MYLAN LABORATORIES INC. AND SUBSIDIARIES

**Notes to Condensed Consolidated Financial Statements
(unaudited; dollars in thousands, except per share amounts)**

1. General

In the opinion of management, the accompanying unaudited condensed consolidated financial statements (interim financial statements) of Mylan Laboratories Inc. and subsidiaries (Mylan or the Company) were prepared in accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the Securities and Exchange Commission for reporting on Form 10-Q; therefore, as permitted under these rules, certain footnotes and other financial information included in audited financial statements were condensed or omitted. The interim financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the interim results of operations, financial position and cash flows for the periods presented.

These interim financial statements should be read in conjunction with the Consolidated Financial Statements and Notes thereto in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2006.

The interim results of operations for the three and nine months ended December 31, 2006, and the interim cash flows for the nine months ended December 31, 2006, are not necessarily indicative of the results to be expected for the full fiscal year or any other future period.

Certain prior year amounts were reclassified to conform to the current year presentation. Such reclassifications had no impact on reported net earnings, earnings per share or shareholders' equity.

2. Revenue Recognition and Accounts Receivable

Revenue is recognized for product sales upon shipment when title and risk of loss transfer to the Company's customers and when provisions for estimates, including discounts, rebates, price adjustments, returns, chargebacks and other promotional programs are reasonably determinable. No revisions were made to the methodology used in determining these provisions during the three and nine month periods ended December 31, 2006. Accounts receivable are presented net of allowances relating to these provisions. Such allowances were \$380,928 and \$381,800 as of December 31, 2006 and March 31, 2006. Other current liabilities include \$52,002 and \$60,374 at December 31, 2006, and March 31, 2006, for certain rebates and other adjustments that are payable to indirect customers.

3. Recent Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes-an Interpretation of FASB Statement 109* (FIN 48), which clarifies the accounting for uncertain tax positions. This Interpretation provides that the tax effects from an uncertain tax position be recognized in the Company's financial statements, only if the position is more likely than not of being sustained upon audit, based on the technical merits of the position. The provisions of FIN 48 will be effective for Mylan as of the beginning of fiscal 2008. The Company is currently evaluating the impact of adopting FIN 48 on its consolidated financial statements.

4. Acquisition of Matrix Laboratories Limited

On August 28, 2006, Mylan Laboratories Inc. entered into a Share Purchase Agreement (the Share Purchase Agreement) to acquire, through MP Laboratories (Mauritius) Ltd, its wholly-owned indirect subsidiary, a controlling interest in Matrix Laboratories Limited (Matrix), a publicly traded company in India. Matrix is engaged in the

manufacture of active pharmaceutical ingredients (APIs) and solid oral dosage forms and is based in Hyderabad, India.

Table of Contents

MYLAN LABORATORIES INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements (Continued)

Pursuant to the Share Purchase Agreement, Mylan agreed to pay a cash purchase price of 306 rupees per share for approximately 51.5% of the outstanding share capital of Matrix held by certain selling shareholders (the Selling Shareholders).

In accordance with applicable Indian law, MP Laboratories (Mauritius) Ltd, along with the Company, commenced an open offer to acquire up to 20% of the outstanding shares of Matrix (the Public Offer) from Matrix s shareholders (other than the Selling Shareholders) on November 22, 2006, which Public Offer expired on December 11, 2006. The price in the Public Offer was 306 rupees per share, in accordance with applicable Indian regulations.

On December 21, 2006, the Public Offer was completed. A total of 54,585,189 shares were validly tendered, of which Mylan accepted 30,836,662 shares. Payment in the amount of \$210,601 for the shares properly tendered and accepted was dispatched to the shareholders. Mylan s investment in Matrix as of December 31, 2006 is being accounted for under the equity method of accounting and is included within investments in equity method investees on the Company s Condensed Consolidated Balance Sheet.

On January 8, 2007, Mylan completed its acquisition of approximately 51.5% of Matrix s outstanding shares from the Selling Shareholders for approximately \$545,551, thereby increasing its ownership to approximately 71.5% of the voting share capital of Matrix. Including the Matrix shareholdings maintained by Prasad Nimmagadda (one of the Selling Shareholders), which are subject to a voting arrangement with Mylan, Mylan controls in excess of 75% of the voting share capital of Matrix.

Following the closing of this transaction, certain of the Selling Shareholders used approximately \$143,000 of their proceeds to acquire Mylan Laboratories Inc. common stock from the Company in a private sale at a price of \$20.85 per share. Prasad Nimmagadda also has agreed to invest \$25,000 of his proceeds in Mylan Laboratories Inc. common stock, in a private transaction with the Company anticipated to close in the fourth quarter of fiscal 2007, and, in accordance with his purchase agreement, assigned such right to one of his affiliates.

As a result of Mylan s total ownership in Matrix, Mylan will account for this transaction as a purchase under Statement of Financial Accounting Standards (SFAS) No. 141, *Business Combinations* (SFAS 141) and will consolidate the results of operations of Matrix as of January 8, 2007.

In conjunction with the Matrix transaction, the Company entered into a foreign exchange forward contract to purchase Indian rupees with U.S. dollars in order to mitigate the risk of foreign currency exposure related to the transaction. The Company accounts for this instrument under the provisions of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133). This instrument does not qualify for hedge accounting treatment under SFAS 133 and therefore was required to be adjusted to fair value with the change in the fair value of the instrument recorded in current earnings. The portion of the forward contract related to the Public Offer was settled during the quarter and Mylan received a cash payment of \$3,444. The remaining portion of the forward contract was closed on January 8, 2007, and Mylan received a cash payment of \$12,756. The Company recorded a gain of \$25,241 and \$17,476 for the three and nine month periods ended December 31, 2006 related to this deal contingent forward contract. These amounts are included within other income, net in the Condensed Consolidated Statements of Earnings for both periods.

5. Stock Based Incentive Plan

Mylan's shareholders approved the *Mylan Laboratories Inc. 2003 Long-Term Incentive Plan* on July 25, 2003, and approved certain amendments on July 28, 2006 (the "2003 Plan"). Under the 2003 Plan, 22,500,000 shares of common stock are reserved for issuance to key employees, consultants, independent contractors and non-employee directors of Mylan through a variety of incentive awards, including: stock options, stock appreciation rights, restricted shares and units, performance awards, other stock-based awards and short-term cash awards. Awards are generally granted at the market price of the underlying shares at the date of the grant and generally become exercisable over periods ranging from three to four years and generally expire in ten years.

Table of Contents**MYLAN LABORATORIES INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)**

The Company adopted SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS 123R), effective April 1, 2006. SFAS 123R requires the recognition of the fair value of stock-based compensation in net earnings. Prior to April 1, 2006, the Company accounted for its stock options using the intrinsic value method of accounting provided under Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and related Interpretations, as permitted by SFAS No. 123, *Accounting for Share Based Compensation* (SFAS 123).

Mylan adopted the provisions of SFAS 123R, using the modified prospective transition method. Under this method, compensation expense recognized in the three and nine month period ended December 31, 2006 includes: (a) compensation cost for all share-based payments granted prior to April 1, 2006, but for which the requisite service period had not been completed as of April 1, 2006, based on the grant date fair value, estimated in accordance with the original provisions of SFAS 123, and (b) compensation cost for all share-based payments granted subsequent to April 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS 123R. Results for prior periods have not been restated.

The previously disclosed pro forma effects of recognizing the estimated fair value of stock-based employee compensation for the three and nine months ended December 31, 2005, were as follows:

Period Ended December 31,	Three Months 2005	Nine Months 2005
	(In thousands)	
Net earnings as reported	\$ 48,207	\$ 126,892
Add: Stock-based compensation expense included in reported net income, net of related tax effects	641	1,915
Deduct: Total compensation expense determined under the fair value based method for all stock awards, net of related tax effects	(3,249)	(5,294)
Pro forma net earnings	\$ 45,599	\$ 123,513
Earnings per share:		
Basic as reported	\$ 0.23	\$ 0.54
Basic pro forma	\$ 0.21	\$ 0.51
Diluted as reported	\$ 0.22	\$ 0.53
Diluted pro forma	\$ 0.20	\$ 0.51

Upon approval of the 2003 Plan, the *Mylan Laboratories Inc. 1997 Incentive Stock Option Plan* (the 1997 Plan) was frozen, and no further grants of stock options will be made under that plan. However, there are stock options

outstanding from the 1997 Plan, expired plans and other plans assumed through acquisitions.

Table of Contents**MYLAN LABORATORIES INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)**

The following table summarizes stock option activity:

	Number of Shares Under Option	Weighted Average Exercise Price per Share	Average Remaining Contractual Term	Aggregate Intrinsic Value (In thousands)
Outstanding at March 31, 2006	21,358,670	\$ 15.16		
Options granted	642,400	21.82		
Options exercised	(2,981,597)	12.25		
Options forfeited	(629,847)	17.19		
Outstanding at December 31, 2006	18,389,626	\$ 15.80	6.24	\$ 78,788
Vested and expected to vest at December 31, 2006	18,107,458	\$ 15.76	6.20	\$ 78,263
Options exercisable at December 31, 2006	11,847,761	\$ 14.30	5.33	\$ 68,010

A summary of the status of the Company's nonvested restricted stock and restricted stock unit awards is presented below:

Restricted Stock Awards	Number of Restricted Stock Awards	Weighted Average Grant-Date Fair Value
Nonvested at March 31, 2006	507,962	\$ 24.69
Granted	199,161	23.27
Released	(472,500)	24.85
Forfeited		
Nonvested at December 31, 2006	234,623	\$ 23.12

Of the 199,161 awards granted in fiscal 2007, approximately 135,000 are performance based. The remaining awards vest ratably over three years.

As of December 31, 2006, the Company had \$22,100 of total unrecognized compensation expense, net of estimated forfeitures, related to all of its stock-based awards, which will be recognized over the remaining weighted average period of 1.4 years. The total intrinsic value of options exercised during the three and nine month periods ended December 31, 2006 was \$8,120 and \$22,090. The total fair value of all options which vested during the three and nine month periods ended December 31, 2006, was \$375 and \$33,778.

As a result of the adoption of SFAS 123R, the Company recognized stock-based compensation expense of \$4,384 and \$17,217 for the three and nine months ended December 31, 2006. The after tax impact of recognizing the compensation expense related to SFAS 123R on basic and diluted earnings per share for the three and nine months ended December 31, 2006, was \$0.01 and \$0.05.

With respect to options granted under the Company's stock-based compensation plan, the fair value of each option grant was estimated at the date of grant using the Black-Scholes option pricing model. Black-Scholes utilizes assumptions related to volatility, the risk-free interest rate, the dividend yield and employee exercise behavior. Expected volatilities utilized in the model are based mainly on the historical volatility of the Company's stock price and other factors. The risk-free interest rate is derived from the U.S. Treasury yield curve in effect at the time of grant. The model incorporates exercise and post-vesting forfeiture assumptions based on an analysis of historical

Table of Contents**MYLAN LABORATORIES INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)**

data. The expected lives of the grants are derived from historical and other factors. The assumptions used are as follows:

Period Ended December 31,	Three Months 2006	Nine Months 2006
Volatility	33.0%	35.0%
Risk-free interest rate	4.5%	4.8%
Dividend yield	1.2%	1.1%
Expected term of options (in years)	4.7	4.3
Forfeiture rate	3.0%	3.0%
Weighted average grant date fair value per option	\$ 6.44	\$ 6.94

6. Restructuring

On June 14, 2005, the Company announced that it was closing its branded subsidiary, Mylan Bertek Pharmaceuticals Inc. (Mylan Bertek), and transferring the responsibility for marketing Mylan Bertek's products to other Mylan subsidiaries. In conjunction with this restructuring, the Company incurred restructuring charges of \$19,727, pre-tax, during the nine months ended December 31, 2005. Of this, \$1,000 was included in research and development expense, with the remainder in selling, general and administrative expense. As of March 31, 2006, the Company's restructuring was complete.

7. Balance Sheet Components

Selected balance sheet components consist of the following:

	December 31, 2006	March 31, 2006
	(In thousands)

	\$ 185,834	\$ 158,487

Table of Contents**MYLAN LABORATORIES INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****8. Earnings per Common Share**

Basic earnings per common share is computed by dividing net earnings by the weighted average number of common shares outstanding during the period. Diluted earnings per common share is computed by dividing net earnings by the weighted average number of common shares outstanding during the period adjusted for the dilutive effect of stock options and restricted stock outstanding. The effect of dilutive stock options and restricted stock on the weighted average number of common shares outstanding was 3,687,000 and 5,354,000 for the three months ended December 31, 2006 and 2005, and 4,200,000 and 4,463,000 for the nine months ended December 31, 2006 and 2005.

Options to purchase 1,813,000 and 455,000 shares of common stock were outstanding as of December 31, 2006 and 2005, but were not included in the computation of diluted earnings per share for the three months then ended because to do so would have been antidilutive.

9. Intangible Assets

Intangible assets consist of the following components:

	Weighted Average Life (Years)	Original Cost	Accumulated Amortization	Net Book Value
		(In thousands)		
December 31, 2006				
Amortized intangible assets:				
Patents and technologies	20	\$ 118,935	\$ 59,474	\$ 59,461
Product rights and licenses	12	102,006	75,904	26,102
Other	20	14,267	7,784	6,483
		\$ 235,208	\$ 143,162	92,046
Intangible assets no longer subject to amortization:				
Trademarks				783
				\$ 92,829
March 31, 2006				
Amortized intangible assets:				
Patents and technologies	20	\$ 118,935	\$ 54,836	\$ 64,099
Product rights and licenses	12	111,135	77,444	33,691
Other	20	14,267	7,245	7,022
		\$ 244,337	\$ 139,525	104,812

Intangible assets no longer subject to amortization:
Trademarks

783

\$ 105,595

Amortization expense, for the nine months ended December, 2006, and 2005, was \$10,028 and \$11,049 and is expected to be \$14,407, \$13,637, \$13,460, \$12,411 and \$11,259 for fiscal years 2007 through 2011, respectively. These figures do not include any incremental amortization related to the Matrix acquisition.

Table of Contents**MYLAN LABORATORIES INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****10. Long-Term Debt**

A summary of long-term debt is as follows:

	December 31, 2006	March 31, 2006
	(In thousands)	
Senior Notes(A)	\$ 500,000	\$ 500,000
Credit Facilities(B)	187,000	187,938
	687,000	687,938
Less: Current portion		2,750
Total long-term debt	\$ 687,000	\$ 685,188

(A) On July 21, 2005, the Company issued \$500,000 in Senior Notes, which consisted of \$150,000 of Senior Notes due August 15, 2010, and bearing interest at 5³/₄% per annum (the 2010 Restricted Notes) and \$350,000 of Senior Notes due August 15, 2015, and bearing interest at 6³/₈% per annum (the 2015 Restricted Notes , and collectively the Restricted Notes). The Restricted Notes were exchanged on January 14, 2006, in accordance with a registration rights agreement in a transaction consummated on January 19, 2006. The form and terms of the registered notes (the Notes) are identical in all material respects to the original notes.

Prior to maturity, the Company may, under certain circumstances, redeem the Notes in whole or in part at prices specified in the bond indenture governing the Notes. Upon a change of control (as defined in the indenture governing the Notes) of the Company, each holder of the Notes may require the Company to purchase all or a portion of such holder's Notes at 101% of the principal amount of such Notes, plus accrued and unpaid interest.

The Notes are senior unsecured obligations of the Company and rank junior to all of the Company's secured obligations. The Notes are guaranteed jointly and severally on a full and unconditional senior unsecured basis by all of the Company's wholly owned domestic subsidiaries except a captive insurance company, which is considered to be a minor subsidiary. Also, the assets and operations of Mylan Laboratories Inc. (Mylan Labs), the parent company, are not material, and, as such, condensed consolidating financial information for the parent and subsidiaries is not provided.

The Notes indenture contains covenants that, among other things, limit the ability of the Company to (a) incur additional secured indebtedness, (b) make investments or other restricted payments, (c) pay dividends on, redeem or repurchase the Company's capital stock, (d) engage in sale-leaseback transactions and (e) consolidate, merge or transfer all or substantially all of its assets. Certain of the covenants contained in the indenture will no longer be applicable or will be less restrictive if the Company achieves investment grade ratings as outlined in the indenture.

(B) On July 21, 2005, the Company entered into a \$500,000 senior secured credit facility (the "Credit Facility"). The Credit Facility consisted of a \$225,000 five-year revolving credit facility, which the Company intended to use for working capital and general corporate purposes, and a \$275,000 five-year term loan (the "Term Loan").

On July 24, 2006, the Company completed the refinancing of its existing Credit Facility by entering into a credit agreement for a new five-year \$700,000 senior unsecured revolving credit facility (the "New Facility"). At the Company's discretion, the New Facility can be expanded to \$1,000,000. Borrowings totaling \$187,000 were made under the New Facility and, along with existing cash, were used to repay the Term Loan. At December 31, 2006 these borrowings bear interest at a rate equal to LIBOR plus 0.50% per annum, which equates to 5.88%. The spread over LIBOR for these borrowings will subsequently be adjusted based upon the Company's total leverage ratio as discussed below.

At the Company's option, additional loans under the New Facility will bear interest at either a rate equal to LIBOR plus an applicable margin of 0.50% or at a base rate, which is defined as the higher of the rate announced

Table of Contents**MYLAN LABORATORIES INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)**

publicly by the administrative agent, from time to time, as its prime rate or 0.5% above the federal funds rate. In the case of the applicable margin for advances based on LIBOR, the applicable margin may increase or decrease, within a range from 0.40% to 0.70%, based on the Company's total leverage ratio. In addition, the Company is required to pay a facility fee on average daily amount of the commitments (whether used or unused) of the New Facility at a rate, which ranges from 0.10% to 0.175%, based on the Company's total leverage ratio. Subsequent to December 31, 2006, the Company borrowed an additional \$263,000 under the New Facility in order to finance the acquisition of Matrix (see Note 4). The remaining unused portion of the New Facility of approximately \$513,000 is available for working capital and general corporate purposes, including acquisitions.

The Company's obligations under the New Facility are guaranteed on a senior unsecured basis by all of the Company's direct and indirect domestic subsidiaries, except a captive insurance company.

The New Facility includes covenants that (a) require the Company to maintain a minimum interest coverage ratio and a maximum total leverage ratio, (b) place limitations on the Company's subsidiaries' ability to incur debt, (c) place limitations on the Company's and the Company's subsidiaries' ability to grant liens, carry out mergers, consolidations and sales of all or substantially all of its assets and (d) place limitations on the Company's and the Company's subsidiaries' ability to pay dividends or make other restricted payments. The New Facility contains customary events of default, including nonpayment, misrepresentation, breach of covenants and bankruptcy.

All financing fees associated with the Company's borrowings are being amortized over the life of the related debt. The total unamortized amounts of \$12,457 and \$12,813 are included in other assets in the Condensed Consolidated Balance Sheets at December 31, 2006 and March 31, 2006.

At December 31, 2006, and March 31, 2006, the carrying value of the Company's long-term debt approximated fair value.

Principal maturities of the Notes and the New Facility at December 31, 2006 are as follows:

	(In thousands)
Fiscal	
2008	\$
2009	
2010	
2011	150,000
2012	187,000
Thereafter	350,000
	\$ 687,000

Table of Contents**MYLAN LABORATORIES INC. AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****11. Comprehensive Earnings**

Comprehensive earnings consist of the following:

Period Ended December 31,	Three Months		Nine Months	
	2006	2005	2006	2005
	(In thousands)			
Net earnings	\$ 135,445	\$ 48,207	\$ 288,573	\$ 126,892
Other comprehensive earnings, net of tax:				
Net unrealized gain (loss) on marketable securities	69	(807)	(848)	1,588
Reclassification for (gains) losses included in net earnings	(95)	40	636	148
	(26)	(767)	(212)	1,736
Comprehensive earnings	\$ 135,419	\$ 47,440	\$ 288,361	\$ 128,628

Accumulated other comprehensive earnings, as reflected on the balance sheet, is comprised solely of the net unrealized gain on marketable securities, net of deferred income taxes.

12. Common Stock

As of December 31, 2006, and March 31, 2006, there were 600,000,000 shares of common stock authorized with 312,127,237 and 309,150,251 shares issued. Treasury shares held as of December 31, 2006 and March 31, 2006 were 99,028,399, and 98,971,431.

On June 14, 2005, the Company announced a \$1,250,000 share buyback, comprised of a modified Dutch Auction self-tender for up to \$1,000,000 and a \$250,000 follow-on share repurchase program. The Dutch Auction self-tender closed on July 21, 2005 at which time the Company announced that it accepted for payment an aggregate of 51,282,051 shares of its common stock at a purchase price of \$19.50 per share. The follow-on repurchase was completed during fiscal 2006 through the purchase of 12,595,200 shares for approximately \$250,000 on the open market.

13. Contingencies***Legal Proceedings***

While it is not possible to determine with any degree of certainty the ultimate outcome of the following legal proceedings, the Company believes that it has meritorious defenses with respect to the claims asserted against it and intends to vigorously defend its position. An adverse outcome in any of these proceedings could have a material adverse effect on the Company's financial position and results of operations.

Omeprazole

In fiscal 2001, Mylan Pharmaceuticals Inc. (MPI), a wholly-owned subsidiary of Mylan Labs, filed an Abbreviated New Drug Application (ANDA) seeking approval from the FDA to manufacture, market and sell omeprazole delayed-release capsules and made Paragraph IV certifications to several patents owned by AstraZeneca PLC (AstraZeneca) that were listed in the FDA's Orange Book. On September 8, 2000, AstraZeneca filed suit against MPI and Mylan Labs in the U.S. District Court for the Southern District of New York alleging infringement of several of AstraZeneca's patents. On May 29, 2003, the FDA approved MPI's ANDA for the 10 mg and 20 mg strengths of omeprazole delayed-release capsules, and, on August 4, 2003, Mylan Labs announced that MPI had commenced the sale of omeprazole 10 mg and 20 mg delayed-release capsules. AstraZeneca then amended the pending lawsuit to assert claims against Mylan Labs and MPI and filed a separate lawsuit against

Table of Contents

MYLAN LABORATORIES INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements (Continued)

MPI's supplier, Esteve Quimica S.A. (Esteve), for unspecified money damages and a finding of willful infringement, which could result in treble damages, injunctive relief, attorneys' fees, costs of litigation and such further relief as the court deems just and proper. MPI has certain indemnity obligations to Esteve in connection with this litigation. MPI, Esteve and the other generic manufacturers who are co-defendants in the case filed motions for summary judgment of non-infringement and patent invalidity. On January 12, 2006, those motions were denied, and a non-jury trial regarding liability only commenced on April 3, 2006, and was completed on June 14, 2006.

Lorazepam and Clorazepate

On June 1, 2005, a jury verdict was rendered against Mylan Labs and MPI in the U.S. District Court for the District of Columbia (D.C.) in the amount of approximately \$12,000, which has been accrued for by the Company. The jury found Mylan willfully violated Massachusetts, Minnesota and Illinois state antitrust laws in connection with API supply agreements entered into between the Company and its API supplier and broker for two drugs, lorazepam and clorazepate, in 1997, and subsequent price increases on these drugs in 1998. The case was brought by four health insurers who opted out of earlier class action settlements agreed to by the Company in 2001 and represents the last remaining claims relating to Mylan's 1998 price increases for lorazepam and clorazepate. In post-trial filings, the plaintiffs have requested that the verdict be trebled. Plaintiffs are also seeking an award of attorneys' fees, litigation costs and interest on the judgment in unspecified amounts. The Company filed a motion for judgment as a matter of law, a motion for a new trial, a motion to dismiss two of the insurers and a motion to reduce the verdict. On December 20, 2006, the Company's motion for judgment as a matter of law and motion for a new trial were denied. A hearing on the pending post-trial motions is scheduled for February 28, 2007. The Company intends to appeal to the U.S. Court of Appeals for the D.C. Circuit.

Pricing and Medicaid Litigation

On June 26, 2003, MPI and UDL Laboratories Inc. (UDL), a subsidiary of Mylan Labs, received requests from the U.S. House of Representatives Energy and Commerce Committee (the Committee) seeking information about certain products sold by MPI and UDL in connection with the Committee's investigation into pharmaceutical reimbursement and rebates under Medicaid. MPI and UDL cooperated with this inquiry and provided information in response to the Committee's requests in 2003. Several states' attorneys general (AG) have also sent letters to MPI, UDL and Mylan Bertek, demanding that those companies retain documents relating to Medicaid reimbursement and rebate calculations pending the outcome of unspecified investigations by those AGs into such matters. In addition, in July 2004, Mylan Labs received subpoenas from the AGs of California and Florida in connection with civil investigations purportedly related to price reporting and marketing practices regarding various drugs. As noted below, both California and Florida subsequently filed suits against Mylan, and the Company believes any further requests for information and disclosures will be made as part of that litigation.

Beginning in September 2003, Mylan Labs, MPI and/or UDL, together with many other pharmaceutical companies, have been named in a series of civil lawsuits filed by state AGs and municipal bodies within the state of New York alleging generally that the defendants defrauded the state Medicaid systems by allegedly reporting Average Wholesale Prices (AWP) and/or Wholesale Acquisition Costs that exceeded the actual selling price of the defendants' prescription drugs. To date, Mylan Labs, MPI and/or UDL have been named as defendants in substantially similar civil lawsuits filed by the AGs of Alabama, California, Florida, Illinois, Kentucky, Massachusetts, Mississippi, Missouri, Hawaii, Alaska, South Carolina and Wisconsin and also by the city of New York and approximately 40 counties across New York State. Several of these cases have been transferred to the AWP multi-district litigation proceedings pending in

the U.S. District Court for the District of Massachusetts for pretrial proceedings. Others of these cases will likely be litigated in the state courts in which they were filed. Each of the cases seeks an unspecified amount in money damages, civil penalties and/or treble damages, counsel fees and costs, and injunctive relief. In each of these matters, with the exception of the California, Florida, Missouri, Alaska, South Carolina and Hawaii, AG actions and the actions brought by various counties in New York, excluding the actions

Table of Contents

MYLAN LABORATORIES INC. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements (Continued)

brought by Erie, Oswego and Schenectady counties, Mylan Labs, MPI and/or UDL have answered the respective complaints denying liability. Mylan Labs and its subsidiaries intend to defend each of these actions vigorously.

In addition by letter dated January 12, 2005, MPI was notified by the U.S. Department of Justice of an investigation concerning MPI's calculations of Medicaid drug rebates. To the best of MPI's information, the investigation is ongoing. MPI is collecting information requested by the government and is cooperating fully with the government's investigation.

Modafinil Antitrust Litigation and FTC Inquiry

Beginning in April 2006, Mylan Labs, along with four other drug manufacturers, has been named in a series of civil lawsuits filed in the Eastern District of Pennsylvania by a variety of plaintiffs purportedly representing direct and indirect purchasers of the drug modafinil and one action brought by Apotex, Inc., a manufacturer of generic drugs seeking approval to market a generic modafinil product. These actions allege violations of federal and state laws in connection with the defendants' settlement of patent litigation relating to modafinil. These actions are in their preliminary stages, and motions to dismiss each action are pending. Mylan Labs intends to defend each of these actions vigorously. In addition, by letter dated July 11, 2006, Mylan was notified by the U.S. Federal Trade Commission (FTC) of an investigation relating to the settlement of the modafinil patent litigation. In its letter, the FTC requested certain information from Mylan Labs, MPI and Mylan Technologies Inc. pertaining to the patent litigation and the settlement thereof. Mylan is cooperating with the government's investigation.

Other Litigation

The Company is involved in various other legal proceedings that are considered normal to its business. While it is not feasible to predict the ultimate outcome of such other proceedings, the Company believes that the ultimate outcome of such other proceedings will not have a material adverse effect on its financial position or results of operations. During the three and nine months ended December 31, 2006, the Company realized net gains of \$34,645 and \$46,154 related to the favorable settlement of various outstanding legal matters.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION**

The following discussion and analysis addresses material changes in the results of operations and financial condition of Mylan Laboratories Inc. and Subsidiaries (the Company, Mylan or we) for the periods presented. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements, the related Notes to Consolidated Financial Statements and Management's Discussion and Analysis of Results of Operations and Financial Condition included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2006, the unaudited interim Condensed Consolidated Financial Statements and related Notes included in Item 1 of this Report on Form 10-Q (Form 10-Q) and the Company's other SEC filings and public disclosures.

This Form 10-Q may contain forward-looking statements. These statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may include, without limitation, statements about the Company's market opportunities, strategies, competition and expected activities and expenditures, and at times may be identified by the use of words such as may, could, should, would, project, believe, anticipate, expect, plan, estimate, forecast, potential, intend, continue and various comparable words. Forward-looking statements inherently involve risks and uncertainties. Accordingly, actual results may differ materially from those expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, the risks described below under Risk Factors in Part II, Item 1A. The Company undertakes no obligation to update any forward-looking statements for revisions or changes after the date of this Form 10-Q.

Overview

Mylan's financial results for the three months ended December 31, 2006, included total revenues of \$401.8 million, net earnings of \$135.4 million and earnings per diluted share of \$0.63. Comparatively, the three months ended December 31, 2005, included total revenues of \$311.2 million, net earnings of \$48.2 million and earnings per diluted share of \$0.22. This represents an increase of 29% in total revenues, 181% in net earnings and 185% in earnings per diluted share when compared to the same prior year period. Included in earnings per diluted share for the third quarter of fiscal 2007 is stock-based compensation expense totaling \$0.01 per diluted share as a result of the Company's adoption of Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), *Share-Based Payment* (SFAS 123R), a gain on a foreign exchange forward contract of \$0.08 per diluted share and a net gain of \$0.11 per diluted share related to the favorable settlement of certain litigation. Included in diluted earnings per share in the third quarter of fiscal 2006 was \$0.03 per diluted share related to restructuring costs associated with the closure of Mylan's subsidiary, Mylan Bertek Pharmaceuticals Inc. (Mylan Bertek).

For the nine months ended December 31, 2006, Mylan reported total revenues of \$1.12 billion, net earnings of \$288.6 million and earnings per diluted share of \$1.34. For the first nine months of fiscal 2006, total revenues were \$932.6 million, net earnings were \$126.9 million and earnings per diluted share were \$0.53. This represents an increase of 21% in total revenues, 127% in net earnings and 153% in earnings per diluted share when compared to the prior period. Included in earnings per diluted share for the nine month period ended December 31, 2006 are stock-based compensation costs of \$0.05 per diluted share, as a result of the adoption of SFAS 123R, a net gain on a foreign exchange forward contract of \$0.05 per diluted share, and a net gain of \$0.14 per diluted share related to the favorable settlement of certain litigation. Included in the prior year results are \$0.03 per diluted share, with respect to a contingent legal liability related to previously-disclosed litigation in connection with the Company's lorazepam and clorazepate products, and \$0.05 per diluted share of restructuring costs. A more detailed discussion of the Company's financial results for the three and nine month periods ended December 31, 2006, can be found under the section titled

Results of Operations .

Significant developments which have occurred during the third quarter include:

Matrix Acquisition On August 28, 2006, Mylan announced that it agreed to acquire a controlling interest in Matrix Laboratories Limited (Matrix), a publicly traded Indian company, for 306 rupees per Matrix share. On December 21, 2006, in accordance with the terms of the transaction, Mylan completed an open offer in which it acquired approximately 20% of Matrix s shares outstanding for approximately

Table of Contents

\$210.6 million. On January 8, 2007, Mylan purchased approximately 51.5% of Matrix's shares outstanding pursuant to an agreement with certain selling shareholders for approximately \$545.6 million.

Mylan and Matrix on a combined basis have approximately 5,100 employees in 10 countries. Matrix provides Mylan with a significant presence in important emerging pharmaceutical markets, including India, China and Africa, as well as a European footprint and distribution network through Matrix's Docpharma subsidiary. This transaction combines Matrix's active pharmaceutical ingredient and drug development business with Mylan's expertise in finished dosage forms. The transaction also expands Mylan's high-barrier-to-entry product capabilities, particularly in the area of anti-virals.

The transaction was funded using Mylan's existing revolving credit facility and cash on hand. Approximately \$143.0 million of the funds received by two of the selling shareholders was used to purchase shares of Mylan common stock. A third selling shareholder also has agreed to invest \$25.0 million of his proceeds in Mylan common stock, in a private transaction anticipated to close in the fourth quarter of fiscal 2007, and, in accordance with his purchase agreement, has signed such right to one of his affiliates.

Oxybutynin On November 10, 2006, Mylan announced that the U.S. Food and Drug Administration (FDA) granted final approval for Mylan Pharmaceuticals Inc.'s Abbreviated New Drug Applications (ANDAs) for oxybutynin chloride extended-release tablets, 5 mg and 10 mg. Oxybutynin chloride ER tablets are the generic version of Alza Corporation's Ditropan X[®] Extended-release Tablets. Ditropan XL had U.S. sales of approximately \$380 million during the 12-month period ended June 30, 2006, with more than 82% of the volume in the 5 mg and 10 mg strengths, according to IMS. Mylan was the first generic drug company to file ANDAs with the FDA for 5 mg and 10 mg Ditropan XL, and as such, has 180 days of market exclusivity for those strengths. In the third fiscal quarter of 2007, Mylan launched its 5 mg and 10 mg oxybutynin products upon receiving approval and also launched a 15 mg strength under our agreement with Ortho-McNeil Pharmaceuticals.

Results of Operations

Quarter Ended December 31, 2006, Compared to Quarter Ended December 31, 2005

Total Revenues and Gross Profit

Total revenues for the current quarter increased by 29% or \$90.5 million to \$401.8 million from \$311.2 million in the same prior year period. The increase was driven by increased volume, relatively stable pricing and revenue from new products. Fentanyl, which continued to be the only ANDA-approved, AB-rated generic alternative to Duragesic[®] on the market, accounted for approximately 16% of net revenues. In total, doses shipped during the third quarter increased by 10% from the same prior year period to approximately 3.4 billion.

Products launched subsequent to January 1, 2006 contributed net revenues of \$66.2 million, primarily all of which was due to Mylan's launch of oxybutynin in November 2006.

Consolidated gross profit increased 44% or \$68.7 million to \$224.5 million and gross margins increased to 55.9% from 50.1%. A significant portion of gross profit was generated by fentanyl and new products which contribute margins well in excess of most other products in our portfolio. Absent any changes to market dynamics or significant new competition for fentanyl, the Company expects the product to continue to be a significant contributor to sales and gross profit. As is the case in the generic industry, the entrance into the market of other generic competition generally has a negative impact on the volume and pricing of the affected products.

Operating Expenses

Research and development (R&D) expenses for the current quarter decreased 22% or \$6.5 million to \$22.9 million from \$29.4 million in the same prior year period. This decrease was due primarily to a decline in the number of ongoing R&D studies, primarily those with respect to nebivolol, which was outlicensed in the fourth quarter of fiscal 2006.

Selling, general and administrative (SG&A) expenses increased by 10% or \$4.6 million to \$52.6 million from \$48.0 million. This increase is primarily a result of stock-based compensation expense recognized as the result

Table of Contents

of the Company's adoption of SFAS 123R in the first quarter of fiscal 2007 and increased payroll and payroll related expenses.

Litigation, net

During the third quarter of fiscal 2007, the Company recorded a net gain of \$34.6 million as a result of favorable settlements with respect to certain outstanding litigation.

Interest Expense

Interest expense related to the Company's outstanding borrowings was \$10.5 million in the third quarter of fiscal 2007, which is consistent with the third quarter of fiscal 2006. Included in interest expense is a commitment fee on the revolving credit facility and the amortization of debt issuance costs. Interest expense will increase in future periods as a result of additional borrowings under our revolving credit facility in connection with our Matrix transactions.

Other Income, net

Other income was \$32.4 million in the third quarter of fiscal 2007 compared to \$4.5 million of income in the same prior year period. The change is primarily the result of a gain of \$25.2 million on a foreign currency forward contract related to the acquisition of a controlling interest in Matrix.

Income Tax Expense

The Company's effective tax rate increased in the current quarter to 34.1% from 33.0% in the same period of the prior year. This increase is due to higher pre-tax income, which results in higher state taxes, the expiration of the Section 936 credit and lower research and development credits when compared to fiscal 2006.

Nine Months Ended December 31, 2006, Compared to Nine Months Ended December 31, 2005

Total Revenues and Gross Profit

Total revenues for the nine months ended December 31, 2006 increased by 21% or \$191.9 million to \$1.12 billion from \$932.6 million in the same prior year period. Net revenues were \$1.10 billion, an increase of \$179.0 million over the same prior year period.

New products contributed net revenues of \$68.2 million, primarily all of which was due to oxybutynin. Fentanyl continues to be a main driver behind both increased volume and relatively stable pricing, and accounted for approximately 20% of net revenues through the first nine months of fiscal 2007.

Exclusive of fentanyl and new products, the remaining product portfolio experienced both overall stable pricing and increased volume. In total, doses shipped for the nine month period ended December 31, 2006 were approximately 10.3 billion, an increase of 10% over the same period of the prior year.

Other revenue for the nine month period ended December 31, 2006, increased by \$12.9 million from \$8.4 million in the first nine months of fiscal 2006 to \$21.3 million for the same period in the current fiscal year. This increase was primarily related to the recognition of amounts that had been deferred with respect to Apokyn[®], which was sold in the prior year, with the remainder related to other business development activities.

Consolidated gross profit increased 30% or \$142.0 million to \$608.8 million from \$466.9 million, and gross margins increased to 54.1% from 50.1%. A significant portion of gross profit was comprised of fentanyl which contributes margins well in excess of most other products in our portfolio. Absent any changes to market dynamics or significant new competition for fentanyl, the Company expects the product to continue to be a significant contributor to sales and gross profit. New products also contributed substantially to our gross profit for the quarter. As is the case in the generic industry, the entrance into the market of other generic competition generally has a negative impact on the volume and pricing of the affected products.

Table of Contents

Operating Expenses

R&D expenses for the nine months ended December 31, 2006 decreased 19% or \$16.0 million to \$66.8 million from \$82.8 million in the same prior year period. This decrease was due primarily to a decline in the number of ongoing R&D studies, including primarily those with respect to nebigolol, which was outlicensed in the prior year.

SG&A expenses decreased by 13% or \$23.3 million to \$152.8 million from \$176.1 million. This decrease was primarily the result of a restructuring charge of \$18.7 million recorded in the prior year with respect to the closure of Mylan Bertek, and the resulting cost savings. Partially offsetting these decreases were \$9.0 million of compensation expense related to the expensing of stock-based compensation in the current year.

Litigation, net

The nine months ended December 31, 2006, included net favorable settlements of litigation totaling \$46.2 million. In the same period of the prior year, there was a charge recorded in the amount of \$12.0 million for a contingent liability with respect to the Company's previously disclosed lorazepam and clorazepate product litigation.

Interest Expense

Interest expense for the nine months ended December 31, 2006 totaled \$31.3 million compared to \$19.6 million for the same period of the prior year. The Company has had its financing outstanding for the entire nine month period of fiscal 2007, while it was only completed during the second quarter of fiscal 2006. Included in interest expense is a commitment fee on the revolving credit facility and the amortization of debt issuance costs.

Other Income, net

Other income, net was \$39.8 million in the first nine months of fiscal 2007 compared to \$14.4 million in the same prior year period. The change is primarily the result of a \$17.5 million net gain on a foreign currency forward contract related to the acquisition of Matrix. Additionally, during fiscal 2007 the Company received a cash payment of \$5.5 million from Somerset Pharmaceuticals, Inc., in which Mylan owns a 50% equity interest and accounts for this investment using the equity method of accounting. The amount in excess of the carrying value of our investment in Somerset, approximately \$5.0 million, was recorded as equity income.

Income Tax Expense

The Company's effective tax rate increased for the first nine months of fiscal 2007 to 35.0% from 33.4% in the same period of the prior year. This increase is due to higher pre-tax income, which results in higher state taxes, the expiration of the Section 936 credit and lower research and development credits when compared to fiscal 2006.

Liquidity and Capital Resources

The Company's primary source of liquidity continues to be cash flows from operating activities, which were \$251.0 million for the nine months ended December 31, 2006. Working capital as of December 31, 2006, was \$989.4 million compared to \$926.7 million at March 31, 2006. This increase is primarily the result of increased accounts receivable, higher inventories, increased other assets and lower accounts payable, partially offset by higher income taxes payable and other liabilities.

The increase in accounts receivable is due to the timing of cash collections and sales of oxybutynin which was launched in November 2006. Additionally, included in accounts receivable, net, at December 31, 2006, is a \$35.0 million receivable with respect to the favorable settlement of a lawsuit. This amount was collected in January 2007.

The increase in inventory is due to aligning production to forecasted volumes, while the changes in accounts payable and income taxes payable is due primarily to the timing of cash payments. Other current assets at December 31, 2006, includes approximately \$14.0 million of capitalized costs related to the Matrix acquisition and

Table of Contents

a \$14.0 million asset with respect to the fair value of a foreign currency forward contract. The increase in other current liabilities is primarily the result of higher payroll and payroll related costs.

Cash used in investing activities for the nine months ended December 31, 2006, was \$106.5 million. Of the Company's \$2.2 billion of total assets at December 31, 2006, \$466.0 million was held in cash, cash equivalents and marketable securities. Investments in marketable securities consist of a variety of high credit quality debt securities, including U.S. government, state and local government and corporate obligations. These investments are highly liquid and available for working capital needs. As these instruments mature, the funds are generally reinvested in instruments with similar characteristics.

Capital expenditures during the nine months ended December 31, 2006, were \$81.8 million. These expenditures were incurred primarily with respect to the Company's previously announced planned expansions and the implementation of an integrated ERP system. The Company expects capital expenditures for fiscal 2007 to approximate \$160.0 to \$170.0 million.

Also included in investing activities was \$210.6 million paid to acquire an interest of approximately 20% in Matrix. Upon the closing of the purchase of this 20%, Mylan received a cash payment of \$3.4 million as the result of a foreign currency forward contract that had been entered into with respect to the Matrix transaction. Subsequent to December 31, 2006, \$545.6 million was paid to acquire an additional 51.5% of Matrix. At this time, Mylan received a cash payment of \$12.8 million, also related to the foreign exchange forward contract. As a result, the net cash paid by Mylan for Matrix was approximately \$740.0 million. Additionally, subsequent to December 31, 2006, certain of Matrix's Selling Shareholders used \$143.0 million of the funds received by them to purchase shares of Mylan Laboratories Inc. common stock from the Company.

Cash used in financing activities was \$7.7 million for the nine months ended December 31, 2006. As part of the refinancing of the Company's debt completed in July 2006, \$187.0 million was borrowed under the new credit facility and used along with existing cash to repay an existing term loan. Subsequent to December 31, 2006, Mylan borrowed \$263.0 million under its credit facility in order to finance a portion of the Matrix transaction discussed above.

Also included in cash flows from financing activities are proceeds of \$36.4 million from the exercise of stock options and cash dividends paid of \$38.0 million. In the first quarter of fiscal 2006, the Board voted to double the amount of the quarterly dividend to 6.0 cents per share from 3.0 cents per share, effective with the dividend paid for the first quarter of fiscal 2006.

The Company is involved in various legal proceedings that are considered normal to its business (see Note 13 to Condensed Consolidated Financial Statements). While it is not feasible to predict the outcome of such proceedings, an adverse outcome in any of these proceedings could materially affect the Company's financial position and results of operations.

The Company is actively pursuing, and is currently involved in, joint projects related to the development, distribution and marketing of both generic and brand products. Many of these arrangements provide for payments by the Company upon the attainment of specified milestones. While these arrangements help to reduce the financial risk for unsuccessful projects, fulfillment of specified milestones or the occurrence of other obligations may result in fluctuations in cash flows.

The Company is continuously evaluating the potential acquisition of products, as well as companies, as a strategic part of its future growth. Consequently, the Company may utilize current cash reserves or incur additional indebtedness to finance any such acquisitions, which could impact future liquidity.

Recent Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an Interpretation of FASB Statement 109* (FIN 48), which clarifies the accounting for uncertain tax positions. This Interpretation provides that the tax effects from an uncertain tax position be recognized in the Company's financial statements, only if the position is more likely than not of being sustained upon audit, based on the technical merits of the position. The provisions of FIN 48 will be effective for

Table of Contents

Mylan as of the beginning of fiscal 2008. The Company is currently evaluating the impact of adopting FIN 48 on its consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is subject to market risk from changes in the market values of investments in its marketable debt securities, interest rate risk from changes in interest rates associated with its long term debt and foreign currency exchange rate risk as a result of its acquisition of the outstanding shares of Matrix. In addition to marketable debt and equity securities, investments are made in overnight deposits, money market funds and marketable securities with maturities of less than three months. These instruments are classified as cash equivalents for financial reporting purposes and have minimal or no interest rate risk due to their short-term nature.

The following table summarizes the investments in marketable debt and equity securities which subject the Company to market risk at December 31, 2006 and March 31, 2006:

	December 31, 2006	March 31, 2006
	(In thousands)	
Debt securities	\$ 175,264	\$ 362,458
Equity securities	3,861	5,545
	\$ 179,125	\$ 368,003

Marketable Debt Securities

The primary objectives for the marketable debt securities investment portfolio are liquidity and safety of principal. Investments are made to achieve the highest rate of return while retaining principal. Our investment policy limits investments to certain types of instruments issued by institutions and government agencies with investment-grade credit ratings. At December 31, 2006, the Company had invested \$175.3 million in marketable debt securities, of which \$46.2 million will mature within one year and \$129.1 million will mature after one year. The short duration to maturity creates minimal exposure to fluctuations in market values for investments that will mature within one year. However, a significant change in current interest rates could affect the market value of the remaining \$129.1 million of marketable debt securities that mature after one year. A 5% change in the market value of the marketable debt securities that mature after one year would result in a \$6.5 million change in marketable debt securities.

Long-Term Debt

On July 21, 2005, the Company issued \$500.0 million in Senior Notes with fixed interest rates (which were exchanged for registered notes, as described previously) and, on July 24, 2006, entered into a five-year \$700.0 million senior unsecured revolving credit facility (the 2006 Credit Facility). Loans under the 2006 Credit Facility bear interest at a rate equal to either LIBOR plus an applicable margin of 0.50% or at a base rate, which is defined as the higher of the rate announced publicly by the administrative agent, from time to time, as its prime rate or 0.5% above the federal funds rate. In the case of the applicable margin for advances based on LIBOR, the applicable margin may increase or decrease, within a range from 0.40% to 0.70%, based on the Company's total leverage ratio. In addition, the Company is required to pay a facility fee on average daily amount of the commitments (whether used or unused) of the Credit Facility at a rate, which ranges from 0.10% to 0.175%, based on the Company's total leverage ratio. On July 24, 2006,

the Company borrowed \$187.0 million under the 2006 Credit Facility and used the proceeds to repay the aggregate principal amount outstanding under the Company's previous credit agreement, dated as of July 21, 2005, among the Company, the lenders and other financial institutions party thereto and Merrill Lynch Capital Corporation, as administrative agent. The interest rate on the 2006 Credit Facility at December 31, 2006 was 5.88%.

Generally, the fair market value of fixed interest rate debt will decrease as interest rates rise and increase as interest rates fall. At December 31, 2006, and March 31, 2006, the fair value of the Company's long-term debt approximated its carrying value. A 10% change in interest rates on the 2006 Credit Facility would result in a change in interest expense of approximately \$1.1 million per year.

Table of Contents

Foreign Exchange Forward Contract

In conjunction with the acquisition of a controlling interest in Matrix, on August 26, 2006, the Company entered into a foreign exchange forward contract to purchase Indian rupees with U.S. dollars in order to mitigate the risk of foreign currency exposure related to the transaction. The portion of this foreign exchange forward contract associated with the open offer was settled during the third quarter, and the remainder was settled on January 8, 2007, concurrent with the closing of the remaining portion of the transaction. The value of the foreign exchange forward contract fluctuated depending on the value of the U.S. dollar compared to the Indian rupee. On December 31, 2006, the market value of our foreign exchange forward contract was \$14.0 million. On January 8, 2007, this forward contract was closed.

ITEM 4. CONTROLS AND PROCEDURES

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of December 31, 2006. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective. No change in the Company's internal control over financial reporting occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a description of the material pending legal proceedings to which the Company is a party, please see our Annual Report on Form 10-K for the year ended March 31, 2006. During the quarter ended December 31, 2006, there were no new material legal proceedings or material developments with respect to pending proceedings other than as described below. While it is not possible to determine with any degree of certainty the ultimate outcome of the following legal proceedings, the Company believes that it has meritorious defenses with respect to the claims asserted against it and intends to vigorously defend its position. An adverse outcome in any of these proceedings could have a material adverse effect on the Company's financial position and results of operations.

Omeprazole

In fiscal 2001, Mylan Pharmaceuticals Inc. (MPI), a wholly-owned subsidiary of Mylan Labs, filed an Abbreviated New Drug Application (ANDA) seeking approval from the FDA to manufacture, market and sell omeprazole delayed-release capsules and made Paragraph IV certifications to several patents owned by AstraZeneca PLC (AstraZeneca) that were listed in the FDA's Orange Book. On September 8, 2000, AstraZeneca filed suit against MPI and Mylan Labs in the U.S. District Court for the Southern District of New York alleging infringement of several of AstraZeneca's patents. On May 29, 2003, the FDA approved MPI's ANDA for the 10 mg and 20 mg strengths of omeprazole delayed-release capsules, and, on August 4, 2003, Mylan Labs announced that MPI had commenced the sale of omeprazole 10 mg and 20 mg delayed-release capsules. AstraZeneca then amended the pending lawsuit to assert claims against Mylan Labs and MPI and filed a separate lawsuit against MPI's supplier, Esteve Quimica S.A. (Esteve), for unspecified money damages and a finding of willful infringement, which could result in treble damages, injunctive relief, attorneys' fees, costs of litigation and such further relief as the court deems just and proper. MPI has certain indemnity obligations to Esteve in connection with this litigation. MPI, Esteve and the other generic manufacturers who are co-defendants in the case filed motions for summary judgment of non-infringement and patent invalidity. On January 12, 2006, those motions were denied, and a non-jury trial regarding liability only commenced

on April 3, 2006, and was completed on June 14, 2006.

Table of Contents

Lorazepam and Clorazepate

On June 1, 2005, a jury verdict was rendered against Mylan Labs and MPI in the U.S. District Court for the District of Columbia (D.C.) in the amount of approximately \$12.0 million which has been accrued for by the Company. The jury found Mylan willfully violated Massachusetts, Minnesota and Illinois state antitrust laws in connection with API supply agreements entered into between the Company and its API supplier and broker for two drugs, lorazepam and clorazepate, in 1997, and subsequent price increases on these drugs in 1998. The case was brought by four health insurers who opted out of earlier class action settlements agreed to by the Company in 2001 and represents the last remaining claims relating to Mylan s 1998 price increases for lorazepam and clorazepate. In post-trial filings, the plaintiffs have requested that the verdict be trebled. Plaintiffs are also seeking an award of attorneys fees, litigation costs and interest on the judgment in unspecified amounts. The Company filed a motion for judgment as a matter of law, a motion for a new trial, a motion to dismiss two of the insurers and a motion to reduce the verdict. On December 20, 2006, the Company s motion for judgment as a matter of law and motion for a new trial were denied. A hearing on the pending post-trial motions is scheduled for February 28, 2007. The Company intends to appeal to the U.S. Court of Appeals for the D.C. Circuit.

Pricing and Medicaid Litigation

On June 26, 2003, MPI and UDL Laboratories Inc. (UDL), a subsidiary of Mylan Labs, received requests from the U.S. House of Representatives Energy and Commerce Committee (the Committee) seeking information about certain products sold by MPI and UDL in connection with the Committee s investigation into pharmaceutical reimbursement and rebates under Medicaid. MPI and UDL cooperated with this inquiry and provided information in response to the Committee s requests in 2003. Several states attorneys general (AG) have also sent letters to MPI, UDL and Mylan Bertek, demanding that those companies retain documents relating to Medicaid reimbursement and rebate calculations pending the outcome of unspecified investigations by those AGs into such matters. In addition, in July 2004, Mylan Labs received subpoenas from the AGs of California and Florida in connection with civil investigations purportedly related to price reporting and marketing practices regarding various drugs. As noted below, both California and Florida subsequently filed suits against Mylan, and the Company believes any further requests for information and disclosures will be made as part of that litigation.

Beginning in September 2003, Mylan Labs, MPI and/or UDL, together with many other pharmaceutical companies, have been named in a series of civil lawsuits filed by state AGs and municipal bodies within the state of New York alleging generally that the defendants defrauded the state Medicaid systems by allegedly reporting Average Wholesale Prices (AWP) and/or Wholesale Acquisition Costs that exceeded the actual selling price of the defendants prescription drugs. To date, Mylan Labs, MPI and/or UDL have been named as defendants in substantially similar civil lawsuits filed by the AGs of Alabama, California, Florida, Illinois, Kentucky, Massachusetts, Mississippi, Missouri, Hawaii, Alaska, South Carolina and Wisconsin and also by the city of New York and approximately 40 counties across New York State. Several of these cases have been transferred to the AWP multi-district litigation proceedings pending in the U.S. District Court for the District of Massachusetts for pretrial proceedings. Others of these cases will likely be litigated in the state courts in which they were filed. Each of the cases seeks an unspecified amount in money damages, civil penalties and/or treble damages, counsel fees and costs, and injunctive relief. In each of these matters, with the exception of the California, Florida, Missouri, Alaska, South Carolina and Hawaii, AG actions and the actions brought by various counties in New York, excluding the actions brought by Erie, Oswego and Schenectady counties, Mylan Labs, MPI and/or UDL have answered the respective complaints denying liability. Mylan Labs and its subsidiaries intend to defend each of these actions vigorously.

In addition by letter dated January 12, 2005, MPI was notified by the U.S. Department of Justice of an investigation concerning MPI s calculations of Medicaid drug rebates. To the best of MPI s information, the investigation is ongoing.

MPI is collecting information requested by the government and is cooperating fully with the government's investigation.

Table of Contents

Modafinil Antitrust Litigation and FTC Inquiry

Beginning in April 2006, Mylan Labs, along with four other drug manufacturers, has been named in a series of civil lawsuits filed in the Eastern District of Pennsylvania by a variety of plaintiffs purportedly representing direct and indirect purchasers of the drug modafinil and one action brought by Apotex, Inc., a manufacturer of generic drugs seeking approval to market a generic modafinil product. These actions allege violations of federal and state laws in connection with the defendants' settlement of patent litigation relating to modafinil. These actions are in their preliminary stages, and motions to dismiss each action are pending. Mylan Labs intends to defend each of these actions vigorously. In addition, by letter dated July 11, 2006, Mylan was notified by the U.S. Federal Trade Commission (FTC) of an investigation relating to the settlement of the modafinil patent litigation. In its letter, the FTC requested certain information from Mylan Labs, MPI and Mylan Technologies Inc. pertaining to the patent litigation and the settlement thereof. Mylan is cooperating with the government's investigation.

Other Litigation

The Company is involved in various other legal proceedings that are considered normal to its business. While it is not feasible to predict the ultimate outcome of such other proceedings, the Company believes that the ultimate outcome of such other proceedings will not have a material adverse effect on its financial position or results of operations. During the three and nine months ended December 31, 2006, the Company realized net gains of \$34.6 million and \$46.2 million related to the favorable settlement of various outstanding legal matters.

ITEM 1A. RISK FACTORS

The following risk factors could have a material adverse effect on our business, financial position or results of operations and could cause the market value of our common stock to decline. These risk factors may not include all of the important factors that could affect our business or our industry or that could cause our future financial results to differ materially from historic or expected results or cause the market price of our common stock to fluctuate or decline.

OUR FUTURE REVENUE GROWTH AND PROFITABILITY ARE DEPENDENT UPON OUR ABILITY TO DEVELOP AND/OR LICENSE, OR OTHERWISE ACQUIRE, AND INTRODUCE NEW PRODUCTS ON A TIMELY BASIS IN RELATION TO OUR COMPETITORS' PRODUCT INTRODUCTIONS. OUR FAILURE TO DO SO SUCCESSFULLY COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Our future revenues and profitability will depend, to a significant extent, upon our ability to successfully develop and/or license, or otherwise acquire and commercialize new generic and patent or statutorily protected (usually brand) pharmaceutical products in a timely manner. Product development is inherently risky, especially for new drugs for which safety and efficacy have not been established, and the market is not yet proven. Likewise, product licensing involves inherent risks including uncertainties due to matters that may affect the achievement of milestones, as well as the possibility of contractual disagreements with regard to terms such as license scope or termination rights. The development and commercialization process, particularly with regard to new drugs, also requires substantial time, effort and financial resources. We, or a partner, may not be successful in commercializing any of the products that we are developing or licensing (including, without limitation, nebivolol) on a timely basis, if at all, which could adversely affect our product introduction plans, financial position and results of operations and could cause the market value of our common stock to decline.

FDA approval is required before any prescription drug product, including generic drug products, can be marketed. The process of obtaining FDA approval to manufacture and market new and generic pharmaceutical products is rigorous, time-consuming, costly and largely unpredictable. We, or a partner, may be unable to obtain requisite FDA approvals on a timely basis for new generic or brand products that we may develop, license or otherwise acquire. Also, for products pending approval, we may obtain raw materials or produce batches of inventory to be used in efficacy and bioequivalence testing, as well as in anticipation of the product's launch. In the event that FDA approval is denied or delayed we could be exposed to the risk of this inventory becoming obsolete.

Table of Contents

The timing and cost of obtaining FDA approvals could adversely affect our product introduction plans, financial position and results of operations and could cause the market value of our common stock to decline.

The ANDA approval process often results in the FDA granting final approval to a number of ANDAs for a given product at the time a patent claim for a corresponding brand product or other market exclusivity expires. This often forces us to face immediate competition when we introduce a generic product into the market. Additionally, ANDA approvals often continue to be granted for a given product subsequent to the initial launch of the generic product. These circumstances generally result in significantly lower prices, as well as reduced margins, for generic products compared to brand products. New generic market entrants generally cause continued price and margin erosion over the generic product life cycle.

The Waxman-Hatch Act provides for a period of 180 days of generic marketing exclusivity for each ANDA applicant that is first to file an ANDA containing a certification of invalidity, non-infringement or unenforceability related to a patent listed with respect to a reference drug product, commonly referred to as a Paragraph IV certification. During this exclusivity period, which under certain circumstances may be required to be shared with other applicable ANDA sponsors with Paragraph IV certifications, the FDA cannot grant final approval to other ANDA sponsors holding applications for the same generic equivalent. If an ANDA containing a Paragraph IV certification is successful and the applicant is awarded exclusivity, it generally results in higher market share, net revenues and gross margin for that applicant. Even if we obtain FDA approval for our generic drug products, if we are not the first ANDA applicant to challenge a listed patent for such a product, we may lose significant advantages to a competitor that filed its ANDA containing such a challenge. The same would be true in situations where we are required to share our exclusivity period with other ANDA sponsors with Paragraph IV certifications. Such situations could have a material adverse effect on our ability to market that product profitably and on our financial position and results of operations, and the market value of our common stock could decline.

OUR APPROVED PRODUCTS MAY NOT ACHIEVE EXPECTED LEVELS OF MARKET ACCEPTANCE, WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR PROFITABILITY, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Even if we are able to obtain regulatory approvals for our new pharmaceutical products, generic or brand, the success of those products is dependent upon market acceptance. Levels of market acceptance for our new products could be impacted by several factors, including:

- the availability of alternative products from our competitors;
- the price of our products relative to that of our competitors;
- the timing of our market entry;
- the ability to market our products effectively to the retail level; and
- the acceptance of our products by government and private formularies.

Some of these factors are not within our control. Our new products may not achieve expected levels of market acceptance. Additionally, continuing studies of the proper utilization, safety and efficacy of pharmaceutical products are being conducted by the industry, government agencies and others. Such studies, which increasingly employ sophisticated methods and techniques, can call into question the utilization, safety and efficacy of previously marketed products. For example, on July 15, 2005, the FDA issued a Public Health Advisory regarding the safe use of

transdermal fentanyl patches, a product we currently market, the loss of revenues of which could have a significant impact on our business. In some cases, studies have resulted, and may in the future result, in the discontinuance of product marketing or other risk management programs such as the need for a patient registry. These situations, should they occur, could have a material adverse effect on our profitability, financial position and results of operations, and the market value of our common stock could decline.

Table of Contents

A RELATIVELY SMALL GROUP OF PRODUCTS MAY REPRESENT A SIGNIFICANT PORTION OF OUR NET REVENUES, GROSS PROFIT OR NET EARNINGS FROM TIME TO TIME. IF THE VOLUME OR PRICING OF ANY OF THESE PRODUCTS DECLINES, IT COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Sales of a limited number of our products often represent a significant portion of our net revenues, gross profit and net earnings. If the volume or pricing of our largest selling products declines in the future, our business, financial position and results of operations could be materially adversely affected, and the market value of our common stock could decline.

WE FACE VIGOROUS COMPETITION FROM OTHER PHARMACEUTICAL MANUFACTURERS THAT THREATENS THE COMMERCIAL ACCEPTANCE AND PRICING OF OUR PRODUCTS, WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Our competitors may be able to develop products and processes competitive with or superior to our own for many reasons, including that they may have:

proprietary processes or delivery systems;

larger research and development and marketing staffs;

larger production capabilities in a particular therapeutic area;

more experience in preclinical testing and human clinical trials;

more products; or

more experience in developing new drugs and financial resources, particularly with regard to brand manufacturers.

Any of these factors and others could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

BECAUSE THE PHARMACEUTICAL INDUSTRY IS HEAVILY REGULATED, WE FACE SIGNIFICANT COSTS AND UNCERTAINTIES ASSOCIATED WITH OUR EFFORTS TO COMPLY WITH APPLICABLE REGULATIONS. SHOULD WE FAIL TO COMPLY WE COULD EXPERIENCE MATERIAL ADVERSE EFFECTS ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS, AND THE MARKET VALUE OF OUR COMMON STOCK COULD DECLINE.

The pharmaceutical industry is subject to regulation by various federal and state governmental authorities. For instance, we must comply with FDA requirements with respect to the manufacture, labeling, sale, distribution, marketing, advertising, promotion and development of pharmaceutical products. Failure to comply with FDA and other governmental regulations can result in fines, disgorgement, unanticipated compliance expenditures, recall or seizure of products, total or partial suspension of production and/or distribution, suspension of the FDA's review of NDAs or ANDAs, enforcement actions, injunctions and criminal prosecution. Under certain circumstances, the FDA also has the authority to revoke previously granted drug approvals. Although we have internal regulatory compliance

programs and policies and have had a favorable compliance history, there is no guarantee that these programs, as currently designed, will meet regulatory agency standards in the future. Additionally, despite our efforts at compliance, there is no guarantee that we may not be deemed to be deficient in some manner in the future. If we were deemed to be deficient in any significant way, our business, financial position and results of operations could be materially affected and the market value of our common stock could decline.

In addition to the new drug approval process, the FDA also regulates the facilities and operational procedures that we use to manufacture our products. We must register our facilities with the FDA. All products manufactured in

Table of Contents

those facilities must be made in a manner consistent with current good manufacturing practices (cGMP). Compliance with cGMP regulations requires substantial expenditures of time, money and effort in such areas as production and quality control to ensure full technical compliance. The FDA periodically inspects our manufacturing facilities for compliance. FDA approval to manufacture a drug is site-specific. Failure to comply with cGMP regulations at one of our manufacturing facilities could result in an enforcement action brought by the FDA which could include withholding the approval of NDAs, ANDAs or other product applications of that facility. If the FDA were to require one of our manufacturing facilities to cease or limit production, our business could be adversely affected. Delay and cost in obtaining FDA approval to manufacture at a different facility also could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

We are subject, as are generally all manufacturers, to various federal, state and local laws regulating working conditions, as well as environmental protection laws and regulations, including those governing the discharge of materials into the environment. Although we have not incurred significant costs associated with complying with environmental provisions in the past, if changes to such environmental laws and regulations are made in the future that require significant changes in our operations or if we engage in the development and manufacturing of new products requiring new or different environmental controls, we may be required to expend significant funds. Such changes could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

OUR REPORTING AND PAYMENT OBLIGATIONS UNDER THE MEDICAID REBATE PROGRAM AND OTHER GOVERNMENTAL PURCHASING AND REBATE PROGRAMS ARE COMPLEX AND MAY INVOLVE SUBJECTIVE DECISIONS. ANY DETERMINATION OF FAILURE TO COMPLY WITH THOSE OBLIGATIONS COULD SUBJECT US TO PENALTIES AND SANCTIONS WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS, AND THE MARKET VALUE OF OUR COMMON STOCK COULD DECLINE.

The regulations regarding reporting and payment obligations with respect to Medicaid reimbursement and rebates and other governmental programs are complex, and as discussed elsewhere in this Form 10-Q, we and other pharmaceutical companies are defendants in a number of suits filed by state attorneys general and have been notified of an investigation by the U.S. Department of Justice with respect to Medicaid reimbursement and rebates. Our calculations and methodologies are currently being reviewed internally and likewise are subject to review and challenge by the applicable governmental agencies, and it is possible that such reviews could result in material changes. In addition, because our processes for these calculations and the judgments involved in making these calculations involve, and will continue to involve, subjective decisions and complex methodologies, these calculations are subject to the risk of errors.

In addition, as also disclosed in this Form 10-Q, a number of state and federal government agencies are conducting investigations of manufacturers' reporting practices with respect to Average Wholesale Prices (AWP), in which they have suggested that reporting of inflated AWP has led to excessive payments for prescription drugs. We and numerous other pharmaceutical companies have been named as defendants in various actions relating to pharmaceutical pricing issues and whether allegedly improper actions by pharmaceutical manufacturers led to excessive payments by Medicare and/or Medicaid.

Any governmental agencies that have commenced, or may commence, an investigation of the Company could impose, based on a claim of violation of fraud and false claims laws or otherwise, civil and/or criminal sanctions, including fines, penalties and possible exclusion from federal health care programs (including Medicaid and Medicare). Some of the applicable laws may impose liability even in the absence of specific intent to defraud. Furthermore, should there be ambiguity with regard to how to properly calculate and report payments-and even in the absence of any such

ambiguity-a governmental authority may take a position contrary to a position we have taken, and may impose civil and/or criminal sanctions. Any such penalties or sanctions could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

Table of Contents

WE EXPEND A SIGNIFICANT AMOUNT OF RESOURCES ON RESEARCH AND DEVELOPMENT EFFORTS THAT MAY NOT LEAD TO SUCCESSFUL PRODUCT INTRODUCTIONS. FAILURE TO SUCCESSFULLY INTRODUCE PRODUCTS INTO THE MARKET COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS, AND THE MARKET VALUE OF OUR COMMON STOCK COULD DECLINE.

Much of our development effort is focused on technically difficult-to-formulate products and/or products that require advanced manufacturing technology. We conduct research and development primarily to enable us to manufacture and market FDA-approved pharmaceuticals in accordance with FDA regulations. Typically, research expenses related to the development of innovative compounds and the filing of NDAs are significantly greater than those expenses associated with ANDAs. As we continue to develop new products, our research expenses will likely increase. Because of the inherent risk associated with research and development efforts in our industry, particularly with respect to new drugs (including, without limitation, nebivolol), our, or a partner's, research and development expenditures may not result in the successful introduction of FDA approved new pharmaceutical products. Also, after we submit an NDA or ANDA, the FDA may request that we conduct additional studies and as a result, we may be unable to reasonably determine the total research and development costs to develop a particular product. Finally, we cannot be certain that any investment made in developing products will be recovered, even if we are successful in commercialization. To the extent that we expend significant resources on research and development efforts and are not able, ultimately, to introduce successful new products as a result of those efforts, our business, financial position and results of operations may be materially adversely affected, and the market value of our common stock could decline.

A SIGNIFICANT PORTION OF OUR NET REVENUES ARE DERIVED FROM SALES TO A LIMITED NUMBER OF CUSTOMERS. ANY SIGNIFICANT REDUCTION OF BUSINESS WITH ANY OF THESE CUSTOMERS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS, AND THE MARKET VALUE OF OUR COMMON STOCK COULD DECLINE.

A significant portion of our net revenues are derived from sales to a limited number of customers. As such, a reduction in or loss of business with one customer, or if one customer were to experience difficulty in paying us on a timely basis, our business, financial position and results of operations could be materially adversely affected, and the market value of our common stock could decline.

THE USE OF LEGAL, REGULATORY AND LEGISLATIVE STRATEGIES BY COMPETITORS, BOTH BRAND AND GENERIC, INCLUDING AUTHORIZED GENERICS AND CITIZEN'S PETITIONS, AS WELL AS THE POTENTIAL IMPACT OF PROPOSED LEGISLATION, MAY INCREASE OUR COSTS ASSOCIATED WITH THE INTRODUCTION OR MARKETING OF OUR GENERIC PRODUCTS, COULD DELAY OR PREVENT SUCH INTRODUCTION AND/OR SIGNIFICANTLY REDUCE OUR PROFIT POTENTIAL. THESE FACTORS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Our competitors, both brand and generic, often pursue strategies to prevent or delay competition from generic alternatives to brand products. These strategies include, but are not limited to:

entering into agreements whereby other generic companies will begin to market an authorized generic, a generic equivalent of a branded product, at the same time generic competition initially enters the market;

filing citizen's petitions with the FDA, including timing the filings so as to thwart generic competition by causing delays of our product approvals;

seeking to establish regulatory and legal obstacles that would make it more difficult to demonstrate bioequivalence;

initiating legislative efforts in various states to limit the substitution of generic versions of brand pharmaceuticals;

Table of Contents

filing suits for patent infringement that automatically delay FDA approval of many generic products;

introducing next-generation products prior to the expiration of market exclusivity for the reference product, which often materially reduces the demand for the first generic product for which we seek FDA approval;

obtaining extensions of market exclusivity by conducting clinical trials of brand drugs in pediatric populations or by other potential methods as discussed below;

persuading the FDA to withdraw the approval of brand name drugs for which the patents are about to expire, thus allowing the brand name company to obtain new patented products serving as substitutes for the products withdrawn; and

seeking to obtain new patents on drugs for which patent protection is about to expire.

The Food and Drug Modernization Act of 1997 includes a pediatric exclusivity provision that may provide an additional six months of market exclusivity for indications of new or currently marketed drugs if certain agreed upon pediatric studies are completed by the applicant. Brand companies are utilizing this provision to extend periods of market exclusivity.

Some companies have lobbied Congress for amendments to the Waxman-Hatch legislation that would give them additional advantages over generic competitors. For example, although the term of a company's drug patent can be extended to reflect a portion of the time an NDA is under regulatory review, some companies have proposed extending the patent term by a full year for each year spent in clinical trials rather than the one-half year that is currently permitted.

If proposals like these were to become effective, our entry into the market and our ability to generate revenues associated with new products may be delayed, reduced or eliminated, which could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

THE INDENTURE FOR OUR SENIOR NOTES AND OUR CREDIT FACILITY IMPOSE SIGNIFICANT OPERATING AND FINANCIAL RESTRICTIONS, WHICH MAY PREVENT US FROM CAPITALIZING ON BUSINESS OPPORTUNITIES AND TAKING SOME ACTIONS. THESE FACTORS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

The indenture for our Senior Notes and credit facility impose significant operating and financial restrictions on us. These restrictions will limit the ability of us and our subsidiaries to, among other things, incur additional indebtedness at our subsidiaries, make investments, sell assets, incur certain liens, enter into agreements restricting our subsidiaries ability to pay dividends, or merge or consolidate. In addition, our senior credit facility requires us to maintain specified financial ratios. We cannot assure you that these covenants will not adversely affect our ability to finance our future operations or capital needs or to pursue available business opportunities. A breach of any of these covenants or our inability to maintain the required financial ratios could result in a default under the related indebtedness. If a default occurs, the relevant lenders could elect to declare our indebtedness, together with accrued interest and other fees, to be immediately due and payable. These factors could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

Table of Contents

OUR ABILITY TO SERVICE OUR DEBT AND MEET OUR CASH REQUIREMENTS DEPENDS ON MANY FACTORS, SOME OF WHICH ARE BEYOND OUR CONTROL. THESE FACTORS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Our ability to satisfy our obligations, including our Senior Notes and our credit facility, will depend on our future operating performance and financial results, which will be subject, in part, to factors beyond our control, including interest rates and general economic, financial and business conditions. If we are unable to generate sufficient cash flow, we may be required to: refinance all or a portion of our debt, including the notes and our senior credit facility; obtain additional financing in the future for acquisitions, working capital, capital expenditures and general corporate or other purposes; redirect a substantial portion of our cash flow to debt service, which as a result, might not be available for our operations or other purposes; sell some of our assets or operations; reduce or delay capital expenditures; or revise or delay our operations or strategic plans. If we are required to take any of these actions, it could have a material adverse effect on our business, financial condition or results of operations. In addition, we cannot assure you that we would be able to take any of these actions, that these actions would enable us to continue to satisfy our capital requirements or that these actions would be permitted under the terms of our credit facility and the indenture governing the notes. The leverage resulting from our notes offering and our credit facility could have certain material adverse effects on us, including limiting our ability to obtain additional financing and reducing cash available for our operations and acquisitions. As a result, our ability to withstand competitive pressures may be decreased and, we may be more vulnerable to economic downturns, which in turn could reduce our flexibility in responding to changing business, regulatory and economic conditions. These factors could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

WE DEPEND ON THIRD-PARTY SUPPLIERS AND DISTRIBUTORS FOR THE RAW MATERIALS, PARTICULARLY THE CHEMICAL COMPOUND(S) COMPRISING THE ACTIVE PHARMACEUTICAL INGREDIENT, THAT WE USE TO MANUFACTURE OUR PRODUCTS, AS WELL AS CERTAIN FINISHED GOODS. A PROLONGED INTERRUPTION IN THE SUPPLY OF SUCH PRODUCTS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS, AND THE MARKET VALUE OF OUR COMMON STOCK COULD DECLINE.

We typically purchase the active pharmaceutical ingredient (i.e. the chemical compounds that produce the desired therapeutic effect in our products) and other materials and supplies that we use in our manufacturing operations, as well as certain finished products, from many different foreign and domestic suppliers.

Additionally, we maintain safety stocks in our raw materials inventory, and in certain cases where we have listed only one supplier in our applications with the FDA, have received FDA approval to use alternative suppliers should the need arise. However, there is no guarantee that we will always have timely and sufficient access to a critical raw material or finished product. A prolonged interruption in the supply of a single-sourced raw material, including the active ingredient, or finished product could cause our financial position and results of operations to be materially adversely affected, and the market value of our common stock could decline. In addition, our manufacturing capabilities could be impacted by quality deficiencies in the products which our suppliers provide, which could have a material adverse effect on our business, financial position and results of operations, and the market value of our common stock could decline.

The Company utilizes controlled substances in certain of its current products and products in development and therefore must meet the requirements of the Controlled Substances Act of 1970 and the related regulations administered by the Drug Enforcement Administration (DEA). These regulations relate to the manufacture, shipment,

storage, sale and use of controlled substances. The DEA limits the availability of the active ingredients used in certain of our current products and products in development and, as a result, our procurement quota of these active ingredients may not be sufficient to meet commercial demand or complete clinical trials. We must annually apply to the DEA for procurement quota in order to obtain these substances. Any delay or refusal by the DEA in establishing our procurement quota for controlled substances could delay or stop our clinical trials or product

Table of Contents

launches, or could cause trade inventory disruptions for those products that have already been launched, which could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

WE USE SEVERAL MANUFACTURING FACILITIES TO MANUFACTURE OUR PRODUCTS. HOWEVER, A SIGNIFICANT NUMBER OF OUR PRODUCTS ARE PRODUCED AT ONE LOCATION. PRODUCTION AT THIS FACILITY COULD BE INTERRUPTED, WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Although we have other facilities, we produce a significant number of our products at our largest manufacturing facility. A significant disruption at that facility, even on a short-term basis, could impair our ability to produce and ship products to the market on a timely basis, which could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

WE MAY EXPERIENCE DECLINES IN THE SALES VOLUME AND PRICES OF OUR PRODUCTS AS THE RESULT OF THE CONTINUING TREND TOWARD CONSOLIDATION OF CERTAIN CUSTOMER GROUPS, SUCH AS THE WHOLESALE DRUG DISTRIBUTION AND RETAIL PHARMACY INDUSTRIES, AS WELL AS THE EMERGENCE OF LARGE BUYING GROUPS. THE RESULT OF SUCH DEVELOPMENTS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

We make a significant amount of our sales to a relatively small number of drug wholesalers and retail drug chains. These customers represent an essential part of the distribution chain of generic pharmaceutical products. Drug wholesalers and retail drug chains have undergone, and are continuing to undergo, significant consolidation. This consolidation may result in these groups gaining additional purchasing leverage and consequently increasing the product pricing pressures facing our business. Additionally, the emergence of large buying groups representing independent retail pharmacies and the prevalence and influence of managed care organizations and similar institutions potentially enable those groups to attempt to extract price discounts on our products. The result of these developments may have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

WE MAY BE UNABLE TO PROTECT OUR INTELLECTUAL AND OTHER PROPRIETARY PROPERTY IN AN EFFECTIVE MANNER, WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Although our brand products may have patent protection, this may not prevent other companies from developing functionally equivalent products or from challenging the validity or enforceability of our patents. If any patents we use in our business are found or even alleged to be non-infringed, invalid or not enforceable, we could experience an adverse effect on our ability to commercially promote our patented products. We could be required to enforce our patent or other intellectual property rights through litigation, which can be protracted and involve significant expense and an inherently uncertain outcome. Any negative outcome could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

Table of Contents

OUR COMPETITORS INCLUDING BRAND COMPANIES OR OTHER THIRD PARTIES MAY ALLEGE THAT WE ARE INFRINGING THEIR INTELLECTUAL PROPERTY, FORCING US TO EXPEND SUBSTANTIAL RESOURCES IN RESULTING LITIGATION, THE OUTCOME OF WHICH IS UNCERTAIN. ANY UNFAVORABLE OUTCOME OF SUCH LITIGATION COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Companies that produce brand pharmaceutical products routinely bring litigation against ANDA applicants that seek FDA approval to manufacture and market generic forms of their branded products. These companies allege patent infringement or other violations of intellectual property rights as the basis for filing suit against an ANDA applicant. Likewise, patent holders may bring patent infringement suits against companies that are currently marketing and selling their approved generic products. Litigation often involves significant expense and can delay or prevent introduction or sale of our generic products.

There may also be situations where the Company uses its business judgment and decides to market and sell products, notwithstanding the fact that allegations of patent infringement(s) have not been finally resolved by the courts. The risk involved in doing so can be substantial because the remedies available to the owner of a patent for infringement include, among other things, damages measured by the profits lost by the patent owner and not by the profits earned by the infringer. In the case of a willful infringement, the definition of which is subjective, such damages may be trebled. Moreover, because of the discount pricing typically involved with bioequivalent products, patented brand products generally realize a substantially higher profit margin than bioequivalent products. An adverse decision in a case such as this or in other similar litigation could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

WE MAY EXPERIENCE REDUCTIONS IN THE LEVELS OF REIMBURSEMENT FOR PHARMACEUTICAL PRODUCTS BY GOVERNMENTAL AUTHORITIES, HMOs OR OTHER THIRD-PARTY PAYERS. ANY SUCH REDUCTIONS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Various governmental authorities and private health insurers and other organizations, such as HMOs, provide reimbursement to consumers for the cost of certain pharmaceutical products. Demand for our products depends in part on the extent to which such reimbursement is available. Third-party payers increasingly challenge the pricing of pharmaceutical products. This trend and other trends toward the growth of HMOs, managed health care and legislative health care reform create significant uncertainties regarding the future levels of reimbursement for pharmaceutical products. Further, any reimbursement may be reduced in the future, perhaps to the point that market demand for our products declines. Such a decline could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

LEGISLATIVE OR REGULATORY PROGRAMS THAT MAY INFLUENCE PRICES OF PRESCRIPTION DRUGS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Current or future federal or state laws and regulations may influence the prices of drugs and, therefore, could adversely affect the prices that we receive for our products. Programs in existence in certain states seek to set prices of all drugs sold within those states through the regulation and administration of the sale of prescription drugs. Expansion of these programs, in particular, state Medicaid programs, or changes required in the way in which

Medicaid rebates are calculated under such programs, could adversely affect the price we receive for our products and could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

Table of Contents

WE ARE INVOLVED IN VARIOUS LEGAL PROCEEDINGS AND CERTAIN GOVERNMENT INQUIRIES AND MAY EXPERIENCE UNFAVORABLE OUTCOMES OF SUCH PROCEEDINGS OR INQUIRIES, WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

We are involved in various legal proceedings and certain government inquiries, including, but not limited to, patent infringement, product liability, breach of contract and claims involving Medicaid and Medicare reimbursements, some of which are described in our periodic reports and involve claims for, or the possibility of fines and penalties involving, substantial amounts of money or other relief. If any of these legal proceedings or inquiries were to result in an adverse outcome, the impact could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

With respect to product liability, the Company maintains commercial insurance to protect against and manage a portion of the risks involved in conducting its business. Although we carry insurance, we believe that no reasonable amount of insurance can fully protect against all such risks because of the potential liability inherent in the business of producing pharmaceuticals for human consumption. To the extent that a loss occurs, depending on the nature of the loss and the level of insurance coverage maintained, it could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

WE ENTER INTO VARIOUS AGREEMENTS IN THE NORMAL COURSE OF BUSINESS WHICH PERIODICALLY INCORPORATE PROVISIONS WHEREBY WE INDEMNIFY THE OTHER PARTY TO THE AGREEMENT. IN THE EVENT THAT WE WOULD HAVE TO PERFORM UNDER THESE INDEMNIFICATION PROVISIONS, IT COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

In the normal course of business, we periodically enter into employment, legal settlement, and other agreements which incorporate indemnification provisions. We maintain insurance coverage which we believe will effectively mitigate our obligations under certain of these indemnification provisions. However, should our obligation under an indemnification provision exceed our coverage or should coverage be denied, our business, financial position and results of operations could be materially affected and the market value of our common stock could decline.

OUR ACQUISITION OF A CONTROLLING INTEREST IN MATRIX LABORATORIES INVOLVES A NUMBER OF INHERENT RISKS, WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

On August 28, 2006, we entered into an agreement to acquire up to 71.5% of Matrix's shares outstanding for 306 rupees per Matrix share. The acquisition was completed on January 8, 2007. However, the anticipated synergies and other benefits from the acquisition may not be achieved, and the strategic collaboration of the two businesses will involve challenges and costs, including ensuring compliance with Section 404 of the Sarbanes-Oxley Act of 2002 as of March 31, 2008, all of which could result in the costs of the acquisition exceeding its realized benefits. Furthermore, we cannot predict, among other things: the effect of any changes in customer and supplier relationships and customer purchasing patterns; changes in foreign currency exchange rates which could affect the net assets to be acquired; the impact and effects of legal or regulatory proceedings, actions or changes; general market perception of the transaction; exposure to lawsuits and contingencies associated with the acquisition; our ability to retain key employees; and other uncertainties and matters beyond our control. Certain of the above factors could have a material

adverse effect on our business, financial position and results of operations and could cause a decline in the market value of our common stock.

Table of Contents

OUR ACQUISITION OF A CONTROLLING INTEREST IN MATRIX LABORATORIES AND OUR PLANS FOR FURTHER GLOBAL EXPANSION EXPOSE THE COMPANY TO ADDITIONAL RISKS WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

With our recently completed acquisition of Matrix, Mylan's operations extend to numerous countries outside the U.S., including India, in which Matrix is headquartered. Operating globally exposes us to certain additional risks including, but not limited to:

compliance with a variety of national and local laws of countries in which we do business, including restrictions on the import and export of certain intermediates, drugs and technologies, and the risk that our competitors may have more experience with operations in such countries or with international operations generally;

difficulties integrating new facilities in different countries into our existing operations, as well as integrating employees that we hire in different countries into our existing corporate culture;

fluctuations in exchange rates for transactions conducted in currencies other than the U.S. dollar;

adverse changes in the Indian economy and other economies in which we operate as a result of a slowdown in overall growth, a change in government or economic liberalization policies, or financial instability in other countries who influence the economies in which we operate, particularly emerging market countries in Asia;

wage increases or rising inflation in India or other countries in which we operate;

natural disasters, including drought, floods and earthquakes in India or other countries in which we operate; and

communal disturbances, terrorist attacks, riots or regional hostilities in India or other countries in which we operate;

Certain of the above factors could have a material adverse effect on our business, financial position and results of operations and could cause a decline in the market value of our common stock.

WE INTEND TO CONTINUE PURSUING OUR ACQUISITION STRATEGY, WHICH INVOLVES A NUMBER OF INHERENT RISKS. THESE RISKS COULD CAUSE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

We continually seek to expand our product line through complementary or strategic acquisitions of other companies, products and assets, and through joint ventures, licensing agreements or other arrangements. Acquisitions, joint ventures and other business combinations involve various inherent risks, such as:

diversion of management's attention from our ongoing business;

the failure to assess accurately the values, strengths, weaknesses, contingent and other liabilities, regulatory compliance and potential profitability of acquisition or other transaction candidates;

the potential loss of key personnel or customers of an acquired business;

failing to successfully manage acquired businesses or increase our cash flow from their operations;

failing to successfully integrate the operations and personnel of the acquired businesses with our ongoing business, and our resulting inability to achieve identified financial and operating synergies anticipated to result from an acquisition or other transaction;

unanticipated changes in business and economic conditions affecting an acquisition or other transaction;

Table of Contents

incurring additional indebtedness, assuming liabilities and incurring significant additional capital expenditures, transaction and operating expenses and non-recurring acquisition-related charges;

potentially experiencing an adverse impact on our earnings from the amortization or write-off of acquired goodwill and other intangible assets;

acquiring businesses or entering new markets with which we are not familiar; and

international acquisitions, and other transactions, could also be affected by export controls, exchange rate fluctuations, domestic and foreign political conditions and the deterioration in domestic and foreign economic conditions.

We may be unable to realize synergies or other benefits expected to result from acquisitions, joint ventures and other transactions or investments we may undertake, or be unable to generate additional revenue to offset any unanticipated inability to realize these expected synergies or benefits. Realization of the anticipated benefits of acquisitions or other transactions could take longer than expected, and implementation difficulties, unforeseen expenses, complications and delays, market factors and the deterioration in domestic and global economic conditions could alter the anticipated benefits of any such transactions. These factors could impair our growth and ability to compete, require us to focus resources on integration of operations rather than other profitable areas, otherwise cause a material adverse effect on our business, financial position and results of operations and could cause a decline in the market value of our common stock.

In addition, we may compete for certain acquisition targets with companies having greater financial resources than us or other advantages over us that may prevent us from acquiring a target.

We anticipate that we may finance acquisitions through cash on hand, cash provided by operating activities, borrowings under our credit facility and other indebtedness, which would reduce our cash available for other purposes, including the repayment of indebtedness and payment of dividends.

OUR FUTURE SUCCESS IS HIGHLY DEPENDENT ON OUR CONTINUED ABILITY TO ATTRACT AND RETAIN KEY PERSONNEL. ANY FAILURE TO ATTRACT AND RETAIN KEY PERSONNEL COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Because our success is largely dependent on the scientific nature of our business, it is imperative that we attract and retain qualified personnel in order to develop new products and compete effectively. If we fail to attract and retain key scientific, technical or management personnel, our business could be affected adversely. Additionally, while we have employment agreements with certain key employees in place, their employment for the duration of the agreement is not guaranteed. If we are unsuccessful in retaining all of our key employees, it could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

RECENT DECISIONS BY THE FDA, CURRENT BRAND TACTICS AND OTHER FACTORS BEYOND OUR CONTROL HAVE PLACED OUR BUSINESS UNDER INCREASING PRESSURE, WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

We believe that certain recent FDA rulings are contrary to multiple sections of the Federal Food, Drug, and Cosmetic Act and the Administrative Procedures Act, the FDA's published regulations and the legal precedent on point. These decisions call into question the rules of engagement in our industry and have added a level of unpredictability that may materially adversely affect our business and the generic industry as a whole. While we continue to challenge these recent decisions as well as current brand tactics that undermine congressional intent, we cannot guarantee that we will prevail or predict when or if these matters will be rectified. If they are not, our business, financial position and results of operations could suffer and the market value of our common stock could decline.

Table of Contents

WE HAVE BEGUN THE IMPLEMENTATION OF AN ENTERPRISE RESOURCE PLANNING SYSTEM. AS WITH ANY IMPLEMENTATION OF A SIGNIFICANT NEW SYSTEM, DIFFICULTIES ENCOUNTERED COULD RESULT IN BUSINESS INTERRUPTIONS, AND COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

We have begun the implementation of an enterprise resource planning (ERP) system to enhance operating efficiencies and provide more effective management of our business operations. Implementations of ERP systems and related software carry risks such as cost overruns, project delays and business interruptions and delays. If we experience a material business interruption as a result of our ERP implementation, it could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

WE MUST MAINTAIN ADEQUATE INTERNAL CONTROLS AND BE ABLE, ON AN ANNUAL BASIS, TO PROVIDE AN ASSERTION AS TO THE EFFECTIVENESS OF SUCH CONTROLS. FAILURE TO MAINTAIN ADEQUATE INTERNAL CONTROLS OR TO IMPLEMENT NEW OR IMPROVED CONTROLS COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE.

Effective internal controls are necessary for the Company to provide reasonable assurance with respect to its financial reports. We are spending a substantial amount of management time and resources to comply with changing laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, new SEC regulations and the New York Stock Exchange rules. In particular, Section 404 of the Sarbanes-Oxley Act of 2002 requires management s annual review and evaluation of our internal control over financial reporting and attestations as to the effectiveness of these controls by our independent registered public accounting firm. If we fail to maintain the adequacy of our internal controls, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal control over financial reporting. Additionally, internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Therefore, even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. In addition, projections of any evaluation of effectiveness of internal control over financial reporting to future periods are subject to the risk that the control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. If the Company fails to maintain the adequacy of its internal controls, including any failure to implement required new or improved controls, this could have a material adverse effect on our business, financial position and results of operations, and the market value of our common stock could decline.

THERE ARE INHERENT UNCERTAINTIES INVOLVED IN ESTIMATES, JUDGMENTS AND ASSUMPTIONS USED IN THE PREPARATION OF FINANCIAL STATEMENTS IN ACCORDANCE WITH GAAP. ANY FUTURE CHANGES IN ESTIMATES, JUDGMENTS AND ASSUMPTIONS USED OR NECESSARY REVISIONS TO PRIOR ESTIMATES, JUDGMENTS OR ASSUMPTIONS COULD LEAD TO A RESTATEMENT WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, FINANCIAL POSITION AND RESULTS OF OPERATIONS AND COULD CAUSE THE MARKET VALUE OF OUR COMMON STOCK TO DECLINE. IN ADDITION, BEGINNING IN FISCAL 2008, WE ARE NOT PROVIDING ESTIMATED EPS GUIDANCE AND CAUTION THAT INVESTORS SHOULD NOT RELY ON ESTIMATES MADE BY OTHERS.

The consolidated and condensed consolidated financial statements included in the periodic reports we file with the SEC are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The preparation of financial statements in accordance with GAAP involves making estimates, judgments and assumptions that affect reported amounts of assets (including intangible assets), liabilities, revenues, expenses and income. Estimates, judgments and assumptions are inherently subject to change in the future and any necessary revisions to prior estimates, judgments or assumptions could lead to a restatement. Any such changes

Table of Contents

could result in corresponding changes to the amounts of assets (including goodwill and other intangible assets), liabilities, revenues, expenses and income. Any such changes could have a material adverse effect on our business, financial position and results of operations and could cause the market value of our common stock to decline.

On February 1, 2007, we announced that for fiscal 2008 and beyond, in lieu of providing guidance as to our estimated earnings per share, we are planning to provide details of our growth plan as well as long-term estimates and metrics to outline our planned investments in areas such as research and development, capital projects and operating expenses. Any third-party estimates of our expected earnings per share have been and will be made without our participation or endorsement. Because these estimates may be inaccurate, we caution against reliance upon them in making an investment decision.

ITEM 6. EXHIBITS

- 3.1 Amended and Restated Articles of Incorporation of the registrant, as amended to date, filed as Exhibit 3.1 to the Form 10-Q for the quarterly period ended June 30, 2003, and incorporated herein by reference.
- 3.2 Bylaws of the registrant, as amended to date, filed as Exhibit 3.1 to the Report of Form 8-K filed on February 22, 2005, and incorporated herein by reference.
- 4.1(a) Rights Agreement dated as of August 22, 1996, between the registrant and American Stock Transfer & Trust Company, filed as Exhibit 4.1 to the Report on Form 8-K filed with the SEC on September 3, 1996, and incorporated herein by reference.
- 4.1(b) Amendment to Rights Agreement dated as of November 8, 1999, between the registrant and American Stock Transfer & Trust Company, filed as Exhibit 1 to Form 8-A/A filed with the SEC on March 31, 2000, and incorporated herein by reference.
- 4.1(c) Amendment No. 2 to Rights Agreement dated as of August 13, 2004, between the registrant and American Stock Transfer & Trust Company, filed as Exhibit 4.1 to the Report on Form 8-K filed with the SEC on August 16, 2004, and incorporated herein by reference.
- 4.1(d) Amendment No. 3 to Rights Agreement dated as of September 8, 2004, between the registrant and American Stock Transfer & Trust Company, filed as Exhibit 4.1 to the Report on Form 8-K filed with the SEC on September 9, 2004, and incorporated herein by reference.
- 4.1(e) Amendment No. 4 to Rights Agreement dated as of December 2, 2004, between the registrant and American Stock Transfer & Trust Company, filed as Exhibit 4.1 to the Report on Form 8-K filed with the SEC on December 3, 2004, and incorporated herein by reference.
