Form 10-Q
July 27, 2006

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the quarterly period ended July 1, 2006

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number 1-313
THE LAMSON & SESSIONS CO.

(Exact name of Registrant as specified in its charter)

Ohio

34-0349210

(State or other jurisdiction of
incorporation or organization)

(IRS Employer Identification No.)

25701 Science Park Drive
Cleveland, Ohio

44122-7313

(Address of principal executive offices)

(Zip Code)

216/464-3400

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report.)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant is a large accelerated filer; an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

(Check one):

Large Accelerated Filer

Accelerated Filer

Non-Accelerated Filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

As of July 21, 2006 the Registrant had outstanding 15,583,529 common shares.

THE LAMSON & SESSIONS CO. AND SUBSIDIARIES
Notes to Consolidated Financial Statements
(Unaudited)

Note A Basis of Presentation

The accompanying unaudited consolidated financial statements do not include all of the information and notes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and changes in accounting estimates) considered necessary for a fair presentation have been included. Certain 2005 amounts have been reclassified to conform with 2006 classifications.

On January 1, 2006, the Company adopted the provisions of FASB Statement No. 123 (revised 2004) SFAS 123R , Share-Based Payment, and elected to use the modified prospective transition method (see Note F).

Note B Income Taxes

The first half 2006 income tax provision was calculated based on management's estimate of the annual effective tax rate of 37.7% for the year. The annual effective income tax rate for 2005 was 37.3%.

Note C Business Segments

The Company's reportable segments are as follows:

Carlson Industrial, Residential, Commercial, Telecommunications and Utility Construction: The major customers served are electrical contractors and distributors, original equipment manufacturers, electric power utilities, cable television (CATV), telephone and telecommunications companies. The principal products sold by this segment include electrical and telecommunications raceway systems and a broad line of enclosures, electrical outlet boxes and fittings. Examples of the applications for the products included in this segment are multi-cell duct systems and High Density Polyethylene (HDPE) conduit designed to protect underground fiber optic cables, allowing future cabling expansion and flexible conduit used inside buildings to protect communications cable.

Lamson Home Products Consumer: The major customers served are home centers and mass merchandisers for the do-it-yourself (DIY) home improvement market. The products included in this segment are electrical outlet boxes, liquidtight conduit, electrical fittings, door chimes and lighting controls.

PVC Pipe: This business segment primarily supplies electrical, power and communications conduit to the electrical distribution, telecommunications, consumer, power utility and sewer markets. The electrical and telecommunications conduit is made from Polyvinyl Chloride (PVC) resin and is used to protect wire or fiber optic cables supporting the infrastructure of power or telecommunications systems.

Diluted Earnings Per Share	\$ 0.87	\$ 0.35	\$ 1.45	\$ 0.51

Note F Stock Compensation Plans

On January 1, 2006, the Company adopted the provisions of SFAS 123R, Share-Based Payment, and elected to use the modified prospective transition method. The modified prospective transition method requires that compensation cost be recognized in the financial statements for all awards granted after the date of adoption as well as for existing awards for which the requisite service has not been rendered as of the date of adoption and requires that prior periods not be restated. The Company's stock compensation plans provide for the granting of nonqualified options, stock appreciation rights (SARs), deferred and restricted shares and performance accelerated restricted stock (PARS) to officers, directors and key employees for up to 3,220,000 shares of common stock of the Company. Outstanding options and SARs vest over a three year period after the grant date or retirement whichever is earlier and expire no more than ten years after grant. Outstanding PARS vest as certain stock prices are met and maintained or after six years or upon retirement, whichever is earlier. Prior to the adoption of SFAS 123R, the Company used the intrinsic value based method to account for stock options and made no charges against earnings with respect to options granted.

The adoption of SFAS 123R reduced income before income taxes for the second quarter and first half of 2006 by \$0.3 million and \$1.8 million, respectively and reduced net income for the second quarter and first half of 2006 by \$0.2 million (\$.01 per basic and diluted shares) \$1.1 million (\$.07 per basic and diluted shares), respectively. The

effect of the adoption on first half 2006 results is not indicative of the effect on the second half of 2006 as approximately \$1.2 million of the first half stock compensation was incremental due to the requirement to use a non-substantive vesting approach (expensing at the grant date for all retirement eligible employees applied

prospectively). The adoption of this statement also required the classification of the current year tax benefit from the exercise of stock options of \$4.3 million as a financing activity in the cash flow statement.

Prior to January 1, 2006, the Company accounted for stock compensation under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations. No stock-based employee compensation cost is reflected in net income prior to the adoption of SFAS 123R, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. In accordance with SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, the following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS 123 Accounting for Stock Based Compensation in 2005.

(Dollars in thousands, except per share data)

			Second Quarter Ended 2005	First Half Ended 2005
Net income	As reported	\$	5,227	\$ 7,431
Total stock-based employee compensation, net of tax			(145)	(261)
Net income	Pro forma	\$	5,082	\$ 7,170
Basic earnings per share	As reported	\$	0.37	\$ 0.53
	Pro forma		0.36	0.51
Diluted earnings per share	As reported	\$	0.35	\$ 0.51
	Pro forma		0.34	0.49

The fair values of each stock option and SAR award is estimated on the date of the grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	2006	2005
Expected volatility	60.0%	55.5%
Risk-free interest rates	4.71%	3.84%
Average expected life	6 years	5 years

The expected volatility of stock assumption was derived by referring to changes in the Company's historical common stock prices over a timeframe similar to that of the expected life of the award. The Company has no reason to believe the future stock volatility is likely to differ from historical volatility. The risk-free interest rate is based on the five and seven-year Treasury Bond rates as of the grant date. The average expected life of stock-based awards is based on vesting schedules and contractual terms.

THE LAMSON & SESSIONS CO. AND SUBSIDIARIES**Note F Stock Compensation Plans-continued**

Stock-based award activity during the first half of 2006 is as follows:

(Options/SARS and intrinsic value in thousands)

	Number of Options/SARS	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2005	1,786	\$ 6.67		
Granted	85	27.81		
Exercised	(489)	4.86		
Forfeited				
Outstanding at July 1, 2006	1,382	\$ 8.43	6.38	\$ 27,535
Exercisable at July 1, 2006	1,027	\$ 6.77	5.55	\$ 22,162

All outstanding stock-based awards are expected to vest.

The total intrinsic value of stock options exercised during the first half of 2006 and 2005 was \$11.0 million and \$1.3 million, respectively. Net cash proceeds from the exercise of stock options were \$2.4 million and \$1.8 million for the first half of 2006 and 2005, respectively. An income tax benefit of \$4.3 million and \$0.5 million was realized from stock option exercises during the first half of 2006 and 2005, respectively.

The weighted average grant date fair value of stock-based awards was \$16.65 for first half of 2006 grants and \$5.01 for 2005 grants.

A summary of the status of the Company's nonvested shares as of July 1, 2006 and changes during the first half of 2006 is presented below:

	Number of Restricted Shares	Number of PARS	Total	Weighted-Average Grant-Date Fair Value
Nonvested at December 31, 2005	21,793		21,793	\$ 7.66
Granted	14,263	23,300	37,563	\$ 27.64
Vested	(7,912)		(7,912)	\$ 3.44
Nonvested at July 1, 2006	28,144	23,300	51,444	\$ 22.90

The PARS and restricted shares were valued based on the average stock price on the grant date. The PARS are estimated to vest over an average 1.2 years based on a valuation model using the above volatility assumption. The intrinsic value of restricted shares that vested during the first half of 2006 was \$0.2 million.

As of July 1, 2006 there was \$2.1 million of total unrecognized compensation cost related to non-vested share based compensation arrangements granted under the Company's stock compensation plans. The cost is expected to be recognized over a weighted average period of 1.5 years.

THE LAMSON & SESSIONS CO. AND SUBSIDIARIES**Note G Commitment**

Effective May 1, 2006 the Company entered into a six-year Operating Services Agreement with a third party logistics provider to operate for the Company a new distribution center in Dallas, Texas. The distribution center is scheduled to open by the end of the third quarter of this year and will service primarily the Gulf Coast and south central regions. The annual cost is estimated to be between \$3.5 million to \$4.0 million.

Note H Pension and Other Post-Retirement Benefit Plans

The Company sponsors several qualified and non-qualified pension plans and other post-retirement benefit plans for its current and former employees. As of January 1, 2003 the Company eliminated the salary defined benefit pension plan for future employees. This action closed all defined benefit pension and other post-retirement benefit plans to new entrants and will reduce future service costs.

The components of net periodic benefit cost (income) are as follows:

(Dollars in thousands)

	Second Quarter Ended				First Half Ended			
	Pension Benefits		Other Benefits		Pension Benefits		Other Benefits	
	2006	2005	2006	2005	2006	2005	2006	2005
Service cost	\$ 349	\$ 374	\$	\$ (1)	\$ 698	\$ 748	\$	\$ 1
Interest cost	1,306	1,212	183	37	2,612	2,424	366	347
Expected return on assets	(1,774)	(1,563)			(3,548)	(3,126)		
Net amortization and deferral	325	478	(74)	(132)	649	957	(148)	(232)
Defined contribution plans	302	268			590	499		
	\$ 508	\$ 769	\$ 109	\$ (96)	\$ 1,001	\$ 1,502	\$ 218	\$ 116

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of the Company's consolidated results of operations and financial condition. The discussion should be read in conjunction with the Consolidated Financial Statements.

Executive Overview

In the second quarter 2006 the Company had record net sales of \$162.3 million notwithstanding the predicted moderation of housing starts and existing home sales. Top line growth was supported by the strength of the commercial and industrial construction market and steady telecom product demand.

PVC and HDPE resin supplies have stabilized during the current quarter with average costs declining slightly. The resin producers' operating rates continue to be about 90% of capacity; so this, along with the uncertainty surrounding oil and gas supplies, should keep PVC costs at least stable in the short term.

On January 1, 2006 the Company adopted the provisions of SFAS 123R (see Note F), Share-Based Payment, and elected to use the modified prospective transition method, which requires that compensation cost be recognized in the financial statements for stock-based awards. Prior to the adoption of SFAS 123R, the Company used the intrinsic-value based method to account for stock options and made no charges against earnings with respect to options granted. In the first half of 2006 the Company granted stock appreciation rights (SARs), stock options, performance accelerated restricted stock (PARS), and restricted shares to officers and directors of the Company. Expense related to these stock based grants and the relevant vesting of outstanding stock options reduced income before income taxes for the first half 2006 by \$1.8 million and reduced net income for the first half by \$1.1 million (\$0.7 per basic and diluted share). The effect of the adoption on first half 2006 results is not indicative of the effect on the remaining quarters of 2006 as approximately \$1.2 million of the first half stock compensation was incremental due to the requirement to use a non-substantive vesting approach (expensing at the grant date for all retirement-eligible employees). As of July 1, 2006 there was \$2.1 million of total unrecognized compensation cost related to non-vested share based compensation, which is expected to be realized over the next couple of years.

The Company continues to address process control and quality issues in the PVC Pipe extrusion plants which were identified in the second half of 2005. Of the \$7.3 million in capital expenditures in the first half of 2006, \$4.5 million is to replace aging extrusion and testing equipment. In addition, quality control personnel are in place and formal training on the new equipment is almost complete. These improvements in operations should begin to be realized in the second half of 2006.

During the second quarter 2006, the Company intensified its search and review of potential acquisitions. This activity will continue throughout the remainder of 2006 as the Company considers various growth opportunities and other potential capital realignment activities.

In summary, net income increased to \$14.0 million in the second quarter and \$23.2 million in the first half 2006 compared with \$5.2 million in the second quarter and \$7.4 million in the first half 2005 resulting in \$0.87 and \$1.45 diluted earnings per share in the second quarter and first half of 2006 versus \$0.35 and \$.51 diluted earnings per share in the second quarter and first half of 2005.

2006 Compared with 2005**Results of Continuing Operations**

The following table sets forth, for the periods indicated, items from the Consolidated Income Statements as a percentage of net sales for the second quarter and first half of 2006 and 2005:

(Dollars in thousands)

	Second Quarter Ended				First Half Ended			
	2006		2005		2006		2005	
Net Sales	\$ 162,313	100.0%	\$ 124,010	100.0%	\$ 297,714	100.0%	\$ 222,802	100.0%
Cost of products sold	122,241	75.3%	100,995	81.4%	226,659	76.1%	182,810	82.1%
Gross profit	40,072	24.7%	23,015	18.6%	71,055	23.9%	39,992	17.9%
Total operating expenses	16,522	10.2%	12,316	10.0%	31,560	10.6%	23,678	10.6%
Operating income	23,550	14.5%	10,699	8.6%	39,495	13.3%	16,314	7.3%
Interest expense, net	1,131	0.7%	2,211	1.8%	2,248	0.8%	4,213	1.9%
Income before income taxes	22,419	13.8%	8,488	6.8%	37,247	12.5%	12,101	5.4%
Income tax provision	8,430	5.2%	3,261	2.6%	14,038	4.7%	4,670	2.1%
Net Income	\$ 13,989	8.6%	\$ 5,227	4.2%	\$ 23,209	7.8%	\$ 7,431	3.3%

Net sales for the second quarter of 2006 increased by 30.9%, or \$38.3 million, to \$162.3 million compared with \$124.0 million in the second quarter of 2005. The Company experienced strong demand in the Carlon and PVC Pipe business segments due to steady telecom infrastructure spending and improvement in commercial and industrial construction markets. Shipments of PVC Pipe also continued to grow from improved non-residential and utility construction activity. During the second quarter 2006, the Company began to notice a slight moderation in residential construction and related DIY home improvement markets which slowed LHP sales growth resulting in only a \$0.5 million or 2% increase in net sales over second quarter 2005. First half 2006 net sales reached \$297.7 million, an increase of \$74.9 million, or 33.6% over the \$222.8 million in net sales recorded in the first half of 2005.

Gross profit in the second quarter of 2006 was \$40.1 million, or 24.7% of net sales, compared with \$23.0 million, or 18.6% of net sales, in the second quarter of 2005. This reflects the net sales growth in the Carlon and PVC Pipe business in the current year. Profit margins are benefiting from the improved capacity utilization of manufacturing facilities and the leveraging of our distribution operations. For the first half of 2006, gross profit was \$71.1 million, 23.9% of net sales, a \$31.1 million, or 77.7%, increase over the \$40.0 million, or 17.9% of net sales, earned during the first half of 2005. As in the second quarter, the improvement is attributable to increased sales and operating activity in the Carlon and PVC Pipe segments and across the board price increases early in 2006 which offset higher resin costs.

Operating income for the second quarter of 2006 was \$23.6 million, or 14.5% of net sales, an increase of \$12.9 million, or 120%, over the \$10.7 million, or 8.6% of net sales, earned in the second quarter of 2005. Operating expenses were \$16.5 million in the current quarter, \$4.2 million, or 34.2%, higher than the \$12.3 million incurred in the prior year second quarter. These higher expenses are principally from variable selling expenses and other marketing and promotional expenses of \$1.8 million. During the current quarter the Company had approximately \$1.0 million higher legal and professional expense from executive search fees, due diligence assistance for potential acquisitions and the timing of audit and SOX compliance work.

The first half of 2006 operating expenses of \$31.6 million, or 10.6% of net sales, were \$7.9 million higher than the first half of 2005 operating expenses of \$23.7 million, or 10.6% of net sales. Consistent with the second quarter, variable selling expenses and other market and promotional expenses were \$3.1 million and incentive compensation expense was \$0.9 million higher in year-to-date 2006 compared with the same period in 2005. Additionally, legal and professional fees are \$0.7 million more than the prior year first half. A portion of the operating expense increases relates to stock compensation expense (\$0.3 million in the second quarter of 2006 and \$1.8 million in the first half of 2006) under SFAS 123R which was adopted on January 1, 2006 (see Note F) and requires the expensing of stock compensation to employees and directors. Operating income for the first half of 2006 was \$39.5 million, or 13.3% of net sales, compared with \$16.3 million, or 7.3% of net sales, for the first half of 2005.

Interest expense for the second quarter and first half of 2006 of \$1.1 million and \$2.2 million were approximately half of the levels incurred in the respective periods of 2005. Average borrowings during the first half of 2006 were \$33.7 million or 34.4% lower than the first half of 2005. Average interest rates paid were lower in 2006 at 5.72% compared with 6.10% in 2005. LIBOR rate increases have been more than offset by the Company's performance which lowered the interest rate spread under the terms of the Secured Credit Agreement.

The year-to-date income tax provisions are based on an annual effective tax rate of 37.7% in 2006 compared with 37.3% in 2005.

Business Segments

Carlton

Carlton had net sales of \$77.3 million in the second quarter 2006 and \$141.4 million in the first half of 2006 reflecting growth rates of 31.0% (\$18.3 million) and 33.1% (\$35.2 million) over the \$59.0 million and \$106.2 million recorded in the second quarter and first half of 2005. This business segment continued to experience the positive effects of an expanding commercial and industrial construction market as electrical product sales were up by approximately 20% for the 2006 second quarter (\$6 million) and first half (\$13 million) periods compared with 2005. About half of the increase came from higher unit volumes and the remainder from price increases implemented at the end of 2005 to recoup significant material cost inflation over the past year. Carlton's telecom product sales also continue to grow; 26% for the second quarter 2006 and 25% year-to-date 2006 compared with the prior year periods. Volume of product shipments increased approximately 10% to support the roll out of Fiber-to-the-Premise and other utility infrastructure projects while selling prices are about 15% higher reflecting primarily higher resin material costs. Finally, as in the first quarter, the segment had very strong sales of pressure pipe to the natural gas collection market, which represents \$4.5 million and \$10 million in additional net sales in the second quarter and first half 2006, respectively, compared with the prior year.

Gross profit for Carlton improved by approximately \$7.0 million in the second quarter of 2006 compared with the prior year second quarter due to the higher sales volume which increased HDPE extrusion manufacturing utilization by about 15 percentage points and favorably leveraged the fixed cost nature of the distribution operations. In addition, margins were favorably impacted by the realization of selling price increases that offset material cost increases that have been incurred over the last year as well as favorable electrical market product mix. Gross profit for the first half of 2006 is \$12.0 million higher than the first half of 2005, mostly from the higher net sales levels and similar operating conditions as in the second quarter.

Operating income for this business segment rose 76.2%, or \$6.0 million, in the second quarter of 2006 to \$13.8 million, or 17.8% of net sales, compared with \$7.8 million, or 13.3% of net sales, in the second quarter of 2005. This improvement resulted from the improved gross profit described above. Carlton operating expenses increased approximately \$1.3 million due to higher variable selling and marketing expenses and incentive compensation expenses. These were offset partially by the expiration of a non-compete agreement which lowered amortization expense by \$0.3 million. Carlton realized \$21.5 million, or 19.2% of net sales, in operating income in the first

half 2006 compared with \$11.5 million, or 10.8% of net sales, in the first half of 2005. Year-to-date operating expenses are up \$1.6 million in 2006 compared with the first half of 2005 driven by the same expense item net increases incurred in the second quarter 2006.

Lamson Home Products

The Lamson Home Products business segment grew net sales by \$0.5 million, or 2.0%, to \$26.9 million in the second quarter 2006 compared with \$26.4 million in the second quarter of 2005. The second quarter results reflect the price increases obtained in the first quarter of 2006 and better product mix that offset approximately a 2% decline in product unit volume as signs of slower demand from the residential construction and DIY home improvement markets were realized. Net sales for the first half of 2006 were \$53.9 million, a \$3.5 million, or 7.0%, increase over the \$50.3 million in net sales recorded in the first half of 2005. Substantially all of this increase results from increased selling prices, which were implemented to recoup the significant cost increases incurred over the past year for principally PVC compounds.

Gross profit for the first half of 2006 was about \$1.0 million lower than the prior year as price increases did not fully offset the PVC compound cost growth of 12.0% and 15.0% for the second quarter and first half of 2006, respectively. Operating income was \$4.1 million, or 15.2% of net sales in the second quarter of 2006 below the \$4.6 million, or 17.3% of net sales earned in the second quarter of 2005, a reduction of \$0.5 million or 10.3%. For the first half 2006, Lamson Home Products had \$6.7 million, or 12.4% of net sales, in operating income which was lower by \$1.4 million, or 17.8%, compared with \$8.1 million, or 16.1% of net sales, earned in the first half of 2005. Lamson Home Products experienced higher operating expenses, \$0.9 million in the second quarter of 2006 and \$1.3 million for the first half of 2006, reflecting an increase in product development and marketing investments to promote product mix and market share improvements in the future.

PVC Pipe

Net sales for the PVC Pipe segment remained very strong in the second quarter of 2006 increasing by \$19.5 million, or 50.5%, to \$58.1 million from the \$38.6 million net sales level in the second quarter of 2005. First half 2006 net sales were \$102.5 million, an increase of \$36.2 million, or 54.7%, over the \$66.2 million in net sales in the first half of 2005. Actual pounds shipped rebounded this quarter exceeding the prior year second quarter by about 16.0% as the weather on the West Coast improved and the commercial and industrial construction market exhibited healthy demand. For the first half of 2006 shipment volume grew 5.0% over the prior year first half. The PVC Pipe business continues to operate in a high resin cost environment which has maintained selling prices approximately 40% and 50% higher than last year for the second quarter and first half of 2006, respectively.

Gross margin in the PVC Pipe business segment was favorably impacted by net sales price increases which exceeded the average PVC resin cost increases in 2006 of approximately 8.5% and 13.5% over the second quarter and first half of 2005, respectively. The higher sales volumes have also resulted in much improved manufacturing variances and efficiencies in distribution operations.

Operating income for the PVC Pipe segment was \$9.6 million, or 16.5% of net sales, and \$18.5 million, or 18.1% of net sales, for the second quarter and first half of 2006. This compared to essentially breakeven results in the prior year periods. Operating expenses increased by \$0.5 million and \$1.1 million for the second quarter and first half 2006 primarily from higher variable selling and incentive compensation expenses compared with the prior year periods.

Liquidity and Capital Resources

The Company's primary source of liquidity and capital resources is cash generated from operating activities and availability under its Secured Credit Agreement.

Cash provided by operating activities was \$5.8 million in the first half of 2006 compared with cash used by operating activities of \$5.6 million in the first half of 2005. This improved operating cash flow comes directly from the very strong profitability level in the current year. At the end of the second quarter 2006, accounts receivable were \$88.7 million, a 29.5%, or \$20.2 million, increase from year-end 2005 and 37.8%, or \$24.3 million more than the end of second quarter 2005. This increase reflects the more than 30.0% rise in net sales in the second quarter of 2006, as days sales outstanding calculated using a 3-month rolling average, has risen only slightly to 48.0 days at July 1, 2006 compared with 46.6 days at July 2, 2005.

The Company continued to focus on maintaining high inventory turns and, therefore, limiting its exposure to resin cost fluctuations. At the end of the second quarter 2006, inventory investment was \$53.6 million, up \$10.4 million from second quarter 2005 and \$9.6 million higher than year-end 2005. This resulted in inventory turns staying at 8.1 times, the same as at the end of second quarter 2005. Pounds of PVC resin in inventory at July 1, 2006 were actually 11.0% less than at July 2, 2005, but 37.0% more than at 2005 year-end, while the average cost of PVC resin in inventory has increased 7.7% from the end of second quarter 2005 but has fallen over 10% since year-end 2005. Accounts payable at July 1, 2006 were \$36.4 million, an increase of \$5.4 million since the 2005 year-end, and \$7.6 million more than the second quarter 2005 ending balance of \$28.8 million. These higher payable levels primarily reflect the higher inventory levels this quarter end.

Accrued expenses have declined by a total of \$3.2 million since the 2005 year-end as the Company has paid incentive compensation (\$5.3 million), while other operating accruals such as freight are higher due to increased shipping and manufacturing activity.

The Company's cash used in investing activities, representing capital expenditures, totaled \$7.3 million in the first half of 2006. The 2006 capital expenditures included investments to improve extrusion productivity and quality, expand molding capacity, tooling to support product line extensions and continued investment in the information technology infrastructure. In 2005, the Company spent \$4.1 million on capital expenditures.

Cash provided by financing activities totaled \$2.0 million in the first half of 2006, compared with \$10.5 million in the first half of 2005. The Company has paid \$4.0 million on its Credit Facility so far in 2006. The Company has met all debt covenants at the end of the second quarter of 2006 and now has over \$85 million of available capacity on its revolver to fund acquisitions and other needs of the business. In the first half of 2006, the Company received \$2.4 million as 489,000 shares were issued from the exercise of stock options compared with \$1.8 million received for options exercised in the first half of 2005. The Company has classified, in accordance with SFAS 123R, the tax benefit from the current year exercise of stock options (\$4.3 million) as a financing activity. Formerly, the benefit was classified as an operating activity.

Critical Accounting Estimates

We have no material changes to the disclosure on this matter since the end of our most recent fiscal year, December 31, 2005.

Outlook for 2006

Telecom spending in the second quarter 2006 continued to expand at over 20% to support Fiber-to-the-Premise projects. Verizon Communications, one of the Company's key telecom customers plans to pass fiber optic cable to 3 million homes in 2006, up 50% from the 2 million homes connected in 2005. Other telecom, utilities and cable operators have also begun similar, but more modest programs. Overall, management expects the telecom product unit sales to grow another 6%-9% in 2006.

Residential construction, as anticipated, began to moderate from record levels of over 2.0 million units in the prior year to a more sustainable annual rate of 1.8 million units. Existing home sales is a key driver for the Lamson Home Products business segment and has also fallen off slightly from record levels in 2005 in response to rising mortgage rates.

Light commercial and industrial construction markets continued to see increased activity in the second quarter of 2006. Demand has accelerated for products which are used in commercial facilities and industrial capacity expansion. These first half demand levels, along with the expectation that the Gulf Coast rebuilding efforts are still to come, should support a growth rate for the Company in these markets of at least 6%-7% for 2006.

In the first half of 2006, PVC resin producers returned to normal operations, utilizing over 90% of the industry capacity, and resin and pipe inventories have been replenished, recovering from the shortages caused by the two major Gulf Coast hurricanes last year. Along with lower natural gas prices, this has resulted in a progressive decline in PVC resin costs in the first half of 2006. This is evidenced by a more than 10% decline in the average cost of PVC resin in inventory from 2005 year-end. On average, PVC conduit prices in the second quarter 2006 have declined about 20% compared with the first quarter of 2006. The Company experienced improved demand in the second quarter as higher commercial and industrial construction activity has offset the modest slowdown in residential construction. If natural gas prices remain fairly stable and the resin producers continue to operate at just over the 90% capacity rate, it is expected that PVC resin prices will stabilize as demand remains firm in the second half. It is the Company's intention to manage its inventory levels of PVC, limiting the exposure to inventory write downs, while continuing to monitor the spread between selling price and resin cost to maintain a reasonable, sustainable profit level for the PVC pipe business.

The Company expects to open a third distribution center located in Dallas, Texas by the end of the third quarter 2006. This center will service the Gulf Coast and south central regions providing improved customer service, lower freight costs and the potential for market share growth.

Cash flow from operating activities will continue to improve in 2006 from favorable operating results and the leveling off of working capital requirements as inventories have been replenished and accounts receivable collections will generate favorable cash flow. Capital spending in 2006 is expected to be \$13.0 million to \$15.0 million, as the Company focuses on upgrading extrusion equipment, increases automation and adds incremental molds and tooling to support market expansion and new products.

In summary, based on the continued strong activity in our key markets in the first half 2006, we expect further growth in the next quarter, as it is typically similar seasonally to the second quarter. As a result, the Company is anticipating net sales for the third quarter of 2006 of between \$152.0 million and \$155.0 million, 19%-21% over the third quarter 2005, which is expected to result in net income of \$11.2 million to \$12.1 million, or \$0.70-\$0.75 per diluted share, for the third quarter. This earnings range would at least double the \$0.35 per diluted share reported for the third quarter of 2005. For the full year 2006, we continue to expect net sales to increase 16%-18% over 2005 ranging from \$575.0 million to \$585.0 million, reflecting the improved conditions in the commercial and industrial construction markets. If this net sales level is achieved, along with only a slight decline in PVC pipe margins and the maintenance of operating capacity utilization, the Company projects net income of \$40.0 to \$42.0 million, or \$2.50-\$2.60 per diluted share in 2006. This estimate represents a 46%-53% increase over the \$27.4 million of net income reported for 2005.

This Management's Discussion and Analysis of Financial Condition and Results of Operations contain expectations that are forward-looking statements that involve risks and uncertainties within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those expected as a result of a variety of factors, such as: (i) the volatility of resin pricing, (ii) the ability of the Company to pass through raw material cost increases to its customers, (iii) the continued availability of raw materials and consistent electrical power supplies, (iv) maintaining a stable level of housing starts, telecommunications infrastructure spending, consumer confidence and general construction trends and (v) any adverse change in the recovery trend of the country's general economic condition affecting the markets for the Company's products. Because forward-looking statements are based on a number of beliefs, estimates and assumptions by management that could ultimately prove to be inaccurate, there is no assurance that any forward-looking statement will prove to be accurate.

Item 3 Quantitative and Qualitative Disclosures about Market Risk

We have no material changes to the disclosure on this matter since the end of our most recent fiscal year, December 31, 2005.

Item 4 Controls and Procedures

As of July 1, 2006, an evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective. During the Company's second quarter 2006, there have been no significant changes in the Company's internal controls or in other factors that could significantly affect internal controls subsequent to their evaluation.

PART II

Item 1 Legal Proceedings

The Company is a party to various claims and matters of litigation incidental to the normal course of its business. Management believes that the final resolution of these matters will not have a material adverse effect on the Company's financial position, cash flows or results of operations.

Item 1A Risk Factors

We have no material changes to the disclosure on this matter since the end of our most recent fiscal year, December 31, 2005.

Item 4 Submission of Matters To A Vote of Security Holders

On April 28, 2006, the Company held its Annual Meeting of Shareholders. At the meeting 13,865,363 Common Shares (90.31%) of the Common Shares outstanding were voted.

The following four directors were elected to Class II and to Class I as indicated below and received the votes listed next to their names.

Class II	For	Withheld Authority
John C. Dannemiller	13,063,312	802,051
George R. Hill	13,015,513	849,850
William H. Coquillette	13,012,253	853,110

Class I	For	Withheld Authority
Michael J. Merriman, Jr.	13,085,548	779,815

An Amendment to the Lamson & Sessions Co. 1998 Incentive Equity Plan was approved: FOR 7,533,424, AGAINST 1,297,652, ABSTAIN 87,333.

Item 6 Exhibits

(a) Exhibits:

10 (a) Form of restricted stock agreement for annual grant to non-employee directors issued under The Lamson & Sessions Co. 1998 Incentive Equity Plan (as amended and restated as of April 28, 2006) (the Plan).

10 (b) Form of restricted stock agreement for non-employee directors deferred fees issued under the Plan.

10 (c) Form of restricted stock agreement for officers deferred bonuses issued under the Plan.

- 31.1 Certification of John B. Schulze, Chief Executive Officer, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of James J. Abel, Chief Financial Officer, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of John B. Schulze, Chief Executive Officer, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of James J. Abel, Chief Financial Officer, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

THE LAMSON & SESSIONS CO.
