**Item 8.01 Other Events.**

On August 1, 2007, Genta Incorporated, (the Company), and Emisphere Technologies, Inc. (Nasdaq: EMIS) jointly announced the submission of an Investigational New Drug Exemption (IND) to the Endocrinologic and Metabolic Drugs Division of the U.S. Food and Drug Administration (FDA) for a new drug known as G4544. Developed out of a joint collaboration announced last year, G4544 is a new tablet formulation that enables oral absorption of the active ingredient contained in Ganite® (gallium nitrate injection), a drug that is marketed by Genta and approved in the U.S. for treatment of cancer-related hypercalcemia that is resistant to hydration. The IND proposes a Phase 1 clinical trial that will examine initial safety and pharmacokinetics of G4544 in human subjects. Genta will act as Sponsor of the IND and will direct the clinical development program.
