2000, the Company has acquired three regional producers of Mexican foods. Through its Mexican foods operations, the Company manufactures, packages, and distributes tortillas, tortilla chips and prepared frozen Mexican food products such as burritos and tamales. The Company sells these products under a variety of local and regional brand names and also produces private label products and co-packs for customers. The current operational focus is on integrating these disparate operations into a single business entity with consistent standards, systems and sales practices.

The tortilla and tortilla chip industry in the United States is comprised of a large number of small regional manufacturers and a few dominant manufacturers. The Company estimates that its Mexican foods operation has approximately a 1.5% share of the national tortilla market and less than a 1% share of the national tortilla chip market. On a national basis, the primary competitors are large chip and snack companies such as Frito Lay. During the Company s fiscal year ended August 31, 2003 one customer accounted for 13% of Mexican foods net sales and another customer accounted for 12% of net sales.

Table of Contents**Summary Operating Results**

Summary operating results and identifiable assets for the Processed Grains and Foods business segment for the fiscal years ended August 31, 2003, 2002 and 2001 are shown below:

Total identifiable assets August 31			

* The sales decline from 2001 is primarily due to the formation of Horizon Milling. Since January 2002 the Company has accounted for the operating results of its milling operations under the equity method of accounting. Earnings from the Company's interest in Horizon Milling are included as part of equity income from investments.

PRICE RISK AND HEDGING

Whenever the Company enters into a commodity purchase commitment it incurs risks of carrying inventory, including risks related to price changes and performance (including delivery, quality, quantity and shipment period). The Company is exposed to risk of loss in the market value of positions held, consisting of inventory and purchase contracts at a fixed or partially fixed price in the event market prices decrease. The Company is also exposed to risk of loss on its fixed price or partially fixed price sales contracts in the event market prices increase.

To reduce the price change risks associated with holding fixed price commitments, the Company generally takes opposite and offsetting positions by entering into commodity futures contracts (either a straight futures contract or an options futures contract) on regulated commodity futures exchanges for grain, and regulated mercantile exchanges for refined products and crude oil. The crude oil and most of the grain and oilseed volume handled by the Company can be hedged. Some grains cannot be hedged because there are no futures for certain commodities. For those commodities, risk is managed through the use of forward sales and various pricing arrangements and to some extent cross-commodity futures hedging. While hedging activities reduce the risk of loss from changing market values of inventory, such activities also limit the gain potential which otherwise could result from changes in market prices of inventory. The Company's policy is to generally maintain hedged positions in grain. The Company's profitability from operations is primarily derived from margins on products sold and grain merchandised, not from hedging transactions. Hedging arrangements do not protect against nonperformance of a contract.

When a futures contract is entered into, an initial margin deposit must be sent to the applicable exchange or broker. The amount of the deposit is set by the exchange and varies by commodity. If the market price of a short futures contract increases, then an additional margin deposit (maintenance margin) would be required. Similarly, if the price of a long futures contract decreases, a maintenance margin

Table of Contents

deposit would be required and sent to the applicable exchange. Subsequent price changes could require additional maintenance margins or could result in the return of maintenance margins.

At any one time, inventory and purchase contracts for delivery to the Company may be substantial. The Company has risk management policies and procedures that include net position limits. These limits are defined for each commodity and include both trader and management limits. This policy, and computerized procedures in grain marketing operations, requires a review by operations management when any trader is outside of position limits and also a review by senior management of the Company if operating areas are outside of position limits. A similar process is used in energy operations. The position limits are reviewed at least annually with the management of the Company. The Company monitors current market conditions and may expand or reduce its risk management policies or procedures in response to changes in those conditions. In addition, all purchase and sale contracts are subject to credit approvals and appropriate terms and conditions.

EMPLOYEES

At August 31, 2003, CHS had approximately 6,820 full and part-time employees, which included approximately 560 employees of NCRA. Of that total, approximately 1,890 were employed in the Energy segment, 2,440 in the Country Operations and Services segment (not including an estimated 1,010 seasonal and temporary employees), 440 in the Grain Marketing segment, 850 in the Processed Grains and Foods segment and 190 in corporate and administrative functions. In addition to those employed directly by the Company, many employees work for the joint ventures in which the Company has an ownership interest. All of the employees in the Agronomy segment and a portion of the Grain Marketing and Processed Grains and Foods segments are employed in this manner.

Employees in certain areas are represented by collective bargaining agreements. Refinery workers in Laurel, Montana (185 employees), are represented by agreements with two unions (Paper, Allied-Industrial, Chemical and Energy Workers International Union (PACE) and Oil Basin Pipeliners Union (OBP)), for which agreements are in place through 2006 for PACE, and through 2006 for OBP in regard to wages and benefits. The contracts covering the NCRA McPherson, Kansas refinery (254 employees in the PACE union) are also in place through 2006. There are approximately 170 employees in transportation and lubricant plant operations that are covered by collective bargaining agreements that expire at various times. Production workers in grain marketing operations (144 employees) are represented by agreements with four unions which expire at various times from 2003 through 2005. In particular, grain marketing employees in the Bakers, Confectionary, Tobacco Workers and Grain Millers International Union in Superior, Wisconsin (49 employees) have contracts that have expired and are currently being negotiated, with the Company anticipating a successful resolution. Finally, certain production workers in oilseed processing operations are subject to collective bargaining agreements with the American Federation of Grain Millers (127 employees) and the Pipefitters Union (2 employees) for which agreements are in place through 2006.

MEMBERSHIP IN THE COMPANY AND AUTHORIZED CAPITAL

Introduction

The Company is an agricultural membership cooperative organized under Minnesota cooperative law to do business with member and non-member patrons. Patrons, and not the Company, are subject to income taxes on income from patronage. The Company is subject to income taxes on non-patronage-sourced income. See Tax Treatment below.

Distribution of Net Income; Patronage Refunds

The Company is required by its organizational documents annually to distribute net earnings derived from patronage business with members, after payment of dividends on equity capital, to members on the basis of patronage, except that the Board of Directors may elect to retain and add to the Company's

Table of Contents

unallocated capital reserve an amount not to exceed 10% of the distributable net income from patronage business. Net income from non-patronage business may be distributed to members or added to the unallocated capital reserve, in whatever proportions the Board of Directors deems appropriate.

These distributions, referred to as patronage refunds or patronage dividends, may be distributed in cash, patrons equities, revolving fund certificates, securities of the Company or others or any combination designated by the Board of Directors. Since 1998, the Board of Directors has distributed patronage refunds the form of 30% cash and 70% patrons equities (see Patrons Equities below). The Board of Directors may change the mix in the form of the patronage refunds in the future. In making distributions, the Board of Directors may use any method of allocation that, in its judgment, is reasonable and equitable. Patronage refunds distributed during the years ended August 31, 2003, 2002 and 2001 were \$88.3 million (\$26.5 million in cash), \$132.6 million (\$40.1 million in cash) and \$86.4 million (\$26.1 million in cash), respectively.

Patrons Equities

Patrons equities are in the form of a book entry and represent a right to receive cash or other property, including securities, when redeemed by the Company. Patrons equities form part of the capital of the Company, do not bear interest and are not subject to redemption upon request of a member. Patrons equities are redeemable only at the discretion of the Board of Directors and in accordance with the terms of the redemption policy adopted by the Board of Directors, which may be modified at any time without member consent. The Company's bylaws grant the Board of Directors the discretion to redeem patrons equities upon such terms as the Board of Directors may, from time to time, determine. The Company's current policy is to redeem the equities of those members who were age 61 and older on June 1, 1998 when they reach the age of 72 and upon death. The current policy also provides for an annual pro-rata redemption of equities older than 10 years held by active members in an amount determined by the Board of Directors.

Redemptions of patrons and other equities, including equity participation units (discussed in Note 9 to the Consolidated Financial Statements), during the years ended August 31, 2003, 2002 and 2001 were \$31.1 million, \$31.1 million and \$33.0 million, respectively.

Governance

The Company is managed by a Board of Directors of at least 17 persons elected by the members at the Company's annual meeting. Terms of Directors are staggered so that no more than seven directors are elected in any year. The Board of Directors is currently comprised of 17 directors. The articles of incorporation and bylaws of the Company may be amended only upon approval of a majority of the votes cast at an annual or special meeting of the members, except for the higher vote described under Certain Antitakeover Measures below.

Membership

Membership in the Company is restricted to certain producers of agricultural products and to associations of producers of agricultural products that are organized and operating so as to adhere to the provisions of the Agricultural Marketing Act and the Capper-Volstead Act, as amended. The Board of Directors may establish other qualifications for membership as it may from time to time deem advisable.

As a membership cooperative, the Company does not have common stock. The Company may issue equity or debt securities, on a patronage basis or otherwise, to its members. The Company has two classes of outstanding membership. Individual members are individuals actually engaged in the production of agricultural products. Cooperative associations are associations of agricultural producers, either cooperatives or other associations organized and operated under the provisions of the Agricultural Marketing Act and the Capper-Volstead Act.

Table of Contents

Voting Rights

Voting rights arise by virtue of membership in the Company, not because of ownership of any equity or debt security. Members that are cooperative associations are entitled to vote based upon a formula that takes into account the equity held by the cooperative in the Company and the average amount of business done with the Company over the previous three years.

Members who are individuals are entitled to one vote. Individual members may exercise their voting power directly or through a patrons association associated with a grain elevator, feed mill, seed plant or any other Company facility (with certain historical exceptions) recognized by the Board of Directors. The number of votes of patrons' associations is determined under the same formula as cooperative association members.

Most matters submitted to a vote of the members require the approval of a majority of the votes cast at a meeting of the members, although the approval of not less than two-thirds of the votes cast at a meeting is required to approve Change of Control transactions, which include a merger, consolidation, liquidation, dissolution, or the sale of all or substantially all of the Company's assets and, in certain circumstances, a greater vote may be required. See Certain Antitakeover Measures below.

Debt and Equity Instruments

The Company may issue debt and equity instruments to its current members and patrons, on a patronage basis or otherwise, and to persons who are neither members nor patrons. Under our articles of incorporation, equity issued by the Company is subject to a first lien in favor of the Company for all indebtedness of the holder to the Company. As of August 31, 2003, the Company's outstanding capital included patrons' equities (consisting of capital equity certificates and non-patronage earnings certificates), 8% Cumulative Redeemable Preferred Stock (dividends paid quarterly) and certain capital reserves.

Distribution of Assets Upon Dissolution; Merger and Consolidation

In the event of any dissolution, liquidation or winding up of the Company, whether voluntary or involuntary, all debts and liabilities would be paid first according to their respective priorities. As more particularly provided in the Company's bylaws, the remaining assets would be paid to the holders of equity capital to the extent of their interests and any excess would be paid to patrons on the basis of their past patronage. The bylaws provide for the allocation among the members and nonmember patrons of the consideration received in any merger or consolidation to which the Company is a party.

Certain Antitakeover Measures

The Company's governing documents may be amended upon the approval of a majority of the votes cast at an annual or special meeting. However, if the Board of Directors, in its sole discretion, declares that a proposed amendment to the Company's governing documents involves or is related to a hostile takeover, the amendment must be adopted by 80% of the total voting power of the members of the Company. Further, if the Board of Directors determines that a proposed change of control transaction involves a hostile takeover, the 80% approval requirement applies. The term hostile takeover is not further defined in the Minnesota cooperative law or the governing documents of the Company.

Tax Treatment

Subchapter T of the Internal Revenue Code sets forth rules for the tax treatment of cooperatives and applies to both cooperatives exempt from taxation under Section 521 of the Internal Revenue Code and to nonexempt corporations operating on a cooperative basis. The Company is a nonexempt cooperative.

As a cooperative, the Company is not taxed on patronage paid to its members either in the form of equities or cash. Consequently, such amounts are taxed only at the patron level. However, the amounts of any allocated but undistributed patronage earnings (called non-qualified unit retains) are taxable to the

Table of Contents

Company when allocated. Upon redemption of any such non-qualified unit retains, the amount is deductible to the Company and taxable to the member.

Income derived by the Company from non-patronage sources is not entitled to the single tax benefit of Subchapter T and is taxed to the Company at corporate income tax rates.

NCRA is not consolidated for tax purposes.

Item 2. Properties

The Company owns or leases energy, grain handling and processing, food manufacturing and agronomy related facilities throughout the United States. Below is a summary of these locations.

Energy

Facilities in the Company's Energy business segment include the following, all of which are owned except where indicated as leased:

Refinery	Laurel, Montana
Propane terminals	3 locations in Minnesota, North Dakota and Wisconsin
Transportation terminals/repair facilities	10 locations in Iowa, Minnesota, Montana, North Dakota, South Dakota, Washington and Wisconsin, 2 of which are leased
Petroleum & asphalt terminals/storage facilities	9 locations in Montana, North Dakota and Wisconsin
Pump stations	10 locations in Montana and North Dakota
Pipelines:	
Cenex Pipeline, LLC	Laurel, Montana to Fargo, North Dakota
Front Range Pipeline, LLC	Canadian Border to Laurel, Montana
Convenience stores/gas stations	33 locations in Iowa, Minnesota, Montana, South Dakota and Wyoming
Lubricant plants/warehouses	3 locations in Minnesota, Ohio and Texas

The Company has a 74.5% interest in NCRA, which owns and operates the following facilities:

Refinery	McPherson, Kansas
Petroleum terminals/storage	2 locations in Iowa and Kansas
Pipeline	McPherson, Kansas to Council Bluffs, Iowa
Jayhawk Pipeline	Throughout Kansas, with branches in Oklahoma and Texas
Jayhawk stations	40 locations located in Kansas and Oklahoma

Grain Marketing

The Company owns or leases grain terminals used in the Grain Marketing business segment at the following locations:

- Davenport, Iowa (2 owned terminals)
- Kalama, Washington (leased)
- Kansas City, Missouri (leased)
- Minneapolis, Minnesota (owned idle terminal)
- Myrtle Grove, Louisiana (owned)
- St. Paul, Minnesota (leased)
- Savage, Minnesota (owned)
- Spokane, Washington (owned)
- Superior, Wisconsin (owned)
- Winona, Minnesota (1 owned, 1 leased)

Table of Contents

Country Operations and Services

In the Country Operations and Services business segment the Company owns 282 agri operations locations (of which some of the facilities are on leased land), 8 feed manufacturing facilities and 2 sunflower plants located in Minnesota, Nebraska, North Dakota, South Dakota, Montana, Washington, Oregon and Idaho.

Processed Grains and Foods

Within the Processed Grains and Foods business segment, the Company owns and leases the following facilities:

Oilseed Processing

The Company owns a campus in Mankato, Minnesota, comprised of a crushing plant, an oilseed refinery, a soyflour plant and a quality control laboratory. A crushing plant in Fairmont, Minnesota previously under construction was essentially complete and became operational during the fiscal quarter ending November 30, 2003.

Wheat Milling

The Company owns five flour milling facilities at the following locations that are leased to Horizon Milling, LLC:

Rush City, Minnesota
Kenosha, Wisconsin
Houston, Texas
Mount Pocono, Pennsylvania
Fairmount, North Dakota

Foods

The Company leases manufacturing facilities in New Brighton, Minnesota, Ft. Worth, Texas and Phoenix, Arizona. In addition, the Company owns two manufacturing facilities in Ft. Worth, Texas. A new facility is currently under construction near Newton, North Carolina, which the Company expects to complete during its fiscal quarter ending November 30, 2003. The Company originally intended to use the facility for manufacturing upon completion of construction, but at this time the Company expects to sell or lease it. All facilities are related to the Company's Mexican foods operations.

Corporate Headquarters

The Company is headquartered in Inver Grove Heights, Minnesota. The Company owns a 33-acre campus consisting of one main building with approximately 320,000 square feet of office space and two smaller buildings with approximately 13,400 and 9,000 square feet of space.

The Company's internet address is www.chsinc.com.

Item 3. *Legal Proceedings*

The Company is involved as a defendant in various lawsuits, claims and disputes which are in the normal course of the Company's business. The resolution of any such matters may affect consolidated net income for any fiscal period; however, management believes any resulting liabilities, individually or in the aggregate, will not have a material effect on the consolidated financial position, results of operations or cash flows of the Company during any fiscal year.

In October 2003, the Company and NCRA reached agreement with the Environmental Protection Agency (EPA) and the State of Montana's Department of Environmental Quality and the State of Kansas Department of Health and Environment, respectively, regarding the terms of settlements with respect to

Table of Contents

reducing air emissions at the Company's Laurel, Montana and NCRA's McPherson, Kansas refineries. These settlements are part of a series of similar settlements that the EPA has negotiated with major refiners under the EPA's Petroleum Refinery Initiative. The settlements, which resulted from nearly three years of discussions, take the form of consent decrees filed with the U.S. District Court for the District of Montana (Billings Division) and the U.S. District Court for the District of Kansas, respectively. Each consent decree details specific capital improvements, supplemental environmental projects and operational changes that the Company and NCRA have agreed to implement at the relevant refinery over the next several years. The consent decrees also require the Company and NCRA to pay approximately \$0.5 million in aggregate civil cash penalties. The Company and NCRA anticipate that their aggregate capital expenditures related to these settlements will total approximately \$25.0 million to \$30.0 million over the next eight years. Approximately 50 percent of the expenditures will be made over the first three years. The Company does not believe that the settlements will have a material adverse affect on the Company.

Item 4. *Submission of Matters to a Vote of Security Holders*

The Company held a special meeting on August 5, 2003 where results of a mail ballot were counted to change the Company's legal name to CHS Inc. Fifty percent of CHS members, consisting of cooperatives and producers in 27 states, participated in the vote; of these, eighty-seven percent of members voted in favor of the legal name change, which needed a simple majority of the members voting for passage.

Table of Contents**PART II.****Item 5. Market for Registrant's Common Equity and Related Stockholder Matters**

The Company has approximately 51,100 members, of which approximately 1,100 are cooperative association members and approximately 50,000 are individual members. As a cooperative, the Company does not have any common equity that is traded.

On August 31, 2003 the Company had 3,748,099 shares of 8% Cumulative Redeemable Preferred Stock outstanding, which is listed on the NASDAQ National Market under the symbol CHSCP.

The Company sold no equity securities during the three years ended August 31, 2003 that were not registered under the Securities Act of 1933, as amended.

On April 25, 2003, the Company issued 298,099 shares of its 8% Cumulative Redeemable Preferred Stock (the New Shares) on conversion of 7,452,439 then-outstanding shares of 8% Preferred Stock (the Old Shares). The New Shares were exchanged by the Company with its existing security holders (the holders of the Old Shares) exclusively and no commission or other remuneration was paid or given directly or indirectly for soliciting the exchange. Accordingly, the Company relied on the exemption from registration contained in Section 3(a)(9) of the Securities Act of 1933, as amended, for the issuance of the New Shares and did not file a registration statement with the Securities and Exchanges Commission with respect to that issuance.

Item 6. Selected Financial Data

The selected financial information below has been derived from the Company's consolidated financial statements for the years ended August 31. The selected consolidated financial information for August 31, 2003, 2002 and 2001 should be read in conjunction with the Company's consolidated financial statements and notes thereto included elsewhere in this filing.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

CHS Inc. (CHS or the Company) is one of the nation's leading integrated agricultural companies. As a cooperative, the Company is owned by farmers, ranchers and their local cooperatives from the Great Lakes to the Pacific Northwest and from the Canadian border to Texas. CHS buys commodities from, and provides products and services to members and other customers. The Company provides a wide variety of products and services, from initial agricultural inputs such as fuels, farm supplies and crop nutrients, to agricultural outputs that include grains and oilseeds, grain and oilseed processing, and food products.

The Company has five distinct business segments: Agronomy, Energy, Country Operations and Services, Grain Marketing and Processed Grains and Foods. Summary data for each of these segments for the fiscal years ended August 31, 2003, 2002 and 2001 is shown on prior pages.

Many of the Company's business activities are highly seasonal, and as a result, operating results will vary throughout the year. Overall, the Company's income is generally lowest during the second fiscal

Table of Contents

quarter and highest during the third fiscal quarter. Certain business segments are subject to varying seasonal fluctuations. For example, the Agronomy and Country Operations and Services segments experience higher volumes and income during the spring planting season and in the fall, which corresponds to harvest. The Grain Marketing segment is subject to fluctuations in volume and earnings based on producer harvests, world grain prices and demand. The Company's Energy segment generally experiences higher volumes and profitability in certain operating areas, such as refined products, in the summer when gasoline and diesel usage is highest. Other energy products, such as propane, experience higher volumes and profitability during the winter heating and crop drying seasons.

The Company's revenue can be significantly affected by global market prices for commodities such as petroleum products, natural gas, grain, oilseeds and flour. Changes in market prices for commodities that the Company purchases without a corresponding change in the selling prices of those products can affect revenues and operating earnings. Commodity prices are affected by a wide range of factors beyond the Company's control, including the weather, crop damage due to disease or insects, drought, the availability and adequacy of supply, government regulation and policies, world events, and general political and economic conditions.

While the Company's sales and operating results are derived from businesses and operations which are wholly-owned and majority-owned, a portion of business operations are conducted through companies in which the Company holds ownership interests of 50% or less and does not control the operations. The Company accounts for these investments primarily using the equity method of accounting, wherein CHS records as equity income from investments its proportionate share of income or loss reported by the entity, without consolidating the revenues and expenses of the entity in the Company's consolidated statements of operations. These investments principally include the Company's 25% ownership in Agriliance, LLC (Agriliance), the 50% ownership in TEMCO, LLC, the 50% ownership in United Harvest, LLC, the 24% ownership in Horizon Milling, LLC (Horizon) and the 50% ownership in Ventura Foods, LLC (Ventura).

Agriliance is owned and governed by Land O' Lakes, Inc. (50%) and United Country Brands, LLC (50%). United Country Brands, LLC is owned and governed 50% by the Company and 50% by Farmland Industries, Inc. (Farmland), and was formed solely to hold a 50% interest in Agriliance. Prior to the transaction described below, the Company's indirect share of earnings (economic interest) in Agriliance was 25%, which was the same as the Company's ownership or governance interest. Subsequent to the transaction, the Company's indirect economic interest in Agriliance is no longer the same as the Company's ownership or governance interest.

In April 2003, the Company acquired an additional economic interest in the Agriliance wholesale crop protection business (the CPP Business), which constitutes only a part of the Agriliance business operations. The Company acquired 13.1% of the CPP Business for a cash payment of \$34.3 million. The economic interests in Agriliance are owned 50% by Land O' Lakes, 25% plus an additional 13.1% of the CPP Business by the Company and 25% less 13.1% of the CPP Business by Farmland. The ownership or governance interests in Agriliance did not change with the purchase of this additional economic interest. Agriliance's earnings are split among the members based upon the respective economic interests of each member.

Results of Operations

Comparison of the years ended August 31, 2003 and 2002

General. The Company recorded pretax earnings of \$136.5 million in fiscal 2003 compared to pretax earnings of \$144.8 million in fiscal 2002, with fiscal 2003 net income of \$123.8 million, slightly below fiscal 2002 net income of \$126.1 million. These results reflected increased pretax earnings in the Agronomy, Energy and Country Operations and Services segments, offset, however, by decreased pretax earnings in the Grain Marketing and Processed Grains and Foods segments.

Table of Contents

The Agronomy segment generated pretax earnings of \$13.5 million for the year ended August 31, 2003 compared to \$5.8 million in the prior year. This increase in earnings is primarily attributable to the acquisition of an additional economic interest in the Agrilience crop protection business, as discussed earlier.

The Energy segment generated pretax earnings of \$83.5 million during the year ended August 31, 2003 compared with \$75.8 million during the prior year. This increase in earnings is primarily attributable to strong refining margins. Because agricultural use of fuels is gradually declining, the Company has introduced initiatives to market greater volumes of refined fuels, propane and lubricants to customers outside its traditional base in the agricultural market. The Company established a record number of new Cenex-branded retail sites during fiscal 2003, with nearly 160 dealerships added or converted to the Cenex brand, and has introduced new lines of lubricant products for use in snowmobiles, all terrain vehicles and marine equipment.

The Grain Marketing segment generated pretax earnings of \$3.7 million for the year ended August 31, 2003 compared to \$8.1 million in the prior year. A major contributing factor was a decrease in exports of grains and oilseeds as the result of increased prices for U.S. grains and oilseeds resulting from drought in parts of the U.S. crop production area which, along with large crops in certain other grain-exporting countries, put U.S. grains and oilseeds in a non-competitive position in the world export market for most of fiscal 2003. During fiscal 2003 the Company constructed 110-car shuttle train receiving stations in Friona, Texas and Collins, Mississippi, which are located near large-scale cattle and poultry producers, with a goal of increasing the volume of domestic grain sales, in part to reduce the Company's exposure to volatile export markets.

The Country Operations and Services segment generated pretax earnings of \$32.8 million for the year ended August 31, 2003 compared to \$24.1 million for the prior year. This increase resulted primarily from \$10.9 million received in cash from a class action lawsuit alleging illegal price fixing against various feed vitamin product suppliers, partially offset by impairments related to facilities where the undiscounted projected income and related cash flows were less than the carrying value of the facilities.

The Processed Grains and Foods segment generated pretax earnings of \$4.2 million for the year ended August 31, 2003 compared to \$32.2 million for the prior year. This decrease was the result of several factors, most significantly the decrease in CHS's equity income from its investment in Ventura Foods discussed below under Equity Income from Investments, depressed soybean meal prices and margins through much of the year, the effects of the recent shifting of U.S. dietary preferences from carbohydrates to high protein and the impact of restructuring efforts in the Company's Mexican foods operations. These factors were partially offset by the effect of higher prices for refined soybean oil and improved results from the Company's wheat milling operations, in part because of impairment charges recognized in fiscal 2002. In late fiscal 2003, margins at both Ventura Foods and Horizon Milling began to improve.

Net Income. Consolidated net income for the year ended August 31, 2003 was \$123.8 million compared to \$126.1 million for the year ended August 31, 2002, which represents a \$2.3 million (2%) decrease. This decrease in profitability is primarily attributable to decreased earnings in the Company's Processed Grains and Foods and Grain Marketing segments, which was partially offset by increased earnings within the Energy, Country Operations and Services and Agronomy segments compared to the year ended August 31, 2002.

Net Sales. Consolidated net sales of \$9.3 billion for the year ended August 31, 2003 increased \$2.1 billion (30%) compared to the year ended August 31, 2002.

Company-wide grain and oilseed net sales of \$4.5 billion increased \$1.0 billion (30%) during the year ended August 31, 2003 compared to the year ended August 31, 2002. Sales for the year ended August 31, 2003 were \$4,139.2 million and \$1,140.0 million from Grain Marketing and Country Operations and Services segments, respectively. Sales for the year ended August 31, 2002 were \$3,281.5 million and \$862.0 million from Grain Marketing and Country Operations and Services segments, respectively. The Company eliminated all intersegment sales between Country Operations and Services and Grain

Table of Contents

Marketing, of \$799.4 million and \$685.4 million, for the years ended August 31, 2003 and 2002, respectively. The net increase in sales was primarily due to an increase of \$0.93 (30%) per bushel in the average sales price of all grain and oilseed marketed by the Company while volumes remained essentially unchanged from the prior year. The net increase in company-wide grain and oilseed of \$1.0 billion was primarily related to the price change due to stronger commodity prices and increased international soybean exports.

Energy net sales of \$3.6 billion increased \$963.6 million (37%) during the year ended August 31, 2003 compared to the year ended August 31, 2002. Sales for the year ended August 31, 2003 and 2002 were \$3,648.1 million and \$2,657.7 million, respectively. The Company eliminated all intersegment sales from Energy to Country Operations and Services of \$94.2 million and \$67.4 million for the years ended August 31, 2003 and 2002, respectively. Refined fuels net sales increased by \$783.2 million, of which \$418.0 million was related to a net average price change and \$365.2 million was related to a net volume change. The sales price of refined fuels increased \$0.18 per gallon and volume increased 17% compared to the year ended August 31, 2002. Refined fuels commodity prices increased due to global uncertainty in the energy markets brought on by the ensuing war and the Venezuela disruption. Propane net sales increased by \$137.0 million, of which \$75.9 million was related to a net volume change and \$61.1 million was related to a net average price change. The average sales price of propane increased by \$0.09 per gallon and volume increased by 19% compared to the year ended August 31, 2002. Domestic propane inventories were at extremely low levels coming out of the heating season, which supported a higher selling price. Refined fuels and propane volume increases were primarily a result of acquisitions, with the largest acquisition taking place in November 2001, when the Company purchased for \$32.6 million, the wholesale energy business of Farmland Industries, Inc. (Farmland), as well as all interest in Country Energy, LLC a joint venture formerly with Farmland.

Country operations non-grain net sales of \$745.8 million increased by \$133.3 million (22%) during the year ended August 31, 2003 compared to the year ended August 31, 2002. The net average price and net volume increased on the majority of farm supply products, which consists of seed; plant food; energy products; animal health ingredients, supplements and products; animal health products; and crop nutrient and crop protection products, compared to the prior year. In addition, net sales increased \$46.4 million compared to the prior year due to the acquisition of a sunflower processing plant.

Processed Grains and Foods segment net sales of \$491.2 million decreased \$4.3 million (1%) during the year ended August 31, 2003 compared to the year ended August 31, 2002. Intersegment sales of \$0.7 million and \$0.6 million for the years ended August 31, 2003 and 2002, respectively, have been eliminated. Oilseed processing and refining net sales increased \$81.4 million primarily due to an average selling price increase of \$0.07 per pound in refined oilseed. In addition, Mexican Foods sales increased \$4.1 million compared to the prior year. These sales increases were partially offset by an \$89.6 million decrease in sales due to the formation of Horizon Milling, a wheat flour milling and processing joint venture that was formed in January 2002. After that date, the Company accounted for operating results of Horizon Milling under the equity method of accounting.

Patronage Dividends. Patronage dividends received from other cooperatives of \$3.3 million decreased \$0.6 million (16%) during the year ended August 31, 2003 compared to the year ended August 31, 2002 from cooperatives of which CHS is a member and with which it does business. The amount of patronage dividends received by CHS in each year depends on the volume of business CHS conducted with the other cooperative (which, in turn, depends on how the terms offered by that cooperative compare to the terms offered by other entities), the profitability generated by the other cooperative on the product purchased by or from CHS, and the patronage distribution resolution adopted by that other cooperative for that year. All of these factors vary from year to year.

Other Revenues. Other revenues of \$124.5 million increased \$15.1 million (14%) during the year ended August 31, 2003 compared to the year ended August 31, 2002. The majority of other revenue was generated within the Country Operations and Services and the Grain Marketing segments and derived primarily from services performed through the Country Operations and Services segment's elevator and

Table of Contents

agri-service centers, including grain storage, grain cleaning, fertilizer spreading, crop protection product spraying and other services of this nature; the Country Operations and Services segment's financial services; and the Grain Marketing segment's service activities at its export terminals for loading vessels.

Cost of Goods Sold. Cost of goods sold of \$9.1 billion increased \$2.1 billion (31%) during the year ended August 31, 2003 compared to the year ended August 31, 2002. The cost of all grains and oilseed procured by the Company through its Grain Marketing and Country Operations and Services segments increased 30% compared to the year ended August 31, 2002 primarily due to a \$0.92 (30%) average cost per bushel increase while volumes remained essentially unchanged from the prior year. This increase in cost of goods sold was primarily the result of higher commodity prices and increased international exports. The Energy segment cost of goods sold increased by \$986.6 million (40%) during the year ended August 31, 2003 compared to the prior year, primarily due to refined fuels average cost increase of \$778.1 million (46%), which consists of increased average cost of \$0.18 per gallon and volume increases of 17% compared to the year ended August 31, 2002. In addition, the average cost of propane increased by \$138.1 million (43%), of which the average cost increased by \$0.10 per gallon and volumes increased by 19% compared to the prior year. Energy cost increases were primarily related to the global effects of higher input costs and increased volumes primarily as a result of acquisitions. Country operations non-grain cost of goods sold increased by 12% during the year ended August 31, 2003 compared to the prior year primarily due to a sunflower processing plant acquisition and increased average cost per unit on most farm supply products. Processed Grains and Foods segment cost of goods sold increased by \$9.3 million (2%) compared to the year ended August 31, 2002. Oilseed processing and refining cost of goods sold increased \$94.6 million, primarily due to the increased cost of raw materials related to oilseed refining of \$0.07 per bushel. This increase was partially offset by decreased cost of goods sold of \$89.7 million related to the formation of Horizon Milling, as previously discussed.

Marketing, General and Administrative. Marketing, general and administrative expenses of \$190.6 million for the year ended August 31, 2003 increased by \$3.3 million (2%) compared to the year ended August 31, 2002. The net increase is primarily due to additional expenses within the Country Operations and Services segment primarily due to a sunflower plant acquisition.

Gain on Legal Settlements. The Country Operations and Services segment received cash of \$10.9 million and \$3.0 million during the years ended August 31, 2003 and 2002, respectively, from a class action lawsuit alleging illegal price fixing against various feed vitamin product suppliers.

Interest. Interest expense of \$48.7 million for the year ended August 31, 2003 increased by \$6.2 million (15%) compared to the year ended August 31, 2002. The average level of short-term borrowings increased \$88.1 million primarily due to financing working capital needs, which was partially offset by an average short-term interest rate decrease of 0.4% during the year ended August 31, 2003 compared to August 31, 2002. Long-term debt borrowings increased due to an additional \$175.0 million of private placement debt that was issued in October 2002.

Equity Income from Investments. Equity income from investments of \$47.3 million for the year ended August 31, 2003 decreased by \$10.8 million (19%) compared to the year ended August 31, 2002. The Company records equity income or loss from the investments it owns 50% or less of for its proportionate share of income or loss reported by the entity, without consolidating the revenues and expenses of the entity in the Company's consolidated statements of operations. The decrease in equity income from investments was primarily attributable to decreased earnings in Ventura Foods, which was partially offset by increased earnings in Agriliance compared to the prior year. Equity earnings in Ventura Foods decreased \$16.2 million during fiscal 2003 when compared with earnings of the previous year. This decrease was mostly attributable to higher priced refined soybean oil, which is a primary ingredient in many of Ventura Foods products, and also to the fact that the depressed U.S. economy reduced business for many of Ventura Foods restaurant customers, in turn decreasing demand for and margins on certain of Ventura's products. Equity earnings in Agriliance increased \$6.8 million during fiscal 2003 when compared with the previous year. This increase was primarily attributable to the Company's acquisition of an additional 13.1% of economic interest in the wholesale CPP business of Agriliance, as previously discussed.

Table of Contents

Minority Interests. Minority interests of \$22.0 million for the year ended August 31, 2003 increased by \$6.6 million (43%) compared to the year ended August 31, 2002. The net change in minority interests during the year ended August 31, 2003 compared to the prior year was primarily a result of more profitable operations within the Company's majority-owned subsidiaries. Substantially all minority interests relate to National Cooperative Refinery Association (NCRA) an approximately 74.5% owned subsidiary.

Income Taxes. Income tax expense of \$12.7 million for the year ended August 31, 2003 compares to \$18.7 million for the year ended August 31, 2002, resulting in effective tax rates of 9.3% and 12.9%, respectively. The federal and state statutory rate applied to nonpatronage business activity was 38.9% for the years ended August 31, 2003 and 2002. The income taxes and effective tax rate vary each year based upon profitability and nonpatronage business activity during each of the comparable years.

Comparison of the years ended August 31, 2002 and 2001

Net Income. Consolidated net income for the year ended August 31, 2002 was \$126.1 million compared to \$178.6 million for the year ended August 31, 2001, which represents a \$52.5 million (29%) decrease. This decrease in profitability is primarily attributable to a tax benefit of \$34.2 million in the prior year and decreased earnings in the Company's Energy segment compared to the year ended August 31, 2001.

Net Sales. Consolidated net sales of \$7.2 billion for the year ended August 31, 2002 decreased \$307.8 million (4%) compared to the year ended August 31, 2001.

Company-wide grain and oilseed net sales of \$3.5 billion increased \$29.0 million (1%) during the year ended August 31, 2002 compared to the year ended August 31, 2001. Sales for the year ended August 31, 2002 were \$3,281.4 million and \$862.0 million from Grain Marketing and Country Operations and Services segments, respectively. Sales for the year ended August 31, 2001 were \$3,416.2 million and \$913.4 million from Grain Marketing and Country Operations and Services segments, respectively. The Company eliminated all intersegment sales from Country Operations and Services to Grain Marketing, of \$685.4 million and \$900.6 million, for the years ended August 31, 2002 and 2001, respectively. The net change in sales was primarily due to an increase of \$0.28 per bushel (10%) in the average sales price of all grain and oilseed marketed by the Company, which was partially offset by a decrease in grain volume of 8% compared to the prior year. The net increase in company-wide grain and oilseed of \$29.0 million was primarily related to an average price increase of \$335.8 million, which was partially offset by a \$306.8 million decrease related to volume.

Energy net sales of \$2.6 billion decreased \$119.1 million (4%) during the year ended August 31, 2002 compared to the year ended August 31, 2001. Sales for the year ended August 31, 2002 and 2001 were \$2,657.7 million and \$2,781.2 million, respectively. The Company eliminated all intersegment sales from the Energy segment to Country Operations and Services segment of \$67.4 million and \$71.8 million for the years ended August 31, 2002 and 2001, respectively. Prior to December 31, 2000 the company consolidated the business activity of Cooperative Refining LLC (CRLLC), a refining joint venture into the Energy segment. The Company held a 58% interest in CRLLC, which was dissolved effective December 31, 2000. Energy sales decreased by \$371.6 million primarily due to this dissolution. Refined fuels net sales that were not part of CRLLC increased by \$259.5 million due to a net volume increase of \$575.6 million, which was partially offset by a \$316.1 million decrease due to the price change compared to the previous year. These refined fuels sales volumes increased by 49%, which was partially offset by a decrease of \$0.21 in the average selling price compared to August 31, 2001. Propane net sales decreased by \$35.0 million; \$109.7 million due to the decrease in net price, which was partially offset by a \$74.8 million increase due to net volume change. The average sales price of propane decreased by \$0.21 per gallon, which was partially offset by volume increases of 28% compared to the year ended August 31, 2001. Refined fuels and propane volume increases were primarily a result of acquisitions, with the most substantial acquisition taking place in November 2001, when the Company purchased for \$32.6 million, the wholesale energy business of Farmland Industries, Inc. (Farmland), as well as all interest in Country Energy, LLC a joint venture formerly with Farmland.

Table of Contents

Country operations non-grain sales of \$612.5 million decreased by \$51.3 million (8%) during the year ended August 31, 2002 compared to the year ended August 31, 2001. The decrease is primarily due to a reduction of \$46.3 million (24%) in the average retail sales price of energy products compared to the prior year. Non-grain sales consist of seed; plant food; energy products; animal health ingredients, supplements and products; animal health products; and crop nutrient and crop protection products.

Processed Grains and Foods segment net sales of \$495.5 million decreased \$166.4 million (25%) during the year ended August 31, 2002 compared to the year ended August 31, 2001. Intersegment sales of \$0.6 million and \$0.8 million, for the years ended August 31, 2002 and 2001, respectively, have been eliminated. Sales decreased \$167.4 million primarily due to the formation of Horizon Milling as previously discussed.

Patronage Dividends. Patronage dividends received of \$3.9 million decreased \$2.1 million (35%) during the year ended August 31, 2002 compared to the year ended August 31, 2001, due to reduced patronage dividends from cooperatives.

Other Revenues. Other revenues of \$109.5 million decreased \$6.8 million (6%) during the year ended August 31, 2002 compared to the year ended August 31, 2001. The majority of other revenue was generated within the Country Operations and Services and the Grain Marketing segments and derived primarily from services performed through the Country Operations and Services segment's elevator and agri-service centers, including grain storage, grain cleaning, fertilizer spreading, crop protection product spraying and other services of this nature; the Country Operations and Services segment's financial services; and the Grain Marketing segment's service activities at its export terminals for loading vessels.

Cost of Goods Sold. Cost of goods sold of \$6.9 billion decreased \$240.5 million (3%) during the year ended August 31, 2002 compared to the year ended August 31, 2001. The cost of all grains and oilseed procured by the Company through its Grain Marketing and Country Operations and Services segments increased \$28.0 million compared to the year ended August 31, 2001 primarily due to a \$0.27 (10%) average cost per bushel increase, which was partially offset by an 8% decrease in volume. This increase was partially offset by decreases in cost of goods sold in the Processed Grains and Foods, Country Operations and Services and Energy segments. Processed Grains and Foods segment cost of goods sold decreased by 26% compared to the year ended August 31, 2001, primarily due to the formation of Horizon Milling, as previously described. Country operations non-grain cost of goods sold decreased by 9% during the year ended August 31, 2002 compared to the prior year primarily due to the reduced cost of energy products. The Energy segment cost of goods sold decreased by 2% during the year ended August 31, 2002 compared to the prior year, primarily due to the dissolution of CRLLC, as previously discussed. However, the volumes of refined fuels that were not associated with the dissolution of CRLLC increased by 49%, which was partially offset by an average cost decrease of \$0.18 per gallon compared to the year ended August 31, 2001. The average cost of propane decreased by \$0.19 per gallon, which was partially offset by a 28% volume increase compared to the prior year. These volume increases were primarily the result of acquisitions.

Marketing, General and Administrative. Marketing, general and administrative expenses of \$187.3 million for the year ended August 31, 2002 increased by \$3.2 million (2%) compared to the year ended August 31, 2001. The net increase is primarily due to additional expenses resulting from Energy segment acquisitions, which was partially offset by reduced expenses within the Processed Grains and Foods segment due to the formation of Horizon Milling described earlier.

Gain on Legal Settlements. During the fiscal year ended August 31, 2002, the Country Operations and Services segment received \$3.0 million in cash from a class action lawsuit alleging illegal price fixing against various feed vitamin product suppliers.

Interest. Interest expense of \$42.5 million for the year ended August 31, 2002 decreased by \$19.0 million (31%) compared to the year ended August 31, 2001. The average level of short-term borrowings decreased \$68.3 million (24%) and the average short-term interest rate decreased 3.6% during the year ended August 31, 2002 compared to the prior year. The net decrease in interest expense from

Table of Contents

short-term borrowings was partially offset by an increase due to an additional \$80.0 million of long-term debt from a private placement, of which \$25.0 million and \$55.0 million were issued in January and March 2001, respectively.

Equity Income from Investments. Equity income from investments of \$58.1 million for the year ended August 31, 2002 increased by \$29.6 million (104%) compared to the year ended August 31, 2001. The increase was primarily attributable to decreased losses from Corporate and Other segment technology investments of \$15.1 million which was dissolved. In addition, earnings from Agronomy, and Processed Grains and Foods segments investments increased in fiscal year 2002 by \$6.1 million and \$5.8 million, respectively compared to the prior year.

Minority Interests. Minority interests of \$15.4 million for the year ended August 31, 2002 decreased by \$19.7 million (56%) compared to the year ended August 31, 2001. The change in minority interests during the year ended August 31, 2002 compared to the prior year was primarily a result of less profitable operations within the Company's majority-owned subsidiaries and the dissolution of CRLLC. Substantially all minority interests relate to National Cooperative Refinery Association (NCRA) an approximately 74.5% owned subsidiary.

Income Taxes. Income tax expense of \$18.7 million for the year ended August 31, 2002 compares to a tax benefit of \$25.6 million for the year ended August 31, 2001, resulting in effective tax rates of a 12.9% expense and a 16.7% benefit, respectively. The federal and state statutory rate applied to nonpatronage business activity was 38.9% for the years ended August 31, 2002 and 2001. An income tax benefit of \$34.2 million for the year ended August 31, 2001 resulted from a change in the tax rate applied to the Company's cumulative temporary differences between income for financial statement purposes and income used for tax reporting purposes. The Company's calculation of its patronage distribution using earnings for financial statement purposes rather than tax basis earnings prompted the rate change. The Company recorded income tax expense of \$18.7 million for the year ended August 31, 2002, which compares to \$8.6 million for the year ended August 31, 2001, exclusive of the \$34.2 million benefit related to the change in patronage determination described above. The income taxes and effective tax rate vary each year based upon profitability and nonpatronage business activity during each of the comparable years.

Liquidity and Capital Resources

On August 31, 2003 the Company had working capital, defined as current assets less current liabilities, of \$458.7 million and a current ratio, defined as current assets divided by current liabilities, of 1.3 to 1.0. Included in this working capital was \$168.2 million of cash and cash equivalents. On August 31, 2002, the Company had working capital of \$249.1 million and a current ratio of 1.2 to 1.0 and on August 31, 2001, the Company had working capital of \$305.3 million and a current ratio of 1.3 to 1.0. During fiscal 2003, the Company borrowed \$175.0 million from a group of insurance companies on a long-term basis and also received net proceeds of \$82.5 million from the sale of preferred stock to the general public. These sources contributed significantly to the increase in the amount of the Company's working capital during fiscal 2003. The Company raised this additional capital in part to fund capital expenditures that it made in fiscal 2003 and expects to make in fiscal years 2004 and 2005 to meet the new low sulfur fuel regulations discussed below in Cash Flows from Investing Activities. The Company has committed lines of revolving credit totaling \$730.0 million, of which \$250.0 million was drawn on August 31, 2003, primarily for the purpose of financing receivables and inventories. These receivables and inventories are highly liquid. The Company believes that its liquidity is adequate to cover any increase in net operating assets and liabilities.

Cash Flows from Operations

Cash flows from operations are generally affected by commodity prices. These commodity prices are affected by a wide range of factors beyond our control, including weather, crop conditions, drought, the availability and adequacy of supply and transportation, government regulations and policies, world events, and general political and economic conditions. These factors, which are described in greater detail in this

Table of Contents

Form 10-K/A-1 under the heading Business Cautionary Statement Regarding Forward-Looking Statements, may affect net operating assets and liabilities and liquidity.

Cash flows provided by (used in) operating activities were \$216.5 million, (\$35.9) million, and \$253.9 million for the years ended August 31, 2003, 2002 and 2001, respectively. Volatility in cash flows from operations for the years ended August 31, 2003, 2002 and 2001 was caused primarily by fluctuations in the year-end price of spring wheat, soybeans and corn, our highest volume commodities. Although crude oil prices have experienced volatility during the three-year period, values on August 31, 2003, 2002, and 2001 were comparable, thus not contributing significantly to changes in net operating assets and liabilities on those dates.

Operating activities of the Company provided net cash of \$216.5 million during the year ended August 31, 2003. Net income of \$123.8 million and net non-cash expenses of \$98.0 million were partially offset by a small increase in net operating assets and liabilities requirements of \$5.3 million. The primary components of net non-cash expenses included depreciation and amortization of \$111.3 million which was partially offset by net income from equity investments of \$47.3 million. Grain and oilseed prices on August 31, 2003 remained at the approximate level prevailing at the end of the previous fiscal year, as market conditions were similar to those at the end of the previous fiscal year. Consequently, net operating assets and liabilities at August 31, 2003 changed only slightly compared with those at the prior year-end.

Operating activities of the Company used net cash of \$35.9 million during the year ended August 31, 2002. Net income of \$126.1 million and net non-cash expenses of \$62.4 million were offset by an increase in net operating assets and liabilities of \$224.4 million. The primary components of net non-cash expenses included depreciation and amortization of \$104.0 million which was partially offset by net income from equity investments of \$58.1 million. The increase in net operating assets and liabilities was primarily due to increased grain prices. Grain and oilseed prices increased considerably at the end of fiscal 2002 in response to drought conditions in parts of the grain production area, which reduced overall market supply and resulted in an increase in grain and oilseed inventory values of \$155.6 million compared to that same inventory category of the year before. The market price of spring wheat, soybeans and corn was higher on August 31, 2002 by \$2.15 per bushel (a 70% increase), \$1.15 per bushel (a 24% increase) and \$0.45 per bushel (a 21% increase), respectively, than at the end of the prior fiscal year. These increases in grain prices also had the affect of increasing hedging margin deposits, which are carried in other current assets, and receivables. These factors in combination with related current liabilities caused net operating assets and liabilities to increase, when comparing August 31, 2002 with August 31, 2001, by \$224.4 million. A major part of the Company's operating assets and liabilities are financed through short-term notes payable. Since the changes in short-term notes payable are shown in cash flows from financing activities, they do not offset an increase in operating assets and liabilities in cash flows from operations. This increase in net operating assets and liabilities requirements at the end of fiscal 2002 was the primary factor in the significant change in cash flows generated by operations when comparing fiscal 2002 with fiscal 2001.

Operating activities of the Company provided net cash of \$253.9 million during the year ended August 31, 2001. Net income of \$178.6 million, net non-cash expenses of \$50.5 million and decreased net operating assets and liabilities of \$24.8 million provided this net cash from operating activities. The primary components of net non-cash expenses included depreciation and amortization of \$109.2 million which was partially offset by net income from equity investments of \$28.5 million and deferred tax credits of \$46.6 million. Stable prices for grain and oilseeds as well as crude oil allowed us to reduce net operating assets and liabilities slightly on August 31, 2001 when compared to net operating assets and liabilities at the close of the prior fiscal year.

The Company expects its net operating assets and liabilities for the early part of fiscal 2004 to increase due to a shortage of railcars available to transport grains and oilseeds from our country elevators to sale destinations. This is likely to cause inventories at the country elevators to increase, and to require us to purchase grain at or near the sale destination. Poor late summer growing conditions for certain crops, especially soybeans, resulted in a decrease in supply and an increase in prices, which we also expect to contribute to an increase in net operating assets and liabilities. The Company believes that it has adequate

Table of Contents

capacity within our existing committed lines of credit to meet any likely increase in net operating assets and liabilities.

Cash Flows from Investing Activities

For the years ended August 31, 2003, 2002 and 2001, the net cash flows used in the Company's investing activities totaled \$173.3 million, \$147.6 million and \$70.2 million, respectively.

The acquisition of property, plant and equipment comprised the primary use of cash totaling \$175.7 million, \$140.2 million and \$97.6 million for the years ended August 31, 2003, 2002 and 2001, respectively. These acquisitions of property, plant and equipment included \$8.5 million, \$6.6 million and \$5.3 million acquired as part of business acquisitions during the respective fiscal years. Capital expenditures during the year ended August 31, 2003 included \$46.0 million for the construction of an oilseed processing facility in Fairmont, Minnesota, with total expenditures for the project at \$68.9 million through August 31, 2003. The Fairmont facility was essentially complete and operational during the first quarter of fiscal 2004, and total costs for the project are estimated to be approximately \$85.0 million. For the year ended August 31, 2004 the Company expects to spend approximately \$252.7 million for the acquisition of property, plant and equipment. Capital expenditures primarily related to the U.S. Environmental Protection Agency (EPA) low sulfur fuel regulations required by 2006, are expected to be approximately \$87.0 million for the Company's Laurel, Montana refinery and \$324.0 million for NCRA's McPherson, Kansas refinery, of which \$8.7 million has been spent at the Laurel refinery and \$36.5 million has been spent by NCRA at the McPherson refinery as of August 31, 2003. The Company expects all of these compliance capital expenditures at the refineries to be complete by December 31, 2005, and anticipates funding these projects with a combination of cash flows from operations and debt proceeds.

In October 2003, the Company and NCRA reached agreement with the EPA and the State of Montana's Department of Environmental Quality and the State of Kansas Department of Health and Environment, respectively, regarding the terms of settlements with respect to reducing air emissions at the Company's Laurel, Montana and NCRA's McPherson, Kansas refineries. These settlements are part of a series of similar settlements that the EPA has negotiated with major refiners under the EPA's Petroleum Refinery Initiative. The settlements, which resulted from nearly three years of discussions, take the form of consent decrees filed with the U.S. District Court for the District of Montana (Billings Division) and the U.S. District Court for the District of Kansas, respectively. Each consent decree details specific capital improvements, supplemental environmental projects and operational changes that the Company and NCRA have agreed to implement at the relevant refinery over the next several years. The consent decrees also require the Company and NCRA to pay approximately \$0.5 million in aggregate civil cash penalties. The Company and NCRA anticipate that their aggregate capital expenditures related to these settlements will total approximately \$25.0 million to \$30.0 million over the next eight years. Approximately 50 percent of the expenditures will be made over the first three years. The Company does not believe that the settlements will have a material adverse affect on the Company.

Investments made during the years ended August 31, 2003, 2002 and 2001 totaled \$43.5 million, \$6.2 million and \$14.2 million, respectively. Investments during the year ended August 31, 2003 included the purchase of an additional economic interest in the wholesale crop protection business of Agrilience, as previously explained.

Acquisitions of intangibles were \$0.8 million, \$29.5 million and \$7.3 million for the years ended August 31, 2003, 2002 and 2001, respectively. During the year ended August 31, 2002, \$26.4 million of the acquisitions of intangibles were related to the purchase of Farmland's interest in its wholesale energy business, as previously discussed, and represented trademarks, tradenames and non-compete agreements. During the year ended August 31, 2001, the intangibles resulted primarily from the purchase of a Mexican foods business.

Net working capital acquired in business acquisitions was \$13.0 million, \$5.8 million and \$1.1 million, respectively, during the years ended August 31, 2003, 2002 and 2001.

Table of Contents

During the years ended August 31, 2003 and 2002 the changes in notes receivable resulted in decreases in cash flows of \$6.6 million and \$22.0 million, respectively, primarily from related party notes receivables at NCRA from its minority owners, Growmark, Inc. and MFA Oil Company. During the year ended August 31, 2001 the changes in notes receivable resulted in an increase in cash flows of \$0.5 million.

Distributions to minority owners for the years ended August 31, 2003, 2002 and 2001 were \$4.4 million, \$7.4 million and \$19.3 million, respectively, and were primarily related to NCRA. For the year ended August 31, 2001 NCRA's distributions also included the distributions made by CRLLC. Cash distributions NCRA has made to its members has decreased in 2003 and 2002, due to the funding requirements for environmental capital expenditures previously discussed.

Partially offsetting cash outlays in investing activities were proceeds from the disposition of property, plant and equipment of \$26.9 million, \$20.2 million and \$35.3 million for the years ended August 31, 2003, 2002 and 2001, respectively. During the year ended August 31, 2003, the proceeds were primarily from disposals of propane plants and non-strategic locations in the Energy segment, sales of equipment and non-strategic agri-operations locations in the Country Operations and Services segment, and sales of wheat milling equipment. During the year ended August 31, 2002, the proceeds were primarily from the disposal of propane plants in the Energy segment and of non-strategic agri-operations locations in the Country Operations and Services segment. Also partially offsetting cash usages were distributions received from joint ventures and investments totaling \$44.4 million, \$44.0 million and \$31.8 million for the years ended August 31, 2003, 2002 and 2001, respectively.

Cash Flows from Financing Activities

The Company finances its working capital needs through short-term lines of credit with a syndication of banks. In May 2003, the Company entered into a new 364-day credit facility of \$600.0 million committed. In addition to these lines of credit, the Company has a 364-day credit facility dedicated to NCRA, with a syndication of banks in the amount of \$30.0 million committed. On August 31, 2003 and 2002, the Company had total short-term indebtedness outstanding on these various facilities and other short-term notes payable totaling \$251.1 million and \$332.5 million, respectively. In October 2002, \$175.0 million received from private placement proceeds was used to pay down the Company's 364-day credit facility. In January 2003, \$83.0 million of proceeds received from the issuance of the Company's preferred stock (net of broker commissions of \$3.2 million) was also used to pay down the 364-day credit facility.

In June 1998, the Company established a five-year revolving credit facility with a syndication of banks, with \$200.0 million committed, which expired in May 2003. The Company had a previous outstanding balance on this facility of \$75.0 million on August 31, 2002, of which repayments of \$75.0 million were made during the year ended August 31, 2003.

In May 2003, the Company established a three-year revolving credit facility with a syndication of banks, with \$100.0 million committed. The interest rate on any borrowings under this facility will be set on the date of borrowing pursuant to a formula; at August 31, 2003 this rate would have been LIBOR plus 100 basis points. There was no outstanding balance on this new credit facility on August 31, 2003.

The Company finances its long-term capital needs, primarily for the acquisition of property, plant and equipment, with long-term agreements with various insurance companies and banks. In June 1998, the Company established a long-term credit agreement through the cooperative banks. This facility committed \$200.0 million of long-term borrowing capacity to the Company, with repayments through fiscal year 2009. The amount outstanding on this credit facility was \$137.8 million and \$144.3 million on August 31, 2003 and 2002, respectively. Repayments of \$6.6 million were made on this facility during each of the three years ended August 31, 2003, 2002 and 2001. Interest rates on August 31, 2003 ranged from 2.14% to 7.13%.

Table of Contents

Also in June 1998, the Company completed a private placement offering with several insurance companies for long-term debt in the amount of \$225.0 million with an interest rate of 6.81%. Repayments will be made in equal annual installments of \$37.5 million each in the years 2008 through 2013.

In January 2001, the Company entered into a note purchase and private shelf agreement with Prudential Insurance Company. The long-term note in the amount of \$25.0 million has an interest rate of 7.9% and will be repaid in equal annual installments of approximately \$3.6 million, in the years 2005 through 2011. A subsequent note for \$55.0 million was issued in March 2001, related to the private shelf facility. The \$55.0 million note has an interest rate of 7.43% and will be repaid in equal annual installments of approximately \$7.9 million, in the years 2005 through 2011.

In October 2002, the Company completed a private placement with several insurance companies for long-term debt in the amount of \$175.0 million which was layered into two series. The first series of \$115.0 million has an interest rate of 4.96% and will be repaid in equal semi-annual installments of approximately \$8.8 million during the years 2007 through 2013. The second series of \$60.0 million has an interest rate of 5.60% and will be repaid in equal semi-annual installments of approximately \$4.6 million during fiscal years 2012 through 2018.

The Company, through NCRA, had revolving term loans outstanding of \$15.0 million and \$18.0 million for the years ended August 31, 2003 and 2002, respectively. Interest rates on August 31, 2003 ranged from 6.48% to 6.99%. Repayments of \$3.0 million were made during each of the three years ended August 31, 2003, 2002 and 2001.

On August 31, 2003, the Company had total long-term debt outstanding of \$663.2 million, of which \$168.0 million was bank financing, \$480.0 million was private placement proceeds and \$15.2 million was industrial development revenue bonds and other notes and contracts payable. On August 31, 2002, the Company had long-term debt outstanding of \$572.1 million. The Company's long-term debt is unsecured except for industrial revenue bonds in the amount of \$1.6 million and other notes and contracts in the amount of \$5.4 million, however, restrictive covenants under various agreements have requirements for maintenance of minimum working capital levels and other financial ratios. The Company is in compliance with all debt covenants and restrictions as of August 31, 2003. The aggregate amount of long-term debt payable as of August 31, 2003 was as follows (dollars in thousands):

2004	\$ 14,951
2005	34,716
2006	35,176
2007	59,671
2008	98,190
Thereafter	420,469
	<u> </u>
	\$663,173
	<u> </u>

During the years ended August 31, 2003, 2002 and 2001, the Company borrowed on a long-term basis \$175.0 million, \$30.0 million and \$116.9 million, respectively, and during the same periods repaid long-term debt of \$89.5 million, \$18.0 million and \$67.4 million, respectively.

In accordance with the bylaws and by action of the Board of Directors, annual net earnings from patronage sources are distributed to consenting patrons following the close of each fiscal year. Patronage refunds are calculated based on amounts using financial statement earnings. The cash portion of the patronage distribution is determined annually by the Board of Directors, with the balance issued in the form of capital equity certificates. The patronage earnings from the fiscal year ended August 31, 2002 were primarily distributed during the second quarter of the year ended August 31, 2003. The cash portion of this distribution, deemed by the Board of Directors to be 30% was \$26.5 million. During the years ended August 31, 2002 and 2001, the Company distributed cash patronage of \$40.1 million and \$26.1 million, respectively.

Table of Contents

Cash patronage for the year ended August 31, 2003, deemed by the Board of Directors to be 30% and to be distributed in fiscal year 2004, is expected to be approximately \$27.0 million and is classified as a current liability on the August 31, 2003 consolidated balance sheet.

The current equity redemption policy, as authorized by the Board of Directors, allows for the redemption of capital equity certificates held by inactive direct members and patrons and active direct members and patrons at age 72 or death that were of age 61 or older on June 1, 1998. Such redemptions are at the discretion of the Board of Directors. For active direct members and patrons who were of age 60 or younger on June 1, 1998, and member cooperatives, equities older than 10 years may be redeemed annually based on a prorata formula where the numerator is dollars available for such purpose as determined by the Board of Directors, and the denominator is the sum of the patronage certificates older than 10 years held by such eligible members and patrons. For the years ended August 31, 2003, 2002 and 2001, the Company redeemed patronage related equities in accordance with authorization from the Board of Directors in the amounts of \$31.1 million, \$31.1 million and \$18.7 million, respectively. Total cash redemptions related to the year ended August 31, 2003, to be distributed in fiscal year 2004, are expected to be approximately \$10.8 million and are classified as a current liability on the August 31, 2003 consolidated balance sheet. An additional \$13 million of capital equity certificates are expected to be redeemed in fiscal year 2004 in exchange for shares of the Company's 8% Cumulative Redeemable Preferred Stock.

During the year ended May 31, 1997, the Company offered securities in the form of Equity Participation Units (EPUs) in its Wheat Milling and Oilseed Processing and Refining Defined Business Units. These EPUs gave the holder the right and obligation to deliver to the Company a stated number of bushels in return for a prorata share of the undiluted grain based patronage earnings of these respective Defined Business Units. The offering resulted in the issuance of such equity with a stated value of \$13,870,000 and generated additional capital and cash of \$10,837,000, after issuance cost and conversion privileges. Conversion privileges allowed a member to elect to use outstanding patrons' equities for the payment of up to one-sixth the purchase price of the EPUs. During 2001, the Company's Board of Directors adopted a resolution to issue, at no charge, to each Defined Member of the Oilseed Processing and Refining Defined Business Unit an additional 1/4 Equity Participation Unit (EPU) for each EPU held, due to increased crush volume.

In August 2001, the CHS Board of Directors approved and consummated a plan to end the Defined Investment Program. The Company redeemed all of the EPUs and allocated the assets of the Oilseed Processing and Refining and Wheat Milling Defined Business Units to the Company as provided in the plan. Due to loss carry-forwards incurred by the Wheat Milling Defined Business Unit the plan also provided for the cancellation of all outstanding Preferred Capital Certificates issued to the EPU holders, totaling \$0.2 million. The plan further provided to the Oilseed Processing Defined Member EPU holders for the redemption of all outstanding Preferred Capital Certificates issued and a 100% cash distribution during 2002 for the patronage refunds earned for the fiscal year ended August 31, 2001.

In 2001 and 2002 the Company issued approximately \$9.5 million (9,454,874 shares) of 8% Preferred Stock (Old Preferred). In late 2002, the Company suspended sales of the Old Preferred, and on February 25, 2003 the Company filed a post-effective amendment to terminate the offering of the Old Preferred shares. In January 2003, the Board of Directors authorized the sale and issuance of up to 3,500,000 shares of 8% Cumulative Redeemable Preferred Stock (New Preferred) at a price of \$25.00 per share. The Company filed a registration statement on Form S-2 with the Securities and Exchange Commission registering 3,000,000 shares of the New Preferred (with an additional over-allotment option of 450,000 shares granted to the underwriters), which was declared effective on January 27, 2003. The shares were subsequently sold for proceeds of \$86.3 million (3,450,000 shares), and are listed on the NASDAQ National Market. The Board of Directors intent is to pay quarterly dividends. Expenses related to the issuance of the New Preferred were \$3.8 million.

On March 5, 2003, the Company's Board of Directors authorized the redemption and conversion of the Old Preferred shares. A redemption notification and a conversion election form were sent to holders of

Table of Contents

the Old Preferred shares on March 21, 2003 explaining that on April 25, 2003 all shares of the Old Preferred would be redeemed by the Company for \$1.00 per share unless they were converted into shares of the Company's New Preferred. The conversion did not change the base liquidation amount or dividend amount of the Old Preferred, since 25 shares of the Old Preferred converted to 1 share of the New Preferred. The total Old Preferred converted to the New Preferred was \$7.5 million (7,452,439 shares), and the balance of the Old Preferred (2,002,435 shares) was redeemed in cash at \$1.00 per share. As of August 31, 2003 the Company had \$93.7 million (3,748,099 shares) of the New Preferred outstanding.

Off Balance Sheet Financing Arrangements***Lease Commitments:***

The Company has commitments under operating leases for various refinery, manufacturing and transportation equipment, rail cars, vehicles and office space. Some leases include purchase options at not less than fair market value at the end of the leases.

Total rental expense for all operating leases, net of rail car mileage credits received from the railroad and sublease income for the years ended August 31, 2003, 2002 and 2001 was \$31.7 million, \$30.7 million and \$35.5 million, respectively.

Minimum future lease payments, required under noncancellable operating leases as of August 31, 2003, were as follows:

	Total
	(dollars in millions)
2004	\$ 33.4
2005	24.4
2006	19.2
2007	12.6
2008	7.2
Thereafter	10.6
	<hr/>
Total minimum future lease payments	\$ 107.4
	<hr/>

Guarantees:

The Company is a guarantor for lines of credit for related companies of which \$52.3 million was outstanding on August 31, 2003. The Company's bank covenants allow maximum guarantees of \$150.0 million. In addition, the Company's bank covenants allow for guarantees dedicated solely for NCRA in the amount of \$125.0 million. All outstanding loans with respective creditors are current as of August 31, 2003.

Debt:

There is no material off balance sheet debt.

Critical Accounting Policies

The consolidated financial statements of the Company are prepared in conformity with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires the use of estimates as well as management's judgments and assumptions regarding matters that are subjective, uncertain or involve a high degree of complexity, all of which affect the results of operations and financial condition for the periods presented. The Company believes that of its significant accounting policies, the following may involve a higher degree of estimates, judgments, and complexity.

Table of Contents

Allowances for Doubtful Accounts

The allowances for doubtful accounts are maintained at a level considered appropriate by management based on analyses of credit quality for specific accounts, historical trends of charge-offs and recoveries, and current and projected economic and market conditions. Different assumptions, changes in economic circumstances or the deterioration of the financial condition of the Company's customers could result in additional provisions to the allowances for doubtful accounts and increased bad debt expense.

Inventory Valuation and Reserves

Grain, processed grains, oilseed and processed oilseeds are stated at net realizable values, which approximates market values. All other inventories are stated at the lower of cost or market. The cost of certain energy inventories (wholesale refined products, crude oil and asphalt) are determined on the last-in, first-out (LIFO) method; all other energy inventories are valued on the first-in, first-out (FIFO) and average cost methods. Estimates are used in determining the net realizable value of grain and oilseed and processed grains and oilseeds inventories. These estimates include the measurement of grain in bins and other storage facilities, which use formulas in addition to actual measurements taken to arrive at appropriate quantity. Other determinations made by management include quality of the inventory and estimates for freight. Grain shrink reserves and other reserves that account for spoilage also affect inventory valuations. If estimates regarding the valuation of inventories or the adequacy of reserves are less favorable than management's assumptions, then additional reserves or write-downs of inventories may be required.

Derivative Financial Instruments

The Company enters into exchange-traded commodity futures and options contracts to hedge its exposure to price fluctuations on energy, grain and oilseed transactions to the extent considered practicable for minimizing risk. The Company does not use derivatives for speculative purposes. Futures and options contracts used for hedging are purchased and sold through regulated commodity exchanges. Fluctuations in inventory valuations, however, may not be completely hedged, due in part to the absence of satisfactory hedging facilities for certain commodities and geographical areas and in part to the Company's assessment of its exposure from expected price fluctuations. The Company also manages its risks by entering into fixed price purchase contracts with pre-approved producers and establishing appropriate limits for individual suppliers. Fixed price sales contracts are entered into with customers of acceptable creditworthiness, as internally evaluated. The Company is exposed to loss in the event of nonperformance by the counterparties to the contracts; however, the Company does not anticipate nonperformance by counterparties. The fair value of futures and options contracts are determined primarily from quotes listed on regulated commodity exchanges. Fixed price purchase and sales contracts are with various counterparties, and the fair values of such contracts are determined from the market price of the underlying product.

Pension and Other Postretirement Benefits

Pension and other postretirement benefits costs and obligations are dependent on assumptions used in calculating such amounts. These assumptions include discount rates, health care cost trend rates, benefits earned, interest costs, expected return on plan assets, mortality rates, and other factors. In accordance with accounting principles generally accepted in the United States of America, actual results that differ from the assumptions are accumulated and amortized over future periods and, therefore, generally affect recognized expenses and the recorded obligations in future periods. While management believes that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect the Company's pension and other postretirement obligations and future expenses.

Deferred Tax Assets

The Company assesses whether a valuation allowance is necessary to reduce its deferred tax assets to the amount that it believes is more likely than not to be realized. While the Company has considered

Table of Contents

future taxable income as well as other factors in assessing the need for the valuation allowance, in the event that the Company were to determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to income in the period such determination was made.

Long-Lived Assets

Depreciation and amortization of the Company's property, plant and equipment is provided on the straight-line method by charges to operations at rates based upon the expected useful lives of individual or groups of assets. Economic circumstances or other factors may cause management's estimates of expected useful lives to differ from actual.

All long-lived assets, including property plant and equipment, goodwill, investments in unconsolidated affiliates and other identifiable intangibles, are evaluated for impairment on the basis of undiscounted cash flows at least annually for goodwill, and whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impaired asset is written down to its estimated fair market value based on the best information available. Estimated fair market value is generally measured by discounting estimated future cash flows. Considerable management judgment is necessary to estimate discounted future cash flows and may differ from actual.

Environmental Liabilities

Liabilities, including legal costs, related to remediation of contaminated properties are recognized when the related costs are considered probable and can be reasonably estimated. Estimates of these costs are based on current available facts, existing technology, undiscounted site-specific costs and currently enacted laws and regulations. Recoveries, if any, are recorded in the period in which recovery is considered probable. It is often difficult to estimate the cost of environmental compliance, remediation and potential claims given the uncertainties regarding the interpretation and enforcement of applicable environmental laws and regulations, the extent of environmental contamination and the existence of alternate cleanup methods. All liabilities are monitored and adjusted as new facts or changes in law or technology occur and management believes adequate provisions have been made for environmental liabilities. Changes in facts or circumstances may have an adverse impact on the Company's financial results.

Effect of Inflation and Foreign Currency Transactions

The Company believes that inflation and foreign currency fluctuations have not had a significant effect on its operations.

Recent Accounting Pronouncements

During 2003, the Company adopted SFAS No. 143, Accounting for Asset Retirement Obligations, issued by the Financial Accounting Standards Board (FASB) which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS No. 143 is effective for financial statements issued for fiscal years beginning after June 15, 2002. The Company's Energy segment operates oil refineries and related pipelines for which the Company would be subject to Asset Retirement Obligations (ARO) if such assets were to be dismantled. The Company, however, expects to operate its refineries and related pipelines indefinitely. Since the time period to dismantle these assets is indeterminate, a corresponding ARO is not estimable and therefore has not been recorded.

In January 2003, the FASB issued FASB Interpretation No. 46, Consolidation of Variable Interest Entities. The interpretation addresses consolidation of certain entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. It also requires consolidation by primary beneficiary. The interpretation applies immediately to variable interest entities created after January 31, 2003, and to variable interest entities in which an enterprise obtains an

Table of Contents

interest after that date. It applies in the first fiscal year or interim period beginning after December 15, 2003, to variable interest entities in which an enterprise holds a variable interest that it acquired before February 1, 2003. The Company believes that the effects of adopting this standard will not have a material effect on the Company.

On April 30, 2003, the FASB issued SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities. SFAS No. 149 amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. The new guidance amends SFAS No. 133 for decisions made as part of the Derivatives Implementation Group process that effectively required amendments to SFAS No. 133, and decisions made in connection with other FASB projects dealing with financial instruments and in connection with implementation issues raised in relation to the application of the definition of a derivative and characteristics of a derivative that contains financing components. In addition, it clarifies when a derivative contains a financing component that warrants special reporting in the statements of cash flows. SFAS No. 149 is effective for contracts entered into or modified after June 30, 2003, and for hedging relationships designated after June 30, 2003. The Company believes that the effects of adopting this standard do not have a material effect on the Company.

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity, which establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in certain circumstances). Many of those instruments were previously classified as equity. SFAS No. 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003, except for mandatorily redeemable financial instruments of nonpublic entities which are subject to the provisions for the fiscal period beginning after December 15, 2003. The Statement is to be implemented by reporting the cumulative effect of a change in an accounting principle for financial instruments created before the issuance date of the Statement and still existing at the beginning of the interim period of adoption. The Company believes that the effects of adopting this standard will not have a material effect on the Company.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

Commodity Price Risk

The Company utilizes futures and options contracts offered through regulated commodity exchanges to reduce price risk. The Company is exposed to risk of loss in the market value of inventories and fixed or partially fixed purchase and sales contracts. In order to reduce that risk, the Company generally takes opposite and offsetting positions using futures contracts or options.

Certain commodities cannot be hedged with futures or options contracts because such contracts are not offered for these commodities by regulated commodity exchanges. Inventories and purchase contracts for those commodities are hedged with forward sales contracts, to the extent practical, in order to arrive at a net commodity position within the formal position limits set by the Company and deemed prudent for each of those commodities. Commodities for which futures contracts and options are available are also typically hedged first with forward contracts, with futures and options used to hedge within position limits the remaining portion. These futures and options contracts and forward purchase and sales cash contracts used to hedge against commodity price changes are effective economic hedges of price risk, but they are not designated as, or accounted for as, hedging instruments for accounting purposes.

Unrealized gains and losses on futures contracts and options used as economic hedges of grain and oilseed inventories and fixed price contracts are recognized in cost of goods sold for financial reporting on a monthly basis using market based prices. Inventories and fixed price contracts are marked to fair value using market based prices so that gains or losses on the derivative contracts are offset by gains or losses on inventories and fixed priced contracts during the same accounting period.

Table of Contents

Unrealized gains and losses on futures contracts and options used as economic hedges of energy inventories and fixed price contracts are recognized in cost of goods sold for financial reporting on a monthly basis using market based prices. The inventories hedged with these derivatives are valued at the lower of cost or fair value, and the fixed price contracts are marked to fair value using market based prices. Certain fixed price contracts related to propane in the Energy segment meet the normal purchase and sales exemption, and thus are not required to be marked to fair value.

A 10% adverse change in market prices would not materially affect the Company's results of operations, financial position or liquidity, since the Company's operations have effective economic hedging requirements as a general business practice.

Interest Rate Risk

The Company manages interest expense using a mix of fixed and floating rate debt. These debt instruments are carried at amounts approximating estimated fair value. Short-term debt used to finance inventories and receivables is represented by notes payable within thirty days or less so that the blended interest rate to the Company for all such notes approximates current market rates. Long-term debt used to finance non-current assets carries various fixed interest rates and is payable at various dates as to minimize the effect of market interest rate changes. The effective interest rate to the Company on fixed rate debt outstanding on August 31, 2003, was approximately 6.5%; a 10% adverse change in market rates would not materially affect the Company's results of operations, financial position or liquidity.

In August 2002, the Company entered into interest rate treasury lock instruments to secure the interest rate related to a portion of its private placement debt issued on October 18, 2002. These instruments were designated and effective as cash flow hedges for accounting purposes, and accordingly, the loss on settlement was recorded as a component of other comprehensive income. Interest expense for the year ended August 31, 2003, includes \$0.7 million related to the interest rate derivatives. The additional interest expense is an offset to the lower actual interest paid on the outstanding debt instruments.

Foreign Currency Risk

The Company conducts essentially all of its business in U.S. dollars except for grain marketing operations in Brazil and some purchases of products from Canada, and had minimal risk regarding foreign currency fluctuations during 2003. Foreign currency fluctuations do, however, impact the ability of foreign buyers to purchase U.S. agricultural products and the competitiveness of U.S. agricultural products compared to the same products offered by alternative sources of world supply.

Item 8. Financial Statements and Supplementary Data

The financial statements listed in 15(a)(1) are set forth beginning on page F-1. Supplementary financial information required by Item 302 of Regulation S-K for the years ended August 31, 2003 and 2002 is presented below. Financial statement schedules are omitted because they are not applicable or the required information is shown in the financial statements or notes thereto.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) as of August 31, 2003. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of that date except as noted below with respect to the identification and elimination of certain sales and transfers within our Grain Marketing business segment, our disclosure controls and procedures were adequately designed to ensure that information required to be disclosed by us in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable Securities and Exchange Commission rules and forms.

During our fourth fiscal quarter, there was no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Following the end of our fourth fiscal quarter, we determined that certain sales and transfers within our Grain Marketing business segment and also between the Grain Marketing segment and the Processed Grains and Foods segment had not been properly identified and eliminated in our consolidated financial statements for certain periods prior to that fiscal quarter. Following this determination, we restated our consolidated statements of operations for the fiscal years ended August 31, 2002, 2001 and 2000 and for the first three fiscal quarters of the fiscal year ended August 31, 2003. These changes had no effect on our financial condition, or changes in cash flows, and no effect on reported gross profit or net income for the periods stated above. In response, we changed our internal control over financial reporting to include additional processes that are intended to ensure the proper identification and reporting of intra-company transactions and enable us to eliminate those transactions in the preparation of our consolidated financial statements.

Table of Contents**PART III.****Item 10. Directors and Executive Officers of the Registrant****BOARD OF DIRECTORS**

The table below lists the directors of the Company as of August 31, 2003.

Bruce Anderson (1995): Served four years in the North Dakota House of Representatives. Held positions with North Dakota Farmers Union and Farmers Union Mutual Insurance Company. Vice chairman of the North Dakota Agricultural Products Utilization Commission. Raises 1,000 acres of small grains near Glenburn, N.D. Mr. Anderson's principal occupation has been farming for the last five years or longer.

Robert Bass (1994): Chairman of board audit committee. Also director of Wisconsin Federation of Cooperatives, as well as Co-op Country Partners, Baraboo, Wis., for 15 years, seven as president. Graduate of the Madison Area Technical College Farm Training Program and holds a B.S. degree in agricultural and extension education from the University of Wisconsin - Madison. Operates a 500-acre dairy and feed grain farm near Reedsburg, Wis. Mr. Bass's principal occupation has been farming for the last five years or longer.

David Bielenberg (2002): Director of Wilco Farmers Cooperative of Mt. Angel, Ore., beginning in 1989, including five years as chairman. Chair of the East Valley Water District. Holds a B.S. degree in Agricultural Engineering from Oregon State University and is a graduate of the Texas A&M University executive program for agricultural producers. Operates a diversified vegetable, fruit and horticultural farm near Silverton, Ore. Mr. Bielenberg's principal occupation has been farming for the last five years or longer.

Dennis Carlson (2001): Chairman, Farmers Union Oil Co. of Bismarck/ Mandan, N.D., serving since 1989. Operates a diversified wheat, sunflower and cow-calf operation near Mandan. Mr. Carlson's principal occupation has been farming for the last five years or longer.

Curt Eischens (1990): Has served as director of Farmers Co-op Association, Canby, Minn. for nine years, eight as board chairman. Chair of the Minnesota Association of Cooperatives. Operates a corn and soybean farm near Canby. Graduate of the Canby Area Technical College Farm Management Program. Mr. Eischens' principal occupation has been farming for the last five years or longer.

Robert Elliott (1996): Served on the boards of Western Cooperative Alliance and New Alliance Bean and Grain Company. Past president of Nebraska Wheat Growers Association and president of Hemingford Scholarship Foundation. Raises 5,000 acres of wheat, corn, dry beans, sugar beets and millet. Holds B.S. and M.S. degrees in agriculture from California Polytechnic University. Mr. Elliott's principal occupation has been farming for the last five years or longer.

Robert Grabarski (1999): Chairman of Wisconsin River Cooperative, Adams and Mauston, Wis., and first vice chairman of Alto Cooperative Creamery, Waupun, Wis. Graduate of the University of Wisconsin agriculture industry shortcourse. Operates a 1,500-acre dairy and crop farm, milking 90 registered Holsteins, near Arkdale, Wis. Mr. Grabarski's principal occupation has been farming for the last five years or longer.

Jerry Hasnedl (1995): Serves on boards for the Minnesota Association of Cooperatives and Minnesota Barley Growers. Chair of the former Wheat Milling Defined Member Board and former director for Northwest Grain. Member of the CHS Foundation Finance and Investment Committee.

Table of Contents

Raises wheat, barley, corn, soybeans, canola, sunflowers and alfalfa near St. Hilaire, Minn. Mr. Hasnedl's principal occupation has been farming for the last five years or longer.

Glen Keppy (1999): Serves on advisory committee for Clean Water Foundation and executive committee of the U.S. Meat Export Federation. Has been director of the Iowa Pork Producers Association, National Pork Producers Association and Federal Reserve Bank Ag Committee. Graduate of University of Wisconsin - Platteville with a degree in technical agriculture. Operates a farrow-to-finish hog farm and raises 1,000 acres of corn, soybeans, oats and alfalfa near Davenport, Iowa. Mr. Keppy's principal occupation has been farming for the last five years or longer.

James Kile (1992): Served 18 years, including 10 as chairman, on the board of St. John (Wash.) Grange Supply. Represents CHS on the Washington State Council of Farmer Cooperatives and Idaho Cooperative Council. Holds a degree in agricultural economics from Washington State University and worked in banking before returning to St. John to operate a dryland wheat and barley farm. Mr. Kile's principal occupation has been farming for the last five years or longer.

Randy Knecht (2001): Served on board of Four Seasons Cooperative, Britton, S.D., for seven years, chairman of Northern Electric Cooperative board and director for Dakota Value Capture Cooperative, Pierre, S.D. Holds a B.S. degree in agriculture from South Dakota State University. Maintains a 450-head cow-calf operation and raises 4,000 acres of corn, soybeans, wheat and alfalfa near Houghton, S.D. Mr. Knecht's principal occupation has been farming for the last five years or longer.

Leonard Larsen (1993): Member of Farmers Union Oil Companies, Minot and Velva, N.D.; SunPrairie Grain; and Dakota Growers Pasta Co. Former board member of Minot Farmers Union Elevator, including six years as chairman. Member of the North Dakota Farmers Union. Served on Hendrickson Township board and the Granville Economic Development Corporation. Raises grain, sunflower, canola and flax near Granville, N.D. Mr. Larsen's principal occupation has been farming for the last five years or longer.

Richard Owen (1999): Serves on boards of Montana Council of Cooperatives, Mountain View, LLC, and Cooperative Development Center, and on the CHS Foundation Finance and Investment Committee. Former secretary and president of Equity Co-op Association of Geraldine, Mont., and past secretary of Central Montana Cooperative of Geraldine and Denton. Holds bachelor's degree in agriculture from Montana State University. Operates a grain farm near Geraldine. Mr. Owen's principal occupation has been farming for the last five years or longer.

Duane Stenzel (1993): Member of WFS, St. James, Minn., and Wells (Minn.) Farmers Elevator, where he served as board president and secretary. Previously chair of former CHS Oilseed Processing and Refining Defined Member Board. Raises 710 acres of soybeans, sweet corn and corn near Wells. Mr. Stenzel's principal occupation has been farming for the last five years or longer.

Michael Toelle (elected in 1992; chairman since 2002): Chaired corporate responsibility committee and served on audit committee and on the CHS Foundation Finance and Investment Committee. Served 15 years as director of Country Partners Cooperative, Browns Valley, Minn., including 10 years as chairman. Holds a B.S. degree in industrial technology from Moorhead State University. Operates a grain and hog farm near Browns Valley. Mr. Toelle's principal occupation has been farming for the last five years or longer.

Merlin Van Walleghen (1993): Previously director of Farmers Co-op Elevator Association of Mitchell, Letcher and Alexandria, S.D., including 10 years as president. Served nine years on the South Dakota Association of Cooperatives board, seven as president. Member of Heartland Consumer Power District board, former Butler Township supervisor and past board member of Farmers Home Administration. Operates a corn and soybean operation near Letcher. Mr. Van Walleghen's principal occupation has been farming for the last five years or longer.

Elroy Webster (1982): Co-chairman of CHS board 1998-99; chairman of Cenex, Inc., board 1988-98. Previously director for Minnesota Association of Cooperatives, Western Co-op Transport Association and

Table of Contents

Agland Cooperative. Past chair of Agricultural Council of America and Board of Trustees for CHS Foundation. Mr. Webster's principal occupation has been farming for the last five years or longer.

Elections are for three-year terms and are open to any eligible candidate. To be eligible, a candidate must meet the following qualifications:

At the time of the election, the individual must be less than the age of 68.

The individual must be a member of this cooperative or a member of a Cooperative Association Member.

The individual must reside in the region from which he or she is to be elected.

The individual must be an active farmer or rancher. Active farmer or rancher means an individual whose primary occupation is that of a farmer or rancher, excluding any full-time employee of the Company or of a Cooperative Association Member.

The individual must currently be serving or shall have served at least one full term as a director of a Cooperative Association Member of this cooperative.

The following positions on the Board of Directors will be elected at the 2003 Annual Meeting of Members:

Region	Current Incumbent
Region 1 (Minnesota)	Elroy Webster (not seeking re-election) Duane Stenzel
Region 3 (North Dakota)	Leonard Larsen
Region 4 (South Dakota)	Merlin Van Wallegghen
Region 6 (Alaska, Arizona, California, Idaho, Oregon, Washington, Utah)	James Kile
Region 8 (Nebraska, Kansas, Oklahoma, Texas, Colorado, New Mexico)	Robert Elliott

EXECUTIVE OFFICERS

The table below lists the executive officers of the Company as of August 31, 2003. Officers are appointed annually by the Board of Directors.

Name	Age	Position
John D. Johnson	55	President and Chief Executive Officer
Patrick Kluempke	55	Executive Vice President Corporate Planning
Tom Larson	55	Executive Vice President Public Affairs
Mark Palmquist	46	Executive Vice President/ Chief Operating Officer Grains and Foods
John Schmitz	53	Executive Vice President and Chief Financial Officer
Leon E. Westbrook	56	Executive Vice President/ Chief Operating Officer Energy and Crop Inputs

John D. Johnson, President and Chief Executive Officer, was born in Rhame, North Dakota, and grew up in Spearfish, South Dakota. He earned a degree in business administration and a minor in economics from Black Hills State University. In 1976, he joined Harvest States Cooperatives as a feed consultant in the GTA Feeds Division, later becoming regional sales manager, Director of Sales and Marketing and then General Manager of GTA Feeds. In 1992, he was elected Group Vice President of Farm Marketing and Supply for Harvest States Cooperatives and was selected President and CEO in January 1995. Mr. Johnson became President and General Manager of CHS Inc. upon its creation June 1, 1998 and was named President and Chief Executive Officer on June 1, 2000. Mr. Johnson serves on

Table of Contents

Ventura Foods, LLC, CF Industries, Inc. and National Cooperative Refinery Association boards of directors.

Patrick Kluempke, Executive Vice President of Corporate Planning, was raised on a family dairy farm in central Minnesota, and received a Bachelor of Science degree in Finance and Accounting from St. Cloud University and the University of Minnesota. Mr. Kluempke served in the United States Army in South Vietnam and South Korea, as Aide to General J. Guthrie. He began his agribusiness career in grain procurement and merchandising at General Mills and later with Louis Dreyfus Corporation in export marketing. Mr. Kluempke joined the predecessor to CHS when G.T.A. was being merged with North Pacific Grain Growers, in 1983, to form Harvest States Cooperatives and has held various positions in the commodity marketing division and at the corporate level. He was named to the position of Senior Vice President of Corporate Planning and Business Development in 1993 and held that position until 2000 when he was named to his current position. Mr. Kluempke serves on the board of Ventura Foods, LLC.

Tom Larson is Executive Vice President, Public Affairs at CHS. After growing up on a 480-acre crop and hog farm near Slayton, Minnesota, he earned a Bachelor's degree in Agriculture Education from South Dakota State University. After working as a vo-ag teacher, he took an agronomy sales position with Cenex, Inc. and later managed the local cooperative at Hoffman, Minnesota, for two years. Mr. Larson returned to the regional cooperative in 1978 and held positions in marketing and planning. He moved to Agronomy in 1987 and became director of Agronomy Services for Cenex/ Land O Lakes Agronomy Company in 1988. He was later named Vice President of Agronomy Services until 1996 when he became Vice President of Cenex Supply and Marketing which included overseeing the operation of more than two dozen Cenex-owned agricultural supply outlets. Mr. Larson was named Vice-President of Public Affairs in January 1999 and in 2000 he was appointed to his current position. He oversees the public affairs area of the Company, which includes communications, corporate giving, meetings and travel and governmental affairs, including the Washington, D.C. office. He is active in the FFA organization and is a recipient of its Honorary American Degree.

Mark Palmquist is the Executive Vice President and Chief Operating Officer of Grains and Foods. He is responsible for all related areas of grains including country operations, terminal operations, exports, logistics, transportation and grain marketing joint ventures. He is also responsible for the operations of wheat milling, oilseed processing and refining, and food manufacturing and packaging. Mr. Palmquist has worked for CHS for 22 years. Starting as a grain buyer and moving into merchandising, he has traded many different commodities including corn, soybeans and spring wheat. In 1990, he assumed the role of Vice President and director of Grain Marketing and then in 1993, was promoted to Senior Vice President, which he held until 2000 when he was named to his current position. Mr. Palmquist attended Gustavus Adolphus College in St. Peter, Minnesota, graduating in 1979. He also attended the Master of Business Administration program at the University of Minnesota. Mr. Palmquist serves on Ventura Foods, LLC board of directors.

John Schmitz is the Executive Vice President and Chief Financial Officer of the Company. Mr. Schmitz joined Harvest States Cooperatives in 1974 as Corporate Accountant and has held a number of accounting and finance positions within the Company, including divisional controller positions in Country Services, Farm Marketing & Supply and Grain Marketing. In 1986, he was named Vice President and Controller of Harvest States Cooperatives, and had served in that position up to the time of the merger with Cenex when he became Vice President, Finance, of CHS. In May 1999, Mr. Schmitz became Senior Vice President and Chief Financial Officer, and in 2000 he was appointed to his current position. Mr. Schmitz earned a Bachelor of Science Degree in Accounting from St. Cloud State University, and is a member of the American Institute of Certified Public Accountants, the Minnesota Society of CPAs and the National Society of Accountants for Cooperatives. Mr. Schmitz serves on National Cooperative Refinery Association, Ventura Foods, LLC, Fin-Ag, Inc. and United Harvest, LLC boards of directors.

Leon E. Westbrook is the Executive Vice President and Chief Operating Officer of Energy and Crop Inputs for the Company. He joined the cooperative system in 1976 and managed three local cooperatives before joining the regional system. At the regional level, Mr. Westbrook served in the Merchandising

Table of Contents

Department at Cenex, Inc. and then later as Manager of the Lubricants Department and as Director of Retailing. Since January 1, 1987, he served as Vice President and Executive Vice President in the Energy Division of the Company. On March 1, 2000 Mr. Westbrook was appointed to his current position. He serves as chairman for both National Cooperative Refinery Association and Universal Cooperatives, Inc. boards of directors and also serves as a member of the Agriliance, LLC board of directors. Mr. Westbrook received a Bachelor's Degree from St. Cloud State University and served a tour in the U.S. Army.

Section 16(a) Beneficial Ownership Reporting Compliance

Based solely upon a review of copies of reports on Forms 3 and 4 and amendments thereto furnished to the Company during, and reports on Form 5 and amendments thereto furnished to the Company with respect to, the fiscal year ended August 31, 2003, and based further upon written representations received by the Company with respect to the need to file reports on Form 5, the following persons filed late reports required by Section 16(a) of the Exchange Act. Mr. Stenzel was late in filing a report on Form 4 relating to one transaction in July 2003. Dennis Wendland, Anwer Hussain, John McEnroe and Tim Cauley, all officers of the Company, were late in filing reports on Form 3, and Mr. Hussain also reported one transaction that was not reported on a timely basis.

Code of Ethics

The Company has adopted a code of ethics within the meaning of Item 406(b) of Regulation S-K of the Securities and Exchange Commission. This code of ethics applies to all officers and employees of the Company. The Company will provide to any person, without charge, upon request, a copy of such code of ethics. A person may request a copy by writing or telephoning the Company at the following address:

CHS Inc.

Attention: Dave Kastelic

Audit Committee Matters

The Company's Board of Directors has a separately designated standing Audit Committee for the purpose of overseeing the accounting and financial reporting processes of the Company and audits of the Company's financial statements. The Audit Committee is comprised solely of directors Mr. Bass, Mr. Bielenberg, Mr. Carlson and Mr. Webster, each of whom is an independent director. The Audit Committee has oversight responsibility to the Company's owners relating to the Company's financial statements and the financial reporting process, preparation of the financial reports and other financial information provided by the Company to any governmental or regulatory body, the systems of internal accounting and financial controls, the internal audit function and the annual independent audit of the Company's financial statements. The Audit Committee assures that the corporate information gathering and reporting systems developed by management represent a good faith attempt to provide senior management and the Board of Directors with information regarding material acts, events and conditions within the Company. In addition, the Audit Committee is directly responsible for the appointment, compensation and oversight of the independent auditors.

The Company does not believe that any member of the Audit Committee of the Board of Directors is an audit committee financial expert as defined in the Sarbanes-Oxley Act of 2002 and rules and regulations thereunder. As a cooperative, the 17-member Board of Directors is nominated and elected by the Company's members. To ensure geographic representation of the Company's members, the Board of Directors represent eight (8) regions in which the Company's members are located. The members in each region nominate and elect the number of directors for that region as set forth in the Company's bylaws. To be eligible for service as a director, a nominee must (i) be a member of the Company and (ii) reside in the geographic region from which he or she is nominated. Neither management nor the incumbent

Table of Contents

directors have any control over the nominating process for directors. Because of the eligibility requirements and the election process, the Company cannot ensure that an elected director will be an audit committee financial expert .

However, many of the Company's directors, including all of the Audit Committee members, are financially sophisticated and have experience or background in which they have had significant financial oversight responsibilities. The current Audit Committee includes directors who have served as presidents or chairmen of local cooperative association boards. Members of the Board of Directors, including the Audit Committee, also operate large commercial enterprises requiring expertise in all areas of management, including financial oversight.

Item 11. Executive Compensation

Summary Compensation. The following table sets forth the cash and noncash compensation earned by the Chief Executive Officer and each of the executive officers of the Company whose total salary and bonus or similar incentive payment earned during the year ended August 31, 2003, exceeded \$100,000 (the Named Executive Officers):

Summary Compensation Table

Name and Principal Position	Year Ended	Annual Compensation			Long-Term-Compensation	
		Salary(1)	Bonus(1)	Other Annual Compensation(2)	All Other Compensation(3)	LTIP Payouts(1)
John. D. Johnson President and Chief Executive Officer	8/31/03	\$ 850,000	\$ 710,940	\$ 25,800	\$ 7,931	\$ 820,802
	8/31/02	820,000	811,750	30,376	10,216	
	8/31/01	787,500	747,338	8,600	9,606	
Patrick Kluempke Executive Vice President Corporate Planning	8/31/03	230,880	145,842	15,120	7,549	166,949
	8/31/02	223,000	166,875	15,120	10,873	
	8/31/01	200,000	162,675	3,780	6,010	
Tom Larson Executive Vice President Public Affairs	8/31/03	240,000	156,966	15,120	6,104	174,763
	8/31/02	229,100	172,200	18,878	10,214	
	8/31/01	200,000	167,850	16,130	8,189	
Mark Palmquist Executive Vice President and Chief Operating Officer Grains and Foods	8/31/03	482,400	145,323	15,120	6,938	348,215
	8/31/02	453,400	342,000	15,120	11,081	
	8/31/01	375,000	232,680	14,111	5,863	
John Schmitz Executive Vice President and Chief Financial Officer	8/31/03	410,700	268,146	15,120	7,932	285,155

	8/31/01	275,000	232,500	2,520	7,080	
Leon E. Westbrook Executive Vice President and Chief Operating Officer Energy and Crop Inputs	8/31/03	482,400	344,148	15,120	6,725	348,215
	8/31/02	453,400	342,000	15,120	12,057	
	8/31/01	375,000	332,400	7,320	5,116	

- (1) Amounts shown include amounts deferred at the employee's election under the Company's Deferred Compensation Program and amounts waived in exchange for options under the Company's Share Option Plan.
- (2) Amounts shown include personal use of a Company vehicle and/or vehicle allowance.
- (3) Other compensation includes the Company's matching contributions under the Company's 401(k) Plan and the portion of group term life insurance premiums paid by the Company.

Edgar Filing: CHS INC - Form 10-K/A

On November 6, 2003, the Company entered into an employment agreement with John D. Johnson, the President and CEO. The employment agreement provides for a rolling three-year period of employment effective September 1, 2003 at an initial base salary of at least \$850,000, subject to annual review. Either party, subject to the rights and obligations set forth in the employment agreement, may terminate Mr. Johnson's employment at any time. The Company is obligated to pay Mr. Johnson a

Table of Contents

severance allowance of 2.99 times his base salary and target bonus in the event Mr. Johnson's employment is terminated for any reason other than for cause (as such term is defined in the employment agreement), death, disability or voluntary termination, and in the event of the consolidation of the Company's business with the business of any other entity, if Mr. Johnson is not offered the position of Chief Executive Officer of the combined entity. The contract provides for a gross-up for any possible excise tax. Mr. Johnson has also agreed to a non-compete clause of two years, in the event of his termination.

Report on Executive Compensation

The Corporate Responsibility Committee of the Board of Directors, subject to the approval of the Board of Directors, determines the compensation of CHS Inc. chief executive officer and oversees the administration of the executive compensation programs.

Executive Compensation Policies and Programs

CHS Inc. executive compensation programs are designed to attract and retain highly qualified executives and to motivate them to optimize member owner returns by achieving aggressive goals. The compensation program links executive compensation directly to the Company's performance. A significant portion of each executive's compensation is dependent upon value-added operations and meeting financial goals and other individual performance objectives.

Each year, the Committee reviews the executive compensation policies with respect to the correlation between executive compensation and the creation of member owner value, as well as the competitiveness of the programs. The Committee determines what, if any, changes are appropriate to executive compensation programs of CHS Inc. The Committee recommends to the total Board of Directors, salary actions relative to the chief executive officer and determines the amount of annual variable pay and the amount of long-term awards.

The Company intends to the extent possible, to preserve the deductibility under the Internal Revenue Code of compensation paid to its executive officers while maintaining compensation programs to attract and retain highly qualified executives in a competitive environment. Accordingly, compensation paid under CHS Inc. share option plan and incentive compensation plan is generally deductible.

Components of Compensation

There are three basic components to the CHS Inc. executive compensation plan: base pay; annual variable pay; and long-term variable pay (grants in the share option plan). Each component is designed to be competitive within the executive compensation market. In determining competitive compensation levels, the Company analyzes information from several independent compensation surveys, which include information regarding a comparable all-industrial market and other companies that compete for executive talent.

Base Pay: Base pay is designed to be competitive at the 50th percentile of other large companies for equivalent positions. The executive's actual salary relative to this competitive benchmark varies based on individual performance and the individual's skills, experience and background.

Annual Variable Pay: Award levels, like the base pay levels, are set with reference to competitive conditions and are intended to motivate the executives by providing substantial incentive payments for the achievement of aggressive goals. The actual amounts paid for 2003 were determined based on two factors: first, profitability and financial performance of the Company and the executive's business unit; and second, the individual executive's performance against other specific management objectives such as revenue volume growth, value added performance, talent development. Financial objectives are given greater weight than individual performance objectives in determining individual awards. The types and relative importance of specific financial and other business objectives varied among executives depending upon their positions and the particular business unit for which they were responsible.

Table of Contents

Long-Term Variable Pay: The main purpose of the long-term variable pay program is to encourage the CHS Inc. executives to increase the value of doing business with the Company by increasing and improving value added business opportunities and therefore the value of member owners doing business with CHS Inc. The long-term variable pay component of the compensation program (through extended vesting) is also designed to create an incentive for the individual to remain with the Company.

The long-term variable pay program consists of grants of shares in the restricted investment corporations sponsored by CHS Inc. These options vest over a multi-year period. The Company periodically grants new awards to provide continuing incentives for future performance. Like the annual variable pay, award levels are set with regard to competitive considerations and each individual's actual award is based on financial performance of the Company, collectively.

Compensation of the Chief Executive Officer

In determining the compensation of the chief executive officer, the Committee considers three factors: the absolute and relative performance of the business particularly as it relates to variable pay; the market for such positions; and CHS Inc. compensation strategy in determining the mix of base, annual, and long-term variable pay.

In general, the Company's strategy is to distribute pay for the chief executive officer among the three basic components so that it effectively reflects the competitive market with major consideration for achievement of individual performance objectives.

Mr. Johnson's actual base salary for fiscal year 2003 was \$850,000. Based on CHS Inc. financial performance in terms of profitability and other individual goals related to achieving communications objectives, business partner accountability and other strategic objectives, Mr. Johnson received an annual variable pay award of \$710,940 and a long-term variable pay award of \$820,802 for fiscal year 2003. These incentive payments were consistent with his achievement of performance standards set by the Board of Directors.

The following summarizes certain benefits in effect as of August 31, 2003 to the Named Executive Officers.

Management Compensation Incentive Program

Each Named Executive Officer is eligible to participate in the Management Compensation Incentive Program (the Incentive Program) for the year ending August 31, 2003. The Incentive Program is based on Company, group or division performance and individual performance. These amounts will be paid after August 31, 2003. The target incentive is 50% of base compensation except for the President and Chief Executive Officer, where target incentive is 67% of base compensation.

Long-Term Incentive Plan

Each Named Executive Officer is eligible to participate in the Long-Term Incentive Plan. The plan consists of a three-year performance period. Award opportunities are expressed as a percentage of a participating employee's position average mid-point. Company performance must meet a minimum level of pre-tax earnings per unit of sales volume and net income levels before any grants are made from this plan. The Board of Directors has discretion to increase or decrease an award up to 20%. Awards from the plan are grants to the Company's Share Option Plan at the end of each plan period.

Table of Contents**Long-Term Incentive Plans Awards in Last Fiscal Year**

Name and Principal Position	Award 2001-2003	Maturation of Award	Threshold each year	Target each year	Maximum each year
John D. Johnson President and Chief Executive Officer	\$ 820,802	2001-2003	\$ 81,417	\$ 545,492	\$ 814,167
Patrick Kluempke Executive Vice President Corporate Planning	166,949	2001-2003	16,560	110,952	165,600
Tom Larson Executive Vice President Public Affairs	174,763	2001-2003	17,335	116,145	173,350
Mark Palmquist Executive Vice President and Chief Operating Officer Grain and Foods	348,215	2001-2003	34,540	231,418	345,400
John Schmitz Executive Vice President and Chief Financial Officer	285,155	2001-2003	28,285	189,510	282,850
Leon E. Westbrook Executive Vice President and Chief Operating Officer Energy and Crop Inputs	348,215	2001-2003	34,540	231,418	345,400

Retirement Plan

Each of the Named Executive Officers is entitled to receive benefits under the Company's Cash Balance Retirement Plan (the Retirement Plan). An employee's benefit under the Retirement Plan depends on credits to the employee's account, which are based on the employee's total salary each year the employee works for the Company, the length of service with the Company and the rate of interest credited to the employee's account balance each year. Credits are made to the employee's account from Pay Credits, Special Career Credits and Investment Credits.

The amount of Pay Credits added to an employee's account each year is a percentage of the employee's gross salary, including overtime pay, commissions, severance pay, bonuses, any compensation reduction pursuant to the 401(k) Plan and any pretax contribution to any of the Company's welfare benefit plans, paid vacations, paid leaves of absence and pay received if away from work due to a sickness or injury. The Pay Credits percentage received is determined on a yearly basis, based on the years of Benefit Service completed as of January 1 of each year. An employee receives one year of Benefit Service for every calendar year of employment in which the employee completed at least 1,000 hours of service.

Effective January 1, 2003, Pay Credits are earned according to the following schedule:

Years of Benefit Service	Pay Below Social Security Taxable Wage Base	Pay Above Social Security Taxable Wage Base
1 to 3 years	3%	6%
4 to 7 years	4%	8%
8 to 11 years	5%	10%
12 to 15 years	6%	12%
16 years and more	7%	14%

The Company credits an employee's account at the end of the year with an Investment Credit based on the balance at the beginning of the year. The Investment Credit is based on the average return for one-year U.S. Treasury Bills for the preceding 12-month period. The maximum Investment Credit will not exceed 12% for any year.

Table of Contents

As of December 31, 2002, the dollar value of the account and years of service for each of the Named Executive Officers was:

	<u>Dollar Value</u>	<u>Years of Service</u>
John D. Johnson	\$ 990,480	27
Patrick Kluempke	484,691	20
Tom Larson	441,526	26
Mark Palmquist	540,524	23
John Schmitz	466,773	28
Leon E. Westbrook	1,051,770	22

Share Option Plan

In October 1997, the Company adopted a Share Option Plan. Participants in the plan, which include all Named Executive Officers, are select management of the Company who have been designated as eligible by the President of the Company to participate in such plan. The Share Option Plan allows participants to waive bonuses and up to 30 percent of salary in exchange for options to purchase, at a discount, shares of selected mutual funds. The Company has filed a Form S-8, dated December 12, 1997 on this program. This plan allows officers to buy investments at a specific price. Some options have vesting schedules.

The following is a share option grants table showing each Named Executive Officer option activity for the fiscal year ended August 31, 2003. The dollars in the Realizable Value columns of the table are computed as of the expiration date. All grants are salary exchanges, and not additional income to the employee.

<u>Name</u>	<u>Number of Securities</u>	<u>% of Total Options</u>	<u>\$ Exercise Price</u>	<u>Expiration Date</u>	<u>Realizable Value 5%</u>	<u>Realizable Value 10%</u>	<u>Realizable Value 0%</u>

Table of Contents

The following is a share option grants table showing each Named Executive Officer, along with the number and value of shares exercised for the fiscal year ended August 31, 2003, and the number of underlying unexercised options and the value of unexercised in-the-money options, as of the most recent statement period ended June 30, 2003.

Name	Number of Shares Exercised	Value of Shares Exercised	Number of Securities Underlying Options Exercisable	Number of Securities Underlying Options Unexercisable	Value of Unexercised In-the-Money Options Exercisable	Value of Unexercised In-the-Money Options Unexercisable
John. D. Johnson			470,532.389	23,654.799	\$4,390,067	\$220,699
Patrick Kluempke	81,521.058	\$600,810	50,596.492		444,237	
Thomas Larson			56,364.534		494,881	
Mark Palmquist	58,291.716	524,611	3,549.270		34,641	
John Schmitz			41,731.660		407,301	
Leon E. Westbrook	73,260.073	600,000	449,277.209		4,052,959	

401(k) Plan

Each Named Executive Officer is eligible to participate in the CHS Inc. Savings Plan (the 401(k) Plan). All benefit-eligible employees of the Company are eligible to participate in the 401(k) Plan. Effective January 1, 2002, participants may contribute between 1% and 50% (not to exceed the IRS limits on benefits in the case of highly compensated employees) of their pay on a pre-tax basis. Each of the Named Executive Officers is a highly compensated employee. The Company matches 50% of the first 6% of pay contributed each year. The Company's Board of Directors may elect to reduce or eliminate matching contributions for any year or any portion thereof. Participants are 100% vested in their own contributions and are fully vested after three years of service in any Company matching contribution made on the participant's behalf.

Deferred Compensation Supplemental Retirement Plan

Each of the Named Executive Officers may participate in the Company's Deferred Compensation Supplemental Retirement Plan (the Supplemental Plan). Participants in the Supplemental Plan are select management or highly compensated employees of the Company who have been designated as eligible by the President of the Company to participate in such plan. Compensation waived under the Share Option Plan is not eligible for Pay Credits under the Cash Balance Retirement Plan or matching contributions under the 401(k) Plan. The Supplemental Plan is intended to replace the benefits lost under those plans due to Section 415 of the Internal Revenue Code of 1986, as amended (the Code) which cannot be considered for purposes of benefits due to Section 401(a)(17) of the Code under the qualified plans that the Company offers. The Supplemental Plan is not funded or qualified for special tax treatment under the Code.

In addition, the Chief Executive Officer of the Company is eligible to participate in the Company's Special Supplemental Executive Retirement Plan (the Special Supplemental Plan). The special supplemental retirement benefit will be credited at the end of each plan year for which the participant completes a year of service. The amount credited shall be an amount equal to that set forth in a schedule of benefits stated in the Special Supplemental Plan. The Special Supplemental Plan is not funded or qualified for special tax treatment under the Code.

Table of Contents

As of December 31, 2002, the dollar value of the account of each of the Named Executive Officers was approximately:

	Supplemental Plan	Special Supplemental Plan
John D. Johnson	\$ 1,904,914	\$0
Patrick Kluempke	91,160	N/A
Tom Larson	396,566	N/A
Mark Palmquist	253,641	N/A
John Schmitz	199,830	N/A
Leon E. Westbrook	1,274,612	N/A

Directors Compensation

The Board of Directors met monthly during the year ended August 31, 2003. Through August 31, 2003, the Company provided each director with compensation of \$42,000, paid in twelve monthly payments, with; the Chairman of the Board receiving an additional annual compensation of \$12,000, the First Vice Chairman receiving an additional annual compensation of \$3,600, and the Secretary-Treasurer receiving an additional annual compensation of \$1,800. Each director receives a per diem of \$300 plus actual expenses and travel allowance for each day spent on Company meetings (other than regular Board meetings and the Annual Meeting), life insurance and health and dental insurance. Each director has a retirement benefit of \$175 per month per year of service, with a maximum benefit of \$2,625 per month, for life with a guarantee of 120 months (paid to beneficiary in the event of death). This benefit commences at age 60 or retirement, whichever is later. This retirement benefit may be converted to a lump sum. The retired directors may also continue health benefits until eligible for Medicare and thereafter pay at their own expense for a Medicare supplemental policy.

Committees of the Board of Directors

The Board of Directors appoints ad hoc committees from time to time to review certain matters and make reports and recommendations to the full Board of Directors for action. The entire Board of Directors determines the salaries and incentive compensation for the President and Chief Executive Officer using industry and compensation studies. The Board of Directors has a standing Audit Committee to review the results and scope of the annual audit and other services provided by the Company's independent auditors, and another standing committee to review equity redemption policy and its application to situations believed by the equity holder or patron's equity department to be unusual.

Compensation Committee Interlocks and Insider Participation

As noted above, the Company's Board of Directors does not have a Compensation Committee. The entire Board of Directors determined the compensation of the President and Chief Executive Officer and the terms of the employment agreement with the President and Chief Executive Officer. The President and Chief Executive Officer determined the compensation for all other executive officers.

Table of Contents**Item 12. Security Ownership of Certain Beneficial Owners and Management**

Beneficial ownership of equity securities as of August 31, 2003 is shown below:

Title of Class	Name of Beneficial Owner(1)	Amount and Nature of Beneficial Ownership	% of Class
8% Cumulative Redeemable Preferred Stock	Directors:		
	Michael Toelle	420 shares	*
	Bruce Anderson	40 shares	*
	Robert Bass	120 shares	*
	David Bielenberg	1,200 shares	*

Leon E. Westbrook	800 shares	*	
	Directors and executive officers as a group	16,680 shares	*

(1) Includes shares held by spouse and children.

* Less than 1%.

The Company has no compensation plans under which equity securities of the Company are authorized for issuance.

Item 13. Certain Relationships and Related Transactions

Because directors must be active patrons of the Company or an affiliated association, transactions between the Company and directors are customary and expected. Transactions with directors, which include the sale of commodities (primarily grain) to the Company and the purchase of products and services from the Company, are entered into on the same terms, as they are with other patrons of the Company. During the fiscal year ended August 31, 2003 the value of those transactions between each director (and members of such directors' immediate family, which includes such director's spouse, parents,

Table of Contents

children, siblings, mothers and fathers-in-law, sons and daughters-in-law, and brothers and sisters-in-law) and the Company in which the amount involved exceeded \$60,000 are shown below.

	Grain Sold to the Company	Purchases of Products and Services from the Company	Total Transactions
Bruce Anderson	\$ 65,846	\$ 6,044	\$ 71,890
Curt Eischens	188,879	63	188,942
Jerry Hasnedl	358,638	216,684	575,322
Leonard Larsen	251,616	18,104	269,720
Merlin Van Walleghen	148,492	1,284	149,776

PART IV.**Item 14. Principal Accountant Fees and Services**

The following table shows the aggregate fees billed to the Company by PricewaterhouseCoopers for services rendered during the fiscal years ended August 31, 2003 and 2002:

Description of Fees	2003	2002
Audit Fees(1)	\$ 905,461	\$ 656,798
Tax Fees(2)	138,109	168,671
Total	\$1,043,570	\$ 825,469

(1) Includes fees for audit of annual financial statements and reviews of the related quarterly financial statements, certain statutory audits, employee benefit plan audits, work related to S-2 filings and assistance with preparation and review of documents filed with the Securities and Exchange Commission.

(2) Includes fees related to tax compliance, tax advice and tax planning.

The Company adopted a policy that the Audit Committee must approve in advance all audit and non-audit services provided by PricewaterhouseCoopers. The Audit Committee approved all of the services.

(b) Reports on Form 8-K

On August 5, 2003 the Company filed a report on Form 8-K announcing the Company's name change from Cenex Harvest States Cooperatives to CHS Inc. This was the only report on Form 8-K filed during the fourth quarter.

(c) Exhibits

The exhibits shown in Item 15(a)(3) above are being filed herewith.

(d) Schedules

None.

Supplemental Information

As a cooperative, the Company does not utilize proxy statements.

CHS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies:

Organization:

Effective August 5, 2003, Cenex Harvest States Cooperatives changed its name to CHS Inc. (CHS or the Company). CHS is an agricultural cooperative organized for the mutual benefit of its members. Members of the cooperative are located throughout the United States. In addition to grain marketing, oilseed processing and refining, foods and wheat milling, the Company provides its patrons with energy and agronomy products as well as other farm supplies. Sales are both domestic and international.

Effective September 1, 2000, the Company's Board of Directors approved a resolution providing for the computation of patronage distributions based on earnings for financial statement purposes rather than federal income tax basis earnings. On December 1, 2000, this resolution was ratified by the Company's members, the by-laws were amended and beginning with fiscal year 2001 patronage distributions have been calculated based on financial statement earnings. The by-laws further provide that an amount of up to 10% of the distributable annual net savings from patronage sources be added to the unallocated capital reserve as determined by the Board of Directors.

Consolidation:

The consolidated financial statements include the accounts of CHS and all of its wholly-owned and majority-owned subsidiaries, including National Cooperative Refinery Association (NCRA). The effects of all significant intercompany transactions have been eliminated.

On September 1, 1999, NCRA and Farmland Industries, Inc. (Farmland) formed Cooperative Refining, LLC (CRLLC), which was established to operate and manage the refineries and related pipelines and terminals of NCRA and Farmland. On December 31, 2000, NCRA and Farmland signed an Agreement of Dissolution and dissolved CRLLC.

During 2000, the Company entered into a series of transactions, the result of which was the exchange of its agronomy operations, consisting primarily of its interests in and ownership of the Cenex/ Land O Lakes Agronomy Company and Agro Distribution, LLC and related entities for a 25% equity ownership interest in Agriliance, LLC (Agriliance). Agriliance is a distributor of crop nutrients, crop protection products and other agronomy inputs and services formerly owned by the Company, Land O Lakes, Inc. (Land O Lakes) and Farmland. The company accounts for the Agriliance investment under the equity method.

During 2003 and 2002, the Company had various other acquisitions, which have been accounted for using the purchase method of accounting. Operating results of the acquisitions are included in the consolidated financial statements since the respective acquisition dates. The respective purchase prices were allocated to the assets and liabilities acquired based upon the estimated fair values. The excess purchase price over the estimated fair values of the net assets acquired has been reported as identifiable intangible assets and goodwill.

Cash Equivalents:

Cash equivalents include short-term highly liquid investments with original maturities of three months or less at date of acquisition.

Inventories:

Grain, processed grain, oilseed and processed oilseed are stated at net realizable values which approximates market values. All other inventories are stated at the lower of cost or market. Costs for inventories produced or modified by the Company through a manufacturing process include fixed and

Table of Contents

CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

variable production costs and raw material costs, and in-bound freight costs for raw materials over the amount charged to cost of goods sold. Costs for inventories purchased for resale include the cost of products and any freight incurred to place the products at the Company's point of sales. The cost of certain energy inventories (wholesale refined products, crude oil and asphalt) is determined on the last-in, first-out (LIFO) method; all other inventories of non-grain products purchased for resale are valued on the first-in, first-out (FIFO) and average cost methods.

Derivative Financial Instruments:

The Company enters into exchange-traded commodity futures and options contracts to hedge its exposure to price fluctuations on energy, grain and oilseed transactions to the extent considered practicable for minimizing risk. Futures and options contracts used for hedging are purchased and sold through regulated commodity exchanges. Fluctuations in inventory valuations, however, may not be completely hedged, due in part to the absence of satisfactory hedging facilities for certain commodities and geographical areas and in part to the Company's assessment of its exposure from expected price fluctuations. The Company also manages its risks by entering into fixed price purchase contracts with pre-approved producers and establishing appropriate limits for individual suppliers. Fixed price sales contracts are entered into with customers of acceptable creditworthiness, as internally evaluated. The Company is exposed to loss in the event of nonperformance by the counterparties to the contracts; however, the Company does not anticipate nonperformance by counterparties.

Commodity trading in futures and options contracts is a natural extension of cash market trading. The commodity futures and options markets have underlying principles of increased liquidity and longer trading periods than the cash market, and hedging is one method of reducing exposure to price fluctuations. The Company's use of the derivative instruments described above reduces the effects of price volatility, thereby protecting against adverse short-term price movements while somewhat limiting the benefits of short-term price movements. Changes in market value of derivative instruments described above are recognized in the consolidated statements of operations in the period such changes occur. The fair value of futures and options contracts are determined primarily from quotes listed on regulated commodity exchanges. Fixed price purchase and sales contracts are with various counterparties, and the fair values of such contracts are determined from the market price of the underlying product. At August 31, 2003, the Company's derivative assets and liabilities were \$54.5 million and \$46.5 million, respectively. At August 31, 2002, the Company's derivative assets and liabilities were \$53.8 million and \$67.9 million, respectively.

Commodity Price Risk

The Company utilizes futures and options contracts offered through regulated commodity exchanges to reduce price risk. The Company is exposed to risk of loss in the market value of inventories and fixed or partially fixed purchase and sale contracts. In order to reduce that risk, the Company generally takes opposite and offsetting positions using futures contracts or options. Certain commodities cannot be hedged with futures or options contracts because such contracts are not offered for these commodities by regulated commodity exchanges. Inventories and purchase contracts for those commodities are hedged with forward sales contracts, to the extent practical, in order to arrive at a net commodity position within the formal position limits set by the Company and deemed prudent for each of those commodities. Commodities for which future contracts and options are available are also typically hedged with forward contracts, with futures and options used to hedge within position limits the remaining portion. These futures and options contracts and forward purchase and sales contracts used to hedge against commodity price changes are effective economic hedges of price risk, but they are not designated as, and accounted for as, hedging instruments for accounting purposes.

Unrealized gains and losses on futures contracts and options used as economic hedges of grain and oilseed inventories and fixed price contracts are recognized in cost of goods sold for financial reporting on a

Table of Contents

**CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

monthly basis using market based prices. Inventories and fixed price contracts are marked to fair value using market based prices so that gains or losses on the derivative contracts are offset by gains or losses on inventories and fixed price contracts during the same accounting period.

Unrealized gains and losses on futures contracts and options used as economic hedges of energy inventories and fixed price contracts are recognized in cost of goods sold for financial reporting on a monthly basis using market based prices. The inventories hedged with these derivatives are valued at the lower of cost or market, and fixed price contracts are marked to fair value using market based prices. Certain fixed price contracts related to propane in the Energy segment meet the normal purchase and sales exemption, and thus are not required to be marked to fair value.

Interest Rate Risk

The Company manages interest expense using fixed and floating rate debt. These debt instruments are carried at amounts approximating estimated fair value. Short-term debt used to finance inventories and receivables is represented by notes payable within thirty days or less so that the blended interest rate to the Company for all such notes approximates current market rates. Long-term debt used to finance non-current assets has various fixed interest rates and is payable at various dates as to minimize the effect of market interest rate changes. The effective interest rate to the Company on fixed rate debt outstanding on August 31, 2003, was approximately 6.5%.

In August 2002, the Company entered into interest rate treasury lock instruments to secure the interest rate related to a portion of its private placement debt issued on October 18, 2002. These instruments were designated and are effective as cash flow hedges for accounting purposes, and accordingly, the loss on settlement was recorded as a component of other comprehensive income. Interest expense for the year ended August 31, 2003, includes \$0.7 million related to the interest rate derivatives. The additional interest expense is an offset to the lower actual interest paid on the outstanding debt instruments.

Foreign Currency Risk

The Company conducts essentially all of its business in U.S. dollars except for grain marketing operations in Brazil, and had minimal risk regarding foreign currency fluctuations during 2003. Foreign currency fluctuations do, however, impact the ability of foreign buyers to purchase U.S. agricultural products and the competitiveness of U.S. agricultural products compared to the same products offered by alternative sources of world supply.

Investments:

Investments in other cooperatives are stated at cost, plus patronage dividends received in the form of capital stock and other equities. Patronage dividends are recorded at the time qualified written notices of allocation are received. Joint ventures and other investments, in which the Company has significant ownership and influence, but not control, are accounted for in the consolidated financial statements under the equity method of accounting. Investments in other debt and equity securities are considered available for sale financial instruments and are stated at market value, with unrealized amounts included as a component of accumulated other comprehensive income (loss).

Property, Plant and Equipment:

Property, plant and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are provided on the straight-line method by charges to operations at rates based upon the expected useful lives of individual or groups of assets (primarily 15 to 40 years for land improvements and buildings and 3 to 20 years for machinery, equipment, office and other). The cost and

Table of Contents

**CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

related accumulated depreciation and amortization of assets sold or otherwise disposed of are removed from the related accounts and resulting gains or losses are reflected in operations. Expenditures for maintenance and repairs and minor renewals are expensed, while costs of major renewals and betterments are capitalized.

The Company periodically reviews property, plant and equipment and other long-lived assets in order to assess recoverability based on projected income and related cash flows on an undiscounted basis. Should the sum of the expected future net cash flows be less than the carrying value, an impairment loss would be recognized. An impairment loss would be measured by the amount by which the carrying value of the asset exceeds the fair value of the asset.

Goodwill and Other Intangible Assets:

Effective September 1, 2001, the Company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets. This statement discontinued the amortization of goodwill and indefinite-lived intangible assets, subject to periodic impairment testing. At August 31, 2001, goodwill (net of accumulated amortization) prior to the adoption of SFAS No. 142, was \$29.2 million and was included as a component of other assets. The effect of adopting the new standard will reduce goodwill amortization expense by approximately \$2.0 million annually. No changes to the carrying value of goodwill and other intangible assets were required as a result of the adoption of SFAS No. 142. Subsequent impairment testing is performed annually as well as when a triggering event indicating impairment may have occurred. During 2003, as a result of the impairment testing, the Company believes that no impairments are required.

In 2001, the Company recorded goodwill amortization expense of \$2.6 million. Had SFAS No. 142 been in effect during the year ended August 31, 2001, net income would have been \$181.1 million.

Revenue Recognition:

The Company provides a wide variety of products and services, from agricultural inputs such as fuels, farm supplies and crop nutrients, to agricultural outputs that include grain and oilseed, processed grains and oilseeds and food products. Grain and oilseed sales are recorded after the commodity has been delivered to its destination and final weights, grades and settlement price have been agreed upon. All other sales are recognized upon transfer of title, which could occur upon either shipment or receipt by the customer, depending upon the contract. Amounts billed to a customer as part of a sales transaction related to shipping and handling are included in net sales. Service revenues are recorded only after such services have been rendered, and are included in other revenues.

Environmental Expenditures:

Liabilities related to remediation of contaminated properties are recognized when the related costs are considered probable and can be reasonably estimated. Estimates of environmental costs are based on current available facts, existing technology, undiscounted site-specific costs and currently enacted laws and regulations. Recoveries, if any, are recorded in the period in which recovery is considered probable. Liabilities are monitored and adjusted as new facts or changes in law or technology occur. Environmental expenditures are capitalized when such costs provide future economic benefits. The Company accrues legal costs expected to be incurred in connection with loss contingencies when those legal costs are probably and can be reasonably estimated.

Income Taxes:

The Company is a nonexempt agricultural cooperative and files a consolidated federal income tax return with its 80% or more owned subsidiaries. The Company is subject to tax on income from

Table of Contents

**CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

nonpatronage sources and undistributed patronage-sourced income. Deferred income taxes reflect the impact of temporary differences between the amounts of assets and liabilities recognized for financial reporting purposes and such amounts recognized for federal and state income tax purposes, at each year end, based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

Comprehensive Income:

Comprehensive income (defined as the change in equity of a business enterprise during a period from sources other than those resulting from investments by owners and distribution to owners), primarily includes net income and the effects of minimum pension liability adjustments. Total comprehensive income is reflected in the consolidated statements of equities and comprehensive income.

Use of Estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recent Accounting Pronouncements:

During 2003, the Company adopted SFAS No. 143, Accounting for Asset Retirement Obligations, which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. SFAS No. 143 is effective for financial statements issued for fiscal years beginning after June 15, 2002. The Company's Energy segment operates oil refineries and related pipelines for which the Company would be subject to Asset Retirement Obligations (ARO) if such assets were to be dismantled. The Company, however, expects to operate its refineries and related pipelines indefinitely. Since the time period to dismantle these assets is indeterminate, a corresponding ARO is not estimable and therefore has not been recorded.

In January 2003, the FASB issued FASB Interpretation No. 46, Consolidation of Variable Interest Entities. The interpretation addresses consolidation of certain entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. It also requires consolidation by primary beneficiary. The interpretation applies immediately to variable interest entities created after January 31, 2003, and to variable interest entities in which an enterprise obtains an interest after that date. It applies in the first fiscal year or interim period beginning after December 15, 2003, to variable interest entities in which an enterprise holds a variable interest that it acquired before February 1, 2003. The Company believes that the effects of adopting this standard will not have a material effect on the Company.

On April 30, 2003, the FASB issued SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities. SFAS No. 149 amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. The new guidance amends SFAS No. 133 for decisions made as part of the Derivatives Implementation Group process that effectively required amendments to SFAS No. 133, and decisions made in connection with other FASB projects dealing with financial instruments and in connection with implementation issues raised in relation to the application of the definition of a derivative and characteristics of a derivative that contains financing components. In addition, it clarifies when a

Table of Contents

CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

derivative contains a financing component that warrants special reporting in the statements of cash flows. SFAS No. 149 is effective for contracts entered into or modified and for hedging relationships designated after June 30, 2003. The Company believes that the effects of adopting this standard do not have a material effect on the Company.

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity, which establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in certain circumstances). Many of those instruments were previously classified as equity. SFAS No. 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003, except for mandatorily redeemable financial instruments of nonpublic entities which are subject to the provisions for the first fiscal period beginning after December 15, 2003. The Statement is to be implemented by reporting the cumulative effect of a change in an accounting principle for financial instruments created before the issuance date of the Statement and still existing at the beginning of the interim period of adoption. The Company believes that the effects of adopting this standard will not have a material effect on the Company.

Reclassifications:

Certain reclassifications have been made to prior year's amounts to conform to current year classifications. In addition, the Company has made changes to net sales and cost of goods sold for years ended August 31, 2002 and 2001, to eliminate certain intercompany sales identified subsequent to the issuance of the 2002 Annual Report. These reclassifications and changes had no effect on previously reported net income, equities and comprehensive income, or cash flows.

2. Receivables:

Receivables as of August 31, 2003 and 2002 are as follows:

	2003	2002
	_____	_____
	(dollars in thousands)	
Trade	\$ 748,398	\$ 717,888
Other	47,000	49,846
	_____	_____
	795,398	767,734
Less allowances for doubtful accounts	31,618	26,156
	_____	_____
	\$ 763,780	\$ 741,578
	_____	_____

All international sales are denominated in U.S. dollars. International sales for the years ended August 31, 2003, 2002 and 2001 are as follows:

	2003	2002	2001
	_____	_____	_____
	(dollars in millions)		
Africa	\$ 99	\$ 135	\$ 138
Asia	815	407	403

CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. Inventories:

Inventories as of August 31, 2003 and 2002 are as follows:

	2003	2002
	(dollars in thousands)	
Grain and oilseed	\$ 370,381	\$ 393,095
Energy	292,095	229,981
Feed and farm supplies	95,589	91,138
Processed grain and oilseed	42,688	36,264
Other	1,130	9,185
	\$ 801,883	\$ 759,663

As of August 31, 2003, the Company valued approximately 24% of inventories, primarily related to energy, using the lower of cost, determined on the LIFO method, or market (26% as of August 31, 2002). If the FIFO method of accounting for these inventories had been used, inventories would have been higher than the reported amount by \$86.3 million and \$40.5 million at August 31, 2003 and 2002, respectively.

4. Investments:

Investments as of August 31, 2003 and 2002 are as follows:

	2003	2002
	(dollars in thousands)	
Cooperatives:		
CF Industries, Inc.	\$ 152,996	\$ 152,996
CoBank ACB (CoBank)	22,505	30,069
Ag Processing, Inc.	24,481	25,797
Land O' Lakes, Inc.	27,105	26,232
Joint ventures:		
Ventura Foods, LLC	107,464	108,981
United Country Brands, LLC	129,286	86,175
TEMCO, LLC	9,087	8,414
Other	59,969	57,943
	\$ 532,893	\$ 496,607

CHS's investment in CF Industries, Inc. (CF) is carried at cost, including allocated patronage refunds. Since CF is a cooperative, CHS recognizes income from this investment only when patronage refunds are received. Over the past five years CF has generated operating losses, none of which were allocated to its owners. CHS management has performed the appropriate impairment tests of this investment, and based upon those tests, believes that fair market value exceeds its carrying value. CHS will continue to perform impairment tests annually, including reviewing operating results, or as circumstances dictate, which could result in an impairment to its CF investment.

CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In March 2000, the Company purchased an additional 10% interest in Ventura Foods, LLC, its consumer products and packaging joint venture, for \$25.6 million, of which \$13.8 million was goodwill. The Company has a 50% interest in this joint venture. The following provides summarized unaudited financial information for Ventura Foods, LLC balance sheets as of August 31, 2003 and 2002, and statements of operations for the twelve months ended August 31, 2003, 2002 and 2001:

	2003	2002
(dollars in thousands)		
Current assets	\$ 193,632	\$ 171,084
Non-current assets	231,649	231,045
Current liabilities	227,400	133,230
Non-current liabilities	21,738	90,819

	2003	2002	2001
(dollars in thousands)			
Net sales	\$ 1,165,823	\$ 1,013,475	\$ 925,962
Gross profit	155,274	181,217	161,405
Net income	42,837	75,368	71,148

Effective January 1, 2000, CHS, Farmland and Land O Lakes created Agrilience, a distributor of crop nutrients, crop protection products and other agronomy inputs and services. At formation, Agrilience managed the agronomy marketing and distribution operations of CHS (which included principally its wholesale agronomy, Cenex/Land O Lakes Agronomy Company and Agro Distribution, LLC business operations), Farmland and Land O Lakes, with the Company exchanging the right to use its agronomy operations for 26.455% of the results of the jointly managed operations.

In March 2000, the Company sold 1.455% of its economic interest in the operations collectively managed by Agrilience to Land O Lakes, resulting in a gain of \$7.4 million. This left the Company with a 25% economic interest in such operations. In July 2000, Agrilience secured its own financing, which is without recourse to the Company. Agrilience also purchased the net working capital related to agronomy operations from each of its member owners, consisting primarily of trade accounts receivable and inventories, net of accounts payable. On July 31, 2000, the Company contributed outright its ownership interest in the Cenex/ Land O Lakes Agronomy Company and in Agro Distribution, LLC, with a total investment of \$64.7 million, along with the rest of its wholesale agronomy business, to Agrilience. The Company retained a 25% interest in Agrilience after the outright contribution of its ownership interests in those two ventures and its wholesale agronomy business. Agrilience ownership also includes Farmland (25%) and Land O Lakes (50%). The interests of the Company and Farmland are held through equal ownership in United Country Brands, LLC, a joint venture holding company whose sole operations consist of the ownership of a 50% interest in Agrilience. The Company's equity in the joint venture was recorded at the historical carrying value of its ownership in Cenex/ Land O Lakes Agronomy Company and Agro Distribution, LLC and no gain or loss was recorded on the exchange.

In April 2003, the Company acquired an additional economic interest in the Agrilience wholesale crop protection business (the CPP Business), which constitutes only a part of the Agrilience business operations. The Company acquired 13.1% of the CPP Business for a cash payment of \$34.3 million. The economic interests in Agrilience are owned 50% by Land O Lakes, 25% plus an additional 13.1% of the CPP Business by the Company and 25% less 13.1% of the CPP Business by Farmland. The ownership or governance interests in Agrilience did not change. Agrilience's earnings or losses are split among the members based upon the respective economic interest of each member.

Table of Contents

CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following provides summarized financial information for Agrilience balance sheets as of August 31, 2003 and 2002, and statements of operations for the years ended August 31, 2003, 2002 and 2001:

	2003	2002
	(dollars in thousands)	
Current assets	\$ 1,249,941	\$ 922,958
Non-current assets	119,615	134,247
Current liabilities	1,083,743	700,903
Non-current liabilities	27,061	107,960

	2003	2002	2001
	(dollars in thousands)		
Net sales	\$ 3,485,623	\$ 3,625,849	\$ 4,072,248
Earnings from operations	67,239	57,604	50,423
Net income	60,741	47,044	25,053

Disclosure of the fair value of financial instruments to which the Company is a party includes estimates and assumptions which may be subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Financial instruments are carried at amounts that approximate estimated fair values. Investments in cooperatives and joint ventures have no quoted market prices.

Various agreements with other owners of investee companies and a majority-owned subsidiary set out parameters whereby CHS may buy and sell additional interests in those companies, upon the occurrence of certain events, at fair values determinable as set forth in the specific agreements.

5. Property, Plant and Equipment:

A summary of property, plant and equipment as of August 31, 2003 and 2002 is as follows:

	2003	2002
	(dollars in thousands)	
Land and land improvements	\$ 60,453	\$ 63,045
Buildings	380,940	371,107
Machinery and equipment	1,508,963	1,470,475
Office and other	68,369	62,144
Construction in progress	159,555	71,540
	2,178,280	2,038,311
Less accumulated depreciation and amortization	1,055,298	980,890
	\$ 1,122,982	\$ 1,057,421

In January 2002, the Company formed a limited liability company with Cargill, Incorporated to engage in wheat flour milling and processing. The Company holds a 24% interest in the entity, which is known as Horizon Milling, LLC. The Company is leasing certain of its wheat milling facilities and related equipment to Horizon Milling under an operating lease agreement. The book value of the leased milling

Edgar Filing: CHS INC - Form 10-K/A

assets at August 31, 2003, was \$99.4 million, net of accumulated depreciation of \$31.3 million.

For the years ended August 31, 2003, 2002 and 2001, the Company capitalized interest of \$3.9 million, \$2.1 million and \$1.2 million, respectively, related to capitalized construction projects.

F-13

Table of Contents

CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

6. Other Assets:

Other assets as of August 31, 2003 and 2002 are as follows:

	2003	2002
(dollars in thousands)		
Goodwill	\$ 27,052	\$ 27,926
Customer lists, less accumulated amortization of \$5,112 and \$3,511, respectively	9,414	8,447
Non-compete covenants, less accumulated amortization of \$11,774 and \$2,896, respectively	1,766	11,204
Other intangible assets, less accumulated amortization of \$1,986 and \$2,462, respectively	14,607	15,795
Prepaid pension and other benefit assets	151,389	54,230
Deferred tax asset	28,689	50,544
Notes receivable	1,991	4,822
Other	4,612	4,354
	\$239,520	\$177,322

Intangible assets subject to amortization are provided on a straight-line basis over the number of years that approximate their respective useful lives (ranging from 2 to 15 years). The straight-line method of amortization reflects an appropriate allocation of the cost of intangible assets to earnings in proportion to the amount of economic benefit obtained by the Company in each reporting period. Amortization expenses for the years ended August 31, 2003 and 2002, were \$12.2 million and \$4.2 million, respectively. The estimated amortization expense related to intangible assets subject to amortization for the next five years will approximate \$2.7 million annually.

Through Country Energy, LLC, formerly a joint venture with Farmland, the Company marketed refined petroleum products including gasoline, diesel fuel, propane and lubricants under the Cenex brand. On November 30, 2001, the Company purchased the wholesale energy business of Farmland, as well as all interest in Country Energy, LLC. Based on estimated fair values, \$26.4 million of the purchase price was allocated to intangible assets, primarily trademarks, tradenames and non-compete agreements. The intangible assets had a weighted-average life of approximately 12 years. During the year ended August 31, 2003, the Company accelerated the amortization of the non-compete agreement due to Farmland's July 31, 2003 notification that it intends to liquidate its assets in bankruptcy. The Company had additional amortization expense of \$7.5 million during 2003 related to the acceleration, and the asset has a zero book value as of August 31, 2003. The Company also entered into an exclusive two-year supply agreement to purchase, at prevailing market prices, all of the refined fuels production from Farmland's Coffeyville, Kansas facility. On May 22, 2003, the Company gave notice to Farmland that it will not renew the supply agreement, and the non-renewal is effective November 30, 2003. The Company's management is confident that alternative sources of supply will be available and that the non-renewal will not have a material affect on the Company.

7. Notes Payable and Long-Term Debt:

Notes payable and long-term debt as of August 31, 2003 and 2002 consisted of the following:

	Interest rates at August 31,		
	2003	2003	2002
	(dollars in thousands)		
Notes payable (a)(i)	1.63% to 1.96%	\$ 251,131	\$ 332,514
Long-term debt:			
Revolving term loans from cooperative and other banks, payable in installments through 2009, when the balance is due (b)(c)(i)	2.14% to 13.00%	\$ 168,032	\$ 254,962
Private placement, payable in equal installments beginning in 2008 through 2013 (d)(i)	6.81%	225,000	225,000
Private placement, payable in installments beginning in 2007 through 2018 (e)(i)	4.96% to 5.60%	175,000	
Private placement, payable in equal installments beginning in 2005 through 2011 (f)(i)	7.43% to 7.90%	80,000	80,000
Industrial Revenue Bonds, payable in installments through 2011 (g)	5.23% to 12.97%	5,831	7,444
Other notes and contracts (h)	5.70% to 12.17%	9,310	4,718
Total long-term debt		663,173	572,124
Less current portion		14,951	89,032
Long-term portion		\$ 648,222	\$ 483,092

	2003	2002
Weighted average interest rates at August 31:		
Short-term debt	1.83%	2.58%
Long-term debt	6.52%	6.38%

- (a) The Company finances its working capital needs through short-term lines of credit with a syndication of banks. The Company has a 364-day credit facility of \$600.0 million, all of which is committed, and of which \$250.0 million was outstanding on August 31, 2003. In addition to this short-term line of credit, the Company has a 364-day credit facility dedicated to NCRA with a syndication of banks in the amount of \$30.0 million, all of which is committed, with no amounts outstanding on August 31, 2003. Other miscellaneous notes payable totaled \$1.1 million at August 31, 2003.
- (b) The Company established a \$100.0 million three-year revolving credit facility with a syndication of banks. On August 31, 2003, the Company had no outstanding balance on this facility.
- (c) The Company established a long-term credit agreement which committed \$200.0 million of long-term borrowing capacity to the Company through May 31, 1999, of which \$164.0 million was drawn before the expiration date of that commitment. On August 31, 2003,

Edgar Filing: CHS INC - Form 10-K/A

\$137.8 million was outstanding. NCRA term loans of \$15.0 million are collateralized by NCRA's investment in CoBank.

- (d) The Company entered into a private placement with several insurance companies for long-term debt in the amount of \$225.0 million.
- (e) In October 2002, the Company entered into a private placement with several insurance companies for long-term debt in the amount of \$175.0 million.

F-15

Table of Contents

CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

- (f) In January 2001, the Company entered into a note purchase and private shelf agreement with Prudential Insurance Company. A long-term note was issued for \$25.0 million and a subsequent note for \$55.0 million was issued in March 2001.
- (g) Industrial Revenue Bonds in the amount of \$1.6 million are collateralized by property, plant and equipment, primarily energy refinery equipment, with a cost of approximately \$152.0 million, less accumulated depreciation of approximately \$120.4 million as of August 31, 2003.
- (h) Grain Suppliers, LLC, a wholly-owned subsidiary of the Company, has other notes payable of \$5.4 million collateralized by property, plant and equipment, with a cost of approximately \$8.3 million, less accumulated depreciation of approximately \$0.2 million on August 31, 2003.
- (i) The debt is unsecured, however restrictive covenants under various agreements have requirements for maintenance of minimum working capital levels and other financial ratios.
The fair value of long-term debt approximates book value as of August 31, 2003 and 2002.

The aggregate amount of long-term debt payable as of August 31, 2003 is as follows:

	(dollars in thousands)
2004	\$ 14,951
2005	34,716
2006	35,176
2007	59,671
2008	98,190
Thereafter	420,469
	<u>663,173</u>

The Company is in compliance with all debt covenants and restrictions as of August 31, 2003.

8. Income Taxes:

As a result of the Company's by-law changes during 2001, and the by-law changes of its majority-owned subsidiary (NCRA) in 2002, to distribute patronage based on financial statement earnings, the statutory rate applied to the cumulative differences between financial statement earnings and tax basis earnings, has been changed. In connection with this change the Company recorded a deferred tax benefit of \$10.9 million as of August 31, 2002, and \$34.2 million as of August 31, 2001. The \$10.9 million deferred tax benefit recorded as a result of the change in patronage distribution by NCRA as of August 31, 2002, has been offset by a \$10.9 million NCRA valuation allowance. Additional valuation allowances of \$1.7 million, \$6.2 million and \$2.4 million were provided to offset deferred tax benefits generated by NCRA as of August 31, 2003, 2002 and 2001, respectively.

The provision for income taxes for the years ended August 31, 2003, 2002 and 2001 is as follows:

	2003	2002	2001
	(dollars in thousands)		
Current	\$ 3,700	\$ 14,300	\$ 21,025
Deferred	7,300	(12,700)	(49,025)
Valuation allowance	1,700	17,100	2,400
	<u>12,700</u>	<u>18,700</u>	<u>(25,600)</u>
Income taxes	\$ 12,700	\$ 18,700	\$ (25,600)

Table of Contents

CHS INC.

The tax effect of temporary differences of deferred tax assets and liabilities as of August 31, 2003 and 2002 is as follows:

	2003	2002
(dollars in thousands)		
Deferred tax assets:		
Accrued expenses and valuation reserves	\$ 53,521	\$ 49,236
Postretirement health care and deferred compensation	29,153	32,671
Property, plant and equipment	9,369	11,532
Alternative minimum tax credit and patronage loss carryforward	8,948	6,993
Other	19,316	12,439
	120,307	112,871
Deferred tax liabilities:		
Pension, including minimum liability	34,531	2,635
Equity method investments	23,310	20,482
Other		730
	57,841	23,847
Deferred tax assets valuation reserve	(11,765)	(19,466)
Net deferred tax assets	\$ 50,701	\$ 69,558

As of August 31, 2003, net deferred tax assets of \$22.0 million and \$28.7 million are included in current assets and other assets, respectively (\$19.0 million and \$50.6 million, respectively, as of August 31, 2002). At August 31, 2003, NCRA recognized a valuation allowance for the entire tax benefit associated with its net deferred tax asset, as it is considered more likely than not, based on the weight of available information, that the future tax benefits related to these items will not be realized. At August 31, 2003, NCRA's net deferred tax assets of \$11.8 million were comprised of deferred tax assets of \$21.4 million and deferred tax liabilities of \$9.6 million. Deferred tax assets are comprised of basis differences related to inventories, investments, lease obligations, accrued liabilities and certain federal and state tax credits. NCRA files a separate tax return and, as such, these items must be assessed independently of the Company's deferred tax assets when determining recoverability.

The reconciliation of the statutory federal income tax rates to the effective tax rates for the years ended August 31, 2003, 2002 and 2001 is as follows:

	2003	2002	2001
Statutory federal income tax rate	35.0%	35.0%	35.0%
State and local income taxes, net of federal income tax benefit	3.9	3.9	3.9
Patronage earnings	(25.7)	(25.0)	(32.8)
Change in patronage determination		(7.5)	(22.4)
Export activities at rates other than the U.S. statutory rate	(3.2)	(1.9)	
Deferred tax asset valuation allowance	1.3	11.8	1.6
Other	(2.0)	(3.4)	(2.0)
	9.3%	12.9%	(16.7)%
Effective tax rate	9.3%	12.9%	(16.7)%

Taxable (loss) income	<u>\$ (3,416)</u>	<u>\$ 25,459</u>	<u>\$ 49,350</u>

No tax benefit has been recognized for NCRA's \$13.1 million operating loss that was included in the Company's August 31, 2003 taxable loss as shown above.

9. Equities:

In accordance with the by-laws and by action of the Board of Directors, annual net savings from patronage sources are distributed to consenting patrons following the close of each year, and are based on amounts using financial statement earnings. The cash portion of the patronage distribution is determined annually by the Board of Directors, with the balance issued in the form of capital equity certificates.

Annual net savings from sources other than patronage may be added to the unallocated capital reserve or, upon action by the Board of Directors, allocated to members in the form of nonpatronage equity certificates. Redemptions are at the discretion of the Board of Directors.

Inactive direct members and patrons and active direct members and patrons age 61 and older on June 1, 1998, are eligible for redemption of their capital equity certificates at age 72 or death. For other active direct members and patrons and member cooperatives, equities will be redeemed annually as determined by the Board of Directors.

On May 31, 1997, the Company completed an offering for the sale of Equity Participation Units (EPU) in its Wheat Milling Defined Business Unit and its Oilseed Processing and Refining Defined Business Unit to qualified subscribers. Qualified subscribers were identified as Defined Members or representatives of Defined Members who were persons or associations of producers actually engaged in the production of agricultural products. Subscribers were allowed to purchase a portion of their EPU by exchanging existing patronage certificates. The purchasers of EPU had the right and obligation to deliver annually the number of bushels of wheat or soybeans equal to the number of units held. Unit holders participated in the net patronage-sourced income from operations of the applicable Defined Business Unit as patronage refunds. Retirements of patrons' equities attributable to EPU, were at the discretion of the Board of Directors, and it was the Board's goal to retire such equity on a revolving basis seven years after declaration.

Table of Contents

**CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

During 2001, the Company's Board of Directors adopted a resolution to issue, at no charge, to each Defined Member of the Oilseed Processing and Refining Defined Business Unit an additional 1/4 EPU, for each EPU held, due to increased crush volume.

In August 2001, the CHS Board of Directors approved and consummated a plan to end the Defined Investment Program. The Company redeemed all of the EPUs and allocated the assets of the Oilseed Processing and Refining and Wheat Milling Defined Business Units to the Company as provided in the plan. The amounts redeemed to the Oilseed Processing and Refining and Wheat Milling Defined Member EPU holders were \$5.2 million and \$9.1 million, respectively. Due to loss carry-forwards incurred by the Wheat Milling Defined Business Unit, the plan also provided for the cancellation of all outstanding Preferred Capital Certificates issued to the Wheat Milling EPU holders, totaling \$0.2 million. The plan further provided to the Oilseed Processing and Refining Defined Member EPU holders for the redemption of all outstanding Preferred Capital Certificates issued of \$0.2 million and a 100% cash distribution during 2002 for the patronage refunds earned for the fiscal year ended August 31, 2001.

In January 2003, the Board of Directors authorized the sale and issuance of up to 3,500,000 shares of 8% Cumulative Redeemable Preferred Stock (New Preferred) at a price of \$25.00 per share. The Company filed a registration statement on Form S-2 with the Securities and Exchange Commission registering 3,000,000 shares of the New Preferred (with an additional over-allotment option of 450,000 shares granted to the underwriters), which was declared effective on January 27, 2003. The shares were subsequently sold for proceeds of \$86.3 million (3,450,000 shares), and are listed on the NASDAQ National Market. Expenses related to the issuance of the New Preferred were \$3.8 million.

The Company had previously suspended sales of its 8% Preferred Stock (Old Preferred) after raising \$9.5 million (9,454,874 shares), and on February 25, 2003, the Company filed a post-effective amendment to terminate the offering of the Old Preferred shares. On March 5, 2003, the Company's Board of Directors authorized the redemption and conversion of the Old Preferred shares. A redemption notification and a conversion election form were sent to holders of the Old Preferred shares on March 21, 2003 explaining that on April 25, 2003 all shares of the Old Preferred would be redeemed by the Company for \$1.00 per share unless they were converted into shares of the Company's New Preferred. The conversion did not change the base liquidation amount or dividend amount of the Old Preferred, since 25 shares of the Old Preferred converted to 1 share of the New Preferred. The total Old Preferred converted to the New Preferred was \$7.5 million (7,452,439 shares) and the balance of the Old Preferred (2,002,435 shares) was redeemed in cash at \$1.00 per share. As of August 31, 2003, the Company had \$93.7 million (3,748,099 shares) of the New Preferred outstanding.

Table of Contents

CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The aggregate projected benefit obligation, accumulated benefit obligation and fair value of plan assets for pension plans with accumulated benefit obligations in excess of plan assets were as follows as of August 31, 2003 and 2002:

	Qualified Pension Benefits		Non-Qualified Pension Benefits	
	2003	2002	2003	2002
	(dollars in thousands)			
Projected benefit obligation	\$ 120,068	\$ 253,868	\$ 13,834	\$ 14,543
Accumulated benefit obligation	107,760	243,953	12,209	12,842
Fair value of plan assets	104,560	201,563		

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage point change in the assumed health care cost trend rates would have the following effects:

	1% Increase	1% Decrease
		(dollars in thousands)
Effect on total of service and interest cost components	\$ 275	\$ (250)
Effect on postretirement benefit obligation	2,618	(2,399)

The Company provides defined life insurance and health care benefits for certain retired employees. The plan is contributory based on years of service and family status, with retiree contributions adjusted annually.

The Company has other contributory defined contribution plans covering substantially all employees. Total contributions by the Company to these plans were \$8.5 million, \$11.0 million and \$6.1 million, for the years ended August 31, 2003, 2002 and 2001, respectively.

11. Segment Reporting:

The Company manages five business segments, which are based on products and services, and are Agronomy, Energy, Country Operations and Services, Grain Marketing, and Processed Grains and Foods. The Agronomy segment consists of joint ventures and other investments, from which the Company derives investment income based upon the profitability of these investments. The Energy segment derives its revenues through refining, wholesaling and retailing of petroleum products. The Country Operations and Services segment derives its revenues through the origination and marketing of grain, through the retail sales of petroleum and agronomy products, and processed sunflowers, feed and farm supplies. The Country Operations segment also derives revenues from service activities related to crop production. The Grain Marketing segment derives its revenues from the sale of grains and oilseeds and from service activities conducted at its export terminals. Processed Grains and Foods segment derives its revenues from the sales of soybean meal and soybean refined oil, from equity income in two wheat milling joint ventures, from equity income in an oilseed food manufacturing joint venture, and from the sale of Mexican food products.

Reconciling Amounts represent the elimination of sales between segments. Such transactions are conducted at market prices to more accurately evaluate the profitability of the individual business segments.

The Company assigns certain corporate general and administrative expenses to its business segments based on use of such services and allocates other services based on factors or considerations relevant to the costs incurred.

Expenses that are incurred at the corporate level for the purpose of the general operation of the Company are allocated to the segments based upon factors which management considers to be non-

12. Commitments and Contingencies:

Environmental:

The Company is required to comply with various environmental laws and regulations incidental to its normal business operations. In order to meet its compliance requirements, the Company establishes reserves for the probable future costs of remediation of identified issues, which are included in cost of goods sold or in marketing, general and administrative expenses in the consolidated statements of operations. Remediation costs with respect to an asset are reported in costs of goods sold if the asset is owned and operated by the Company and the Company reports sales related to it. Remediation costs are reported in marketing, general and administrative expenses if the Company does not own or operate the asset and the Company does not report sales related to it. Management does not believe that the resolution of any such matters, individually or in the aggregate, are reasonably likely to have a material effect on the consolidated financial position of the Company or the results of operations or cash flows during any reporting period.

In connection with certain refinery upgrades and enhancements that are necessary in order to comply with existing environmental regulations, the Company expects to incur additional capital expenditures of approximately \$87.0 million for the Company's Laurel, Montana refinery and \$324.0 million for NCRA's McPherson, Kansas refinery, of which \$8.7 million has been spent at the Laurel refinery and \$36.5 million has been spent by NCRA at the McPherson refinery as of August 31, 2003. The Company expects all of these compliance capital expenditures at the refineries to be complete by December 31, 2005, and anticipates funding these projects with a combination of cash flows from operations and debt proceeds.

Other Litigation and Claims:

The Company is involved as a defendant in various lawsuits, claims and disputes which are in the normal course of the Company's business. Management does not believe that the resolution of any such matters, individually or in the aggregate, are reasonably likely to have a material effect on the consolidated financial position of the Company or the results of operations or cash flows during any reporting period.

Grain Storage:

As of August 31, 2003 and 2002, the Company stored grain and processed grain products for third parties totaling \$155.2 million and \$148.0 million, respectively. Such stored commodities and products are not the property of the Company and therefore are not included in the Company's inventories.

Guarantees:

The Company is a guarantor for lines of credit for related companies of which \$52.3 million was outstanding as of August 31, 2003. The Company's bank covenants allow maximum guarantees of \$150.0 million. In addition, the Company's bank covenants allow for guarantees dedicated solely for NCRA in the amount of \$125.0 million. All outstanding loans with respective creditors are current as of August 31, 2003.

In November 2002, the FASB issued FASB Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The initial recognition and measurement provisions of this interpretation are applicable on a prospective basis to guarantees issued or modified after December 31, 2002, irrespective of the guarantor's fiscal year-end. The disclosure requirements are effective for financial statements of interim or annual periods ending after December 15, 2002. The interpretation addresses the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under guarantees. The interpretation also clarifies the

Table of Contents

**CHS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

requirements related to the recognition of a liability by a guarantor at the inception of the guarantee for obligations the guarantor has undertaken in issuing the guarantee.

The Company makes seasonal and term loans to member cooperatives, and its wholly-owned subsidiary, Fin-Ag, Inc., makes loans for agricultural purposes to individual producers. Some of these loans are sold to CoBank, and the Company guarantees a portion of the loans sold. In addition, the Company also guarantees certain debt and obligations under contracts for its subsidiaries and members.

The Company's obligations pursuant to its guarantees as of August 31, 2003 are as follows:

Entities	Guarantee/ Maximum Exposure	Exposure on August 31, 2003	Nature of Guarantee	Expiration Date	Triggering Event	Recourse Provisions	Assets Held as Collateral
(dollars in thousands)							
The Company's Financial Services cooperative loans sold to CoBank	*	\$ 6,667	10% of the obligations of borrowers (agricultural cooperatives) under credit agreements for loans sold	None stated, but may be terminated by either party upon 60 days prior notice in regard to future obligations	Credit agreement default	Subrogation against borrower	Some or all assets of borrower are held as collateral and should be sufficient to cover guarantee exposure
Fin-Ag, Inc. agricultural loans sold to CoBank	*	43,016	15% of the obligations of borrowers under credit agreements for some of the loans sold, and 100% of the obligations of borrowers for the remaining loans sold	None stated, but may be terminated by either party upon 90 days prior notice in regard to future obligations	Credit agreement default	Subrogation against borrower	Some or all assets of borrower are held as collateral and should be sufficient to cover guarantee exposure
TEMCO, LLC	\$7,500		Obligations by TEMCO, LLC under credit agreement	None stated	Credit agreement default	Subrogation against TEMCO, LLC	None
North Valley Petroleum, LLC	\$ 194	179	Obligations by North Valley Petroleum, LLC under credit agreement	None stated	Credit agreement default	Subrogation against North Valley Petroleum, LLC	None
Third parties	*	2,413	Surety for, or indemnification of surety for sales contracts between affiliates and sellers of grain under deferred payment contracts	Annual renewal on December 1st in regard to surety for one third party, otherwise none stated and may be terminated by the Company at any time in regard to future obligations	Nonpayment	Subrogation against affiliates	Some or all assets of borrower are held as collateral but might not be sufficient to cover guarantee exposure
		<u>\$52,275</u>					

* The Company's bank covenants allow for guarantees of up to \$150.0 million, but the Company is under no obligation to extend these guarantees. The maximum exposure on any given date is equal to the actual guarantees extended as of that date.

Lease Commitments:

The Company leases approximately 1,900 rail cars with remaining lease terms of one to ten years. In addition, the Company has commitments under other operating leases for various refinery, manufacturing and transportation equipment, vehicles and office space. Some leases include purchase options at not less than fair market value at the end of the leases.

Total rental expense for all operating leases, net of rail car mileage credits received from the railroad and sublease income was \$31.7 million, \$30.7 million and \$35.5 million for the years ended August 31, 2003, 2002 and 2001, respectively. Mileage credits and sublease income were \$7.1 million, \$9.5 million and \$11.0 million for the years ended August 31, 2003, 2002 and 2001, respectively.

Minimum future lease payments, required under noncancellable operating leases as of August 31, 2003 are as follows:

	Rail Cars	Vehicles	Equipment and Other	Total
(dollars in thousands)				
2004	\$ 9,407	\$ 12,141	\$ 11,856	\$ 33,404

REPORT OF INDEPENDENT ACCOUNTANTS

To the Board of Directors and Members and Patrons of

CHS Inc.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, of equities and comprehensive income and of cash flows present fairly, in all material respects, the financial position of CHS Inc. and subsidiaries as of August 31, 2003 and 2002, and the results of their operations and their cash flows for each of the three years in the period ended August 31, 2003, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

INDEPENDENT AUDITORS REPORT

Members Committee

Ventura Foods, LLC

We have audited the accompanying consolidated balance sheets of Ventura Foods, LLC and subsidiary (the Company) as of March 31, 2003 and 2002 and the related consolidated statements of income, members' capital and cash flows for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Ventura Foods, LLC and subsidiary as of March 31, 2003 and 2002 and the results of their operations and their cash flows for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*, effective April 1, 2002.

Table of Contents**VENTURA FOODS, LLC AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****YEARS ENDED MARCH 31, 2003 AND 2002, THE THREE MONTHS ENDED MARCH 31, 2001 AND THE YEAR ENDED DECEMBER 31, 2000****1. General Matters**

Ventura Foods, LLC and its subsidiary (the Company) is a processor and distributor of edible oils used in food preparation and a packager of food products. The Company sells its products to national and regional restaurant chains, food wholesalers and retail chains.

The Company was formed pursuant to a Joint Venture Agreement (the Agreement) dated August 30, 1996 between Wilsey Foods, Inc. (Wilsey) and Cenex Harvest States Cooperatives (CHS) whereby substantially all the assets and liabilities of Wilsey and Holsum Foods (a division of CHS) were transferred and assigned, with certain exclusions, to the Company. Wilsey is a majority-owned subsidiary of Mitsui & Co., Ltd. From the period of inception through March 31, 2000, Wilsey and CHS owned 60% and 40%, respectively, of the Company. On March 31, 2000, Wilsey sold a 10% interest in the Company to CHS. Accordingly, Wilsey and CHS each own 50% of the Company.

At the formation date, a liability equal to the net deferred income tax liability of Wilsey at August 30, 1996 was assumed by the Company and was included in long-term liability Wilsey Foods, Inc. The amount was payable in five equal annual installments of \$487,000 plus a final installment of \$491,000. The final installment of \$491,000 was paid during fiscal 2003.

2. Accounting Policies

Basis of Presentation and Principles of Consolidation The consolidated financial statements include the accounts of Ventura Foods, LLC and its 100%-owned subsidiary, Ventura Jets, Inc. All material intercompany transactions have been eliminated.

Fiscal Year End During 2001, the Company changed its fiscal year end to March 31. Prior to such change, the Company's fiscal year end had been December 31.

Cash and Cash Equivalents The Company considers all highly liquid investments purchased with a maturity of three months or less to be cash equivalents.

Inventories Inventories consist of the following at March 31:

	<u>2003</u>	<u>2002</u>
Bulk oil	\$38,751,000	\$17,654,000
Finished goods	34,119,000	27,696,000
Ingredients and supplies	19,496,000	17,449,000
	<u> </u>	<u> </u>
Total	<u>\$92,366,000</u>	<u>\$62,799,000</u>

Inventories are accounted for at the lower of cost or market, using the first-in, first-out method. Cost for inventories produced or modified by the Company through a manufacturing process includes fixed and variable production costs and raw materials costs, and in-bound freight costs. Cost for inventories purchased for resale includes the cost of the product and freight and handling costs incurred to place the product at the Company's point of sale.

Derivative Financial Instruments The Company's use of derivative financial instruments is limited to forwards, futures and certain other delivery contracts as discussed below. The Company enters into these contracts to limit its exposure to price volatility of various food oils that are critical to its processing and distribution activities. It is the Company's policy to remain substantially hedged with respect to edible oil

product price risk; derivative contracts are used to maintain this hedged position. Forward purchase and sales contracts with established market participants as well as exchange traded futures contracts are

Table of Contents**VENTURA FOODS, LLC AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

entered into in amounts necessary to protect against price changes on raw materials needed for the Company's food oil processing and distribution activities. The Company also enters into purchase and sales commitments with major suppliers and customers at a specified premium or discount from a future market price (Basis Contracts). Additionally, the Company's policies do not permit speculative trading of such contracts. All of these qualify as derivatives under Statement of Financial Accounting Standards (SFAS) No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and are stated at market value. Changes in market value are recognized in the consolidated statements of income, through cost of sales, in the periods such changes occur. The adoption of SFAS No. 133 on January 1, 2001 did not have a significant impact on the Company's results of operations, as the Company historically recorded its financial instruments at market value. Prior to the adoption of SFAS No. 133, the market value of futures contracts, Basis Contracts, and forward purchase and sales contracts were recorded as a component of inventory. Beginning with the adoption of SFAS No. 133, the market value of these contracts is now recorded separately on the consolidated balance sheets as derivative contract assets or liabilities. These contracts have maturities of less than one year.

The following summarizes the Company's various derivative contracts outstanding at March 31, 2003 and 2002 (pounds and dollars in thousands)

Forward Contracts and Commitments	Pounds	Net Unrealized Gain (Loss)
March 31, 2003		
Forward purchases	334,100	\$ 11,060
Forward sales	433,300	(6,208)
Basis purchase	259,800	857
Basis sales	17,500	(126)
Futures contracts	146,000	958
	<u>1,190,700</u>	<u>\$ 6,541</u>
March 31, 2002		
Forward purchases	490,500	\$ 7,873
Forward sales	454,100	(1,117)
Basis purchase	390,300	2,304
Basis sales	62,600	(303)
Futures contracts	96,100	421
	<u>1,493,600</u>	<u>\$ 9,178</u>

The fair value of futures contracts is determined from quotes listed on the Chicago Board of Trade or other market makers. Forward purchase and sales contracts are with various counterparties, and the fair values of such contracts, are determined from the market price of the underlying product.

The Company is exposed to loss in the event of nonperformance by the other parties to the contracts. However, the Company does not anticipate nonperformance by counterparties.

Table of Contents**VENTURA FOODS, LLC AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Property and Depreciation Property is stated at cost. Depreciation and amortization are provided for using the straight-line method over the estimated useful lives of the assets, as follows:

Buildings	40 years
Leasehold improvements	3-19 years
Machinery and equipment	10-25 years
Other property	3-20 years

Fair Value of Financial Instruments The Company estimates the fair value of financial instruments using the following methods and assumptions:

Accounts Receivable and Accounts Payable The carrying amounts approximate fair value due to the short maturities of these instruments.

Lines of Credit The carrying amounts approximate fair value, as the interest rates are based upon variable reference rates.

Long-Term Debt The fair value of long-term fixed rate debt is estimated based upon prevailing market interest rates available to the Company. The Company estimates the fair value on the \$25,573,000 6.55% fixed rate debt as of March 31, 2003 to be \$27,804,000.

Futures Contracts The fair value of futures contracts (used for hedging purposes) is determined from quotes listed principally on the Chicago Board of Trade.

Concentration of Credit Risk During the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, net sales to one customer were 23%, 22%, 22% and 21% of total net sales, respectively. This customer represents approximately 23% and 19% of trade receivables at March 31, 2003 and 2002, respectively. The Company performs ongoing credit evaluations of its customers and maintains an allowance for potential credit losses.

The Company maintains cash deposits with various financial institutions. The Company periodically evaluates the credit standing of these financial institutions and has not sustained any credit losses relating to such balances.

Marketable Securities The Company's marketable securities comprise equity securities that have been classified as trading securities. The equity securities are carried at fair market value based upon quoted market prices. Unrealized gains and losses on equity securities are recognized in net income and totaled \$666,000 and \$(264,000) for the years ended March 31, 2003 and 2002, respectively (see Note 6).

Goodwill and Trademarks The Company adopted SFAS No. 142, *Goodwill and Other Intangible Assets*, effective April 1, 2002, the first day of its 2003 fiscal year. As a result, goodwill and indefinite life intangible assets (trademarks) are no longer amortized, but reviewed for impairment annually, or more frequently if certain impairment indicators arise. See Note 8 for the effect of adopting SFAS No. 142.

Other identifiable intangible assets consist of patents, deferred financing costs and other assets, which are amortized using the straight-line method over 5 to 15 years.

Impairment of Long-Lived Assets Long-lived assets, including identifiable intangibles, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, future cash flows expected to result from the use of the asset and its eventual disposition are estimated. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recorded under the discounted future cash flow method.

Table of Contents

VENTURA FOODS, LLC AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Advertising Costs The Company expenses advertising costs in the period incurred. For the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, the Company incurred advertising expenses of approximately \$9,039,000, \$7,100,000, \$1,300,000 and \$6,100,000, respectively.

Income Taxes The Company is a limited liability company and has no liability for federal and state income taxes. Income is taxed to the members based on their allocated share of taxable income or loss. However, certain states tax the income of limited liability companies. The Company's liability for such state income taxes is not significant.

Revenue Recognition The Company is a processor and distributor of edible oils used in food preparation and a packager of food products. Revenue is recognized upon transfer of title to the customer, which occurs generally upon shipment. In certain instances, title is transferred upon receipt by the customer, at which time the Company records revenue. Amounts billed to the customer as part of a sales transaction related to shipping and handling are included in sales. Revenue is recorded net of discounts, rebates and certain sales incentives.

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassifications Certain reclassifications have been made to the prior periods' financial statements to conform to the 2003 presentation.

Recent Accounting Pronouncements In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, *Accounting for Asset Retirement Obligations*, which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. As required, the Company will apply the provisions of SFAS No. 143 prospectively to retirements of tangible long-lived assets, if any, initiated for fiscal years beginning after June 15, 2002.

In July 2001, the FASB issued SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, which addresses financial accounting and reporting for the impairment or disposal of long-lived assets and supersedes SFAS No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of*, and the accounting and reporting provisions of Accounting Principles Board Opinion No. 30, *Reporting The Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*. This statement retains the requirements of SFAS No. 121 to (a) recognize an impairment loss only if the carrying amount of a long-lived asset is not recoverable from its undiscounted cash flows and (b) measure an impairment loss as the difference between the carrying amount and fair value of the asset, and establishes a single accounting model, based on the framework established in SFAS No. 121, for long-lived assets to be disposed of by sale. The adoption of SFAS No. 144 did not have a material impact on the Company's consolidated financial statements.

In November 2001, the Emerging Issues Task Force (EITF) issued EITF Issue No. 01-09, *Accounting for Consideration Given by a Vendor to a Customer or Reseller of the Vendor's Products*, which addresses the accounting for consideration given by a vendor or a reseller of the vendor's products. This new guidance requires companies to report certain consideration given by a vendor to a customer as a reduction in revenues rather than as marketing expense. This consensus was required to be adopted no later than the first quarter of 2002, and upon adoption, companies were required to retroactively reclassify such amounts in previously issued financial statements to comply with the income statement classification

Table of Contents

VENTURA FOODS, LLC AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

requirements of the consensus. The Company adopted the provisions of EITF Issue No. 01-09 during fiscal 2003. The effect of the adoption of EITF Issue No. 01-09 was a reduction in both revenues and selling, general and administrative expenses of \$690,000, \$207,000, \$29,000 and \$267,000 for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, respectively.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated With Exit or Disposal Activities*. SFAS No. 146 addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies EITF Issue No. 94-03, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (Including Certain Costs Incurred in Restructuring)*. This statement requires that the fair value of an initial liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred as opposed to when the entity commits to an exit plan, thereby eliminating the definition and requirements for recognition of exit costs. The provisions of SFAS No. 146 are effective for exit or disposal activities that are initiated after December 31, 2002. As required, the Company will apply the provisions of SFAS No. 146 prospectively to exit or disposal activities, if any, initiated after December 31, 2002.

In September 2002, the EITF issued EITF Issue No. 02-16, *Accounting by a Customer (Including a Reseller) for Certain Consideration Received from a Vendor*, which addresses the accounting for consideration received by the reseller of the vendor's products. This new guidance provides that the consideration represents a reimbursement of costs incurred by the customer to sell the vendor's products and is generally presumed to be a reduction of the cost of the vendor's products and, therefore, should be characterized as a reduction of cost of sales in the customer's income statement. The Company adopted EITF Issue No. 02-16 during fiscal 2003. The effect of the adoption of EITF Issue No. 02-16 was a reduction in cost of goods sold and other income of \$2,987,000, \$1,628,000, \$256,000 and \$991,000 for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, respectively.

In November 2002, the FASB issued FASB Interpretation No. (FIN) 45, *Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. FIN 45 elaborates on the disclosures to be made by a guarantor about its obligations under certain guarantees. FIN 45 also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. FIN 45 specifically identifies certain obligations that are excluded from the provisions related to recognizing a liability at inception; however, these guarantees are subject to the disclosure requirements of FIN 45. The initial recognition and measurement provisions of FIN 45 are applicable on a prospective basis to guarantees issued or modified after December 31, 2002. The disclosure requirements are effective for all annual periods ending after December 15, 2002. The adoption of FIN 45 did not have a material impact on the Company's consolidated financial statements.

On April 30, 2003, the FASB issued SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. SFAS No. 149 amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. The new guidance amends SFAS No. 133 for decisions made as part of the Derivatives Implementation Group (DIG) process that effectively required amendments to SFAS No. 133, and decisions made in connection with other FASB projects dealing with financial instruments and in connection with implementation issues raised in relation to the application of the definition of a derivative and characteristics of a derivative that contains financing components. In addition, it clarifies when a derivative contains a financing component that warrants special reporting in the statement of cash flows. SFAS No. 149 is effective for contracts entered into or modified after June 30,

Table of Contents**VENTURA FOODS, LLC AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

2003 and for hedging relationships designated after June 30, 2003. The Company is currently assessing, but has not yet determined, the impact this statement will have on its consolidated financial statements.

3. Acquisitions

During the year ended December 31, 2000, the Company acquired substantially all the assets and liabilities of Sona and Hollen for \$5,740,000. Sona and Hollen was a portion packing company located in Los Alamitos, California. The acquisition has been accounted for as a purchase, and accordingly, the purchase price has been allocated based on the estimated fair values of the assets acquired. The excess of the purchase price over the fair value of the assets acquired, approximately \$4,276,000, was recorded as goodwill. Prior to the adoption of SFAS No. 142 on April 1, 2002, goodwill had been amortized using a 15-year life (see Note 8).

The following is a summary of the assets acquired at estimated fair market value:

Inventories	\$ 637,000
Prepaid expenses and other assets	208,000
Property and equipment	600,000
Trademark	19,000
Goodwill	4,276,000
	<hr/>
Net assets of business acquired	\$5,740,000
	<hr/>

4. Lines of Credit and Long-Term Debt

Lines of Credit At March 31, 2003, the Company had a revolving line-of-credit agreement with a banking group to provide for borrowings of up to an aggregate of \$72,000,000. Outstanding borrowings at March 31, 2003 and 2002 were \$20,500,000 and \$8,000,000, respectively. The applicable interest rates are based, at the option of the Company, at a London Interbank Offered Rate (LIBOR) or a term federal funds rate (TFFR) option. The weighted-average interest rate at March 31, 2003 and 2002 was 1.72% and 2.24%, respectively. The lines of credit mature at varying dates between November 2003 and February 2004.

Long-Term Debt At March 31, 2003 and 2002, balances outstanding on term loans with a banking group were \$71,605,000 and \$81,905,000, respectively. The interest rate applicable to these term loans is based, at the option of the Company, at a TFFR-based, LIBOR-based or a fixed rate option. The weighted-average interest rate on such borrowings at March 31, 2003 and 2002 was 6.53% and 6.59%, respectively. The term loans with the banking group mature on December 23, 2003.

At March 31, 2003 and 2002, balances outstanding on a term loan with a bank were \$25,573,000 and \$28,031,000, respectively. The agreement requires quarterly principal and interest payments of \$1,058,000. The interest rate on this term loan is fixed at 6.55%. The term loan with the bank matures in October 2011.

The term loans are collateralized by substantially all property, equipment and intellectual property rights, and the lines of credit are collateralized by substantially all trade receivables and inventories of the Company. The lines of credit and term loan agreements contain various covenants, including compliance with tangible net worth (as defined) and other financial ratios, restrictions on the payment of dividends, and restrictions on the incurrence of additional debt.

Table of Contents**VENTURA FOODS, LLC AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Annual maturities of long-term debt at March 31, 2003 are as follows:

2004	\$ 74,228,000
2005	2,799,000
2006	2,987,000
2007	3,187,000
2008	3,401,000
Thereafter	10,576,000
	<hr/>
Total	97,178,000
Less current portion	74,228,000
	<hr/>
Long-term debt	\$ 22,950,000
	<hr/>

5. Transactions with Affiliates

At March 31, 2003, the Company had a receivable balance of \$309,000 due from Wilsey for reimbursement of expenses paid by the Company on behalf of Wilsey.

Included in accounts payable at March 31, 2003 and 2002 were \$8,035,000 and \$5,976,000, respectively, payable to CHS for purchases of oil. Purchases from CHS for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000 were \$66,682,000, \$47,745,000, \$8,575,000 and \$48,916,000, respectively. Sales to CHS for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000 totaled \$1,056,000, \$883,000, \$109,000 and \$950,000, respectively.

Included in accounts payable at March 31, 2003 and 2002 were \$790,000 and \$817,000, respectively, payable to Mitsui USA for the Company's participation in Mitsui USA's insurance plans. During the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, the Company recorded expenses of \$9,402,000, \$8,487,000, \$1,380,000 and \$5,049,000, respectively, in connection with its participation in such plans.

Included in trade receivables at March 31, 2003 and 2002 were \$123,000 and \$69,000, respectively, of receivables from Mitsui USA for product sales. Sales to Mitsui USA for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000 totaled \$1,423,000, \$1,406,000, \$341,000 and \$1,569,000, respectively.

Forward purchase contracts as of March 31, 2003 included commitments for purchases of 86,964,000 pounds of oil from CHS. The Company recognized gains (losses) of \$1,081,000, \$934,000, \$1,788,000 and \$(363,000) on such related party commitments for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, respectively.

6. Employee Benefit Plans

The Company has long-term incentive arrangements for certain key executives. Benefits under the initial plan were based on earnings over a three-to-five year period (as defined) from January 1, 1997 through December 31, 2001. An amount equal to the obligation incurred under the plan was contributed to a rabbi trust that would be available to general creditors in the event of bankruptcy. The trust holds investments primarily in marketable securities that are recorded at market value (classified as trading securities). The assets in the trust are to be distributed to the employees upon retirement. The liability under the arrangements was \$13,574,000 and \$14,240,000 as of March 31, 2003 and 2002, respectively, and is included in deferred compensation obligation in the accompanying consolidated balance sheets.

Table of Contents**VENTURA FOODS, LLC AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

On January 1, 2002, the Company established new long-term incentive arrangements with certain key executives. Under these arrangements, the amount of additional compensation is based on the attainment of cumulative income-based or equity-based targets over a two- to three-year period. At the end of the defined periods, amounts earned by individual executives will be contributed to a rabbi trust, unless representatives of Wilsey and CHS elect to pay such amounts directly to the respective key executives. At March 31, 2003 and 2002, a liability for the plan of \$4,702,000 and \$439,000, respectively, is classified as long-term deferred compensation obligation in the accompanying consolidated balance sheets.

For the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, the Company recognized compensation expense under the long-term incentive arrangements of \$4,264,000, \$5,658,000, \$750,000 and \$5,889,000, respectively.

The Company has a combined 401(k) and defined contribution profit-sharing plan (the Plan) covering substantially all employees not covered by collective bargaining agreements. Under the Plan, employees can make annual voluntary contributions not to exceed the lesser of an amount equal to 15% of their compensation or limits established by the Internal Revenue Code. The Company is required, by the Plan, to make certain matching contributions of up to 4% of each participant's salary and may make discretionary profit-sharing contributions. The Company also established a 401(k) defined contribution plan covering employees under certain collective bargaining agreements. Under this plan, employees can make annual voluntary contributions of up to 15% of their compensation. Expense for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000 was \$6,484,000, \$5,855,000, \$1,343,000 and \$5,139,000, respectively. Certain of the Company's union employees are participants in multi-employer plans. Payments to multi-employer pension plans are negotiated in various collective bargaining agreements and aggregated \$2,367,000, \$1,162,000, \$416,000 and \$1,641,000 for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, respectively. The actuarial present value of accumulated plan benefits and net assets available for benefits to union employees under these multi-employer pension plans is not available, as the Company does not administer these plans.

Effective January 1, 1999, the Company established a Supplemental Executive Retirement Plan for certain of its employees. The projected benefit obligation as of March 31, 2003 and 2002 was \$2,955,000 and \$2,049,000, respectively. A liability of \$2,220,000 and \$1,668,000 as of March 31, 2003 and 2002, respectively, is included in long-term deferred compensation obligation in the accompanying consolidated balance sheets. The plan is unfunded. During the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, the Company recorded an expense related to the plan of \$552,000, \$111,000, \$420,000 and \$379,000, respectively.

The assumptions used in the measurement of the Company's benefit obligation are as follows:

	March 31		December 31	
	2003	2002	2001	2000
Discount rate	6.0%	7.0%	7.0%	7.0%
Rate of compensation increase	3.0%	3.0%	3.0%	3.0%

The Company accrues the actuarially determined amount necessary to fund the participants' benefits in accordance with the requirements of the Employee Retirement Income Security Act of 1974.

Table of Contents**VENTURA FOODS, LLC AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****7. Commitments and Contingencies**

Future minimum annual payments under noncancelable operating leases with lease terms in excess of one year at March 31, 2003 are as follows:

2004	\$ 7,263,000
2005	7,431,000
2006	5,792,000
2007	4,217,000
2008	3,659,000
Thereafter	16,217,000
	<hr/>

Under the lease agreements, the Company is obligated to pay certain property taxes, insurance and maintenance costs. Certain leases contain renewal and purchase options. Rental expense for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000 under operating leases totaled \$7,138,000, \$5,671,000, \$1,476,000 and \$5,205,000, respectively.

During the year ended December 31, 2000, the Company received a payment of approximately \$2,400,000 in connection with the settlement of a class action lawsuit. This amount has been recorded as a component of other income in the accompanying consolidated statement of income.

The Company is involved from time to time in routine legal matters incidental to its business. The Company believes that the resolution of such matters will not have a material adverse effect on the Company's business, financial condition or results of operations.

8. Goodwill

In June 2001, the FASB issued SFAS No. 141, *Business Combinations*, and No. 142, *Goodwill and Other Intangible Assets*. These statements, among other things, eliminate the pooling-of-interests method of accounting for business combinations as of June 30, 2001, eliminate the amortization of goodwill and indefinite life intangible assets for all fiscal years beginning after December 15, 2001, and require that goodwill and indefinite life intangible assets be reviewed annually for impairment, or more frequently if impairment indicators arise. The Company adopted SFAS Nos. 141 and 142 with respect to new goodwill as of July 1, 2001 and adopted SFAS No. 142 with respect to existing goodwill and indefinite life intangible assets as of April 1, 2002, the first day of its 2003 fiscal year. The adoption of SFAS No. 141 did not impact the Company's financial condition or results of operations. Upon the adoption of SFAS No. 142, the Company ceased amortizing existing goodwill and trademarks.

The Company completed the transitional test of goodwill and trademarks during 2003. Based on the result of the test, the Company determined that there was no impairment of goodwill and trademarks as of April 1, 2002. Pursuant to SFAS No. 142, goodwill and trademarks will be tested for impairment at least annually and more frequently if an event occurs which indicates that goodwill or trademarks may be impaired. During 2003, the Company abandoned the use of certain trademarks with a net book value of \$100,000.

A reconciliation of net income to the amount adjusted for the exclusion of goodwill and trademarks amortization follows for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000:

	March 31		December 31	
	2003	2002	2001	2000
Reported net income	\$ 70,558,000	\$ 70,486,000	\$ 14,368,000	\$ 57,506,000
Add:				
Goodwill amortization		3,972,000	1,036,000	4,001,000
Trademark amortization		1,853,000	421,000	1,684,000
Adjusted net income	\$ 70,558,000	\$ 76,311,000	\$ 15,825,000	\$ 63,191,000

Amortization expense for other intangible assets subject to amortization was \$223,000, \$402,000, \$124,000 and \$746,000 for the years ended March 31, 2003 and 2002, the three months ended March 31, 2001 and the year ended December 31, 2000, respectively. Estimated annual amortization for each of the years in the five-year period ending March 31, 2008 is \$180,000.

9. Quarterly Information (Unaudited)

As discussed in Note 2, the Company changed its fiscal year end to March 31. Audited financial information for the three months ended March 31, 2001 has been included herein. For comparison purposes, selected unaudited financial information for the three months ended March 31, 2000 is as follows:

Sales	\$211,815,000
Cost of goods	172,818,000
Net	17,123,000
Total	362,382,000
Total liabilities	231,789,000
Members	130,593,000
