FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute "forward-looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions which are predictions of or indicate future events and future trends which do not relate to historical matters identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the highly cyclical nature of the pulp and paper industry; pulp and paper production, production capacity and pricing levels in North America, Europe, Asia and southern Africa; any major disruption in production at the Group's key facilities; changes in environmental, tax and other laws and regulations; adverse changes in the markets for the Group's products; any delays, unexpected costs or other problems experienced with any business acquired or to be acquired; consequences of the Group's leverage; adverse changes in the South African political situation and economy or the effect of governmental efforts to address present or future economic or social problems; and the impact of future investments, acquisitions and dispositions (including the financing of investments and acquisitions) and any delays, unexpected costs or other problems experienced in connection with dispositions. These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

COMMENT

The performance of our fine paper businesses was disappointing in the United States, encouraging in Europe although prices remain weak, and satisfactory in South Africa. The forest products business experienced strong demand and

Edgar Filing: SAPPI LTD - Form 6-K

performed well notwithstanding the strength of the Rand.

Market conditions in the quarter were very different in our two major fine paper markets. In Europe apparent consumption of coated fine paper (defined as shipments plus imports less exports) showed growth of 6% in the quarter compared to a year earlier. However, prices remain weak. In the United States the strength of GDP growth did not translate into a recovery in demand for coated paper. Coated fine paper apparent consumption for the quarter was down approximately 13% compared to a year earlier and 6% compared to the prior quarter. Despite the weakening of the US Dollar against the Euro, imports into the United States for October and November remained at a high level but were down 2% compared to a year earlier. Prices remained under pressure and in the case of sheeted product this is reflected in a shift towards lower priced products, including imports.

As anticipated in our last quarterly results announcement, we took charges in this quarter in respect of the closure costs of paper machine 14 at the Westbrook mill (US\$15 million pre-tax); staff reduction (US\$14 million pre-tax) and increased costs in connection with major maintenance shuts at all our North American mills (US\$15 million pre-tax higher than last year). These charges and additional shut costs amount to approximately US\$44 million pre-tax, US\$33 million post-tax, and 15 US cents per share.

After these charges and costs we recorded a net loss and headline loss of US\$21 million.

Costs have generally been well controlled but North American wood and energy costs were US\$6 million higher than last year. Selling, General and Administrative expenses for the quarter were US\$125 million, US\$48 million higher than last year, partly as a result of the US\$29 million charge for the Westbrook closure and staff reduction and partly as a result of currency translation to the weaker US Dollar (US\$12 million).

Following the application of the new Agriculture Accounting Standard - AC137 (IFRS 41) in the quarter movements in the fair value of plantations now impact operating profit. The change had a favourable impact of US\$7 million after tax in the quarter as a result of volume growth and operating efficiencies.

Net finance costs for the quarter were US\$28 million compared to US\$29 million last year. They were US\$7 million higher than the September quarter as a result of changes in the fair value of financial instruments.

7

Tax for the quarter was at an effective rate of 25% which is higher than the expected rate for the balance of the year, as a result of the charges and losses in the United States.

CASH FLOW

Cash generated by operations remained positive at US\$106 million for the quarter despite weak trading conditions but was 29% lower than the previous quarter and 40% lower than the same quarter last year.

Working capital increased by US\$113 million in the quarter mainly as a result of lower payables. This movement was significantly lower than the equivalent quarter last year.

Edgar Filing: SAPPI LTD - Form 6-K

Capital expenditure in the quarter was US\$83 million, 83% of depreciation.

We repurchased approximately 1 million of our shares in the quarter at a cost of US\$13 million.

8

OPERATING REVIEW FOR THE QUARTER

SAPPI FINE PAPER

	Quarter ended Dec 2003 US\$ million	Quarter ended Dec 2002 US\$ million	%
			change
Sales	905	862	5.0
Operating (loss) profit	(34)	57	-
Operating (loss) profit to sales (%)	(3.7)	6.6	-

Our fine paper business continued to be impacted by low prices and higher costs in all regions. In the United States this was exacerbated by weak demand and the high level of imports. Our South African business was faced with increased competition from imports as a result of the relatively strong currency. The average exchange rate was R6.86 per US Dollar in the quarter compared to R9.73 a year earlier.

The highlight of the quarter was improving order levels and sales volumes in Europe, primarily for the European market.

We are focusing management attention on improving the performance of our North American business.

Europe

	Quarter ended Dec 2003 US\$ million	Quarter ended Dec 2002 US\$ million	% change (US\$)	% change (Euros)
Sales	518	434	19.4	0.4
Operating profit	15	39	(61.5)	(67.8)
Operating profit to sales (%)	2.9	9.0	-	-

Our sales volumes, including exports, increased 12% compared to a year earlier, reflecting the stronger apparent consumption in Europe.

Price pressure continued in the quarter and average prices realised in Euros were about 10% below a year earlier. This includes the effect of the relatively weaker US Dollar on the realised value of exports to the United States and elsewhere.

Edgar Filing: SAPPI LTD - Form 6-K

9

North America

	Quarter ended Dec 2003 US\$ million	Quarter ended Dec 2002 US\$ million	% change
Sales	316	369	(14.4)
Operating (loss) profit	(54)	9	-
Operating (loss) profit to sales (%)	(17.1)	2.4	-

There has been no sign of a recovery in our sector in the United States despite strong economic growth figures. In the past there has generally been a good but lagging correlation between corporate profits and coated paper consumption, which we still expect will result in improved consumption of coated fine paper once market inventories return to normal levels.

The underlying performance of our North American business was unsatisfactory and the results were further impacted by the charges for the paper machine closure, staff reduction and increased major shut costs. The closure of the Westbrook paper machine and transfer of its output proceeded smoothly and we expect to see the benefits in subsequent quarters.

Sales volume of coated fine paper was 11% lower than last year reflecting industry conditions. This reduction is emphasised by the strong seasonal demand in the comparative quarter last year.

Average prices realised for paper were 6% lower than last year and 3% lower compared to the prior quarter, which includes the effect of a mix-shift to lower priced products. We have continued to enhance our product offerings and are in a strong position to meet our customers' requirements and to benefit from the stronger economy.

Operating costs were influenced by the higher wood and energy costs and this trend has continued into our second quarter.

10

Fine Paper South Africa

	Quarter ended Dec 2003 US\$ million	Quarter ended Dec 2002 US\$ million	% change (US\$)	% change (Rands)
Sales	71	59	20.3	(15.2)
Operating profit	5	9	(44.4)	(60.8)
Operating profit to sales (%)	7.0	15.3	-	-

Demand in the South African market was firm in the quarter; however, the strength of the Rand has resulted in increased competition from imports and downward pressure on prices. This has resulted in a continued squeeze on our margins.

Edgar Filing: SAPPI LTD - Form 6-K

Forest Products	Quarter ended Dec 2003 US\$ million	Quarter ended Dec 2002 US\$ million	% change (US\$)	% change (Rands)
Sales	215	157	36.9	(3.5)
Operating profit	35	37	(5.4)	(33.3)
Operating profit to sales (%)	16.3	23.6	-	-

Demand in the local market was firm in the quarter. Our dissolving pulp business continued to perform well with good demand from the viscose and acetate markets.

Our total volume of pulp and paper sold increased 14% compared to a year earlier. Average prices realised were 12% lower in Rands but as a result of currency translation, significantly higher in US Dollars than a year earlier.

11

OUTLOOK

World economic conditions appear to be improving on a wide front. We are seeing improved demand in Europe, which we expect to continue.

Our biggest turnaround opportunity remains in the United States where the paper sector has not yet benefited from the strength of GDP growth.

We expect strong demand to continue for our South African businesses but the volatility of the Rand continues to play a major role in their profitability.

With no recovery yet discernible in our fine paper business in the United States, and assuming no marked changes in our other major markets, the next quarter's earnings are likely to be at a similar level to the last quarter excluding charges and additional costs. Given the delay in the turnaround it is now less likely that we will achieve an improvement in earnings for the full fiscal year compared to 2003, before the paper machine closure and staff reduction charges.

FORWARD-LOOKING STATEMENTS

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives. Undue reliance should not be placed on such statements because, by their nature, they are subject to known and unknown risks and uncertainties and can be affected by other factors, that could cause actual results and company plans and objectives to differ materially from those expressed or implied in the forward-looking statements (or from past results). Such risks, uncertainties and factors include, but are not limited to the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production and pricing), adverse changes in the markets for the group's products, consequences of substantial leverage, changing regulatory requirements, unanticipated production disruptions, economic and political conditions in international markets, the impact of investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced with integrating acquisitions and achieving expected savings and synergies and currency fluctuations. The company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

NOTES TO THE GROUP RESULTS

1. Basis of preparation

The financial statements are prepared in conformity with South African Statements of Generally Accepted Accounting Practice (SA GAAP). The preliminary results have been prepared in compliance with AC 127 (Interim financial reporting) and are based on accounting policies which are consistent with those used in the annual financial statements. The same accounting policies have been followed as in the annual financial statements for September 2003, except for the new agriculture accounting standard - Agriculture - AC 137 (IAS 41) which became effective during the period.

The effect on equity for the above change is reflected in the Group statement of changes in shareholders' equity. The effect on net profit for the current period is an increase of US\$7 million (September 2003 quarter: decrease of US\$1 million; December 2002 quarter: decrease of US\$1 million). Where appropriate, comparative figures have been restated.

Edgar Filing: SAPPI LTD - Form 6-K

The preliminary results for the quarter have been reviewed by the group's auditors, Deloitte & Touche. Their unqualified review report is available for inspection at the company's registered offices.

2. Comparative figures

Comparative figures have been restated to take into account the effects of the new agriculture accounting standard which became effective during the period. The effect on operating profit is the inclusion of the market value changes in the value of plantations and the expensing of the costs incurred to establish and maintain plantations (siliviculture costs) and the amortisation of interest which had been previously capitalised. Net finance costs have increased. In terms of the new accounting standard, interest is no longer capitalised to the carrying value of plantations.

The effect on the cash flow statement is a reclassification of investments in plantations from cash utilised in investing activities to cash generated by operations. Net cash flows remain the same.

In September 2003, cash and overdraft were restated to gross up amounts previously set-off. The December 2002 cash flow statement has been restated to take the effects of this into account.

 SUPPLEMENTAL INFORMATION

ADDITIONAL INFORMATION

	REVIEWED QUARTER ENDED DEC 2003 US\$ MILLION	Reviewed Quarter ended Dec 2002 US\$ million
1. NET (LOSS) PROFIT TO EBITDA* RECONCILIATION		
Net (loss) profit	(21)	51
Net finance costs	28	29
Taxation - current	8	14
- deferred	(15)	1
Depreciation	100	85
Amortisation (including fellings)	14	9

EBITDA*	114	189
=====		

* Earnings before interest (net finance costs), tax, depreciation and amortisation

In connection with the U.S. Securities Exchange Commission ("SEC") rules relating to "Conditions for Use of Non-GAAP Financial Measures", we have reconciled EBITDA to net profit rather than operating profit and recalculated EBITDA to exclude interest (net finance costs), taxes,

Edgar Filing: SAPPI LTD - Form 6-K

depreciation and amortisation (including fellings). As a result our definition has been amended to retain non-trading profit/loss as part of EBITDA. The comparative information has been restated to take this into account. There was no effect on EBITDA in the current and prior year quarter for the amended definition.

We use EBITDA as an internal measure of performance and believe it is a useful and commonly used measure of financial performance in addition to operating profit and other profitability measures under SA GAAP. EBITDA is not a measure of performance under SA GAAP. EBITDA should not be construed as an alternative to operating profit as an indicator of the company's operations in accordance with SA GAAP. EBITDA is also presented to assist our shareholders and the investment community in interpreting our financial results. This financial measure is regularly used as a means of comparison of companies in our industry by removing certain differences between companies such as depreciation methods, financing structures and taxation regimes. Different companies and analysts may calculate EBITDA differently, so making comparisons among companies on this basis should be done very carefully.
